NEW UTAH STATION RECOMMENDED

The Eastern Utah Broadcasting Company applied to the Federal Communications Commission for a construction permit for the erection of a new station to be located at Price, Utah, to use 1420 kilocycles, 100 watts power and unlimited time on the air.

Examiner P. W. Seward in Report No. I-172 recommended that the application be granted. The Examiner found that a need for additional "service in the area does not exist," and "that the site at which it is proposed to construct and operate the station will be in conformity with the recommendations of the Engineering Department."

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

Capps Gold Mine, Ltd., Toronto, Canada (2-1807, Form A-1)
Oklahoma-Texas Trust, Tulsa, Okla. (2-1808, Form A-1)
Marine Airlines, Inc., New York City (2-1809, Form A-1)
Tip Top Gold Mines, Inc., Denver, Colo. (2-1810, Form A-1)
American Fidelity Corp., Ltd., San Diego, Cal. (2-1811, Form G-1)
Samuel Mundheim, et al., New York City (2-1812, Form F-1)
Distillation Engineering Corp., Kansas City, Mo. (2-1813, Form A-1)
Scottish-Plan Associates, Greenwich, Conn. (2-1814, Form A-1)
Florida Towing Corp., Jacksonville, Florida (2-1816, Form C-1)
Bank & Insurance Shares, Inc., Philadelphia, Pa. (2-1817, Form C-1)
Columbia Crude Corporation, Salt Lake City, Utah (2-1818, Form A-1)
Comsec Corporation, Jersey City, N. J. (2-1896, Form A-1)

CHANGES RECOMMENDED FOR KG CX

Broadcasting station KG CX, Wolf Point, Mont., applied to the Federal Communications Commission to change its frequency from 1310 to 1450 kilocycles and to increase its power from 100 watts and 250 watts local sunset to 1,000 watts and from specified hours of operation to unlimited time.

Examiner John P. Bramhall, in Report No. I-164, has recommended that the application be granted. He found that there is need for additional service in the area proposed to be served; and that it "will serve public interest, convenience and necessity."

NOTES TO SALES STAFF

Broadcast advertising reached nearly the \$79,000,000 mark for the first eleven months of 1935, and promises at least an \$86,000,000 total for the year as compared to slightly less than \$73,000,000 in 1934. (See Table I, page 1136.)

Salesmen of regional networks will be pleased to see that regional volume has continued at 50.0% ahead of the corresponding months of 1934. (See Table I, page 1136.)

The continued strength of live talent business in the national non-network field and the recent important increases in the use of transcriptions by local broadcast advertisers should be of interest. (See Non-network Advertising by Type of Rendition, page 1137.)

The increased use of regional networks and national non-network advertising by confectionery manufacturers should be of interest, as should be the sevenfold rise in national non-network automotive advertising. (See Sponsor Trends in October and Comparison with 1934, page 1138.)

WEDC LICENSE RENEWAL RECOMMENDED

Broadcasting Station WEDC, Chicago, Ill., applied to the Federal Communications Commission for license renewal. The application was designated for hearing by the Commission. It operates on 1210 kilocycles, 100 watts power and specified hours.

Examiner R. H. Hyde, in Report No. I-169, recommended that the station's license be renewed. The Examiner stated that "the programs sponsored by Dr. Schyman and "Dr. Michael" did not serve the public interest but were in fact inimical to the interests of the public. The applicant's evidence affords substantial assurance that hereafter sufficient attention will be given to the selection of program matter to prevent the repetition of such broadcasts."

PENDING RADIO LEGISLATION

The second session of the Seventy-Fourth Congress will convene on January 3. Inasmuch as this is not a new Congress but simply another session the radio bills and other bills of interest to the broadcasters are pending legislation and go ahead from their status at the last session.

In addition to bills dealing specifically with radio there is the copyright bill and the pure food and drug bill, together with several others which affect broadcasters. Following is a list of these bills showing the committee to which they were referred and any action which has been taken.

Senate

S. 4—Copeland, Vandenberg, Murphy bill "to prevent the promotion of fraud through interstate communication"—Committee on Commerce. No hearings held and no action.

S. 5—Copeland pure food and drug bill. Passed the Senate at the last session and now pending before the House Committee on Interstate and Foreign Commerce.

S. 541—Capper bill "to prohibit the transportation in interstate commerce of advertisements of intoxicating liquors"—Committee on Interstate Commerce. No hearings and no action.

S. 820—Neely bill "relating to costs in radio proceedings before the Federal Communications Commission"—Committee on Interstate Commerce. No hearings and no action.

S. 1336—Wheeler bill "to amend paragraph (f) of section 4 of the Communications Act of 1934"—Committee on Interstate Com-

merce. Passed by the Senate and favorably reported by the House Committee but no action by the House.

S. 2243—Wheeler bill "relating to the allocation of radio facilities"—Committee on Interstate Commerce. No hearings and no action.

S. 3047—Copyright bill. Passed Senate at last session and now pending in House Committee on Patents.

S. 3261—Walsh bill to have foreign government programs approved by State Department—Committee on Interstate Commerce. No hearings and no action.

House

H. R. 55—Rudd bill "to amend the Radio Act of 1927"—Committee on Interstate and Foreign Commerce. No hearings and no action.

H. R. 197—Buckbee bill "to prohibit untrue, deceptive, or misleading advertising through the use of the mails or in interstate or foreign commerce"—Committee on Interstate and Foreign Commerce. No hearings and no action.

H. R. 3252—Sauthoff bill "to prohibit the use of the mails, certain periodicals, and broadcasting stations, having a range covering more than one State, to the advertising of loans for which interest in excess of 15 per cent per annum is charged"—Committee on Post Offices and Post Roads. Hearings held March 8. No report.

H. R. 8404—Culkin bill "to prohibit advertising of alcoholic beverages in interstate commerce"—Committee on Interstate and Foreign Commerce. No hearings; no action.

H. R. 8475—Monaghan bill "to amend the Communications Act of 1934 by establishing a Radio Commission"—Committee on Interstate and Foreign Commerce. No hearings and no action.

H. R. 8852—McKeough bill to have foreign radio programs approved by the State Department—Committee on Interstate and Foreign Commerce. No hearings and no action.

H. R. 9229—Scott bill "to amend section 326 of the Communications Act of 1934," dealing with censorship—Committee on Interstate and Foreign Commerce. No hearings and no action.

H. R. 9230—Scott bill "to amend section 315 of the Communications Act of 1934" laying aside time for political and other uncensored broadcasts—Committee on Interstate and Foreign Commerce. No hearings and no action.

H. R. 9231—Scott bill "to add section 315 (a) to the Communications Act of 1934" making it obligatory for stations to keep certain records—Committee on Interstate and Foreign Commerce. No hearings and no action.

H. J. Res. 220—Sirovich resolution "providing for the establishment of an executive department to be known as the 'Department of Science, Art, and Literature'"—Committee on Patents. Extensive hearings but no report.

H. Res. 52—Dies censorship bill—House Committee on Rules. No hearings and no action.

H. Res. 370—Scott resolution providing for the establishment of a "Broadcasting Research Commission"—Committee on Interstate and Foreign Commerce. No hearings and no action.

NEW TEXAS GRANT RECOMMENDED

The Bell Broadcasting Company applied to the Federal Communications Commission for a construction permit to erect a broadcasting station at Temple, Texas, to use 1200 kilocycles, 100 watts and daytime operation.

Examiner Melvin H. Dalberg, in Report No. I-162 recommended that the application be granted "provided that the proposed transmitter and the erection of the antenna be in accordance with the rules and regulations of the Commission." The Examiner found that the applicant is qualified to own and operate the proposed station—no question of quota is involved and "there is no possibility of interference whatsoever either from existing stations or by reason of pending applications."

RECOMMENDS APPROVAL ON CONDITIONS

Paul R. Heitmeyer has applied to the Federal Communications Commission for a construction permit for the erection of a new broadcasting station at Salt Lake City, Utah, to use 1210 kilocycles, 100 watts and unlimited time.

Examiner P. W. Seward, in Report No. I-163, has recommended that "if the application in Docket No. 2715 be finally approved by the Commission that this application be denied, as it has not been shown that a need exists for two 100 watt stations in Salt Lake City; in the event said application in Docket No. 2715 be denied by the Commission, then it is recommended that this application be granted."

CHANGE RECOMMENDED FOR KMED

Broadcasting Station KMED, Medford, Ore., applied to the Federal Communications Commission to change its frequency from 1310 to 1410 kilocycles and power from 100 watts, 250 watts local sunset to 250 watts, and hours of operation from unlimited time to unlimited day and specified nighttime hours.

Chief Examiner Davis G. Arnold, in Report No. I-167, recommended that the application be granted. He found that "a substantial need for additional radio service in the area proposed to be served does exist," and that "the use of the applicant of the frequency 1410 kilocycles, specified hours, will be in the public interest."

RECOMMENDS NO CHANGE FOR KFRO

Broadcasting Station KFRO, Longview, Texas, has applied to the Federal Communications Commission for the facilities of Station KWEA, Shreveport, La., and the Oil Capital Broadcasting Association has also asked for the same facilities and a permit to construct a new station at Kilgore, Texas. KWEA operates on 1210 kilocycles with 100 watts power and unlimited time. Station KFRO now operates on 1370 kilocycles, 100 watts power daytime. KWEA asked license renewal.

Examiner George H. Hill, in Report No. I-161, has recommended that the application of Station KFRO be denied; that the application of the Oil Capital Broadcasting Association for a construction permit be granted to use the facilities of KWEA and that the application of KWEA "for renewal of license be denied, provided the application of the Oil Capital Broadcasting Association for a construction permit be granted. Otherwise the application for renewal of license of Station KWEA should be granted."

NEW OHIO STATION RECOMMENDED

Herbert Lee Blye filed an application with the Federal Communications Commission asking for a construction permit for a new station to be located at Lima, Ohio, to use 1210 kilocycles, 100 watts power and daytime operation.

Examiner Melvin H. Dalberg, in Report No. I-171, has recommended that the application be granted. The Examiner found that "there is considerable need in the area sought to be served for local broadcasting service and the program material which is proposed seems to be of a satisfactory nature for a station of the power requested. It does not appear that any interference with the fair and efficient service of other stations would be involved, nor that any serious interference would result by reason of pending applications."

RECOMMENDS DENYING PUERTO RICAN STATION

Ralph Perez Perry applied to the Federal Communications Commission for permission to erect a new broadcasting station at Santurce, Puerto Rico, to use 1340 kilocycles, 250 watts power and unlimited time on the air.

Examiner Ralph E. Walker, in Report No. I-170, has recommended that the application be denied. He found that "the record fails to disclose a need for the allocation of additional broadcast facilities in the San Juan area, especially in view of the fact that the existing facilities are not fully used." It was further found by the Examiner that "it does not appear that the qualifications of the applicant are such that a station operated by him could reasonably be expected to provide an improved program service in the area."

TENNESSEE GRANT RECOMMENDED

W. A. Patterson, filed an application with the Federal Communications Commission asking for a construction permit for the erection of a new broadcasting station at Chattanooga, Tenn., to use 1420 kilocycles, 100 watts power and daytime operation.

Examiner George H. Hill, in Report No. I-168, recommended that the application be granted. He found that a need exists in the proposed area for additional radio service, and he states that "the granting of this application will serve public interest, convenience and necessity, provided the application of Dudley J. Connolly and Company is denied."

RECOMMENDS COMMISSION AFFIRM FORMER ORDER

WJJD, Inc., Chicago, Ill., seeking authority to move the transmitter of Station WJJD from Mooseheart to Des Plaines, Ill., was

granted by the Commission. Thereafter it was reconsidered and designated for hearing on protest filed by the Chicago Federation of Labor's station WCFL.

Examiner Ralph L. Walker, in Report No. I-166, states that "the matter was called for hearing on December 16, 1935, at which time it was stated on behalf of the protestant that a continuance had been requested and denied, that counsel for the protestant was unable to be present and that the protest would be withdrawn. It is accordingly recommended that the protest be dismissed and that the Commission affirm its original action granting the application."

WYOMING STATION RECOMMENDATIONS

Paul R. Heitmeyer applied to the Federal Communications Commission for a construction permit for the erection of a new station at Cheyenne, Wyo., to use 1210 kilocycles, 100 watts power, 250 watts LS and unlimited time on the air. Also the Wyoming Radio Educational Association applied to the Commission for a construction permit for a new station at Cheyenne to use 630 kilocycles, 500 watts power, 1,000 watts LS and unlimited time.

Examiner P. W. Seward, in Report No. I-173, recommended that the application of Mr. Heitmeyer be granted but that the application of the Educational Association be denied.

The Examiner states that "from the evidence adduced concerning the application of the Wyoming Educational Association it is impossible to draw a definite conclusion concerning technical, financial, and other qualifications of this applicant." He found, however, that "a need for the service proposed to be rendered in the area does exist." He also found that granting of the Educational Association application would result in "serious and objectionable interference with the operation of existing licensed stations."

RECOMMENDS DENYING NEW TAMPA STATION

The Florida West Coast Broadcasting Company, Inc., applied to the Federal Communications Commission for a construction permit for the erection of a new station at Tampa, Florida, to use 1370 kilocycles, 100 watts power and unlimited time on the air.

Examiner John P. Bramhall, in Report No. I-165, recommended that the application be denied. He found that "the area proposed to be served by applicant is already receiving ample radio service and the evidence fails to show that the applicant would render a service or a type of service that is not now being received in this same area." The Examiner found also that the interests of Station WMBR would be adversely affected by the grant.

RECOMMENDS DENYING NEW STATION

The Valley Broadcasting Company filed an application with the Federal Communications Commission asking for a construction permit for a new station to be erected at Pomona, Cal., to use 1160 kilocycles, 250 watts power and daytime operation.

Examiner R. H. Hyde, in Report I-174, recommends that the application be denied. It was found by the Examiner that "the operation of the proposed new station would cause objectionable interference to existing stations and the service area of the new station would be restricted to a substantial degree by interference with other stations."

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be used against them.

No. 2653. Unfair competition in the sale of men's suits is alleged in a complaint issued against **Harry Kapust, of Chicago**, trading as **Roselite Manufacturing Co.** and as **Roselite Clothing Manufacturing Co.**

Kapust, according to the complaint, represented through salesmen that the men's suits sold by the respondent were tailored to purchasers' individual measurements, when in fact not all suits sold by the respondent were made to individual measurement and many of the orders for suits were filled from stock and the clothes altered when necessary to conform to customers' measurements.

No. 2657. Alleging unfair competition in the sale in interstate commerce of steel wool cleaning pads, a complaint has been issued against **Maurice Levine, of New York City**, trading as **E-Z Kleener Manufacturing Co.**, **Red-I Pad Co.**, **Red-Y Pad Co.**, and as **R-P Manufacturer and Distributor.**

Designating cartons in which his products were packed by phrases such as "E-Z Kleener," and "Mfd. by Red-I Pad Co., New York," the respondent represented himself to be the manufacturer of the products he sold, when, according to the complaint, he did not own or operate a factory wherein these preparations were made, but purchased them from the manufacturers.

These representations, according to the complaint, were false and misleading, and tended to deceive buyers into believing that in purchasing from the respondent they were dealing with the manufacturer, thereby gaining an advantage by saving the middleman's profits.

No. 2658. A complaint has been issued against **Meyer Brodie and Morris White, of 15 West 20th Street, New York City**, trading as **M & M Bag and Suit Case Company**, charging unfair competition in the sale of their products.

The complaint alleges that the respondents designated as "Warranted, Top Grain Cowhide, Leather" certain articles made of split leather, which is of inferior quality and durability as compared with top grain leather. The complaint alleges that certain pieces of luggage manufactured and sold by the respondents were made from top grain leather, while other pieces were made from split leather.

No. 2659. Advertising dry goods as "tub fast," when in fact they were not dyed with tub fast dye, is alleged as an unfair method of competition in a complaint issued against **H. T. Poindexter & Sons Merchandise Co., of Kansas City, Mo.**

The company is alleged to have represented certain cotton print goods as being tub fast or as containing qualities making them proof against fading when washed in the normal course of use. The complaint alleges they were not tub fast as the term is generally understood in the cotton print goods trade, and that use of this term to describe such goods tended to divert business from competitors.

No. 2660. Eleven companies manufacturing and selling more than 90 per cent of the total volume of zinc and copper plates used for engraving purposes and sold in interstate commerce in the United States, and their trade association, the **Photo Engravers Copper & Zinc Grinders Association**, have been served with a complaint alleging that they entered into an agreement, combination or conspiracy to restrict and suppress competition in the sale and distribution of zinc and copper plates to newspapers and other photo engraving customers.

The respondent companies are: **Edes Manufacturing Co., Plymouth, Mass.**; **American Steel & Copper Plate Co., Jersey City, N. J.**; **New York Steel & Copper Plate Co., Brooklyn**; **Rolled Plate Metal Co., Brooklyn**; **National Steel & Copper Plate Co., Chicago**; **Harold M. Pitman Co., Cicero, Ill.**; **Pacific Steel & Copper Plate Co., San Francisco**; **American Zinc Products Co., Greencastle, Ind.**; **American Nickeloid Co., Peru, Ill.**; **C. G. Hussey & Co., Pittsburgh**; and **Bridgeport Engravers Supply Co., Bridgeport, Conn.**

Headquarters of the **Photo Engravers Copper & Zinc Grinders Association** are at **Jersey City, N. J.**

The respondents are alleged to have entered into an understanding, agreement, combination or conspiracy to restrict competition in the sale of their products by agreeing to fix and maintain uniform prices, terms and discounts at which zinc and copper plates are to be sold, and to cooperate in enforcing and maintaining these prices, terms and discounts by exchanging information through the association. The association is alleged to have acted as a clearing house for such exchange of information, including reports of sales of zinc and copper plates, together with the prices, terms and discounts.

No. 2661. In a complaint issued against the **Chattanooga Automotive Jobbers Association, of Chattanooga, Tenn.**, and the **Tennessee Automotive Jobbers Association, of Knoxville, Tenn.**, and their officers and members, are alleged to have entered into agreements, combinations, understandings and conspiracies to fix and maintain uniform prices to be exacted by them from purchasers of automobile parts and accessories. The members of the respondent associations are charged with attempting to restrict sales of such parts and accessories by manufacturers to and through jobbers.

No. 2662. Sales methods involving a game of chance in the sale of candy, are alleged in a complaint issued against **Brecht Candy Co., of Denver.** The push card and punch board were among the devices used, according to the complaint. The respondent's practices are alleged to constitute unfair methods of competition and to be contrary to public policy.

No. 2663. Alleging unfair competition in the sale of incandescent lamps and glass lamp globes, a complaint has been issued

against **Day-Lite Illuminating Corporation**, of 100 West Chicago Avenue, Chicago.

Representations of the respondents are alleged to have had a tendency to deceive the public into believing that the respondents' lamps of equal or less watt measurement and of equal volt measurement, would give an average efficient light performance equal to that of competing lamps, and at the same time furnish more light at less cost for current than competitors' lamps.

Nos. 2664-2665-2666. Complaints have been issued charging two companies with misrepresenting medicinal products sold in interstate commerce, and a smoking pipe manufacturer with representations suggesting that certain of its products have been endorsed by the medical profession, when this is not the fact.

McCambridge & McCambridge Co., Inc., of 12 L Street, S. E., Washington, D. C., trading as **Everfresh Products Co.**, is alleged to have advertised its "Everfresh Aspirin" so as to disparage competitors' products and tend to deceive buyers into the belief that "Everfresh Aspirin" is better and gives quicker relief than ordinary aspirin; that it relieves tired spells, and cures nerve ailments and other troubles; and other similar representations. The complaint charges that the respondent's product does not continue to remain fresh longer than any other aspirin but will decompose within the usual time in which ordinary aspirin will decompose.

J. H. Casey, of Portland, Ore., trading as **J. H. Casey Co.**, and advertising "Casey's Compound" as a cure, remedy and treatment for rheumatism, arthritis and other related ailments, is alleged to have untruthfully represented that marvelous results accrue to persons afflicted with these ailments, who use the respondent's compound. The complaint alleges that the product has little if any curative value in treating these diseases.

Engaged in manufacturing smoking pipes, **S. M. Frank & Co., Inc.**, of New York City, is alleged to have branded and advertised certain of its products as "Medico." The complaint charges that this practice tended to deceive buyers into believing that the pipes had been endorsed by the medical profession and were so constructed or treated as to eliminate or greatly reduce the harmful effects of ordinary pipe smoking. In fact, according to the complaint, these pipes had not been so endorsed, and were no less harmful or more healthful to the smoker than many pipes made and sold by other manufacturers.

No. 2667. Unfair competition through representation of cigars not made of Cuban tobacco, as "Garcia's Havana Smoker," is alleged in a complaint issued against **Havana Florida Cigar Co.**, of 501 North Madison St., Quincy, Fla.

The complaint charges that the respondent's cigar does not contain Havana tobacco nor tobacco grown on the island of Cuba, in any appreciable amount. The respondent's representation, according to the complaint, tends to deceive buyers into believing that the respondent's product is composed in whole or in large part of Havana tobacco.

No. 2668. Alleging unfair competition in the sale of incandescent lamps, a complaint has been issued against **Fannie Chanowitz**, of 68 Charlton St., Newark, N. J., trading as **Atlas Products Co.**

The complaint charges that the respondent's lamps were demonstrated and sold in a manner tending to deceive prospective purchasers into believing that they were of the same watt measurement and produced more light than competitors' lamps being used by such purchasers. According to the complaint, this was accomplished by marking the respondent's wattage lower than actually was the case but corresponding to the truthfully marked wattage of competitors' lamps, then comparing the amount of light given by the two, to the consequent disadvantage of competitors.

No. 2669. **General Tire & Rubber Co.**, of Akron, Ohio, is charged with unfair competitive methods in a complaint.

According to the complaint, this company advertised in newspapers and over the radio that its "New General Dual Balloon Tire" was "Blowout-Proof," when in fact this was not true. This practice is said to have had a tendency to deceive the tire-purchasing public, and to promote the purchase of these tires in preference to products of similar types and quality offered by other manufacturers, retail dealers and distributors, who did not misleadingly advertise their articles to be blowout-proof.

Stipulations

The Commission has announced the following cease and desist orders:

Nos. 0992-0998. **Western Broadcast Co.**, operator of radio station **KNX**, Hollywood, Calif., has entered into stipulations to abide by action taken in five cases before the Commission involving companies which advertised their products over station **KNX**.

The five companies had previously entered into stipulations with the Commission to cease and desist from certain unfair advertising practices. These companies are: **Nourishine Manufacturing Co.**, Los Angeles; **Germania Tea Co.**, Minneapolis; **Old Mission Tablet Co.**, Pasadena, Calif.; **King's Better Vision Institute**, Los Angeles; and **Tablet Sixty-Six Co.**, Los Angeles.

In its stipulations with the Commission, the radio station admits broadcasting advertisements of these companies, and agrees to observe and abide by stipulations previously signed by the advertisers and accepted and approved by the Commission.

Truth Publishing Co., Inc., operator of radio station **WTRC**, Elkhart, Ind., admits broadcasting advertisements for **Deuel's**, of Centerville, Mich., distributor of an ointment, and agrees to abide by a stipulation previously entered into by the advertiser with the Commission.

In this group of stipulations is one between the Commission and the **Conley Co., Inc.**, of Rochester, Minn., selling a mechanical device called "The Hemp Bodi-Massager." The company agrees to cease representing in published advertisements that use of its device alone will cause a reduction in fat or weight; that no other reducing or beauty building method is as effective or as safe as the method recommended by this company, and that by the use of this device, hips can be rolled away in twenty minutes a day, and other representations.

Nos. 0999-01000-01002-01003. Three broadcasting stations have entered into stipulations to abide by action taken in a case involving advertising matter issued by **K. A. Hughes Co.**, of Boston, dealer in "Salicon," a cold remedy. The broadcasting companies are: **Shepard Broadcasting Service**, operating station **WNAC**, Boston; **Congress Square Hotel Co.**, Station **WCSH**, Portland, Me.; and the **WGAR Broadcasting Co.**, Station **WGAR**, Cleveland.

In their stipulations with the Commission, the radio stations admit broadcasting advertisements of this company, and agree to observe and abide by a stipulation previously signed by the advertiser and accepted and approved by the Commission.

The Eucathol Co., Inc., of Shawnee, Okla., dealer in a medicinal preparation, has entered into a stipulation with the Commission to cease representing its product, "Eucathol," as a competent remedy for treating skin disorders, asthma, hay fever and other diseases, and that it will check a cold by application to chest, throat and head. The respondent also agrees to discontinue assertions that "Eucathol" will stop a child from coughing in one minute; will break a cold in one night, or that it quickly relieves prickly heat, poison ivy or most skin humors or diseases, and other similar allegations.

No. 1548. **Arista Silk Mills, Inc.**, of 499 Seventh Avenue, New York City, engaged as a jobber dealing in silks, rayons and cottons, according to the stipulation, displayed its corporate name, "Arista Silk Mills, Inc.," so including the word "Mills" on its business stationery, when in fact the company did not own, control or operate a mill wherein its products were made, but purchased these articles from others. The respondent agrees to discontinue this use of the word "Mills."

No. 1549. **Morris Gottsegen and David Jacoby**, of 901 Broadway, New York City, co-partners, trading as **Mills Sales Co. and Honor Research Laboratories**, engaged as jobbers in selling pharmaceutical preparations, used the trade name containing the words "Research Laboratories," in selling a mineral oil, when, according to the agreement, they did not own a laboratory or place devoted to experimental study in any branch of natural science. In their stipulation, they agree to stop employing the words "Research Laboratories," as part of their trade name.

No. 1550. **R. & K. Leather Goods Co., Inc.**, of 38 West 32nd St., New York City, and **Perth Amboy, N. J.**, manufacturers and distributors of ladies' pocketbooks, sold their products labelled, billed and represented as "Genuine Cowhide," "Genuine D. B. Cowhide," and "Genuine Seal" (the letters "D. B." meaning, in the language of the trade, "Deep Buff"), or the first cut beneath the top grain after the leather has been split off, according to the agreement. The stipulation sets out that in fact these products consisted of split leather, and not of leather made from the entire hide of a cow or a seal, or of leather made from the top or grain cut or outer layer of the hide, so as to be properly designated as "leather," but were composed of a cut or layer other than such top or grain cut. The respondents agree to discontinue advertising such products as being manufactured from genuine leather.

No. 1551. **Forest City Manufacturing Co.**, of 1627 Washington Ave., St. Louis, manufacturing cotton dresses, furnished its retail customers with mats which were used by them in advertising the respondents' products, according to the agreement. The stipulation says that in some of the mats, certain products were represented as made of "Lionel," when in fact they were not

made of the fiber of the flax plant. The respondent company agrees to discontinue use of the word "Linon" in any way which may tend to deceive buyers into believing that the articles described are made of the fiber of the flax plant, when this is not true.

No. 1552. Manhattan Import Co., Inc., of 861 Broadway, New York City, importers of various novelties, is said to have distributed supplies of toothpicks in interstate commerce, advertising them as "Sliverless, Sanitary, Polished, Automatically packed." They were packed in pasteboard containers which bore the words "Perfect Toothpicks, Sliverless, Sanitary, Polished, Automatically Packed," when, according to the agreement, they were not packed by machinery, or automatically packed, and certain of the products were not properly and correctly represented as "Sanitary." The respondent agrees to cease and desist from advertising toothpicks as sanitary, and packed by machinery or automatically packed, when these are not the facts, and to discontinue advertising toothpicks of foreign manufacture without indicating clearly the country of their origin.

No. 1553. F. J. Kirk, of 116 Market St., Philadelphia, trading as Franklin Sales Company and Franklin Laboratories, and selling "Lucky Tiger Hair Tonic," agrees to stop employing the word "laboratories" as part of the trade name under which he operates his business, and from using this word in any way which may tend to confuse buyers into believing that he owns and operates a laboratory in which his product is made or compounded, when this is not true.

No. 1554. United States Plywood Co., Inc., of 603 West 36th St., New York City, selling and distributing plywoods or wood veneers, agrees to stop using the word "walnut," either independently or in connection with the word "Oriental," or with other words so as to imply or have a tendency to deceive buyers into believing the product to be made of wood derived from trees of the walnut family, when the same is not true.

No. 1555. Linder Bros., Inc., of Scranton, Pa., and New York City, manufacturers of knitted topcoats, agrees to abandon use of the word "loomed" to describe products not woven on a loom, and to discontinue use of this word in any way which may tend to deceive buyers into the belief that the products so described are woven on a loom, when this is not true.

No. 1556. Western Coaching Bureau, Inc., with headquarters in San Francisco and branches in Oakland and Los Angeles and Chicago, is reported in the stipulation to have displayed on its letterheads and in its various offices the words "Western Coaching Bureau" in connection with the words "Civil Service," and to have distributed an advertising catalogue entitled: "Golden Opportunities in Government Service." On the front and back covers of this, and on many inside pages, appeared the words "Civil Service," enclosed in a circular device having in the center the monogram "W.C.B.," which device, according to the stipulation, resembled the official seal of the United States Civil Service Commission. The respondent agrees to stop using the words "Civil Service" in its advertising, either independently or in connection with other words, especially in connection with a seal simulating that of the Civil Service Commission, in any way which may tend to cause the public to believe that the company represents or has an official connection with the United States Civil Service Commission, or is an agency of the Federal Government. Other similar representations will be discontinued.

No. 1557. Koppers Products Company, with headquarters in Pittsburgh, and having branches in various states, manufactures, among other things, coal-tar products and other materials used in making built-up roofing composed of alternate layers of rag felt and coal-tar pitch. In its stipulation, Koppers Company agrees that in selling its pitch-and-felt roofs in interstate commerce, it will cease using in advertisements allegations to the effect that the so-called "smooth top" roofings sold by competitors "fail in a few years," or that such roofings "are usually failures," or "fail by permanent cracking," or "become cheesy," when, according to the agreement, such representations are not warranted in fact.

The corporation further agrees to cease and desist from using in its advertising matter or otherwise, any misleading or exaggerated representations concerning the efficiency, durability, quality or effectiveness of the products of competitors.

No. 1558. The Williamson Company, of Baltimore, engaged in manufacturing wood veneers, will discontinue use of the words "African Walnut" in its printed matter or as a trade designation for its products so as to imply that its products are made of wood derived from trees of African origin and of the botanical walnut family, when this is not true.

No. 1559. Five Star Products, Inc., of 235 West 69th St., New York City, manufacturing a syrup product called "May-Pell," will abandon the use on its brands or labels of the coined word

"May-Pell," or any other phonetic spelling of the word maple, so as to imply or have a tendency to deceive purchasers into believing the product to be composed of maple syrup. Provision is made that when the preparation is made in substantial part of maple syrup, the coined word "May-Pell," if used to describe the maple content, shall be immediately accompanied by other words in equally conspicuous type to clearly indicate that the product is not made wholly of maple syrup.

No. 1560. Lester A. Stern, of 229 West Jackson Boulevard, Chicago, trading as Progressive Medical Co., and Peter S. Banff, of 1261 Argyle Street, Chicago, formerly trading as American Pantosept Co. (1561), in the sale and distribution of antiseptic tablets for women's use, agree to stop advertising their products as contraceptives. Banff also agrees to cease using the word "Manufacturers," in advertising matter, when in fact he does not own or control a laboratory or factory, and to discontinue misrepresenting the purposes or results of tests of feminine hygiene products made by Prof. Dr. Baker at Oxford University.

No. 1562. Frank W. Winne & Son, Inc., of 44 North Front Street, Philadelphia, a wholesaler of twine, cordage and yarns, with branch offices in Maryland, Ohio and Michigan, agrees to cease and desist from using the words "Farm Bureau" on labels attached to its products, so as to imply that they are sold by one or more farm bureaus such as the Ohio Farm Bureau Service Co., of Columbus, O., the Indiana Farm Bureau Cooperative Association, Inc., of Indianapolis, or Farm Bureau Services, Inc., of Lansing, Mich., all of which are engaged in purchasing and distributing farm supplies, including binder twine, and are members of the Farm Bureau Milling Co., of Columbus, Ohio, which was organized primarily to facilitate contract negotiations for seed and other farm supplies on behalf of the individual farm bureaus.

No. 1563. Lima Business College, and the Civil Service Institute, Inc., both of Lima, Ohio, agree to cease and desist from use of the words "Civil Service," as part of or in connection with a corporate or trade name under which to transact their business, either independently or in connection with the word "Institute," tending to confuse purchasers into the belief that the Civil Service Institute, Inc., is a branch of or has some official connection with the United States Government or the Civil Service Commission. The respondents agree to stop making exaggerated representations regarding the number of persons given employment annually under the Civil Service, of the salaries paid, or inaccurately representing the ages at which men and women are eligible for Civil Service appointment, and alleging that Civil Service employees have no lay-offs.

The stipulations also list as respondents Hugh W. Henry, president, and Iva B. Henry, secretary, of Lima Business College, a defacto corporation, and Harry J. Strasburg, president, and Hugh W. Henry as secretary and treasurer of The Civil Service Institute, Inc.

No. 1564. Moses and Jack Kranish, of 219 West 38th Street, New York City, trading as Clinton Silk Mills, and engaged in the business of purchasing grieg silk goods which they convert into finished products, agree to stop using the word "Mills" in connection with their trade name, or in any way which may tend to deceive buyers into believing that they own, control and operate a mill, when this is not true.

No. 1565. Rainbow Trading Co., Inc., 327 East 5th Street, New York City, engaged in the importation of merchandise and in the sale and distribution of both imported and domestic goods, agrees to cease selling in interstate commerce toothpicks packed in boxes or other packages the appearance of which is contrived or formed in size, color and type resembling boxes or other packages in which similar merchandise is sold by a competitor. This company is said to have sold imported toothpicks in containers simulating containers in which similar products were sold by the Estate of Charles Forster, of Strong, Maine, manufacturer of wood toothpicks. The Rainbow Trading Co. also agrees to stop use on labels or cartons or in advertisements of the word "Sanitary," to describe products not made under hygienic or sanitary conditions.

No. 1566. Nathan Bernstein, of 31 West 26th Street, New York City, trading as Excel Luggage Company, selling and distributing luggage, agrees to cease branding or labeling his products as "cowhide," and "leather," implying that they are composed of leather made from the top or grain cut of the hide; unless, when they are composed of leather made from the inner or flesh cut, the word "leather," or "cowhide," shall be accompanied by the word "split," or other suitable word in conspicuous type, to indicate clearly that the articles are not composed of leather made from the top or grain cut of the hide.

No. 2253. The Linen Supply Association of the District of Columbia and its officers and members have been ordered to cease

and desist from combining or cooperating among themselves or with others to control the solicitation and allocation of customers, and to fix or maintain uniform prices, discounts, and terms of supplying and distributing their service in linen coats, aprons, towels and table linen.

The order also bans the exchange of information among members or with others regarding contemplated changes in prices or terms and conditions of supply and distribution of their service, and regarding agreement as to adoption or distribution among two or more members or others of lists containing schedules of uniform prices, discounts and conditions of supply and distribution.

No. 2296. Resale price maintenance is prohibited in an order issued against **Cape Cod Shirt Co., Inc., of Fall River, Mass.**

This respondent is ordered to cease and desist from entering into contracts, agreements and understandings with customers or dealers, requiring or providing for the maintenance of specified resale prices on products of its manufacture.

No. 2332. Misleading representations in the sale of fountain pens and pencils are prohibited in an order to cease and desist issued against **Harry Sachnoff, of 206 Broadway, New York City,** formerly trading as **Park Row Pen Co.,** and against **Argo Pen-Pencil Co., Inc.,** at the same address.

The respondents are ordered to stop representing directly or indirectly that they are manufacturers of fountain pens and pencils until and unless they engage in such manufacture, or actually own and control a factory wherein the articles they sell are made.

No. 2498. Misleading representation of products as to their country or place of origin is prohibited in an order to cease and desist issued against **Prince Matchabelli Perfumery, Inc., of New York City.**

This respondent is directed to stop using any sign, symbol or legend upon containers or cartons of merchandise, indicating a particular country as the country of origin of such merchandise, unless, in fact, the merchandise shall have originated in the country indicated.

No. 2527. Selling in interstate commerce various brands of dog foods, the **Old Trusty Food Co., of Needham Heights, Mass.,** has been ordered to cease and desist from misleading representations.

The company is directed to discontinue, in the sale of "Old Trusty Bovex," from advertising that the product is "62½ per cent government inspected beef and beef products," or any other representation of like purport, unless and until this food contains 62½ per cent government inspected beef and beef products.

No. 2589. The **Thomasville Chair Co., of Thomasville, N. C.,** has been ordered to cease and desist from advertising as "Mahogany," "Mah," "Walnut" or "Oriental Walnut," furniture not made from wood derived from trees of the mahogany and walnut families, respectively. The respondent had waived trial of the case and consented to issuance of the order.

No. 2590. Using a corporate name containing the word "Manufacturing," or representing by other means that the respondent is a paper manufacturer, when such is not the fact, is prohibited in an order to cease and desist issued against **Brenner Paper Manufacturing, Inc., of New York City,** engaged in converting and printing.

The order contains the provision: "Unless and until said respondent actually manufactures the paper it sells or offers for sale, or owns or absolutely controls a mill, mills, factory or factories in which such paper is manufactured."

No. 2604. **Lednew Corporation, of Jersey City, N. J.,** has been ordered to cease and desist from misleading representations of the qualities of incandescent lamps sold for general lighting service.

The order prohibits representation to dealers or others that the watt measurement of lamps is other than the actual watt measurement thereof, after allowing for the tolerance recognized by industry and coinciding with that allowed in lamps purchased for the Federal government.

Court Fines Leavitt

No. 1166. The Federal Trade Commission has been advised by the United States Circuit Court of Appeals for the Second Circuit (New York City), that it has assessed a fine of \$1,000 against **Louis Leavitt, paint manufacturer, of Brooklyn, N. Y.,** for violation of a decree of that court affirming an order of the Federal Trade Commission directed against the misbranding of paint products.

A Commission cease and desist order prohibited Leavitt from designating and describing a product sold by him in interstate commerce "by means of brands, labels, or otherwise, by use of the terms 'Gold Seal Combination White Lead,' or 'Combination

White Lead,' unless the product so designated and described actually contained sulphate of lead or carbonate of lead or the two in combination as its principal and predominant ingredient to the extent of not less than fifty per cent by weight of the product." He was also forbidden from "using and employing any other designation, brand or label, upon the containers of products" sold by him in interstate commerce "which falsely represent the relative quantity of genuine white lead contained in said products."

BROADCAST ADVERTISING IN NOVEMBER

Developments of the Month

Broadcast advertising during November amounted to \$8,211,349, a decrease of 2.2% as compared to the preceding month. A decline of this proportion is the usual trend at this season. Local broadcast advertising, however, went counter to the usual seasonal trend and increased 8.8% as compared to October.

Gains continued to be experienced as compared with the corresponding period of the preceding year. Total broadcast advertising during the month exceeded the November 1934 level by 13.6%. National network advertising rose 3.8%, regional network advertising 20.5%, national non-network volume 27.0%, and local broadcast advertising 30.0%. Broadcast advertising during the first eleven months of 1935 exceeded the preceding year's level by 19.8%.

Total non-network advertising in November was 9.4% greater than during the preceding month and 28.2% above November 1934 volume. Non-network advertising over local stations continued to show the greatest relative gains, as did non-network volume in the Southern and Pacific areas.

Live talent business continued to show the greatest strength in the national non-network field, while the recent increased use of transcriptions in local broadcast advertising also continued throughout November.

National and local non-network automotive advertising, national non-network cosmetic, food, radio set and tobacco volume, local clothing, housefurnishings and financial advertising, regional network pharmaceutical and clothing volume, and national network radio set advertising were among the fields to show the greatest increase in volume as compared to November 1934. The miscellaneous sponsor group rose materially in the national and regional network and national non-network fields. Broadcast advertising by retail establishments increased 47.5% as against November 1934.

The First Eleven Months of 1935

Broadcast advertising during the first eleven months of 1935 amounted to \$78,837,579, as compared to \$65,711,598 during the corresponding period of the preceding year, a gain of 19.8%. Gains with regard to various portions of the medium were as follows: national networks 18.1%, regional networks 50.0%, national non-network advertising 24.8%, and local broadcast advertising 18.6%.

Total non-network advertising during the first eleven months of the year rose 21.7% as against the previous year. Clear channel and high-powered regional station non-network volume increased 23.1%, regional station volume 17.8%, and local station advertising 31.6%.

Transcription volume rose 16.5% during the period under consideration, live talent business 23.4%, records 80.9%, and announcements 19.8%.

Total Broadcast Advertising

Broadcast advertising over stations and networks during November were as follows:

TABLE I
TOTAL BROADCAST ADVERTISING

Class of Business	1935 Gross Time Sales		
	October	November	Cumulative Jan.-Nov.
National networks	\$5,017,900	\$4,533,774	\$45,123,241
Regional networks	132,748	128,715	983,565
National non-network	1,504,970	1,652,680	15,356,638
Local	1,739,280	1,896,180	17,374,135
Total	\$8,394,898	\$8,211,349	\$78,837,579

Total broadcast advertising was 2.2% less than during October, a usual seasonal decline. National network volume declined 10.0%, and regional network advertising dropped 3.0%. National non-network business rose 9.8%, while local advertising increased 8.8%. Network declines were more than the usual seasonal downswing. Local advertising, on the other hand, rose contrary to its usual behavior in November.

Comparison with Previous Years

Broadcast advertising continued to show gains over the corresponding period of 1934. Total volume rose 13.6% as against the preceding November. National network advertising increased 3.8%, regional network volume 20.5%, national non-network volume 27.0% and local broadcast advertising 30.0%.

Compared to November 1933, national network advertising experienced an increase of 31.6%, regional network volume 74.3%, national non-network business 51.8% and local broadcast advertising 36.4%.

Comparison with Other Media

National magazine advertising rose 14.3% as compared to October. Farm paper advertising declined 8.9%. Newspaper lineage remained unchanged in volume, as compared with the usual November decline.

November national magazine volume was 15.1% greater than during the corresponding month of 1934. Farm paper advertising showed a gain of 4.4% and newspaper advertising an increase of 12.3%.

Advertising by major media is found in Table II.

TABLE II

ADVERTISING BY MAJOR MEDIA

Advertising Medium	1935 Gross Time and Space Sales		
	October	November	Cumulative Jan.-Nov.
Radio broadcasting	\$8,394,898	\$8,211,349	\$78,837,579
National magazines ¹	10,603,241	12,118,920	115,390,736
National farm papers ¹	525,337	481,501	5,112,146
Newspapers ²	48,650,000	48,765,000	468,343,000
Total	\$68,173,476	\$69,576,770	\$667,683,461

¹ Publishers' Information Bureau.

² Estimated.

Non-network Advertising

General non-network advertising increased 9.4% as compared to October and reached a level 28.2% higher than that of November 1934. Clear channel and high-powered regional station non-network volume increased 20.8% as compared to October. Regional station non-network business rose 2.2% while local station volume remained practically unchanged.

Non-network advertising over clear channel and high-powered regional stations exceeded the previous November's level by 28.0%. Regional station non-network volume gained 24.2% and local station advertising increased 44.8%.

Non-network advertising by size of station is found in Table III.

TABLE III

NON-NETWORK ADVERTISING BY POWER OF STATION

Power of Station	1935 Gross Time Sales		
	October	November	Cumulative Jan.-Nov.
Over 1,000 watts	\$1,290,740	\$1,561,600	\$14,880,655
250-1,000 watts	1,391,650	1,423,160	13,077,305
100 watts	561,860	564,100	4,772,813
Total	\$3,244,250	\$3,548,860	\$32,730,773

Non-network advertising in the New England-Middle Atlantic area increased 2.2% as compared to October. Advertising in the South Atlantic-South Central States rose 19.8%. The Mountain and Pacific area experienced an increase of 26.7% over the preceding month while North Central non-network advertising remained comparatively unchanged. Non-network advertising in various geographical districts is indicated in Table IV.

TABLE IV

NON-NETWORK ADVERTISING BY GEOGRAPHICAL DISTRICTS

Geographical District	1935 Gross Time Sales		
	October	November	Cumulative Jan.-Nov.
New England-Middle Atlantic Area	\$750,110	\$766,520	\$8,180,782
South Atlantic-South Central Area	611,120	730,610	5,344,828
North Central Area	1,295,300	1,305,830	12,520,437
Pacific and Mountain Area ..	587,720	745,900	6,684,726
Total	\$3,244,250	\$3,548,860	\$32,730,773

Compared to the corresponding month of 1934, non-network advertising gained in all parts of the country except the New England-Middle Atlantic area, where it decreased 14.4%. Rising network volume undoubtedly has been responsible for this trend. Gains in other portions of the country, as compared to November 1934, were as follows: South Atlantic-South Central states, 83.2%; North Central states, 37.8%; Mountain and Pacific states, 44.4%.

Non-network Advertising by Type of Rendition

In the national non-network field, live talent volume rose most markedly as compared to the preceding month. Non-network advertising of this type increased 18.8%. National transcription business rose 2.0% during the month, while announcement volume increased 1.1%.

Compared to November 1934, national non-network transcription business registered an increase of 5.3%, live talent volume 45.4% and announcements 26.7%.

Transcriptions and live talent business both gained markedly in the local broadcast advertising field as compared to October. Transcription volume rose 13.7% and live talent business 18.0%. Record volume increased 5.7%, while announcements declined 4.6%. The latter is a normal seasonal trend, while the other gains represent a movement contrary to the usual seasonal decline.

Local transcription volume continued to show the marked gains experienced during the past several months, rising 72.1% as compared to November of the previous year. Live talent volume rose 24.7%, records 113.0% and announcements 25.1%. Non-network broadcast advertising by type of rendition during November is found in Table V.

TABLE V

NON-NETWORK BROADCAST ADVERTISING BY TYPE OF RENDITION

Type of Rendition	National Non-network		Local		Total		Cumulative Jan.-Nov.
	October	November	October	November	October	November	
Electrical transcriptions	\$524,660	\$534,900	\$156,960	\$178,680	\$681,620	\$713,580	\$6,833,878
Live talent programs	696,900	828,940	877,760	1,040,160	1,574,660	1,869,100	15,806,630
Records	7,510	9,990	60,240	63,610	67,750	73,600	763,301
Announcements	275,900	278,850	644,320	613,730	920,220	892,580	9,326,964
Total	\$1,504,970	\$1,652,680	\$1,739,280	\$1,896,180	\$3,244,250	\$3,548,860	\$32,730,773

Sponsor Trends in November

National network advertising by various sponsoring industries during November either remained at approximately the preceding month's level or showed slight declines with the exception of beverage advertising, which rose 12.5%, housefurnishing advertising, which increased 6.4%, financial advertising volume, which rose 9.1% and the miscellaneous group, which gained 18.1% over the preceding month. The principal gain in the regional network field was in confectionery, which more than doubled its advertising.

In the national non-network field, gains were as follows: accessories and gasoline, 38.7%; confectionery, 96.8%; and tobacco, 58.8%. Gains in local broadcast advertising as compared with the previous month included the following: drugs and pharmaceuticals, 35.8%; foodstuffs, 25.3%; confectionery, more than double.

Principal declines during the month were a 52.6% decrease in network automotive advertising, a decline of 11.3% in network food advertising and a general decrease in the soap and kitchen supply field.

Comparison with 1934

Principal gains as compared to November of the preceding year, were as follows: national non-network and local automotive advertising, 721.0% and 122.1% respectively; local clothing advertising, 104.6%; national non-network cosmetic volume 69.1% and food advertising 39.3%; local housefurnishing advertising 68.3% and financial volume 56.1%; national non-network radio set advertising, 600.0%, and tobacco volume 106.0%. Regional network tobacco volume increased sevenfold while regional confectionery volume gained approximately six and one-half times. Candy, rather than chewing gum, was responsible for the national non-network and regional network confectionery increases.

Details as to Sponsor Trends

Detailed data regarding radio broadcast advertising by various industrial and service groups is found in Table VI.

TABLE VI
RADIO BROADCAST ADVERTISING BY TYPE OF SPONSORING BUSINESS
(November, 1935)

Total	\$4,533,774	\$128,715	\$1,652,680	\$1,896,180	\$8,211,349

1a. **Amusements.** Decline 37.1% as against October. Volume unchanged from corresponding month of last year.

1. **Automotive.** National network down 52.6% compared to October. National non-network up 12.3% and local down 7.1%. National network business 18.1% ahead of November last year. National non-network volume up 721.0% and local 122.1%.

2. **Gasoline and accessories.** National network volume unchanged from preceding month. Regional network business down 20.0%. National non-network business up 38.7% and local 3.0%. Compared to November 1934, national network business up 13.5%, regional networks 31.6%, and local 8.1%. National non-network down 25.0%.

3. **Clothing.** National non-network volume unchanged from preceding month. Regional network business up 20.1%, national non-network 7.5%, and local 5.3% as against October. National network advertising 11.4% ahead of November 1934, regional networks 343.0%, national non-network business 30.3%, and local 104.6%.

4. **Drugs and pharmaceuticals.** National network volume same as previous month. Regional network advertising up 12.1%, national non-network business up 3.0%, and local 35.8%. National network business 17.8% above November 1934. Regional network business increased from \$950 to \$12,370. National non-network advertising down 8.8% and local up 56.8%.

5. **Toilet goods.** National non-network business up 13.3% as compared to October, and local up 75.2%. National network business down 4.8%. Gains as follows when compared to November of preceding year: National networks 1.8%, regional networks 20.0%, national non-network 69.1%, and local 37.5%.

6. **Foodstuffs.** National network business down 11.3% and

regional networks 5.0%. National non-network business up 5.0% as compared to October. Local up 25.3%. National network advertising 4.2% below November 1934 level. Regional network business up 4.0%, national non-network business 39.3%, and local 17.8%.

7. **Beverages.** National network volume increased 12.5% compared to previous month. Local up 12.7%. Regional network advertising down 50.0% and national non-network business down 7.8%. National network advertising 19.2% above last November. Regional volume down 55.0%. National non-network advertising up 25.5% and local more than double.

8. **Confectionery.** National network business 10.3% below October, regional networks up 144.6%, national non-network 96.8%, and local more than double. National network business 30.0% below November 1934. Regional network volume up six and one-half times, national non-network advertising 12.4%, and local broadcast advertising 24.0%.

9. **Household equipment.** National network advertising 6.4% above preceding month, national non-network business up 3.7%, and local 3.3%. Regional network advertising down 39.7%. Compared to preceding November, gains as follows: National networks 11.7%, regional networks 6.0%, national non-network advertising 13.4%, and local 68.3%.

10. **Soaps and kitchen supplies.** General declines as compared to the preceding month: National networks 6.8%, regional networks 46.3%, national non-network 5.3%, and local 10.0%. Compared to November 1934, national network advertising unchanged, regional network business increased from \$360 to \$5,368, national non-network business down 22.2%, and local up 28.7%.

11. **Insurance and financial.** National network business 9.1%

ahead of October. National non-network volume down 17.0%, and local up 14.6%. Compared to November of preceding year, national network volume down 10.0% and national non-network advertising 38.9%. Local up 56.1%.

12. **Radios.** National network advertising down 4.1% compared to October, and national non-network down 29.1%. Local up 14.8%. National network volume up 30.0% as compared to last November. National non-network business up 600.0% and local up 19.1%.

13. **Department and general stores.** National non-network down 41.0% as against October. Local up 10.7%. National non-network business down 34.3% as compared to November of last year. Local up 30.4%. Total volume for this group 25.9% ahead of 1934.

14. **Tobacco products.** National network advertising 4.3% under October. Regional network volume unchanged, national non-network business up 58.8% and local 16.7%. National network tobacco advertising 18.7% above November 1934 level. Regional network volume increased from \$2,123 to \$15,622. National non-network advertising up 106.0% and local 11.2%.

15. **Miscellaneous.** National network business 18.1% ahead of previous month. Regional network gain 65.4%, national non-network 24.8%, and local 5.6%. Gains as follows, compared to November of last year: National networks 50.7%, regional networks 77.8%, and national non-network advertising 21.7%. Local business down 14.8%.

Retail Broadcast Advertising

General retail broadcast advertising increased 5.2% as compared to the preceding month and showed a gain of 47.5% when compared to November 1934. The increase over October was contrary to the usual seasonal trend.

Increases over the previous month were experienced in the following retail establishment fields: clothing, 10.0%; beauty parlors, 54.0%; grocery and delicatessen stores, 1.6%; restaurants, 11.2%; beverage retailers, more than double; confectionery stores, \$760 in October to \$3,870 in November; radio dealers, 20.0%; department stores, 13.1%, and miscellaneous, 19.3%.

Declines during the month were as follows: automotive, 6.7%; gasoline and accessory retailers, 12.5%; drug stores, 2.0%; housefurnishing establishments, 8.2%, and hardware stores, 30.0%.

Principal increases, compared to November 1934, were as follows: automotive, 133.0%; clothing, 193.7%; drug stores, 23.8%; beauty parlors, 62.0%; food retailers, 28.3%; beverage retailers, 25.0%; housefurnishing dealers, more than double; furniture stores, 52.6%; and department stores, 25.9%. Principal declines were as follows: hardware stores, 33.3%; gasoline and accessory dealers, 52.0%.

Broadcast advertising by retail establishments during November was as follows:

TABLE VII

RETAIL BROADCAST ADVERTISING OVER INDIVIDUAL STATIONS

Type of Sponsoring Business	1935 Gross Time Sales	
	October	November
Automobiles and accessories:		
Automobile agencies and used car dealers	\$105,110	\$97,670
Gasoline stations, garages, etc.	47,610	41,660
Clothing and apparel shops	295,940	326,230
Drugs and toilet goods:		
Drug stores	27,720	25,550
Beauty parlors	5,110	7,840

FEDERAL COMMUNICATIONS COMMISSION ACTION

HEARING CALENDAR

Monday, January 6

Further Hearing and Argument Before the Commission
En Banc

In the Matter of the Petition of the American Telephone and Telegraph Company and the New York Telephone Company in connection with the installation of experimental coaxial cable between New York, N. Y., and Philadelphia, Pa.

Hearing Before an Examiner

KMTR—KMTR Radio Corporation, Los Angeles, Calif.—Renewal of license, **570 kc.**, 1 KW, unlimited time.

KGCU—Mandan Radio Association, Mandan, N. Dak.—Renewal of license, **1240 kc.**, 250 watts, specified hours.

NEW—Pacific Acceptance Corporation, San Diego, Calif.—C. P., **1200 kc.**, 100 watts, daytime.

NEW—California Sales Contract Co., San Francisco, Calif.—C. P., **1280 kc.**, 500 watts, 1 KW-LS, unlimited time.

Tuesday, January 7

NEW—Sioux Falls Broadcast Association, Inc., Sioux Falls, S. Dak.—C. P., **1200 kc.**, 100 watts, unlimited time.

KOB—New Mexico College of Agriculture and Mechanic Arts, Albuquerque, New Mex.—Renewal of license, **1180 kc.**, 1 KW, simultaneous day, shares night with KEX.

Wednesday, January 8

NEW—Springfield Newspapers, Inc., Springfield, Ohio—C. P., **1120 kc.**, 250 watts, daytime.

KGDE—Charles L. Jaren, Fergus Falls, Minn.—Renewal of license, **1200 kc.**, 100 watts, 250 watts LS, unlimited time.

Thursday, January 9

WTEL—Foulkrod Radio Engineering Co., Philadelphia, Pa.—C. P., **1230 kc.**, 250 watts, 500 watts LS, unlimited time. Present assignment: **1310 kc.**, 100 watts, shares with WHAT and WCAM.

WFBR—The Baltimore Radio Show, Inc., Baltimore, Md.—Modification of license, **1270 kc.**, 1 KW, unlimited time. Present assignment: **1270 kc.**, 500 watts, unlimited time.

WOOD—Kunsky-Trendle Broadcasting Corp., Grand Rapids, Mich.—C. P., **1270 kc.**, 1 KW, share with WASH. Present assignment: **1270 kc.**, 500 watts, shares with WASH.

WASH—Kunsky-Trendle Broadcasting Corp., Grand Rapids, Mich.—C. P., **1270 kc.**, 1 KW, share with WOOD. Present assignment: **1270 kc.**, 500 watts, shares with WOOD.

NEW—Carl S. Taylor, Dubois, Pa.—C. P., **780 kc.**, 250 watts, daytime.

NEW—A. W. Hayes, Erie, Pa.—C. P., **1270 kc.**, 500 watts, 1 KW LS, unlimited time.

NEW—Watertown Broadcasting Corp., Watertown, N. Y.—C. P., **1270 kc.**, 250 watts, daytime.

Friday, January 10

NEW—The Press Company, Inc., Schenectady, N. Y.—C. P., **1210 kc.**, 100 watts, daytime.

WEAN—The Shepard Broadcasting Service Inc., Providence, R. I.—C. P., **780 kc.**, 1 KW, unlimited time.

APPLICATIONS RECEIVED

First Zone

NEW—I. L. G. W. Radio Corp., New York, N. Y.—Construction **970** permit for a new station to be operated on **970 kc.**, 1 KW, unlimited time.

WVFW—Paramount Broadcasting Corp., Brooklyn, N. Y.—Construction permit to make changes in equipment.

Second Zone

WFIL—WFIL Broadcasting Co., Philadelphia, Pa.—License to use **560** Western Electric 6-B transmitter (transmitter licensed to WLIT 2-P-B-1947, granted 2-3-31) as an auxiliary transmitter.

WRAX—WRAX Broadcasting Co., Philadelphia, Pa.—Modification of license to increase power from 250 watts, 500 watts

day to 1 KW day and night, using directional antenna at night.

WPEN—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Modification of license to increase power from 250 watts, 500 watts day to 1 KW day and night, using directional antenna at night.

NEW—Hyman Altman, Detroit, Mich.—Construction permit for a new station to be operated on 1140 kc., 250 watts, daytime. Amended: To change frequency from 1140 kc. to 1120 kc.

WHIS—Daily Telegraph Printing Co., Bluefield, West Va.—Construction permit to install new equipment, increase power from 250 watts, 500 watts day to 500 watts, 1 KW day and move transmitter from West Virginian Hotel, Federal Street, Bluefield, West Virginia, to near Bluefield, West Virginia. Amended: To omit request for increase in power.

WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.—Construction permit to make changes in equipment and move transmitter from Frankstown Road, R. F. D. No. 1, Wilkensburg, Pennsylvania, to Bounded by Miami—Burrows—Mohawk, Pittsburgh, Pennsylvania.

Third Zone

WREC—WREC, Incorporated, Memphis, Tenn.—Modification of construction permit (B-P-161) for increase in power, changes in equipment and move of transmitter, requesting extension of completion date from 1-30-36 to 2-29-36.

NEW—Ruth W. Adcock & S. E. Adcock, d/b as General Broadcasters, Johnson City, Tenn.—Construction permit for a new station to be operated on 600 kc., 250 watts, daytime. Amended: To change frequency from 600 kc. to 880 kc., and make changes in antenna.

NEW—Ruth W. Adcock & S. E. Adcock, d/b as General Broadcasters, Rossville, Ga.—Construction permit for a new station to be operated on 580 kc., 250 watts, daytime. Amended: To change frequency from 580 kc. to 1120 kc. and make changes in antenna.

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—License 1180 to cover construction permit (B3-P-785) for equipment changes.

NEW—Wilton Harvey Pollard, Huntsville, Ala.—Construction permit for a new station to be operated on 1200 kc., 100 watts, unlimited time. Amended: To change transmitter site from Twickenham Hotel, Cor. Washington & Clinton Sts., Huntsville, Alabama, to 500 ft. due west of Highway U. S. No. 241, outside city limits of Huntsville, Alabama, and make changes in antenna system. (Requests all facilities of WBHS.)

NEW—The Metropolis Co., Jacksonville, Fla.—Construction permit for a new station to be operated on 1200 kc., 100 watts, unlimited time.

NEW—Ted R. Woodard, Kingsport, Tenn.—Construction permit for a new station to be operated on 1210 kc., 100 watts, daytime. Amended: To change transmitter site from approximately 1 mi. from town, Lee Hi-Way, Kingsport, Tenn., to Lee Hi-Way (not numbered), Kingsport, Tenn.

WGCM—WGCM, Incorporated, Mississippi City, Miss.—Modification of construction permit (B3-P-421) authorizing change in frequency, change hours of operation and increase power, requesting extension of commencement date from 7-28-35 to 1-28-36 and completion date from 1-28-36 to 7-28-36.

WRDW—Augusta Broadcasting Co., Augusta, Ga.—Construction permit to make changes in equipment, move transmitter from 309 Eighth St., Augusta, Ga., to Satcher estate on the edge of the city, North Augusta, South Carolina, change frequency from 1500 kc. to 1240 kc., and increase power from 100 watts to 250 watts, 1 KW day, using directional antenna at night if necessary.

NEW—The Sherman Broadcasting Assn. (J. B. Knight, Pres.), 1310 Sherman, Tex.—Construction permit for a new station to be operated on 1310 kc., 100 watts, daytime.

NEW—Bay County Publishers, Inc., Panama City, Fla.—Construction permit for a new station to be operated on 1420 kc., 100 watts, unlimited time.

NEW—WDOD Broadcasting Corp., Chattanooga, Tenn.—Construction permit for a new general experimental station to be operated on frequencies 31600, 35600, 38600, 41000 kc., 100 watts.

Fourth Zone

KSD—The Pulitzer Publishing Co., St. Louis, Mo.—Authority to determine operating power by direct measurement of antenna power.

KSD—The Pulitzer Publishing Co., St. Louis, Mo.—License to cover construction permit (4-P-B-3285) for new equipment and increase in power.

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Modification of construction permit (B4-P-230) authorizing changes in equipment and increase in power, requesting extension of commencement date from 7-21-35 to 1-1-36 and completion date from 1-21-36 to 7-21-36.

KFEQ—KFEQ, Incorporated, St. Joseph, Mo.—Construction permit to install new equipment, increase power from 2½ KW day to 5 KW day, and move transmitter site to be determined. Amended: To make changes in equipment.

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Extension of special experimental authorization to operate synchronously with WBBM, from local sunset at Lincoln, Nebraska, to midnight CST, from 2-1-36 to 8-1-36.

WBBM—WBBM Broadcasting Corp., Chicago, Ill.—Extension of special experimental authorization to operate synchronously with KFAB from local sunset (KFAB) to midnight for period from 2-1-36 to 8-1-36.

WHO—Central Broadcasting Co., Davenport, Iowa—Construction permit to install new equipment and increase power from 50 KW to 500 KW.

NEW—Harry J. Grant, Milwaukee, Wisc.—Construction permit for a new station to be operated on 1010 kc., 1 KW, unlimited time.

NEW—Albert Lea Broadcasting Corp., Albert Lea, Minn.—Construction permit for a new station to be operated on 1200 kc., 100 watts, unlimited time.

NEW—J. T. Bilben & N. G. Barnard, Walker, Minn.—Construction permit for a new station to be operated on 1310 kc., 100 watts, unlimited time.

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Modification of license to change hours of operation from share-WSBT to unlimited and reduce daytime power Sunday from 1 KW to 500 watts. Contingent upon the granting of WSBT's application for change in frequency.

KABR—Aberdeen Broadcast Co., Inc., Aberdeen, South Dak.—License to cover construction permit (B4-P-839) for move of transmitter locally.

WHBF—Rock Island Broadcasting Co., Rock Island, Ill.—Construction permit to make changes in equipment, install directional antenna, change frequency from 1210 to 1450 kc., increase power from 100 watts, 250 watts day to 1 KW day and night and move transmitter from 102 18th St., Rock Island, Ill. to site to be determined.

NEW—Joliet Printing Co., Joliet, Ill.—Construction permit for a new station to be operated on 1500 kc., 100 watts, 250 watts day, unlimited time.

W9XAL—The First National Television Corp., Kansas City, Mo.—Consent to assignment of license to First National Television, Inc.

NEW—Head of the Lakes Broadcasting Co., Superior, Wisc.—Construction permit for a new general experimental station to be operated on 31600, 35600, 41000 kc., 80 watts. Amended: To add frequency 38600 kc.

Fifth Zone

NEW—The Tribune, Great Falls, Mont.—Construction permit for a new station to be operated on 550 kc., 1 KW, 5 KW day, unlimited time. All facilities of KFYZ.

KHQ—Louis Wasmer, Inc., Spokane, Wash.—Construction permit to make changes in equipment.

KIEV—Cannon System, Ltd., Los Angeles, Calif.—Modification of construction permit (5-P-B-3268) for changes in equipment, increase in power and move of transmitter, requesting extension of commencement date from 10-30-35 to 2-1-36 and completion date from 12-29-35 to 4-1-36.

NEW—Earle Yates, Las Cruces, New Mex.—Construction permit for a new station to be operated on 930 kc., 1 KW, daytime.

NEW—Peninsula Newspapers Inc., Palo Alto, Calif.—Construction permit for a new station to be operated on 1160 kc., 250 watts, daytime. Amended: To omit name of Merced Star Publishing Co. from name.

NEW—Struble, Strong & Fagan (Carl C. Struble, Curtis T. Strong, Jane M. Fagan), The Dalles, Ore.—Construction permit for a new station to be operated on 1200 kc., 100 watts, un-

limited time. Amended: To change transmitter site from 112 West Second Ave., The Dalles, Oregon, to site to be determined, The Dalles, Oregon, and antenna system to be determined.

NEW—Democrat News Co., Inc., Lewiston, Mont.—Construction
1200 permit for a new station to be operated on 1200 kc., 100 watts, 250 watts day, unlimited time. Amended: To make changes in equipment.

KOL—Seattle Broadcasting Co., Seattle, Wash.—Authority to de-
1270 termine operating power by direct measurement of antenna.

NEW—A. W. Mills, Gallup, New Mex.—Construction permit for
1310 a new station to be operated on 1500 kc., 100 watts, daytime and limited. Amended: To change frequency from 1500 to 1310 kc., hours of operation from daytime and limited time to unlimited and make changes in equipment.

KIDW—The Lamar Broadcasting Co., Lamar, Colo.—Voluntary
1420 assignment of license from The Lamar Broadcasting Co. to The Southwest Broadcasting Co.

NEW—Ellwood W. Lippincott, Pendleton, Ore.—Construction per-
1500 mit for a new station to be operated on 1500 kc., 100 watts, daytime.

NEW—Southwest Broadcasting Co., Prescott, Ariz.—Construction
1500 permit for a new station to be operated on 1500 kc., 100 watts, 250 watts day, unlimited time. Amended: Re Stockholder.

NEW—W. P. Stuart, Prescott, Ariz.—Construction permit for a
1500 new station to be operated on 1500 kc., 100 watts, unlimited time. Requests facilities of KPJM. Amended: To make

changes in equipment and giving studio and transmitter sites as Union & Cortez Sts., Prescott, Arizona.

KRNR—Southern Oregon Publishing Co., Eugene, Ore.—License
1500 to cover construction permit (B5-P-434) as modified for a new station.

No Zone

WPRP—Julio M. Conesa, Ponce, Puerto Rico—Modification of
1420 construction permit (1-P-B-2940) for approval of transmitter site at No. 1 Trujillo St., Ponce, Puerto Rico, move studio from Plaza Principal, Ponce, P. R., to Trujillo St. (about 160' from transmitter), Ponce, P. R. and extend completion date from 1-18-35 to 180 days after grant. Also make changes in specified hours.

EFFECTIVE DATE EXTENDED

The Federal Communications Commission has extended the effective date of the Broadcast Division's Order of October 1, 1935 (Minute No. 239), in the so-called Brooklyn cases, Dockets Nos. 1780, 1936, 2039, 2641, 1882, 2013, 2014, 1967, 2643, 1883, 1968, 2642, 2259, 2411, 2343, 2463, 2462 and 2543, to January 22, 1936, pending its consideration of the petition of Paramount Broadcasting Corporation (WVFW) for rehearing on said Order under the provisions of Section 405 of the Communications Act of 1934, as to its application.

POWER INCREASE RECOMMENDED FOR KFPY

Broadcasting station KFPY, Spokane, Wash., operating on a frequency of 890 kilocycles, with unlimited time applied to the Federal Communications Commission to increase its daytime power from 1,000 to 5,000 watts with 1,000 watts at night as at present.

Examiner George H. Hill in Report No. I-176 has recommended that the application be granted. The Examiner found that no interference will be caused by the granting of the application and that "there is a definite need for the service of Station KFPY in the area not now being served by the station nor by any other station broadcasting Columbia Broadcasting System programs during daytime hours."

CASE DISMISSED AGAINST FCC

On motion of the Federal Communications Commission, the District Court of the United States for the Northern District of Illinois has dismissed the case against it by Peter B. Schyman.

Schyman asked the court to restrain the Commission from publishing certain information developing at a hearing before an Examiner of the Commission. Schyman claims that he is a doctor and that the publication of the information would hurt his professional reputation.

HOUSE PASSES FCC AMENDMENT

The House of Representatives this week without any discussion passed an amendment to the Communications Act of 1934 dealing with salaries of personnel of the Federal Communications Commission. The bill has already passed the Senate and it now remains merely to be signed by the President to become effective. The bill as passed provides: That paragraph (f) of section 4 of the Communications Act, 1934, is hereby amended by adding after the words "a chief engineer and not more than three assistants," the words "a chief accountant and not more than three assistants," and by adding after the words "and the chief engineer", the words "and the chief accountant", and by adding after the word "engineers" the word "accountants", so that paragraph (f) of section 4, as amended, will read as follows:

"(f) Without regard to the civil-service laws or the Classification Act of 1923, as amended, (1) the Commission may appoint and prescribe the duties and fix the salaries of a secretary, a director for each division, a chief engineer and not more than three assistants, a chief accountant and not more than three assistants, a general counsel and not more than three assistants, and temporary counsel designated by the Commission for the performance of special services; and (2) each commissioner may appoint and prescribe the duties of a secretary at an annual salary not to exceed \$4,000. The general counsel and the chief

engineer and the chief accountant shall each receive an annual salary of not to exceed \$9,000; the secretary shall receive an annual salary of not to exceed \$7,500; the director of each division shall receive an annual salary of not to exceed \$7,500; and no assistant shall receive an annual salary in excess of \$7,500. The Commission shall have authority, subject to the provisions of the civil-service laws and the Classification Act of 1923, as amended, to appoint such other officers, engineers, accountants, inspectors, attorneys, examiners, and other employees as are necessary in the execution of its functions."

FCC MAKES FIRST ANNUAL REPORT

The Federal Communications Commission this week made its first annual report to Congress. No recommendations were included. It is expected that if the Commission sees the necessity of further changes in the law that it will later transmit its recommendations to the appropriate committees of Congress. The report covers the fiscal year ending June 30, 1935.

The report shows that on June 30 of last year there were 623 broadcasting stations and that during the fiscal year nine stations were deleted and 39 new stations were authorized. Of this number, 31 were authorized under the provisions of section 307 of the Communications Act and were not charged to quota. Also during the fiscal year the Commission received 3,652 applications from broadcasting stations and authorizations were issued for 3,434 changes.

Merging of the old Federal Radio Commission are taken up in the report and details are given on the work of all of the departments and divisions of the Commission.

During the fiscal year the Commission spent \$1,125,599 for salaries and expenses in addition to \$13,518 for printing and binding.

A whole section of the report under the engineering department is devoted to broadcasting. In this section are discussed regular broadcast, modification of the rules, the operation of 500 kilowatt stations, experimental high fidelity broadcast, experimental relay broadcasting, experimental visual broadcasting, very high frequency experimental broadcasting and technical developments in regular broadcasting. Dealing with the allocation survey the Commission's report says: Since the allocation of 1928 no specific or basic changes have been made in regulation of the Commission governing the allocation of regular broadcast frequencies. There has been much public and engineering sentiment toward making certain basic changes rather than continuing granting of various applications that did not comply with this basic plan as originally adopted. While much engineering data have been taken by the Field Section of the Commission and at the numerous hearings held before the Commission, and the leading radio engineers throughout the United States have introduced large amounts of data, the Engineering Department was not convinced that it had sufficient information available on which to base a recommendation to the Commission to change the present allocation or to fully substantiate it.

The licensees of 13 clear-channel stations petitioned the Commission that it carry forward a survey in cooperation with them for the purpose of gaining further information. While the petition exactly as made was not accepted, the Commission did decide to carry forward the survey in cooperation with all broadcast licensees. Several informal conferences with all interested parties invited to be present were held when the extent and plan of survey, the prorating of the work, and the setting up of an organization to purchase equipment and management of the survey were decided. During January the survey actually began and the taking of data was closed on May 30, 1935.

The survey was divided into four principal parts, namely:

1. One hundred and sixteen thousand questionnaires were sent to the fourth-class postmasters and to a list of representative rural listeners furnished by the Agricultural Adjustment Admini-

stration requesting their preferences in radio stations with respect to satisfaction of reception.

2. The field personnel of the Commission made extended trips and interviewed radio listeners throughout various sections of the United States to obtain their opinions.

3. Continuous recordings were made of the signal received from broadcast stations in 10 different locations of the United States. The number of continuous recorders located at each of these points was from 4 to 8. This is the greatest number of field-intensity recordings heretofore taken and should give reliable information on the signal to be expected at distances from stations of various powers.

4. The radiating efficiency and primary service areas of several representative stations were determined by means of field-intensity equipment located in the Commission's test cars.

The data were all accumulated during the fiscal year 1934-35; however, the analysis, summary, conclusions, and recommendations to the Commission based on the survey were just begun at the close of the fiscal year.

FCC APPROPRIATION

The Appropriation Committee of the House of Representatives provided an appropriation of \$1,450,000 for the coming fiscal year for the Federal Communications Commission compared with its present appropriation of \$1,500,000 for the present year, a saving of \$50,000. An additional appropriation of \$25,000 is also made for printing and binding which is the present appropriation. This, of course, is in addition to the \$750,000 appropriation which the Commission has for the telephone investigation. The bill is now pending before the House for action.

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act: American Wringer Company, Inc., Woonsocket, R. I. (2-1819, Form E-1)

Berkey & Gay Furniture Co., Grand Rapids, Mich. (2-1820, Form A-1)

Eastern Life Insurance Co., of New York. (2-1854, Form A-1)

NEW STATION DENIAL RECOMMENDED

The Wisconsin Broadcasting Company applied to the Federal Communications Commission for a permit for the erection of a new broadcasting station at Oshkosh, Wis., to use 1310 kilocycles, 100 watts and 250 watts LS, and unlimited time on the air.

Examiner John P. Bramhall in Report No. I-177 recommended that the application be denied. The Examiner found that the applicant is "not financially qualified to construct and operate the proposed station." Also "the evidence fails to show need for additional service in the area proposed to be served." It was found also by the Examiner that the erection of the proposed station would cause interference with certain existing stations.

RECOMMENDS NEW PENNSYLVANIA STATION DENIAL

E. L. Clifford applied to the Federal Communications Commission for a construction permit for the erection of a new station at Pottsville, Pa., to use 580 kilocycles, 250 watts and daytime operation.

Examiner Melvin H. Dalberg in Report No. I-178 recommended that the application be denied. The Examiner states that "there is obviously an insufficient showing that the applicant himself is qualified for the management and operation of a radio station and proof with respect to those with whom he would be associated or that those whom he had it in mind to employ are technically qualified by experience and background to warrant such application is lacking."

NEW CALIFORNIA STATION RECOMMENDED

The Golden Empire Broadcasting Company has filed an application with the Federal Communications Commission asking to erect a new broadcasting station at Redding, Cal., to use 1200 kilocycles, 100 watts and unlimited time on the air.

Examiner Melvin H. Dalberg in Report No. I-175 recommended that the application be granted. The Examiner states that "it is apparent that there exists in the Redding, Cal., area a genuine need for local broadcasting facilities and the program material which is proposed seems to be of a satisfactory nature for a station of the power requested. The equipment proposed to be installed is satisfactory and meets all the engineering requirements of the Commission." The Examiner found that granting of the application would not cause any interference.

NEW QUOTA FACILITIES

The Federal Communications Commission has announced the following quota facilities due and assigned to broadcast stations as of January 2.

First Zone—Night

State	Due	Assigned	Units Over or Under	Percent Over or Under

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair methods of competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2237. A cease and desist order issued against **Paul F. Reich Co.**, a corporation, with its principal office and place of business at **Bloomington, Ill.**, has been vacated and an amended and supplemental complaint issued against that respondent and directed the taking of testimony on such amended complaint.

The respondent is charged in the amended and supplemental complaint with selling to wholesale and retail dealers packages or assortments of candy, so packed and assembled as to involve the use of a lottery scheme when sold and distributed to consumers.

No. 2670. Unfair competition by the representation of a dealer as a manufacturer, is alleged in a complaint issued against **M. and A. Berger**, of 82 Orchard St., New York, trading as **Wearwell Knitting Mills**.

In addition to the trade name containing the word "Mills", the respondents, according to the complaint, advertised knitted garments by means of the phrase "Manufacturers of High Grade Sweaters, Bathing Suits and Knitted Novelties", implying that they own or control a mill or mills, when in fact they have not manufactured these articles and have not owned or controlled a factory in which such products are knitted.

No. 2671. **Ross Knitting Mills, Inc.**, a corporation, trading under that corporate name and also as **Ross Sportswear Co.**, and **Nathan Hirsch**, also trading as **Ross Sportswear Co.**, of New York City, are named as respondents in a complaint charging violation of Section 5 of the Federal Trade Commission Act.

The respondents are engaged in selling and distributing knitted garments and other apparel in interstate commerce. It is alleged in the complaint that **Ross Knitting Mills, Inc.**, and **Nathan Hirsch**, in the sale of the products mentioned, falsely represent that they are manufacturers, when in fact they have not manufactured and do not manufacture the products they sell, nor do they own or control a mill in which such products sold by them are manufactured. It is set out in the complaint that use of the words "Manufacturers of", on the respondents' letterheads, business cards, invoices and otherwise, falsely implies that they are manufacturers.

No. 2672. **William W. Babcock**, doing business under the name and style of **National Civil Service Training Bureau**, with office and principal place of business in **Los Angeles, Calif.**, is named as respondent in a complaint charging violation of Section 5 of the Federal Trade Commission Act.

It is alleged in the complaint that the name "National Civil Service Training Bureau", used by the respondent in conducting his business, implies to persons solicited to pursue the respondent's course of study, that the said Bureau is a part of or is connected with, or is an agency of the United States government. The complaint sets out that in truth and in fact neither the respondent, his school, nor anyone connected therewith, has any connection whatever with the Federal government, and that the sale of the respondent's course of study in the manner complained about, is unfair competition within the meaning of the Federal Trade Commission Act.

No. 2673. **H. Will Elders**, seller and distributor of a medicinal preparation known as "Dr. H. Will Elders' Filled Prescription for Women," with his place of business at **St. Joseph, Mo.**, is named as respondent in a complaint alleging violation of Section 5 of the Federal Trade Commission Act. The respondent is charged with making false and misleading representations in advertising matter of the respondent's medicinal preparation.

No. 2674. A complaint has been issued charging **Griffith Piano Co.**, of **Newark, N. J.**, with unfair competition through imitation of advertisements of the **Mathushek Piano Manufacturing Co.**, of New York City, and through disparagement of the **Mathushek** company's product, the "Spinnet Grand" piano.

The "Spinnet Grand", a small, square type instrument with only four legs, has acquired a valuable good-will, according to the complaint, and has been advertised as occupying "only the space of a lounge". The complaint alleges that the respondent company advertised its "Colonial Grand Piano" by altering a picture of a conventional grand piano so that it appeared to be square or rectangular, similar to the Spinnet Grand, with the fifth leg eliminated. It was advertised as occupying "no more space than a lounge or sofa."

No. 2675. A complaint has been issued alleging unfair competition on the part of **Joseph Weidenhoff, Inc.**, of **Chicago**, said to be the largest manufacturer of automobile testing devices in the United States. The complaint charges the respondent with executing an unlawful plan to control and restrain interstate commerce in testing devices.

Obtaining a patent for the special use of a vacuum gauge, the respondent is alleged to have manufactured testing devices consisting of a large number of separate and unrelated parts and items, including the vacuum gauge, assembled into one apparatus and sold to garage owners and others at prices ranging from \$175 to \$1,000 a device.

No. 2676. A complaint has been issued against **Dennison Bros.**,

Inc., of 437 Eleventh Ave., **New York City**, alleging unfair competition through representation to the public that a large percentage of its profits are for the use and benefit of a charitable institution, the **Bethlehem Orphan and Half-Orphan Home**, of **New York City**.

The respondent is charged with utilizing the representation about its gifts to a charitable institution so as to increase its sales and obtain patronage which otherwise would be unavailable.

Stipulations

The Commission has announced the following cease and desist orders:

Nos. 1567-1568. **Louis and Isadore Kaplin**, of 223 **Cherry Street, Philadelphia**, trading as **Metropolitan Bag & Suitcase Co.**, manufacturing luggage, including gladstone bags and suit cases, and **Standard Traveling Goods Co.**, 331 **Race Street, Philadelphia**, manufacturing men's and women's hand luggage, agree to discontinue misleading representations of their products. **Louis** and **Isadore Kaplin** stipulate that they will cease and desist using the word "leather" alone or in connection with the phrase "warranted genuine," and **Standard Traveling Goods Co.**, that it will stop using the word "leather," alone or in connection with the phrase "Guaranteed Genuine," to brand or label their products so as to imply that they are made of leather from the top or grain cut of the hide; unless, when the products are composed of leather made from the inner or flesh cut of the hide, the word "leather," if used to designate them, shall be accompanied by the word "split" in conspicuous type to clearly indicate that the products are not made of leather from the top or grain cut.

No. 1569. **The Wilson-El-Bart Corporation**, 70 **West 40th Street, New York City**, is engaged in distilling American-made alcoholic beverages, including gin and whiskey, and has agreed to abandon use in its advertising matter of representations to the effect that Canadian, or "over-the-border" whiskies are impractical or are not suitable for use in the blending of distilled spirits, or that blended whiskey prepared with imported Canadian whiskey is a product inferior to a mixture made of American straight whiskey. The respondent agrees also to stop making other representations of equivalent meaning when such are not the facts, and when such allegations amount to disparagement of imported Canadian whiskies of competitors.

No. 1570. **Binks Manufacturing Co.**, of 3105 **Carroll Avenue, Chicago**, manufacturer of painting and finishing equipment, including a spray gun designated "Thor Model 2," agrees to cease and desist from use in advertising of the representation that certain automobile and body manufacturers have ordered or purchased a total of 11,750 or more of **Binks** products, when this is not true. The stipulation shows that this company advertised that **General Motors** ordered over 4,000 of its products; **Chrysler** more than 3,050; **Studebaker** in excess of 1,500; **Briggs Body** in excess of 2,000, and **Fisher Body** over 1,200. The stipulation points out that this allegation in the respondent's advertising was greatly exaggerated, and much in excess of the actual number of the devices ordered or purchased by these manufacturers.

No. 1571. **Jennings B. Momsen**, of 838 **North 13th Street, Milwaukee**, trading as **Temple Airway Bureau**, and engaged in the sale of alleged data and information by direct mail relating to the **United States Air Corps**, agrees to cease and desist advertising his business in periodicals under the classification, "Help Wanted," and representing in such advertisements that men are wanted for the **United States Air Corps**; that the alleged information concerning the corps which he sends applicants in return for a fee has any monetary value, or that this is information which could not readily be obtained by such applicants from official sources without cost. He also agrees to cease alleging that the **Temple Airway Bureau** is a flying school or that it is in a position to assist an applicant applying for admission and training in the air corps.

No. 1572. **Adolph Hauptman**, of 1123 **Broadway, New York City**, importer and factory representative in the wholesaling of a variety of products, agrees to stop selling in interstate commerce, toothpicks packed in cartons or packages of a dress or appearance approximately the same as that of cartons or packages in which similar merchandise is sold by a competitor. **Hauptman** is said to have imitated the cartons in which toothpicks were packed and sold by the Estate of **Charles Forster**, of **Strong, Me.**

No. 1573. **Morris Senderowitz** and **Morris H. Senderowitz**, 645 **Jordan St.**, **Allentown, Pa.**, manufacturing men's underwear, agree to stop marking, branding or labeling goods with price markings in excess of the usual and customary selling value thereof.

No. 1574. J. C. Winter & Co., Inc., Red Lion, Pa., cigar manufacturer, agrees to discontinue use of the expressions "Hand Made," "Havana," and "Sumatra," to describe the process, filler and the wrapper respectively of cigars not made wholly by hand, with fillers not made from Havana tobacco or tobacco grown on the island of Cuba, and wrappers not raised in Sumatra. The company also agrees to cease certain misleading assertions regarding its prices.

No. 1575. Duplex Silk Mills, Inc., 1410 Broadway, New York City, engaged in purchasing raw silk which it causes to be "thrown" or spun, and of rayon yarn, and having the silk and rayon yarn woven into fabrics according to its specifications, agrees to stop using the word "mills" as part of its trade name, or in any way which may tend to deceive buyers into believing that it owns and controls mills wherein its products are made, when this is not true.

No. 1576. B. R. Stone and J. W. Hogan, of 620 Kasota Building, Minneapolis, trading as **Rogers Publicity Department**, formerly engaged in the sale of coupons and advertising matter for use by retailers in selling their merchandise, and in the redemption of such coupons by exchanging them for silverware. The respondents agree to cease using the phrase "Rogers Publicity Department" as a trade name under which to transact their business, or of any other words having a tendency to deceive buyers into believing that they are a department of, or connected with William A. Rogers, Limited, manufacturer of silver-plated ware, when this is not true. The respondents agree to cease certain other representations in the conduct of their business.

No. 1577. New England Woolen Mills Co., 1420 West 6th St., Cleveland, agrees to abandon use of the word "mills" as part of its trade name, and to stop using this word in any way which may imply that it owns and controls the mill in which its products are made, when this is not true.

No. 1578. M. L. and Marsell Fernandez, 2007 11th St., Tampa, Fla., trading as **M. L. Fernandez and Brother**, in the manufacture and sale of cigars, agree to forego use on brands or labels affixed to their products, of the words "Vuelta Abajo," independently or in connection with other words implying that the products are made entirely of tobacco grown in Cuba or in the Cuban province of Vuelta Abajo, when this is not true.

No. 1579. J. A. Begin and A. C. Herbert, copartners, trading as J. A. Begin & Co., of Beebe Plain, Vt., engaged in the quarrying of granite from quarries located at Beebe, Quebec, agree to stop the use in their advertisements of the words "Near Barre," to designate products which are not, in truth and in fact, made of granite produced or quarried near Barre, Vt., and within the Barre district. The stipulation points out that the Barre district of Vermont produces a granite of high quality which has developed a reputation and good-will in the use of the word "Barre."

No. 2465. Joseph M. Guerra, of 16 E. Tupper St., Buffalo, N. Y., engaged as a printer of social and business stationery under the name **Benton Novograph Co.**, has been ordered to cease and desist from certain misrepresentations in the sale of his product.

Guerra is directed to cease using the words "engraved," "engraving," and "engravers" in advertising his business or his products on which the lettering or designs have been printed from ink typed faces, electrotypes, or similar devices, and given a raised letter effect by an embossing process.

No. 2517. The General Implement Co. of America, Inc., of Cleveland, and its subsidiary, **The General Implement Manufacturing Co., Inc., of Liberty, Ind.,** have been ordered to discontinue certain unfair competitive methods in the sale under the trade name "Soil Fitter," of certain farm implements and tools purchased as bankrupt stock of the former Dunham Co., of Berea, O.

The order prohibits the respondents from advertising the "Soil Fitter" line as the most complete line of farm implements and tools made, and that they will furnish repair parts for use with tools and implements listed on special price sheets, until they actually do furnish such parts. Other representations regarding the "Soil Fitter" line are banned under the order.

No. 2545. Philip Wong, Cambridge, Mass., dealer in "Soft Corn Valuable," has been ordered to discontinue advertising this preparation as a cure or proper treatment for various named diseases, or as harmless or non-poisonous.

Findings are that the product will not cure the diseases enumerated, including corns, callouses, skin diseases, goiter, cancer, consumption, and others, and is not harmless, but, on the contrary, is poisonous and dangerous to be taken internally.

No. 2555. Speidel Corporation, of 70 Ship Street, Providence,

R. I., has been served with an order to cease and desist prohibiting certain unfair competitive methods in the sale of jewelry.

Use of the term "gold shell" or words of similar import to describe gold covered products manufactured by an electroplating or electrolytic process, is banned in the Commission's order. The respondent is directed to stop representing that jewelry produced by any process other than the "gold filled" or "rolled gold plate" process, possesses a "gold shell" or contains a deposit of a substantial quantity of gold on the exterior. Provision is made that this part of the order shall be effective unless the gold deposit is comparable by weight and thickness with the amount and quality of gold deposit contained on the exterior of articles correctly designated "gold filled," or "rolled gold plate."

No. 2577. In an order issued against Frank Livingston, trading as Berkshire Textile Co., at Brattleboro, Vt., and Greenfield, Mass., he is required to cease and desist from certain practices held by the Commission to be in violation of Section 5 of the Federal Trade Commission Act.

Among other things, the respondent is required to cease and desist from advertising, in the sale and distribution of dress goods, that he gives goods free to customers who make purchases, unless he in fact does so; from representing that the respondent is the owner or operator of or controls a factory at which the goods he sells are made; from representing that the respondent guarantees satisfaction to his customers; from representing that the prices at which the goods are offered are special bargain prices, when this is not the fact, and from certain other practices alleged by the Commission to be in violation of law.

NEW CHAIRMAN OF FTC

Col. Charles H. March has been designated to serve as Chairman of the Federal Trade Commission for the fiscal year 1936, effective January 1. He succeeds Commissioner Ewin L. Davis, who has served in that capacity during the last year. Under the Commission's custom, the Chairmanship rotates annually.

This will be Col. March's second term as Chairman of the Federal Trade Commission. He was appointed to that Commission in 1929 for a term expiring September 25, 1935, and was reappointed by President Roosevelt last September for a full term of seven years, expiring in 1942. Col. March served as Chairman during 1933.

FTC CASE CLOSED

No. 2587. The Federal Trade Commission has closed its proceeding against the Associated Lobster Dealers of Massachusetts, Boston, and its officers and members.

Conspiracy to fix prices of lobsters obtained from Canadian and American waters had been alleged in the Commission's complaint.

The Commission, however, closed the case without prejudice to its right to reopen it "should conditions hereafter arising require such action in the public interest."

FEDERAL COMMUNICATIONS COMMISSION ACTION

No meeting of the Broadcast Division of the Commission was held at the usual time this week owing to the fact that the Commission was hearing testimony in the coaxial cable application of the American Telephone & Telegraph Company.

HEARING CALENDAR

Monday, January 13

HEARING BEFORE AN EXAMINER (Broadcast)

- KVSO—The Ardmoreite Publishing Co., Inc., Ardmore, Okla.—C. P., 1210 kc., 100 watts, 250 watts LS, unlimited time. Present assignment: 1210 kc., 100 watts, daytime.

FOR FURTHER HEARING AND ORAL ARGUMENT BEFORE THE BROADCAST DIVISION

KFYR—Meyer Broadcasting Co., Bismarck, N. Dak.—Renewal of license, 550 kc., 1 KW, 5 KW LS, unlimited time.

Friday, January 17

NEW—Alfred C. Matthews, Cape May, N. J.—C. P., 1420 kc., 100 watts night, 100 watts day, specified hours.
WPAR—Ohio Valley Broadcasting Corp., Parkersburg, W. Va.—C. P., 1420 kc., 100 watts, 250 watts LS, unlimited time. Present assignment: 1420 kc., 100 watts, unlimited time.

APPLICATIONS RECEIVED

First Zone

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Construction 830 permit to make equipment changes.
WJAR—The Outlet Co., Providence, R. I.—Extension of special 890 authorization to use additional power of 250 watts night for period from 3-1-36 to 9-1-36. (Gives 500 watts power day and night.)
WESG—Cornell University, Elmira, N. Y.—Extension of special 1040 experimental authorization to operate on 850 kc., daylight to sunset at New Orleans, Pa., for period from 2-1-36 to 8-1-36.
WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn. 1040.—Extension of special experimental authorization to change frequency from 1060 kc. to 1040 kc.; time from S-WBAL to simultaneous operation with KRLD (unlimited) for period 2-1-36 to 8-1-36.
WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Extension of 1060 special experimental authorization to change time from S-WTIC to daily simultaneous operation on 1060 kc. with KTHS from 6 a. m. to local sunset at Hot Springs, Ark., from local sunset to 9 p. m., operation unlimited on 1060 kc. from 9 p. m. on. Will synchronize with WJZ on 760 kc., with power of 2½ KW, until end of license period from 2-1-36 to 8-1-36.
WNRI—S. George Webb, Newport, R. I.—Modification of construction permit (1-P-B-2815) for new station requesting extension of completion date from 2-4-36 to 6-4-36.
WMFF—Plattsburg Broadcasting Corp., Plattsburg, N. Y.—Modification of license to change hours of operation from daytime to 7:30 p. m., using 100 watts power at night.
WBNY—Roy L. Albertson, Buffalo, N. Y.—Modification of construction permit (B1-P-402) for approval of antenna, and transmitter site at Kenmore Ave., 250 feet east of Starin Ave., Buffalo, N. Y., and studio at 485 Main St., Buffalo, N. Y. Amended to give transmitter site from Kenmore Ave., 250 feet east of Starin Ave., Buffalo, N. Y., to 154 E. Eagle St., Buffalo, N. Y.
WVFW—Paramount Broadcasting Corp., Brooklyn, N. Y.—Transfer of control of corporation from Paramount Broadcasting Corp. to Brooklyn Council, Kings County Dept. of N. Y. Veterans of Foreign Wars of the United States, 51 shares of common stock.
NEW—Connecticut State College, Storrs, Conn.—License to cover construction permit for a new general experimental station.

Second Zone

WKRC—WKRC, Inc., Cincinnati, Ohio.—Extension of special experimental authorization to operate with 1 KW power for period from 3-1-36 to 9-1-36.
NEW—Berkas Broadcasting Co., Pottsville, Pa.—Construction permit to erect a new broadcast station on 640 kc., 250 watts, daytime operation.
WQAN—E. J. Lynett (Prop., The Scranton Times), Scranton, Pa.—880 Voluntary assignment of license from E. J. Lynett (Prop. of The Scranton Times) to The Scranton Times (co-partnership), E. J. Lynett, Wm. R. Lynett, Elizabeth R. Lynett, and Edward J. Lynett, Jr.
WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—1370 Construction permit to install auxiliary transmitter.

NEW—Miami Valley Broadcasting Corp., Dayton, Ohio.—Construction permit for a new general experimental station for 31600, 35600, 38600, 41000 kc., 100 watts.
NEW—WBNS, Inc., Columbus, Ohio.—Construction permit for a new general experimental station on 31600, 35600, 38600, 41000 kc., 1 KW.

Third Zone

WTJS—The Sun Publishing Co., Inc., Jackson, Tenn.—Construction 920 permit to install new equipment, increase power from 100 watts, 250 watts day, to 250 watts, 500 watts day; move transmitter from Hall St., Jackson, Tenn., to 350 feet east of Hollywood Cemetery, northwest of city limits, exact site to be determined, Tennessee, using directional antenna. Amended to give frequency as 920 kc.
KRLD—KRLD Radio Corp., Dallas, Tex.—Extension of special 1040 experimental authorizations to operate simultaneously with WTIC for period from 2-1-36 to 8-1-36.
KTHS—Hot Springs Chamber of Commerce, Hot Springs National 1060 Park, Ark.—Extension of special experimental authorization to change frequency from 1040 kc. to 1060 kc.; time from S-KRLD to simultaneous WBAL from 6 a. m. to local sunset daily, suspend until 8 p. m., and unlimited from then until midnight, for period to 8-1-36.
KWKH—International Broadcasting Corp., Shreveport, La.—Extension of special authorization to operate on 1100 kc., unlimited time, with directional antenna at night, for period 2-1-36 to 8-1-36.
NEW—State Capitol Broadcasting Assn. (R. B. Anderson, President), Austin, Tex.—Construction permit for new station on 1120 kc., 500 watts, 1 KW day, specified hours (all hours not used by WTAW), using directional antenna.
WPAX—H. Wimpy, Thomasville, Ga.—Modification of construction permit (B3-P-386) for changes in equipment and increase in power, requesting approval of transmitter site at 117 Remington Ave., Thomasville, Ga., and approval of antenna system; extend commencement date from 7-14-35 to 10 days after grant and completion date from 1-14-36 to 30 days after grant.
KTRH—KTRH Broadcasting Co., Houston, Tex.—License to cover 1290 construction permit (B3-P-880) for changes in equipment.
KTRH—KTRH Broadcasting Co., Houston, Tex.—Authority to 1290 determine operating power by direct measurement of antenna.
KPDN—Pampa Daily News, Inc., Pampa, Tex.—Modification of 1310 construction permit (B3-P-382) for a new station for changes in equipment, approval of transmitter site at .8 of a mile east of city limits on highway 33, Pampa, Tex., studio site at 212 No. Ballard, Pampa, Tex., and approval of antenna.
WSGN—R. B. Broyles, tr/as R. B. Broyles Furniture Co., Birmingham, Ala.—Voluntary assignment of license from R. B. Broyles, tr/as R. B. Broyles Furniture Co., to The Birmingham News Co.
NEW—Albert E. Davis, Brownwood, Tex.—Construction permit 1420 for a new station on 1420 kc., 100 watts, daytime operation. Amended: Transmitter site to be determined, Brownwood, Tex.
W4XBT—Radio Station WSOC, Inc., Portable-Mobile.—License to cover construction permit for new general experimental station.
NEW—WKY Radiophone Co., Oklahoma City, Okla.—Construction permit for a new experimental relay station for 6020, 9510, 11810, 15170, 17760, 21480 kc., 5 KW.
NEW—Tri-State Broadcasting System, Inc., Portable-Mobile.—Construction permit for broadcast pickup station for 1606, 2020, 2102, 2760 kc., 50 watts.
NEW—Tri-State Broadcasting System, Inc., Portable-Mobile.—License to cover the above.

Fourth Zone

WEDC—Emil Denmark, Inc., Chicago, Ill.—Modification of license 1210 to change specified hours from daily, 8:30-10:00 a. m., 3:30-5:00 p. m., 7:00-8:00 p. m., 10:00-11:00 p. m., 1:00-3:00 a. m.; to daily, 8:30-10:00 a. m., 3:30-5:00 p. m., 7:00-8:00 p. m., 10:00 to 11:00 p. m., midnight to 6:00 a. m. (requesting 1 hour used by WCRW, from midnight to 1:00 a. m.).
KLPM—John B. Cooley, Minot, N. Dak.—Modification of license 1240 to change hours of operation on Sundays from 9:00 a. m. to 11:45 a. m., 1:30 p. m. to 2:30 p. m., 5:00 p. m. to 8:00 p. m., CST, to 9:00 a. m. to 11:45 a. m., 7:00 p. m. to 11:00 p. m.

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—License to 1310 cover construction permit (B4-P-377) for changes in equipment and increase in power
 W9XAF—The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Renewal of license.
 W9XID—Donald A. Burton, Portable-Mobile.—License to cover construction permit for general experimental station.
 NEW—Racine Broadcasting Corp., Portable-Mobile.—Construction permit for a general experimental station on 31100, 34600, 37600, 40600 kc., 10 watts.
 NEW—Racine Broadcasting Corp., Portable-Mobile.—License to cover above.

Fifth Zone

KVOS—KVOS, Inc., Bellingham, Wash.—Consent to transfer of 1200 control of corporation from Wescoast Broadcasting Co. to Rogan Jones, 147 shares of common stock.

KVOR—S. H. Patterson, Colorado Springs, Colo.—License to cover 1270 construction permit (B5-P-580) to move transmitter and make equipment changes.
 NEW—Donald A. Wike and H. E. Studebaker, Baker, Ore.—Construction permit for new station on 1370 kc., 100 watts, 250 watts day, unlimited time, requesting frequency of KUJ contingent upon KUJ being granted another frequency as applied for. Amended to give name as Donald A. Wike and H. E. Studebaker, d/b as Wike and Studebaker.
 KABD—Don Lee Broadcasting System, Los Angeles, Calif.—License to cover construction permit for broadcast pickup station.
 W10XFZ—Don Lee Broadcasting System, Portable-Mobile.—License to cover construction permit for general experimental station.
 W6XB—Earl A. Meilsen, Portable-Mobile.—License to cover construction permit.

COPYRIGHT

Tentative Program of Activity in Behalf of the NAB

FOREWORD

On Friday, January 10, 1936, after a long day of arduous labor, the Managing Director and his Advisory Committee discussed and agreed upon the following tentative program of activity in the field of copyright.

Late that evening they were informed, through newspaper sources and not by any communication from ASCAP, that a wire had gone out from ASCAP to all stations saying in substance that stations have until January 15, 1936 to accept the offer of a five-year contract contained in Mr. Buck's telegram of December 30, 1935 and those that do not accept are to be deemed infringers. This wire appears to be intended and to operate as a cancellation of the temporary arrangement under which most stations have been operating, based on Mr. Buck's letter, dated December 30, 1935, given to and accepted by the Managing Director.

This is not the time or place to comment on the precipitous action thus taken by ASCAP. Until it was taken, the Managing Director had every reason to believe that ASCAP would not exercise its right of cancellation of the temporary arrangement without first having further negotiations with him and his Committee and without having exhausted all possibilities of reaching an amicable settlement of the issues that have arisen. That hope, it seems, was without foundation.

At present writing it would seem that stations needing ASCAP music have no alternative but to accept the five-year contract by January 15, 1936. To this extent, the course of events has outrun a part of the tentative program which appears below. These events, of course, place increased obstacles in the way of future negotiations with ASCAP but the Managing Director and his Advisory Committee refuse to regard these obstacles as insuperable. Even if they are insuperable, that is all the more reason for bending every effort to carry out the rest of the program.

This report is to advise the members of the National Association of Broadcasters of a tentative program of activity in the field of copyright, agreed on by the Managing Director and his Advisory Committee¹ (selected pursuant to a resolution adopted by a majority of the Board of Directors, December 17, 1935). It is of the utmost importance that every broadcaster immediately acquaint himself with this program. For convenience, the activities proposed will be considered under the following four headings:

- A. License arrangements between broadcasters and organizations controlling performing rights on copyrighted music.
- B. Compiling and distribution of information to broadcasters and the taking of any proper steps to assist them in protecting themselves against exorbitant or unreasonable demands.
- C. The copyright bill now pending in Congress, known as the Duffy Copyright Bill.
- D. The suit now pending in the Federal Court, instituted by the government against ASCAP.

The problems referred to, and intended to be covered by the foregoing are, for the most part, such as to call for immediate decision and determination of a course of action to be pursued promptly and effectively.

A. LICENSE ARRANGEMENTS BETWEEN BROADCASTERS AND ORGANIZATIONS CONTROLLING PERFORMING RIGHTS ON COPYRIGHTED MUSIC.

From the point of view of number of copyrighted compositions controlled and their value to the average American broadcaster, the principal organizations controlling performing rights are:

1. American Society of Composers, Authors and Publishers (ASCAP).

2. Music Publishers Holding Corporation (MPHC), being the Warner Brothers group of music publishers.
3. Associated Music Publishers, Incorporated (AMP).
4. European Society of Stage Authors and Composers (SESAC).
5. Ricordi of Milan.

There are, of course, other important organizations, especially in the foreign field, and an unknown number of small independent music publishers and music copyright owners in this country. For the sake of simplicity, however, they will be disregarded in this discussion although they cannot and should not be ignored in fact or in practice.

It is unnecessary to state that the forms and terms of the license agreements of these several organizations, and the bases for calculating compensation to be paid by Licensees, conform to no standard. They are bewildering in their variations, not only as between the several organizations but also as between outstanding contracts and classes of contracts of the same organization. With reference to the bases for compensation, the principal classifications are:

1. A fixed amount (usually called a sustaining fee) calculated arbitrarily, plus a percentage of the Licensee's total net receipts.
e. g., the ASCAP contract held by the great majority of broadcasters.
2. A fixed amount calculated arbitrarily, plus a percentage of the Licensee's gross actual receipts from programs containing music.
e. g., the ASCAP contract held by WCAU.
3. A minimum guarantee calculated arbitrarily, plus a percentage of the Licensee's net receipts from programs containing Licensor's music.
e. g., the ASCAP contract held by about 48 newspaper stations.

¹ The members of the Advisory Committee who participated in and approved this report are Messrs. Allen, Caldwell, Carpenter, Clark, Craig, Damm, and Loucks.

4. A fixed amount calculated arbitrarily, plus a percentage of the Licensee's net receipts excluding a portion of the network receipts on network programs.
e. g., the ASCAP contract held by the network owned or controlled stations.
5. A fixed amount calculated arbitrarily.
e. g., the ASCAP contracts held by certain nonprofit stations; also the SESAC contracts.
6. A fixed amount calculated according to some standard.
e. g., the MPHC contract based on a monthly payment of X times the station's highest quarter hour rate; the AMP contract based on a monthly payment of one times the station's highest day-time quarter hour rate; and the Ricordi contract based on gross receipts of stations.
7. A fixed amount, whether calculated according to some standard or not, covering not only the Licensee's station or stations but also other stations (network affiliates) to whom Licensee furnishes programs, with respect to such programs.
e. g., the SESAC and AMP contracts with the two national network companies; the MPHC contract contemplated with MPHC and said companies.
8. Compensation calculated on a per-piece or per-use basis, with or without a guarantee minimum.
e. g., the future MPHC contracts as contemplated in the present three months contracts.

There are undoubtedly other varieties than the foregoing, and many subvarieties of the foregoing.

In view of the complexities raised by the fact that with respect to two of the organizations (ASCAP and MPHC) there is a pressing and immediate need for negotiations, and by the further fact that such negotiations will necessarily be closely related with present and future negotiations with the other organizations, it seems advisable to subdivide this discussion into appropriate sub-headings.

1. The ideal objectives sought to be accomplished.

(a) *No discrimination.* At the earliest possible date all discriminations by any such organization as between Licensees must be completely and finally eliminated. The terms and the compensations must be based upon some reasonable standard, applicable to all alike, and the contracts must contain clauses binding the Licensor to give the benefit of any more favorable contract of one Licensee to all Licensees. This, of course, does not mean that more favorable contracts may not be accorded to small stations as a class, or to bona fide non-profit stations as a class, provided that the line drawn is reasonable and all within the class are similarly treated.

Any contract between a broadcaster and a copyright owner by which the broadcaster gets the exclusive right for any period to broadcast one or more compositions is to be considered a form of discrimination and is not to be tolerated, and any license agreements should be drawn so as to eliminate, so far as possible, any such form of discrimination.

(b) *Basis for calculating compensation.* This Managing Director and his Advisory Committee have little discretion in this matter. The membership of the NAB at three successive annual conventions have endorsed the per-piece or measured service basis for compensation and have left no discretion except as to the detailed method of giving it effect. As noted below, there are several possible varieties of per-piece plans, and some present practical difficulties and burdens far greater than do others. Subject to this qualification only, the Managing Director and his Advisory Committee unqualifiedly endorse the per-piece basis as the only just and equitable basis for compensation, and will insist upon it as an immediate or eventual indispensable term of any contract.

In view of the fact that there is a substantial minority in the NAB which, while conceding the theoretical desirability of the per-piece basis, believes the practical difficulties are too great to put it into effect immediately, and in view of the further fact that a certain number of the smaller stations are not equipped or staffed to do so immediately, and in view of the further fact that certain outstanding contracts (particularly ASCAP) may prove to be a temporary insurmountable obstacle, it is recognized—

- (a) that the putting of such a plan into effect may have to be gradual, but in no event should it await five years or any substantial portion thereof,
- (b) that it may have to be accompanied by temporary alternative forms of contracts, available to all stations on equal terms, and
- (c) that a permanent alternative may have to be offered to the smaller stations,
e. g., a flat license fee.

No temporary or permanent alternative should be accepted, however, which is in anyway discriminatory or which is not based on some reasonable and easily intelligible standard. In particular, compensation should in no event be based on a percentage of Licensee's revenue.

(c) *Nature of licensing organization.* If the benefits of price competition between copyright owners (or groups thereof) could be secured and preserved, the ideal licensing medium for a per-piece system would be a single organization, conducted in a fashion analogous to certain well known patent licensing pools. The organization would act simply as the repository and trustee of performing rights, with power to issue licenses. It would have no power to fix, or to participate in the fixing of any price per-piece; this would be done by the copyright owner who registers his compositions, and the compensation he expects with the organization. It would, however, have to be bound by certain agreed classifications with respect to stations, and, with respect to compositions. The organization would be responsible for collecting the compensation from Licensees and for distributing the proceeds (less expenses) to the copyright owners on a per-piece basis. It would be open to any and all copyright owners without discrimination.

As a practical matter, this ideal does not seem likely of realization, at least in the immediate future, and perhaps never without compelling legislation or judicial decree. The possibilities and the desirability of such legislation have not been canvassed by the Managing Director or his Advisory Committee, and, in any event, the legislative process is too slow to meet the immediate problem. On the other hand, such possibility should not be ignored in any long range plan on the subject.

Several years ago ASCAP might be said to have come close to meeting one of the essential features of such an organization but to have been completely lacking in another essential feature. On most of the important musical compositions, it held or claimed to hold, the performing rights, and, while it is said that the proceeds were inequitably distributed by it among its members and that the conditions of admission to membership were such as to be unfair to outsiders, it did seem to furnish most of the convenience of a single licensing organization. The bad features which counterbalanced this convenience was that, being virtually a monopoly, it had power to exercise, and did exercise, an unrestrained power to fix prices. There was no price competition between the copyright owners, nor was there any other form of competition between them.

Since then, separate licensing organizations have made their appearance, notably AMP, SESAC, and, most recently, MPHC. It cannot yet be said that there is any evidence of price competition between them. Probably there will be no such competition until the broadcaster is on a basis of bargaining equality. In this connection the subject matter of parts B, C, and D becomes of prime importance.

The present existence of several licensing organizations has potential advantages for the broadcaster, so long as those organizations have price-fixing power, for the sake of securing some measure of the competition to which buyers are entitled. The Managing Director and his Advisory Committee conclude, therefore, that, pending the advent of an ideal such as previously described, it should be their aim to prevent by any proper means within their power the elimination of any potential competition by the merger of the more important licensing organizations.

(d) *Clearance of copyright at the source.* It is indispensable that performing rights be cleared at the source. By "source" is meant the originating station, or the originating station or network studio, in the United States. The terms is not intended to cover remote control orchestras and the like (although certain exceptions should be made in such situations where the broadcaster has no voice in what is performed), since it cannot be expected that the Licensor will accept such a responsibility.

Reference is had primarily to network programs. The network company should be exclusively responsible for obtaining licenses from, and paying compensation to, the licensing organization, and the affiliate station should not bear any portion of this responsibility. The network company may, of course, pass on a share of the cost to the affiliate; this will depend on contract arrangements between network and affiliate.

In no other way can responsibility be laid where it belongs. The originator of the program is in a position to commit or to avoid infringements; the affiliate is not. The originator collects the revenue from the advertiser out of which, directly or indirectly, the performing fees must ultimately be paid. Finally, if the practice becomes prevalent of passing on the cost to the advertiser,

the originator is the person having contact with and collecting revenue from the advertiser.

The same principles apply to electrical transcriptions, and should be insisted on.

(e) *Compulsory furnishing of lists of compositions.* Henceforth, no licensing agreements should be entered into which do not obligates the Licensor to furnish to Licensee a complete list of the compositions covered by the license, and to maintain such lists up-to-date by additions furnished at stated intervals. In large measure this was accomplished for the first time in the current temporary MPHC contract.

The importance of such lists is obvious. They are a necessary prerequisite to any per-piece system of compensation. Without them, an indemnity agreement is so easily evaded as to be almost worthless. Eventually such lists will put an end to the confusion of overlapping and conflicting claims of the principal licensing organizations.

It cannot be emphasized too strongly that the copyright notice printed on musical compositions gives no trustworthy indication as to who controls the *performing rights* with respect to that composition. This information can be obtained in no other way than by lists furnished by the licensing organizations.

(f) *An adequate guarantee of indemnity.* Henceforth, every license agreement should contain an adequate guarantee of indemnity, protecting the Licensee against infringement claims by all third parties based on performance of compositions covered by the license agreement. Such a guarantee is not adequate if it is limited in amount (as in the current temporary MPHC contract), or if it is not referable to a definite and easily accessible list of compositions, or if accompanied by any other qualification detracting from the protection to which the Licensee is entitled.

(g) *The reasonableness of requirements as to records and periodical reports.* It must be conceded at the outset, that if either a per-piece plan or any form of measured service plan is to be adopted, fairness to the Licensor demands reasonable obligations on the part of the Licensee to keep adequate records and to make periodical reports to the Licensor. Once this is conceded, it makes little difference whether such reports are made on a weekly or a monthly basis.

Requirements as to records and reports should, however, be confined to what is reasonably necessary to accomplish the purpose, and should not extend merely to prying into the Licensor's business. No reason is perceived, for example, for requiring the Licensee to report performances of compositions not covered by the license agreements; the Licensor will be adequately protected by a right to audit Licensee's lists and by any other means of checking Licensor may have. The reporting of all compositions is an undue burden, and will be all the worse if it must be done to each Licensor.

Only limited records and reports can be expected or required with respect to phonograph records, electrical transcriptions, and network programs (so far as affiliates are concerned), because of the impossibility of giving the complete information.

In all cases where only a flat fee (e. g., a fee based on card rates) is required, the burden of records and reports should not be as great.

(h) *Miscellaneous.* The foregoing are intended to cover only the principal features of license agreements, and are not intended to exclude consideration of other features which are or may be objectionable. For example, license agreements should not be required to be personal to the Licensee, and their benefits and objections should go with the sale or transfer of control of the station. Furthermore, license agreements should be drawn so as to leave no doubt as to the right of the broadcaster to make any arrangement or adaptation of a musical composition reasonably incidental to the broadcasting of such composition.

(i) *Uniformity.* Uniformity of arrangement and phraseology of license agreements is an end worthy of consideration in itself. It helps to avoid conflicting and confusing interpretations. To this end, study of the forms and agreements now in use by the several licensing organizations should be made and their differences and objectionable features should be noted. There is no reason, for example, why a model guarantee clause can not be drafted, agreed upon, and used in all contracts.

It is to be noted that to date little or no attention has been paid by broadcasters to the forms used by AMP, SESAC, and many other licensing organizations.

2. Means and methods for establishing a per-piece system of compensation.

As already stated, the NAB is committed to securing the adoption of a per-piece or measured service system of compensation.

The subject cannot, however, be intelligently approached without giving due weight to practical difficulties since they have a definite bearing on which of several plans should be sought, as well as on the steps which must be taken by broadcasters to prepare themselves for the carrying out of any such plans.

The furnishing to each Licensee of authentic lists by the licensing organization is an indispensable prerequisite to any acceptable plan. At the present date no such list is available, and the only lists promised for the future are the MPHC lists to be furnished not later than February 1, 1936, and those informally assured by AMP. It is obvious that considerable expense is involved in making such lists available to broadcasters. Nevertheless, in the opinion of the Managing Director and his Advisory Committee, it is only logical and just that the Licensor furnish such a list at its own expense, since otherwise, as already pointed out, any indemnity agreement is virtually worthless (whether or not a per-piece plan is adopted) and every Licensee is in the ridiculous position of not knowing what he has bought or how to protect himself against infringement.

A second very substantial difficulty is the fact that some broadcast stations are neither equipped nor staffed to put a per-piece plan (or even a measured service plan such as the ASCAP newspaper form of contract) into effect immediately. If it were offered tomorrow, such stations are unprepared to accept it. Consequently, it is clear that for some, and perhaps for all, stations, a transition period is necessary, and that for the smaller stations a per-piece plan may prove impracticable. These are not to be construed as arguments against its adoption; they are simply realities which cannot be ignored. The discussion which follows must be understood as being subject to a working out of these realities in a practical way.

There are several methods or standards for establishing a per-piece plan, among which a choice must be made:

(a) *The Licensor might set opposite each composition the price per performance.* Manifestly the price cannot be the same for a 50 kilowatt full-time clear channel station as it is for a 100-watt local daytime station. Such a system requires that stations be somehow classified, and that a ratio of each class to the figure specified be worked out. Such a ratio cannot scientifically be based on net or gross receipts, or on the character of the station's assignment with respect to frequency and power, or on the population within its service area. The practical difficulties and the possibilities of error and injustice are too great. The only acceptable basis for classification of stations would seem to be some unit taken from the station's card rates.

Even then, however, the total number of musical compositions furnishes an obstacle in itself. If they are all to be separately priced, then the burden of the necessary records and reports might prove to be disproportionately great for the average Licensee.

(b) *The Licensor might divide all compositions into classes, and set a price per performance for any composition of each class.* This method would still require a ratio such as already described, based on card rates.

Much would depend on the number of classes found necessary, and the ease with which the several classes might be distinguished one from the other (and this, in turn, would depend largely on how the lists furnished to the Licensee are classified, arranged and indexed). It is said that 20 classifications are recognized in Great Britain. It has also been said that as many as 40 might be necessary for the purpose of equitable operation of a per-piece plan, from the point of view of the copyright owners.

If a simple and practicable classification can be worked out, without an undue burden on the Licensee, the Managing Director and his Advisory Committee are disposed to regard this method as feasible.

(c) *The Licensor might agree to charge a uniform price for each composition, expressed not in dollars and cents but on a percentage of the station's card rate for a given time unit.* This method has the advantage of simplicity and of least burden to the Licensee. It has the disadvantage, however, of eliminating competition between musical compositions controlled by the same licensing organization.

A variation of this method would consist in providing that the price thus calculated serve as a maximum, leaving Licensor free from time to time to establish lower prices (similarly calculated) on particular compositions or classes of compositions. The more this is done, obviously, the greater become certain of the burdens already referred to, but possibilities along this line cannot be overlooked.

3. Negotiations with Licensing Organizations.

What has been stated under earlier sub-headings sufficiently covers the objectives to be achieved, if possible, in future negotiations with any licensing organization. It is necessary, however, to take note of particular problems raised in connection with certain of them, so that the objectives may be interpreted with regard to the practical situation.

ASCAP. As matters now stand, the overwhelming majority of broadcasters are dependent on the bare authority of an arrangement effective after December 31, 1935, subject to cancellation by ASCAP on two days' notice. This arrangement is based on a letter from Mr. Buck, President of ASCAP, to the Managing Director, dated December 30, 1935, and accepted by the Managing Director on that date. Network affiliates have the similar protection of an analogous assurance with respect to network programs. These arrangements are, of course, subject to a qualification not contained in the previous contracts; they cover the repertoire of ASCAP only as of January 1, 1936.

Under Mr. Buck's telegram of December 30, 1935, any ASCAP Licensee is privileged, of course, to obtain a five-year extension subject to this qualification as to repertoire. The Managing Director and his Advisory Committee trust, however, that the members of NAB that have not already accepted five-year renewals will content themselves with the temporary arrangement accorded by Mr. Buck's letter. This will leave them perfectly free to avail themselves of any advantages that may be secured as the result of further negotiations. It is believed that Mr. Buck and the other direct officials of ASCAP are, and will remain, fair, and will not take advantage of the two day cancellation clause to the detriment of any independently owned station.

It must be frankly recognized that the principal obstacle to satisfactory negotiations with ASCAP proceeds from its outstanding contracts with the two network companies and certain individual broadcasters. Early in June, 1935, as already stated, unconditional five-year renewals were obtained by about fifty-five stations including the network-owned or controlled units. Between June, 1935, and December, 1935, some 70 additional stations sought and obtained five-year renewals, with the condition (already mentioned) as to diminution of ASCAP's repertoire. During the closing days of 1935, some additional stations (the exact number of which is not known) availed themselves of five-year renewals conditioned on ASCAP's repertoire as of January 1, 1936.

It cannot be denied that the fact that such contracts are outstanding presents a serious problem in any future negotiations, particularly since some of the contracts (*e. g.*, those of the two networks) contain material advantages which will not lightly be surrendered. The Managing Director and the Advisory Committee believe, however, that the early elimination of these discriminatory advantages is an indispensable condition precedent to a stable solution of the copyright problem.

The Temporary MPHC Contracts. In the light of what has already been stated under earlier sub-headings, little need be said as to what should be sought in any future MPHC contracts. For the first time the temporary contracts now outstanding offer substantial hope of the accomplishment of certain of the broadcasters' prime objectives, such as the furnishing of complete lists, the clearing of copyright at the source, and the relation of compensation to card rates rather than to receipts.

There remains, of course, the working out of a satisfactory per-piece plan of compensation. Even here, however, broadcasters have for the first time the written assurance of what is believed to be a bona fide intention on the part of a licensing organization to cooperate in working out such a plan.

This is hardly the place in which to note minor defects in contracts. Mention should be made, however, of the necessity of changes in the MPHC contract in at least two important respects (in addition to working out a per-piece plan) as follows:

- (a) The guaranty of indemnity should not be limited in amount.
- (b) The burden of records and reports is still unduly and unnecessarily burdensome.

Miscellaneous Contracts. Space does not permit separate consideration of the various other contracts now in force between licensing organizations and broadcasters, such as the AMP, the SESAC, and the Ricordi contracts. All of these require immediate study, and demand that every effort be made to bring them into harmony with the principles already set forth.

B. THE COMPILING AND DISTRIBUTION OF INFORMATION TO BROADCASTERS AND THE TAKING OF ANY PROPER STEPS TO ASSIST THEM IN PROTECTING THEMSELVES AGAINST EXORBITANT OR UNREASONABLE DEMANDS.

Broadcasters are virtually as far as ever from achieving one result which would be of infinite value in protecting themselves against the power of monopoly in copyrighted music, *i. e.*, the marshalling and the making available of music in the public domain. The Radio Program Foundation, founded for this purpose as the result of the NAB Convention of 1932 at St. Louis, Missouri, failed because of lack of cooperation. For the immediate present, however, available music in the public domain cannot be relied upon as an effective weapon by itself with which to combat exorbitant or unreasonable demands, although encouraging possibilities are now in sight and are under consideration.

The fact is that, with the exception of comparatively few stations, broadcasters are not equipped to take advantage of their unquestionable legal rights in the controversies with which they are faced. The first and indispensable condition to becoming so equipped is the establishing of adequate records in their music libraries, preferably by card index, showing with reference to each active musical composition used by them, the name of the composition, the composer, the author, the publisher, the date of publication, and the performing rights of the licensing organization. It cannot be too strongly urged that during the immediate future all broadcasters become thus equipped, so as to be prepared to avoid infringements of the rights of any licensing organization from whom they have no real need of a license, or whose demands they may regard as unjustified.

The Managing Director and his Advisory Committee agree that one of their first duties is to do all in their power to provide members of the NAB with detailed directions for the establishment by them of records which will thus enable them to protect themselves.

C. THE COPYRIGHT BILL.

At its last annual meeting, the NAB endorsed the copyright bill now pending in Congress, known as the Duffy Copyright Bill. Its principal features have been summarized in the NAB BULLETIN and need not be discussed in detail here. Among other things, the bill, if enacted, would eliminate the unjust threat of a minimum penalty of \$250 for every infringement, whether guilty or innocent. It is not free from defects but is so great an improvement over the statute now in force (the Copyright Act of 1909) as to demand support.

The Managing Director and his Advisory Committee agree that every effort should be devoted to securing enactment of this legislation.

Closely related to the Duffy Copyright Bill is the impending international conference on the copyright treaty, known as the Berne Convention, and the proposed adherence of the United States thereto. The conference was to have been held at Rome in the recent past but, because of international complications, has been indefinitely postponed. Sooner or later this conference will be held and, since the Duffy Copyright Bill contemplates that the United States shall become a party to this Convention, it is important that these developments be closely observed and that, if necessary, the NAB take a part in them. Among other things, it is being vigorously urged that the new Convention recognize a copyright in the manufacturer of phonograph records as such so that, in addition to payment of royalties to the person controlling copyright in the composition, the broadcasters would be obligated to pay royalties to the manufacturers to a far greater extent than they would be under the Duffy Copyright Bill.

D. THE GOVERNMENT SUIT AGAINST ASCAP.

This suit, instituted by the Government against ASCAP on the charge that it is an illegal combination in restraint of trade, is still pending in the Federal Court. In the opinion of the Managing Director and his Advisory Committee this suit is as important now as it has been at any time in the past and its prosecution should be pursued with vigor.

It would be of questionable propriety in this statement to comment on the issues or the merits of the Government's case. The Managing Director and his Advisory Committee confine themselves to stating that they regard it as their duty to keep the Department of Justice fully informed of their every activity and of every development in the pending controversies.

CONCLUSION

Lengthy as is the foregoing statement the Managing Director and his Advisory Committee have felt that there is due to the membership of the NAB as complete an account as is possible from time to time of their activities, actual and proposed.

INCREASED POWER RECOMMENDED FOR WSPD

Station WSPD, Toledo, Ohio, applied to the Federal Communications Commission to increase its power from 1,000 watts night and 2,500 watts to local sunset to 1,000 watts night and 5,000 watts local sunset. The station operates unlimited time on 1340 kilocycles.

Examiner P. W. Seward, in Report No. I-179, recommends that the application be granted. The Examiner states that there is a need for additional daytime service in the area and "that the interests of existing radio stations will not be adversely affected by reason of interference by the granting of this application."

PENSACOLA COMPLAINT AGAINST A. T. & T.

The Telephone Division of the Federal Communications Commission has directed that the American Telephone and Telegraph Company be served with the complaint of the Pensacola Broadcasting Company, filed by its attorney, former Senator Dill, on December 18, 1935, with reference to overcharges over circuits from Mobile via Flomaton to Pensacola, and that the American Telephone and Telegraph Company be given 30 days from receipt of notice within which to satisfy the complaint. If the complaint is not satisfied, the case will be set for hearing before the Telephone Division at the earliest practicable date, the date to be fixed by the Docket Clerk and the Law Department.

WHERE IS J. J. MOORE?

A member is very anxious to get in touch with J. J. Moore. Anyone knowing his correct address will please communicate with the Managing Director.

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

Joliet Heating Corporation, Joliet, Ill. (2-1856, Form A-1)
16 Court Street, Inc., New York City (2-1857, Form E-1)
Delacroix Corporation, New Orleans, La. (2-1859, Form A-1)
Wilbert L. Smith et al., New York City (2-1860, Form F-1)

CONNERY ASKS RADIO INVESTIGATION

Representative Connery of Massachusetts on Wednesday introduced a resolution in the House "to appoint a select committee to investigate the charges of irregularities in the granting and renewals of radio licenses; the broadcasting of alleged obscene and indecent utterances by radio stations; the charges of alleged monopolies and to investigate and report on charges made or which may be made as to charges of alleged misconduct and alleged corruption on the part of certain persons officially connected with said Commission and investigate the acts and activities of said Commission." The resolution is as follows:

Whereas, on April 5, 1935, sixteen Members of the House of Representatives, whose attention having been directed to a broadcast over the N. B. C. network which broadcast contained alleged obscene and indecent utterances, and which program was in the interest of and paid for by a foreign government, filed with the Federal Communications Commission a protest against such programs and, in addition, petitioned said Federal Communications Commission for an immediate investigation of the charges contained in said protest and, further, requested a public hearing on the results of such investigation, and

Whereas, the Federal Communications Commission, in reply to said petition, stated that an investigation was being made, and

Whereas, the Federal Communications Commission later replied to the petitioners setting forth that said program was not obscene within the rule laid down in a court decision cited by said Commission, which citation quoted language which is not to be found in the specific decision cited, and,

Whereas, the Congressional Record of July 31, 1935, contains a full and factual history of this failure on the part of the Federal Communications Commission to properly enforce the Communications Act of 1934, and, in addition, contains excerpts from affidavits which alleged that competent officials of the said N. B. C. admitted that the program complained of contained obscene and indecent utterances, and

Whereas, the Chairman of the said Federal Communications Commission, in testifying before the House Appropriations Committee, admitted that the property of the Government, namely, radio broadcasting licenses or franchises, were the subject of profiteering on the part of individuals and others, and

Whereas, charges have been made that certain vested interests are alleged to be receiving large sums of money due to the leasing to others of licenses or franchises issued by said Federal Communications Commission, and

Whereas, it is well known that a monopoly exists wherein a few control all of the valuable franchises or licenses issued by said Commission, while educational, labor, religious and other non-profit making organizations are denied opportunities of securing favorable consideration for radio broadcasting facilities from said Federal Communications Commission, and

Whereas, the said Commission, as a result of charges apparently placed before it by the chairman of said Commission, has now created a committee of five of its seven members to investigate charges of alleged misconduct and alleged corruption on the part of certain persons officially connected with the said Commission, and

Whereas, it is in the public interest that a thorough and exhaustive investigation be made of these and other alleged irregularities,

Therefore, be it

Resolved, that a committee of five members of the House of Representatives shall be appointed by the Speaker, which committee is hereby authorized and directed to inquire into and investigate the allegations and charges that have been or may be made relative to irregularities in the granting and renewal of licenses and other matters coming within the jurisdiction of the Federal Communications Commission or pertaining in whole or in part to the functions of the said Federal Communications Commission; be it further

Resolved, that the said committee shall make a thorough and exhaustive investigation of all allegations and charges that have been or may be made in connection with any and all matters pertaining to the Federal Communications Commission and shall report in whole or in part at any time to the House of Representatives together with such recommendations as it deems advisable; and be it further

Resolved, that for the purpose of this resolution the said committee is authorized to hold such hearings, to sit and act during the sessions and the recesses of the present Congress at

such time and places, either in the District of Columbia or elsewhere, and to employ such expert, clerical and stenographic services as may be found necessary and to require by subpoena or otherwise the attendance of witnesses; to administer oaths; to compel the production of books, papers and documents by government or private agencies and to take and record such testimony as the committee may deem advisable or necessary to the proper conduct of the investigation directed by this resolution.

LICENSE RENEWAL RECOMMENDED FOR WFEA

Broadcasting Station WFEA, Manchester, N. H., applied to the Federal Communications Commission for a license renewal. The station operates on a frequency of 1340 kilocycles, 500 watts and 1,000 watts LS unlimited time.

Examiner P. W. Seward, in Report No. I-180, recommends that "this application be granted on condition that the applicant will complete and place in operation the new antenna and ground system now being constructed and that they make field intensity measurements not less than five consecutive nights under ordinary conditions in the Toledo area, to determine the strength of the signal of the applicant at that point, and report such findings to the Commission. If the tests in the Toledo area show the applicant to be laying down a signal less than 50 microvolts per meter, then it is recommended that this application be granted unconditionally."

BROOKLYN PETITION DENIED BY FCC

At a session of the full membership of the Federal Communications Commission the petition and supplemental petition was denied of the Paramount Broadcasting Corporation, Station WVFW, Brooklyn, N. Y., for a rehearing in the matter of its applications for modification of license and license renewal. A dissenting opinion was filed by Commissioner Stewart.

The Commission in its decision in this case will take off the air as of January 22 Stations WARD, WLTH and WVFW, all of Brooklyn. Station WBBC will get half time and the Brooklyn (N. Y.) Daily Eagle will get the other half time to be used following the erection of a new station.

Commissioner Stewart in his dissent in this case said:

I regret that I am not able to support in its entirety the decision of the Broadcast Division in these cases. I believe, however, that the record is incomplete in some respects and that the matter should be reopened for the further consideration of certain points mentioned hereafter. It is possible that further information on those points would lead me to the same conclusions reached by the Division, but I shall be more nearly convinced of the soundness of those conclusions when the points mentioned have been more thoroughly covered.

1. As respects the denial of the applications of WARD, WLTH, and WVFW, I believe the decision is sound. That they were not operating in the public interest, convenience and necessity seems beyond reasonable doubt. The denial of the application of WEVD and the granting of the applications of WHAZ, WFAW and WBBR were likewise sound.

2. The denial of the application of Arde Bulova and Norman K. Winston is sound on the record, on the assumption that the Division considered the fact that Mr. Bulova already owned one-half interest in a station serving Brooklyn. That fact is mentioned in the decision although not specifically stated as a ground for the decision.

3. Station WBBC appears from the record to have been slightly better than the three stations deleted. Judging from its past operations, it might have suffered the fate prescribed for them without any material loss to the public. Because of its slightly better performance, however, the Division may be correct in sparing the stations at this time—although I am at a loss to understand what there is in the history of the station to have led to the doubling of its time on the air. With the increased time and consequently with a possibly increased efficiency, the station may be able to justify itself.

4. I am unable to agree that the record shows any need for a new station on this frequency in Brooklyn. Certainly Brooklyn is not without broadcast service. Commission records show that some or all of the borough is at all times within the good service area of at least eleven stations, exclusive of those involved in the present cases. This figure is higher than for the remainder of the first zone and far higher than for most of the country. There is no justification for placing a new station in Brooklyn unless it is to serve a need peculiar to that borough which is not served by some other station within whose service area it lies.

5. The decision of the Division grants half time to the Brooklyn Daily Eagle Broadcasting Company, Inc., which heretofore has not been engaged in broadcasting. Mr. Prestin Goodfellow, President of the Brooklyn Daily Eagle, which is to be the principal stockholder in the Brooklyn Daily Eagle Broadcasting Company, Inc., testified:

"My idea of a broadcasting station would be to cater to the type of reader that the New York Times and the Brooklyn Daily Eagle and the Sun and papers of that calibre have." (Transcript, Dec. 6, 1934, p. 587.)

Mr. Goodfellow further testified that the Daily Eagle "is known as a class newspaper in that it does not attempt to reach the masses. It is a paper that is outstanding in its advertising volume." (Ibid. p. 515.) His testimony does not give us any reason to believe that he contemplates any important service not already rendered by one or more of the stations serving Brooklyn. It may be noted in passing that the Daily Eagle did not carry for the information of its readers the programs of the four Brooklyn stations whose facilities it is seeking, although it did carry the programs of other stations serving the Brooklyn area.

In the absence of a showing that the proposed station will be used to meet needs peculiar to Brooklyn, I am unwilling to approve another station in the overquota New York metropolitan area when there is a serious need for the facilities in other parts of the country less well served with broadcast facilities.

6. It is not clear from the opinion that consideration was given to the matter of the public interest involved in the granting of a broadcast station license to an applicant controlled by a newspaper. Broadcast stations and newspapers are the two principal sources of current public information and enlightenment; in a more mundane field they are the two principal media of local advertising and two of the principal media of national advertising in any community. Combining the two under the same control inevitably presents a problem of major moment which should be squarely faced by the Commission in its determination of "public interest, convenience and necessity." I do not believe that it was sufficiently considered by the Broadcast Division in the present instance.

7. The decision gives half time each to two stations in the same community. On its face such an arrangement is most uneconomical. To have two transmitters, two sets of studios, two staffs and a duplication of everything which goes into a broadcast station of the first class involves a duplication of expense which must inevitably be reflected in programs and service sooner or later. Such a duplication, incident to half-time operation, should be required only where positive advantages of a substantial nature will flow from the arrangement. Where both stations are designed to serve the same community, the duplication seems unwarranted in the absence of a record showing weighty reasons in support of such an anomalous arrangement. The opinion shows no such reasons. In connection with its decision on WBBC, the Broadcast Division traces the difficulty of that station to its quarter-time operation. The uneconomic nature of quarter-time operation is thus recognized. The uneconomic nature of half-time operation should at least merit consideration, especially in a decision which by authorizing a new station creates, rather than merely continues, part-time operation.

8. In my opinion the matter should be reopened for further testimony on the points covered in paragraphs numbered 3, 4, 5, 6 and 7.

FEDERAL TRADE COMMISSION ACTION Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be used against them.

No. 2677. A complaint has been issued charging the **Fall River Wholesale Grocers' Association** and its members, of **Fall River, Mass.**, with concerted action and conspiracy tending unduly to suppress competition in the food and grocery trade in the Fall River area, which also includes part of Rhode Island.

According to the complaint, the respondents' plan prevented sales by manufacturers direct to retailers in the Fall River area and out of pool car shipments to wholesalers who were not association members. This is alleged to have been accomplished by methods such as personal intimidation, threats of boycott, and actual boycott.

No. 2678. Alleging unfair competition in the use of the word "distillery" in its corporate name, a complaint has been issued

against "Old Colonel Distillery, Inc.," also "Old Colonel Distributing Co.," and Joseph Schiff, of Louisville, Ky., owner and operator of the two companies. According to the complaint, the respondents are rectifiers and wholesalers of liquors, and are not distillers.

No. 2679. A complaint has been issued against **Bleeker-Foster, Inc.**, 253 East 4th St., St. Paul, Minn., engaged in the manufacture and sale of food-flavoring products, charging the use of false and misleading advertising, in violation of Section 5 of the Federal Trade Commission Act.

Through the medium of such advertising, the complaint alleges, the respondent has been able to divert a substantial amount of business from its competitors, who do not resort to unfair trade practices. As typical of the methods in which the respondent allegedly lures salesmen and agents, the complaint cites the following advertisement:

"I want 500 more men—to earn up to \$25.00 a day! Be a branch manager for George F. Foster.

"C. Angel, of Milwaukee, secured 25,000 G. F. Foster customers in six months.

"Mr. Angel had been hard hit by the depression; savings gone, debts piling up, reduced to a humble, poorly-paid job, he was down but not out. In six months the G. F. Foster fast-selling products and plan put Angel out of debt and established him in a business so big, so profitable, that it was almost unbelievable.

"Thousands of other G. F. Foster agents, distributors and branch managers can tell similar stories of amazing earnings and success."

Salesmen of the respondent company can not make the earnings advertised, the complaint alleges, and competitors are injured and deprived of the benefits of free competition in interstate commerce because their own agents and salesmen are attracted from them by such advertisements.

No. 2680. Unfair methods of competition in commerce, in violation of Section 5 of the Federal Trade Commission Act, are alleged in a complaint issued against the **Consolidated Trading Corporation**, New York City, engaged in the sale and distribution of a variety of merchandise.

According to the complaint, the respondent solicits business and sells its products in foreign countries, using the trade name "Modex Mills" on its letterheads, bill heads and in advertising matter, implying that it is a manufacturer, whereas it neither owns nor operates the mills in which its merchandise is manufactured. Use of the word "Mills" gives the respondent unfair advantage over those competing exporters who do not falsely represent themselves as manufacturers, as well as over those who actually do manufacture and sell their own products, the complaint sets forth.

No. 2681. Charging unfair representations in the sale of a beverage, a complaint has been issued against **John J. Kane**, of 2777 Frankford Avenue, Philadelphia, trading as **La Pep Health Beverage Co.**

Advertising in periodicals and over the radio, the respondent is alleged to have represented his product, a mixture of fruit juices, herbs and lactic acid, as a competent remedy for skin eruptions, sluggish blood, constipation and heart troubles, and that it would guide a person to health and act as a body disinfectant. These assertions are not true, according to the complaint, and their use constitutes unfair competition with beverage manufacturers who truthfully represent the ingredients and healing value of their products.

No. 2682. Alleging unfair competition in the sale of clocks in interstate commerce, a complaint has been issued against the **Sessions Clock Co.**, of Forestville, Conn., charging that its clock cases made of woods other than mahogany are represented as being mahogany cases.

This practice is alleged to have caused diversion of trade to the respondent from competitors who truthfully advertise their clocks.

No. 2683. A complaint has been issued against **Dr. S. B. Heininger**, of 440 Huron St., Chicago, charging unfair competition in the sale of dental plates by mail order, in violation of the Federal Trade Commission Act.

Heininger's advertising is alleged to have had a tendency to mislead purchasers into believing they could make correct impressions of their own teeth and gums, and from such impressions the respondent could make satisfactory artificial teeth.

Stipulations

The Commission has announced the following cease and desist orders:

No. 01001. Evans Publishing Corporation, 400 Madison Avenue, New York City, published in its magazine, *The Family Circle*, advertisements for "Malt-O-Meal," sold by the Campbell Cereal Co., of Northfield, Minn. The publisher agreed to abide by the terms of a stipulation signed by the Campbell Cereal Co., to discontinue the use of false and misleading advertising.

No. 01004. B. T. Babbitt, Inc., of 886 Fourth Ave., New York, dealer in a cleanser for pots, basins and bathtubs, called "Bab-O," agrees to stop asserting that "Bab-O" banishes dull film, water-lines or the most stubborn dirt "instantly"; that its use ends all scouring and scrubbing; that it will not harm nail polish, and will soften hands; and that "Bab-O" was discovered by scientists, or that it is a new discovery.

Nos. 01005-01006-01007. Three publishing companies printing the advertisements for "Holford's Famous Inhaler" have entered into stipulations agreeing to abide by provisions of the stipulation entered into by William J. Fink, the advertiser. These companies are: **S. Rosenthal & Co., Inc.**, of Cincinnati, publisher of *Independent Salesman Magazine*; **How to Sell, Inc.**, of Mt. Morris, Ill., publisher of *How to Sell Magazine*; and **Opportunity Publishing Co.**, Chicago, publisher of *Opportunity Magazine*.

No. 01008. William J. Fink, operating as **The Holford Company**, agrees to cease representing that "Holford's Famous Inhaler" is a proven winner or a competent remedy in treating colds, catarrh, headaches and other ailments; that at one deep breath a wave of soothing, healing warmth penetrates every part of the head and lungs; that this treatment retains its strength from six months to two years, or that it is a health protection, and other similar representations. The respondent also agrees not to make unmodified representations of salesmen's earnings.

Nos. 01009-01010-01011-01012. Operating as the **Flying Intelligence Bureau**, **E. M. Welch**, 401 Judson Jay Rives Building, Los Angeles, Calif., has entered into a stipulation to discontinue false and misleading advertising of his booklet, which purported to give complete information on entrance requirements and a course of training for the United States Air Service.

According to the stipulation, the booklet, sold by the respondent at \$1 a copy, contained inaccurate and inadequate information concerning the air service training.

The respondent agrees to stop use of the terms "Bureau," "Intelligence Bureau," and "United States Air Corps," implying that his business had some connection with the United States Government.

The respondent inserted advertisements in *Topnotch Magazine*, *Complete Stories*, and *Best Detective Magazine*, all published by the **Street and Smith Publishing Corporation**, 79 7th Avenue, New York City. That publishing company, in separate stipulations, agrees to abide by the terms of the stipulation signed by Welch.

No. 01013. Western Broadcast Co., Hollywood, Calif., operator of radio station KNX, admitted broadcasting advertisements for *Sterling Royal Remedies*, sold by **John D. Myers**, trading as **John Sterling Remedy Co.**, Kansas City, Mo. The broadcasting company agreed to abide by the terms of a stipulation previously signed by the **John Sterling Remedy Co.**, to discontinue misleading advertising.

No. 01014. Specialty Salesman Magazine, Inc., 307 North Michigan Ave., Chicago, published advertisements for the **Holford Co.**, 14 North 6th Street, Minneapolis, Minn., dealer in a treatment for colds and catarrh, which had previously entered into a stipulation to discontinue misleading advertising. The publisher agrees to abide by the terms of this stipulation.

No. 01015. Journal Printing Co., Minneapolis, Minn., publisher of the *Minneapolis Sunday Journal*, also carried advertisements for "Malt-O-Meal"; and entered into a similar stipulation.

Nos. 1580-1581. In two related cases, involving the branding of shoes with the label "Doctor," three companies have entered into stipulations to stop unfair trade practice in the manufacture and sale of their products.

The Bridgewater Workers Co-Operative Association, Inc., Bridgewater, Mass., and the **International Shoe Company**, 1509 Washington Ave., St. Louis, Mo., manufactured and sold in interstate commerce shoes, branded with the words, "Dr. Moses Arch Form Shoes," to the **Family Shoe Corporation**, New York City, which retailed and wholesaled the products.

The three respondents agreed to desist from cooperating directly or through subsidiaries in the production and sale of shoes stamped with the word "Doctor" or the abbreviation "Dr."

when the shoe is not manufactured in accordance with the design or under the supervision of a doctor and does not contain orthopedic features which are the result of medical advice or services.

No. 1582. Bay Ridge Specialty Co., Inc., Trenton, N. J., and T. J. Holmes Co., Inc., of Chartley, Mass., have entered into stipulations to cease and desist from unfair trade practices in interstate commerce.

Engaged in the manufacture of vitreous, high fired china bathroom fixtures, the Trenton company agrees to stop the use of advertising having the effect of disparaging the products of competitors manufacturing decorated china fixtures. Specifically, the Bay Ridge company agrees to cease representing that extremes of temperature in firing cause the glaze on decorative fixtures to craze or crack when climatic conditions change. According to the stipulation, these representations had a tendency to deceive buyers into believing that such fixtures were unstable and would not hold up under climatic changes, when this was not true.

No. 1583. T. J. Holmes Co., Inc., manufacturer of atomizers, agrees to discontinue advertising that its product "is the only atomizer on the market which will successfully handle silver preparations," when this is not true. The company will cease other representations implying that its atomizer is the only one on the market capable of use successfully or with safety in the spraying of silver preparations.

Nos. 1584-1585-1586. Two companies manufacturing burial caskets and a third firm selling wood for manufacture of such products, have entered into stipulations to discontinue misrepresenting the wood content of their products. The respondents are: **R. J. Evans and Al Thornton, of Kansas City, Mo.,** trading as **Rex Art Casket Co.; Owen and W. J. McCarty, George Chinnery and W. A. Hufnagle, of Kansas City, Mo.,** trading as **Midland Valley Casket Co., and Hammond Lumber Co., Inc., of Samoa, Calif., and Chicago.**

Each company agree to cease and desist from representing in guarantees furnished to purchasers that redwood is unsurpassed by any other wood from the standpoint of durability or resistance to decay, and that it is immune to the destructive work of white ants, when in fact, according to the agreement, redwood is equalled by the bald cypress, the cedar and the poplar, and is surpassed by the eastern red cedar, locust, mulberry, and Osage orange, and is not immune to the ravages of the white ant.

No. 2261. Unfair competition through misleading use of a well-known trade name is prohibited in an order to cease and desist issued against **Real Products Corporation, of 10-25 46th Avenue., Long Island City, N. Y., and Realflex Products Corporation, Brooklyn,** manufacturers and dealers in automotive and metal specialties, including spark plug cable sets.

The order directs the respondents to discontinue representing that their products, including spark plug cable sets, are made by the Champion Spark Plug Co., of Toledo, O., and to stop using the word "Champion," either alone or in connection with any other word, to advertise their products, thus implying that they are made by the Champion company.

No. 2647. An order has been issued against the **Shapiro Felt Rug Co., of Newark, N. J.,** directing it to cease and desist from selling baseball caps made from second-hand and discarded felt hats, unless and until they are marked to indicate that they were not made from new and unused felts.

Other respondents are William, Morris and Sarah Shapiro, individuals, trading as Esta Hat Co. They did not contest the Commission proceeding, and consented to issuance of the order to cease and desist.

KPPC—Pasadena Presbyterian Church, Pasadena, Calif.—Modification of license, 1210 kc., 100 watts, share KFXM. Present assignment: 1210 kc., 50 watts, share with KFXM.

HEARING BEFORE AN EXAMINER (Broadcast)

NEW—Mason City Broadcast Co., Emmons L. Abeles, Secy., Mason City, Iowa.—C. P., 1420 kc., 100 watts, unlimited time.

NEW—Northern Iowa Broadcasting Co., Inc., Mason City, Iowa.—C. P., 1420 kc., 100 watts, unlimited time.

NEW—Mason City Globe Gazette Co., Mason City, Iowa.—C. P., 1210 kc., 100 watts, unlimited time.

APPLICATIONS GRANTED

WWJ—The Evening News Assn., Inc., Detroit, Mich.—Granted modification of C. P. approving transmitter site at intersection of Meyers and 8th mile road, Oak Park, Mich.

WHBB—Dr. Wm. J. Reynolds and Wm. J. Reynolds, Jr., Selma, Ala.—Granted modification of C. P. to change type of equipment and approving antenna system.

WMBD—Peoria Broadcasting Co., Peoria, Ill.—Granted modification of C. P. approving antenna and transmitter site; make changes in equipment; extend commencement date to 30 days after grant and completion date to 180 days thereafter.

WJR—WJR, The Goodwill Station, Detroit, Mich.—Granted license to use old 10-KW transmitter as auxiliary at same location as main transmitter.

KPOF—Pillar of Fire (a corp.), Bellevue College, near Denver, Colo.—Granted license to cover C. P. authorizing installation of new transmitter and changes in equipment; 880 kc., 500 watts, shares KFKA.

WHBB—Dr. Wm. J. Reynolds and Wm. J. Reynolds, Jr., Selma, Ala.—Granted license to cover C. P., 1500 kc., 100 watts, daytime.

WCAE—WCAE, Inc., Pittsburgh, Pa.—Granted license to cover C. P. authorizing new equipment and increase in power to 1 KW night, 5 KW day; 1220 kc., unlimited time.

WCAE—WCAE, Inc., Pittsburgh, Pa.—Granted license for auxiliary transmitter equipment; 1220 kc., 1 KW night and day, unlimited. Also granted authority to determine operating power by direct measurement of antenna input in compliance with Rule 137.

WMPC—The First Methodist Protestant Church of Lapeer, Mich.—Granted license to cover C. P. authorizing equipment changes; 1200 kc., 100 watts night, 250 watts day, S.H.

WJAX—City of Jacksonville, Fla.—Granted license to cover C. P. authorizing changes in equipment; increase in day power to 5 KW, with transmitter site to be determined.

KABC—Alamo Broadcasting Co., Inc., San Antonio, Tex.—Granted license to cover C. P. authorizing changes in equipment and increase in day power; 1420 kc., 100 watts night, 250 watts day, unlimited.

KIUP—C. Guy Shepard, Durango, Colo.—Granted license to cover C. P. authorizing erection of new station, 1370 kc., 100 watts, unlimited time.

WMT—Waterloo Broadcasting Co., Cedar Rapids, Iowa.—Granted consent to voluntary assignment of license to Iowa Broadcasting Co.

KSO—Cedar Rapids Broadcast Co., Des Moines, Iowa.—Granted consent to voluntary assignment of license to Iowa Broadcasting Co.

WMT—Waterloo Broadcasting Co., Cedar Rapids, Iowa.—Granted modification of special experimental authorization to make changes in equipment and to operate with 1 KW night with directional antenna, 2½ KW day with non-directional.

WOW—Woodmen of the World Life Ins. Asso., Omaha, Nebr.—Granted authority to determine operating power by direct measurement of antenna input.

KQV—KQV Broadcasting Co., Pittsburgh, Pa.—Granted authority to determine operating power by direct measurement of antenna input.

WSAI—The Crosley Radio Corp., Cincinnati, Ohio.—Granted C. P. to make changes in equipment and move transmitter from Mason to Cincinnati, Ohio.

National Broadcasting Co., Inc., New York City.—Granted authority to transmit selected recorded programs to four Canadian broadcast stations—CJOR, CFAC, CJOC, CJCA.

NEW—The Evening News Asso., Portable-Mobile.—Granted C. P. (gen. exp. misc.), frequencies 31600, 35600, 38600, 41000 kc., 100 watts.

NEW—WCBS, Inc., Portable-Mobile, Springfield, Ill.—Granted C. P. (gen. exp. broadcast pickup station), frequencies 31100, 34600, 37600, and 40600 kc., 2 watts.

NEW—The Attala Broadcasting Corp., Kosciusko, Miss.—Granted C. P., frequencies 31600, 35600, 38600 and 41000 kc., 100 watts.

NEW—Memphis Commercial Appeal, Inc., Memphis, Tenn.—Granted C. P. (gen. exp. misc.), frequencies 31600, 35600, 38600 and 41000 kc., 50 watts.

WMBC—Michigan Broadcasting Co., Detroit, Mich.—Granted C. P. to make changes in equipment.

WNYC—City of New York, Dept. of Plant and Structures, New York City.—Granted C. P. to erect auxiliary transmitter at 29 Ft. Green Place, Brooklyn, to be used principally while moving main transmitter from New York City to foot of Greenpoint Ave. and East River, Brooklyn.

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Granted modification of C. P. to extend commencement date to 1-1-36 and completion date to 7-21-36.

WCCM—WCCM, Inc., Mississippi City, Miss.—Granted modification of C. P. to extend commencement date to 1-28-36 and completion date to 7-28-36.

KLZ—The Reynolds Radio Co., Inc., Denver, Colo.—Granted modification of C. P. approving transmitter site near Denver, approving antenna, extending commencement date to 60 days after grant and completion date to 180 days thereafter.

KRNR—Southern Oregon Pub. Co., Roseburg, Ore.—Granted license to cover C. P. authorizing erection of new station, 1500 kc., 100 watts, daytime.

WFIL—WFIL Broadcasting Co., Philadelphia, Pa.—Granted license to use auxiliary transmitter which was licensed to WLIT, at same location as main transmitter of WFIL.

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted license to cover C. P. authorizing installation of new equipment.

WIND—Johnson-Kennedy Radio Corp., Gary, Ind.—Granted license to cover C. P. authorizing changes in equipment and increase in day power to 5 KW; 560 kc., 1 KW night, unlimited.

WABI—Community Broadcasting Service, Bangor, Maine.—Granted consent to transfer of control of the Community Broadcasting Service, Inc., licensee of WABI, from the First Universalist Society of Bangor, to an individual, Frederick B. Simpson. Present assignment: 1200 kc., 100 watts, S.H.

KSD—The Pulitzer Publishing Co., St. Louis, Mo.—Granted license to cover C. P. authorizing increase in night power to 1 KW, day power to 5 KW, and special authority to operate 1 KW night with directional antenna; 550 kc., S-KFUO.

KFNF—KFNF, Inc., Shenandoah, Iowa.—Granted authority to transfer control of KFNF, Inc. (licensee of station KFNF), from Henry Field Co. to Henry Field (890 kc., 500 watts night, 1 KW day, S-WILL and KUSD).

WCAE—WCAE, Inc., Pittsburgh, Pa.—Granted transfer of control of WCAE, Inc. (licensee of station WCAE), to Pitt Publishing Co., a Pennsylvania corporation (1220 kc., 1 KW, unlimited).

KFPL—C. C. Baxter, Dublin, Tex.—Granted extension of C. P., heretofore issued to C. C. Baxter, upon a temporary basis only, specifically subject to whatever action may be taken by the Commission upon the application for renewal of license and for modification of permit, as well as the application for modification of permit, which were designated for hearing, in any event not to extend beyond June 16, 1936.

NEW—WDOD Broadcasting Corp., Chattanooga, Tenn.—Granted C. P. (exp. gen. exp.), frequencies 31600, 35600, 38600, 41000 kc., 100 watts.

NEW—Head of the Lakes Broadcasting Co., Superior, Wis.—Granted C. P. (exp. gen. exp.), frequencies 31600, 35600, 38600, 41000 kc., 80 watts.

WIEF—Miami Broadcasting Co., Portable-Mobile (Miami, Fla.).—Granted C. P. (temporary broadcast pickup) to make changes in equipment, increase power from 15 to 50 watts.

W8XH—WBEN, Inc., Buffalo, N. Y.—Granted license to cover C. P. (exp. gen. exp.), frequencies 31600, 35600, 38600, 41000 kc., 100 watts.

W10XAP—National Broadcasting Co., Inc., Portable-Mobile (New York City).—Granted C. P. and license (exp. gen. exp.) to increase power from 7.5 watts to 25 watts and for additional power amplifier.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KDKA, and alternate, Pittsburgh, Pa.; KEX, Portland, Ore.; KFEQ, St. Joseph, Mo.; KFI, Los Angeles, and auxiliary; KFVD, Los Angeles; KGDM, Stockton, Calif.; KGO and auxiliary, San Francisco; KIEV, Glendale, Calif.; KJBS, San Francisco; KJR, Seattle, Wash.; KOA, Denver; KPO and auxiliary, San Francisco, Calif.; KRDL, Dallas, Tex.; KSL, Salt Lake City; KSOO, Sioux Falls, S. Dak.; KVOO, Tulsa, Okla.; KYW, Philadelphia; WABC-WBOQ, New York City; WAPI, Birmingham, Ala.; WATR, Waterbury, Conn.; WBAL, Baltimore, Md.; WBT, Charlotte, N. C.; WBZ, Boston; WBZA, Boston; WDBG, Minneapolis, Minn.; WEA and auxiliary, New York City; WENR and auxiliary, Chicago; WEW, St. Louis, Mo.; WGN, Chicago; WGY, Schenectady, N. Y., and auxiliary; WHAM and auxiliary, Rochester, N. Y.; WHEB, Portsmouth, N. H.; WJJD, Chicago, Ill.; WJZ and auxiliary, New York City; WKAR, E. Lansing, Mich.; WLW, Cincinnati, Ohio; WMAQ, Chicago, Ill.; WMAZ, Macon, Ga.; WMBI, Chicago, Ill.; WOR and auxiliary, Newark, N. J.; WOWO, Fort Wayne, Ind.; WPTF, Raleigh, N. C.; WRUF, Gainesville, Fla.; WRVA, Richmond, Va.; WSB and auxiliary, Atlanta, Ga.; WSM and auxiliary, Nashville, Tenn.; WTAM, Cleveland, Ohio; WTBO, Cumberland, Md.; WTIC, Hartford, Conn.; WPTF auxiliary, Raleigh, N. C.

SET FOR HEARING

NEW—Wolverine Broadcasting Co. (John E. Fetzer), Ann Arbor, Mich.—Application for C. P. for new station, 800 kc., 1 KW, day, daytime operation only. Site to be determined.

NEW—Star-Chronicle Publishing Co., St. Louis, Mo.—Application for C. P. for new station, 1250 kc., 1 KW, unlimited.

NEW—The Times Dispatch Pub. Co., Inc., Richmond, Va.—Application for C. P. for new station, 1500 kc., 100 watts, unlimited. Exact transmitter site and type of antenna to be determined with Commission's approval.

NEW—W. T. Knight, Jr., Savannah, Ga.—Application for C. P. for new station, 1310 kc., 100 watts, unlimited.

NEW—Douglas G. Doozer and Jack Richards, Brunswick Radio Broadcast Station, Brunswick, Ga.—Application for C. P. for new station, 1420 kc., 100 watts, daytime.

NEW—Gomer Thomas, Bellingham, Wash.—Application for C. P. for new station, 1420 kc., 100 watts, unlimited. Transmitter site to be determined with the Commission's approval.

NEW—B. A. Thompson, Santa Cruz, Calif.—Application for C. P. for new station, 1310 kc., 100 watts night, 250 watts day, unlimited.

NEW—Springfield Newspapers, Inc., Springfield, Mo.—C. P. amended so as to request 790 kc., 1 KW, daytime operation only. Exact transmitter site to be determined with Commission's approval.

NEW—Hunt Broadcasting Assn., Fred Horton, Pres., Greenville, Tex.—C. P. amended so as to request 1200 kc., 100 watts, daytime only.

WIOD-WMBF—Isle of Dreams Broadcasting Corp., Miami Beach, Fla.—Application for C. P. to make changes in equipment and move transmitter from approximately 3 miles from Collins Island, Miami Beach, to 600 Biscayne Blvd, Miami, Fla.

WCOL—WCOL, Inc., Columbus, Ohio.—Application for C. P. to make changes in equipment and increase day power from 100 watts to 250 watts (contingent upon the granting of application to WALR for move to Toledo, Ohio).

WLBL—State of Wisconsin, Department of Agriculture and Markets, near Ellis, Wis.—Application for C. P. to make changes in equipment and increase power from 2½ to 5 KW day.

WSBT—The South Bend Tribune, South Bend, Ind.—Application for C. P. to make changes in equipment, install directional antenna; change frequency from 1360 kc. to 1010 kc.; increase power from 500 watts to 1 KW; and move transmitter to site to be determined at South Bend; change hours of operation from S-WGES to unlimited.

WELI—Patrick J. Goode, New Haven, Conn.—Application for modification of license to change frequency from 900 kc. to 930 kc., hours of operation from 500 watts daytime only to 250 watts night, 500 watts day; hours of operation from daytime to unlimited.

WEHS—WEHS, Inc., Cicero, Ill.—Application for modification of license to increase day power to 250 watts and change antenna contingent upon granting C. P. of station WHFC.

WKBI—WKBI, Inc., Cicero, Ill.—Application for modification of license to increase day power from 100 watts to 250 watts and change antenna contingent upon granting C. P. of station WHFC.

WHFC—WHFC, Inc., Cicero, Ill.—C. P. amended so as to request authority to install new equipment and a vertical radiator, and increase day power from 100 to 250 watts.

NEW—Continental Radio Co., Columbus, Ohio.—C. P., already in hearing docket, amended to make changes in equipment; 1310 kc., 100 watts, unlimited time. Site to be determined.

NEW—John E. Fetzer, Saginaw, Mich.—C. P., already in hearing docket, amended to read: 630 kc., 1 KW, daytime. Site to be determined.

KFPM—Voice of Greenville, Greenville, Tex.—Application for C. P. to make changes in equipment; increase power from 15 to 100 watts, and hours of operation from specified to daytime only.

NEW—Ralph E. Smith, San Diego, Calif.—C. P., already in hearing docket, amended to read: 1200 kc., 100 watts, daytime.

KFOX—Nicholas & Warinner, Inc., Long Beach, Calif.—Application for voluntary assignment of license from Nichols & Warinner, Inc., to Hal Nichols, Inc.

KFDY—South Dakota State College, Brookings, S. Dak.—Application for modification of license to make changes in specified hours of operation.

NEW—Burlington Broadcasting Co., Burlington, Iowa.—C. P., already in hearing docket, amended to read: 1310 kc., 100 watts, unlimited time.

NEW—The Herald Publishing Co., Denison, Tex.—C. P., already in hearing docket, amended to read: 1200 kc., 100 watts, unlimited time. Site to be determined.

The Ogdensburg Advance Co., Inc., Ogdensburg, N. Y.—Application for authority to maintain a studio in Ogdensburg, N. Y., for production of programs to be transmitted by land wires of the N. Y. Tel. Co. and of the Bell Tel. Co. of Canada, to Station CFLC, at Prescott, Ontario, Canada.

APPLICATIONS DENIED

WSVA—Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—Denied request for special temporary authority to operate from LS to 9 p. m., EST, December 24, 1935, with power of 250 watts, in order to broadcast special Christmas programs.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Denied request for special authority to operate from local sunset to 5:30 P. M. EST, on Tuesdays and Thursdays during months of January and February, 1936, in order to broadcast local high school basketball games.

NEW—Ex. Rep. 1-158: Chicago Broadcasting Association, Chicago, Ill.—Granted oral argument to be held March 12, 1936.

NEW—Ex. Rep. 1-159: Robert E. Cole, d/b as Washington Broadcasting Co., Washington, Pa.—Granted oral argument to be held March 19, 1936.

WADC—Ex. Rep. 1-160: Allen T. Simmons, Tallmadge, Ohio.—Granted oral argument to be held March 19, 1936.

ACTION ON EXAMINERS' REPORTS

NEW—Ex. Rep. No. 1-64: Eugene DeBogory, tr/as Paris Broadcasting Co., Paris, Tex.—Denied C. P. for new station to operate on 1500 kc., 100 watts, daytime. Examiner Walker reversed.

NEW—Centennial Broadcasting Corp., Dallas, Tex.—Denied C. P. for new station to operate on 1200 kc., 100 watts, unlimited time. Examiner Walker sustained.

NEW—Ex. Rep. No. 1-72: Eugene DeBogory, tr/as Brownsville Broadcasting Co., Brownsville, Tex.—Denied C. P. for new station to operate on 1370 kc., 100 watts, unlimited time. Examiner R. L. Walker sustained. Order effective February 18, 1936.

NEW—Denton Broadcasting Co., Eugene DeBogory, Owner, Denton, Tex.—Denied C. P. for new station to operate on 1420 kc., 100 watts, daytime. Examiner Walker sustained.

WQDM—Ex. Rep. No. 1-85: E. J. Regan and F. Arthur Bostwick, d/b as Regan & Bostwick, St. Albans, Vt.—Remanded case heard by Examiner Dalberg to the hearing docket.

NEW—Ex. Rep. No. 1-86: Wm. A. Schall, Omaha, Nebr.—Denied C. P. for new station to operate on 1500 kc., 100 watts, unlimited time. Examiner R. H. Hyde sustained. Order effective February 25, 1936.

NEW—Ex. Rep. No. 1-87: W. R. Cramer and G. A. Anderson, d/b as Omaha Broadcasting Co., Omaha, Nebr.—Denied C. P. for new station to operate on 1500 kc., 100 watts, unlimited time. Examiner R. H. Hyde sustained. Order effective February 25, 1936.

NEW—Ex. Rep. No. 1-129: F. N. Pierce, Taylor, Tex., and Tembel Broadcasting Co., Temple, Tex.—Remanded to the docket for further hearing.

NEW—Ex. Rep. No. 1-131: Mountain States Broadcasting Corp., Salt Lake City, Utah.—Dismissed with prejudice application for C. P. for new station to operate on 550 kc., 500 watts, unlimited time. Examiner P. W. Seward reversed.

WGST—Ex. Rep. No. 1-145: Georgia School of Technology, Atlanta, Ga.—Granted modification of license to increase night power from 500 watts to 1 KW; 1 KW day, 890 kc., unlimited time. Examiner P. W. Seward sustained. Order effective March 3, 1936.

KGKB—Ex. Rep. No. 1-64: East Texas Broadcasting Co., Tyler, Tex.—Granted modification of license to change hours of operation from specified to unlimited day, specified hours night from LS to 8 p. m.; 1500 kc., 100 watts. Examiner R. L. Walker sustained. Order effective February 18, 1936.

NEW—Eugene DeBogory and Mildred English, d/b as Dallas Broadcasting Co., Dallas, Tex.—Denied C. P. for new station to operate on 1500 kc., 100 watts, daytime and specified hours night—6 p. m. to 7 p. m., 8 p. m. to 12 midnight. Examiner Walker reversed.

WROK—Ex. Rep. No. 1-148: Rockford Broadcasters, Inc., Rockford, Ill.—Granted modification of license to change hours of operation from sharing with WHBL to unlimited; 1410 kc., 500 watts. Examiner P. W. Seward sustained. Order effective March 10, 1936.

NEW—Ex. Rep. No. 1-151: Pat Whitaker, tr/as Tampa Broadcasting Co., Tampa, Fla.—Dismissed with prejudice application for C. P. for new station to operate on 1370 kc., 100 watts, unlimited time. Examiner J. P. Bramhall sustained.

NEW—Ex. Rep. No. 1-152: D. B. Sutton, Miami, Fla.—Dismissed with prejudice application for C. P. for new station to operate on 1210 kc., 100 watts, unlimited time. Examiner Bramhall sustained.

WJJD—Ex. Rep. No. 1-166: WJJD, Inc., Chicago, Ill.—Reaffirmed grant of C. P. to move transmitter from Mooseheart to Des Plaines, Ill. Examiner R. L. Walker sustained.

ACTION ON CASE HEARD BY COMMISSIONER BROWN

KFBI—Docket 2777: The Farmers & Bankers Life Ins. Co., Abilene, Kans.—Granted renewal of license, 1050 kc., 5 KW, limited time. Commissioner Brown's recommendations reversed.

MISCELLANEOUS

WDRC—WDRC, Inc., Hartford, Conn.—Approved grant of modification of license to increase day power to 5 KW inasmuch as applicant has now complied with Rule 131.

WHIS—Daily Teleg. Printing Co., Bluefield, W. Va.—Reconsidered and granted application for C. P. as amended to move locally and install new equipment and new radiating equipment. Application for increased power withdrawn.

WKRC—WKRC, Inc., Cincinnati, Ohio.—Denied petition asking Commission to reconsider and grant application for modification of license so as to change equipment and increase day power from 2½ KW to 5 KW. Application designated for hearing October 29, 1935.

NEW—Ex. Rep. No. 1-125: National Television Corp., New York City.—Remanded to the docket for early hearing.

KVI—Puget Sound Broadcasting Co., Inc., Tacoma, Wash.—Granted authority to take depositions in support of application for C. P. (Docket 3283).

KGKO—Wichita Falls Broadcasting Co., Wichita Falls, Tex.—Protest to grant of application to move transmitter to Fort Worth, originally filed and withdrawn by Chamber of Commerce, Temple, Okla., was reinstated and that body was permitted to participate in hearing scheduled for January 27, 1936.

KIT—Carl E. Haymond, Yakima, Wash.—Denied petition asking Commission to reconsider its former action of October 16, 1935, in designating for hearing application for voluntary assignment of license to Valley Broadcasters, Inc., a newly formed Washington corporation.

WHDL—Olean Broadcasting Co., Olean, N. Y.—Denied petition asking Commission to reconsider and grant application for transfer of control of station to the Olean Times-Herald Corp. Application designated for hearing on December 3, 1935.

W6XKG—Ben S. McGlashan, Los Angeles, Calif.—Granted license to cover C. P. (exp. gen. exp.), 31600, 35600, 38600, 41000 kc., 100 watts.

APPLICATIONS DISMISSED

NEW—Broadcasters of Pennsylvania, Inc., Erie, Pa.—Dismissed at request of applicant application, heretofore set for hearing, for C. P., 1420 kc., 100 watts, 250 watts LS, unlimited.

NEW—Springfield Newspapers, Inc., Springfield, Ohio.—Dismissed at request of applicant application, heretofore set for hearing, for C. P. for 1120 kc., 250 watts, daytime.

WPTF—WPTF Radio Co., Raleigh, N. C.—Dismissed at request of applicant application, heretofore set for hearing, for special experimental authority, 680 kc., 5 KW, 6 to 7 a. m., EST.

NEW—John E. Fetzer, Kalamazoo, Mich.—Dismissed at request of applicant application, heretofore set for hearing, for C. P. for 1010 kc., 500 watts, 1 KW LS, unlimited.

The following applications, heretofore set for hearing, were dismissed for failure of applicants to answer the form letter, adopted by the Broadcast Division, requiring applicants to signify their desire to be heard within 10 days after receipt of said form letter:

WMFD—Richard Austin Dunlea, Wilmington, N. C.—Application for modification of license, 1370 kc., 100 watts, specified hours (6 a. m. to 9 p. m., EST).

WCBS—WCBS, Inc., Springfield, Ill.—Application for modification of license, 1420 kc., 100 watts, unlimited time.

NEW—Henry William Turkel, Los Angeles, Calif.—Application for C. P., 6040 kc., 1 KW, Emission A-3, unlimited time.

APPLICATIONS DENIED

NEW—Hubert H. Hall, Erie, Pa.—Denied as in cases of default for failure to file appearance, application for C. P., 1420 kc., 100 watts, unlimited time.

NEW—A. O. Jenkins, Jacksonville, Fla.—Denied as in cases of default for failure to file appearance, application for 1200 kc., 100 watts, unlimited time.

APPLICATIONS RECEIVED

First Zone

- NEW**—Power City Broadcasting Corp., Niagara Falls, N. Y.—Construction permit for a new broadcast station to be operated on **630 kc.**, 250 watts, daytime.
- WJAR**—The Outlet Co., Providence, R. I.—Modification of construction permit (B1-P-333) for changes in equipment and move transmitter, requesting extension of completion date from 2-4-36 to 6-4-36.
- WFMD**—The Monocacy Broadcasting Co., Frederick, Md.—License **900** to cover construction permit (B1-P-427) for a new station.
- WOL**—American Broadcasting Co., Washington, D. C.—Construction **1230** permit to make changes in equipment, change frequency from **1310 kc.** to **1230 kc.**, increase power from 100 watts to 1 KW, move transmitter from 1111 H St., N. W., Washington, D. C., to about ½ mile east Riggs and Iager Roads, Maryland, and studio site from 1111 H St., N. W., Washington, D. C., to site to be determined, Washington, D. C.
- WFRB**—The Baltimore Radio Show, Inc., Baltimore, Md.—Modification of construction permit (B1-P-847) for changes in equipment and increase in power of auxiliary equipment, requesting further changes in auxiliary equipment, increase maximum rate carrier power from 500 watts to 1 KW of auxiliary equipment.
- NEW**—The Brockway Co., Watertown, N. Y.—Construction permit to erect a new broadcast station to be operated on **1270 kc.**, 250 watts power, daytime. Consideration under Rule 6 (g).
- WOKO**—WOKO, Inc., Albany, N. Y.—Authority to determine operating power by direct measurement of antenna power.
- W2XF**—National Broadcasting Company, Inc., New York, N. Y.—Construction permit for increase in power from 5 to 12 KW and change in transmitter for visual broadcast station.
- W2XK**—National Broadcasting Company, Inc., New York, N. Y.—Construction permit for an increase in power from 2.5 KW to 15 KW.
- NEW**—National Broadcasting Company, Inc., New York, N. Y.—Construction permit for a new special experimental station for **177000 kc.**, 15 watts.
- NEW**—National Broadcasting Company, Inc., Portable-Mobile.—License for general experimental station for **25700, 26000, 27100, 31600, 35600, 38600, 41000, 86000-400000, 401000 kc.**, and above, 25 watts (to use equipment also licensed as General Experimental Broadcast Pickup Station W10XCG).
- NEW**—National Broadcasting Company, Inc., Portable-Mobile.—License for general experimental station for **25700, 26000, 27100, 31600, 35600, 38600, 41000, 86000-400000, 401000 kc.**, and above, 25 watts (to use equipment also licensed as General Experimental Broadcast Pickup Station W10XCH).
- NEW**—National Broadcasting Company, Inc., Portable-Mobile.—License for general experimental station for **25700, 26000, 27100, 31600, 35600, 38600, 41000, 86000-400000, 401000 kc.**, and above, 25 watts (to use equipment also licensed as General Experimental Broadcast Pickup Station W10XED).
- NEW**—National Broadcasting Company, Inc., Portable-Mobile.—License for general experimental station for **25700, 26000, 27100, 31600, 35600, 38600, 41000, 86000-400000, 401000 kc.** and above, 25 watts (to use equipment also licensed as General Experimental Broadcast Pickup Station W10XV).
- W2XJH**—General Electric Company, Portable-Mobile.—License to cover construction permit for general experimental station.
- W10XCG**—National Broadcasting Company, Inc., Portable-Mobile.—Modification of license to delete all but broadcast pickup frequencies **31100, 34600, 37600, 40600 kc.** and increase power to 25 watts.
- W10XCH**—National Broadcasting Company, Inc., Portable-Mobile.—Modification of license to delete all but broadcast pickup frequencies **31100, 34600, 37600, 40600 kc.** and increase power to 25 watts.
- W10XED**—National Broadcasting Company, Inc., Portable-Mobile.—Modification of license to delete all but broadcast pickup frequencies **31100, 34600, 37600, 40600 kc.** and increase power to 25 watts.
- W10XV**—National Broadcasting Company, Inc., Portable-Mobile.—Modification of license to delete all but broadcast pickup frequencies **31100, 34600, 37600, 40600 kc.** and increase power to 25 watts.

Second Zone

- NEW**—Saginaw Broadcasting Co., Saginaw, Mich.—Construction **1200** permit for a new broadcast station to be operated on **1200**

kc., 100 watts, 250 watts day, specified hours operation. Amended: To omit previous amendment requesting equipment changes and decrease in power.

- NEW**—Harry C. Lowe and Clara A. Lowe, DuBois, Pa.—Construction permit for a new broadcast station to be operated on **850 kc.**, 250 watts, daytime operation. Amended: Change frequency from **850 kc.** to **1210 kc.**, power from 250 watts to 100 watts, move transmitter from 126 W. Long Ave., DuBois, Pa., to DuBois, Pa., and studio site from site to be determined to 2 S. Brady St., DuBois, Pa.
- NEW**—Harold F. Gross, Edmund C. Shields, Saginaw, Mich.—Construction permit for a new station to be operated on **1210 kc.**, 100 watts night, 250 watts day, unlimited time. Requests facilities of WJIM, if WJIM's application for **1010 kc.** is granted.
- WTEL**—Foulkrod Radio Engineering Co., Philadelphia, Pa.—Construction permit to make changes in equipment, directional antenna; change frequency from **1310 kc.** to **1230 kc.**; increase power from 100 watts to 250 watts night, 500 watts day; and change hours of operation from share-WHAT to unlimited time. Amended: To change transmitter site from H Street and Wyoming Avenue, Philadelphia, Pa., to Bustleton Avenue, north of Cottman Street, Castor Highlands, Pa.
- NEW**—Radio Air Service Corp., Portable-Mobile.—Construction permit for general experimental station on **31100, 34600, 37600, 40600 kc.**, 10 watts.

Third Zone

- KPRC**—Houston Printing Co., Houston, Tex.—License to cover **920** construction permit (B3-P-765) to make equipment changes, increase power, move transmitter.
- NEW**—The Metropolis Co., Jacksonville, Fla.—Construction permit for new broadcast station to be operated on **1200 kc.**, 100 watts, unlimited time. Amended: Change frequency from **1200** to **1310 kc.**
- WMFR**—Hart & Nelson (J. A. Hart and Wayne M. Nelson), High Point, N. C.—License to cover construction permit (B3-P-165) as modified for a new station on **1200 kc.**, 100 watts power, daytime operation.
- KMLB**—Liner's Broadcasting Station, Inc., Monroe, La.—License **1200** to cover construction permit (B3-P-695) to make equipment changes.
- KIUN**—Jack W. Hawkins and Barney H. Hubbs, Pecos, Tex.—**1310** Modification of license to change frequency from **1420 kc.** to **1310 kc.**
- WPFB**—Forrest Broadcasting Co., Inc., Hattiesburg, Miss.—License **1370** to cover construction permit (B3-P-732) for changes in equipment, hours of operation and move of transmitter.

Fourth Zone

- WIL**—Missouri Broadcasting Corp., St. Louis, Mo.—License to **1200** cover construction permit (B4-P-869) for changes in equipment.
- KGFV**—Central Nebraska Broadcasting Corp., Kearney, Nebr.—**1310** Construction permit to install new equipment and increase power from 100 watts to 100 watts, 250 watts day. Amended: Change equipment (antenna), and move transmitter and studio from 919 W. 27th St. to 13th and Railroad, Kearney, Nebr.
- NEW**—Charles E. Wilkinson, Mason City, Iowa.—Construction permit for a new broadcast station to be operated on **1370 kc.**, 100 watts, unlimited time. Amended: Change name from C. E. Wilkinson to Charles E. Wilkinson, and change transmitter site from center of business district, Mason City, Iowa, to site to be determined, Mason City, Iowa.

Fifth Zone

- KHQ**—Louis Wasmer, Inc., Spokane, Wash.—Construction permit to increase power from 1 KW, 2 KW day, to 5 KW, and move transmitter from Sprague Ave. and Post St., Spokane, Wash., to site to be determined. Amended to make equipment changes.
- NEW**—Christina M. Jacobson, d/b as The Valley Electric Co., San Luis Obispo, Calif.—Construction permit for a new broadcast station to be operated on **1090 kc.**, 250 watts, daytime. Amended: Change frequency from **1090 kc.** to **1200 kc.**
- NEW**—Ben S. McGlashan, San Diego, Calif.—Construction permit **1210** for a new station to be operated on **1210 kc.**, 100 watts, daytime.
- NEW**—Howard G. DeLong and Maurice E. Kennedy, Los Angeles, Calif.—Construction permit for a new general experimental station on **31600, 35600, 38600, 41000 kc.**, 100 watts.

ASCAP RESTRICTIONS ON WARNER MUSIC

Several stations have raised the question whether a restricted number on the ASCAP list which happens to be published by one of the Warner Brothers publishers is restricted to the licensee of MPHC.

The MPHC in a telegram dated January 20th advises as follows:

"All stations licensed by us may perform all numbers published by us appearing on ASCAP restricted list except numbers from Shubert plays My Maryland, Student Prince, and Land of Smiles and Kern plays Cat and the Fiddle, Music in the Air, and Roberta which we are withdrawing from our repertory pending determination legal questions."

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

Thompson Products, Inc., Cleveland, Ohio. (2-1863, Form A-2)
Imperial China Company, Inc., Steubenville, Ohio (2-1864, Form A-1)
Corporate Leaders Securities Company, Wilmington, Del. (2-1865, Form A-1)
The New York Woman, Inc., New York City (2-1866, Form A-1)
Arthur J. Moss et al., New York City (2-1867, Form F-1)
London Deep Mines Co., Leadville, Colorado (2-1868, Form A-1)
Belle of Anderson County Distilling Co., Lexington, Ky. (2-1869, Form A-1)

RADIO COMMITTEE TO MEET

The regular annual meeting of the American Section, International Committee on Radio, will be held at the University Club, this city, on January 28. Senator Wallace H. White, Jr., of Maine, is president of the organization.

TALMADGE APPLICATION TO FCC

Regular application has been made to the Federal Communications Commission by Morris A. Bealle, of Plain Talk, a magazine published in this city, on behalf of Governor Talmadge.

The application asks for permission to send by telephone wire from Macon, Ga., to Station XEAW, the Dr. John R. Brinkley station, at Reynosa, State of Tamaulipas, Mexico, for transmission, proceedings of the political convention to be held on January 29. The station operates on 960 kilocycles with 100,000 watts power.

FCC APPROPRIATION PASSES HOUSE

The House of Representatives has passed the appropriation bill carrying money for use of the Federal Communications Commission for the next fiscal year beginning July 1.

The total appropriation is \$1,474,000 of which \$24,000 is for printing and binding and the remainder for other expenses including salaries. Provision is made in the bill that not more than \$1,030,000 shall be spent in the District of Columbia.

POWER INCREASE RECOMMENDED FOR TWO STATIONS

Broadcasting Station WFBM, Indianapolis, Ind., applied to the Federal Communications Commission to increase its daytime power from 1,000 to 5,000 watts and Station WHBU, Anderson, Ind., asked for a daytime power increase from 100 to 250 watts.

Examiner Ralph L. Walker, in Report No. I-183, recommended that both of the applications be granted. The Examiner states that "it appears that a need for increased daytime service exists in the area involved; that the granting of the application will not cause objectionable interference to stations other than the applicants; that objectionable interference between the applicant stations now exists; and that while the objectionable interference area of Station WHBU will be increased, the net result will be to increase the satisfactory service area of each station, including therein a substantially greater population."

RECOMMENDS ADDITIONAL TIME FOR KADA

Application was filed with the Federal Communications Commission by broadcasting station KADA, Ada, Okla., asking for unlimited time on the air. The station, which operates on a frequency of 1200 kilocycles, has 100 watts power and now uses daytime hours only.

Examiner P. W. Seward, in Report No. I-182, recommends that the additional time be granted. The Examiner states that a need does exist for additional nighttime service in the area proposed to be served and that "the interests of other licensed stations will not be adversely affected by reason of interference with the possible exception of Station WBBZ and this can only be definitely determined by experiments proposed by taking of field tests."

POWER INCREASE RECOMMENDED FOR WJBC

Broadcasting Station WJBC, Bloomington, Ill., applied to the Federal Communications Commission to increase its daytime power from 100 to 250 watts. The station operates on a frequency of 1200 kilocycles, sharing time with WJBL.

Examiner John P. Bramhall, in Report No. I-181, recommended that the application be granted. He found that there is need for additional daytime service in the area to be served and that "the interests of no other station will be adversely affected by reason of interference." The Examiner also states that the applicant will erect and maintain an antenna in compliance with the engineering standards of the Commission."

FCC DENIES ORAL ARGUMENT

At a general session the Federal Communications Commission overruled the motion of Voice of Brooklyn, Inc. (WLTH), and United States Broadcasting Corporation (WARD) in the matter of their applications for renewal of licenses (Dockets Nos. 1967 and 2039) which the Broadcast Division denied effective January 22, 1936, requesting (1) that an order be entered permitting them to appear by counsel before the Commission en banc

to present oral argument in support of their several petitions which they state will be filed shortly for rehearing of these cases under Section 405 of the Communications Act of 1934, and (2) that, pending final decision of the Commission on such several petitions, the effective date of the order of the Broadcast Division in the premises be postponed from time to time sufficiently to permit full consideration by the Commission of the matters involved prior to the operation of such order.

Commissioner Stewart, presented the following statement in connection therewith:

"I adhere to the views expressed in my opinion of January 8, 1936, which was issued in connection with another applicant in these so-called 'Brooklyn cases.'"

GOOD ENGINEERING PRACTICE

The Federal Communications Commission has issued the following interpretations of "good engineering practice" as used in the Commission's rule 132 to broadcast licensees. Rule 132 is quoted herewith for ready reference:

"(a) The transmitter proper and associated transmitting equipment of each broadcast station shall be designed, constructed and operated in accordance with good engineering practice in all phases not otherwise specifically included in these regulations.

"(b) The transmitter shall be wired and shielded in accordance with good engineering practice and shall be provided with safety features in accordance with the specifications of Article 37 of the current National Electrical Code as approved by the American Standards Association.

"(c) The station equipment shall be so operated, tuned, and adjusted that emissions are not radiated outside the authorized band which cause or are capable of causing interference to the communications of other stations. The spurious emissions, including radio frequency harmonics and audio frequency harmonics, shall be maintained at as low a level as required by good engineering practice. The program distortion, audio frequency range, carrier hum, noise level, and other essential phases of the operation which control the external effects shall at all times conform to the requirements of good engineering practice.

"(d) Whenever, in this rule, the term 'good engineering practice' is used, the specifications deemed necessary to meet the requirements of good engineering practice will be published from time to time.

"(e) This rule shall be effective upon its adoption provided, however, that existing broadcast stations shall be allowed one year in which to meet the requirements herein."

The pertinent sections of Article 37 of the National Electrical Code read as follows:

j. The transmitter shall be enclosed in a metal frame or grill or separated from the operating space by a barrier or other equivalent means, all metallic parts of which are effectually connected to ground.

k. All external metallic handles and controls accessible to the operating personnel shall be effectually grounded. No circuit in excess of 150 volts should have any parts exposed to direct contact. A complete dead front type of switchboard is preferred.

l. All access doors shall be provided with interlocks which will disconnect all voltages in excess of 750 volts when any access door is opened.

Referring to paragraph (a) of the above rule, at present good engineering practice shall be interpreted as follows:

In general the transmitter must be constructed either on racks and panels or in totally enclosed frames protected as required by the sections of Article 37 of the National Electrical Code as quoted above. The final stages of high power transmitters may be assembled in open frames providing the equipment is enclosed by a protective fence. Means must be provided for making all tuning adjustments, requiring voltages in excess of 750 volts to be applied to the circuit, from the front panels with all access doors closed. Proper bleeder resistors should be installed across all condenser banks to remove any charge which may remain after the high voltage circuit is opened. All meters which have more than 1000 volts potential to ground on the movement shall be protected by a cage or cover in addition to regular case even if bakelite.

All plate supply and other high voltage equipment, including transformers, filters, rectifiers, and motor generators, must be protected so as to prevent injury to operating personnel. This protection should include commutator guards on all high voltage rotating machinery.

The transmitter panels or units shall be wired in accordance with standard switchboard practice, either with insulated leads properly cabled and supported or with rigid bus bar properly insulated and protected. Wiring between units of the transmitter with the exception of circuits carrying R. F. energy shall be installed in conduits or approved fibre or metal raceways to protect them from mechanical injury. Circuits carrying low-level R. F. between units shall be of either concentric tube, two-wire balanced lines or properly shielded to prevent the pickup of modulated R. F. energy from the output circuits.

Each stage (including the oscillator) preceding the modulated stage shall be properly shielded and filtered to prevent feedback from any circuit following the modulated stage. An exception to this requirement will be made in the case of high-level modulated transmitters of approved manufacture which have been properly engineered to prevent reaction.

The crystal chamber, together with the conductor to the oscillator circuit, must be totally shielded. The crystal chamber must be so constructed, insulated and temperature-controlled that the maximum temperature variation at the crystal shall not be greater than 0.1 degrees Centigrade. An exception would be made in the case of transmitters employing so-called "AT" or zero coefficient crystals wherein the maximum allowable temperature variation at the crystal is 1.0 degree Centigrade. A thermometer must be installed in such a manner that the temperature at the crystal can be accurately measured and the temperature logged each half hour in accordance with Rule 142. It is preferable that the tank circuit of the oscillator tube be installed in the temperature-controlled chamber. In case an excessive shift in frequency is found during warmup periods the crystal oscillator must be operated continuously. The Commission will take special precautions to ascertain that composite crystal chambers and oscillator units meet the requirements of "good engineering practice" before the station is considered as having satisfactorily complied with Rule 132.

The radio frequency energy operating the monitor must be obtained from some stage in the transmitter prior to the modulated stage and the monitor circuits must be such that the monitor can be operated continuously without heterodyning the carrier. In addition, the monitor and the radio frequency line from the transmitter must be thoroughly shielded to prevent regeneration in the transmitter.

The transmitter power supply shall be so constructed that the maximum plate voltage regulation between no modulation and 100% modulation shall not exceed 5%. Adequate provision shall also be made for varying the transmitter power output between sufficient limits to compensate for excessive variations in line voltage, or other factors which may affect the power output.

A complete set of spare tubes for the transmitter and frequency monitor should be on hand at all times, the spares to include thyratron tubes, when used.

No requests for new broadcasting facilities will be granted unless the equipment proposed to be installed conforms with the definitions of "good engineering practice" as outlined herein.

It is the obligation of the licensee of each existing station to take the necessary steps to assure that the transmitting equipment complies with Rule 132 and these definitions of "good engineering practice." Any changes in the transmitter for which a construction permit is necessary by other rules, application therefor must be made in the regular manner.

There is sufficient time before November 12, 1936, for all licensees to file the necessary applications and install the required equipment.

Each station will be visited in the near future by an inspector of the Field Section of the Commission's Engineering Department and a detailed inspection will be made. Any points not clear or on which a ruling is desired should be discussed with him. However, this does not relieve the licensee's responsibility to proceed to comply with the requirements of this rule.

The inspector will again visit the station on or prior to November 12, 1936, to determine if the equipment complies in all details.

The purpose of this rule is to improve broadcast reception and to protect the lives of the station operators. Many frequency deviations are caused by poor equipment. The mutual interference caused by such deviations will thus be reduced as the deviations are reduced. The continuity of service and fidelity of transmission will be improved. This rule is for the good of the licensees as well as the listeners and the cooperation of all licensees is requested in assisting the Commission in the administration thereof.

The Commission will, from time to time, further define "good engineering practice" as the state of the art progresses and as the needs for the improvement in technical broadcasting demand.

COURT DECISION IN UPROAR COMPANY APPEAL

The United States Circuit Court of Appeals for the First Circuit rendered a decision in the case of the Uproar Company against the National Broadcasting Company.

This case was an appeal from the District Court of the United States for the District of Massachusetts. Judges Morton and Morris wrote the majority decision, while a dissenting decision was rendered by Judge McLellan. The full decision is as follows:

UNITED STATES CIRCUIT COURT OF APPEALS FOR THE FIRST CIRCUIT.

October Term, 1935.

No. 3050.

UPROAR COMPANY,
Plaintiff, Appellant,

v.

NATIONAL BROADCASTING COMPANY ET AL.,
Defendants, Appellees.

APPEAL FROM THE DISTRICT COURT OF THE UNITED STATES FOR THE
DISTRICT OF MASSACHUSETTS

BEFORE MORTON, MORRIS AND McLELLAN, JJ.

Opinion of the Court.

January 7, 1936.

MORTON, J. This is an action at law to recover damages for an alleged conspiracy between the defendants, (1) to interfere maliciously with contracts made by the plaintiff with certain broadcasting concerns to advertise its pamphlets and books, (2) to prevent the printing and distribution of such pamphlets and books, and (3) to prevent the advertising of them over the radio. The alleged purpose of the conspiracy was to prevent the plaintiff from carrying out arrangements made between it, Ed Wynn and Keenan Products, Inc., a corporation owning certain rights transferred to it by Wynn, for the advertising and selling of certain literary productions of Wynn. There is a second count alleging a conspiracy under the Federal anti trust laws to interfere with interstate communications.

The defendants pleaded equitable defenses. That of the Texas Co. alleged in substance that the plaintiff had no such property rights in the productions of Wynn incorporated in the pamphlets and books as enabled it to maintain the action, and that its attempted advertising and sale of them was in violation of the defendants' rights. The prayer was for an injunction against any attempt on the part of the plaintiff to publish, advertise, or sell the literary productions in question. The answer of the National Broadcasting Co. further alleged that the pamphlets and books published by the plaintiff made use of the name "Graham McNamee" in which the Broadcasting Company had exclusive rights. It prayed that such use might be enjoined. In the court below the equitable defenses were sustained and the plaintiff has appealed.

Th first question is whether any ground of equitable defense is pleaded, *i.e.*, whether the defenses stated ought not to have been made in the action at law. Inasmuch as the plaintiff's conduct is alleged in the answers to have been illegal and tortious and an interference with the defendants' property rights, and as it is of such character as, by the settled practice in equity, will if illegal be enjoined, and as injunctions were prayed for, *i.e.*, an affirmative relief not obtainable in the action at law, we think that the equitable defenses were properly pleaded and were properly heard in advance of the trial of the action at law. There is no question but what they related to the subject matter of the plaintiff's action; indeed they go to the root of it. It is the practice in cases in which equitable defenses are properly pleaded in an action at law for the trial court first to determine the equitable issues and "Once having assumed jurisdiction, it (the equity court) will determine all rights, legal or equitable, which are neces-

sary to settle the equitable issues." Wilson, J., *People of Porto Rico v. Livingston*, 47 Fed. (2d) 712 at 721 (C. C. A. 1). See too 28 U. S. C. A. Sec. 398; Equity Rule 23; and *Liberty Oil Co. v. Condon National Bank*, 260 U. S. 235.

We come therefore to the merits of the controversy between the parties. The basic facts are not in dispute. The Texas Co. is a large dealer in gasoline and related products. It made contracts with Ed Wynn a well-known actor and comedian to give a series of radio broadcasts in advertisement of its goods. The broadcasts were to be given weekly, and under the first contract Wynn was to be paid \$5,000 for each one if he furnished the program for it, \$3,500 if he did not. By other contracts the Texas Co. arranged with the National Broadcasting Co. for the use of its system for these broadcasts and for the services of Graham McNamee, a well-known speaker over the radio who was under contract with the Broadcasting Company whereby it was solely entitled to his services in broadcasting and to all public uses of his name. The arrangements between the various parties involved many details which were covered by the agreements, but which it is unnecessary to go into. The original contract between Wynn and the Texas Co. was for thirteen performances; but by additional contracts and options which were exercised, over fifty additional performances were arranged for on substantially the same terms, except that the later contracts did not contain the provision for reduction in compensation if Wynn did not furnish the programs. For the entire series Wynn received if he furnished the programs over \$350,000. The script which Wynn prepared required a second speaker. McNamee took this role. The total expense to the Texas Co. for each performance appears to have been about \$13,000.

The performances were highly successful; Wynn's jokes and witticisms made a great hit with the public. He or his associates apparently conceived the idea that it would be profitable to realize on this good will by publishing his programs in pamphlet form immediately after they had been delivered over the radio. The plaintiff corporation under arrangements with Wynn, and with Keenan Products, Inc., and one Leavitt who were interested in the copyrights or other phases of the matter, undertook to do this by a weekly pamphlet entitled "Uproar" which was sold for 10 cents per copy. The Uproar Co. attempted to advertise this pamphlet over the radio shortly after the conclusion of the performance for the Texas Co., which was contained in the pamphlet, had been given.

The Texas Co. objected to this on the ground that it owned the subject matter of Wynn's broadcast for it and on the further ground that the publication of the pamphlets would injure the advertising value of the broadcasts. The National Broadcasting Co. objected on the ground that the pamphlets used Graham McNamee's name, under the abbreviation "Graham," in violation of its rights. There is no doubt that the word "Graham" was used in the pamphlets, nor that it was there intended to refer to Graham McNamee and was so understood by the public. As has been said, McNamee took part in the broadcasts.

The first question on the merits is whether the Texas Co. acquired exclusive rights in the personal script prepared by Wynn for use in the broadcasts or whether that right remained in him. The District Judge was of opinion that these rights belonged to the Texas Co. As was said in a somewhat similar case, "It is a question of fact to be derived from all the circumstances of the case what is the nature of the contract entered into between the parties." *Halsbury, L. C., in Lawrence & Bullen v. Aflalo, L. R. 1904 App. Case 17, at 20.*

The contracts, which are all in writing, make no explicit provision on this point. Under them the Texas Co. "hereby agrees to and hereby does employ the party of the second part (Wynn) as the principal featured star of a radio broadcast to be given for consecutive weeks once a week for one-half hour beginning (date named) at a salary of (\$5,000) per week for each and every week," etc. Wynn's obligation was "to render service as an artist," and to supply the necessary personal scripts for broadcasting over the radio, etc. . . . "He agrees to render such service to the best of his ability,"—and in the later contracts,—"in the manner as heretofore rendered." The first contract further provided, "6. It shall be the right of election of the party of the second part (Wynn) however to determine whether or not he will perform in full the services of supplying the program and arranging the same, subject to the supervision and approval of the party of the first part, which is a part of the duties the party of second part (Wynn) agrees to perform during the first thirteen weeks for same." . . . "If he shall elect not to perform such services of supplying the program as herein recited, because of the fact that he shall be actively engaged in playing upon the speaking stage, then he shall receive the sum of \$3,500 per week for each and every week that he shall broadcast in the optional period of said fifty-two

weeks herein mentioned, but in that event he shall be known as the star and high-spot of the said broadcast," etc.

The District Judge, applying the contracts to the circumstances surrounding them, held that they in effect made Wynn an employee of the Texaco Co. for advertising purposes and that the literary programs or script which he prepared for that purpose became its property. He regarded the situation as analogous to one in which an author had been employed to prepare manuscripts for publication; or to one in which an inventor had been employed under salary to make a specified invention. See *Lawrence v. Aflalo*, *supra*; *Dielman v. White*, 102 Fed. 892; *Standard Parts Co. v. Peck*, 264 U. S. 52. It does not seem to us, however, that Wynn's services were of that character. Wynn was not employed to prepare material, but to give a show. The proposed show involved two elements, Wynn's personality, skill and reputation as an actor and comedian, and the material which he used. It was to be entirely a spoken affair. The essential thing about it was that it should attract people to listen in, so that they would hear the Texas Company's advertising which was given in connection with it. The script was prepared for that purpose. There is nothing in the contracts to indicate that the Texas Co. regarded the scripts as of value to it after the performance was over or desired to obtain the literary property in them. That property originally belonged to Wynn, and he did not lose it unless the contract carried an implied assignment of it to the Texas Co.* We do not think that any such assignment is implied from the language of the contracts or the relations of the parties. The literary property in the scripts prepared by Wynn remained in him. We do not overlook the fact that Wynn was paid \$1,500 more if he furnished the scripts. The Texas Co. apparently assumed that script obtained elsewhere would cost about that amount. The inferences from this fact seem to us too speculative to be controlling. It is impossible to say who would have furnished the script if Wynn did not, nor on what terms and conditions with respect to the title to it.

As the literary property in the scripts belonged to Wynn he had the general right to publish them. But this right was not unrestricted. As the scripts were prepared under contracts with the Texas Company for that company's advertising and Wynn had been paid for that use of them, plainly he was not at liberty to make any other use of them which would in any way weaken or interfere with that for which they had, so to speak, been sold. The principle is well established, "that in every contract there is an implied covenant that neither party shall do anything which will have the effect of destroying or injuring the right of the other party to receive the fruits of the contract, which means that in every contract there exists an implied covenant of good faith and fair dealing." *Hubbs, J., Kirke LaShelle Co. v. Paul Armstrong*, 263 N. Y. 79. See too *Manners v. Morocco*, 252 U. S. 317.

The final question is whether the publication and sale of the plaintiff's pamphlets "Uproar" did in fact have that effect. The District Judge found, "The plaintiff can have no greater right than Wynn or McNamee. Both defendants complain that the plaintiff, in publishing 'Uproars', has appropriated and will appropriate the good will which the defendants have, at large expense, succeeded in creating and to which the plaintiff has contributed nothing. In other words, that the plaintiff, for its own profit, is seeking to take an unfair advantage of the popularity of widely advertised programs, the proprietary interests in which belong exclusively to the defendants under their respective contracts with Wynn and McNamee.

"This misappropriation and use by the plaintiff tends to impair the value of the exclusive rights which the defendants have acquired by cheapening the whole advertising program. There was evidence tending to show that those who were in the radio audience when the program was on were led to believe that the plaintiff's publication was put out by the defendants, or one of them.

"The defendants say, with justice as I see the matter, that such a use would 'detract from the unique quality and artistically complete effect of the defendant's advertising. It would tend to cause confusion in the minds of the public with respect to the relationship between the plaintiff and the defendant, and to create some degree of impression that the defendant was responsible for what the plaintiff might do.' The cogency of the argument lies in the fact that the defendants have no control by way of censorship, or otherwise, of the matter that may appear in 'Uproars'. I have no hesitation in finding and ruling that the plaintiff is mak-

ing a commercial use, wholly unauthorized, of the script and of the name 'Graham'."

It will be observed that the District Judge's findings dealt not only with what he regarded as an unpermitted misappropriation of the scripts but also with the effect of the plaintiff's use of them on the Texas Company's advertising. While the evidence on this point is not very full, and perhaps not very satisfactory, we think it supports the District Judge's findings. From an inspection of the "Uproar" pamphlets, which were shown to us, we think it might well be found that they were cheap and flashy, and if attributed to the Texas Co.,—as apparently they were to some extent at least,—were calculated to injure the effect of its advertising.

It is clear that the plaintiff had no right to use Graham McNamee's name in its publication, either in full or under the abbreviation "Graham."

It follows that the plaintiff cannot maintain the present action and that the first clause in the decree enjoining it from doing so was right. The second clause in the decree enjoining the plaintiff from publishing, etc., should be modified by adding at the end thereof the following: "in any way which injures or interferes with the benefits which the Texas Co. might derive from its advertising under its contracts with Wynn." In all other respects the decree is affirmed, with costs to the appellees.

The decree of the District Court, as modified by this opinion, is affirmed with costs to the appellees.

McLELLAN, J. (dissenting): I am in accord with the majority view that notwithstanding his contract with the Texas Company, the literary property in the scripts belonged to Wynn, that he had the right to publish them, and that this right was not unrestricted.

While recognizing the principle that a contractor impliedly promises that he will not use retained property in such a way as to defeat the purposes of the contract, I doubt whether in any event we should go as far as the majority opinion suggests in the proposed injunction. Be this as it may, we all agree in substance that the plaintiff, by virtue of mesne assignments from Wynn, has a restricted right to publish the scripts, and I cannot see why, on this record, the plaintiff should be enjoined from prosecuting its action for an alleged unlawful interference with that right. I should suppose that if the defendants made out a complete defense they would be entitled to a judgment,—not an injunction. But they are entitled to neither. The majority concedes such ownership in the plaintiff, that I think it cannot be ruled as a matter of law at this stage of the proceedings that the plaintiff has no cause of action for interference with its ownership and restricted right to publish the Wynn productions. And this entirely apart from the jurisdictional question as to which I am not in accord with the majority of the court.

The non-ownership of the plaintiff alleged in the equitable answer is for reasons already stated out of the case. The *restricted ownership* set up in what the defendants call an equitable defense is a matter which would have been in issue in the law action if no such thing as an equitable defense ever had been provided. May a defendant, by raising a legal issue, by calling it equitable, and by asking for an injunction of the type described in the majority opinion, deprive the plaintiff of a trial at law? In spite of judicial utterances to the effect that the test of the right to a trial in equity on a plea to an action at law is whether the averments of the plea are such as to constitute a proper basis for a bill in equity, I think this question should be answered in the negative. For this additional reason there should be no injunction against the prosecution of the action at law.

I doubt also whether the appearance of the name Graham as a participant in the dialogue constituting the script should be regarded, under the circumstances here presented, as preventing the plaintiff from publishing the Wynn compositions. At any rate, the plaintiff had the right to publish and sell the script by deleting the name in which the National Broadcasting Company had certain rights by contract with Graham McNamee.

In conclusion, I think the court was without jurisdiction in equity to hear the case over the plaintiff's protest, and that no injunction in any form should issue.

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

* In England by statute the presumption is the other way in certain cases, *i. e.*, that the property passes unless expressly reserved. See *Lawrence & Bullen v. Aflalo*, *supra*; *Sweet v. Benning*, 16 C. B. 459.

No. 2684. Misrepresentation in advertising **K-W Motor Graphite** is alleged in a complaint issued against the **K-W Graphite Corporation, Kansas City, Mo.**, engaged in the compounding of a lubricating oil containing a mixture of colloidal graphite, which it sells and distributes in interstate commerce.

The respondent company, the complaint charges, advertises that use of its product increases motor life and efficiency 40 per cent; reduces friction as much as 25 to 40 per cent; reduces consumption of gasoline 8 to 12 per cent, and that only one oil change in 3000 miles is necessary when K-W Motor Graphite is used.

No. 2685. Unfair competition in the sale of "Korgena," a tablet represented as a remedy for obesity and overweight, is alleged in a complaint issued against **Korgena Medicine Co.**, 103-7 West Church St., **Elmira, N. Y.**, and **Jerome Gladke**, doing business as **Korgena Medicine Co.**

The respondents allegedly advertise in newspapers, by radio and in other ways, that Korgena is a cure for body fat or excess weight, that it has the approval of the medical profession in general, and that it reduces weight from 7 to 10 pounds in two weeks, whereas, according to the complaint, such statements are untrue, and tend to deceive and mislead the purchasing public, to the injury of competitors who do not adopt such practices.

No. 2686. Use of sales methods involving a game of chance are alleged in a complaint issued against **M. H. Sobel, Inc.**, **Chicago** candy manufacturer. The respondent is charged with selling candy by a method which offers purchasers a chance of procuring larger pieces of candy or other articles of merchandise at prizes.

Such practices have long been deemed contrary to public policy, according to the complaint, and their use by the respondent has a tendency to injure competition.

Stipulations

The Commission has announced the following cease and desist orders:

No. 01016. False and misleading advertising of a correspondence course in music will be discontinued by **H. H. Slingerland, of Chicago**, trading as **Chicago School of Music**, under a stipulation.

Advertising a correspondence course of 24 lessons at a purported reduced rate of \$8.50, the respondent is said to have offered to teach prospective students how to play the instrument of their choice, offering an instrument free. He also advertised that Professor Albert H. MacConnell, head of the school of music faculty, would give his personal guidance and advice to those enrolled for the course, when this was not the fact.

Nos. 01017-01018. In separate stipulations, two newspapers, the **Des Moines Register and Tribune**, of **Des Moines, Ia.**, and the **Chicago Evening American**, **Chicago**, which published the "Malt-O-Meal" advertising, agree to observe the provisions of the stipulation signed by the **Campbell Cereal Company**.

No. 01022. In a stipulation entered into by the **Guide Publishing Co., Inc.**, 719 E. Olney Road, **Norfolk, Va.**, publisher of the **Norfolk Journal and Guide**, agrees to abide by the terms of a stipulation to discontinue certain misleading advertisements signed by **Alden H. Weed, Jr.**, operating as **Professor Abdullah** and **Swami Abdullah**, **New York City**. The **Guide Publishing Company** had accepted **Weed's** advertisements.

Nos. 01023-01024. Similar stipulations were signed by the **Pittsburgh Courier Publishing Co., Inc.**, Center Avenue at Francis Street, **Pittsburgh**, publisher of the **Pittsburgh Courier**, and the **Afro-American Company**, 628 North Eutaw Street, **Baltimore**, publisher of the **Afro-American**, which also had published advertisements for **Weed**.

No. 01025. **Popular Publications, Inc.**, 205 East 42nd St., **New York City**, publisher of **Adventure Magazine**, agrees to abide by the terms of a stipulation previously signed by **Flying Intelligence Bureau, Los Angeles, Calif.**, in which stipulation **Flying Intelligence Bureau** agreed to discontinue false and misleading advertising.

No. 01028. The **Bulletin Company**, City Hall Square, **Philadelphia**, publisher of the **Philadelphia Evening Bulletin**, published advertisements for **Vikonite Crushed Herbs** and **Nu-Vitolyn**, sold by **Vikonite Tonic Corporation**, of **Brooklyn, N. Y.** The **Bulletin Company** entered into a stipulation with the **Federal Trade Commission** to abide by the provisions of a stipulation signed by the **Vikonite Tonic Corporation**, which agreed to cease the use of false and misleading advertising.

No. 01034. The **Campbell Cereal Co.**, of **Northfield, Minn.**, has entered into a stipulation to cease and desist from the use of false and misleading advertising in connection with the sale of "Malt-O-Meal," a cereal.

The respondent agrees to discontinue representations such as

that among athletes in leading high schools and colleges, "Malt-O-Meal" is the favorite hot cereal. It further agrees not to advertise that the cereal possesses special qualities for giving energy or health, or that it will build and renew muscles, unless the advertising matter specifically states that the cereal aids as a health and muscle builder.

No. 01035. The **Lone Wolf Manufacturing Co., Inc.**, of **Dallas, Tex.**, engaged in selling **Lone Wolf Hair Tonic**, has entered into a stipulation to discontinue unfair trade practices in interstate commerce.

Specifically, the respondent agrees to cease representing in its advertising that its product is a competent remedy for scalp infections, or that it will eradicate dandruff or stop falling hair, when such is not the fact. Such assertions, according to the stipulation, have a tendency to mislead prospective purchasers, to the injury of competitors.

No. 01036. **Plough, Inc.**, **Memphis, Tenn.**, selling **Penetro Nose and Throat Drops** and **Penetro Topical Dressing**, agrees to cease representing that either of its products is an effective remedy for colds or will prevent colds; that **Penetro Nose and Throat Drops** are a competent treatment for hay fever, unless confined to the relief of the symptoms of hay fever; or, directly or by reasonable inference, that **Penetro Topical Dressing** will prevent influenza or pneumonia.

No. 01037. **I. Dabney Smith**, **Huntington, W. Va.**, engaged in selling personal advice by mail, purportedly based upon astrology and numerology, agrees to desist from use of advertising matter, which, according to the stipulation, the Commission has reason to believe is exaggerated and incorrect. Under the stipulation, the respondent is required to discontinue representing that his advice is helpful in the solution of one's social, domestic and business affairs, or that he is a numerologist or a psychoanalyst.

No. 01038. **Vikonite Tonic Corporation**, **Brooklyn, N. Y.**, engaged in the sale of **Vikonite Crushed Herbs**, offered as a treatment for indigestion, and **Nu-Vitolyn**, an alleged concentrated food, agrees to cease attributing to these products certain properties which, according to medical opinion furnished the Commission, they do not possess. The respondent stipulates it will not represent that **Vikonite Crushed Herbs** are helpful to the entire digestive tract, or that **Nu-Vitolyn** is a great European discovery which will wipe out aggravating cases of neurasthenia or nervous breakdown. The respondent, under terms of the stipulation, will cease and desist from use of the word "Vitodyn," independently or as part of a trade name, unless its product contains vitamins in quantities sufficient to afford therapeutic value.

No. 01039. **National Toilet Co., Paris, Tenn.**, selling **Nadinola Face Powder** and **Nadinola Bleaching Cream**, agrees to cease representing that its face powder is wind-proof or moisture-proof, that it will keep the skin young longer and prevent wrinkles, and that it is compounded from ingredients found only in the finest French powders. Statements that the bleaching cream will permanently remove blemishes from the face, and that the directions for its use are based on a famous doctor's advice, also will be discontinued according to the stipulation.

No. 01040. **Joseph N. Cirone**, **Brooklyn, N. Y.**, operating as **Rajah Abdullah**, engaged in the sale of "The Books of Forbidden Knowledge," secret Hindu art, charms and luck pieces, agrees to desist from advertising that use of his product will enable one to win at anything, to obtain all desired things, or to discern all secrets and invisible things. The respondent further stipulates he will not represent that his products are guaranteed or that purchase money is refunded to dissatisfied customers.

No. 01041. **Alden H. Weed, Jr.**, **New York City**, operating as **Professor Abdullah** and **Swami Abdullah**, and engaged in the sale of an **Astronumerology Chart** and **Dream Dope**, agrees to cease representations that use of his chart enables one to pick lucky numbers and to get on the winning side of life, and that his "Dream Dope" enables one to interpret dreams. It is further stipulated that the respondent will not represent that he has delved into ancient mystic lore and located a system very much in favor thousands of years ago.

No. 01042. **Noxacid Laboratories, Inc.**, **Newark, N. J.**, selling **Noxacid**, agrees to discontinue advertising that its product is a competent treatment or an effective remedy for any stomach trouble, unless confined to the relief of ailments due to gastric hyperacidity; that the product is a new scientific discovery, or that it is effective in the treatment of any condition where surgery ordinarily is required.

No. 01043. **Samuel A. Sandberg** and **Max L. Kaufman**, **Chicago**, doing business under the firm name **Derna Laboratory Co.**, and engaged in selling **Skurolin**, a medicated salve, have entered

into a stipulation to cease and desist from representing that their product is used by physicians to relieve skin troubles, or that it is the best known remedy for all skin eruptions. The respondents further agree to abandon use of the term "Laboratory" in their firm name unless and until they actually operate a laboratory in connection with the manufacture of their products.

Nos. 01045-01046-01047-01048-01049-01050-01065-01066-01067-01071. Ten broadcasting companies have entered into stipulations with the Federal Trade Commission to abide by Commission action in cases against advertisers whose advertising matter they had broadcast. In each instance the advertiser has signed a stipulation with the Commission to cease and desist from the character of advertising to which objection was made.

Broadcasting companies and the firms for which they broadcast advertisements are as follows: National Battery Broadcasting Co., St. Paul, operating Station KSTP, advertisements of Clark Brothers Chewing Gum Co., Pittsburgh; Orlando Broadcasting Co., Inc., Orlando, Fla., operating Station WDBO, advertisements of the Brossier Twin's Laboratories, Orlando; Oak Leaves Broadcasting Station Inc., Chicago, operating Station WGES, advertisements of L. W. Paluszek, 1670 West Division St., Chicago, trading as The Vervena Co.; WGAR Broadcasting Co., Cleveland, Station WGAR, advertisements of G. B. McGlenn and C. A. Revell, Cleveland, trading as Cleveland Regol Co.; Matheson Radio Co., Station WHDH, Boston, advertisements of Freedol Remedy Co., 338-A Warren St., Boston; Western Broadcast Co., Hollywood, Calif., Station KNX, advertisements of Wain's Laboratory, Inc., Los Angeles; The Milwaukee Journal, operating Station WTMJ, Milwaukee, advertisements of Smith Bros., Inc., Poughkeepsie, N. Y.; Greenville News-Piedmont Co., Greenville, S. C., operating Station WFBC, advertisements of M. L. Clein & Co., Atlanta; Carter Publications, Inc., Ft. Worth, Tex., operator of Station WBAP, advertisements of Hyral Distributing Co., Ft. Worth; and the Oregonian Publishing Co., Station KEX, Portland, Ore., advertisements of Esbencott Laboratories, 2014 N. E. Sandy Boulevard, Portland.

Nos. 01053-01054-01055-01056-01069. Five radio companies broadcasting advertisements for "Katro-Lek," sold by Katro-Lek Laboratories, Inc., Boston, have signed stipulations to abide by an agreement to cease and desist from misleading advertising entered into by Katro-Lek Laboratories, Inc.

The broadcasting companies are: Bay State Broadcasting Corporation, Station WAAB, Boston; Fifth Avenue Broadcasting Corporation, Station WFAB, New York City; Howell Broadcasting Co., Inc., Station WEBR, Buffalo; Matheson Radio Co., Inc., Station WHDH, Boston, and WDRC, Incorporated, Station WDRC, Hartford, Conn.

No. 1587. Frank Herschel McCullough, Frances McCullough and Harry T. Weaver, doing business as the Herschel Novelty Works, 202 East 12th Street, New York City, in the sale and distribution of their "Carbonite" scissors sharpener, have agreed to discontinue the use of a container simulating in color, design and lettering the package used by John Clark Brown, 525 Lexington Avenue, New York City, in the sale of his "Kenberry" scissors sharpener. Brown sells his product in a rectangular paper container having a red background, upon which is a picture of the device, with a pair of scissors and certain words. According to the stipulation, the respondent company distributed its product in a container identical in size, shape, color of letters, and reading matter, except that the word "Carbonite" appeared in place of the word "Kenberry."

No. 1588. Lee Knitting Mills Corporation, selling and distributing bathing suits, slacks, jerseys and other woolen garments, agrees to stop using as part of its corporate name the words "Knitting Mills," and "Knitting," or "Mills," in a manner tending to deceive buyers into believing that the company actually owns and operates a mill or factory wherein any or all of its products are made, when this is not the fact.

No. 1589. Use of the name of a famous French wine will be discontinued by the Almaden Vineyards Corporation, of Los Gatos, Calif., in connection with the sale of a California-produced wine, under a stipulation entered into.

The respondent company, according to the stipulation, labeled bottles containing certain of its wines with the brand name "Chateau Yquem," and caused the same name to appear in advertising matter, including placards and window cards.

No. 1590. Under a stipulation entered into, The Goodman Products Corporation, 68 Jay Street, Brooklyn, N. Y., will no longer use the words "manufacturers of" or "manufactured by" on labels or in advertising its products sold in interstate commerce.

The respondent, operating under the trade names Paradise Packing Company and Easyway Products Corporation, is engaged in the repacking of steel wool and steel wool cleaning pads obtained from primary steel wool manufacturers. The respondent labeled the cartons with the words "Manufactured by Paradise Packing Company," or "Manufactured by Easyway Products Corporation," according to the stipulation, and its invoices carried the legend, "Manufacturers of Easyway Steel Wool Pads and Soap," when, in fact, it does not manufacture these products.

No. 1591. In a stipulation in which misrepresentation was alleged, J. M. Rurka, 864 West North Avenue, Chicago, doing business as the Secure Lock Company, agrees to cease and desist from stamping on his product, designated as a "Secure Adjustable Door Guard," the abbreviation, "Pat. Pend.," or the words, "Patent Pending." The stipulation avers that the respondent has not filed application for a United States patent on his door guard, and any marking thereon to indicate that he has done so tends to confuse, mislead and deceive purchasers.

No. 1592. Agreement to cease selling watches with fictitious price markings is made in a stipulation entered into by Jacob J. and Bernard Schmukler, wholesale watch dealers, trading as J. J. Schmukler & Son, 133-37 Canal Street, New York City. The respondents purchase the watch movements from one company, the cases from others, and in selling the assembled product to the retail trade, in a substantial number of instances, affixed tags to the watches on which were marked the suggested resale retail prices. The stipulation sets out that prices marked on the tags were exaggerated and fictitious, and much in excess of the prices at which the watches were intended to sell in the ordinary course of business.

No. 1593. Real Silk Hosiery Mills, Inc., manufacturing silk hosiery and other wearing apparel, stipulates that it will not use the phrase "custom made" in advertising products not made to order or to the customer's measure, and will cease the use in advertisements of any other representations having a tendency to deceive buyers into believing that its ladies' hosiery is made to order or to the customer's measure, when this is not the fact. The company is said to have advertised in periodicals having a wide circulation, also in radio broadcasts.

No. 1594. Goodwear Knitting Mills, dealing in knitted outerwear for men and boys, agree to abandon use of the phrase "Knitting Mills" in connection with their trade name, and to cease using the words "Knitting," "Mills," and "Manufacturers" on invoices, letterheads or other printed matter, implying or tending to deceive buyers into believing that they knit or manufacture the products sold by them, or that they actually own and operate a factory in which the articles are knit or manufactured, when this is not true.

No. 1595. An agreement to discontinue false and misleading advertising was signed by the American Foto Products Co., 216 West Jackson Boulevard, Chicago, engaged in the manufacture of novelty rings. The respondent, in advertising for salesmen, represented that they could earn from \$20 to \$40 a day by selling rings, but, according to the stipulation, such representations were exaggerated and not probable of accomplishment.

No. 1596. In a similar stipulation, A. Hirsch Company, 35 East Wacker Drive, Chicago, wholesale dealer in watches, agrees to cease and desist from fictitious price marking.

No. 1597. J. Harold Booth, trading as United Mushroom Co., 3848 Lincoln Avenue, Chicago, and engaged in the sale of mushroom spawn and instructions for growing mushrooms, has entered into a stipulation to cease and desist from the use of false and misleading advertising having a tendency to mislead purchasers, in violation of the Trade Commission Act.

The respondent agrees to discontinue representing that his so-called "Super-Spawn" is produced by his company or that it can be grown to produce profitable crops under conditions unfavorable to mushroom growth or in beds about a grower's premises.

No. 1598. In a stipulation entered into, Lawrence C. (Max) Kraft and Rose Kraft, co-partners, trading under the names of Kraft Bird Co. and Kraft Pet Shops, 579 Fulton St., Brooklyn, N. Y., agree to discontinue false and misleading advertising in promoting the sale of canaries.

In the course of their business the respondents advertised that they have been breeders of canaries for sixteen years, that their shipments averaged 1,000 birds per day over a period of several years, and that they handled as many as 300,000 canaries in a single year, all of which assertions, according to the stipulation, are untrue. The respondents also advertised themselves as the largest breeders and distributors of canaries in America, when, according to the stipulation, this was not the fact.

No. 1599. In stipulating to cease and desist from the use of false and misleading advertising, **E. M. Viquesney, of Spencer, Ind.,** trading as World War Memorial Association, and American Doughboy Studios, agrees to cease using the word "Association" in a trade name under which to conduct his business of selling statuary and metal art objects, or to use the word "Association" in any way which may tend to lead purchasers into the belief that they are dealing with an association officially connected with the American Legion or a World War veterans' organization. The respondent is also to cease representing that he has the endorsement of the American Legion, that material used in the base of his monuments is composed of "Indiana Carrarra Marble," when, in fact, there is no such product, and that he has studios in New York, Chicago, and Carrarra, Italy. The respondent is said to have advertised a statue, "Spirit of the American Doughboy," as made of cast metal bronze, and weighing 700 pounds, when in fact it was made of other materials thinly coated with bronze, and did not weight that much.

No. 2303. An order has been issued against **Jacob Stein, 276 Ten Eyck Street, Brooklyn, N. Y.,** trading as **Climax Rubber Co.,** directing him to cease and desist from unfair methods of competition in selling sanitary and water-proof specialties, including infants' apparel.

The respondent is ordered to discontinue advertising that his products have antiseptic and anti-acid properties and powers which actually kill bacteria and neutralize perspiration and other body wastes, completely deodorizing all odors, when such is not the fact.

No. 2367. **Charles E. Morris, 330 Seventh Avenue, New York City,** engaged in the sale of fur garments, is directed to discontinue misrepresenting himself as a wholesale manufacturing furrier, and that he has a factory show room, according to an order to cease and desist issued against him.

The respondent, trading under his name and as the Charles E. Morris Show Room, is required to cease advertising that the prices for his products are "strictly wholesale" or "practically wholesale," or that purchases can be made from him at one-third to one-half less than on garments of the same grade and value sold at retail establishments. The order also directs the respondent to cease making the representation that he sells to stores from coast to coast, when such is not the fact.

No. 2543. In an order to cease and desist issued against **C. E. Sissell and L. L. Sissell, 4322 East Third St., Los Angeles,** trading as **Sissell Brothers,** the respondents are directed to discontinue certain unfair trade practices in selling metal burial vaults. They are ordered to cease representing that their vaults resist rust or corrosion, that they are made of rust-resisting material, that they are water or vermin-proof at the time of interment, or that they will endure as such for a period of 50 years, or for any fixed period of time.

No. 2643. An order has been issued to cease and desist against **C. R. Acfield, Inc., of 36 West 34th St., New York City,** dealer in treatments for foot ailments, directing discontinuance of certain unfair methods of competition.

In selling its product, the respondent is ordered to stop representing that its so-called "Perfection Toe Spring" is a cure for bunions, or will remove the actual cause of bunions or enlarged joints, or that it "Bentoe Splint" is a correction for or will straighten hammer-toe.

FTC COMPLAINT DISMISSED

No. 2254. The Federal Trade Commission has dismissed a complaint which charged the Maiden-Form Brassiere Co., Inc., of New York City, with unfair methods of competition in the sale of its product through use of the terms "fashion" and "full-fashion."

FEDERAL COMMUNICATIONS COMMISSION ACTION

HEARING CALENDAR

Monday, January 27

HEARING BEFORE AN EXAMINER (Broadcast)

NEW—Christina M. Jacobson, d/b as The Valley Electric Co., San Luis Obispo, Calif.—C. P., 1090 kc., 250 watts, daytime.
NEW—E. E. Long Piano Co., San Luis Obispo, Calif.—C. P., 1200 kc., 100 watts, unlimited time.

TO BE HELD AT WICHITA FALLS, TEXAS, AND FORT WORTH, TEXAS

KGKO—Wichita Falls Broadcasting Co., Wichita Falls, Tex.—C. P. to move to Fort Worth, Tex.; 570 kc., 250 watts, 1 KW LS, unlimited time.

Wednesday, January 29

WMBG—Havens & Martin, Inc., Richmond, Va.—C. P., 1350 kc., 500 watts, unlimited time.
NEW—Wilbur M. Havens, Chas. H. Woodward, etc., d/b as Petersburg Broadcasting Co., Petersburg, Va.—C. P., 880 kc., 500 watts, daytime (request facilities of WPHR).
WPHR—WLBG, Inc., Petersburg, Va.—Renewal of license, 880 kc., 500 watts, daytime.
WPHR—WLBG, Inc., Petersburg, Va.—C. P., 880 kc., 500 watts, daytime (request to move to Richmond, Va.).
NEW—Century Broadcasting Co., Inc., Richmond, Va.—C. P., 1370 kc., 100 watts, daytime.
WCMI—Ashland Broadcasting Co., Ashland, Ky.—C. P., 1350 kc., 1 KW, unlimited time. Present assignment: 1310 kc., 100 watts, unlimited time.

Thursday, January 30

ORAL ARGUMENT BEFORE THE BROADCAST DIVISION

WILL—University of Illinois, Urbana, Ill.—Modification of license, 580 kc., 1 KW, daytime. Present assignment: 890 kc., 250 watts, 1 KW LS, shares with KUSD and KFNF.

HEARING BEFORE AN EXAMINER (Broadcast)

NEW—J. Laurance Martin, Tucumcari, N. Mex.—C. P., 1200 kc., 100 watts, unlimited time.

APPLICATIONS GRANTED

KHQ—Louis Wasmer, Inc., Spokane, Wash.—Granted C. P. to make changes in equipment.
WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—Granted C. P. to install auxiliary transmitter for emergency purposes only, at same location as main transmitter.
KIRO—Queen City Broadcasting Co., Seattle, Wash.—Granted C. P. to move studio and transmitter locally in Seattle, and make changes in equipment.
WNRI—S. George Webb, Newport, R. I.—Granted modification of C. P. to extend completion date from 2-4-36 to 6-4-36.
WREC—WREC, Inc., Memphis, Tenn.—Granted modification of C. P. to extend completion date from 1-30-36 to 2-29-36.
WAAF—Drovers Journal Pub. Co., Chicago, Ill.—Granted modification of C. P. approving proposed antenna system and transmitter site.
WBNY—Roy L. Albertson, Buffalo, N. Y.—Granted modification of C. P. approving antenna and studio sites, and moving transmitter in Buffalo.
WPRP—Julio M. Conesa, Ponce, Puerto Rico—Granted modification of C. P. approving transmitter site at No. 1 Trujillo St., Ponce, Puerto Rico, change location of studio to Trujillo St., Ponce, Puerto Rico, and make changes in specified hours; also to extend completion date to 180 days after grant.
WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.—Granted C. P. to make changes in equipment; move transmitter from Frankstown Road, to Pittsburgh.
WLW—The Crosley Radio Corp., Cincinnati, O.—Granted extension of special experimental authority to operate with 500 KW, employing directional antenna system at night, using transmitter of W8XO.
WFBR—The Baltimore Radio Show, Inc., Baltimore, Md.—Granted modification of C. P. to make changes in equipment, and increase maximum rated carrier power, the same as regular equipment.
KABR—Aberdeen Broadcast Co., Inc., Aberdeen, S. Dak.—Granted license to cover C. P. authorizing move of transmitter site locally and installation of new antenna to comply with Rule 131; 1420 kc., 100 watts, unlimited.
KTRH—KTRH Broadcasting Co., Houston, Tex.—Granted license to cover C. P. authorizing changes in equipment; 1290 kc., 1 KW night, 5 KW day, unlimited.

KVOR—S. H. Patterson, Colorado Springs, Colo.—Granted license to cover C. P. authorizing move of transmitter site locally and changes in antenna, to comply with Rule 131; 1270 kc., 1 KW, unlimited time.

WFMD—The Monocacy Broadcasting Co., Frederick, Md.—Granted license to cover C. P. authorizing erection of new station; 900 kc., 500 watts, daytime.

KTRH—KTRH Broadcasting Co., Houston, Tex.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Rule 137.

KOL—Seattle Broadcasting Co., Seattle, Wash.—Granted authority to determine operating power by direct measurement of antenna input.

KQV—KQV Broadcasting Co., Pittsburgh, Pa.—Granted authority to install automatic frequency control.

KCRJ—Chas. C. Robinson, Jerome, Ariz.—Granted renewal of license; 1310 kc., 100 watts, daytime-specified.

NEW—Westinghouse Elec. and Mfg. Co., Portable (Chicopee Falls, Mass.).—Granted C. P. and license (exp. spec. exp.), frequencies 31600, 35600, 38600, 41000, 55500, 60500, 86000-400000 kc., 500 watts.

W9XAA—Chicago Federation of Labor, Chicago, Ill.—Granted C. P. to move transmitter locally from Navy Pier, Chicago, to near Warwick and 39th St., York Township, DuPage County, Ill.

NEW—Connecticut State College, Storrs, Conn.—Granted license to cover C. P. (exp. gen. exp.), 86000-400000, 401000 kc. and above; 500 watts, unlimited.

W6XB—Earl A. Nielson, Portable-Mobile (Phoenix, Ariz.).—Granted license to cover C. P. (exp. gen. exp.), frequencies 31100, 34600, 37600, 40600 kc., 15 watts.

W9XID—Donald A. Burton, Portable-Mobile (Muncie, Ind.).—Granted license to cover C. P. (exp. gen. exp.), frequencies 31100, 34600, 37600, 40600 kc., 2 watts.

NEW—Tri-State Broadcasting System, Inc., Portable-Mobile, Shreveport, La.—Granted C. P. (temp. broadcast pickup), frequencies 1606, 2020, 2102, 2760 kc., 50 watts. Also granted license covering same.

W10XFZ—Don Lee Broadcasting System, Portable-Mobile (Los Angeles).—Granted license to cover C. P. (exp. gen. exp.), frequencies 31100, 34600, 40600 kc., 100 watts.

KABD—Don Lee Broadcasting System, Portable-Mobile (Los Angeles).—Granted license to cover C. P. (temp. broadcast pickup), frequencies 1646, 2090, 2190, 2830 kc., 100 watts.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KIRO, Seattle, Wash.; KMOX, St. Louis, Mo.; KTHS, Hot Springs National Park, Ark.; KTRB, Modesto, Calif.; WAIU, Columbus, Ohio; WCAZ, Carthage, Ill.; WDZ, Tuscola, Ill.; WHAS, Louisville, Ky.; WLWL, New York City; KCMC, Texarkana, Ark.; KERN, Bakersfield, Calif.; KFIZ, Fond du Lac, Wis.; WOPI, Bristol, Tenn.; WPFB, Hattiesburg, Miss.; WRAK, Williamsport, Pa.

W3XDD—Bell Tel. Labs. Inc., Whippany, N. J.—Granted renewal of special experimental station license for period Jan. 29 to April 29, 1936, in exact conformity with existing license.

W1XKA-W3XKA-W8XKA—Westinghouse E and M Co., Portable-Mobile—Granted renewal of special experimental station license for period Jan. 30 to April 30, 1936, in exact conformity with existing license.

W9XAF—The Journal Co. (Milwaukee Journal), Milwaukee, Wis.—Granted renewal of special experimental station license for period Feb. 1 to May 1, 1936, in exact conformity with existing license.

W2XBH—Radio Pictures, Inc., Long Island City, N. Y.—Granted renewal of special experimental station license for period Feb. 1 to May 1, 1936, in exact conformity with existing license.

SET FOR HEARING

NEW—M. M. Oppegard, Grand Forks, N. D.—Application for C. P. for new station; 1310 kc., 100 watts night, 250 watts day, unlimited.

NEW—Ted R. Woodard, Kingsport, Tenn.—Application for C. P. for new station; 1210 kc., 100 watts, daytime.

NEW—Marysville-Yuba City Publishers, Inc., Marysville, Cal.—Application for C. P. for new station; 1140 kc., 250 watts, daytime. Site to be determined.

NEW—Memphis Commercial Appeal, Inc., Mobile, Ala.—Application for C. P. for new station; 630 kc., 1 KW night, using

directional antenna, 5 KW day, unlimited. Site to be determined.

NEW—Wilton Harvey Pollard, Huntsville, Ala.—Application for C. P. for new station; 1200 kc., 100 watts, unlimited.

WMFF—Plattsburg Broadcasting Corp., Plattsburg, N. Y.—Modification of license to change hours of operation from daytime only to include 100 watts night until 7:30 p. m. daily.

WROK—Rockford Broadcasters, Inc., Rockford, Ill.—Consent to transfer of control of Rockford Broadcasters, Inc. (licensee of station WROK) from Lloyd C. Thomas, as trustee for individual stockholders, to Rockford Consolidated Newspapers, Inc. (1410 kc., 500 watts, S-WHBL).

KMPC—Beverly Hills Broadcasting Corp., Beverly Hills, Cal.—Renewal of license to operate on 710 kc., 500 watts, limited time, and granted temporary license pending hearing.

KFEQ—KFEQ, Inc., St. Joseph, Mo.—C. P. already in hearing docket, amended to read: approval of transmitter site to location to be determined; type of antenna to be determined; make changes in equipment; increase power from 2½ to 5 KW, daytime.

ORAL ARGUMENTS GRANTED

NEW—Ex. Rep. No. 1-150.—Clark Standiford, Visalia, Cal.—Oral argument granted to be held March 19, 1936.

KFRO—Ex. Rep. No. 1-161.—Voice of Longview, Longview, Tex.—Oral argument granted to be held March 26, 1936; and NEW—Oil Capital Broadcasting Assn., Kilgore, Tex.—Oral argument granted to be held March 26, 1936; and KWEA—International Broadcasting Corp., Shreveport, La.—Oral argument granted to be held March 26, 1936.

NEW—Ex. Rep. No. 1-165.—Florida West Coast Broadcasting Co., Inc., Tampa, Fla.—Oral argument granted to be held March 26, 1936.

NEW—Ex. Rep. No. 1-168.—W. A. Patterson, Chattanooga, Tenn.—Granted oral argument to be held February 20, 1936.

NEW—Ex. Rep. No. 1-171.—Herbert Lee Blye, Lima, O.—Granted oral argument to be held March 26, 1936.

MISCELLANEOUS

WDAY—WDAY, Inc., Fargo, N. Dak.—Granted petition requesting postponement of oral argument, scheduled for Jan. 23, 1936, for a period of approximately 30 days, on application of Robert K. Herbst for radio facilities at Moorhead, Minn.

Edwin A. Kraft, Fairbanks, Alaska—Granted order to take depositions in re application for radio facilities at Fairbanks, Alaska.

Leo J. Omelian, Erie, Pa.—Removed from hearing docket application for renewal of license and granted regular license for period expiring July 1, 1936. Applications for facilities of this station dismissed.

ACTION ON EXAMINERS' REPORTS

WBNX—Ex. Rep. 1-134: Standard Cahill Co., Inc., New York City—Denied C. P. for new equipment; move transmitter and increase power from 250 watts to 1 KW. Examiner Bramhall reversed.

WEED—William Avera Wynne, Rocky Mount, N. C.—Denied C. P. to change equipment; change frequency from 1420 to 1350 kc.; increase power from 100 watts to 250 watts; change hours of operation from unlimited, day, sharing with WEHC night, to unlimited. Examiner Bramhall sustained. Order effective March 24, 1936.

NEW—Ex. Rep. 1-154: St. Petersburg Chamber of Commerce, St. Petersburg, Fla.—Denied C. P. for new station to operate on 1310 kc.; 100 watts; unlimited time. Examiner Bramhall sustained. Order effective March 24, 1936.

KARK—Ex. Rep. 1-157: Ark. Radio & Equipment Co., Little Rock, Ark.—Granted C. P. to make changes in equipment; change location of transmitter, and increase power from 250 watts night, 500 watts day, to 500 watts night, 1 KW day; 890 kc., unlimited time. Examiner P. W. Seward sustained. Order effective March 24, 1936.

APPLICATIONS RECEIVED

First Zone

WBEN—WBEN, Inc., Buffalo, N. Y.—Modification of construction permit (B1-P-567) to make equipment changes, increase day power from 1 to 5 KW, move transmitter, further re-

requesting approval of transmitter site at R. F. D. No. 2, Shawnee Road, near Martinsville, N. Y.

NEW—United States Broadcasting Co., Washington, D. C.—**Construction permit for a new radio station to be operated on 1310 kc., 100 watts, unlimited time, contingent upon granting of WOL's application for move of station, change of frequency and power.**

WHDL—Olean Broadcasting Co., Inc., Olean, N. Y.—**Construction permit to install new equipment, change frequency from 1420 kc. to 1260 kc., power from 100 to 250 watts; move transmitter from Exchange National Bank Bldg., corner Union and Laurens Sts., Olean, N. Y., to town of Allegany, N. Y. Amended to make equipment changes, change frequency from 1260 kc. to 1400 kc.**

Second Zone

NEW—Harold F. Gross, Lansing, Mich.—**Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000 kc., 100 watts.**

Third Zone

WREC—WREC, Inc., Memphis, Tenn.—**Extension of special experimental authorization to operate with power of 1 KW night, 2½ KW day, for period from 3-1-36 to 9-1-36.**

WIS—Station WIS, Inc., Columbia, S. C.—**Modification of construction permit (B3-P-3258) authorizing move of transmitter, change of frequency, installation of new equipment, and increase in power, requesting extension of completion date from 2-10-36 to 5-10-36.**

NEW—Jonas Weiland, Kinston, N. C.—**Construction permit for a new station to be operated on 1210 kc., 100 watts night, 250 watts day, unlimited time.**

KVOL—Geo. H. Thomas, Robert M. Dean, Louis M. Sepaugh, T. B. Lanford, a partnership d/b as Evangeline Broadcasting Co., Lafayette, La.—**Voluntary assignment of license from Geo. H. Thomas, Robert M. Dean, Louis M. Sepaugh, T. B. Lanford, a partnership, d/h as Evangeline Broadcasting Co., to Evangeline Broadcasting Co., Inc.**

NEW—Lookout Broadcasting Corp., Chattanooga, Tenn.—**Construction permit for a new station to be operated on 1420 kc., 100 watts, daytime.**

NEW—Dorrance D. Roderick, El Paso, Tex.—**Construction permit for a new station to be operated on 1500 kc., 100 watts, unlimited time.**

Fourth Zone

WMT—Iowa Broadcasting Co., Des Moines, Iowa—**License to cover special experimental authorization to operate permanently on 1 KW night, 2½ KW day. (Filed under new name.)**

NEW—Wise Broadcasting Co., St. Paul, Minn.—**Construction permit for a new station to be operated on 630 kc., 250 watts, unlimited time. Facilities of KGDE. Amended: To change name from Emmons L. Abeles & Robert J. Dean co-partnership, d/h as Wise Broadcasting Co., to Wise Broadcasting Co.**

NEW—R. C. Goshorn & Lester E. Cox, d/b as Capitol Broadcasting Co., Jefferson City, Mo.—**Construction permit for a new station to be operated on 920 kc., 500 watts daytime. Consideration under rule 6 (g).**

WHBL—Press Publishing Co., Sheboygan, Wis.—**Construction permit to install new transmitter, erect a new vertical antenna and move transmitter from 636 Center Avenue, Sheboygan, Wisconsin, to site to be determined, near Sheboygan, Wisconsin.**

NEW—W. E. Day, Creston, Iowa—**Construction permit for a new station to be operated on 1500 kc., 100 watts, unlimited.**

Fifth Zone

KGVO—Moshy's Incorporated, Missoula, Mont.—**License to cover construction permit (B5-P-232) as modified for new equipment, change in frequency, increase in power and move of transmitter.**

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah—**Construction permit to increase power from 1 KW to 5 KW, and install new equipment. Also move transmitter from Township No. 1 South, Range 1 West, 33rd South, Cor. 9th West, Salt Lake City, Utah, to site to be determined, near Salt Lake City, Utah. Amended: To omit request for increase in night power from 1 KW to 5 KW.**

KFBK—James McClatchy Co., Sacramento, Calif.—**Authority to determine operating power by direct measurement of antenna power.**

KFBK—James McClatchy Co., Sacramento, Calif.—**License to cover construction permit (5-P-B-3144) as modified to move transmitter, make changes in equipment, change frequency and increase power.**

W7XBD—Oregonian Publishing Co., Portland, Ore.—**Modification of construction permit for extension of commencement date to 4-15-36 and completion date to 8-15-36. (Wrong equipment installed.)**

NEW RULE ON MECHANICAL REPRODUCTIONS

The Federal Communications Commission has amended Rule 176, effective January 28, regarding announcements of mechanical reproductions to read as follows:

"176. Each broadcast program consisting of a mechanical reproduction, or a series of mechanical reproductions, shall be announced in the manner and to the extent set out below:

1. A mechanical reproduction, or a series thereof, of longer duration than fifteen minutes, shall be identified by appropriate announcement at the beginning of the program, at each fifteen-minute interval, and at the conclusion of the program; provided, however, that the identifying announcement at each fifteen-minute interval is waived in case of a mechanical reproduction consisting of a single, continuous, uninterrupted speech, play, symphony concert or operatic production of longer duration than fifteen minutes;
2. A mechanical reproduction, or a series thereof, of a longer duration than five minutes and not in excess of fifteen minutes, shall be identified by an appropriate announcement at the beginning and end of the program;
3. A single mechanical reproduction of a duration not in excess of five minutes, shall be identified by appropriate announcement immediately preceding the use thereof;
4. In case a mechanical reproduction is used for background music, sound effects, station identification, program identification (theme music of short duration), or identification of the sponsorship of the program proper, no announcement of the mechanical reproduction is required.
5. The exact form of the identifying announcement is not prescribed but the language shall be clear and in terms commonly used and understood by the listening public. The use of the applicable identifying words such as 'a record', 'a recording', 'a recorded program', 'a mechanical reproduction', 'a transcription', 'an electrical transcription', will be considered sufficient to meet the requirements hereof. The identifying words shall accurately describe the type of mechanical reproduction used, *i.e.*, where a transcription is used it shall be announced as a 'transcription' or an 'electrical transcription' and where a phonograph record is used it shall be announced as a 'record' or a 'recording'."

MUSIC USERS PROTECTIVE ASSOCIATION, INC.

The Managing Director is making inquiry concerning the Music Users Protective Association, Inc., Chimes Building, Syracuse, New York. It is suggested that members delay any action on the offer made by this Association pending further information.

RECOMMENDS NEW HOLLYWOOD STATION

W. H. Kindig applied to the Federal Communications Commission for a construction permit for the erection of a new station at Holly-

NOTES TO SALES STAFF

Radio broadcasting has just completed a banner year with a volume of over \$87,000,000. (See The Year in Broadcast Advertising, page 1176.) Nothing succeeds like success.

Radio's gain was the greatest of any medium. (See Comparison with Other Media, page 1176, and see the report for 1935 to be issued within a few days.)

The slight increase in local advertising during December, as contrasted to the usual seasonal downswing, together with the strong showing of local sponsorship during recent months, should be particularly encouraging. (See Total Broadcast Advertising, page 1176.)

The continued rise in local transcription volume and in national live talent business should provide sales arguments and opportunities to many stations. (See Non-network Volume by Type of Rendition, page 1177.)

The general gains in all fields of sponsorship during the month should be especially encouraging. Attention is called to the rise in national non-network and regional network confectionery advertising, beverage advertising in the local and national non-network fields, and national non-network and regional network tobacco advertising. These suggest wider opportunities to stations and regional units.

wood, Calif., to use 1300 kilocycles, 1,000 watts, and to share time with KFAC. Also, KFAC, Los Angeles, Calif., applied for license renewal. This station now uses 1300 kilocycles, 1,000 watts power, and unlimited time on the air.

Examiner George H. Hill, in Report No. I-183, recommended:

"That the application of W. H. Kindig for a construction permit be granted on condition that the applicant install an antenna which complies with the recommendations of the Engineering Department of the Commission.

"That the application of the Los Angeles Broadcasting Company, Inc., for renewal of license be granted in part and that this applicant be authorized to operate Station KFAC one-half time, sharing hours of operation equally with W. H. Kindig, applicant for a new station to operate on the 1300-kilocycle frequency, with power of 1 kilowatt."

GEORGE ELLIS

George Ellis, who calls himself a continuity writer and claims to be the author of "The Trial of Vivian Ware," it is understood, is looking for a job with some radio station or agency.

Members are advised to communicate with NAB Headquarters before offering Mr. Ellis employment.

HIGH POWER DENIAL RECOMMENDED

Station WCAO, Baltimore, Md.; WICC, Bridgeport, Conn.; and WIP, Philadelphia, Pa., the first two operating on 600 kilocycles and the latter on 610 kilocycles, all applied to the Federal Communications Commission to increase their daytime power from 500 to 1,000 watts.

Examiner Melvin H. Dalberg, in Report No. I-187, recommends that all of the applications be denied. The Examiner states that:

"The granting of these applications would undoubtedly limit the service area of one or more Canadian stations. Therefore, it is con-

sidered that, under the arrangement between the United States of America and the Dominion of Canada effected by an exchange of notes entered into on May 5, 1932, and designated as Executive Series No. 34, the granting of all the instant applications would constitute a hostile act to the station or stations affected. It is also obvious that the granting of the application of WIP and the denial of the other two would adversely affect the latter."

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

General Lumber Company, Seattle, Wash. (2-1870, Form A-1)
Pacific Oil & Meal Company, Los Angeles, Calif. (2-1871, Form A-1)
Beverages Incorporated, Boston, Mass. (2-1872, Form A-1)
Oil Payment Purchase Corp., Jersey City, N. J. (2-1873, Form A-1)
American Fidelity Corp., Ltd., San Diego, Calif. (2-1874, Form G-1)
National Grange Fire Insurance Co., Keene, N. H. (2-1875, Form A-1)
Medical Building of Houston, Dallas, Tex. (2-1876, Form E-1)

RECOMMENDS FURTHER HEARING FOR KWKC

The Mid-Central Broadcasting Company applied to the Federal Communications Commission for a construction permit for the erection of a new station at Kansas City, Mo., to use 1370 kilocycles, 100 watts power, unlimited time, requesting the facilities of Station KWKC, also at Kansas City, Mo. KWKC asked for license renewal.

Examiner R. H. Hyde, in Report No. I-185, recommended that the application of the Mid-Central Broadcasting Company be denied and "that the application of Station KWKC for renewal license be set down for a further hearing to determine whether the licensee has attempted or is attempting to transfer his license or the rights thereunder to another party or parties without the consent of the Commission." The Examiner says further in this connection that:

"The evidence relating to the application of the Wilson Duncan Broadcasting Company (KWKC) for renewal of station license raises a serious question as to whether or not this station has been operated in accordance with the terms of recent licenses, and also a question as to whether the station would be operated by the applicant if a renewal license were issued to him; but since there was no notice to the applicant on this question, no finding is made."

RADIO COMMITTEE ELECTS

Senator Wallace H. White, Jr., of Maine, was elected president of the American Section, International Committee on Radio, at a meeting held at the University Club, this city, on Tuesday night.

Other officers elected for the coming year include: Louis G. Caldwell, vice president; Howard S. LeRoy, treasurer; and Paul M. Segal, secretary. Members of the executive council: William R. Vallance, chairman; A. L. Ashby, Thad H. Brown, T. A. M. Craven, J. H. Dellinger and F. P. Guthrie.

Representative Sam Rayburn of Texas, J. H. Dellinger, T. A. M. Craven and E. M. Webster made short addresses on various phases of radio at the meeting.

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2687. Because it represents that its cosmetic products are accepted by the American Medical Association, unfair competition is charged against **C. W. Beggs Sons & Co.**, 1741 North Western Avenue, Chicago, in a complaint.

The respondent, engaged in the manufacture of cosmetics which it sells in interstate commerce under the trade name "Marcelle," advertises that these products are submitted to and accepted by the American Medical Association, and that they must pass the rigorous requirements of the association before being sold, whereas such assertions are untrue, according to the complaint.

No. 2688. **George Close Co.**, 243 Broadway, Cambridge Mass., engaged in the manufacture and sale of candy, is named respondent in a complaint. It is alleged that the respondent company so

packs and assembles its product as to involve the use of a lottery scheme when the candy is sold and distributed to consumers.

The complaint describes the lottery as a method under which the purchasers, by buying small pieces of candy for one cent, may win a larger piece. Use by the respondent of this scheme, the complaint avers, is contrary to public policy and has a tendency to restrict competition in that it tends to injure competitors who do not use such methods, by diverting trade from them.

No. 2689. A complaint has been issued against **Jung & Schade Laboratories**, 1418 Somer St., Milwaukee, charging unfair representations in the sale of its product, "Vi-Vo."

In its advertising matter, the respondent allegedly represents "Vi-Vo" as a "sober-up" remedy which "counteracts alcohol," "clears the mind," "settles the stomach," "prevents bad after effects," and "completely eliminates alcoholic effects in a short time," whereas, according to the complaint, these and similar assertions are false and misleading, and the product does not possess the therapeutic properties claimed for it.

Stipulations

The Commission has issued the following cease and desist orders:

Nos. 01029-01051-01052-01058-01068-01070-01072-01087. Stipulations have been entered into by two publishing companies and four broadcasting companies, to abide by agreements arrived at by the Commission with certain advertisers. The advertisers have agreed to cease and desist from the use of false and misleading advertising in the sale of their products.

The publishing companies and the firms for which they published advertisements are: **Pathfinder Publishing Co., Inc.**, 2414 Douglas St., Washington, D. C., publisher of *The Pathfinder*; advertisements for Dr. W. B. Mayo's Tablets, sold by Dr. W. B. Mayo Laboratories, Los Angeles; **Bruce Publishing Co.**, 2642 University Ave., St. Paul, Minn., publisher of *The Northwestern Druggist*; advertisements for "Liquid O2X", sold by J. George and Walter U. Hauser and James J. Poole, doing business under the firm name of Hauser Laboratory, Minneapolis, Minn.

The broadcasting companies and the firms for which they broadcast advertisements are: Western Broadcast Co., operator of radio station KNX, Hollywood, Calif., advertisements for medicinal products sold by Dr. Louis L. Sherman, operating as "Clinic of the Air," Oakland, Calif.; Western Broadcast Co., operator of radio station KNX, Hollywood, Calif., advertisements for "Smad" sold by Dr. A. W. Daggett, S. M. Sweeney and E. C. Groves, operating as the Smad Co., Pasadena, Calif.; Clearwater Chamber of Commerce and St. Petersburg Chamber of Commerce, Clearwater, Fla., operators of radio station WFLA, advertisements for "A. F.-3," sold by Litmo Laboratories, Inc., trading as The Brosier Twins Laboratories, 302 Fidelity Bldg., Orlando, Fla.; Radio Air Service Corporation, Cleveland, Ohio, operator of radio station WHK, advertisements for "Regol," sold by G. B. McGlenn and C. A. Revell, trading as Cleveland Regol Co.; Radio Station KGW, operated by the Oregonian Publishing Co., Portland, Ore., advertisements for "Santi-septic Lotion," sold by E. J. and Minnie E. Scheffer, doing business as Esbenscott Laboratories, 2014 N. E. Sandy Blvd., Portland, Ore.

In another stipulation, John Kaslikowski, trading as Alpenol Herb Co., Springfield, Mass., engaged in selling Alpenol Herb Tea, entered into a stipulation to cease and desist from false and misleading advertising in the sale of his product. The respondent agrees to discontinue representing that the tea is an effective remedy or a competent treatment for liver, kidney or stomach trouble, when such assertions are not the fact.

No. 01044. **Boyer Chemical Laboratory Co.**, 2700 Wabash Ave., Chicago, selling cosmetic products, agrees to discontinue representing that its "Muscle Oil Tissue Cream" will nourish the skin, remove wrinkles or build up the contours and tissues of the face; that "Boyer Face Powder" is perspiration-proof and will not clog the pores, and that "Boyer Powder Base Astringent" gives assurance against enlarged pores and wrinkles, when such assertions are not true, according to the stipulation. The respondent also will cease representing that it employs a Madame Louise Delorme to give women personal advice on skin care and make-up, until such person is employed to render the service indicated. It is further agreed that the respondent will not use the words "muscle" and "tissue" as part of the name for its so-called "Muscle Oil Tissue Cream."

Nos. 01059-01060-01061-01062. Three publishers printing advertisements of **Plough, Inc.**, of Memphis, Tenn., dealer in medicinal products, have signed stipulations to abide by the terms of an agreement entered into by **Plough, Inc.**, to cease and desist

from misleading advertising. The publishers printed the advertisements to which objection was made.

The publishers are as follows: **American Osteopathic Association**, 430 North Michigan Ave., Chicago, publisher of the *Journal of the American Osteopathic Association* and of the *Osteopathic Magazine*; **Crowell Publishing Co.**, 250 Park Ave., New York City, publisher of *Country Home*; and Parent's Publishing Association, Inc., 9 East 40th St., New York City, publisher of *Parent's Magazine*.

Plough, Inc., advertised certain treatments for colds, hay fever and related ailments.

No. 01064. J. Petrie, 6023 Harper Ave., Chicago, trading as **Purity Products Co.**, and engaged in selling "Minex" and "Hygeen," agrees to discontinue advertising that these products will correct any feminine hygiene condition, or that they are recommended by physicians and surgeons unless such representation is limited to the ingredients of which the products are composed. The stipulation requires the respondent to desist from representing directly or by reasonable implication that "Minex" is an abortifacient, or that "Hygeen" tablets are a contraceptive.

Nos. 01073-01074-01075-01076-01077-01078-01079-01080-01081. Seven publishers printing advertisements of **Dr. W. B. Mayo Laboratories**, Los Angeles, have signed stipulations to abide by an agreement entered into with the Commission by Dr. W. B. Mayo Laboratories to cease and desist from misleading representations of its treatment for stomach trouble, known as Dr. W. B. Mayo's Tablets. The publishers have printed the advertisements to which objection was made.

The publishers are as follows: **Eugene Lorton**, publisher of the *Tulsa World*, Tulsa, Okla.; **Buffalo Courier-Express, Inc.**, Buffalo, N. Y.; **Memphis Commercial-Appeal, Inc.**, Memphis, Tenn.; **A. O. Anderson**, publisher of the *Dallas Dispatch*, Dallas, Tex.; **Enterprise Co.**, publisher of the *Beaumont Enterprise* and the *Beaumont Journal*, Beaumont, Tex.; **Post Intelligencer Co.**, publisher of the *Seattle Post-Intelligencer*, Seattle, Wash.; and **C. B. Blethen**, publisher of the *Seattle Times*.

Dr. W. B. Mayo Laboratories, of Los Angeles, agrees to cease advertising that one bottle, or any quantity, of Mayo's Tablets, will enable a person to gain 10 pounds; that half a \$5 treatment, or any quantity of these tablets, causes all pain to leave and enables one to eat the things desired without discomfort; that Mayo's Tablets are scientific and a competent treatment or effective remedy for acid stomach, indigestion, sleepless nights, and related ailments.

The respondent agrees to stop using the words "Laboratory" or "Laboratories" in its trade name or advertising until such time as it actually owns, maintains or operates a laboratory or laboratories.

Nos. 01082-01083. William E. Miller Furniture Co., Inc., Eighth Street and Pennsylvania Ave., S. E., Washington, D. C., has entered into a stipulation to discontinue misleading advertising, and **American Newspapers, Inc.**, publisher of *The Washington Herald*, which carried advertisements for the Miller store, has signed a stipulation to abide by the Miller company's agreement.

This furniture company stipulates that it will cease representing that its furniture is sold at a saving of any amount, unless this assertion is qualified to show that the represented saving is based on a comparison of the fair retail value of the used furniture and the amount at which it is offered for sale.

No. 01084. United States Rubber Products, Inc., 1790 Broadway, New York City, agrees that in the sale of its "U. S. Royal Tires" it will cease and desist from representing in advertising that the majority of automobile manufacturers equip all of their cars with tires sold by the respondent, or that the tires are guaranteed for a definite period of time, unless the representation is qualified to indicate that the guarantee applies only to tires used on passenger cars, and unless the terms of the guarantee afford the purchaser redress in event the tire fails to last the length of time advertised.

No. 01085. The Bromwell Wire Goods Co., Third and Walnut Sts., Cincinnati, Ohio, operating as the Cincinnati Patent Engineering Co., is engaged in selling Bromwell's "Raio-O-Trap" aerial-eliminator, also designated as "Aero-Trap." In the stipulation the respondent agrees to discontinue representing that the device produces amazing new power, volume and clarity, eliminates the danger of lightning, brings in distant stations as clearly as local, eliminates the outside aerial, but produces the same results as a 75-foot aerial, and that it will last a lifetime, and work on any and all types of radios. These representations, according to the agreement, are incorrect and exaggerated and mislead prospective

purchasers, to the injury of competitors who truthfully advertise their products.

No. 01086. J. Palazzolo, 436 E. Fourteenth St., New York City, engaged in selling "Mexican Laxative Tea" and "Otello Water," has signed a stipulation to desist from misrepresenting those products. As to "Mexican Laxative Tea," the respondent agrees to discontinue advertising the product as an effective remedy for constipation, and for numerous other ailments. He also will eliminate the word "Mexican" as part of the name of the product until it or the ingredients composing it are imported from Mexico, according to the stipulation.

The respondent also agrees to cease representing that "Otello Water," offered as a remedy for restoring gray hair to its natural color, is not a dye or a tincture, that it restores gray hair to its natural color and that it ends dandruff and baldness. Under the stipulation, the use of the word "water" in the name of the product will be discontinued.

No. 2311. An order to cease and desist has been issued against **William Bros. Tailoring Corporation**, with its principal business office in New York City, and its manufacturing plant at 384 Congress St., Troy, N. Y., directing discontinuance of certain unfair practices in the sale of men's clothes in interstate commerce.

Representations of the respondent company that clothes sold by it are made to order according to individual measurements of the purchasers, that is, custom tailored, are to be discontinued under the order, and are not to be resumed until it has become the established practice of the respondent that all clothes represented as custom tailored have been so made after receipt of orders from purchasers.

No. 2318. In an order to cease and desist, **James McCreery & Co.**, owner and operator of a department store at 5th Avenue and 34th St., New York City, is directed to discontinue unfair methods of competition in the sale of its Toyo hats.

The respondent is required to cease representing or advertising that Toyo hats are "Panama" hats, when such is not the fact, and to stop use of the word "Panama" in the sale or manufacture of any other hats when they are not genuine Panamas, woven by hand in a saturated condition and made from the leaf of the paja toquilla or the jipajapa plant.

No. 2349. Under an order to cease and desist, **David, Lewis and Benjamin Levine**, trading as **Colombo Extract Co.**, 380 Throop Ave., Brooklyn, N. Y., are directed to discontinue advertising and otherwise representing that they import or export the flavoring extracts which they manufacture and sell in interstate commerce.

The order requires the respondents to cease representing by any method that their extracts or the ingredients composing them are manufactured in foreign countries, or that the respondents are the sole representatives in America for their commodity, when such assertions are untrue.

No. 2570. Under an order to cease and desist issued against **W. J. Thompson, Inc.**, publisher of *The Gentlewoman* magazine, 154 West 14th St., New York City, is required to discontinue false representation of circulation building contests in connection with the sale of any publications.

The respondent, under the order, is required to cease representing that a person solving a puzzle presented in an advertisement, and sending the solution to the respondent, will receive a prize without doing any other thing, or that the mere mailing of a correct solution is sufficient to win any prize, when such assertions are untrue.

No. 2377. LeGay, Inc., 58 East Washington St., Chicago, has been ordered to cease and desist from advertising or representing in any manner that "LeGay Hair Remover," which it sells in interstate commerce, is an effective and harmless depilatory, that it will permanently remove hair from the human body, or that it will banish facial shadows or remove hair without roughening the skin, when such assertions are not the fact.

No. 2591. Use of the word "manufacturers" in advertisements is to be discontinued by the **Arco Shirt Corporation**, 486 Broadway, New York City, under an order to cease and desist.

The Commission found that the respondent company, in its advertising matter, business stationery and other trade literature, represents that it manufactures the shirts it sells in interstate commerce, when in fact it does not control or own any factory in which its products are made.

No. 2605. An order has been issued requiring **Acme Cotton Products Co., Inc.**, 245 Fifth Ave., New York City, to cease and desist from the use of certain words in the sale in interstate commerce of surgical supplies and absorbent cotton products.

The respondent, in describing the grade of cotton used in the manufacture of the products it sells, is required to discontinue use of the words "Very Highest Grade Procurable," when such dis-

nation is not a fact. Use of the words "Sterilized," "Aseptic," or "Purified," to describe the absorbent cotton and surgical supplies, also is prohibited under the order unless these products are actually bacteria-free when sold by the respondent.

BROADCAST ADVERTISING IN DECEMBER

Developments of the Month

Broadcast advertising during December rose 5.8% as compared to the preceding month. Gross time sales of the medium amounted to \$8,686,359, a gain of 20.8% over the corresponding month of 1934. Regional network and national non-network volume continued to show the greatest gains.

Local broadcast advertising failed to show the usual seasonal decline and remained slightly above the November level. Broadcast advertising of this type was 33.4% greater than during December of last year.

Non-network advertising as a whole rose 1.8% in December as against the previous month and showed an increase of 33.4% over the same month of last year. Local station volume experienced the usual seasonal decline, while the clear-channel and high-powered regional group accounted for most of the month's non-network gains. Heaviest gains over last year were in the regional and local station classes. The situation with regard to non-network advertising in various sections of the country was practically unchanged from that of the preceding month.

In the national non-network field, live talent programs showed the greatest increase over the previous December, while transcriptions and records led in local broadcast advertising.

Compared to November, national network automotive and financial advertising, national non-network drug, confectionery and retail volume, and local beverage, and financial broadcasting showed the most pronounced gains. Regional network advertising experienced marked increases in the clothing, cosmetic, confectionery, and beverage fields.

In the national network field, accessory, beverage, and radio set advertising experienced the greatest increases as compared to December 1934. Gains were general in the non-network field, with automotive, beverage, confectionery, radio set, and tobacco advertising leading. Local broadcast advertising was spotty, important increases taking place in automotive, clothing, beverage, and house-furnishing advertising. Advertising by retail establishments rose 41.2% as against the preceding December.

The Year in Broadcast Advertising

Total sales of time during 1935 by the broadcasting industry amounted to \$87,523,848, an increase of 20.0% over the previous year's volume. National network advertising showed a gain of 13.0% over 1934, while regional network volume rose 54.7%. National non-network business increased 26.0% as compared to the preceding year. Local broadcast advertising experienced a rise of 20.6%. The year of 1935 was the most prosperous, from the viewpoint of gross revenue, thus far experienced by the industry.

Total Broadcast Advertising

Total broadcast advertising over stations and networks during the month under review is set forth in Table I.

TABLE I
TOTAL BROADCAST ADVERTISING

Class of Business	1935 Gross Time Sales		
	November	December	Cumulative Jan.-Dec.
National networks	\$4,533,774	\$4,944,445	\$50,067,686
Regional networks	128,715	127,174	1,110,739
National non-network	1,652,680	1,707,140	17,063,688
Local	1,896,180	1,907,600	19,281,735
Total	\$8,211,349	\$8,686,359	\$87,523,848

Broadcast advertising rose 5.8% during the month. National network advertising exceeded the previous month's level by 9.0%. Regional network and local broadcast advertising remained practically unchanged from the preceding month, while national non-network volume rose 3.3%.

Compared to December 1934, national network volume rose 11.0%, regional network advertising 99.8%, national non-network business 39.6% and local broadcast advertising 33.4%. Total revenues of the medium showed a gain of 20.8% over the corresponding period of 1934.

Comparison with Other Media

National magazine volume declined 20.3% during the month, partly due to normal seasonal influences. National farm papers experienced a decrease of 5.8%. Newspaper advertising remained at approximately the same level as in November, rather than showing the usual seasonal decline.

Gains over December 1934 amounted to 6.3% in the case of national magazines. National farm paper advertising rose 30.0% and newspaper advertising 12.3%. Automotive advertising in newspapers rose 3.5% and department store volume 9.9%.

Advertising volume placed in major media during December is found in Table II.

TABLE II
ADVERTISING BY MAJOR MEDIA

Advertising Medium	1935 Gross Time and Space Sales		
	November	December	Cumulative Jan.-Dec.
Radio broadcasting	\$8,211,349	\$8,686,359	\$87,523,848
National magazines ¹	12,118,920	9,681,025	123,093,289
National farm papers ¹	481,501	452,976	5,565,059
Newspapers ²	48,765,000	49,170,000	517,513,000
Total	\$69,576,770	\$67,990,360	\$733,695,196

¹ Publishers Information Bureau.

² Estimated.

Non-network Advertising

General non-network advertising increased 1.8% as against November and registered a gain of 35.3% over the December 1934 level. The greatest increase over the preceding month was experienced by clear channel and high powered regional stations, whose non-network volume rose 7.6%. Regional station advertising of this type increased 1.6% while local station volume declined 13.5%.

Compared to December of the previous year, clear channel non-network advertising rose 29.7%, regional station advertising 43.5% and local station business 38.8%. Broadcast advertising by power of station is found in Table III.

TABLE III
NON-NETWORK ADVERTISING BY POWER OF STATION

Power of Station	1935 Gross Time Sales		
	November	December	Cumulative Jan.-Dec.
Over 1,000 watts	\$1,561,600	\$1,683,850	\$16,564,505
250-1,000 watts	1,423,160	1,446,490	14,523,795
100 watts	564,100	484,400	5,257,213
Total	\$3,548,860	\$3,614,740	\$36,345,513

Except for an increase of 8.8% in non-network advertising in the North Central area, there was little change over the preceding month. Non-network advertising in the New England and Middle Atlantic States remained at approximately the same level as in December of 1934. Broadcast advertising of this type showed an increase of 70.0% in the South Atlantic and South Central States. The gain in the North Central area was 56.6%, and in the Mountain and Pacific district, 27.3%. Non-network advertising by geographical areas is set forth in Table IV.

TABLE IV
NON-NETWORK BROADCAST ADVERTISING BY GEOGRAPHICAL DISTRICTS

Geographical District	1935 Gross Time Sales		
	November	December	Cumulative Jan.-Dec.
New England-Middle Atlantic Area	\$766,520	\$765,000	\$8,945,782
South Atlantic-South Central Area	730,610	715,530	6,060,358
North Central Area	1,305,830	1,420,650	13,941,087
Pacific and Mountain Area	745,900	713,560	7,398,286
Total	\$3,548,860	\$3,614,740	\$36,345,513

Non-network Volume by Type of Rendition

In the national non-network field, transcription volume and live talent business rose 5.5% and 5.7% respectively. Announcement business declined 8.5% as compared to November. In the local broadcast advertising field, transcription business increased 15.0% as compared to November, while records rose 16.2%. Live talent volume dropped 4.5%, and announcements decreased 1.2%. The transcription and record increases were contrary to the usual seasonal trend.

Compared to December of the previous year, national non-network live talent business increased 43.8%. Transcription volume rose 34.2%, while gross revenues from announcements gained 32.4%. The most marked gains in the local broadcast advertising field over the corresponding month of the preceding year occurred in the transcription and record fields. In the former, a gain of 82.3% was experienced. Record volume rose 114.0%.

National non-network and local broadcast advertising volume by type of rendition employed is found in Table V.

TABLE V
NON-NETWORK BROADCAST ADVERTISING BY TYPE OF RENDITION

Type of Rendition	National Non-network		1935 Gross Time Sales		Total		Cumulative Jan.-Dec.
	November	December	Local November	Local December	November	December	
Electrical transcriptions	\$534,900	\$574,550	\$178,680	\$206,080	\$713,580	\$780,630	\$7,614,508
Live talent programs.....	828,940	877,520	1,040,160	995,380	1,869,100	1,872,900	17,679,530

Announcements	278,850	244,940	613,730	630,500	892,580	875,440	10,202,404
Total	\$1,652,680	\$1,707,140	\$1,896,180	\$1,907,600	\$3,548,860	\$3,614,740	\$36,345,513

Sponsor Trends in December

Few gains of importance were experienced in the national network field as compared to the preceding month, though slight increases in advertising volume occurred in the majority of sponsor groups. The most significant increases were a rise of 21.3% in automotive advertising and a gain of 26.3% in financial volume. There were no decreases.

Regional network advertising showed general increases with clothing, cosmetic, confectionery, beverage and tobacco advertising showing the greatest gains. Clothing volume tripled; cosmetic advertising, a comparative newcomer in the regional field, rose tenfold; confectionery advertising, mostly candy manufacturers, doubled, while tobacco volume continued its increases of recent months and gained 32.0%. Accessory volume declined 33.7% and soap and kitchen supply advertising dropped 15.7%.

Principal gains during the month in the national non-network field were as follows: drugs, 35.1%; confectionery, 43.1%; and radio sets, 156.0%. Decreases of importance were as follows: automotive, 32.1%; housefurnishings, 23.4%; and financial, 25.7%.

Main gains in local broadcast advertising as against November were as follows: beverages, 23.0%; soaps and kitchen supplies, 28.6%, and financial volume 18.9%. Trends as a whole were spotty with accessory volume declining 20.0%, drug advertising dropping 40.3% and foodstuffs 12.5%.

Comparison with December 1934

Gains in the national network field were fairly general compared to the corresponding month of 1934. Accessory advertising showed

an increase of 35.1%, housefurnishing volume doubled, and radio set advertising rose 31.2%. Beverage advertising rose 90.0%. Drug volume dropped 25.0%, while confectionery declined 26.4%.

Regional network volume also experienced material increases in a number of fields. Accessory advertising rose from \$530 in December 1934 to \$13,127 during the month under review. The gain in cosmetic field during the same period was from \$1,060 to \$11,139. Confectionery volume rose from \$2,200 to \$21,546 during that period. Tobacco advertising, a newcomer for December, amounted to \$10,546 as compared to nothing during the corresponding period of the preceding year.

Gains were even more general in the national non-network field. Principal increases were as follows, when comparison is made with December 1934: automotive, 210.0%; cosmetics, 66.3%; foodstuffs, 46.8%; beverages, 256.0%; confectionery, 175.0%; radio sets, tenfold; and tobacco, threefold. Accessory advertising continued the decline of recent months, dropping 25.7% as against December of last year. Housefurnishing volume declined 17.4%.

Local broadcast advertising showed spotty tendencies. Important gains were as follows: automotive, 50.0%; accessory, 45.7%; clothing, 65.7%; beverages, 162.2%; housefurnishings, 70.8%, and financial 40.0%. Significant declines were as follows: drugs, 33.0%; confectionery, 13.0%.

Broadcast advertising during December by major product and service groups is found in Table VI.

Details as to Sponsor Trends

Details as to trends in broadcast advertising volume in various sponsoring groups are as follows:

1a. **Amusements.** Total volume 35.5% above November. National gain 27.7%, local 41.7%. National volume triple last December. Local down 8.2%. Total down 7.0%.

1. **Automotive.** National network volume 21.3% above November. National non-network down 32.1% and local 11.1%. National network advertising 14.6% above December 1934. National non-network up 210.0% and local 50.0%.

2. **Accessories and gasoline.** National network volume 11.5% over November. Regional network volume down 33.7% and local 20.0%. National non-network gain 1.8%. National network advertising 35.1% above last December. Regional gain \$530 to \$13,127. Local up 45.7%. National non-network down 25.7%.

3. **Clothing.** No change in national network volume during month. Regional business triple. National non-network business up 1.06% and local 3.2%. National network advertising 7.0% above corresponding month of preceding year. National non-network business up 47.6%, and local 65.7%. Regional unchanged.

4. **Drugs and pharmaceuticals.** National network gain as compared to previous month 2.4%. National non-network gain 35.1%. Regional business unchanged. Local down 40.3%. National network decline from same month of last year 25.0%. Regional decline 38.0% and local 33.0%. National non-network unchanged.

5. **Toilet goods.** Gains over November as follows: National networks, 11.8%; regional networks, tenfold; and local 5.1%. National non-network down 15.1%. Gains compared to corresponding period of previous year as follows: National networks, 19.5%; regional networks, \$1,060 to \$11,139; national non-network, 66.3%, and local, 54.6%.

6. **Foodstuffs.** Increases over month were: National networks, 8.2%; regional networks, 28.4%; national non-network, 8.2%. Local volume down 12.5%. National network advertising 6.3% below last December, and local down 1.0%. Regional volume up 33.2%, and local 46.8%.

7. **Beverages.** National network volume 9.1% above November. Regional volume up 50.0% and local 23.0%. National non-network down 3.3%. Gains over corresponding month of 1934 as follows: National networks, 90.0%; regional networks, tripled; national non-network, 256.0%; local, 162.2%.

8. **Confectionery.** National network volume unchanged during the month. Regional advertising doubled, national non-network up 43.1% and local down 18.1%. National network advertising 26.4% below December 1934. Local down 13.0%. National non-network up 175.0%. Regional network up from \$2,200 to \$21,456.

9. **Household equipment.** Regional network and local volume unchanged during the month. National network business up 9.0%. National non-network down 23.4%. National network volume double last December. Regional volume up 11.0% and local 70.8%. National non-network down 17.4%.

10. **Soaps and kitchen supplies.** National network advertising unchanged from preceding month. Regional networks down 15.7% and national non-network business 4.0%. Local up 28.6%. Compared to corresponding month of 1934, national network volume down 3.4%, national non-network business comparatively unchanged, and local more than doubled.

11. **Financial and insurance.** National network business 26.3% above preceding month, and local 18.9%. National non-network down 25.7%. Compared to December of previous year, national network volume unchanged, national non-network up 27.6% and local 40.0%.

12. **Radios.** National network volume 5.4% ahead of November. National non-network up 10.0%. Local down 6.6%. Gains compared to last December as follows: National networks, 31.2%; national non-network, tenfold; local, 38.5%.

13. **Department and general stores.** National network volume under this classification comprises mail order business, new this month. Some volume of this type broadcast last spring. National non-network business 156.0% above November. Local down 5.6%, due to usual seasonal trend.

14. **Tobacco products.** National network advertising 5.8% above November. Regional network business up 32.0%. National non-network volume unchanged. Local up 24.2%. Compared to same month of preceding year, gains as follows: National networks, 11.3%; national non-network, threefold; local up 54.1%.

15. **Miscellaneous.** National network business up 10.5% and

local 19.0% as against November. Regional volume down 18.0% and local 4.1%. National network volume double corresponding month of 1934. Regional business up 77.5%. National non-network gain 55.0% and local 45.4%.

Retail Broadcast Advertising

Broadcast advertising sponsored by retail establishments of various kinds increased 9.3% as compared to November, contrary to the usual seasonal trend, which is downward. Retail broadcast advertising gained 41.2% as compared to the corresponding month of 1934.

Principal gains as compared to November were as follows: Clothing, 4.2%; drugs, 12.0%; beauty parlors, 55.0%; grocery stores and delicatessens, 24.8%; restaurants, 12.7%; furniture retailers, 20.3%. Principal declines during the month were automotive, 19.6%; gasoline and accessories, 9.8%; and radio retailers, 7.0%.

Compared to December 1934, gains were as follows: automotive, 53.6%; clothing, 77.3%; beauty parlors, 82.1%; confectionery stores, 156.0%; household equipment retailers, 30.0%; furniture stores, 55.0%. The principal decline was in the gasoline and accessory field, where retail volume dropped 35.1%. Retail broadcast advertising during the month is found in Table VII.

ORAL ARGUMENT BEFORE THE BROADCAST DIVISION

Examiner's Report No. I-55:

NEW—J. C. & E. W. Lee (Riverside Broadcasting Co.), Riverside, Calif.—C. P., 820 kc., 250 watts, daytime.

Examiner's Report No. I-114:

NEW—Metro Broadcasting Co., Los Angeles, Calif.—C. P., 820 kc., 250 watts, limited with WHAS.

Examiner's Report No. I-117:

NEW—Wayne Broadcasting Co., Hamtramck, Mich.—C. P., 1370 kc., 100 watts, daytime.

Examiner's Report No. I-111:

WILL—University of Illinois, Urbana, Ill.—Modification of license, 580 kc., 1 KW, daytime. Present assignment: 890 kc., 250 watts, 1 KW LS, shares with KUSD and KFNF.

APPLICATIONS GRANTED

WOW—Woodmen of the World Life Ins. Assn., Omaha, Nebr.—Granted license to cover C. P. authorizing changes in equipment, installation of new antenna, and transmitter site; 590 kc., 1 KW night, 5 KW day, unlimited.

WJAR—The Outlet Co., Providence, R. I.—Granted modification of C. P. extending completion date from 2-4-36 to 6-4-36.

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—Granted license to cover C. P. authorizing changes in equipment and increase in day power to 250 watts; 1310 kc., 100 watts night, unlimited.

WBBM—WBBM Broadcasting Corp., Chicago, Ill.—Granted extension of experimental authority to continue to operate synchronously with station KFAB from LS to midnight for period 2-1-36 to 8-1-36.

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Granted extension of special experimental authority to continue to operate synchronously with station WBBM from LS to midnight for period 2-1-36 to 8-1-36.

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Granted extension of special experimental authority to operate on 1060 kc., with power of 10 KW, simultaneously with station KTHS from 6 a. m. to sunset at Hot Springs, and alone from sunset at KTHS to 9 p. m., EST; to operate synchronously with station WJZ on 760 kc., with power of 2½ KW from 9 p. m., EST, to midnight, employing directional antenna, for period 2-1-36 to 8-1-36.

WESG—Cornell University, Elmira, N. Y.—Granted extension of special experimental authority to operate daytime to sunset at New Orleans on 850 kc. with power of 1 KW.

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Granted extension of special experimental authority to operate unlimited time simultaneously with station KRLD on 1040 kc., with power of 50 KW, for period 2-1-36 to 8-1-36.

KRLD—KRLD Radio Corp., Dallas, Tex.—Granted extension of special experimental authority to operate simultaneously with station WTIC for period 2-1-36 to 8-1-36.

KTHS—Hot Springs Chamber of Commerce, Hot Springs National Park, Ark.—Granted extension of special experimental authority to operate on frequency 1060 kc., with power of 10 KW, simultaneously with station WBAL from 6 a. m. to LS from 2-1-36 to 8-1-36, sharing after sunset (KTHS operates unlimited 8 p. m. to midnight. Normally licensed 1040 kc., 10 KW, S-KRLD).

WCAZ—Superior Broadcasting Service, Inc., Carthage, Ill.—Granted modification of license to increase hours of operation from S.H. daytime to unlimited daytime.

KSD—The Pulitzer Publishing Co., St. Louis, Mo.—Granted authority to determine operating power by direct measurement of antenna input in compliance with the terms of Rule 137.

KGFG—Oklahoma Broadcasting Co., Inc., Oklahoma City, Okla.—Granted consent to the transfer of control of Oklahoma Broadcasting Co., Inc., from R. S. James, Elizabeth E. Hibbert and Marcia A. Shaffer to Hale V. Davis.

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Granted renewal of license, 1170 kc., 50 KW, unlimited time. Also granted renewal for auxiliary, 1170 kc., 1 KW.

WLS—Agricultural Broadcasting Co., Chicago, Ill.—Granted extension of present license for period of 90 days.

WLS—Agricultural Broadcasting Co., Chicago, Ill.—Same for auxiliary purposes.

WCFL—Chicago Federation of Labor, Chicago, Ill.—Granted extension of present license for period of 30 days.

WCFL—Chicago Federation of Labor, Chicago, Ill.—Same for auxiliary.

WWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—Granted extension of present license for period of 90 days. Also granted same for auxiliary.

KMMJ—The M. M. Johnson Co., Clay Center, Nebr.—Granted extension of present license for period of 90 days.

KLPM—John B. Cooley, Minot, N. Dak.—Granted renewal of license for the regular period; 1240 kc., 250 watts, S.H.

WHO—Central Broadcasting Co., Des Moines, Iowa.—Granted extension of present license for period of 90 days.

WIL—Missouri Broadcasting Corp., St. Louis, Mo.—Granted renewal of license for the regular period; 1200 kc., 100 watts night, 250 watts day, unlimited.

WJBW—Charles C. Carlson, New Orleans, La.—Granted extension of present license for period of 30 days.

WJR—WJR, The Goodwill Station, Detroit, Mich.—Granted extension of present license for period of 90 days.

WPTF—WPTF Radio Co., Raleigh, N. C.—Granted extension of special experimental authority to operate from local sunset to 8 p. m., PST, with 1 KW power, period 2-1-36 to 8-1-36. Also granted extension of special experimental authority for auxiliary to operate from LS to 8 p. m., PST, with power of 1 KW, for period 2-1-36 to 8-1-36.

WBRE—Louis G. Baltimore, Wilkes-Barre, Pa.—Granted renewal of license for the regular period.

WHB—WHB Broadcasting Co., Kansas City, Mo.—Granted renewal of license for the regular period.

WABY—Adirondack Broadcasting Co., Inc., Albany, N. Y.—Granted renewal of license for the regular period.

WATL—J. W. Woodruff and S. A. Cislser, Jr., d/b as Atlanta Broadcasting Co., Atlanta, Ga.—Granted extension of present license for period of 60 days.

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Granted extension of special experimental authority to operate on 710 kc., with 500 watts, unlimited time.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses on a temporary basis subject to whatever action Commission may take on pending applications:

KNX, Los Angeles; KOB, Albuquerque, N. Mex.; KWJJ, Portland, Ore.; KWKH, Shreveport, La.; KXA, Seattle, Wash.; WBAP, Fort Worth, Tex.; WCCO, Minneapolis, Minn.; WESG, Elmira, N. Y.; WFAA, Dallas, Tex.; WHDH, Boston, Mass.; WJAG, Norfolk, Nebr.; WNYC, New York City; WOI, Ames, Iowa; WOV, New York City.

WPG—City of Atlantic City, Atlantic City, N. J.—Granted renewal of license on a temporary basis subject to whatever action may be taken by the Commission upon their pending application for renewal.

WWL—Loyola University, New Orleans, La.—Granted renewal of license on a temporary basis, subject to whatever action may be taken by the Commission upon their pending application for renewal.

KFBI—The Farmers & Bankers Life Ins. Co., Abilene, Kans.—Granted renewal of license on a temporary basis only to conform to the Commission's action of January 10, 1936, with reference to this station's application for renewal of license.

WMSD—Muscle Shoals Broadcasting Corp., Sheffield, Ala.—Granted renewal of license for the period ending July 1, 1936.

WIBG—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Present license extended on a temporary basis only from February 1 to March 1, pending receipt and action on renewal application.

WJR—WJR, The Goodwill Station, Inc., Detroit, Mich. (auxiliary).—Present license extended on a temporary basis only, from February 1 to March 1, pending receipt and action on renewal application.

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Present license extended on a temporary basis only, to March 1, 1936, pending further action on renewal application.

WCBF—WCBF, Inc., Waukegan, Ill.—Present license extended on a temporary basis only, to March 1, 1936, pending further action on renewal application.

KGMB—Honolulu Broadcasting Co., Ltd., Honolulu, T. H.—Present license further extended upon a temporary basis only, to March 1, 1936, pending further action on renewal application.

WJEJ—Hagerstown Broadcasting Co., Hagerstown, Md.—Present license further extended upon a temporary basis only, to March 1, 1936, pending further action on renewal application.

WINS—Hearst Radio, Inc., New York City.—Present license further extended upon a temporary basis only, to March 1, 1936, pending further action on renewal application.

The following stations were granted renewal of licenses for the regular period:

KGU, Honolulu, T. H.; WBBM and auxiliary, Chicago, Ill.; WEEU, Reading, Pa.; WOAI and auxiliary, San Antonio, Tex.; WSAB, Huntington, W. Va.

KILU—Arkansas Radio & Equipment Co., Portable.—Present license extended for a period of 1 month from February 1, 1936, to March 1, 1936, on a temporary basis, subject to such action as may be taken upon application for renewal of license pending before it.

WLEZ—The Norfolk Daily News, Portable.—Present license extended for a period of 1 month from February 1, 1936, to March 1, 1936, on a temporary basis, subject to such action as may be taken upon application for renewal of license pending before it.

ACTION ON EXAMINERS' REPORTS

NEW—Ex. Rep. 1-135: George E. Heiges, Sharon, Pa.—Denied C. P. for new broadcast station to operate on 1370 kc., 100 watts night, 250 watts day, unlimited time; Examiner R. L. Walker sustained. Order effective March 31, 1936.

WJAR—Ex. Rep. 1-155: The Outlet Company, Providence, R. I.—Granted modification of C. P. to make changes in equipment; move transmitter; install directional antenna; and change hours of operation from 250 watts night, 500 watts LS, to 1 KW; 890 kc., unlimited time; Examiner P. W. Seward sustained. Order effective March 31, 1936.

MISCELLANEOUS

WWRL—Long Island Broadcasting Corp., Woodside, N. Y.—Denied petition asking Commission to reconsider action of December 10, 1935, in setting application for hearing and grant said application. Applicant seeks to change specified hours to include certain hours after midnight four days per week. Rule 88 provides "a specified hour station shall not broadcast any commercial or sponsored programs from midnight to 6 a. m."

KGFG—Oklahoma Broadcasting Co., Inc., Oklahoma City, Okla.—Granted regular renewal license and dismissed application from the hearing docket.

WSJS—Winston-Salem Journal Co., Winston-Salem, N. C.—Granted petition to intervene and be a party to hearing of application of C. G. Hill, Geo. D. Walker and Susan H. Walker for a C. P. for radio broadcasting station at Winston-Salem.

WWL—Loyola University, New Orleans, La.—Extended for 30 days from February 1, 1936, temporary authorization on same conditions, subject to such action as may be had by the Commission upon application for extension now pending, which has been heard, including question of alleged interference with WLWL, New York City, and the petition of WLWL in opposition thereto.

KWKH—International Broadcasting Corp., Shreveport, La.—Extended for 30 days from February 1, 1936, temporary authorization on same conditions, subject to such action as may be had by the Commission upon application for extension now pending, which has been heard, including question of alleged interference with WLWL, New York City, and the petition of WLWL in opposition thereto.

SET FOR HEARING

NEW—Southwest Broadcasting Co., Prescott, Ariz.—Application for C. P. for new station, 1500 kc., 100 watts night, 250 watts day, unlimited (requests facilities of KPJM which was deleted effective 11-26-35).

WHAT—Independence Broadcastng Co., Inc., Philadelphia, Pa.—Application for C. P. to move transmitter site from Philadelphia to location to be determined in Pennsylvania; install new equipment; change frequency from 1310 kc. to 1220 kc.; increase power from 100 watts to 1 KW and hours of operation from S-WTEL to unlimited.

WHBF—Rock Island Broadcasting Co., Rock Island, Ill.—Application for C. P. to move transmitter locally to a site to be determined; make changes in equipment; install directional antenna; change frequency from 1210 kc. to 1450 kc.; change power from 100 watts night, 250 watts day, to 1 KW night, 1 KW day.

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—Application for C. P. to move transmitter locally; make changes in equipment; change frequency from 1200 kc. to 1210 kc.

NEW—Ellwood W. Lippincott, Bend, Ore.—Application for C. P. for new station, 1500 kc., 100 watts, daytime, site to be determined.

NEW—John Perkins Rabb, Lenoir, N. C.—Application for C. P. for new station, 1370 kc., 100 watts, daytime.

WAAW—Omaha Grain Exchange, Omaha, Nebr.—Consent to voluntary assignment of license to the Nebraska Broadcasting Co. Also application for renewal of license, 660 kc., 500 watts daytime, and temporary license granted pending hearing.

WHB—WHB Broadcasting Co., Kansas City, Mo.—Application for C. P. to install new equipment, directional antenna; change frequency from 860 kc. to 1120 kc., time of operation from daytime to unlimited, using 500 watts night, 1 KW day.

NEW—Voice of Marshall, Marshall, Tex.—Application for C. P. for new station, 1500 kc., 100 watts, daytime, specified hours.

NEW—Earle Yates, Las Cruces, N. Mex.—Application for C. P. for new station; 930 kc., 1 KW day, daytime only.

APPLICATIONS DENIED

KOOS—Pacific Radio Corp., Coosbay, Ore.—Denied request for authority to operate on frequency 1390 kc., with power of 250 watts daytime, at the present location, employing present antenna system.

WGST—Georgia School of Technology, Atlanta, Ga.—Denied authority to operate with a power of 1 KW, unlimited time, for a period not to exceed 30 days, employing the present antenna system.

APPLICATIONS RECEIVED

First Zone

WSYR-WSYU—Central New York Broadcasting Corp., Syracuse, N. Y.—License to cover construction permit (B1-P-813) to install new equipment.

NEW—The Niagara Falls Gazette Publishing Co., Niagara Falls, N. Y.—Construction permit to erect a new broadcast station to be operated on 630 kc., 250 watts power, daytime.

NEW—E. Anthony & Sons, Inc., Pawtucket, R. I.—Construction 1200 permit for a new station to be operated on 1200 kc., 100 watts, 250 watts day, unlimited time. Requests facilities of Station WNRI.

KGMB—Honolulu Broadcasting Co., Ltd., Honolulu, T. H.—1320 License to cover construction permit (B5-P-303) as modified to move transmitter and studio, install new equipment, and increase power.

NEW—Auburn Publishing Co., Auburn, N. Y.—Construction permit for a new station to be operated on 1420 kc., 100 watts, unlimited time.

NEW—The Northern Corporation, Chelsea, Mass.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000 kc., 100 watts.

Second Zone

WIP—Pennsylvania Broadcasting Co., Philadelphia, Pa.—Extension 610 of special experimental authorization to operate with 1 KW power from 3-1-36 to 9-1-36.

WGBI—Scranton Broadcasters, Inc., Scranton, Pa.—Extension of 880 special experimental authorization to operate with 250 watts additional power from 3-1-36 to 9-1-36.

WEST—Associated Broadcasters, Inc., Easton, Pa.—Modification of 1200 construction permit (B2-P-472) for move of transmitter and studio; make changes in antenna, requesting change in hours of operation from share-WKBO to unlimited day and share-WKBO night; and extend commencement and completion dates 30 days and 6 months, respectively.

NEW—Hershel Talbot Walton, East Liverpool, Ohio.—Construction permit for a new station to be operated on 1420 kc., 100 watts, unlimited time.

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—Authority to determine operating power by direct measurement of antenna power.

NEW—Allen T. Simmons, Village of Tallmadge, Ohio.—Construction permit for a new general experimental station for 30100, 34600, 40100 kc., 100 watts. Amended to show 31600, 35600, 38600, 41000 kc.

Third Zone

NEW—The Tribune Co., Tampa, Fla.—Construction permit for a new station to be operated on 550 kc., 1 KW night, 5 KW day, unlimited time.

NEW—The Constitution Publishing Co., Atlanta, Ga.—Construction permit for a new station to be operated on **590 kc.**, 1 KW, unlimited time.

WJAX—City of Jacksonville, Jacksonville, Fla.—Modification of **900** license to increase power from 1 KW night, 5 KW day, to 5 KW day and night.

KPRC—Houston Printing Co., Houston, Tex.—Authority to determine operating power by direct measurement of antenna power.

NEW—Theodore E. Johnson, Houston, Tex.—Construction permit **1210** for a new station to be operated on **1210 kc.**, 100 watts, unlimited time.

WMFJ—W. Wright Esch, Daytona Beach, Fla.—Construction permit **1210** to install a new transmitter and vertical antenna.

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—License to **1370** cover construction permit (B3-P-18) for changes in equipment, increase in power, and move of transmitter.

NEW—Isadore Goldwasser, Tuscaloosa, Ala.—Construction permit **1370** for a new broadcast station to be operated on **1370 kc.**, 100 watts, unlimited time.

KNET—John C. Welch, Wm. M. Keller, and Bonner Frizzell, d/b as Palestine Broadcasting Association, Palestine, Tex.—License to cover construction permit (B3-P-216) as modified for a new station to be operated on **1420 kc.**, 100 watts power, daytime operation.

KRLH—Clarence Scharbauer, Midland, Tex.—License to cover **1420** construction permit (B3-P-675) as modified for new station on **1420 kc.**, 100 watts power, daytime operation.

Fourth Zone

WCBD—WCBD, Inc., Waukegan, Ill.—Authority to transfer control of corporation from Wilbur Glenn Voliva, Ernest E. Harwood, M. J. Mintern to L. E. Moulds, W. F. Moss, Gene T. Dyer, E. M. Ringwald, 100 shares of common stock

NEW—Frank M. Dunham, Fort Dodge, Iowa.—Construction permit **1210** for a new station to be operated on **1500 kc.**, power not given, unlimited time. Amended to change frequency from **1500 kc.** to **1210 kc.**, giving power as 100 watts; change studio site from 908 First Ave. S. to 22 S. 10th St., Fort Dodge, Iowa.

NEW—Stanley Reid and Charles Withnell Boegel, Jr., Cedar Rapids, **1310** Iowa.—Construction permit for a new station to be operated on **1310 kc.**, 100 watts power, unlimited time.

KRNT—Iowa Broadcasting Co., Des Moines, Iowa.—Construction **1320** permit to install new equipment and increase power from 500 watts, 1 KW day, to 1 KW, 5 KW day, using directional antenna. (Consideration under Rule 6 (g)).

KSCJ—Perkins Brothers Co. (The Sioux City Journal), Sioux City, **1330** Iowa.—Construction permit to make equipment changes. Amended: Antenna and equipment changes; move transmitter from First and Bluff Sts., Sioux City, Iowa, to Sioux City, Iowa; increase power from 1 KW night, 2½ KW day, to 1 KW night, 5 KW day; and change time from simultaneous day WTAQ, specified hours night, to unlimited. Amended: Omit request for increase in power and changes in equipment.

NEW—Telegraph Herald, Dubuque, Iowa.—Construction permit to **1340** erect new station to be operated on **1340 kc.**, 500 watts power, daytime.

Fifth Zone

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Extension **710** of special experimental authorization to operate on **710 kc.**, 500 watts, unlimited time, from 2-1-36 to 8-1-36.

KIEV—Cannon System, Ltd., Glendale, Calif.—License to cover **850** construction permit (5-P-B-3268) as modified for new equipment and increase in power.

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Modification **920** of construction permit (B5-P-536) for new equipment, increase in day power, move transmitter, requesting extension of completion date from 2-25-36 to 4-25-36.

NEW—Lyman Peters Corp., Pasadena, Calif.—Construction permit **1160** for a new station to be operated on **1160 kc.**, 250 watts, daytime.

KWSC—The State College of Washington, Pullman, Wash.—Construction permit **1220** to make changes in equipment and increase power from 1 KW, 2 KW day, to 1 KW, 5 KW day.

KTW—First Presbyterian Church, Seattle, Wash.—Authority to **1220** install automatic frequency control.

KUJ—KUJ, Inc., Walla Walla, Wash.—Construction permit to **1250** change frequency from **1370 kc.** to **1250 kc.**, install new equipment, and move transmitter from Second and Rose Sts. to site to be determined, Walla Walla, Wash. Amended to change power from 1 KW to 250 watts.

KOOS—H. H. Hanseth, Inc., Marshfield, Ore.—Modification of **1390** license to change name from H. H. Hanseth, Inc., to Pacific Radio Corporation.

KOOS—H. H. Hanseth, Inc., Marshfield, Ore.—Construction permit **1390** to make changes in equipment; move transmitter from Hall Bldg., Marshfield, Ore., to ¼ mile from north city limits of Marshfield, Ore. (Filed in new name of Pacific Radio Corporation.)

DIRECTIONAL ANTENNA PERMITS

The Broadcast Division of the Federal Communications Commission has adopted the following policy in connection with applications for construction permits for broadcast facilities:

No application for a construction permit specifying a directional antenna will be accepted by the Commission unless a definite site and full details of the directional antenna are given with the application. Any application not complete in these details will be returned to the applicant as "incomplete" under Rules 104.1 and 103.9.

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

- A. E. Staley Manufacturing Co., Decatur, Ill. (2-1878, Form A-2)
- Trenton Valley Distillers Corp., Detroit, Mich. (2-1879, Form A-1)
- Fansteel Metallurgical Corp., North Chicago, Ill. (2-1882, Form A-2)
- International Vitamin Corp., New York City. (2-1883, Form A-1)
- Charles H. Frye, Seattle, Wash. (2-1884, Form E-1)
- Hupp Motor Car Corp., Detroit, Mich. (2-1885, Form A-2)
- California Oil & Land Corp., Los Angeles, Calif. (2-1886, Form A-1)
- Chicago and Southern Air Lines, Inc., Roberston, Mo. (2-1888, Form A-1)

RECOMMENDS NEW INDIANA STATION

The North Side Broadcasting Corporation has filed an application with the Federal Communications Commission asking for a construction permit for the erection of a new station at New Albany, Ind., to use 1370 kilocycles, 100 watts and 250 watts LS, and unlimited time.

Examiner George H. Hill, in Report No. I-188, has recommended that so much of the application be granted as to allow such a station to operate daytime hours only and "that the request for night-time hours of operation be denied."

The Examiner found that "the granting of the application for operation during daytime hours would not interfere with the fair and efficient radio service of any other station; however, the operation of the proposed station during night-time hours would result in objectionable interference with other existing stations."

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2690. Unfair competition through misrepresentation of its cosmetics and toilet preparations as being of English origin is alleged in a complaint issued against **Worthall, Ltd.**, 160 Fifth Avenue, New York City.

The respondent is alleged to have labeled its products as "Drury Lane," "English Lavendar," and "Distributed by Worthall, Ltd., London, Montreal, New York," whereas, the complaint charges, the respondent is neither a limited corporation nor an English company.

with offices in London and Montreal, but is a New York corporation. It is also alleged that the respondent's products are manufactured and compounded in the United States, principally of materials produced in this country, and not in England.

The alleged misrepresentation, the complaint says, has a tendency to mislead dealers and purchasers into the belief that the respondent's toilet preparations are genuine English products, when such is not the case, and tends to divert trade from competitors who truthfully represent their products.

Nos. 2691-2693. Alleging unfair methods of competition, complaints have been issued against **Angelo Cataldo**, trading individually and as **Liberty Chocolate Co.** and as **Arcadia Chocolate Co.**, 114 Commercial St., Boston, and against **Massachusetts Chocolate Co., Inc.**, 197 Norfolk Ave., Boston. The complaints charge that the respondents pack and assemble their candy in assortments so as to involve the use of a lottery scheme when sold and distributed to consumers.

Under the respondents' lottery methods, the purchaser, for one cent, always procures a piece of candy, but it is alleged the element of lot or chance enters into the transaction in that the purchaser, if he makes a lucky choice in the selection of a certain piece of candy, receives as a prize, without additional cost, a larger piece.

Many dealers in and consumers of the respondents' candies are induced by the lottery sales plans to purchase these candies, according to the complaint, and trade is diverted to the respondents from competitors who do not use lottery systems held contrary to an established public policy.

Stipulations

The Commission has issued the following cease and desist orders:

No. 01108. **French Clinical Laboratory and Supply Depot, San Antonio, Tex.**, dealing in medicinal products, has entered into a stipulation to cease and desist from the use of false and misleading advertising in the sale of its "FFP No. 22," offered as a remedy for athlete's foot. Under the agreement the respondent will discontinue representing that its medicated foot powder will prevent or cure or that it is a sure and safe remedy for athlete's foot, when such assertions are not true.

No. 2573. **International Sheffield Works, Inc.**, 22 West 27th St., New York City, engaged in the sale of silverware, or silver-plated ware, has been ordered to cease and desist from the use of a trade name which includes the word "Sheffield," until it actually manufactures and sells silver products produced by the copper-rolled plate process, generally known as "Sheffield."

The respondent corporation is directed, under the order, to cease representing in any manner, or suggesting directly or indirectly, that its product is "Sheffield," unless it is manufactured by the copper-rolled plate process which originated in Sheffield, England, and shows the place of origin.

No. 2582. Under an order issued, the **Pratt Food Co.**, 124 Walnut St., Philadelphia, engaged in manufacturing and selling dairy feed, is required to discontinue certain claims regarding "Superiodized B. P. Dairy Feed."

Claims that this particular product decreases the amount of feed necessary, builds up resistance to disease and is highly effective in the treatment of Bang's disease, will cease, under the order, and the respondent is prohibited further from representing that cows, when fed "Superiodized Dairy Feed," produce a richer, purer milk which is beneficial to tubercular patients and to infants.

No. 2616. An order to discontinue representing in advertising matter that "Cal-Aspirin" contains certain therapeutic properties lacking in ordinary aspirin has been issued against **Cal-Aspirin Corporation**, 160 E. Illinois St., Chicago.

The respondent is prohibited, under the order, from representing that "Cal-Aspirin" is less toxic and better tolerated than ordinary aspirin, or is a more prompt and efficient analgesic and anti-pyretic, and that it acts quicker and its effects last longer, also that it is safer and can be used in larger doses.

FEDERAL COMMUNICATIONS COMMISSION ACTION

The Broadcast Division of the Commission held no meeting on its regular meeting day this week but postponed it until later in the week.

HEARING CALENDAR

Monday, February 10

- NEW—Edwin A. Kraft, Fairbanks, Alaska.—C. P., 950 kc., 250 watts, unlimited time.
NEW—John A. Stump, Fairbanks, Alaska.—C. P., 1210 kc., 100 watts, 250 watts LS, unlimited time.
NEW—Northern Commercial Co., Fairbanks, Alaska.—C. P., 550 kc., 250 watts, unlimited time.

Friday, February 14

HEARING BEFORE AN EXAMINER (Broadcast)

- NEW—Carl S. Taylor, Dubois, Pa.—C. P., 780 kc., 250 watts, daytime.

APPLICATIONS RECEIVED

First Zone

- WCAO—Monumental Radio Co., Baltimore, Md.—Modification of 600 construction permit (B1-P-824) for changes in equipment, requesting move of transmitter 60 feet from present site at same address, and make changes in antenna.
NEW—North Jersey Broadcasting Co., Inc., Paterson, N. J.—Construction permit to erect a new station to be operated on 620 kc., 250 watts power, daytime.
WAWZ—Pillar of Fire, Zarephath, N. J.—Modification of license to 1350 increase power from 500 watts, 1 KW day, to 1 KW night and day.
W3XEY—The Baltimore Radio Show, Inc., Baltimore, Md.—Modification of construction permit giving exact transmitter site as Hotel Belvedere, southeast corner Chase and Charles Sts., Baltimore, Md.
WIEK—Atlantic Broadcasting Corp., New York, N. Y.—Construction permit to replace transmitter and increase power to 100 watts.
W1XAV—Shepard Broadcasting Service, Inc., Quincy, Mass.—License for 61500 kc., 100 watts.

Second Zone

- WIBM—WIBM, Inc., Jackson, Mich.—Construction permit to make 1370 changes in equipment and install a new vertical antenna system.
W8XWJ—The Evening News Assn., Portable-Mobile.—License to cover construction permit for a new general experimental station.

Third Zone

- WDBO—Orlando Broadcasting Co., Inc., Orlando, Fla.—Extension 580 of special experimental authorization to operate with 750 watts additional day power for period from 3-1-36 to 9-1-36.
WIOD-WMBF—Isle of Dreams Broadcasting Corp., Miami, Fla.—970 Construction permit to make changes in equipment; move transmitter from Collins Island, Miami Beach, Fla., to 600 Biscayne Blvd., Miami, Fla. Amended (see petition) requesting application be granted on temporary basis, pending final action on application for 970 kc. (B3-P-378).
WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—1120 Construction permit to install new equipment, increase power from 100 watts to 500 watts, change frequency from 1420 kc. to 1120 kc., change hours of operation from unlimited to specified hours. Facilities of WGCM (unlimited time, except from 8 to 9 p. m. on Monday and Friday nights).
WRDW—Augusta Broadcasting Co., Augusta, Ga.—Construction 1240 permit to make changes in equipment; move transmitter from 309 Eighth St., Augusta, Ga., to Satcher Estate on the edge of the city, North Augusta, South Carolina; change frequency from 1500 kc. to 1240 kc.; and increase power from 100 watts to 250 watts night, 1 KW day, using directional antenna at night if necessary. Amended to make equipment changes (mod. equip. to 500 watts maximum power); change height of antenna and omit request for directional antenna; change power from 250 watts, 1 KW day, to 250 watts night, 500 watts day.
KFYO—T. E. Kirksey, tr. as Kirksey Bros., Lubbock, Tex.—Vol-1310 untary assignment of license from T. E. Kirksey, tr. as Kirksey Brothers, to Plains Radio Broadcasting Co.
KGFG—Oklahoma Broadcasting Co., Inc., Oklahoma City, Okla.—1370 Authority to transfer control of corporation from Hale V. Davis to Harold V. Hough, 133⅓ shares of common stock.
NEW—C. W. Snider, Wichita Falls, Tex.—Construction permit for a new station to be operated on 1500 kc., 100 watts, unlimited daytime. Amended to request 100 watts, unlimited time.
NEW—Radio Station WSOC, Inc., Portable.—Construction permit for a new general experimental station to be operated on 31100, 34600, 37600, 40600 kc., 7 watts.
NEW—The Constitution Publishing Co., Atlanta, Ga.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000 kc., 100 watts.

Fourth Zone

- KMBC—Midland Broadcasting Co., Kansas City, Mo.—License to 950 use old 2½-KW transmitter for emergency purposes only.
WFAM—The South Bend Tribune, South Bend, Ind.—Modification 1200 of license to change time from share with WWAE to unlimited day to local sunset, share with WWAE night.
NEW—Black Hawk Broadcasting Co., Emmons L. Abeles, Secy., 1370 Waterloo, Iowa.—Construction permit for a new station to be operated on 1370 kc., 100 watts, unlimited time.
KWKC—Wilson Duncan, tr. as Wilson Duncan Broadcasting Co., 1370 Kansas City, Mo.—Voluntary assignment of license from Wilson Duncan, tr. as Wilson Duncan Broadcasting Co., to Tom Cleveland.

Fifth Zone

- KIRO—Queen City Broadcasting Co., Seattle, Wash.—Modification 710 of special experimental authorization to operate on 710 kc., unlimited time, 1 KW power instead of 500 watts.
KHJ—Don Lee Broadcasting System, Los Angeles, Calif.—Modification of license to change power from 1 KW to 5 KW day and night (5 KW granted on C. P.).
KGEK—Elmer G. Beehler, Sterling, Colo.—Modification of license 1200 to change specified hours to include 1:30 p. m. to 2:00 p. m. Saturdays.
KRE—First Congregational Church of Berkeley, Berkeley, Calif.—1370 Voluntary assignment of license from First Congregational Church of Berkeley to Central California Broadcasters, Inc.

KFBK—James McClatchy Co., Sacramento, Calif.—Authority to 1490 determine operating power by direct measurement of antenna power.

NEW—Don Lee Broadcasting System, Portable.—Construction permit for general experimental station for 31600, 35600, 38500, 41000 kc., 100 watts.

No Zone

NEW—Foreign Lands Corp., Honolulu, Hawaii.—Construction permit for a new station to be operated on 600 kc., 1 KW, unlimited time. Amended to give transmitter site to be determined, Honolulu, Hawaii.

STATE OF WASHINGTON VS. ASCAP

In response to numerous demands from NAB members for copies of the proceedings in the case of State of Washington vs. ASCAP, there are printed below copies of the original Complaint filed in the Superior Court of the State of Washington; Temporary Restraining Order and Order to Show Cause, motion for Restraining Order and affidavits in support thereof; memorandum decision by Judge Cushman of the United States District Court remanding the case; Receiver's Report to the Superior Court of the State of Washington and Supplemental Order of this Court.

IN THE SUPERIOR COURT OF THE STATE OF WASHINGTON FOR THURSTON COUNTY

No. 16114—SUMMONS

STATE OF WASHINGTON, EX REL, G. W. HAMILTON, Attorney-General, *Plaintiff*,

v.

AMERICAN SOCIETY OF COMPOSERS, AUTHORS AND PUBLISHERS, an unincorporated association; GENE BUCK, its President; LOUIS BERNSTEIN, its Vice-President; JEROME KERN, its Vice-President; JOSEPH YOUNG, its Secretary; ROBERT CRAWFORD, its Assistant Secretary; SAUL H. BORNSTEIN, its Treasurer; SIGMUND RUMBERG, its Assistant Treasurer; NATHAN BURKAN, its counsel; E. C. MILLS, General Manager; JOHN L. STANLEY; KXRO, Inc., a corporation; KVOS, Inc., a corporation; KGY, Inc., a corporation; SEATTLE BROADCASTING CO., a corporation; RADIO SALES CORPORATION, a corporation; KVL, Inc., a corporation; SPOKANE BROADCASTING CORPORATION, a corporation; SYMONS BROADCASTING CO., a corporation; LOUIS WASMER, Inc., a corporation; KMO, Inc., a corporation; KUJ, Inc., a corporation; WESTCOAST BROADCASTING CO., a corporation; CARL E. HAYMOND d/b/a Radio Station KIT, a corporation, *Defendants*.

THE STATE OF WASHINGTON, To the said American Society of Composers, Authors and Publishers, an unincorporated association; Gene Buck, its President; Louis Bernstein, its Vice-President; Jerome Kern, its Vice-President; Joseph Young, its Secretary; Robert Crawford, its Assistant Secretary; Saul H. Bornstein, its Treasurer; Sigmund Rumberg, its assistant treasurer; Nathan Burkan, its Counsel; E. C. Mills, General Manager; John I. Stanley; KXRO, Inc., a corporation; KVOS, Inc., a corporation; KGY, Inc., a corporation; SEATTLE BROADCASTING CO., a corporation; RADIO SALES CORPORATION, a corporation; KVL, Inc., a corporation; SPOKANE BROADCASTING CORPORATION, a corporation; Symons Broadcasting Co., a corporation; Louis Wasmer, Inc., a corporation; KMO, Inc., a corporation; KUJ, Inc., a corporation; Westcoast Broadcasting Co., a corporation; Carl E. Haymond D/B/A Radio Station KIT, a corporation, *Defendants*:

You are hereby summoned to appear, within twenty days after the service of this summons upon you, exclusive of the day of service, and defend the above entitled action in the court aforesaid, and answer the complaint of the Plaintiff, and serve a copy of your answer upon the undersigned attorneys for Plaintiff, at their office below stated; and in case of your failure so to do, judgment will be rendered against you according to the demand of the complaint, which will be filed with the clerk of said court (a copy of which is herewith served upon you).

G. W. HAMILTON,
Attorney-General.
E. P. DONNELLY,
Assistant Attorney-General.

Postoffice Address: Temple of Justice, Olympia, Thurston County, Washington.

IN THE SUPERIOR COURT OF THE STATE OF WASHINGTON IN AND FOR THURSTON COUNTY

No. 16114—COMPLAINT

STATE OF WASHINGTON, EX REL, G. W. HAMILTON, Attorney-General, *Plaintiff*,

v.

AMERICAN SOCIETY OF COMPOSERS, AUTHORS AND PUBLISHERS, an unincorporated association; GENE BUCK, its President; LOUIS BERNSTEIN, its Vice-President; JEROME KERN, its Vice-President; JOSEPH YOUNG, its Secretary; ROBERT CRAWFORD, its Assistant Secretary; SAUL H. BORNSTEIN, its Treasurer; SIGMUND ROMBERG, its Assistant Treasurer; NATHAN BURKAN, its counsel; E. C. MILLS, General Manager; JOHN L. STANLEY; KXRO, Inc., a corporation; KVOS, Inc., a corporation; KGY, Inc., a corporation; SEATTLE BROADCASTING CO., a corporation; RADIO SALES CORPORATION, a corporation; KVL, Inc., a corporation; SPOKANE BROADCASTING CORPORATION, a corporation; SYMONS BROADCASTING CO., a corporation; LOUIS WASMER, Inc., a corporation; KMO, Inc., a corporation; KUJ, Inc., a corporation; WESTCOAST BROADCASTING CO., a corporation; CARL E. HAYMOND d/b/a Radio Station KIT, a corporation, *Defendants*.

Comes now G. W. HAMILTON and respectfully represents that he is the duly elected, qualified and acting Attorney General of the State of Washington, and that he prosecutes this suit in behalf of the State of Washington and respectfully informs the Court as follows:

I.

That the State of Washington is one of the sovereign States of the United States of America.

II.

That defendant, AMERICAN SOCIETY OF COMPOSERS, AUTHORS AND PUBLISHERS, hereinafter referred to as the "Society," is an unincorporated membership association of music composers, authors and publishers which has an office at 1501 Broadway, Borough of Manhattan, New York City, State of New York, but is actually engaged in and transacting business in the form and manner of a corporation in the State of Washington, with its principal Washington office at 652 Skinner Building, Seattle, Washington; that under the Laws of New York, Code of Civil Procedure, Section 1919, the President of an unincorporated association, such as the Society, is expressly authorized to maintain and defend actions at law and suits in equity on behalf of such association; that the Defendant, John L. Stanley, has been and is authorized by the Society, to represent the Society in the State of Washington in the transaction of its business and in the maintenance and defense of actions at law and in equity and is authorized under by the Laws of the State of New York, to defend this action on behalf of such association.

III.

That the Defendant Society transacts business under a form of organization substantially the same as that of a corporation, and acts through officials duly elected and qualified as though they were the officers of a corporation. That the membership of the Society comprises approximately 100 publishers and approximately 780 composers, all of whom are made Defendants in this suit, and the names of the membership of the Society is hereto attached, marked Plaintiff's Exhibit "A", and by this reference is made a part hereof.

IV.

That the Defendant, John L. Stanley, is the duly qualified and acting District Manager of the Society, domiciled in the State of Washington, in the City of Seattle therein, and that as said District Manager, the said John L. Stanley is the Agent of the Society authorized to and actually transacts the business of the Society in the State of Washington, with his principal office as hereinbefore alleged.

V.

That Defendant, KXRO, Inc., a corporation organized under the Laws of the State of Washington, operates a radio station with the call letters KXRO at Seattle; that the Defendant, KVOS, Inc., a

corporation organized under the Laws of the State of Washington, operates a radio station with the call letters KVOS at Bellingham; that the Defendant, KGY, Inc., a corporation organized under the Laws of the State of Washington, operates a radio station with the call letters KGY at Olympia; that Defendant, SEATTLE BROADCASTING COMPANY, a corporation organized under the Laws of the State of Washington, operates a radio station with the call letters KOL at Seattle; that Defendant, RADIO SALES CORPORATION, a corporation organized under the Laws of the State of Washington, operates a radio station with the call letters KRSC at Seattle; that Defendant, KVL, Inc., a corporation organized under the Laws of the State of Washington, operates a radio station with the call letters KVL at Seattle; that Defendant, SPOKANE BROADCASTING CORPORATION, a corporation organized under the Laws of the State of Washington, operates a radio station with call letters KFIO at Spokane; that Defendant, SYMONS BROADCASTING COMPANY, a corporation organized under the Laws of the State of Washington, operates a radio station with the call letters KFPY at Spokane; that Defendant, LOUIS WASMER, Inc., a corporation organized under the Laws of the State of Washington, operates two radio stations with the call letters KGA and KHQ at Spokane; that Defendant, KMO, Inc., a corporation organized under the Laws of the State of Washington, operates a radio station with the call letters KMO at Tacoma; that Defendant, KUJ, Inc., a corporation organized under the Laws of the State of Washington, operates a radio station with the call letters KUJ at Walla Walla; that Defendant, WESTCOAST BROADCASTING COMPANY, a corporation organized under the Laws of the State of Washington, operates a radio station with the call letters KPQ at Wenatchee; that Defendant, CARL E. HAYMOND d/b/a radio station KIT at Yakima, Washington, individually, and not as a corporation.

VI.

That in or about the year 1918, the Defendant Society and its members organized said Society into a combination which includes approximately fifty per cent of the leading publishers of copyrighted musical compositions in the United States who control and own approximately ninety-five per cent of the copyrighted *acceptable* and popular musical compositions published in the United States; that said popular and *acceptable* music is that music which appeals to the great mass of the population in the State of Washington, as distinguished from standard church, educational, or other musical compositions.

VII.

That said Defendant Society and its members, acting through its Agents, its Board of Governors and Trustees, and its individual members, and sundry other persons including hired agents and representatives, have for several years last past, within the confines of the State of Washington, and continuously since that time, been engaged in and is now engaged in a nefarious combination and conspiracy to restrain trade and commerce in the State of Washington, and have been functioning actually as an illegal monopoly and trust within said State in violation of the Constitution and the Laws of the State of Washington.

VIII.

That every member agent and representative of said Society and all of those persons acting by, through, or under them, whether knowingly or unknowingly, has created, maintained and utilized said Defendant Society and its membership as an instrumentality for business suppression, business coercion, business compulsion, and for promoting and maintaining an illegal combination and conspiracy, in collaboration with others, for the purpose of fixing the price and limiting the production of musical compositions and the public performing thereof, within the State of Washington and its confines.

IX.

That all the members of the said Defendant Society have transferred, combined and pooled with said Defendant Society their rights under copyrights and other proprietary rights, including performing rights, for profit or otherwise, in said Society, or in those rights which any member during the term of his agreement and contract with said Society may write, compose, acquire for publication or copyright, whether alone or in collaboration with others, for the sole and exclusive purpose of permitting said Defendants and each of them, particularly the member officers and agents of said Society, to fix and control the price of said musical compositions and the performing rights therein, within the State of Washington.

X.

That said Defendant Society has for many years prior hereto, and has now, a complete monopoly of the right to license for public performance for profit all of the musical compositions of all of its members, aggregating an unknown number of musical compositions, which Defendant has at all times herein refused and still refuses to furnish a list to its licensees or to any person so that competition and trade may be free and untrammelled.

XI.

That all competition and free and wholesome bargaining between the members of said Society and the public at large has been eliminated and stifled by this said illegal combination, conspiracy and monopoly herein described; that the public at large has been unable to negotiate for the purchase of the right to use any particular copyrighted musical composition with the individual members of said Defendant Society separately and individually, but have been and are now obliged, compelled, coerced and forced to acquire from said Defendant Society, upon terms and conditions arbitrarily and viciously fixed by it, a general license to perform publicly all of said copyrighted musical compositions whether the public likes them all or not; that said pool and combination exists, among other purposes, in order to force the licensees and the public to take musical numbers of no value on the same terms as must be paid for those compositions of great value.

XII.

That the members of said Society, its Agents, its hired representatives of every name and description, have illegally agreed and conspired among themselves to establish and maintain, pursuant to secret agreements among themselves, and by means of pooling their individual copyrights, monopolies and trusts, non-competitive prices and royalties, for licenses to publicly perform copyrighted musical compositions owned and controlled by said Defendants, their members, or their Agents, which combination and pool represents, as Complainant believes, ninety-five per cent of the *acceptable* music in the world.

XIII.

That by reason of the said combination herein outlined, it is utterly impossible for any member of the public, or any person not a member of said Society, to acquire control over the public performance rights of any copyrighted musical composition, without paying the defendants' arbitrary price.

XIV.

That all members of defendant Society have adopted the means and engaged in the activities aforesaid, with the intent, purpose, and effect of unreasonably and unlawfully maintaining enhanced, uniform, and oppressive prices, and have otherwise restrained trade and commerce in the State of Washington.

XV.

That all members of defendant Society, through the mutual and identical agreements hereinbefore described, have actively and effectively restricted their own activities, have eliminated competition among themselves, and have created, maintained and utilized defendant Association as instrumentalities to dominate and restrict, directly and indirectly, the activities of others in commerce, as heretofore described.

XVI.

The members of defendant Society, through the combination and illegal pooling of their respective individual copyright monopolies hereinbefore described, have created in defendant Society an instrumentality which has the power to and does dictate to and dominate the radio industry, the hotel industry, and entertainment enterprises and other business industries within the confines of the State of Washington in violation of the Constitution and Laws of said State.

XVII.

That Defendants propose to carry on said combinations and conspiracies in the manner heretofore described unless restrained.

XVIII.

That every member of defendant Society has created, maintained and utilized defendant Society as an instrumentality for promoting and maintaining the illegal combination and conspiracy herein described. They have created defendant Society as such instrumentality with a self-perpetuating board of directors, have vested in the twenty-four persons constituting such board the exclusive con-

trol and operation of the activities of defendant Society and have restricted membership in defendant Society to such composers, authors and publishers as may be approved by the Board of Directors. All members of defendant Society have transferred to and pooled in defendant Society for the period ending December 31, 1935, the sole and exclusive right to perform publicly all musical compositions of which they are the copyright proprietors, or which any member, either alone or jointly or in collaboration with others, wrote, composed, published, acquired or owned, or in which any member has any right, title, interest or control whatsoever, in whole or in part, or which any member, during the term of the agreement, may write, compose, acquire, own, publish, or copyright, either alone, jointly, or in collaboration with others, or in which any member may at any time, during the term of the agreement, have any right, title, interest or control, either in whole or in part. All members of defendant Society have vested in defendant Society absolutely until and including December 31, 1935, the sole and exclusive right to license others to perform publicly for profit all their musical compositions. Defendants intend to continue such pool of public performance rights by an extension of the existing agreements or by new agreements.

XIX.

That Defendant Society since September 1, 1932, and for many years prior thereto, has had and now has a complete monopoly of the right to license for public performance for profit all the musical compositions of all its members, aggregating an unknown number of musical compositions; defendant Society has at all times herein mentioned refused and now refuses to furnish to its licensees lists of such musical compositions. All competition among members of defendant Society in the sale of rights to perform publicly their respective musical compositions, which, but for the illegal combination and conspiracy herein described, would have existed, has been eliminated by said illegal combination and conspiracy; that radio broadcasting stations, advertisers desiring to utilize the service of such stations to promote the sale of their merchandise, orchestras, theatres, and others desiring the right to perform publicly the copyrighted musical compositions of members of defendant Society, have been unable to negotiate for the purchase of the rights to use such copyrighted musical compositions with members of defendant Society, separately and individually, but have been and are obliged and compelled to acquire from defendant Society, upon terms and conditions arbitrarily fixed by it, a general license to perform publicly the copyrighted musical compositions of all members of defendant Society.

XX.

That the members of defendant Society have agreed to establish and maintain, and pursuant to such agreement have established and maintained, by means of the pooling of their individual copyright monopolies, enhanced and non-competitive prices or royalties for licenses to perform publicly copyrighted musical compositions owned and controlled by individual defendants. Competition between members of defendant Society in the sale of licenses to perform publicly their individual musical compositions has been eliminated, and because of the combined power obtained by them through the unlawful pooling of their individual copyright monopolies, the members of defendant Society have concertedly refused and still refuse, through defendant Society, to license the public performance by radio broadcasting stations or otherwise of any copyrighted musical composition owned and controlled by a member of defendant Society, except on the basis of a general license covering any and all musical compositions of all members and except upon the basis of an arbitrary royalty for such general license, fixed and determined by the aforesaid self-perpetuating board of directors of defendant Society. By reason of the facts herein alleged defendant Society has acquired control over the public performance of so great a number of copyrighted musical compositions that it is impossible for a radio broadcasting station to operate without using at some time some musical composition so controlled by members of defendant Society. Broadcasting stations must either accept a license from defendant Society upon any terms and conditions imposed by defendant Society, or subject themselves to numerous infringement suits in which they may be compelled to pay not less than the minimum damages of Two Hundred Fifty (\$250) Dollars for each infringement, provided for in the copyright laws of the United States.

XXI.

That each year for a number of years prior to September 1, 1932, members of defendant Society, through it, have concertedly demanded and have received from radio broadcasting stations increased amounts as royalties for licenses to perform publicly copyrighted musical compositions owned and controlled by members of defendant

Society. That on or about April 11, 1932, members of defendant Society, through defendant Society, notified all radio broadcasting stations in the State of Washington that, on and after June 1, 1932, defendant Society would issue to broadcasting stations only a general license covering all musical compositions of all members of defendant Society, which license would require the payment annually as royalty of a sum approximately equal to the annual royalty theretofore paid by them, and in addition thereto, five per cent of the gross income of the broadcasting station from whatever source derived. That this represented an increase of approximately 400 per cent in so-called "Royalty" payments over the aggregate royalty demanded for the previous year. That protests were made by the broadcasting stations to defendant Society and the then existing licenses were temporarily extended to September, 1932. Thereupon efforts were made by the broadcasting stations to obtain licenses providing for royalty payments by each station based on the number of performances by such station of copyrighted musical compositions owned and controlled by defendant members of defendant Society. The members of defendant Society, through defendant Society, refused to agree to royalty payments based upon the actual use made of their musical compositions. Other proposals submitted by the broadcasting stations were also rejected by defendants. Each broadcasting station, in order to use the copyrighted musical compositions controlled by defendant Society and to avoid a multiplicity of infringement suits, was compelled to accede to the demands of defendant Society and to accept from defendant Society a three-year blanket license agreement, commencing in or about September, 1932, covering all musical compositions of all members of defendant Society, upon then basis of a royalty payment approximately equal to the fixed annual royalty paid for the preceding year, plus three per cent of the station's net receipts during the first year of the agreement, four per cent of such receipts during the second year, and five per cent of such receipts during the third year. As defined in said agreement, "net receipts" constitute the full amount paid to the station for the use of its broadcasting facilities, after deducting commissions not exceeding fifteen per cent, if any, paid to an independent advertising agent or agency; that members of defendant Society threaten further increases in the royalty amounts to be demanded from broadcasting stations after August 31, 1935. The percentage of income demanded by members of defendant Society from radio broadcasting stations represents a percentage of the entire income received by such broadcasting stations for the sale to advertisers of their operating time on the radio; that such demand for the payment of these percentages constitutes a charge upon income received by radio broadcasting stations from their time devoted to the broadcasting of lectures, dramatizations, sporting events, and other programs, which employ none of the copyrighted musical compositions of the members of defendant Society.

XXII.

That Defendant Society has created a distinction and discrimination between the license agreements exacted of radio broadcasting stations owned at least 51 per cent by newspapers, and license agreements exacted from radio broadcasting stations not so owned in other sections of the nation; that the license agreement exacted by defendant Society from broadcasting stations owned 51 per cent by newspapers does not require payment to defendant Society of a percentage of the station's income derived from all advertisers, but only requires the payment of 3 per cent of the income of the station received from advertisers whose programs include musical compositions owned or controlled by members of defendant Society; that such three per cent is payable until the total amount paid by the station equals an amount agreed upon between the station and defendant Society in the agreement. Thereafter the station is required to pay 5 per cent of all additional income received by it from programs in which musical compositions owned or controlled by members of defendant Society are used. The terms of all the license agreements permit the copyright owner, through defendant Society, to withdraw at will from the operation of the license any musical composition and thereby prevent its broadcast by the broadcasting station. By this means members of defendant Society are enabled to and do frequently so withdraw any musical compositions in great demand by the general public. Special and additional compensation is required for the granting of permission to broadcast musical compositions so withdrawn. Withdrawal of the right under the licenses to broadcast particular compositions is often used by members of defendant Society particularly to compel radio broadcasting stations to broadcast other and less popular music compositions for which publicity is desired. Radio broadcasting stations are obliged to accept all terms and conditions imposed by members of defendant Society for the right to broadcast popular musical compositions which have been withdrawn from their general license because a

station's continued existence depends upon the popularity of the programs it broadcasts.

XXIII.

That by reason of the combination and conspiracy and the concerted action of members of defendant Society, as a result of which radio broadcasting stations are obliged to accept a blanket license as heretofore stated upon terms and conditions imposed by defendant Society, the members of defendant Society have secured the exclusive use of radio broadcasting as a means of conveying musical compositions to the ear of the public-at-large. By the means described the members of defendant Society have destroyed the incentive of broadcasting stations to use the musical compositions of composers, authors, and publishers who are not members of defendant Society and have prevented non-members of defendant Society from receiving the compensation for the rights at public performance of their musical compositions, which they would otherwise receive, and have limited and restricted the popular demand of the listening public to musical compositions controlled by defendant Society.

XXIV.

That the members of defendant Society, through defendant Society, have been and are enabled to enforce, and have been and are now enforcing, acceptance of their arbitrary and non-competitive demands for royalties upon all classes of entertainers using music. Such entertainers must perform those musical compositions demanded by their audiences. The limitation and restriction of popular demand to the musical compositions controlled by defendant Society has forced such entertainers to obtain from defendant Society, a license to perform music controlled by defendant Society so demanded by the public. The members of defendant Society, through defendant Society, have concertedly refused to grant such entertainers permission to perform individual musical compositions selected by the entertainers, but have insisted and still insist that general licenses be accepted which cover all the musical compositions of all the members of defendant Society, upon payment of a fixed amount therefor, irrespective of whether one or more of such musical compositions are actually performed. By this method of licensing, the members of defendant Society have further restricted the popular demand to those musical compositions owned or controlled by the members of defendant Society, and have prevented the use of musical compositions owned by non-members of defendant Society and who reside in the State of Washington.

XXV.

That by reason of the concerted action of the members of defendant Society in refusing to issue licenses for the public performance of musical compositions owned or controlled by them, except upon the terms and conditions above set forth, the members of defendant Society have prevented and are preventing the sale of musical scores owned by composers, authors and publishers who are not members of defendant Society in the State of Washington.

XXVI.

That Defendant Society has adopted and maintained a comprehensive system for the acquiring of detailed and complete information relative to the musical compositions used by broadcasting stations, by means of which information the members of defendant Society have been and are enabled to conduct their operations through defendant Society so as to prevent the development of competition between members of defendant Society and owners of copyrighted musical compositions who are not members of defendant Society, and have been and are enabled to maintain their combined power to compel radio broadcasting stations and all others requiring music in the conduct of their business to obtain licenses from defendant Society for the public performance of musical compositions owned or controlled by the members of defendant Society upon such terms and conditions as may be demanded by defendant Society.

XXVII.

That the members of defendant Society have agreed to restrict and withdraw at the will of the copyright owner, from radio broadcasting stations licensed by defendant Society the right to perform by broadcasting any individual musical composition and have so restricted and withdrawn musical compositions from broadcasting in order to enforce their demands for royalties from others. By this means members of defendant Association, through defendant, John L. Stanley, acting as agent and trustee for such members and others, has maintained and utilized defendant Society as an instrumentality of oppression, monopoly and trust.

XXVIII.

That the Defendant Association as pleaded aforesaid has avoided and breached the laws and Constitution of the State of Washington, and continues so to do by transacting its business in this State with the citizens thereof, among them the Defendant Radio Stations as hereinbefore named, and without submitting to the control and regulation of the Laws of this State.

XXIX.

That the Defendant Radio Stations, among other citizens of the State of Washington, have at all times hereinbefore mentioned, continued to aid, abet and contribute to the illegal and unlawful monopoly and trust of said defendant Society and its members as hereinbefore pleaded; that each and every radio station named as a Defendant in this action by voluntarily submitting to and becoming a party to the said illegal combination and trust, whether by contract or license, has made it possible and now makes it possible for Defendant Society to control and fix prices and limit free trade and competition in the sale of the performing rights of all musical compositions, to the detriment of the citizens of the State of Washington, and against the peace and dignity of said state, and with the result of effectually enabling Defendant Society and its agents, members and officers, to avoid the control which the duly constituted officers and authorities of the State of Washington should assert over them, and, therefore, are parties to the successful conclusion of the illegal combination, monopoly and trust, as is operated by said Society and its members.

XXX.

That as a result of the participation of said Defendants and each of them in the said illegal conspiracy, monopoly and trust, defendant Society has been effectually enabled to fix and control prices and limit production, contrary to the intent and meaning of the Constitution of the State of Washington, and that unless all of the Defendants are restrained by this Honorable Court, said Society will continue to operate in disobedience to the laws of this State, and said Defendant Radio Stations will continue to aid and abet said illegal monopoly and trust by paying to said Society various and sundry sums of money, all of which is to the detriment of the people of the State of Washington, and with the result of making it possible for the defendant Society to continue to regulate, fix and control prices and limit production and to carry on its said illegal combination, conspiracy, monopoly and trust, as hereinbefore alleged.

XXXI.

That the Complainant has no plain, speedy and adequate remedy at law, and unless a restraining order is granted against the defendants, and each of them, as hereinbefore requested, the people of the State of Washington will be subjected to irreparable harm, damage and injury, and the business of the defendants, and each of them, as conducted, as hereinbefore set forth, will be and is a detriment to the people of the State of Washington, and against public policy and public interest.

WHEREFORE PETITIONER PRAYS:

1. That the combinations, conspiracies, agreements and activities of the defendants described in this petition be declared to be and do constitute a conspiracy and monopoly in restraint of trade and commerce, and are illegal and in violation of the Constitution and Laws of the State of Washington, and that all agreements and licenses between the Society and the Defendant Radio Stations and various and other sundry individuals, firms and corporations, with whom the Society has dealt, and with whom they threaten to deal with in the future, be declared to be illegal and void.

2. That defendants and each of them, and each and all of their respective members, officers, managers, agents, employees, and all persons acting or claiming to act for or on behalf of them, or any of them, be perpetually enjoined individually and collectively,

a. From further engaging in, agreeing to perform, or performing, said conspiracy or any part thereof, or any other conspiracy of like character or effect, or any of the acts, agreements, understandings or concerts of action described in this petition;

b. From entering into any agreements or licenses for the public performance of musical compositions owned and controlled by them, or any of them, providing for the payment of royalty determined upon any basis except such as is predicated upon free and open competition between copyright owners with the royalty on individual musical compositions fixed and determined by the copyright owner thereof acting independently in his or its own discretion;

- c. From joining, becoming a part of, or in any manner becoming associated with, any association, firm or corporation for the issuing of general or blanket agreements, or licenses to perform publicly musical compositions, unless the facilities of such association, firm or corporation are open to all owners of copyrighted musical compositions upon an identical and equal basis and unless the general or blanket agreements or licenses issued or to be issued by such association, firm or corporation shall provide for the payment by the licensee of such royalty as is fixed and determined by the copyright owner of each musical composition publicly performed by such licensee;
- d. From commencing or prosecuting any suits or actions for alleged infringement of copyright against any licensee whose agreements or license may be declared illegal and void herein.

3. That a temporary restraining order be issued and directed to said defendant Society and its members and to Defendant, John L. Stanley, and to each and every one of them, restraining and enjoining them from conducting their business as hereinbefore alleged and that said radio stations be restrained from making any further payments whatever to the Society, or any person acting on its behalf, or from permitting the Society, or any person on its behalf, to have access to the books and records of Defendant Radio Stations, or from making any further agreements whatever with the Society, and from doing any other act according to the terms of any agreement now in existence, except to preserve the status quo thereof, until further order of Court, and that on the return hereof, the Court should grant a temporary injunction, and that after a hearing on the merits, said temporary injunction should be made permanent.

4. That the petitioner have such other, further and general relief as the nature of the case may require and the Court may deem proper in the premises, together with costs.

G. W. HAMILTON,
Attorney General of the State of Washington; and
E. P. DONNELLY,
Assistant Attorney General,
Attorneys for Plaintiff.

State of Washington } ss.

Notary Public in and for the State of Washington, residing at Olympia.

IN THE SUPERIOR COURT OF THE STATE OF WASHINGTON FOR THURSTON COUNTY

NO. 16114—TEMPORARY RESTRAINING ORDER AND ORDER TO SHOW CAUSE

STATE OF WASHINGTON, EX REL, G. W. HAMILTON, Attorney-General, *Plaintiff,*

v.

AMERICAN SOCIETY OF COMPOSERS, AUTHORS AND PUBLISHERS, an unincorporated association; GENE BUCK, its President; LOUIS BERNSTEIN, its Vice-President; JEROME KERN, its Vice-President; JOSEPH YOUNG, its Secretary; ROBERT CRAWFORD, its Assistant Secretary; SAUL H. BORNSTEIN, its Treasurer; SIGMUND RUMBERG, its Assistant Treasurer; NATHAN BURKAN, its counsel; E. C. MILLS, General Manager; JOHN L. STANLEY; KXRO, Inc., a corporation; KVOS, Inc., a corporation; KGY, Inc., a corporation; SEATTLE BROADCASTING CO., a corporation; RADIO SALES CORPORATION, a corporation; KVL, Inc., a corporation; SPOKANE BROADCASTING CORPORATION, a corporation; SYMONS BROADCASTING CO., a corporation; LOUIS WASMER, Inc., a corporation; KMO, Inc., a corporation; KUJ, Inc., a corporation; WESTCOAST BROADCASTING

CO., a corporation; CARL E. HAYMOND d/b/a Radio Station KIT, a corporation, *Defendants.*

This matter coming on for hearing on the application of the state of Washington for this temporary restraining order and it appearing to the court that the matter is of public importance and the ends of justice require the issuance of this order and it appearing from the affidavits accompanying the motion for this order that the defendant, society, has its principal office in New York and that, therefore, a reasonable time should be given to the said society and other defendants involved to fully present the merits of this controversy and it appearing that no bond is required of the state of Washington and that the importance of this case is such as to justify the taking of oral testimony on oath in open court in addition to such affidavits as counsel for any party may wish to file on the return of this order NOW THEREFORE

IN THE NAME OF THE STATE OF WASHINGTON, IT IS BY THE COURT ORDERED, ADJUDGED AND DECREED, That you, American Society of Composers, Authors and Publishers, and each and every director, officer, member, manager or agent thereof and particularly you, John L. Stanley, be and each of you hereby are restrained until further order of this court from making any new agreements whatever with any individual or corporation in the state of Washington for the use of copyrighted music controlled by you; From making any collections or receiving any money from any person or corporation in the state of Washington on any agreement now in existence whereby the society is to receive money for the use of copyrighted music controlled by it and particularly you are restrained from having any access to the books of defendant broadcasting stations named in this action from making any other or further agreement with said broadcasting stations regarding the use of copyrighted music; from receiving or accepting any moneys whatever from said radio broadcasting stations and from taking any action in any court whatever in any way effecting the use of copyrighted music of said radio broadcasting stations and from doing any other thing which may in any way hinder the true presentment of the facts as to your method of doing business on the return of this order and specifically are you and each of you restrained from taking any step whatever to embarrass defendant radio broadcasting stations in the conduct of their business either by attempting to collect money from them or by attempting to prohibit the use of copyrighted music, until further order of this court.

IN THE NAME OF THE STATE OF WASHINGTON, IT IS FURTHER ORDERED, ADJUDGED AND DECREED, That you, KXRO, Inc., a corporation; KVOS, Inc., a corporation; KGY, Inc., a corporation; SEATTLE BROADCASTING CO., a corporation; RADIO SALES CORPORATION, a corporation; KVL, Inc., a corporation; SPOKANE BROADCASTING CORPORATION, a corporation; SYMONS BROADCASTING CO., a corporation; LOUIS WASMER, Inc., a corporation; KMO, Inc., a corporation; KUJ, Inc., a corporation; WEST-COAST BROADCASTING CO., a corporation; CARL E. HAYMOND d/b/a Radio Station KIT, a corporation; and each of you be and you hereby are restrained until further order of this court from in any manner making any further payments to defendant society or any of its members, directors, officers, agents or legal representatives, until further order of this court and that you and each of you hereby are restrained from allowing any of the members, agents or representatives of said society to have any access to your books until further order of this court and you are likewise restrained from making any new agreement whatever with said society or any of its members or representatives and you are restrained until further order of this court from doing any act or series of acts other than to continue the use of the copyrighted music controlled by the society, keeping a record of what music is used without making any payments whatever on existing agreements or contracts and without making any new agreements or contracts until the legality of said agreements and contracts and the legality of the business methods of the society, is determined in this action.

IN THE NAME OF THE STATE OF WASHINGTON, IT IS FURTHER ORDERED, ADJUDGED AND DECREED, That each of the defendants named in the caption of this action and in this restraining order, be and appear in this court on the 22d day of July at 10 o'clock A.M., then and there to show cause if any, they or any of them may have, why this temporary restraining order should not be continued in force and effect until the trial of this action on the merits and that at said time and place you and each of you be prepared with such a showing as you may desire, by way of affidavit or oral testimony, and you and each of you are hereby notified that on account of the public importance of the issues presented and the fact that the interests of defend-

ants in other states are effected, the court has given in its opinion sufficient time to allow for a complete presentation of the pertinent facts on the return of this order. This order shall be effective without the requirement of a bond by virtue of chapter 122, Laws of Washington for 1935.

Done in open court this 24th day of June, 1935.

D. F. WRIGHT,
Judge.

IN THE SUPERIOR COURT OF THE STATE OF
WASHINGTON FOR THURSTON COUNTY

NO. 16114—MOTION AND AFFIDAVIT FOR RESTRAIN-
ING ORDER

STATE OF WASHINGTON, EX REL, G. W. HAMILTON, Attorney-
General, *Plaintiff*,

v.

AMERICAN SOCIETY OF COMPOSERS, AUTHORS AND PUBLISHERS, an unincorporated association; GENE BUCK, its President; LOUIS BERNSTEIN, its Vice-President; JEROME KERN, its Vice-President; JOSEPH YOUNG, its Secretary; ROBERT CRAWFORD, its Assistant Secretary; SAUL H. BORNSTEIN, its Treasurer; SIGMUND RUMBERG, its Assistant Treasurer; NATHAN BURKAN, its counsel; E. C. MILLS, General Manager; JOHN L. STANLEY; KXRO, Inc., a corporation; KVOS, Inc., a corporation; KGY, Inc., a corporation; SEATTLE BROADCASTING CO., a corporation; RADIO SALES CORPORATION, a corporation; KVL, Inc., a corporation; SPOKANE BROADCASTING CORPORATION, a corporation; SYMONS BROADCASTING CO., a corporation; LOUIS WASMER, Inc., a corporation; KMO, Inc., a corporation; KUJ, Inc., a corporation; WESTCOAST BROADCASTING CO., a corporation; CARL E. HAYMOND d/b/a Radio Station KIT, a corporation, *Defendants*.

Comes now plaintiff above entitled and on the affidavits hereto attached and the complaint on file herein, moves this honorable court for an order restraining defendants from further participation in the unlawful and illegal manner of conducting their business as alleged in plaintiff's complaint.

G. W. HAMILTON,
Attorney-General.

HAYMOND d/b/a Radio Station KIT, a corporation, *Defendants*.

State of Washington }
County of King, } ss:

GEORGE A. LOVEJOY, being first duly sworn on oath deposes and says: That he is a Senator from the 36th District, King county,

state of Washington, and a citizen of said state; that I have read the petition herein and know that the defendants as therein alleged are perpetrating a great wrong on the people of this state by said illegal combination and monopoly; that I have no interest, one way or another, in the outcome of this action except to see that the Constitution and the laws of the state of Washington are complied with and that all monopolies and trusts are forever broken and dissolved;

That from my sources of information, the acts of the defendants, as alleged in the attorney-general's position, are odious and detrimental to the people of this state and that their business constitutes a combination and a conspiracy to fix and control prices which is in restraint of trade and stifles free and untrammelled competition within this state in the sale of musical compositions and the rights to performing rights therein.

That the best interests of the people of this state would be better preserved if this business combination of defendants were forever divorced and severed by law, and that a restraining order should issue pending the outcome of this suit so that the defendant society, or any of its agents, should not reap any of its ill-gotten gains in the interim.

GEORGE A. LOVEJOY.

Subscribed and sworn to before me this 22nd day of June, 1935.

JENNIE M. TATTERSALL,
*Notary Public in and for the state of
Washington, residing at Olympia.*

State of Washington, }
County of Thurston, } ss:

E. P. DONNELLY, being first duly sworn on oath deposes and says: That he is a duly appointed, qualified and acting assistant attorney general of the state of Washington and that he has been heretofore delegated to investigate the business activities of defendants in this action; that he has made such investigation as is possible in the State of Washington and from such investigation believes and states:

That defendant, American Society of Composers, Authors and Publishers, referred to in this action as the "society," was and now is an unincorporated association organized and existing under and by virtue of the laws of the state of New York with its principal place of business in the city of New York.

That under the laws of New York the society, to all intents and purposes, carries on business as though it were a corporation in that it has a board of directors who manage the affairs of the society through regular officers and that its president, vice-presidents secretary, assistant secretary, treasurer, assistant treasurer, counsel and general manager, are correctly named in the caption hereof.

That all of said officials reside outside of the state of Washington but that defendant, John L. Stanley, is the local agent and manager of the society which has its Washington office in the city of Seattle, Washington; that John L. Stanley, as such agent, represents the society in Washington in the transaction of its said business and is apparently fully authorized so to do.

That the membership of the society is admittedly composed of more than 800 authors, publishers and composers of musical works, representing all popular and acceptable music and that the society actually owns, by assignment, the copyrights of each and every member thereof and controls all rights relative to the public performance for profit of all musical works and compositions of said members.

That the society is ostensibly organized to protect the members thereof but that its real purpose and the end which it has actually accomplished is to effectually and actually fix the prices to be paid by persons desiring to use, for profit, any of the musical productions of any of the members; that the society has effectually controlled and fixed the prices to be paid in the state of Washington by theatres, motion picture theatres, restaurants, hotels, cabarets, inns, circuses, carnivals, dance halls, concerts, reviews, music halls and radio broadcasting stations among others.

That said society has such a monopoly in the distribution of the right to use the acceptable and popular copyrighted music that for many years, and admittedly since August 1, 1933, no person, firm or corporation other than the society, has received or collected any royalties or other compensation for the public production, for profit, in the state of Washington, of any copyrighted musical work whatever.

That the society does and has, for many years, deprived the individuals in the state of Washington, desiring to use copyrighted music for profit, of the right to bargain for the particular copy-

righted music desired, but as a result of the illegal combination and monopoly has been able to and has forced each and every person and individual desiring to use any copyrighted music to pay an arbitrary price fixed by the society for all copyrighted music controlled by the society.

That as a result there is, in the state of Washington, at this time, no right whatever on the part of any person to bargain or deal with any individual, writer or composer for his individual output and that all competition is effectually done away with.

That among the persons in the state of Washington frequently having occasion to use in public, for profit, copyrighted music, are radio broadcasting stations; that the radio broadcasting stations named as defendants in this action, among other stations in the state of Washington, have entered into agreements with defendant society whereby in effect in return for the right to use the entire output of the society publicly for profit, they pay to the said society a percentage of their earnings as well as a fixed sum payable at stated intervals.

That the radio corporations, named as defendants in this action by said practices, have made it possible for the society to control the entire field of the distribution of copyrighted musical works in the state of Washington and have made it impossible for smaller individuals or organizations, such as hotels and small organizations, to do anything else than to submit to the terms dictated by defendant society.

That as a result, at this time, the society is enjoying a complete monopoly in the distribution of the right to use copyrighted music in the state of Washington for profit, and enjoying this monopoly the society has necessarily decreased the use thereof and increased the price thereof to the detriment of the people generally.

That the society is so organized and managed by persons with years of legal experience that it is apparently without existence as an entity in this or other states and that society so conducts its business as to make it practically impossible to prove the true method of transacting its business without the members thereof and the individuals who conspire and contribute to the accomplishment of the illegal monopoly being restrained until the validity of the agreement or understanding and the method of transacting business is determined.

That the society has in the past and now continues to hold over the heads of different individuals desiring to use copyrighted music for profit, the threats of prosecutions unless a fixed and stipulated sum is paid for all copyrighted music controlled by the society and that in order to obtain a decision as to legality of the acts in business carried on by the society in the manner in which it is carried on in the state of Washington, it is necessary that the said society be restrained until further order of this honorable court from the bringing of any action whatever based upon any agreements heretofore made; it is necessary also that said society be restrained from making any other or different agreements until further order of this court and until the legality of said agreements and said method of doing business is determined in this action.

That this action is brought on behalf of the state of Washington and that affiant is duly authorized to represent the state in this action and makes this showing to the best of his knowledge and belief supporting the state's application for the issuance of a temporary restraining order.

That no bond is required of the state of Washington in order to support said restraining order by virtue of chapter 122, Laws of 1935.

E. P. DONNELLY.

Subscribed and sworn to before me this 24th day of June, 1935.

The voluminous transcript in this cause doubtless affords material for an extended statement but one does not appear necessary.

The State of Washington, upon relation of its Attorney General, brought suit in the Superior Court of the State for Thurston County, against the defendants alleging that the American Society of Composers, Authors and Publishers is organized and exists under the laws of the State of New York as an unincorporated association of music composers, authors and publishers; that it is actually engaged in and transacting business in the form and name of a corporation in the State of Washington; that the defendant John L. Stanley is authorized to represent the defendant society in such State; that he is domiciled in and transacts therein its business.

It is alleged that the membership of the defendant society comprises approximately one hundred publishers and approximately eight hundred composers. They are made defendants but, on account of the large number of members, the named officers and agents of the society are sued as their representatives. Other defendants are alleged to operate radio stations in the State of Washington—a number in this district and others in the Eastern District of Washington —. Owners and operators of theaters are also named as parties defendant.

For the sake of brevity the defendant operators of radio stations and the owners and operators of theatres will be herein designated as "users."

The complaint alleges the existence of a conspiracy on the part of the defendants and others to restrain trade and commerce in the State of Washington, and contains a prayer, in part, that defendants

be enjoined from further conspiring and from performing the conspiracy and for general relief.

After the entry of a default against the defendant society, the filing of an amended complaint and the granting of an injunction, upon petition of the Attorney General for the appointment of a receiver to preserve the jurisdiction of the Court and the assets of the defendant society, the Court, on August 13th, 1935, appointed a temporary receiver to take possession of the business and property of the defendant society in the State of Washington.

Ten days later the defendant society petitioned the Superior Court for the removal of the cause to this court. The petition was refused.

A transcript of the proceedings in the State Court was filed in this Court, the defendant society notified the plaintiff of such filing, following which the plaintiff, by its attorney general, moved that the cause be remanded—among others—upon the ground that the action was begun by the State in its sovereign capacity to enforce by injunction its criminal laws. See Article XII, Sec. 22 of the Washington Constitution and Sec. 2382, sub-sections 6 and 7, Remington's Revised Statutes of Washington.

CUSHMAN, District Judge:

On account of the conclusion reached it is not now necessary to determine whether the petition for removal was timely filed or not.

The complaint alleges, in effect, that the defendant society dominates, in the State of Washington, commerce in compositions of the character described, controlling and owning approximately ninety-five per cent of the copyrighted acceptable and popular musical compositions published in the United States.

While the compositions owned and controlled by the defendant society may be copyrighted, a suit to enjoin a conspiracy to restrain commerce and trade in such compositions is not one arising under the copyright laws of the United States. *Straus v. American Publishers' Association*, 231 U. S. 222-234. See also *Standard Oil Co. v. United States*, 283 U. S. 163.

The allegations made in the petition for removal are not of a nature to bring the case within Section 31 of the Judicial Code (Title 28, U. S. C. A., Sec. 74).

In the petition for removal are allegations of collusion and the fraudulent bringing of the suit ostensibly in the name of the Attorney General but for and on behalf of the defendant users.

If it be conceded that it has been shown that the Attorney General consented to the assertion in this litigation of claims by certain of the defendant users against the defendant society, or that he sought the granting of more favorable terms by the defendant society to such users,—if done by him with the purpose of protecting the public of the State, it would not amount to fraud upon his part, and, if he failed to disclose such purpose at once, that fact would not be a concealment of a fraudulent character.

From time immemorial the Attorney General, using the testimony of an accomplice—even an accomplice of a murderer—would implicitly promise that accomplice immunity. *Whiskey Cases*, 99 U. S. 594-605-606; *Saunders v. Lowry*, 58 Fed. (2d) 158.

Nothing has been shown that would impute to the Attorney General any purpose beyond that of protecting the public by such means.

So, in this case it may be conceded that the fraudulent prosecution by the Attorney General of a suit such as this—whether fraud was actual or constructive—would, in law, insofar as such suit was concerned, strip him of such official character, reducing him to the

status of an individual litigant, and change the state's case from one brought as a sovereign to one of a civil nature, which, other requirements existing, would be removable.

In such a case the court would, it may further be conceded, be concerned with a realignment of parties plaintiff and defendant, the existence of a separable controversy and diversity of citizenship, but, absent such fraud, such a case—being one by the State—is not removable. *Minnesota v. Northern Securities Co.*, 194 U. S. 48-63; *Postal Telegraph Cable Co. v. Alabama*, 155 U. S. 482-487; *Ames v. Kansas*, 111 U. S. 449; *Stone v. South Carolina*, 117 U. S. 430; *Germania Insurance Co. v. Wisconsin*, 119 U. S. 473.

It has been further contended on behalf of the removing defendant that by requesting the appointment of a receiver to take over the public performing rights in musical numbers, the copyrights of which are held by the defendant society, and its members, and the request that the receiver be authorized to extend existing contracts and make new contracts, thereby there was presented a federal question. Such action and that of the Court taken pursuant to it did not render the cause removable. Such action was incidental to the main suit.

Insofar as the decision in *State of Ohio v. Swift & Co.*, 270 Fed. 141, is similar to the present suit, it supports the motion to remand rather than the petition for removal. The validity of no state law nor state court construction thereof violative of the Constitution of the United States are in question in the present suit.

The motion to remand will be granted.

Any order or orders embodying the rulings herein made will be settled upon notice.

The Clerk is directed to notify the attorneys for the parties of the filing of this decision.

IN THE SUPERIOR COURT OF THE STATE OF WASHINGTON FOR THURSTON COUNTY

No. 16114—RECEIVER'S REPORT

STATE OF WASHINGTON ex rel. G. W. HAMILTON, Attorney General, *Plaintiff*,

vs.

AMERICAN SOCIETY OF COMPOSERS, AUTHORS AND PUBLISHERS, an unincorporated association, et al., *Defendants*,

GREENHALGH AMUSEMENT CORPORATION, a corporation, *Intervenor*.

To: The Honorable D. F. Wright, Judge of the Above Entitled Court.

Comes now TRACY E. GRIFFIN, the duly qualified and acting temporary Receiver of the American Society of Composers, Authors and Publishers, an unincorporated association, and shows to this Court as follows:

I.

That pursuant to order of this Honorable Court, dated August 13th, 1935, your Receiver, having duly qualified, took into his possession all of the assets of the American Society of Composers, Authors and Publishers as shown by previous reports on file herein; that the principal asset of the American Society of Composers, Authors and Publishers, as shown by the evidence and as found by the Court, was the title to copyrighted music which had, together with the public performing rights thereof, been exclusively vested in the American Society of Composers, Authors and Publishers by assignments from the various members of said Society, a partial list of such membership being attached hereto and marked Exhibit "A" and by this reference made a part hereof.

II.

That although title to said copyrighted musical compositions vested in your Receiver as of August 13th, 1935, by order of this Honorable Court, your Receiver has given no notice thereof, but has confined his efforts to preserving the property of the Society of American Society of Composers, Authors and Publishers and has maintained in full force and effect all previous contracts for the use of said music between the American Society of Composers, Authors and Publishers and the users thereof in the State of Washington, as was authorized by order of this Honorable Court on August 24th, 1935.

III.

That Defendant American Society of Composers, Authors and Publishers heretofore filed in this cause and court a petition for removal of this action to the United States District Court for the Western District of Washington, Southern Division; that said petition was by this court refused, but pursuant to law, a transcript of the proceedings in this cause was filed in the said United

States District Court; that the State of Washington thereupon filed a motion to remand said cause back unto this court; that said motion to remand came on for hearing, was argued and taken under advisement. That on the 12th day of December, 1935, the Honorable Edward E. Cushman, United States District Judge, made and entered his memorandum decision granting the State of Washington motion to remand; that notice of said memorandum decision remanding this cause to this court has been given to all counsel by the Clerk of the said United States Court.

IV.

That your Receiver respectfully represents and shows to this Court that in his opinion it is necessary that notice be given that the title to the copyrighted works of each and every member of the American Society of Composers, Authors and Publishers, as listed in Exhibit "A", has been vested in your Receiver by order of this Court, dated August 13th, 1935.

WHEREFORE, your Receiver prays that this report be considered and that the Court take oral evidence as to the necessity of the Receiver's recommendations herein and that your Receiver be properly instructed as to his duties and rights in the premises.

E. P. DONNELLY,
*Assistant Attorney-General,
Attorney for the Receiver.*

STATE OF WASHINGTON }
COUNTY OF THURSTON } ss.

TRACY E. GRIFFIN, being first duly sworn on oath, deposes and says: That he is the duly qualified and acting receiver in this case; that he is familiar with the contents of the foregoing report; that he has read the same, knows the contents thereof, and believes the same to be true.

TRACY E. GRIFFIN.

SUBSCRIBED and SWORN to before me this 13th day of December, 1935.

WALTER REDDEN,
*Notary Public in and for the State
of Washington, residing at Olympia.*

IN THE SUPERIOR COURT OF THE STATE OF WASHINGTON FOR THURSTON COUNTY

No. 16114—SUPPLEMENTAL ORDER RE INVOLUNTARY
 ASSIGNMENT OF MUSICAL COMPOSITIONS

STATE OF WASHINGTON, ex rel., G. W. HAMILTON, Attorney
 General, *Plaintiff*,

vs.

AMERICAN SOCIETY OF COMPOSERS, AUTHORS AND
 PUBLISHERS, an unincorporated association; et al., *Defendants*,

GRENHALGH AMUSEMENT CORPORATION, a corporation,
Intervenor.

The Court having considered the Report of TRACY GRIFFIN, Receiver of the American Society of Composers, Authors, and Publishers, dated December 13th, 1935, and having listened to the evidence offered in support thereof, and having found that in order to preserve the jurisdiction of the proper Court that it is necessary that notice be given of the fact that the legal and equitable title to all musical compositions copyrighted and held in the name of each and every member of the American Society of Composers, Authors and Publishers, as partially listed and named in Exhibit "A", attached hereto and to the Receiver's Report, has been heretofore legally vested in said Receiver by order of this Court, dated August 13th, 1935, and the Court being further advised in the premises, it is now

ORDERED, ADJUDGED, AND DECREED that TRACY E. GRIFFIN, the duly qualified and acting Receiver of the American Society of Composers, Authors and Publishers be and he is hereby authorized and directed to file with the Register of Copyrights at Washington, D. C., a certified copy of this order together with a copy of the Receiver's Report, in lieu of the prior order of this Court of August 23d, 1935, and that notice shall be given that the Receiver herein is exclusively entitled to the control and possession of all of the joint property of the American Society of Composers, Authors, and Publishers for the purpose of preserving it pendente lite, and that the title to each and every copyrighted musical composition, together with the public performing rights thereof, of each and every member of the American Society of Composers, Authors and Publishers, is and has been exclusively vested in TRACY E. GRIFFIN, as the Receiver of said Society, for all purposes, and said Receiver shall possess and control said property and the affairs of said Society during the continuation of this receivership, or until further order of the Court.

DONE IN OPEN COURT this 14th day of DECEMBER, 1935.
 D. F. WRIGHT,

Judge.

Presented by
 E. P. DONNELLY,
*Assistant Attorney General
 of the State of Washington.*

Exhibit A attached to the supplemental order is a duplicate of Exhibit A which appears in connection with the Receivers Report and is, therefore not reproduced here.

BROADCAST ADVERTISING IN 1935

Highlights of the Year

Broadcast advertising volume reached a new high level during 1935. Gross time sales of the medium totalled \$87,523,848, a gain of 20.0% over the preceding year.

The most pronounced gains were experienced in the regional network and national non-network fields. Following a slight recession in 1934, local broadcast advertising rose materially and more than offset the losses of the previous year.

Local stations continued to show the greatest gains, while non-network business rose most rapidly in the southern and far western parts of the country.

Live talent programs, produced in station studios, showed the greatest increase of the year in the non-network field, due principally to the marked gain in the use of this type of rendition by national advertisers in their non-network broadcasting. Transcription volume experienced the most pronounced rise in the local broadcast advertising field.

Gains in broadcast advertising volume were general throughout all product and service groups employing the medium. Automotive, clothing, housefurnishing and tobacco advertising gained particularly. Financial advertising alone experienced any recession, declining 0.2% from the previous year's level. A general tendency toward more diversified sponsorship manifested itself throughout the year, as is evidenced partly by the statistical summaries as to radio advertising sponsorship and even more by examination of individual station accounts.

Total Broadcast Advertising

The volume of broadcast advertising placed over the various subdivisions of the medium during 1934 and 1935 is presented in Table I.

TABLE I

TOTAL BROADCAST ADVERTISING

Class of Business	Gross Time Sales	
	1934	1935
National networks	\$42,647,081	\$50,067,686 ¹
Regional networks	717,117	1,110,739
National non-network	13,541,770	17,063,688
Local	15,981,201	19,281,735
Total	\$72,887,169	\$87,523,848

¹ This includes the Mutual Network formed during the year.

Total broadcast advertising volume in 1935 increased 20.0% over the preceding year's level. It is particularly interesting to note that the rate of increase was maintained fairly steadily throughout the entire year.

National network advertising increased 17.4%. Regional network volume experienced the greatest gain over the preceding year, rising 54.7%. National non-network advertising rose 26.0%. Following a decrease in 1934 of 3.2% from the estimated previous year's level, local broadcast advertising rose materially during the year. Broadcast advertising of this type registered a gain of 20.6% over 1934.

It is interesting to note that gross time sales of the medium exceeded estimated 1931 volume by 25.0%, and the estimated depression low of the medium, \$57,000,000 in 1933, by 53.5%.

National network volume exceeded 1933 by 59.0%. Data are available with regard to other portions of the medium only for the latter half of that year. A comparison of revenues for that period with those of the corresponding months of 1935 showed the following

gains: Regional networks 160.4%, national non-network business 66.3%, and local broadcast advertising 22.0%.

Composition of Broadcast Advertising

The composition of the total broadcast advertising has remained very much the same as during the preceding year. National network advertising accounted for 57.2% of the industry's gross revenues during the year under review as compared to 58.5% in 1934, 55.2% in 1933, and an estimated 51.2% in 1931. The increasing proportion of total volume represented by national network advertising was due to the more rapid recovery of this portion of the medium from the effects of the depression. The situation over the past two years, however, seems to have become fairly well stabilized.

The marked rise in regional network volume is reflected in the growing proportion of total radio advertising which it represents. Regional network advertising accounted for 1.2% of total gross time sales in 1935 as compared to 0.9% in 1934 and 0.7% in 1933. National non-network advertising represented 19.5% of the gross volume of the medium in 1935 as against 18.6% in 1934 and 17.5% in 1933.

The relative importance of local broadcast advertising remained unchanged during the past year as compared with 1934. Advertising of this type accounted for 22.1% of total volume in 1935.

Comparison with Other Media

Broadcast advertising continued to make the most rapid forward strides of any medium during 1935. Compared to the 20.0% increase in gross time sales, national magazine volume rose 5.9% as against 1934. National farm paper advertising increased 7.0%, while newspaper lineage increased 5.8%. Newspaper department store advertising increased 3.4% as compared to a rise of 30.9% in radio department store volume.

Advertising volume by major media during the year of 1935 is found in Table II.

TABLE II

ADVERTISING BY MAJOR MEDIA

Advertising Medium	Gross Time and Space Sales	
	1934	1935
Radio broadcasting	\$72,887,169	\$87,523,848
National magazines ¹	116,268,492	123,093,289
National farm papers ²	5,200,067	5,565,059
Newspapers ²	485,481,718	517,513,000
Total	\$679,837,446	\$733,695,196

¹ Publishers' Information Bureau.

² Estimated.

Non-network Broadcast Advertising

Non-network advertising rose 23.3% as compared to the preceding year. Local station volume continued to show the strength exhibited during the latter portion of 1934 and experienced a gain of 31.9% over that year. Clear channel and high-powered regional station non-network advertising increased 23.6% as compared to 1934, while regional station volume rose 19.9%.

When comparison is made with the latter half of 1933, representing the depression low point of the industry, regional and local station non-network advertising is revealed to have made the most pronounced gains. Regional station non-network volume for the corresponding period of 1935 exceeded the 1933 level by 49.3%, while local station volume rose 76.5%. Clear channel and high-powered regional station non-network advertising experienced an increase of 18.6% over the level of two seasons ago.

Non-network broadcast advertising by power of station is presented in Table III.

TABLE III
NON-NETWORK BROADCAST ADVERTISING BY
POWER OF STATION

<i>Power of Station</i>	<i>Gross Time Sales</i>	
	<i>1934</i>	<i>1935</i>
Over 1,000 watts.....	\$13,408,584	\$16,564,505
250-1,000 watts.....	12,132,301	14,523,795
100 watts.....	3,982,086	5,257,213
Total.....	\$29,522,971	\$36,345,513

There has been little change in the proportion of non-network advertising placed over stations of varying power as compared with 1934. Clear-channel and high-powered regional stations accounted for 45.5% of non-network volume during 1935. Regional stations represented 40.0% of the total, and local stations 14.5%. The proportion represented by regional stations declined approximately 1.0% from the previous year, while the percentage accounted for by local stations rose a corresponding amount.

The southern and far western portions of the country experienced the most important increases in non-network volume during the year. Non-network advertising in the South Atlantic and South Central States increased 52.8% as compared with 1934, while Mountain and Pacific State volume rose 49.3%. Non-network broadcast advertising in the North Central States experienced a gain of 28.6%, while volume in the New England and Middle Atlantic States rose 9.7%. The comparatively small gain in the last-mentioned region is probably due to the relatively large proportion of total station facilities affiliated with the so-called basic networks of the national network companies. The decided rise in network business has thus acted as an automatic brake on non-network growth by absorbing much of the desirable time.

Non-network broadcast advertising in various sections of the country is set forth in Table IV.

TABLE IV
NON-NETWORK ADVERTISING BY
GEOGRAPHICAL DISTRICTS

<i>Geographical District</i>	<i>Gross Time Sales</i>	
	<i>1934</i>	<i>1935</i>
New England-Middle Atlantic Area...	\$9,815,695	\$8,945,782
South Atlantic-South Central Area....	3,944,650	6,060,358
North Central Area.....	10,822,445	13,941,087
Pacific and Mountain Area.....	4,940,181	7,398,286
Total.....	\$29,522,971	\$36,345,513

The rise in non-network volume in the west and south has materially affected the relative proportion of total advertising of this

type accounted for by each section of the country. Whereas the New England and Middle Atlantic States accounted for 33.2% of total non-network volume in 1934, they represented but 24.5% in the following year. Non-network advertising represented by the South Atlantic and South Central States amounted to 16.6% during the year under review as compared to 13.5% in 1934.

The increase in the proportion accounted for by the Mountain and Pacific States was from 16.9% to 20.7%. Whereas the North Central States were responsible for 36.4% of total non-network advertising in 1934, they accounted for 38.2% in 1935.

Non-network Advertising by Type of Rendition

Live talent programs, produced in station studios, experienced the greatest increase of any major type of rendition during the year, gaining 25.1% over the 1934 level. Transcription volume rose 18.9%, while announcement business increased 19.6%. Records, representing but a small proportion of total non-network advertising volume by type of rendition, registered a gain of 83.7% over the previous year.

The marked gain in live talent business was due principally to a decided trend toward the use of this type of rendition by national advertisers in their non-network broadcasting. National non-network live talent advertising rose 38.2% during the year, as compared to a rise of 15.3% in transcription volume and of 19.1% in announcement business.

Compared to the last six months of 1933, for which data alone are available, national transcription advertising for the corresponding period of 1935 rose 59.6%, live talent volume increased 146.0%, and announcement revenues declined 9.6%.

Local broadcast advertising presented a somewhat different picture as to trends in the use of various types of rendition. Largely because of a marked rise during the latter portion of the year, local transcription volume showed a gain of 33.5% over 1934. Record volume rose 82.4%, live talent business 15.5%, and announcement revenues 20.3%.

Comparing the latter half of the year under review to the corresponding period of 1933 emphasizes, even more clearly, the local transcription trend during the past two seasons. Transcription volume is found to have gained 54.9%, live talent 10.3%, records 12.1%, and announcements 13.9%.

The proportion of total non-network broadcast advertising represented by various types of rendition differed very little from that of the previous year, both in the national and local fields. With regard to total non-network advertising, transcriptions represented 20.9%, live talent 48.3%, records 2.3%, and announcements 28.5%.

In the case of national non-network advertising, transcriptions accounted for 37.7% of total volume, live talent 42.9%, records 0.4%, and announcements 19.0%. Transcription volume amounted to 9.0% of the local broadcast advertising total, live talent 50.0%, records 3.8%, and announcements 37.2%.

Broadcast advertising by type of rendition is represented in Table V.

TABLE V
NON-NETWORK BROADCAST ADVERTISING BY TYPE OF SPONSORING BUSINESS

<i>Type of Rendition</i>	<i>National Non-network</i>		<i>Gross Time Sales</i>		<i>Total</i>	
	<i>1934</i>	<i>1935</i>	<i>Local</i>	<i>1934</i>	<i>1934</i>	<i>1935</i>
Electrical transcriptions.....	\$5,090,925	\$5,870,614		\$1,308,265	\$6,399,190	\$7,614,508
Live talent programs.....	5,798,723	8,015,119		8,356,675	14,155,399	17,679,530
Records.....	55,847	103,914		407,280	463,127	849,071

Total.....	\$13,541,770	\$17,063,778		\$15,981,201	\$29,522,971	\$36,345,513

Broadcast Advertising Sponsorship

With the exception of financial advertising, which declined 0.2% as compared to the preceding year, all forms of broadcast advertising sponsorship experienced gains during 1935. Automotive advertising increased 49.6% as against 1934. Automotive volume rose on all portions of the medium, national non-network business leading with a gain of 148.8%. Clothing advertising volume rose 52.8%, due principally to an increase in the local field. Housefurnishings advertising exceeded the 1934 level by 47.7%, local volume again being responsible in the main. Department store advertising increased 35.3%; national non-network volume, composed of advertising by the retail branches of mail order houses, rose 93.8%.

Other increases as compared to 1934 were as follows: Amusements, 1.4%; gasoline and accessories, 5.6%; drugs and pharmaceuticals,

18.3%; cosmetics, 9.0%; foodstuffs, 20.6%; beverages, 1.0%; confectionery, 30.0%; soap and kitchen supplies, 3.8%; radio sets, 66.0%; tobacco products, 26.5%; and miscellaneous advertisers, 11.8%.

Foodstuffs again lead the sponsor field, accounting for 19.0% of the total broadcast advertising volume of the year. This was the same as in 1934. The combined food, beverage and confectionery group represented 26.7% of the year's radio advertising volume, as compared to 27.4% in 1934.

Cosmetics ranked second, with 13.1% of the medium's total as compared to 14.4% in the previous year. Drugs and pharmaceuticals ranked third with 12.1% in 1935 and 12.3% in the year prior to that. The miscellaneous group again ranked fourth, accounting for 10.2% of the total revenues of the medium during the year under review,

and 11.3% in 1934. Accessories placed fifth, as in the preceding year, accounting for 7.6% in 1935 and 8.6% in 1934.

The most marked change in proportion of total broadcast advertising represented by it occurred in the automotive field, which, though

remaining in sixth place, rose from 5.7% of the medium's revenues to 7.1%.

Broadcast advertising in 1934 and 1935 by different product and service groups is found in Tables VI (A) and VI (B).

TABLE VI(A)
BROADCAST ADVERTISING BY TYPE OF SPONSORING BUSINESS

National Network Advertising in 1935

With but two exceptions, all fields of national network advertising increased as compared to 1934. The exceptions in question were a decline of 27.7% in network financial advertising and a decrease of 10.2% in the beverage field.

The most important gains in the national network field were an increase of 24.4% in automotive advertising, a rise of 23.7% in food sponsorship, and one of 27.9% in the drug and pharmaceutical field. Network drug advertising declined toward the end of the year, how-

ever, as the new policies with regard to this type of advertising began to take effect. The miscellaneous group showed a rise of 41.6% during the year, indicating a widening sponsorship of broadcast advertising over networks. Radio set advertising, representing a somewhat less important segment of the network total, experienced the most pronounced relative increase over the previous year, rising 64.8%.

Other increases in the national network field were as follows: Accessories and gasoline, 12.7%; clothing, 22.5%; cosmetics, 9.5%; confectionery, 21.8%; household equipment, 35.8%; soap and

kitchen supplies, 27.5%; tobacco, 10.9%. National network retail volume represents mail order advertising. None of this class was broadcast in 1934.

Foodstuffs lead the national network field in 1935, accounting for 20.9% of the total volume. Cosmetics, which ranked first in 1934 with 24.2% of the year's total, moved to second place, accounting for 20.6% of 1935 revenues. Drugs were third with 12.3%; accessories and gasoline fourth with 8.6%; tobacco fifth with 7.1%; and automotive advertising sixth with 6.9%. With the exception of the decline in relative importance of cosmetics, the proportion of total volume represented by the leading sponsor groups changed but little from 1934.

Regional Network Advertising

The outstanding development of the year in the regional network field was the increasing diversity of products utilizing this form of broadcast advertising. In addition to several comparative newcomers among the users of regional network advertising, there was a general increase in many sponsoring groups.

Tobacco advertising, principally cigars, rose from \$3,835 in 1934 to a total of \$169,565 during the year under consideration. Soap and kitchen supply advertising increased from \$796 in the previous year to \$51,246 in 1935.

Other fields to experience marked gains included the following: Clothing, 244.1%; cosmetics, 328.8%; drugs and pharmaceuticals, 220.3%; confectionery, 422.5%; and household equipment, principally paints, 305.9%. Foodstuffs, the most important sponsoring group in the regional network field, registered an increase of 52.4% over the 1934 level. Automotive volume rose 39.7%.

Decreases in the remainder of the sponsor group were as follows: Accessories and gasoline, 29.4%; beverages, 55.2%; financial, 75.6%; and miscellaneous, 12.3%. Of these, only gasoline and the miscellaneous group represented important segments of the regional network total.

The important developments in the regional network field with respect to advertising sponsorship brought with them a marked realignment of product groups with regard to their relative importance. Foodstuffs remained in first place, and accounted for 24.5% of the regional total, as compared to 25.1% in 1934. Tobacco climbed from fifteenth in 1934 to second during the year under review and accounted for 15.3% of the regional network total. Gasoline and accessories dropped from first in 1934, when they amounted to 31.0% of the total, to third in 1935, with 14.1%.

The miscellaneous group represented 10.7% in 1935 and ranked fourth. This group accounted for 18.8% of regional revenues in the previous year. Household equipment ranked fifth with 7.5% and drugs sixth with 6.9%. In 1934 drugs ranked fifth with 3.2% and household equipment sixth with 2.8%.

National Non-network Advertising

National non-network advertising experienced increases with regard to all sponsoring product and service groups with but a single exception, gasoline and accessories, which decreased 10.5%. The decline in this field occurred principally since August 1935.

Several highly important gains were recorded during the year. Tobacco advertising, principally cigars and pipe tobacco, increased 264.3% during the year. Automotive advertising rose 148.8%, soap and kitchen supply advertising 82.4%, and mail order retail store advertising 93.8%. The automotive rise began in February 1935 and continued steadily since that time.

Other increases in the national non-network field were as follows: Amusements, 50.4%; clothing, 21.8%; drugs, 11.0%; cosmetics, 7.0%; foodstuffs, 26.3%; beverages, 27.2%; confectionery, 28.5%; household equipment, 25.1%; financial, 3.5%; radios, 57.2%; miscellaneous, 4.5%.

As in the case of national and regional network advertising, foodstuffs comprised the largest single class of national non-network advertising, accounting for 20.6% of the total volume in 1935. This was the same proportion as in the preceding year. However, in 1934, drugs ranked first and represented 23.1% of national non-network revenues. This class of goods dropped to second place, with 20.5%, during the year just closed.

The miscellaneous group ranked third in the national non-network field, comprising 13.2% and 16.2% of total revenues in 1935 and 1934, respectively. Automotive advertising ranked fourth in 1935, with 10.5% of the total, as against sixth in 1934 with 5.3%. Gasoline and accessories ranked fifth in the year just completed with 6.6% as compared to fourth, with 9.5%, in the preceding year. Soap and kitchen supplies ranked sixth in 1935 with 5.5% of the national non-network total. This class of commodity was ninth in the previous year with 3.7%.

Local Broadcast Advertising

Increases again were fairly general in the local broadcast advertising field, though in practically no instance were they as spectacular as in other portions of the medium. Automotive, clothing and house furnishing advertising, fields enjoying considerable growth in sales during the past year, gained especially. Local automotive advertising exceeded the 1934 level by 47.2%. Clothing volume rose 63.2%, while house furnishing advertising increased 55.8%. Local department store sponsorship gained 28.1% over the previous year.

Other gains included the following: Gasoline and accessories, 7.2%; beverages, 37.3%; confectionery, 171.5%; financial, 35.3%; radio sets, 37.9%; tobacco products, 22.0%; and miscellaneous, 5.8%.

Several decreases occurred during the year in the local field. Amusement advertising declined 2.0%, drug volume 9.2%, cosmetic advertising 9.6%, and soap and kitchen supplies 7.0%. Foodstuff volume remained practically unchanged from the previous year's level.

As in 1934, the miscellaneous group comprised the largest single classification in the local broadcast advertising field, accounting for 23.4% of the total revenues of this type. Clothing volume ranked second, and comprised 14.3% of the local total. In 1934 this class of local advertising ranked third and represented 10.6% of local business.

Foodstuffs ranked third in 1935, with 12.5% of the total. House furnishings ranked fourth with 10.9%, automotive advertising fifth with 8.6%, and beverages sixth with 5.5%.

Retail Broadcast Advertising

Broadcast advertising by retail establishments of various types is set forth in Table VII. It will be noted from the table that broadcast advertising by retail establishments increased 48.1% over the previous year.

TABLE VII
RETAIL BROADCAST ADVERTISING OVER
INDIVIDUAL STATIONS

Type of Sponsoring Business	Gross Time Sales			
	1934		1935	
Automobiles and accessories:				
Automobile agencies and used car dealers.....	\$594,400	8.3%	\$991,595	9.3%
Gasoline stations, garages, etc.	525,997	7.3%	638,195	6.0%
Clothing and apparel shops	1,681,573	23.3%	2,810,962	26.4%
Drugs and toilet goods:				
Drug stores	180,220	2.5%	245,428	2.3%
Beauty parlors	59,358	.8%	108,393	1.0%
Food products:				
Grocery stores, meat markets, etc.	568,157	7.9%	587,265	5.5%
Restaurants and eating places	222,461	3.1%	245,506	2.3%
Beverage retailers	11,187	.2%	42,739	.4%
Confectionery stores, etc.	23,535	.3%	26,459	.3%
Household goods:				
Household equipment retailers	413,340	5.7%	652,914	6.1%
Furniture stores	612,223	8.5%	1,045,802	9.9%
Hardware stores	134,525	1.8%	220,838	2.0%
Radio retailers	145,805	2.0%	172,219	1.6%
Department and general stores	1,351,282	18.7%	1,768,990	16.6%
Tobacco shops	8,896	.1%	8,702	.1%
Miscellaneous	650,109	9.5%	1,074,192	10.2%
Total	\$7,183,069	100.0%	\$10,640,199	100.0%

The most spectacular increase in the field was with regard to beverage retailers, the advertising volume of which rose 282.0% as compared to the preceding year. This class of retail trade, however, is comparatively unimportant and represents but 0.4% of the total retail radio advertising volume.

The most significant increases in retail broadcast advertising included the following: Automotive, 66.8%; clothing, 67.2%; household equipment dealers, principally electrical appliances, 57.9%; furniture stores, 70.8%; hardware retailers, 64.2%; miscellaneous retail establishments, 65.2%; and department stores, 30.9%.

Gasoline and accessory retail advertising rose 21.3%, drug store volume 36.2%, that of beauty parlors 82.6%, grocery stores 3.4%, restaurants 10.4%, confectionery shops 12.4%. Retail tobacco shop business alone declined, dropping 2.2%. This class, however, is quite negligible.

As will be noted from the percentages appearing on Table VII, clothing store volume led the retail field with 26.4% of the entire radio volume. Department stores ranked second with 16.6%, miscellaneous third with 10.2%, furniture stores fourth with 9.9%, automotive fifth with 9.3%, and household equipment dealers sixth with 6.1%.

Comparison with Latter Half of 1933

Since the year of 1933 represented the low point of broadcast advertising during the depression, a comparison of 1935 sponsorship with that period will be of interest. Since complete data are available only for the second half of the former year, all comparisons have been made on the basis of that period and the corresponding months of the year just closed.

Interesting shifts are to be observed in the national network field. The miscellaneous group showed the greatest gain as compared to 1933, rising 162.6%, again pointing to an increasing diversity of broadcast advertising sponsorship.

Soap and kitchen supply volume rose 158.0%, while automotive

advertising increased 156.8%. Other gains were as follows: Radio sets, 111.3%; drugs, 81.4%; cosmetics, 99.4%; and foodstuffs, 78.8%. Advertising in several fields declined. Clothing dropped 14.2%, beverage volume 7.5%, house furnishings 49.0%, tobacco 5.0%, and financial 59.0%.

In the regional network field comparison with 1933 merely confirmed the trends noted in the past year. There were no important decreases.

Marked gains were indicated throughout the entire national non-network field. Automotive volume more than tripled. Tobacco advertising increased more than thirty times the 1933 figure, while radio set volume rose sevenfold. House furnishing and beverage advertising doubled. Clothing and food advertising rose materially, as did drug sponsorship.

Principal decreases in the national non-network field were a decline of 31.2% in gasoline and accessory volume as compared with the latter half of 1933, a drop of 41.0% in cosmetic advertising and of 27.7% in confectionery business.

In the case of local broadcast advertising volume, most gains were comparatively slight as compared to the latter half of 1933. Outstanding increases were as follows: Clothing, 73.1%; house furnishings, 88.0%; beverage and radio set advertising, more than doubled. Food advertising remained at the 1933 level. Amusement volume declined 34.6%, drug advertising 70.0%, and soap and kitchen supply business 54.7%.

PRATT NEW NAB ATTORNEY

Elmer W. Pratt, for some years attorney and Examiner for the Federal Radio Commission, has been appointed attorney for the NAB.

Mr. Pratt was born at Salt Lake City, Utah, on October 28, 1900, educated in the grade and high schools and a business college of that city and graduated from the National University Law School, this city.

He was employed by former Senator Reed Smoot of Utah for five years, the last two years of which he was private secretary to Senator Smoot as well as clerk of the Senate Finance Committee of which the Senator was chairman.

Mr. Pratt was the first attorney to enter the employ of the old Federal Radio Commission as well as the first Examiner. He was employed by the Commission for five years and left on June 30, 1933, since which time he has been engaged in the practice of law specializing in radio.

He will devote all of his time to the NAB work and will deal primarily with matters relating to state and municipal taxation. He will, however, be given time to dispose of his present active law cases.

BOARD OF DIRECTORS MEETING

The NAB Board of Directors held a meeting in Chicago, Illinois, February 3rd, on the subject of copyright. The full text of a report on copyright, with conclusions and recommendations of the Managing Director, and the actions taken thereon by the Board, will be furnished to the members in a special edition of NAB Reports which will be mailed about February 18th. The mailing of this report was delayed at the request of a member of the Board in order that he might file a minority report.

ADDITIONAL POWER RECOMMENDED FOR WJAS

Broadcasting Station WJAS, Pittsburgh, Pa., operating on a frequency of 1290 kilocycles applied to the Federal Communications Commission to increase its power from 2,500 to 5,000 watts daytime. It now operates with 1,000 watts night full time.

Examiner Ralph L. Walker in Report No. I-190 recommended that the application be granted. The Examiner found that "there is a need for the additional service proposed" and that "the interest of existing stations will not be adversely affected by reason of interference."

GARDNER NURSERY COMPANY, OSAGE, IOWA

Members are advised to communicate with NAB headquarters before contracting with Gardner Nursery Company, Osage, Iowa.

DUFFY COPYRIGHT BILL

Members are urged to wire or telephone their Congressmen at once urging them to sign petition No. 26 filed February 12, 1936, by Congressman Marion A. Zioncheck to report the Duffy Copyright Bill (S. 3047) to the House. It is necessary that 218 signatures be affixed to the petition.

RULE RELAXED TEMPORARILY

At a general session of the Federal Communications Commission it was decided to relax until February 15, Rule 100.6 pending further study. This rule now reads:

"Subject to the provisions of Sections 4 (j), 412 and 606 of the Act, the files of the Commission shall be open to inspection as follows:

- Tariff schedules required to be filed under Section 203 of the Act and annual and monthly reports required to be filed under Section 219 of the Act.
- Hearing dockets, only as to applications, licenses, and other instruments of authorizations, notices, appearances, motions, petitions, and other pleadings, depositions, transcripts of testimony, exhibits, examiners' reports, exceptions, and orders of the Commission.
- Other files, in the discretion of the Commission, upon written request describing in detail the document to be inspected, and the reasons therefor."

R. R. MINTON

The Managing Director is desirous of learning the present address of R. R. Minton, who has been putting on "BY-NOW" programs.

NEW SACRAMENTO STATION RECOMMENDED

Application was filed by the Golden Empire Broadcasting Company with the Federal Communications Commission for a construction permit for a new station at Sacramento, Cal., to use 1310 kilocycles, 100 watts unlimited time. Royal Miller also applied for a permit for a station to be located at the same place to use 1210 kilocycles, 100 watts power and daytime power.

Chief Examiner Davis G. Arnold in Report No. I-199 recommends that the application of Royal Miller be granted but that of the Golden Empire Broadcasting Company be denied. The Examiner found that there is not need for two additional radio stations at Sacramento. The Examiner states that Mr. Miller has been "for more than twenty years a resident of the city of Sacramento and is in a better position to know, and to render, the class and character of the radio service need in the area proposed to be served."

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

- American Centrifugal Corporation, New York City (2-1890, Form A-1).
American Lime & Stone Company, Bellefonte, Pa. (2-1891, Form A-2).
James Talcott, Inc., New York City (2-1893, Form A-2).
Holland Furnace Company, Holland, Mich. (2-1894, Form A-2).
Rome Cable Corporation, Rome, N. Y. (2-1896, Form A-1).

Washington Garden, Inc., Washington, D. C. (2-1897, Form A-1).

General Finance Corporation, Detroit, Mich. (2-1898, Form A-1).

RECOMMENDS DENYING NEW CALIFORNIA STATION

F. W. Atkinson, applied to the Federal Communications Commission for authority to erect a new broadcasting station at Watsonville, Cal., to use 1310 kilocycles, 250 watts power and daytime operation.

Examiner John P. Bramhall in Report No. 191 recommended that the application be denied. He found that the area proposed to be served is already receiving ample radio service. The Examiner states also that there are now two applications pending before the Commission which might cause interference. "The interference which might be created," says the Examiner, "by the granting of this application with the proposed station would be only slight, since the required separation is 74 miles and the actual separation is 70 miles." He found, however, that granting the application will not serve the public interest.

INCREASED POWER AND TIME SUGGESTED

Broadcasting Station KRSC, Seattle, Wash., filed an application with the Federal Communications Commission asking that its power be increased from 100 to 250 watts and that its operation be increased from daytime to unlimited. The station operates on a frequency of 1120 kilocycles.

Examiner P. W. Seward in Report No. I-192 recommends that the application be granted. He found that a need for local service in the area proposed does exist and therefore that granting of the application would be in the public interest.

BROOKLYN HEARING DATE SET

The Federal Communications Commission has extended the present licenses of all Brooklyn radio stations involved in Dockets Nos. 1780, 1936, 2039, 2641, 1882, 2013, 2014, 1967, 2643, 1883, 1968, 2642, for an indefinite period, but not beyond the expiration of the present license period—May 1—and ordered that the cases be opened de novo before the Commission en banc. Hearings will begin in this case on April 6.

NEW GEORGIA STATION RECOMMENDED

E. F. and S. F. Sapp applied to the Federal Communications Commission for a construction permit for the erection of a new broadcasting station at Waycross, Ga., to use 1200 kilocycles, 100 watts and unlimited time on the air.

Examiner R. H. Hyde in Report No. I-193 recommended that the application be granted. He states that granting of the application would not cause any interference and that it is "shown that there is no available radio service of primary signal quality in the area proposed to be served, and that there is an active interest on the part of the public in the establishment of local broadcast facilities. From this it is concluded that there is a need for the proposed new station."

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2692. Alleging the use of a sales scheme involving a lottery, a complaint has been issued against **General Concessions Corporation**, 6545 Carnegie Ave., **Cleveland**, manufacturer and distributor of candies.

Every package of candy sold by this company contained a prize but some prizes were of greater value than the ordinary run, in fact, exceeded in value the retail price of the package of candy itself, according to the complaint. Purchasers receiving packages containing the more valuable prizes did so entirely by chance, it is alleged.

No. 2694. Deceptive use of the initials of the International Seamen's Union of America and of names which falsely imply a connection with that union is alleged in a complaint issued against the **I. S. U. Rank and File Group**, and others, of No. 1 Union Square, **New York City**, associations publishing the "I. S. U. Pilot," "I. S. U. Guide," "Union Seaman," and "The Pilot."

Operating from its New York office and from branch offices in Baltimore, New Orleans, Philadelphia, and other cities, the respondents are alleged to be in competition with other associations engaged in the sale of magazines in interstate commerce, including the International Seamen's Union of America, which, according to the complaint, has become known and has been referred to for more than twenty years as the "I. S. U." The International Seamen's Union of America publishes a monthly magazine called the "Seamen's Journal."

Nos. 2695-2696-2697-2698-2699-2702-2704-2705-2706-2707-2708-2709. Unfair methods of competition are alleged in complaints issued against 12 companies engaged in the manufacture and sale of candy. It is charged that the respondents pack their products in assortments so as to involve the use of lottery schemes when the candy is sold and distributed to consumers.

The complaints set out that some of the respondent companies use push boards in their sales plans. Others rely upon lottery schemes by which the purchaser, for a stated price, selects a piece of candy from the assortment and may, if his choice is lucky, win a larger piece of candy, bars of candy, a box of candy, or an article of merchandise. Similar prizes may be won under the push board method, which also involves an element of chance.

The complaints were issued against the following respondents: **Bunte Bros., Inc., Chicago**; **Walter T. Hall and Minnie M. Hall**, individually, and doing business under the name of **Walter T. Hall & Co., Ottumwa, Iowa**; **Woody Candy Co., 609 N. W. 2nd St., Oklahoma City, Okla.**; **Avalon Candy Corporation, 2064 Marengo St., Los Angeles**; **Fine-Reding Candy Manufacturing Co., Inc., 323 N. Queens St., Oklahoma City, Okla.**; **Pearson Candy Co., 108 Glenwood Ave., Minneapolis**; **Williams-Crahan Co., One N. W. First St., Oklahoma City, Okla.**; **Startup Candy Co., Provo, Utah**; **J. G. McDonald Chocolate Co., Salt Lake City**; **Raleigh Candy Co., First and Vine Sts., St. Louis, Mo.**; **Shupo-Williams Candy Co., Wall Avenue and 26th St., Ogden, Utah**; **John H. Dockman & Son, Inc., 32 E. Montgomery St., Baltimore.**

No. 2700. Alleging that **Julius Abrahams**, trading as **Philadelphia Badge Co.**, practiced unfair competition by falsely advertising that his products were purchased by the United States Government, a complaint has been issued against Abrahams, whose address is 942 Market St., **Philadelphia**.

Manufacturing and selling stamp photos, Abrahams is alleged to have advertised that among his nationally known users is the United States Government. This representation, when applied to the respondent's products, is alleged to be false, misleading and deceptive, tending to deceive buyers into believing that Abrahams' commodity is purchased in large quantities by the Government, and, by inference, that it is endorsed by the Government.

No. 2701. A complaint has been issued against **George Landon and M. M. Warner**, of 360 North Michigan Ave., **Chicago**, trading as **Landon & Warner**, charging unfair competition in the sale of an elastic fabricated belt.

Designed for use as an abdominal support, and to provide a means of massaging in reduction of surplus fat, this belt, called the "Director", was advertised as being capable of reducing the waistline from 4 to 6 inches, of eliminating practically all adipose tissue, and doing away with a tired and bloated feeling after meals.

Nos. 2703-2713. Two California wine companies have been served with complaints alleging unfair competition in the designation of their wines for sale in interstate commerce.

E. A. and H. L. Wente, of Livermore, Calif., and Roma Wine Co., Inc., San Francisco, are charged with unfairly using the name "Chateau Yquem" to designate their wines, when, the complaints point out, this name means to the trade and public a specific wine produced from grapes grown on the estate of the Marquis de Lur-Saluze, in the Sauterne country, Province of Bordeaux, France.

The complaints cite findings of the Federal Alcohol Administrator that "Chateau Yquem" is a name of geographic significance known to the consumers and the trade to distinguish the specific wine made of grapes from the Lur-Saluze estate in France.

No. 2710. Alleging unfair representation in advertising matter and radio announcements in aid of the sale of a solution for household uses, a complaint has been issued against **Strong, Carlisle & Hammond Co., 1392 West Third St., Cleveland**, manufacturer of "SIB, Sunshine in Bottles", a sodium hypochlorite solution.

Among representations alleged to have been made are the following: That "SIB, Sunshine in Bottles", will completely and safely remove stains, kill odors instantly, destroy or kill germs, disinfect as it cleans, sterilize dishes, and representations to the effect that it may be taken internally, as "rigid tests prove it safe".

The complaint alleges that these assertions are misleading and that their use constitutes unfair competition with dealers in the same class of products who do not untruthfully advertise them.

No. 2711. Use of false and misleading statements in advertisements is charged in a complaint issued against **Foster-Milburn Co.**, 1280 Main St., **Buffalo, N. Y.**, engaged in the manufacture and sale of Doan's Pills, offered as "a stimulant diuretic to the kidneys".

Claims in the advertisements that the pills contain certain cleansing properties beneficial in kidney disorders, that they restore vigor and vitality, etc., are untrue, according to the complaint.

The complaint alleges such representations are misleading in that they give the impression that the pills are a cure for the conditions described in the advertisements, whereas it is alleged no diuretic is a cure for kidney troubles, and the symptoms enumerated might not indicate a condition for which a diuretic would be prescribed by a qualified physician.

Stipulations

The Commission has issued the following stipulations and cease and desist orders.

No. 2343. An order to cease and desist has been issued against the **Rossett Manufacturing Corporation**, 8 Astor Place, **New York City**, engaged in the sale of hats and caps in interstate commerce, is directed to discontinue representing that it is a manufacturer, by use of the words "manufacture", "manufacturing", or "mills", unless and until it actually does own plants where its products are made.

The order prohibits the respondent from making the assertion "We buy cloth direct from the mills, manufacture caps at our own plant, and sell them direct to you at a small profit—That is the reason we can sell you winter caps at these prices", until such representation is true.

No. 2348. **Universal Extract Co., Inc.**, 380 Throop Ave., **Brooklyn, N. Y.**, has been ordered to discontinue representing by labels, newspaper advertising or radio broadcasts, or by any other method, that it imports or exports the flavoring extracts it manufactures and sells in interstate commerce, or that the ingredients composing the extracts are imported from foreign countries.

The order prohibits use on extract container labels of words in a foreign language or in any language which imply that the respondent is the sole representative in America in the sale of preparations of certain extracts.

No. 2358. **The Blind Weavers, Inc.**, 2215 South Turner Ave., **Chicago**, engaged in selling hand-woven and machine-made chenille rugs, has been directed to cease and desist from representing that it is a charitable institution for the blind, also from representing to purchasers of its merchandise that they are buying products of blind people domiciled in such institutions, instead of the products of a private commercial enterprise.

The respondent, under the order, is to discontinue advertising for sale or selling machine-made chenille rugs without a statement in clear and legible type, in its advertising matter or on tags affixed to the rugs, that such products are not made or woven by the blind.

No. 2457. Simulation of the dress and appearance of containers used by competitors in the sale of toothpaste is forbidden under an order to cease and desist issued against **New England Collapsible Tube Co.**, 170 Broad St., **New London, Conn.**, manufacturer and seller of dentifrices and other merchandise, and against **Robert P. Gust Co., Inc.**, 529 South Franklin St., **Chicago**, manufacturers' sales agent, which sold the dentifrices of the New England firm.

The order requires the respondents to discontinue selling toothpaste or other merchandise in tubes, boxes, cartons or packages which in dress and appearance simulate the containers used by competitors and thus tend to deceive and mislead dealers and the purchasing public into the belief that the respondents' toothpaste and other products are those of competitors.

No. 2464. **Frederick W. Dobe**, of near **Libertyville, Ill.**, doing business as **Dobe School of Drafting** and as **Engineer Dobe**, has been ordered to cease and desist from certain unfair methods of competition in the sale of his correspondence course of instruction in drafting.

Representations that draftsmen are in demand and that jobs in their field are plentiful at times when such is not the case, or that salaries of beginners and experts in the field are other than the salaries actually prevailing at the time the representations are made, are to be discontinued, under the order. The respondent is required by the order to cease representing that he maintains an employment agency for his students, and will refund money paid to him by students if they do not obtain jobs, unless such assertions are truthful.

No. 2584. **Union Pencil Co., Inc.**, 305 Broadway, **New York City**, has been ordered to cease and desist from certain unfair methods of competition in selling its products in interstate commerce.

The respondent is required, under the order, to discontinue representing through advertising, letterheads, or other stationery, that its pencils will outlast other brands in the same price range by three or four times, or that they have been tested by the United States Bureau of Standards, or tested for comparison with competing pencil products by an independent and unbiased agency.

No. 2609. **The Stetson Pants Co.**, 212 East 8th St., **Cincinnati**, has been ordered to cease and desist from making, publishing, or circulating statements falsely creating the belief among potential purchasers that it manufactures the trousers it sells in interstate commerce.

Representations that the respondent company is exclusive owner of a particular form of merchandise or that it holds any patent or copyright on a so-called "Vizulizer", which is an integral part of a sales promotion plan, are prohibited under the order.

No. 2640. An order has been issued against the **American White Cross Laboratories, Inc.**, prohibiting certain unfair competitive methods in the sale of absorbent cotton products. The company has its headquarters at 52 Webster Ave., **New Rochelle, N. Y.**, and a branch plant at **Cape Girardeau, Mo.** It distributes merchandise to chain and syndicate stores, drug stores, surgical supply companies and hospitals.

This company is directed to cease advertising, labeling or otherwise representing packaged cotton as "sterilized" or "sanitary", unless it is sterilized and free from bacteria after it has been packaged and while in its original unbroken package.

No. 2653. **Harry Kapust**, 2557 West North Ave., **Chicago**, has been ordered to discontinue unfair methods of competition in the sale of men's clothing. Kapust is in business under the trade names **Roselle Manufacturing Co.** and **Roselle Clothing Manufacturing Co.**

The order prohibits representation by advertisements or other means that the respondent or his companies are manufacturers of men's suits, until he operates or controls a factory where such merchandise is made.

No. 2659. **H. T. Poindexter & Sons Merchandise Co.**, 801 Broadway, **Kansas City, Mo.**, has been ordered to cease and desist from representing, directly or indirectly, that the cotton print goods it sells in interstate commerce are "tub fast", or that such goods will not fade when washed in the normal course of use, unless and until such goods are in fact dyed with a "tub fast" dye and will not fade when so washed.

No. 2669. **The General Tire & Rubber Co.**, **Akron, Ohio**, is directed to discontinue representing or advertising that its tires are "blow-out proof", until such is a fact, under an order to cease and desist.

The order prohibits the respondent company from phrasing its advertisements so as to cause the public to believe that its tires are "blow-out proof", and from furnishing its dealers and distributors with advertising copy which represents or implies that its tires are "blow-out proof", until and unless they are proof against blow-outs.

No. 2581. **Eton Knitting Corporation**, 13 West 36th St., **New York City**, is directed to discontinue unfair methods of competition in the sale of wearing apparel knitted or crocheted from yarn, under an order to cease and desist.

The order prohibits the respondent from using the word "knitting" as a part of its corporate name, and from advertising or otherwise representing, directly or by implication, that it is a manufacturer or knitter of the wearing apparel it sells, until and unless it owns, operates and controls a factory where its products are actually knitted or crocheted from yarn.

FEDERAL COMMUNICATIONS COMMISSION ACTION

HEARING CALENDAR

Thursday, February 20

ORAL ARGUMENT BEFORE THE BROADCAST DIVISION

Examiner's Report No. I-130:

NEW—Dudley J. Connolly, Elliot Knight, Roy W. Knight & Fred Sullivan, d/b as Dudley J. Connolly & Co., Chattanooga, Tenn.—C. P., 1200 kc., 100 watts, daytime.

Examiner's Report No. I-136:

KMA—May Seed & Nursery Co., Shenandoah, Iowa—Modification of license, 930 kc., 1 KW, 2½ KW LS, unlimited time. Requests facilities of KGBZ. Present assignment: 930 kc., 1 KW, 2½ KW LS, shares with KGBZ.

KGBZ—KGBZ Broadcasting Co., York, Nebr.—Renewal of license, 930 kc., 1 KW, 2½ KW LS, shares with KMA.

KGBZ—KGBZ Broadcasting Co., York, Nebr.—Modification of license, 930 kc., 1 KW, 2½ KW LS, unlimited time. Requests facilities of KMA. Present assignment: 930 kc., 1 KW, 2½ KW LS, shares with KMA.

KMA—May Seed & Nursery Co., Shenandoah, Iowa—Renewal of license, 930 kc., 1 KW, 2½ KW LS, shares with KGBZ.

Examiner's Report No. I-168:

NEW—W. A. Patterson, Chattanooga, Tenn.—C. P., 1420 kc., 100 watts LS, daytime.

Examiner's Report No. I-108:

NEW—Robert E. Herbst, Moorhead, Minn.—C. P., 1310 kc., 100 watts, unlimited time.

APPLICATIONS GRANTED

KWJJ—KWJJ Broadcast Co., Inc., Portland, Ore.—Granted C. P. to install new antenna; move transmitter and studio locally.

WIS—Station WIS, Inc., Columbia, S. C.—Granted modification of C. P. to extend completion date from 2-10-36 to 5-10-36.

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Granted modification of C. P. to extend completion date from 2-25-36 to 4-25-36.

WSAY—Brown Radio Service & Lab., Rochester, N. Y.—Granted modification of C. P. to change type of equipment; move transmitter and studio sites locally; extend commencement date to this date.

WIL—Missouri Broadcasting Corp., St. Louis, Mo.—Granted license to cover C. P. authorizing installation of new equipment; 1200 kc., 100 watts night, 250 watts day, unlimited.

WSYR-WSYU—Central New York Broadcasting Corp., Syracuse, N. Y.—Granted license to cover C. P. authorizing installation of new equipment; 570 kc., 250 watts, unlimited time.

KIEV—Cannon System Ltd., Glendale, Calif.—Granted license to cover C. P. authorizing new equipment and increase in day power to 250 watts, 850 kc.; daytime.

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—Granted license to cover C. P. authorizing changes in equipment; 1200 kc., 100 watts, unlimited time.

WPFB—Forrest Broadcasting Co., Inc., Hattiesburg, Miss.—Granted license to cover C. P. authorizing new equipment; change in hours of operation from S.H. to unlimited, and move transmitter locally, installing new antenna; 1370 kc., 100 watts, unlimited time.

WMFR—Hart & Nelson (J. A. Hart & Wayne M. Nelson), High Point, N. C.—Granted license to cover C. P. authorizing new station; 1200 kc., 100 watts, daytime.

KHJ—Don Lee Broadcasting System, Los Angeles, Calif.—Granted license to cover C. P. authorizing new station; 900 kc., 1 KW night, 5 KW day, unlimited; also granted license for auxiliary transmitter for auxiliary purposes only.

KPRC—Houston Printing Co., Houston, Tex.—Granted license to cover C. P. authorizing removal of transmitter to Deepwater; installing new equipment, and increasing day power to 5 KW; 920 kc., 1 KW night, unlimited.

KGMB—Honolulu Broadcasting Co., Ltd., Honolulu, T. H.—Granted license to cover C. P. authorizing move of transmitter and studio locally, installing new equipment, and increase in power to 1 KW; 1320 kc., unlimited time.

KNET—John C. Welch, Wm. M. Keller, Bonner Firzzell, d/b as Palestine Broadcasting Assn., Palestine, Tex.—Granted license to cover C. P. authorizing new station; 1420 kc., 100 watts, daytime.

KRLH—Clarence Scharbauer, Midland, Tex.—Granted license to cover C. P. authorizing new station; 1420 kc., 100 watts, daytime.

Standard Radio Inc., Hollywood, Calif.—Granted authority to transmit electrical transcription to foreign stations.

KPRC—Houston Printing Co., Houston, Tex.—Granted authority to determine operating power by direct measurement of antenna input in accordance with Rule 137.

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah—Granted amended C. P. to move transmitter site to near Salt Lake City to site to be determined; install new equipment; increase day power from 1 to 5 KW.

W7XBD—Oregonian Publishing Co., Portland, Ore.—Granted modification of C. P. extending commencement date to 1-15-36 and completion date to 8-15-36.

W2XJH—General Electric Co., Portable-Mobile, Schenectady, N. Y.—Granted license to cover C. P. (Exp. Gen. Ex.); frequencies 31100, 34600, 37600, 40600 kc., 15 watts, unlimited, in accordance with Rule 308.

W4XBT—Radio Station WSOC, Inc., Portable-Mobile (Charlotte, N. C.)—Granted license to cover C. P.; frequencies 31100, 34600, 37600, 40600 kc., 2 watts, unlimited, in accordance with Rule 308.

WLBC—Donald A. Burton, Muncie, Ind.—Granted C. P. to change equipment and increase power to 100 watts night, 250 watts day, inasmuch as Rule 131 has now been complied with.

WJBC—Wayne Hummer & H. J. Dee, d/b as Kashaskia Broadcasting Co., Bloomington, Ill.—Granted consent to voluntary assignment of license to Arthur Malcolm McGregor and Dorothy Charlotte McGregor, his wife, a partnership.

WFBC—Greenville News-Piedmont Co., Greenville, S. C.—Granted modification of C. P. to make changes in equipment.

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—Granted application in part, authorizing station to move locally and install new antenna system.

WIBA—Badger Broadcasting Co., Inc., Madison, Wis.—Granted extension of special temporary authority to operate with reduced power of 500 watts night, employing non-directional antenna, for the period Feb. 9 to March 9, 1936, in order to facilitate completion of construction authorized by C. P.

NEW—G. D. Goff, Tampa, Fla.—Reconsidered action in denying application for new station at Tampa, Fla., and granted applicant a re-hearing. Desires to operate on 1500 kc., 100 watts.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KEHE, Los Angeles; KFDY, Brookings, S. Dak.; KFEL, Denver, Colo.; KFRU, Columbia, Mo.; KFSD, San Diego, Cal.; KGFX, Pierre, S. Dak.; KGKO, Wichita Falls, Tex.; KHJ, Los Angeles; KLZ, Denver, Colo.; KMJ, Fresno, Cal.; KOAC, Corvallis, Ore.; KOMO, Seattle, Wash.; KPRC, Houston, Tex.; KSAC, Manhattan, Kans.; KTAR, Phoenix, Ariz.; KVI, Tacoma, Wash.; KVID, Denver, Colo.; KWTO, Springfield, Mo.; WAAF, Chicago, Ill.; WBAA, W. Lafayette, Ind.; WBEN, Buffalo, N. Y., and auxiliary; WCAC, Storrs, Conn.; WCHS, Charleston, W. Va.; WCOC, Meridian, Miss.; WEAN, Providence, R. I.; WEEL, Boston, Mass.; WGBF, Evansville, Ind.; WGBI, Scranton, Pa.; WGR, Buffalo, N. Y.; WGST, Atlanta, Ga.; WHJB, Greensburg, Pa.; WILL, Urbana, Ill.; WIP, Philadelphia, Pa.; WJAR, Providence, R. I.; WKRC, Cincinnati, Ohio; WKY, Oklahoma City, Okla.; WKZO, Kalamazoo, Mich.; WLBZ, Bangor, Me.; WMAL, Washington, D. C., and auxiliary; WMC and auxiliary, Memphis, Tenn.; WNAX, Yankton, S. Dak., and auxiliary; WORE, Needham, Mass.; WOSU, Columbus, Ohio; WPEN, Philadelphia, Pa., and auxiliary; WPRO, Providence, R. I.; WQAM, Miami, Fla.; WRAX, Philadelphia, Pa., and auxiliary; WREC, Memphis, Tenn.; WSPA, Spartanburg, S. C.; WSUI, Iowa City, Iowa; WTAR auxiliary, Norfolk, Va.; WWNC, Asheville, N. C.; WCAO, Baltimore, Md., and auxiliary; WDAF, Kansas City, Mo.; WDBO, Orlando, Fla.; WICC, Bridgeport, Conn.; WKBN, Youngstown, Ohio; WSWA, Harrisonburg, Va.; WTAD, Quincy, Ill.; KGW, Portland, Ore.; KPOF, Denver, Colo.; KSD, St. Louis, Mo.

WCBF—WCBF, Inc., Waukegan, Ill.—Granted renewal of license for the period ending Aug. 1, 1936.

ACTION ON EXAMINERS' REPORTS

WKZO—Ex. Rep. 1-8: WKZO, Inc., Kalamazoo, Mich.—Granted C. P., subject to Rule 131, to move transmitter; make changes in equipment; change power from 1 KW day, to 250 watts night, 1 KW day, and change time from daytime to unlimited; 590 kc. Examiner Geo. H. Hill sustained. Order effective, April 7, 1936.

NEW—Ex. Rep. 1-54: Helena Broadcasting Co., Helena, Mont.—Denied C. P. for new station to operate on 1420 kc., 100 watts, unlimited time. Examiner Melvin Dalberg reversed.

NEW—Montana Broadcasting Co., Freda Wessell, Sec'y, Helena, Mont.—Denied C. P. for new station to operate on 1420 kc., 100 watts, specified hours. Examiner Dalberg sustained.

NEW—E. B. Craney, Helena, Mont.—Denied C. P. for new station to operate on 1420 kc., 100 watts, unlimited time. Examiner Dalberg sustained. Order effective April 7, 1936.

KPPC—Ex. Rep. 1-102: Pasadena Presbyterian Church, Pasadena, Calif.—Denied C. P. to install new equipment and increase power from 50 to 100 watts night, 250 watts day; 1210 kc., share with KFXM. Examiner P. W. Seward sustained.

KPPC—Pasadena Presbyterian Church, Pasadena, Calif.—Granted modification of license to increase power from 50 to 100 watts; 1210 kc., share with KFXM. Examiner Seward sustained. Order effective April 14, 1936.

KGBU—Ex. Rep. 1-128: Alaska Radio & Service Co., Inc., Ketchikan, Alaska—Granted C. P., subject to recommendations of Engineering Department with respect to antenna construction, to make changes in equipment, and increase power from 500 watts to 1 KW night, 5 KW day; 900 kc., unlimited time. Examiner Melvin H. Dalberg sustained. Order effective April 14, 1936.

NEW—Ex. Rep. 1-172: Eastern Utah Broadcasting Co. (Sam G. Weiss), Price, Utah—Granted C. P. for new broadcast station to operate on 1420 kc., 100 watts, unlimited time. Examiner P. W. Seward sustained. Order effective April 7, 1936.

NEW—Ex. Rep. 1-177: Wisconsin Broadcasting Co., Oshkosh, Wis.—Denied C. P. for new broadcast station to operate on 1310 kc., 100 watts night, 250 watts day, unlimited time. Examiner John P. Bramhall sustained. Order effective April 14, 1936.

NEW—Edward Hoffman, St. Paul, Minn.—Reaffirmed original grant of C. P. for new radio station at St. Paul, Minn., to operate on 1370 kc., 100 watts, unlimited time, sustaining Examiner Melvin H. Dalberg in Report No. 1-76.

ACTION ON CASES HEARD BEFORE BROADCAST DIVISION

KFYR—Meyer Broadcasting Co., Bismarck, N. Dak.—Granted renewal of license, 550 kc., 1 KW night, 5 KW day, unlimited time. Order effective April 21, 1936.

NEW—Ward Walker, Seattle, Wash.—Denied C. P. for new broadcast station to operate on 760 kc., 250 watts night, 500 watts day, unlimited time (facilities of KXA). Order effective April 21, 1936.

NEW—Symons Investment Co., Seattle, Wash.—Denied C. P. for new broadcast station to operate on 760 kc., 250 watts night, 500 watts day, limited time (facilities of KXA). Order effective April 21, 1936.

KXA—American Radio Tel. Co., Seattle, Wash.—Granted renewal of license, 760 kc., 250 watts night, 500 watts day, limited time. Order effective April 21, 1936.

MISCELLANEOUS

WCFL—Chicago Federation of Labor, Chicago, Ill.—Granted regular renewal of license.

KOB—New Mexico College of Agriculture and Mechanic Arts, Albuquerque, N. Mex.—Granted petition asking continuance of hearing on application for renewal of license. New date set for March 25. Hearing was scheduled for Feb. 11, 1936.

C. G. Hill, Geo. D. Walker, and Susan H. Walker, Winston-Salem, N. C.—Granted request to take depositions in support of application for new station at Winston-Salem, N. C.

WDOD—WDOD Broadcasting Corp., Chattanooga, Tenn.—Granted petition to intervene in application of J. R. Maddox and Dr. W. B. Hair for C. P. for new radio station at Chattanooga to operate on 590 kc., 1 KW, unlimited.

Wyoming Tribune Leader and Wyoming Eagle, Cheyenne, Wyo.—Denied petition to intervene "to oppose granting of application of Wyoming Educational Society (Wyoming Radio Educational Assn.), or any other pending application for radio facilities in Cheyenne."

WHO—Central Broadcasting Co., Des Moines, Iowa.—Granted renewal of license for regular period.

KMMJ—The M. M. Johnson Co., Clay Center, Nebr.—Granted renewal of license for regular period.

WLS—Agr. Broadcasting Co., Chicago, Ill.—Granted renewal of license for regular period.

WWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—Granted renewal of license for the regular period.

WATR—The WATR Company, Inc., Waterbury, Conn.—The Commission, Broadcast Division, today granted the petition of WATR, Waterbury, Conn., and ordered the issuance to said station of special experimental authority to operate for the hours 1 to 3 a. m., EST, for a period of 30 days, provided station WOAI, San Antonio, Tex., does not operate during

said hours, and provided further that said authority be issued only upon the express condition that it may be withdrawn at any time by the Commission without advance notice or hearing.

ORAL ARGUMENTS POSTPONED

NEW—Ex. Rep. 1-138: Big Springs Herald Broadcasting Co., Big Springs, Tex.—Oral arguments scheduled for February 27 changed to March 12, 1936.

NEW—Vernon Taylor Anderson, Mgr., ABC Broadcasting Co., Big Springs, Tex.—Oral arguments scheduled for February 27 changed to March 12, 1936.

NEW—Plainview Broadcasting Co., Plainview, Tex.—Oral arguments scheduled for February 27 changed to March 12, 1936.

NEW—North Texas Broadcasting Co., Paris, Tex.—Oral arguments scheduled for February 27 changed to March 12, 1936.

SET FOR HEARING

NEW—Emilio Daffilo Ramirez, Mayaguez, P. R.—Application for C. P. for new station, 1370 kc., 100 watts night, 250 watts day, S.H. (6 to 9 a. m., 12 M-3 p. m., 6 to 9 p. m. daily).

NEW—A. W. Mills, Gallup, N. Mex.—Application for C. P. for new station, 1310 kc., 100 watts, unlimited.

NEW—Berks Broadcasting Co., Pottsville, Pa.—Application for C. P., 640 kc., 250 watts, daytime. Site to be determined.

NEW—Charles E. Wilkinson, Mason City, Iowa.—Application for C. P., 1370 kc., 100 watts, unlimited time. Site to be determined.

NEW—Alex F. Suss, Sacramento, Calif.—Application for C. P., 1310 kc., 100 watts, unlimited time. Site to be determined.

WPRO—Cherry & Webb Broadcasting Co., Providence, R. I.—Application for C. P. to install new equipment, increase power from 250 watts to 500 watts night, 1 KW day, employing directional antenna system night-time.

WTJS—The Sun Publishing Co., Inc., Jackson, Tenn.—Application for C. P. to move transmitter from Jackson, Tenn., to another site to be determined; install new equipment; increase power from 100 watts night, 250 watts day, to 250 watts night, 500 watts day; change frequency from 1310 kc. to 920 kc., using directional antenna.

NEW—The Press Democrat Pub. Co., Santa Rosa, Calif.—Application for C. P. for new station, 1310 kc., 250 watts, daytime.

KFBI—The Farmers & Bankers Life Ins. Co., Abilene, Kans.—Application for C. P. to move transmitter site from Milford to 3 miles west of city limits on No. 54 Highway, Wichita, Kans., and studio from Abilene to Wichita; and make changes in equipment.

WEST—Associated Broadcasters, Inc., Easton, Pa.—Application for modification of C. P. to change time of operation from sharing with WKBO to unlimited daytime, share with WKBO night; extend commencement date to 30 days after grant and completion date to 6 months thereafter.

WIL—Missouri Broadcasting Corp., St. Louis, Mo.—Application for C. P. for new equipment; change frequency from 1200 kc. to 1250 kc.; increase power from 100 watts night, 250 watts day, to 1 KW day and night.

KIUN—Jack W. Hawkins and Barney H. Hubbs, Pecos, Tex.—Application for modification of license to change frequency from 1420 kc. to 1310 kc.

WRAX—WRAX Broadcasting Co., Philadelphia, Pa.—Application for modification of license to increase power from 250 watts night and 500 watts day, to 1 KW night, using directional antenna, and 1 KW day.

WPEN—Wm. Penn. Broadcasting Co., Philadelphia, Pa.—Application for modification of license to increase power from 250 watts night (directional antenna), 500 watts day, to 1 KW night (directional antenna), 1 KW day.

NEW—Albert E. Davis, Brownwood, Tex.—C. P., already in hearing docket, amended to read: 1420 kc., 100 watts, daytime. Site to be determined.

NEW—Herbert Hollister, Emporia, Kans.—Application for C. P. for new station, 1500 kc., 100 watts, unlimited time.

NEW—Ruth W. Adcock and S. E. Adcock, d/b as General Broadcasters, Rossville, Ga.—Application for C. P., already in hearing docket, amended to read: 1120 kc., 250 watts daytime. Site to be determined.

NEW—Ruth W. Adcock and S. E. Adcock, d/b as General Broadcasters, Johnson City, Tenn.—Application for C. P., 880 kc., 250 watts daytime. Site to be determined.

NEW—Struble, Strong & Fagan, The Dalles, Ore.—Application for

- C. P., already in hearing docket, amended to read: **1200 kc.**, 100 watts, unlimited. Site to be determined.
- NEW—C. A. Rowley, Ashtabula, Ohio.—Application for C. P., already in hearing docket, amended to read: **940 kc.**, 250 watts, daytime only.
- NEW—Wm. H. Davis, Dixon Pyles, W. H. Johnson, d/b as Magnolia Broadcasting Co., Jackson, Miss.—Application for C. P. for new station, **1420 kc.**, 100 watts, unlimited time.

APPLICATIONS DENIED

- WEDC—Emil Denemark, Inc., Chicago, Ill.—Denied request for temporary authority to operate from 12 midnight to 6 a. m., CST, for a period not to exceed 30 days, pending application for modification of license, requesting same authority on a permanent basis.
- KARK—Arkansas Radio & Equipment Co., Little Rock, Ark.—Denied authority to operate with power of 500 watts night, 1 KW day, at present location with present antenna system, pending the installation of antenna system meeting requirements of Rule 131.
- NEW—Northern Commercial Co., Fairbanks, Alaska.—Denied as in cases of default application for C. P. for new station to operate on **550 kc.**, 250 watts, unlimited time, for failure to file an appearance and statement of facts in accordance with Rule 104.6(c). Application heretofore set for hearing.

APPLICATIONS RECEIVED

First Zone

- WREC—WREC, Inc., Memphis, Tenn.—Modification of construction permit (B3-P-161) for changes in equipment; installation of directional antenna; move of transmitter; and increase of power from 500 watts, 1 KW day, to 1 KW, $2\frac{1}{2}$ KW day, requesting extension of completion date from 2-29-36 to 4-29-36.
- NEW—Maine Broadcasting Co., Inc., Portland, Maine.—Construction permit for a new station to be operated on **620 kc.**, 500 watts, 1 KW day, unlimited time.
- WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine.—Modification of license to change frequency from **620 kc.** to **970 kc.**, and hours of operation from unlimited time to daytime until sunset at Chicago, Ill., contingent upon the granting of B1-P-966 requesting a new station at Portland, Maine.
- WFBR—The Baltimore Radio Show, Inc., Baltimore, Md.—Modification of license to use present licensed transmitter as an auxiliary and the auxiliary transmitter as a main transmitter.

- WFBR—The Baltimore Radio Show, Inc., Baltimore, Md.—License **1270** to cover construction permit (B1-P-847) for changes in auxiliary equipment.
- NEW—Auburn Publishing Co., Auburn, N. Y.—Construction permit for a new station to be operated on **1420 kc.**, 100 watts, unlimited time. Amended to make changes in equipment.
- NEW—Atlantic Broadcasting Corp., Portable-Mobile.—Construction permit for a new general experimental station to be operated on **31100, 34600, 37600, 40600, 86000, 400000, 401000 kc.** and above, 50 watts.

Second Zone

- WHBC—Edward P. Graham, Canton, Ohio.—Voluntary assignment **1200** of license and construction permit from Edward P. Graham to The Ohio Broadcasting Co.

Third Zone

- NEW—Van Luke Walling, Huntsville, Ala.—Construction permit **1210** for a new station to be operated on **1210 kc.**, 100 watts, unlimited time.
- NEW—Earl Weir, St. Petersburg, Fla.—Construction permit for a **1370** new station to be operated on **1370 kc.**, 100 watts, unlimited time.
- KILU—Arkansas Radio & Equipment Co., Little Rock, Ark.—Modification of license to add frequencies **2050** and **2790 kc.**
- NEW—Voice of Longview, Portable-Mobile.—Construction permit for a new broadcast pickup station to be operated on **1622, 2050, 2150, 2790 kc.**, 40 watts.

Fourth Zone

- WOWO—The Main Auto Supply Co., Fort Wayne, Ind.—Consent **1160** to transfer of control of corporation from Fred C. Zieg, C. R. Durbin and J. A. Becker to Westinghouse Electric & Manufacturing Co., 800 shares common stock.
- WGL—F. C. Zieg (Allen-Wayne Co.), Fort Wayne, Ind.—Voluntary **1370** assignment of license from F. C. Zieg (Allen-Wayne Co.) to Westinghouse Electric and Manufacturing Co.

Fifth Zone

- KLZ—The Reynolds Radio Co., Denver, Colo.—Modification of **560** license to change name from The Reynolds Radio Co., Inc., to KLZ Broadcasting Co.

JAMES W. BALDWIN, Managing Director

NAB REPORTS

Copyright, 1936. The National Association of Broadcasters

Special
FEBRUARY 18, 1936

REPORT ON COPYRIGHT

Submitted to the Board of Directors at a meeting held in Chicago, Illinois, February 3, 1936

To the Board of Directors of the National Association of Broadcasters:

You have been called to this meeting held February 3, 1936, primarily for the purpose of considering questions of vital importance to the broadcasting industry in the field of copyright. To assist in your determination of these questions, I have prepared this report setting forth the facts as I find them, and closing with certain conclusions and recommendations submitted for your consideration.

By resolution adopted on December 17, 1935, at your last meeting, you conferred broad authority on me to negotiate in behalf of independently-owned stations for copyright licenses. Pursuant to that resolution, over 300 broadcasters gave me powers of attorney to act for them in the crisis which was at hand. This response far exceeded the fondest hopes even of those who voted for the resolution, and represented a unified action in the broadcasting industry beyond anything yet seen. Further pursuant to that resolution, I assembled an advisory committee which I am sure you will agree was truly representative of various classes of independent stations and was composed of able and conscientious men. These men worked long and laboriously with me through two sessions in New York, one of them from December 27 to December 31, 1935, and again on January 10-11, 1936, and I had the constant advice and assistance of several of them in the interim between the two sessions.

Notwithstanding these facts, I regret to report that, so far as ASCAP is concerned, the result was a complete and humiliating failure. This fact is a challenge to the Officers and Directors of the NAB, and to every broadcaster in the United States. How did it come about that the combined negotiating power of over 300 broadcasting stations (including most of the larger independent stations) could be not only utterly ignored but be treated with contempt? One of the principal purposes of this report is to set forth and analyze the facts to determine the answer to this question. This, it seems to me, is necessary in order to decide upon the future course of action of the NAB in the field of copyright, and to avoid any mistakes that may have been made in the past.

In Parts VII and VIII of this report I have set forth my conclusions and my recommendations and shall not anticipate them in detail here. It is necessary, however,

to say a word in advance. Whatever approach is made to the study of the causes of the repeated failure of NAB negotiations with ASCAP, the path leads inevitably to certain basic causes which are familiar to everyone, such as ASCAP's monopolistic power, combined with lack of availability of sufficient non-ASCAP music and with defects in the copyright law. More recently, however, there has been added to these basic causes a factor so important as to have been well nigh a determining influence in all negotiations. I refer to the discriminatory contracts enjoyed by the two national network companies, combined with the power indirectly given to ASCAP by the contracts which those companies have with affiliated stations, under which the latter are obligated to have ASCAP (and other) licenses. As I shall point out, this factor (in addition to the basic causes) more than anything else brought about our recent defeat, and will continue to stand in the way of success of any fair and equitable copyright program NAB may adopt, whether it be per-piece, measured service, or some other kind of system.

If I am correct in this conclusion, then, if NAB is to continue to function in the field of copyright and fairly to represent the great majority of its membership, among its principal objectives should be

1. Elimination of all discriminations in contracts with ASCAP and other licensing pools.
2. Elimination of the requirement in network-affiliate contracts that affiliate stations have licenses from ASCAP or any other licensing pool.
3. Clearance of copyright at the source on network programs, to the end that the network is responsible for the obtaining of licenses and the payment of fees on network programs broadcast by affiliate stations.

Obviously, in the absence of assent by the network member stations of the NAB, these objectives cannot be striven for without a division in the ranks of the Association with all the consequences this would entail. On the other hand, these objectives cannot be ignored without forcing upon the great majority of independent stations a realization that to have any measure of success in future copyright negotiations they must unite outside of NAB and act independently of it. As I see it, the issue for them is not whether they shall or shall not have a per-piece or measured service plan (although, in view

of the fact that the NAB has gone on record in favor of such a plan at its last three conventions, this issue is extremely important). The issue is, whether they are to have *any voice whatever* in determining what agreements they will enter into with licensing pools. So far they have been denied that voice.

Broad as were the powers given me by the resolution of December 17, 1935, I do not construe them as authorizing me definitely to commit either the Board or the Association to either course. It seems to me that a choice must quickly be made between

1. a comparatively innocuous course avoiding any issue wherein the interests of the networks are opposed to those of the independent station, and

2. a militant course which would include the objectives above set forth.

This report is, therefore, also a request for instructions from the Board of Directors by whom I am employed and to whom I am responsible. It may be that the Board will feel that this issue is so far-reaching that it should be submitted to the membership either at the next Annual Convention or at a Special Meeting to be called at an earlier date.

In view of the importance which attaches to the discriminatory contracts, I have, at some length, summarized their nature, their history and their effect on our negotiations, in order that, as nearly as is in my power, the correct facts shall be before the Board. Other headings included in this report explain themselves.

I. ANALYSIS OF TOTAL COPYRIGHT FEES PAID BY BROADCASTERS IN 1935

This analysis is of fundamental importance to an understanding of the present situation. First, it explains the basis for one of the principal complaints against ASCAP by the overwhelming majority of independent broadcasters, as well as the principal obstacle to negotiation of a per-piece or measured service plan. Second, it explains one of the principal reasons leading to the withdrawal of the Warner Brothers group of music publishing houses from ASCAP, i.e., that, because of the discriminatory contracts in favor of the networks, a large portion of the broadcasting industry's net receipts is escaping the payment of fees for the use of copyright music.

For the sake of simplicity and because of lack of data on other licensing organizations, this analysis will be confined largely to copyright fees paid to ASCAP, and will be made in round numbers.

The broadcasting industry paid ASCAP approximately \$2,995,000 in 1935, or, in round figures, \$3,000,000. Of this sum about \$850,000 consisted of sustaining fees, and about \$2,150,000 of fees paid on so-called net receipts of broadcasters on commercial programs. The sum of \$2,150,000 represents 5% of \$43,000,000. The term "net receipts," as defined in ASCAP contracts, refers to the full amount paid to the broadcaster for the use of his broadcasting facilities after deducting commissions not exceeding 15%, if any, paid to advertising agents or

agencies not employed or owned in whole or in part by the broadcaster. Even if it be assumed that 15% has been paid in all cases (which is, of course, not the fact), net receipts of \$43,000,000 would correspond to less than \$51,000,000 of gross receipts.

The fact is that, as nearly as can be calculated on the basis of data now available, the gross receipts of the broadcasting industry for 1935 were about \$87,500,000 and, if a 15% commission were deducted in all cases (which, as already stated, is not the fact), the net receipts were about \$74,000,000. From these figures it is clear that about \$30,000,000 or more of net receipts (corresponding to about \$35,000,000 of gross receipts) is escaping the payment of copyright fees.

The overwhelming majority of independent broadcasters are paying ASCAP 5% of their net receipts and the discrepancy is not due to them. The discrepancy is due primarily to the discriminatory contracts mentioned at the outset.

Let it be assumed that \$74,000,000 represents the net receipts of the broadcasting industry and that \$2,150,000 represents the sum (exclusive of sustaining fees) paid to ASCAP for the year 1935. If the entire broadcasting industry were paying on a uniform non-discriminatory percentage basis, each broadcaster would have paid 3% of his net receipts (instead of 5% as at present). If sustaining fees were abandoned and all fees reduced to a percentage basis, the total of \$3,000,000 received by ASCAP in 1935 would represent about 4% of each broadcaster's net receipts (instead of 5% plus a large sustaining fee as at present). If the percentages be figures in terms of the gross receipts of \$87,500,000, each broadcaster need have paid only about 2.5% plus his sustaining fee, or less than 3.5% without any sustaining fee.

The discriminatory ASCAP contracts, so far as they are known, consist (1) principally in the contracts of the two national network companies, and, to a much smaller extent, (2) in the contracts of about 48 newspaper-owned stations, and (3) the contract of WCAU, Philadelphia. The nature of the discriminations will be briefly described.

1. *The Network Contracts.* The two national network companies (NBC and CBS) pay nothing to ASCAP as networks. Each company pays a sustaining fee plus 5% of net receipts with respect to each station owned or controlled by it, NBC with respect to 14 stations (KDKA, KGO, KOA, KPO, KYW, WBZ, WEA, WENR, WGY, WJZ, WMAL, WMAQ, WRC and WTAM) and CBS with respect to 7 stations (KMOX, WABC, WBBM, WBT, WCCO, WJSV and WKRC).

Neither company pays any sustaining fee or percentage of net receipts on revenue received from advertisers for the facilities of affiliated stations, not owned or controlled by the network company. For example, Station A, independently owned but affiliated with NBC, may have a rate of \$300 an hour at which rate its facilities are sold by NBC to a network advertiser. Of this \$300, NBC pays only \$50 to Station A and keeps \$250. Station A pays ASCAP 5% of the \$50 received by it; NBC pays ASCAP nothing on the remaining \$250.

Furthermore, neither company pays 5% on the total net receipts even of its own stations. By a process of bookkeeping or by use of subsidiary corporations, only a portion of what is paid by a network advertiser is credited to these stations and subjected to the 5% fee. For example, Station B, owned by NBC, may have a rate of \$1200 an hour at which rate its facilities are sold by NBC to a network advertiser. Of this \$1200, NBC may credit the station with only \$400 and retain \$800 as "network" receipts. NBC pays the 5% fee only on the \$400.

While complete exact figures are not available (due in part to the unwillingness of the networks to supply them), sufficient are at hand to give some idea of the amount of net receipts which thus escape taxation by ASCAP. The following figures show what was actually paid to ASCAP by the two national network companies during 1934 and during the first six months of 1935.

1934		
	<i>Sustaining Fee</i>	<i>Advertising Fee</i>
NBC	\$173,500.00	\$137,541.96
CBS	68,500.00	106,778.44
Total ...	\$242,000.00	\$244,320.40

¹ One of NBC's 14 stations, KYW, was not acquired until December 3, 1934.

January 1-July 1, 1935		
	<i>Sustaining Fee</i>	<i>Advertising Fee</i>
NBC	\$ 89,250.00	\$ 89,794.79
CBS	34,249.92	68,633.06
Total ...	\$123,499.92	\$158,427.85

Multiplying the six-months figures by two, we arrive at the following payments made by the two national network companies to ASCAP in 1935:

	<i>Sustaining Fee</i>	<i>Advertising Fee</i>
NBC	\$178,500.00	\$179,589.58
CBS	68,499.84	137,266.12
Total ...	\$246,999.84	\$316,855.70

According to the above figures, the two network companies paid substantially \$247,000 out of the total of \$832,000 in sustaining fees received by ASCAP from broadcasting in 1934, or 29.7%.

According to the above figures, the two network companies paid substantially \$317,000 out of the total of \$2,150,000 in advertising fees received by ASCAP from broadcasters in 1935, or 14.7%. The sum of \$317,000 represents 5% of \$6,340,000 net receipts.

It is now appropriate to compare the total net receipts of the two national networks with the total net receipts of the rest of the broadcast industry. Exact figures for the net receipts are not available and a calculation must, therefore, be made on the basis of gross receipts (gross time sales). Even these involve an approximation since

exact figures for the month of December are not yet available. The gross and net receipts for 1935, thus calculated, are as follows:

Gross Receipts for 1935

	<i>1st 6-mos.</i>	<i>Total</i>
National Networks	\$26,120,410	\$50,067,686
Regional Networks	465,899	1,110,739
National non-Network	8,591,053	17,063,688
Local	9,898,610	19,281,735
Total	\$45,075,972	\$87,523,848

The national network business, therefore, represents slightly over 57% of the total broadcasting business for 1935. At this point, however, we meet with a lack of information which makes it difficult to reach even approximate conclusions. It is not known how much of the net receipts of the national networks are (a) paid over to affiliate stations, or (b) paid over or credited to stations owned or controlled by the networks. It is also not known how much of the national non-network and the local receipts represent receipts on business of stations owned or controlled by the national network companies. Even with the making of liberal allowances, however, it seems clear that at least the sum of \$25,000,000 (and probably more) of national network net receipts is escaping the payment of any tax to ASCAP. Or, to state the matter in another way, the national network companies are paying ASCAP only about 1% of their net receipts, in contrast to the 5% paid by independent broadcasters.

2. *The Newspaper Contracts and the WCAU Contract.* While the discriminatory features in these contracts permit the licensees to escape a certain amount of the burden borne by other stations, the amount of saving is not known. In any event, the total saving is not large enough so that elimination of the discriminations would make possible any material reduction in the percentage paid by other stations.

II. ORIGIN OF DISCRIMINATORY ASCAP CONTRACTS

For some years prior to 1932 broadcasters paid ASCAP on the basis of flat annual license fees, payable in monthly installments. The total paid ASCAP in 1932 was approximately \$960,000. The licenses were for short term periods, such as a year or two; the end of each period brought a bitter controversy and almost invariably an increase in fees. While undoubtedly ASCAP attempted in a general way to relate the size of the fee to the importance of the station there was little uniformity and the amounts paid by stations were kept secret. Such discriminations as there were, however, are irrelevant to the present discussion.

In the latter part of 1931, as licenses terminated, renewals were placed on a month-to-month basis and ASCAP let it be known that it was working out a new system of fees. On April 11, 1932, the new basis was

announced by E. Claude Mills, General Manager of ASCAP, effective June 1, 1932, as follows:

Sustaining License

"At approximately present rates, with such readjustments either upward or downward as will equalize the fee paid by stations operating under similar or equal conditions * * *."

Commercial License

"At 5% of the amounts charged for use of the facilities of the station in respect to all commercially sponsored non-network programs. In the case of network programs, the fee of 5% is payable by the key station based upon the gross amount charged for use of broadcasting facilities * * *."

Thus it will be noticed ASCAP's first proposal recognized that in network programs copyright should be cleared at the source. At that time it was estimated that the gross receipts of the broadcasting industry were between \$50,000,000 and \$60,000,000. The proposal therefore meant an increase in the total fees to be paid ASCAP of over 300%.

An emergency meeting of the NAB Board was held in New York April 18-19. As a result of conferences with Mills a moratorium until September 1st was decided upon in order to permit negotiations. A special copyright committee was appointed by the NAB Board to carry on negotiations with ASCAP, consisting of Morency, WTIC, Chairman; Ashby, Vice President of NBC; Klauber, Vice President of CBS; Cummings, WOAI; and Shaw, WMT. Cummings and Shaw were thereafter unable to be present or to participate in the committee's work, so that the committee in reality consisted of Morency, Ashby and Klauber. A plenary committee was created to survey the entire music situation. The NAB addressed a formal communication to ASCAP in which it refused to accede to the ASCAP proposal and pointed out, among other things, the unsoundness of the proposed basis for assessing fees, particularly with respect to programs in which no use is made of copyrighted music controlled by ASCAP.

The negotiating committee thereupon proceeded to have conferences with ASCAP representatives. The plenary committee considered a survey of music in the public domain as well as a study of the foreign music copyright situation. Oswald F. Schuette was engaged as a sort of generalissimo, with his principal duties on the legislative front. Since the legislative history of this period, while important, is of only incidental relevancy to this discussion, it will be passed over. A further meeting of the NAB Board was held in Chicago on May 24th. A special meeting of the NAB negotiating committee, the plenary committee and others (including the presidents of the two networks) was held in New York on July 6th. No progress, however, had yet been made by the negotiating committee.

Finally, Mills and the NAB negotiating committee worked out a proposition whereby the broadcasters would

pay a flat increase of 25% for one year beginning January 1, 1933, during which period a legislative truce in Congress would be declared and further negotiations would be undertaken towards an acceptable basis. The NAB Board was called into a special session in New York on July 21st. It rejected the proposal, principally because of the provision for legislative truce, and made a counter-proposal calling for a 25% increase for two years during which time a joint committee of the NAB and ASCAP would cooperate in drafting a scale based on a "per-piece" arrangement. This proposal was submitted to Mills on July 26th by the Negotiating Committee and was rejected by the ASCAP Board on the following day, apparently by a very close vote.

On July 28th Mills made an announcement virtually breaking off negotiations. Orally, however, he announced new terms consisting of a modification of the proposal first made on April 11th. These terms consisted of a sustaining license fee, as previously proposed, plus a percentage of gross receipts for a period of three years, the percentages being 3% the first year, 4% the second year and 5% the third year. The same principle was followed with respect to network programs as in the proposal of April 11th; namely, that the networks should bear the entire cost on network programs, in other words, that copyright should be cleared at the source. In response to a letter from the NAB Negotiating Committee, Mills indicated willingness to reopen negotiations by letter dated August 3rd, in which he stated the modified proposal in written form.

What happened between this date and August 24th is a matter of speculation. A meeting of the NAB Board was held on August 24th in New York and at that meeting the Negotiating Committee presented *another* proposition from ASCAP with the following recommendation:

"The committee believes that the foregoing settlement is the most favorable that can be reached and recommends that the Board accept it and recommend its acceptance by the independent stations."

This final proposal was the same as that announced by Mills on July 28th *with one very important exception*. The exception was that the networks would not pay anything on their receipts as networks but would pay only royalties on the net sales of each station owned and operated by them, whereas network affiliates would pay the percentage rate on their receipts on network as well as on non-network commercial programs. After a tumultuous session the Board voted acceptance of the report, with four representatives of independent stations not voting. A number of the Directors that voted for it did so only because under the circumstances they felt they had no alternative.

In the course of the weeks that followed more favorable contracts were also negotiated by a group of newspaper-owned stations. Under the terms of these contracts the newspaper-owned stations were to pay (1) a sustaining fee of 50% of the fee previously paid; (2) 3% of receipts up to an amount equal to 50 times the sustaining

fee, and 5% of receipts above that amount, and (3) in any event, a minimum fee of not less than 4 times the sustaining fee.

WCAU, Philadelphia, also negotiated a more favorable contract. In its case the percentage is based on receipts from programs using music and the contract contains other advantageous provisions, consisting chiefly of a low sustaining fee and the privilege of deducting legitimate salesmen's commissions.

While a number of incidental facts are in doubt and open to controversy, the conclusion is inescapable that during the final hours of the negotiations the NAB Negotiating Committee directed its efforts toward relieving the networks of the burdens that would have fallen on them under Mills' proposal of July 28th, and transferring a substantial share of this burden to the independently-owned affiliate stations. Under these circumstances it is not surprising or open to serious criticism that in their later negotiations other stations, including the newspaper group, attempted to secure concessions. In fairness to the newspaper group it should be stated that its leaders and spokesmen have regularly proved willing to cooperate with other independent stations in the attempt to obtain from ASCAP a per-piece or a measured service plan available to all stations on a non-discriminatory basis. So far as publicity is concerned (including the allegations in the government's suit against ASCAP), however, the newspaper contract has been the chief target as an example of discrimination, while comparatively little has been printed about the much greater discrimination involved in the network contracts which, as hereinafter shown, were fundamentally responsible for the recent failure in NAB's negotiations with ASCAP.

III. RENEWAL OF THE DISCRIMINATORY CONTRACTS IN JUNE, 1935.

Assurances given by Mills in 1932 that the forced acceptance of the new ASCAP contracts did not foreclose further negotiations and that ASCAP stood ready to consider a revision at any time were, with minor exceptions, not borne out by later events. On October 10, 1932, ASCAP did announce that it would not require payment of royalties on political speeches, the national election campaigns being then in full progress, and, in the case of many of the smaller stations, there were reductions in sustaining fees, the total reduction, however, not amounting to very much.

During the fall of 1932, Mills assured Schuette that he was willing, subject to the approval of the ASCAP Board, to limit royalties to programs using ASCAP music, but on November 2nd the ASCAP Board went through the familiar process of refusing to ratify the proposal. Tactics such as these were to be repeated over and over again during the ensuing three years, principally on occasions when ASCAP had reason to fear some concerted or effective action on the part of the broadcasting industry and desired to delay such action.

At the NAB Annual Convention, held in St. Louis on November 14-16, 1932, Schuette was given broad authority and a resolution was unanimously adopted declaring that

"the composers and publishers are entitled to fair compensation, measured in proportion to the actual use of their compositions"

and, by other actions, the basis was laid for the three-point program of the NAB discussed under a later heading, which was formally put into motion at a NAB meeting held in New York on April 5, 1933.

Immediately after the Convention Schuette made a proposal that royalties be 4% of revenue from programs using ASCAP music, plus a sustaining fee. Mills responded that action on this proposal must await an ASCAP Board meeting in January. In a letter dated January 18, 1933, Mills offered to reopen negotiations but declared that under no circumstances would he deal with Schuette (who was sending out some rather vigorous circulars to all stations, having to do principally with "plugging" and "restricted" ASCAP numbers).

On January 24, 1933, announcement was made that Hon. Newton D. Baker had been retained and on February 20-21, 1933, an NAB Board meeting was held in Washington at which Mr. Baker's partner, Mr. Hostetler, was present and stated his plans for future activity. It was decided that Schuette's work was henceforth to be confined principally to the Radio Program Foundation proposal. Mills immediately extended an invitation to Baker to enter into negotiations. These negotiations came to an abrupt end on April 4, 1933, when at a meeting with Hostetler, Levy and McCosker, Mills announced point blank that there would be no revision of the contracts except upward.

Immediately after the NAB Board meeting of April 5, 1933, when the three-point program was definitely decided upon, Mills communicated with Baker and informed him that he was again ready to talk over matters. Baker replied on April 6th that he would be willing to talk only if it were understood in advance that the basis would be in the direction of a per-piece plan and that, during the working out of such a plan, the present scale would be amended so that royalties would be paid only on programs using ASCAP music. The ASCAP Board met to consider this proposition April 27th. It turned the matter over to its general counsel, Nathan Burkan, while Mills departed for Europe.

From that time on, for a period of two years, while there were occasional conversations, no progress whatsoever was made in negotiations with ASCAP and nothing occurred in connection with these negotiations that would add to the picture given by the foregoing account. This brings us to the early Spring of 1935.

Before resuming the story of the negotiations at this point, I must call your attention to the situation as a whole in April, 1935. I do this because of some of the statements which have been so widely made as to the reasons for events which took place the following June,

and the charges that those who have worked for the per-piece or measured service plans have been "dividing the industry."

First, let us consider the per-piece or measured service plan. It had been endorsed by the NAB at the St. Louis Convention in November, 1932, after a proposal made by Schuette for a measured service plan had been turned down by ASCAP. It was endorsed again by the NAB at the White Sulphur Springs Convention in October, 1933. It was endorsed again by the NAB at the Cincinnati Convention in September, 1934. It was endorsed again by the NAB at the Colorado Springs Convention in July, 1935. Throughout this period the plan was expressly or impliedly endorsed at many meetings of the NAB Board of Directors, among which need be mentioned only the meetings held in Washington, May 14, 1934, and in New York on June 22, 1935. It was the basis of all negotiations with ASCAP conducted, first by Schuette and later by Baker and Hostetler, for the entire three-year period, and this fact was made clear beyond question in reports made by Hostetler and others at the White Sulphur Springs, the Cincinnati, and Colorado Springs Conventions. Prior to the Spring of 1935, either expressly or tacitly the two networks and Levy gave approval to what was being done by Hostetler and others negotiating in behalf of the industry. Large contributions were sought from and made by independent stations, as well as by the networks and Levy, for the carrying forward of the program of which this was an integral part. The Government suit against ASCAP, instituted August 30, 1934, had, as one of its principal express purposes, a reorganization of ASCAP so as to establish a system of fees based upon actual use of music and competition between copyright-owners. This was thoroughly explained to and understood by the NAB membership.

Secondly, we should note the progress which had been made on the NAB three-point program by the Spring of 1935. With reference to the Government suit against ASCAP, the Government had won an overwhelming victory on March 26, 1935, when the Court granted the Government's motion to strip the case of irrelevant issues and denied ASCAP's motion seeking to delay trial by permitting the taking of depositions all over the world. By the second week in May, it was clear that trial would be had at an early date, beginning on June 10th. On the legislative side, the Duffy Copyright Bill was moving slowly but surely toward enactment, it being certain by the second week in May that it would be favorably reported by the Senate Patents Committee and would eventually be passed by the Senate. A surprise attempt to commit the United States to the International Copyright Convention had been frustrated and on April 22, 1935, the Senate had rescinded its ratification of that treaty. The only point in which no recent progress had been made was that represented by the Radio Program Foundation, which had lain dormant for a year or more. In addition to all this, ASCAP was torn with internal dissensions and a number of its important members were threatening to withdraw as of December 31, 1935. There was even talk

among some of them of the per-piece plan and there was open talk of a consent decree in the Government suit. As early as December, 1932, it had been reported that ASCAP was working out a revised system of distributing royalties to its own members based on a per-piece plan.

On the whole, therefore, it may be said that never before had the broadcasting industry been in as strong a position to demand justice from ASCAP as it was in the Spring of 1935. By June 1, 1935, it was possible for comments to be made such as appeared in the issue of *Broadcasting* for that date, such as the editorial caption "Old ASCAP—Last Curtain," and the statement "ASCAP appears to be on its last legs as the hard-hearted music trust." Proof of this, if proof is necessary, is furnished by the fact that shortly prior to April 26, 1935, ASCAP invited the broadcasters into a conference which was held that day. With this conference the all too familiar tactics of the past began once more. In behalf of the NAB Hostetler made it clear that any agreement reached must be acceptable to the Government; also, that NAB was on record in favor of a per-piece or measured service plan and that such a plan was contemplated in the Government suit. A six-months' license extension under present terms was suggested, contingent upon any action taken in the Government's suit. The ASCAP spokesmen promised a recommendation to that effect to the ASCAP Board, but it was later turned down.

A meeting of the NAB Copyright Committee was held in New York May 13th. It was understood that representatives of both the broadcasting industry and ASCAP would meet at noon for further discussions to work out a temporary arrangement. There were present McCosker, Chairman of the Copyright Committee; Ward, NAB President; Allen, WLVA; Klauber, CBS; Ashby, NBC; Damm, WTMJ; Russell, NBC; Levy, WCAU; Loucks, NAB Managing Director; and Hostetler. Bennett, special assistant to the Attorney General in charge of the ASCAP suit, was called in. There is a marked difference of opinion as to whether Bennett did or did not make certain statements. According to Levy's statement made later (in the Convention in July), Bennett had said in substance that it would jeopardize the Government's case if the NAB were to ask for anything except an extension of the present contract, and particularly if the NAB were to ask for and secure a more favorable contract. Hostetler has no recollection of Bennett's saying that nothing better could be accepted. Among the others, some apparently corroborate Levy and some Hostetler. Several months later the Department of Justice, through the Hon. John Dickinson, addressed a letter to NAB stating that it is not, and never has been, the position of the Department of Justice that a better contract should not be sought.

In any event, at the meeting with ASCAP that day, ASCAP offered a straight five-year extension. Hostetler opposed this on the ground that it would affect the Government suit adversely. At a meeting held May 23rd the NAB Copyright Committee rejected the proposal and made a counter-proposal of extension of all existing contracts until the conclusion of the litigation. According

to Levy, Bennett had advised the Committee that if this were turned down by ASCAP the broadcasters would then be in the position of having been coerced into accepting the five-year extension and the extension would not be prejudicial to the Government's case. The chairman of the ASCAP committee agreed to submit the proposition to the ASCAP Board, with a reply expected the following week. The ASCAP Board not only rejected the proposal but, pursuing the oft-repeated tactics of the past, sought to alarm the broadcasters by withdrawing the offer of a straight five-year extension.

In the meantime, on May 20, 1935, Loucks, NAB Managing Director, had reached an agreement with Mills for an extension of all licenses from their expiration date, September 1, 1935, to January 1, 1936. This date coincided with the date on which the existing contracts between ASCAP and its members were to expire. The form of extension was approved and, by public announcement in the *NAB Bulletin* (as well as in *Broadcasting*), broadcasters were advised that they might execute and return the extensions.

During this same period there were other proposals made and informally discussed, as to which the record is not clear enough to justify my attempting to describe them. With possibly one or two exceptions, they do not add anything to the picture as a whole. At one point Mills made a proposal which, in the judgment of Hostetler and his associates, was simply intended to divide the industry by arraying the independent stations against the networks, and which therefore was not submitted to broadcasters generally. Failing in this, he apparently decided to pursue the opposite tactics and, by dealing with the two networks and WCAU, to array them against the independent stations. At least, that is what he succeeded in doing and, as is well known to those who have had dealings with him, he has frequently asserted that such was his intent.

It should be noted at this point that during this entire period at least one and probably both of the networks were negotiating for the purchase of the Warner Brothers group and perhaps other publishing houses. I am informed that these negotiations were broken off on June 2, 1935. The fact of these negotiations was not, so far as I know, communicated to the officers, directors or copyright committee of the NAB.

On June 3, 1935, a meeting of the copyright committee was held on short notice in New York. A quorum was not present. Those present were McCosker, Russell, Levy, Klauber, Colin, Kaye, Ashby, Sprague, Loucks, and Hostetler. Mills sent over a proposal contemplating a five-year renewal based on the available catalog rather than on the present catalog, i.e., on whatever catalogs ASCAP happened to have. This, of course, raised a question as to the effect of the threatened withdrawal of the Warner Brothers group. By about 6 p. m., on that date, no progress had been made. Hostetler and Loucks still opposed a straight five-year extension; Levy and others were in favor of it.

Finally, Levy telephoned Mills and asked whether ASCAP would agree to a straight five-year extension. Mills assented. The Committee, after discussion, came to no decision. Levy then informed the Committee that he would meet with ASCAP the following morning and arrange for a five-year extension for his station. He also stated that he would send out a letter to all broadcasters informing them of his action and advising them to do likewise. Hostetler told Levy that if he sent such a letter he should inform all stations of the advantageous features of the WCAU contract. According to Hostetler, Levy said he would. According to Levy, Levy said it was unnecessary since the WCAU contract was well-known, its terms having been voluntarily disclosed at the St. Louis and later Conventions. In any event, it was Hostetler's and Loucks' understanding that McCosker was to get Mills' offer in written form so that it could be submitted to the Copyright Committee and in turn to the NAB Board before it was executed.

The following day Hostetler and Loucks waited at the St. Regis Hotel until about 3:30 p. m. when they had to leave to catch a train for Washington. On arriving in Washington in the evening they learned for the first time that during the day, Levy and the two networks had concluded 5-year extensions of their contracts from January 1, 1936, Levy's contract being renewed without change, and the network contracts being subject to an increase in sustaining fees of \$25,000 each for three of their stations (WEAF, WJZ and WABC). Late in the afternoon Levy had advised Bennett of these renewals by telephone to Washington.

Hostetler, arriving in Cleveland on the morning of June 5th, immediately sent Loucks a letter summarizing his recollection of the understandings at the meeting of June 3rd and expressing his views on the actions of Levy and of the networks. Levy sent out a letter to all stations informing them of the extensions, and advising them to do likewise. He gave, as reasons for the advice, that the Government suit would not be terminated for several years, and that the suit would in no wise be affected by a 5-year extension. He mentioned that Hostetler and Loucks held contrary views to his, but was silent on the subject of the WCAU contract. Thereupon, Loucks circulated the material portions of Hostetler's letter. On June 11th, Levy sent out a second letter, setting forth his views at length. In addition to defending his failure to mention the WCAU contract and reiterating his contention that the Government's suit could not possibly be prejudiced, he asserted that the Copyright Committee

"had been reliably informed that the minutes of ASCAP showed that they intended to increase our payments up to 25% of our gross receipts."

So far as I can discover, the sole basis for this assertion was a statement which had been made by Bennett at the Committee's meeting of May 13th; he told the Committee that the ASCAP minutes showed that one Sol Bernstein had made that proposal to ASCAP.

In his letter Hostetler had referred to the network contracts and stated that he did not see how it was now possible to avoid calling the Court's attention

"to this preference in explanation of the willingness of the chains to execute an extension agreement on the very eve of trial of the Government suit."

Levy replied

"Mr. Hostetler knows full well that reference to the chain contracts are without justification. He is fully acquainted with the situation and *knows* that ASCAP always intended to exact the highest possible tribute from all independents, irrespective of charges against the chains."

This last statement is also apparently based on a statement made by Bennett at the meeting of May 13th as to what he had seen in ASCAP minutes.

On June 11, 1935, trial of the Government's suit commenced. It was apparent from the outset that ASCAP was going to make capital out of the 5-year extensions. Its counsel referred repeatedly to them, and asserted that there could be no question of oppression or unreasonableness because several of the most important units in the industry had entered into extensions at even higher figures than before.

On June 17, 1935, Mills sent a letter to McCosker, advising that all license agreements would be extended to December 31, 1935, and offering (for the first time in writing) a 5-year extension from January 1, 1936.

A special meeting of the NAB Board was called for and held on June 22, 1935, at New York. The opposing parties were heard at length, including Levy, Klauber, Ashby and Hostetler. No useful purpose would be served by a detailed account of their contentions further than to note that emphasis was placed on an alleged lack of preparedness by the Government in its suit, as a reason of the networks seeking 5-year extensions. Also, for the first time, intense opposition to the per-piece plan by both Levy and the networks came out into the open. At the conclusion of the meeting, two resolutions were unanimously adopted by the Board. In one, it reiterated its support of the per-piece or measured service plan and absolved the networks and WCAU of anything improper in their negotiation of extensions. In the other, it upheld Loucks in sending Hostetler's letter to all NAB members.

At the Colorado Springs Convention held July 8-10, 1935, McCosker, Kay, Levy and Hostetler addressed the members at length. Again, no useful purpose would be served by even attempting to summarize their statements. At the conclusion, the Convention approved the resolution of the Board of June 22nd, declaring in favor of the per-piece or measured service plan and absolving WCAU and the networks. Other resolutions were adopted favoring continuation of the Government suit, instructing the NAB officers and directors to support it, and warmly commending Hostetler for his efforts and recommending that he be given an opportunity to continue giving the same service to NAB.

One excerpt from the Convention discussion is, I believe, of sufficient importance to deserve quotation. Church, KMBC, stated that as a network affiliate he had a contract with a network requiring him to have the necessary copyright arrangements. He asked Levy the direct question as to whether such stations now had any choice in the matter. The following colloquy ensued:

"ISAAC D. LEVY: In a legal manner or business manner?"

"MR. CHURCH: Both. In other words, has the action of the networks and yourself almost automatically bound us to the five-year contract with ASCAP?"

"ISAAC D. LEVY: Yes—but pleasantly so.

"MR. CHURCH: I am not questioning that. The point is: do we have a choice in the matter?"

"ISAAC D. LEVY: I don't believe you do."

By the end of July, some 55 stations had applied for and received 5-year extensions of their ASCAP licenses. The 55 included the 21 chain-owned or controlled units, WCAU and several of the newspaper-owned stations; very few of the independent stations not enjoying discriminatory advantages had sought extensions. Mills was promulgating the statement (as he has both before and since then) that ASCAP would still like to secure from the NAB a definite formula for the payment of copyright fees, which he said had never been forthcoming from the Association.

Before the end of the summer it became apparent that, in spite of the assurance given by Mills to McCosker on June 17th, stations other than the original 55 would not be given unqualified extensions of their contracts. Mills was now insisting on adding a rider protecting ASCAP against any obligation to maintain its catalog at substantially its size at the time and limiting the license to the empty right of cancellation of the license "in case there shall be a substantial diminution in the quantity of musical numbers." The rider obviously anticipated the withdrawal of the Warner Brothers group.

On September 23rd the NAB Executive Committee (Fitzpatrick, Levy and Baldwin) met with Mills informally to discuss provisions of the contract offered stations as well as the per-piece method of payment of royalties. In the meantime, it seems, ASCAP officials were privately advising stations to defer signing ASCAP contracts until that organization had put its own house in order, it being felt there was still some possibility that the Warner group would remain with ASCAP. An NAB Board meeting was called for October 17th.

At the Board meeting on October 17th in New York, there was discussion of the advisability of advising stations to seek 5-year extensions of their ASCAP contracts, and the Board instructed the Managing Director to do so. It also instructed him to prepare a report and recommendations dealing with the possible working out of a per-piece or measured service plan. By November 15th, only about 80 stations had signed ASCAP renewals and Mills was quoted as saying that full opportunity would be given all stations to negotiate "new contracts" in the

event of withdrawal by the Warner group. He asserted that the basis for negotiations naturally could not be foretold.

For reasons later explained to the Board, I did not send the letter. On December 3rd, Levy, calling from Klauber's office, insisted that such a message be sent. After consultation with Fitzpatrick, NAB President, I polled the NAB Board and, as a result of a vote of 10 to 9, I sent a telegram instructing them to accept 5-year extensions. Two of the directors thereupon changed their votes, with the result that the vote was 11 to 8 against sending the telegram. Thereupon, I sent a second telegram notifying members not to ask for extensions. In the meantime, a small number of stations had sought and secured extensions so that the total of those who, in addition to the original 55, had such extensions (but with the rider as to repertoire) was slightly over 70.

An NAB Board meeting was called and held in New York on December 9th, 10th, 16th and 17th. The results of this meeting are best treated under the next heading.

IV. THE RECENT FAILURE IN ASCAP NEGOTIATIONS

On December 17, 1935, the last day of its meeting held in that month in New York, the NAB Board of Directors designated its Managing Director to act in the emergency created by the approaching copyright crisis created by the expiration of ASCAP licenses on December 31, 1935 and the withdrawal of the Warner Brothers group from ASCAP effective after that date. He was given authority to act for such stations as desired to have him do so, and stations were urged to send him powers of attorney enabling him to negotiate in their behalf. He was also given authority to name and assemble an Advisory Committee to confer and advise with him in New York.

Pursuant to the Board's action over 300 broadcasters executed and sent in powers of attorney. This number included a large proportion of the important independent stations in the country and far exceeded the response which had been hoped for.

Further pursuant to the Board's action, I selected an Advisory Committee, consisting of Messrs. Allen, Caldwell, Carpenter, Church, Clark, Craig, Cowles, Damm, Fitzer, Gough, Loucks and Myers, and on December 24, 1935, sent each of them a wire as follows:

"Will greatly appreciate your advice and counsel during further negotiations on copyright beginning Friday, December 27, St. Regis Hotel Stop I make this request because I believe you are free and willing to exercise your best judgment for industry as whole Stop If I have erred in judgment and circumstances are such that you must be guided by your personal interests or the interests of any group then I expect you to decline invitation Stop Am sure you can appreciate importance of premise upon which invitation is extended Stop Similar invitation extended to (here follows list of names other than the party to whom addressed) Please advise will be in Washington until Wednesday evening."

Of those invited, Messrs. Allen, Caldwell, Carpenter, Clark, Damm, Fitzer and Loucks were able to accept and to be present. Mr. Craig accepted but was unable to be present at the first session.

The Advisory Committee met with me at the St. Regis Hotel, New York, on the morning of Friday, December 27th, and were in continuous session until Tuesday, December 31st. Due to the appearance of the first Warner contract Friday morning, and the necessity for attempting to secure a revision of it, the committee had to subdivide its labors, and a subcommittee consisting of Messrs. Caldwell, Damm and Loucks devoted themselves principally to the Warner negotiations, described under the next heading.

Mills, ASCAP's general manager, left New York just prior to the day on which the Advisory Committee assembled, and remained out of town until Tuesday, December 31st. Buck, president of ASCAP, was out of town from Friday until Monday. This left only Burkan, the ASCAP General Counsel, with whom to negotiate.

On Friday, I had arranged a meeting with Burkan for late in the afternoon. The meeting was delayed by Burkan from hour to hour and finally I was told that he could not see me that day. This, I learned, was because of conferences he was having with network representatives. During the day, the network companies secured from Burkan a letter as follows:

"Confirming our conversation today, this is to inform you that from and after January 1, 1936, you may continue to broadcast and to publicly perform for profit the compositions in the repertory of the American Society of Composers, Authors & Publishers as of January 1, 1936, under your network system without any interruption on and after January 1, 1936, until further notice from the American Society of Composers, Authors and Publishers, such notice to be not less than two-day period. It is understood, of course, that we are not relieving these affiliates of the obligation to pay us performing fees in accordance with existing contracts."

They immediately advised their affiliates of this arrangement by telegraph.

On Saturday morning, December 28th, I succeeded in seeing Burkan. In the course of the discussion, I was clearly given to understand that ASCAP would be willing to grant temporary extensions of the same sort as those accorded to network affiliates on network programs with the understanding that a joint committee representing all interested elements would meet shortly after January 1st to arrive at a definite and permanent solution. I was also given to understand that ASCAP might be willing to accord an extension for a definite period, e. g., 6 months, to broadcasters who had not accepted five-year renewals. With this understanding I returned to discuss such an extension with the Advisory Committee, and, with their approval, sent the stations a telegram as follows:

"Am assured by ASCAP general counsel that temporary extensions all ASCAP licenses will be granted by letter to me at present rates and without signing contracts,

stations and ASCAP each to have right to cancel on two days' notice with understanding joint committee all interested elements meeting shortly after January 1 to arrive definite permanent solution. On Monday expect to ask and obtain six-month extension on this basis. Advise whether I may use if necessary your power attorney on this basis with ASCAP. Negotiations with Warner proceeding today. Langlois & Wentworth, New York City, can furnish 60 fifteen-minute programs public domain music. Transcontinental Broadcasting Company, Los Angeles, can furnish 200 musical selections which can be performed without copyright license cost 60 cents per selection. Both copyright libraries should offer opportunity to avoid Warner music pending adjustment their proposed contract."

Nothing further occurred, so far as ASCAP is concerned, until Monday morning. At that time I conferred with Buck and Burkan. They refused to grant a 6-months or any other definite extension and I was able to secure only an indefinite extension represented by the following letter, signed by Buck, President of ASCAP:

"This is to inform you that such of your member stations and such stations, in respect to which your Mr. James W. Baldwin holds power of attorney to act for them, as do not have licenses from the American Society of Composers, Authors & Publishers (for brevity called "Society"), from and after January 1, 1936, may continue to broadcast and to publicly perform for profit the compositions in the repertory of the Society, as of January 1, 1936, without any interruption on and after January 1, 1936, until further notice from the Society, such notice to be not less than two (2) days.

"It is understood, of course, that we are not releasing these stations (those which are members of your Association and those which are represented by Mr. Baldwin by virtue of powers of attorney) of the obligation to pay the Society performing fees in accordance with the existing contracts."

I accepted this extension in writing.

On the same day, December 30th, ASCAP sent out a wire to all stations which had not already secured 5-year renewals, as follows:

"This is to notify you that the American Society of Composers, Authors & Publishers is prepared to extend your present license agreement with it upon the same terms and conditions for five additional years from January 1, 1936, except that the rights granted by the Society shall be limited to compositions of the membership as constituted on January 1, 1936. The Society challenges the claims made by others to ownership in the small performing rights of various compositions published by them but written and composed by members of the Society. The Society controls the performing rights of many of such compositions and within a very short time will publish a list thereof. As our examination of individual contracts progresses we are confident that our repertory will be increased in respect of many compositions the performing rights of which are exclusively claimed by others. To illustrate published reports that the Society can no longer license small performing rights in the works of George M. Cohan, Victor Herbert and some others are absolutely without foundation. The Society

has the right to grant licenses in respect of these works and will protect all its licensees broadcasting the same. While we of course have no objection to your taking any other licenses which you may desire to take we feel it only fair to tell you that your fee to the Society will not be reduced and the formula will not be altered except that the license will be limited to works in Society's repertory as of January 1, 1936, and furthermore to advise that with respect to any composition the licensing rights of which are exclusively vested in us we will not recognize any license which you may obtain from others."

I immediately sent out wires to all stations advising them of the temporary extension accorded by Buck's letter and advising them not to accept the 5-year extensions offered in the above-quoted telegram. It is my understanding that approximately 400 stations followed this advice and refrained from taking the 5-year extensions.

We immediately turned to the task of preparing the way for the joint discussions with ASCAP which Burkan had given me to understand would now take place. Since one of the oft-reiterated complaints of ASCAP had been the lack of definite proposals by NAB which could be used as a basis for discussion, I set to work to prepare a statement of principles which should guide our negotiations and state our objectives, in a manner suitable for serving both as a basis for discussion and as a proper way to advise the NAB membership of our activities. With the completion of a draft statement I called the Advisory Committee to meet with me again in New York on January 10th, to discuss it with me and, after putting it in final form, to take it up with ASCAP. Both ASCAP and the networks knew that this meeting was being held.

On Friday, January 10th, we spent the entire day in putting the statement into final form and by evening it was completed. At a late hour, approaching midnight, I was called by a third party and was told for the first time that during the evening the following wire had been sent by ASCAP to about 400 stations:

"On December 30, 1935, the ASCAP offered to extend your present license agreement upon the same terms and conditions for five additional years from January 1, 1936, except that the rights granted by the Society to you shall be limited to compositions of the membership as constituted on January 1, 1936. To this wire the Society has received no answer and unless we hear from you by January 15 that you accept such offer the Society will deem you to be an infringer in respect of the performances and broadcasting of any of its works and you shall be held to strict accountability on account of all performances of its works beginning January 1, 1936."

I immediately made every effort to get in touch with the ASCAP officials, without success. I also immediately telephoned Ashby and Klauber and found that both knew of the telegram. Both of them vigorously defended ASCAP's action. Several days later, an ASCAP official informed a member of the NAB Board of Directors that the telegram had been sent at the insistence of the two networks. If this be true it means, of course, that over 300 independent broadcasting stations in this country

were deprived of their liberty of contract and of their last opportunity to negotiate by joint action of the networks and ASCAP.

The following day, Saturday, January 11, every effort was made, both directly with ASCAP and by contact with the networks, to secure a reconsideration of ASCAP's action. During the day I sent a wire to stations as follows:

"Am advised ASCAP last night wired all stations that unless they communicate acceptance of five-year offer by January 15 they will be deemed infringers. This in effect appears to be cancellation of temporary arrangement based on Buck's letter of December 30. Consequently, if you need ASCAP music suggest you wire acceptance to ASCAP on January 15 but not before in order that give me benefit of such last-minute desperate efforts as I can make."

For a while there seemed a faint hope that I might be permitted to appear at an ASCAP Board meeting to be held Tuesday, January 14th, and to argue in favor of a withdrawal of the ultimatum. The statement which had been agreed upon with the Advisory Committee on the preceding Friday was printed and circulated to the members on January 13th as an NAB Bulletin with the title "Tentative Program of Activity in Behalf of the NAB." Copies were immediately sent to ASCAP and the two networks. All efforts, however, were unavailing and on January 14, I sent the following telegram to all stations who had given me powers of attorney:

"ASCAP has refused request for stay of their action taken tenth Stop This leaves no alternative for stations that must use ASCAP music but to accept offer contained Buck's telegram December 30 Stop Have not used your power of attorney to bind you in any way Stop Because some stations for which I hold power attorney have already accepted ASCAP offer per my wire eleventh and others have indicated they may not accept suggest it is best under all circumstances and my future plans toward reformation of contracts that you clear matter yourself by addressing telegram to ASCAP not later than fifteenth stating you accept Buck's offer thirtieth."

On January 15th the ASCAP ultimatum went into effect and by the close of that day practically all broadcasting stations had been forced to wire ASCAP for extensions of their 5-year contracts.

V. NEGOTIATIONS WITH THE WARNER BROTHERS GROUP OF MUSIC PUBLISHERS

By May 15, 1935, it became generally known that the Warner Brothers group of music publishing houses (Harms, Inc., T. B. Harms, Witmark, Remick and New World) had stated that they were planning not to renew their memberships in ASCAP, which memberships expired December 31, 1935, and that thereafter they would deal in their own right with broadcasters and other groups of music-users. How long before May 15th they had evidenced such an intention within a limited circle, I do not know. In addition, several other important houses (said

to include Feist, Mills, Marks, Fisher, Schirmer, Berlin and Robbins) were reported as indicating that they might follow the lead of the Warner Brothers group.

The Warner Brothers group controls a very large percentage of all music broadcast. They claim it is 40% of ASCAP music. The fact seems to be, however, that, in the case of the networks and the larger stations at least, the percentage was not more than about 20% of ASCAP music, while, in the case of smaller stations and particularly stations making a heavy use of phonograph records, the percentage is considerably higher. The other important houses who were considering withdrawal controlled, it is said, an additional 40% of ASCAP music. There was also a rumor that the Austrian and German societies might withdraw from ASCAP and follow the lead of SESAC as new and separate licensing pools.

Until about June 2, 1935, at least one of the networks had been negotiating for the purchase of the Warner Brothers group and perhaps others of the houses. On that date negotiations were broken off.

On June 24, 1935, the Warner Brothers group made public announcement of their withdrawal from ASCAP, effective December 31, 1935, and, in a letter to all stations, notified broadcasters that after that date all licenses for performing rights of their compositions must be obtained from them and that any infringement would be prosecuted.

Passing over relatively unimportant developments, we find that on November 26, 1935, the Warner Brothers group put all doubts at rest by issuing a public statement in which their resignation from ASCAP was announced and explained, principally on the ground of "insufficient and inadequate royalties collected by the society from radio broadcasters." It organized a corporation, known as Music Publishers Holding Corporation (MPHC) through which it proposed to issue licenses.

Prior to the morning of December 27, 1935, the Warner Brothers group had not, however, offered or submitted any definite proposal or formal contract to the NAB or, so far as we know, to broadcasters generally. There had been informal discussions earlier in December, but without result. It was known, however, that

(a) the Warner Brothers group was dissatisfied with the amount it has been receiving from ASCAP (\$340,000, which when combined with the like amount paid to the group's composers, made a total of \$680,000 out of a total of slightly under \$3,000,000 paid by broadcasters to ASCAP during 1935);

(b) that it was demanding a total of not less than \$2,000,000 (\$1,000,000 to the publishers and \$1,000,000 to the composers) or approximately three times as much as in the past;

(c) that it proposed to obtain this amount by (1) charging sustaining fees equal to 40% of those charged by ASCAP; (2) charging 2% of net receipts of the broadcasters, and (3) applying the 2% percentage to what it considered a hitherto untapped source of revenue, i. e., the revenue of networks as networks (as distinguished from the network-owned or -controlled stations).

In the course of the NAB Board meeting December 9th to 17th, no action was taken with regard to the Warner Brothers group. The matter was one which was covered by the authority vested in me as Managing Director, by action taken by the Board December 17th, described under the preceding heading.

In the course of Friday morning, December 27th, a definite formal contract was presented by the Warner Brothers group for the first time.

The contract was immediately read over to the Advisory Committee. It was obvious from a single reading that its terms were not only exorbitant and objectionable, but, in certain respects, impossible to comply with. With the approval of the Advisory Committee, I wired the stations as follows:

"Am informed Warner Brothers contract mailed to all stations today stop Together with committee and attorneys have examined it and believe terms wholly unacceptable stop Am endeavoring negotiate modification of contract but there is chance negotiation will prove unsuccessful and that you should be prepared to face alternative of signing this contract or doing without Warner music January first stop Negotiations continuing on ASCAP contract stop Will keep you informed."

In the meantime a sub-committee was designated to study the contract and draw up a memorandum analyzing it and pointing out its objectionable features. This memorandum was completed in the course of the afternoon, and was mimeographed and mailed to stations with a covering letter signed by me as follows:

"Herewith enclosed is an analysis of proposed Warner Brothers contract. It has been prepared hurriedly. Some of the criticisms are of minor importance but on the whole it will be observed that the terms and conditions of the contract are entirely too severe. Conversations had this evening indicate that there is a possibility of meeting a few but not all the objections raised. The conversations will be pursued tomorrow."

The memorandum was used as the basis for conversations held that Friday evening with Mr. Herman Starr, executive in charge of the Warner Brothers group, and as the basis for negotiations conducted Saturday and Sunday with Mr. Starr and Mr. A. M. Wattenburg, general counsel for the group.

It is unnecessary to repeat what was set forth in that memorandum. It will be sufficient if attention is called simply to the amount and the basis for calculating compensation that would have been required under its terms. It would have required each licensee to pay 40% of the sustaining fee paid ASCAP and 2% of the licensee's net receipts (the term "net receipts" to include not merely the actual net receipts of the licensee *but also, in the case of a network affiliate, the receipts of the network for the affiliate's facilities*).

Starr appeared before us at about 8:00 p. m. Friday evening. The conference lasted until about midnight. He was adamant in refusing to modify his position with reference to the principal objections. He stated that the Warner Brothers group would not depart from its funda-

mental premise that the Warner Brothers group was entitled to a total of \$2,000,000 yearly for use of its music by broadcasters and evidenced no inclination to depart from the means, methods and percentages specified in the contract.

With reference to some of the minor objections, Starr was impressed with the arguments presented by us. He explained that he was not familiar with the practical side of broadcasting and that he was perfectly willing, with his attorney, to sit down with our group and attempt to improve mistakes that might have been made in the contract due to his lack of knowledge of the effect of its provisions on practical operations. This left, of course, only a very slender thread on which to pursue negotiations. We felt, however, that it was better to pursue this narrow thread for what it was worth than to abandon all hope of improving the terms of the first contract.

At this point, certain premises and assumptions on which we were in agreement should be set forth. They were as follows:

1. It would not be proper for the NAB, or for me as its Managing Director, to advise members of the NAB not to sign any contract with the Warner Brothers group or to dispense with Warner Brothers music, both for reasons hereinafter stated and because, taken in conjunction with the actions of the network and of ASCAP, such a procedure ran the risk of being held to be an illegal boycott.

2. A considerable number of broadcasters needed or wanted to use Warner Brothers music after December 31, 1935, and, if no other alternative were presented, many of them would sign the contract on the 40%-2% basis.

3. An even greater number of broadcasters, whether or not they needed or wanted to use Warner Brothers music, would be unable to avoid infringements and liability therefor at the rate of a minimum of \$250 per infringement. Their inability would proceed from insufficient facilities, records and staffs, from lack of any lists from either ASCAP or Warner, from the difficulty of controlling music played by remote control orchestras, etc.

4. For want of information and lack of opportunity for obtaining it, we were in no position to form any opinion on the merits of the issues in dispute between ASCAP and the Warner Brothers group as to control over the performing rights on a number of musical compositions. The course taken by the two national network companies, who had had much greater opportunity to look into the matter, was some indication that it would be extremely hazardous to broadcast any Warner music without a license from the Warner Brothers group.

During Saturday a sub-committee conferred with A. M. Wattenburg, general counsel for the Warner group, and later in the afternoon, with Wattenburg and Starr. Its starting point consisted merely in certain concessions which, as already stated, Starr had shown himself willing to make the evening before, having to do principally with requirements as to records and reports. The sub-committee, however, succeeded in re-opening the entire subject and by the end of the afternoon had made substantial progress. Among other things, Starr and Wattenburg began to appreciate more fully the justice of the broadcast-

ers' claims that compensation should be based not on revenue but temporarily on card rates and eventually on a *per-piece* system; that broadcasters have a right to trustworthy lists of compositions controlled by the licensor; and that copyright should be cleared at the source, particularly in connection with network programs and electrical transcriptions. While no agreement was reached at this session, sufficient progress was made so that the sub-committee agreed to make calculations showing what revenue might be expected by Warner if compensation were based on card rates. The sub-committee returned to the hotel and made these calculations from the December issue of *Radio Advertising*, reducing their calculations to itemized statements showing the highest quarter-hour and the highest half-hour rates for each station in the United States; the deductions that would have to be made on a proportional basis for stations having less than full time; and the number of stations whose quarter-hour rate was \$18.00 or less. It proved impossible to use an hourly rate as a basis of calculations as so many stations do not publish such rates, and in fact the same was partially true of the one-half-hour rate. The sum total of the highest quarter-hour rates of all stations, thus calculated, came to slightly over \$23,000.

Up to this point, Warner had not receded from its demand that the total costs be \$2,000,000 annually from broadcasters. Obviously, to reach this amount it would be necessary for each station to pay a monthly compensation of approximately seven times its highest quarter-hour rate. This seemed impossible on its face and was very disheartening. The sub-committee, however, reported back to the full committee and in spite of the apparent obstacles it was agreed that the group was to continue the negotiations for the sake of whatever advantages might be secured.

Negotiations, therefore, were resumed early on the following day (Sunday, December 29). They were accompanied by discussions of all the other points raised and, in particular, discussion of the *per-piece* plan. Members of the full committee participated from time to time. Finally, by late in the afternoon, Starr agreed to reduce the basis for compensation for independently-owned stations from seven times the highest quarter-hour rate to four times the highest quarter-hour rate, the license to cover only non-network programs. It was apparent to all present that no further concession in total amount of compensation would be made. It was also apparent that, for lack of information on both sides, it would be impossible to put into effect immediately a *per-piece* plan although considerable consideration was given to working out a *per-piece* plan which would be based on the highest quarter-hour rate (that is, a certain percentage such as $\frac{1}{2}$ of 1% of such rates for each piece broadcast). Because of this lack of information and because of the fact that the contract might serve as a precedent, Warner felt it would have to fix a fee per-piece that would be high enough to protect it in the future while the committee felt, for somewhat the same reasons, it must in-

sist on a fee sufficiently low to meet all situations. Both sides recognized that the matter needed further study. The result was that Warner chose the flat fee basis for its revised contract for a temporary period of three months, the flat fee being based on four times the highest quarter-hour rate and covering all non-network programs, and agreed to cooperate in working out a per-piece plan in that period.

By late Sunday afternoon when the committee was convinced that Warner would make no further concessions, Wattenburg proceeded with drafting the revised contract in the presence of the committee. During the course of revision a number of further points arose, some important and some not, but all of them entailing a certain amount of delay and discussion. It was not until well after midnight that the draft was completed and even then one or two points were left open in cases where the parties did not differ in principle but had not succeeded in finding the precise language which would be appropriate. These were settled early the following morning. Somewhere between 2 a. m. and 3 a. m., Monday morning, after conferring with members of the committee, I sent out the following telegram:

"Disregard Warner contract sent you this last week. Warner Brothers now offering revised three months contract which will remedy many of objections pointed out by us and which in opinion of committee and myself will be substantially more favorable. Basis for compensation for full time station for all non-network programs is to be monthly payment of four times your highest quarter-hour rate. Other stations proportionally. Stations where highest quarter-hour rate less than \$18 basis of compensation not to exceed twice highest quarter-hour rate. Networks to have responsibility for clearing copyright on all network programs over their own stations, and over affiliate stations. Warner agrees to attempt to work out per-piece plan during contract period and to furnish complete catalogue by Feb. 1. Several other improvements in contract agreed to by Warner. Printed revised contract cannot be delivered to you for a day or two. If you desire to use Warner music after December 31 Warner assures me you can gain rights given by this contract by instructing me to accept in your behalf. Please wire immediately."

During Monday, December 30th, the revised contract was printed and by that evening it was on its way to most of the stations.

Space will not permit a detailed comparison of the provisions of the revised contract with those of the first contract. It will be helpful, however, to point out what progress was made with respect to the principal objections.

(a) *The amount of compensation.* Instead of asking for a total of \$2,000,000, the revised contract is based on asking a theoretical total of \$1,104,000 from all stations (including those owned and operated by the networks), for non-network programs. This sum represents 48 times the total of the highest quarter-hour rates of all stations. It must, however, be reduced by the amount of the concessions made by Warner to small stations and to stations

having various kinds of time limitations. For example, stations having quarter-hour rates less than \$18.00 were to pay only twice the highest quarter-hour rate monthly; since then Warner has made further concessions and raised the dividing line to \$25.00. Also since the network companies have not accepted Warner's contract, the total must be reduced by another very substantial sum, possibly in the neighborhood of 20%, assuming that all independently-owned stations accept the contract.

(b) *Method of calculating compensation.* As already noted, for the temporary period covered by the contract, the basis is a flat rate based on the highest quarter-hour rate. The contract recites the intention of the licensor to attempt to work out a *per-piece* plan. The principle of payment of copyright fees at the source is given complete recognition with respect to network programs and to some extent with reference to electrical transcriptions. Finally, very significant progress was achieved in the provision requiring Warner to furnish a complete list of its compositions not later than February 1, 1936.

(c) *The agreement to indemnify.* Only partial success was had under this heading. Warner did not agree to remove the limitation on the amount of guarantee, claiming that for a station having both ASCAP and Warner licenses no greater protection is necessary; its reason for this conclusion is that the only serious issue likely to arise on its music is ASCAP's claim to have the right to license performing rights on some of it and therefore the only thing likely to affect any station is that money paid to Warner should have been paid to ASCAP. Considerable progress was made through the inclusion of the item already mentioned; i.e., the furnishing of lists by February 1, 1936. In Starr's statement made public late in the afternoon of December 30th, the agreement of indemnity is given an entirely satisfactory construction in the following language:

"3. For the first time radio stations will be furnished with a complete catalogue of the compositions of which we warrant ourselves to be the owners."

(d) *Records and reports.* Under this heading the revised contract still calls for weekly reports of all compositions including those not controlled by licensor. This feature is objectionable. On the other hand, the requirements were considerably lightened with respect to reporting on compositions contained in network programs, electrical transcriptions, and phonograph records, so as to make compliance at least possible if not to relieve the burden.

Other improvements will be noted at several points in the revised contract in line with some of the suggestions made in the committee's memorandum drawn up on Friday, December 27th.

During Monday, December 30th, a large number of replies were received from stations to the telegram above quoted sent out early that morning. The same was true of days which followed. Many of the stations communicated by telephone. Without attempting to tabulate the results by days, it may be said that by the morning of January 1, 1936, the totals indicated that 154 stations were accepting the contract, 67 more were doing so tentatively, and 64 (in addition to the networks) had indi-

cated that they were not accepting the contracts. Most recent reports indicate that considerably over 200 stations have taken the contract.

In letters sent to their clients and agencies on December 24th, the two networks notified them that, effective December 31st, and until further notice, no music controlled by the Warner Brothers group would be performed. These letters set forth at length their reasons. They will be found reprinted in full in *Broadcasting*, January 1, 1936 (Vol. 10, No. 1), at page 7.

The developments beginning with Monday, December 30th, were complicated by telegrams sent by Gene Buck, President of ASCAP, to stations which had not yet agreed to a five-year extension, by the National Broadcasting Company, Inc., and Columbia Broadcasting System, Inc., to all (or most) of their affiliated stations respectively; and by Leo J. Fitzpatrick, President of the NAB, to all member stations.

A copy of Buck's wire has been set forth under the preceding heading. The NBC wire was substantially as follows:

"We have had a number of telegraphic and telephone inquiries today asking our position in regard to a telegram received this morning by many associated stations from Mr. Baldwin regarding negotiations he has apparently had with Warner Brothers. Baldwin did not send us a copy of his message nor has he consulted us about it nor has the National Broadcasting Company agreed to any of the terms therein. National Broadcasting Company's position continues to be the same as outlined in Kobak's letter of December Twenty-third sent you by Brophy and accordingly National Broadcasting Company does not intend to schedule Warner publications on and after January First and will not agree to the terms outlined in Baldwin's telegram. We will continue with ASCAP catalogue on and after January First in accordance with my wire to you dated December Twenty-seventh quoting Mr. Burkan's letter."

The CBS wire was substantially as follows:

"For your information CBS is in no wise a party to the contract we understand is being offered to stations by Warner publishers group nor does any CBS owned station intend to take this contract stop On contrary we intend to abide by our decision to rely on ASCAP license but to play no Warner Brothers music until confused legal status is clarified stop Signing of Warner Brothers contract will not relieve you of obligation to pay copyright fees on local and network programs broadcast by you stop Printed list of Warner numbers mailed you today represents best information on what Warners claim to control but we are informed by ASCAP counsels that many compositions in list can be licensed only through ASCAP."

Mr. Fitzpartick's wire was substantially as follows:

"In answer to numerous telegrams I feel I should clarify my position in the present copyright controversy stop As Vice-President of WJR Detroit and WGAR Cleveland I am not entirely in accord with the course pursued by the Managing Director of NAB stop In July of this year I renewed my present contract with ASCAP for period of five years and do not intend dividing the

industry by signing any other contracts stop I do not want this telegram to be construed as advising members as to what course to pursue but as one of the owners of two stations I urge a united front."

Since January 1, 1936, the Warner Brothers group have instituted a large number of suits for infringement against the two networks (or their subsidiaries) and against a few independent stations not having Warner contracts. I am advised that in the case of the networks ASCAP is undertaking the defense of these cases; I do not know whether it intends to do the same for independent stations.

VI. THE NAB THREE-POINT PROGRAM

Resolutions adopted at the St. Louis Convention in November, 1932, laid the basis for a three-point program of activity in the field of copyright. This program was formally adopted at an NAB Board meeting held April 5, 1933, as follows:

1. Immediate incorporation and establishment of the Radio Program Foundation.
2. Immediate steps toward litigation against ASCAP under the anti-trust laws.
3. The securing of remedial legislation to check ASCAP's activity.

A brief account of the progress made on each point of this program is helpful both because of the light it throws on the course of the negotiations and because of the assistance it may afford in determining NAB's future course of action.

Radio Program Foundation. In a general way, the idea of making public domain music available had been considered at meetings of the NAB Board and by the so-called Plenary Committee in the spring and summer of 1932. At the St. Louis Convention in November, 1932, Schuette strongly advocated the creation of an industry-owned radio music supply through a new corporation which would become a subsidiary of NAB, to rid the industry of its dependence upon ASCAP. He offered a resolution providing that a Radio Program Foundation, with a capitalization of about \$150,000, be subscribed by the industry. His resolution was referred to the NAB Board for consideration.

In a bulletin sent out to all stations on December 31, 1932, Schuette took an initial step to test out the plan. Two compositions published by a non-member of ASCAP were sent out to all stations for performance. Further steps of the same sort were taken at later dates, but none of them was attended by any great amount of success, primarily because of the quality of the music.

At the NAB Board meeting held in Washington, February 20-21, 1933, the proposal for a Radio Program Foundation was adopted, and a special committee was designated to carry forward the project. On February 23rd, Schuette sent out a bulletin describing the purposes of the Foundation.

On April 5th after negotiations with ASCAP were again broken off, it was decided to proceed immediately with the establishment. It was incorporated as a Delaware

corporation in the second week in April with Messrs. McCosker, Loucks, Hostetler, Schuette, and Flamm as its incorporators, and with Schuette as its operating head. Among others, its objectives were to establish relations with independent copyright owners and publishers and at once set up an organization competitive with ASCAP, to open up negotiations with certain other copyright pools probably along with certain foreign associations, and to explore public domain music.

Organization of the Radio Program Foundation was completed at a meeting of its Board of Trustees in New York, May 3, 1933. McCosker was elected chairman of the Board, Schuette president, Hostetler, secretary, and Loucks, treasurer. Schuette immediately began conferences with owners and their representatives owning titles not included in the ASCAP pool. Headquarters were opened in Washington.

On June 14, 1933, the Foundation secured the American radio rights to the catalogue of G. Ricordi & Co., of Milan, Italy, containing more than 123,000 numbers in all branches of music, including the hitherto restricted Puccini catalogue. Ricordi had, several years before, withdrawn its affiliation with ASCAP because of meager royalties. The Foundation offered the catalog to NAB members at monthly royalties ranging from \$2.50 to \$25.00, with higher fees for non-members. On network programs, the principle of clearing copyright at the source was given full recognition in these licenses. Licenses were offered to NBC and CBS and, if they were consummated, the Foundation was to pay additional sums to Ricordi, which arranged the transaction on a sliding scale providing for increased charges for network participation as well as for stations outside the NAB. After considerable delay, both networks took licenses. The amount of the license was calculated on a non-profit basis to the Foundation and NAB. It is true, of course, that a large portion of the Ricordi catalog was not protected by copyright in the United States, but it was also true that much of the catalog had already been recorded and had the advantage of being immediately available.

Shortly afterwards Schuette sent to all NAB members a compilation of records that are in the public domain.

At the Annual Convention held in Cincinnati September 16-18, 1934, a resolution offered by Schuette was adopted directing the NAB Board

"to organize a music pool, either by a reorganization of the Radio Program Foundation or otherwise for the purpose of obtaining for radio broadcasting stations the air rights to such music as may not otherwise be available or which may be made more readily available by such a pool, and to enlist the cooperation of all radio stations and their program departments in promoting the widest possible use of such music."

Unfortunately, the Foundation met with apathy on the part of the NAB Board, the networks, and the broadcasters generally. It was never adequately staffed with trained and experienced personnel. During 1934 and 1935 it was virtually dormant. By arrangement between Schuette and Ricordi, stations were permitted to renew

licenses directly with Ricordi. Finally, as of December 31, 1935, the corporation was formally dissolved.

Anti-Trust Proceedings Against ASCAP. Proceedings against ASCAP under the anti-trust laws were vigorously urged by Levy, WCAU, at the St. Louis Convention in November, 1932, in a plea based on his own experience.

With the breaking off of negotiations again with ASCAP on April 4, 1933, the institution of litigation became an active part of the NAB program.

On September 1, 1933, a test suit was filed against ASCAP in the Federal District Court for the Southern District of New York, in the name of Pennsylvania Broadcasting Company operating WIP, Philadelphia. The suit sought dissolution of ASCAP as an illegal combination in violation of the anti-trust laws, and asked that WIP's contract with ASCAP be declared void.

The WIP suit never came to trial, although it is at issue. With the filing of the Government suit against ASCAP, however, it was felt that every effort should be concentrated on assistance to the Government rather than on the private suit.

On August 30, 1934, in the same Federal District Court, the United States Government instituted suit under the Sherman anti-trust law asking dissolution of ASCAP, the Music Publishers Protective Association (which in March, 1933, had demanded a new rate of 25c per number of electrical transcriptions, instead of 2c per record), and the Music Dealers Service, Inc., naming approximately 125 officers and directors of the organizations, including Buck, Mills, Burkan and Paine.

By this suit the Government sought to establish a system of fees based upon the actual use made of public performance rights and to substitute competition among copyright owners for the monopolistic control exercised by ASCAP. It prayed that existing contracts of ASCAP with broadcasters and other users be declared invalid, as well as contracts between ASCAP and MPPA, and authors, composers and publishers. The suit asked that the defendants be restrained from entering into similar contracts; from joining similar firm, corporation, or society unless the facilities of such firm, association, corporation or society are open to every copyright owner on equal terms and unless license fees to be collected pursuant to licenses are determined by individual copyright owners for each musical composition owned by them; and from instituting infringement suits against any licensee upon the giving of bond by such licensee to insure payment of a reasonable charge as the court may determine or as may be arrived at between licensee and individual copyright owners. The Government's petition called attention to the

"distinction and discrimination between the license agreements exacted of radio broadcasting stations owned at least 51 per cent by newspapers, and license agreements exacted from radio broadcasting stations not so owned"

and verbatim copies of the two types of license agreements were appended as exhibits.

The suit was filed just as the existing ASCAP license agreements with broadcasters were entering upon the

third year of their life, and the percentage on receipts to be paid by broadcasters was increased from 4% to 5%. While naturally the suit was more than welcome, and a great hope was aroused by its institution, it was obvious that only a miracle could bring about a successful termination of the suit in the lower court alone by September 1, 1935, when the contracts expired.

At the Annual Convention held in Cincinnati September 16-18, 1934, the NAB adopted a resolution instructing its officers and directors to support the Government suit.

An answer by the great majority of the defendants (83) was filed November 1st. It was a voluminous document of 42 pages and for the most part was a repetition of the story so often told by ASCAP at Congressional hearings, with which broadcasters are already familiar. The answer declared that a system of royalties based on actual use would be unworkable, and that broadcasters and other users were really seeking a situation under which they would pay nothing for copyrighted music. It alleged dire consequences if ASCAP were dissolved. It attempted to justify the favorable newspaper station contracts.

In the Government suit, a motion was made by the Government that a great deal of irrelevant matter be stricken from the defendant's answer. ASCAP moved that a commission be appointed by the Court to take testimony both in this country and abroad. The Court heard arguments on the motions January 11, 1935.

On March 26th, Federal Judge Knox granted the Government's motion to strip the case of irrelevant matter and denied ASCAP's motion which sought to delay the case by taking depositions all over the world. He left the way open, however, for ASCAP to reapply to take testimony on 3 or 4 relatively minor points, but only if exceptional reasons should be advanced. The Court's ruling was tantamount to a holding that the case was henceforth limited to the important issue of illegal price-fixing by ASCAP, and the way was open for expediting trial of the case.

On May 7th Andrew W. Bennett, special assistant to the Attorney General in charge of the Government suit, appeared before Judge Knox on a motion previously filed that the Court fix a definite early date for trial. He called the Court's attention to the widespread apprehension in the broadcast industry and elsewhere as to the demands that might be made by ASCAP at the expiration of existing contracts on September 1, 1935. Shortly afterwards the case was set down for trial June 10th and the Department of Justice proceeded to prepare for trial.

A further attempt by ASCAP to delay the case by a motion for postponement until fall was denied. On June 11th the case got under way before Federal Judge Goddard.

A half-dozen witnesses were heard in behalf of the Government and were subjected to lengthy cross-examination by Burkan, ASCAP counsel. On several occasions Burkan referred to the 5-year extensions secured by WCAU and the networks and asserted that there was no question of oppression or reasonableness in the charges

for music involved because several of the most important units of the industry had entered into 5-year extensions at a figure even higher than before. After less than two weeks, when it became obvious that the case could not be completed by July 1st, the Court adjourned the case until November 4th.

At the NAB Convention held at Colorado Springs, July 8-10, 1935, resolutions were adopted favoring and approving a continuation of the activities of the Attorney General and his staff in the Government suit against ASCAP, and instructing the officers and directors of the NAB to support the suit.

"to the end that royalties for the public performance of music may be determined by free and open competition among copyright owners."

On October 17, 1935, Government counsel conferred with ASCAP counsel and with the Court, and as a result the date of trial was again deferred from November 4, 1935, to January 6, 1936. This postponement was due primarily to delay on the part of counsel in agreeing on a stipulation of facts which the Court had asked them to prepare.

As a result of the public announcement of the withdrawal of the Warner Brothers group on November 26, 1935, trial was not resumed on January 6, 1936.

Legislation. Prior to September 1, 1932, there had, of course, been a great deal of important legislative activity which cannot be summarized here and which, in any event, did not result in any changes in the Copyright Act of 1909.

With the breaking off of negotiations again with ASCAP on April 4, 1933, remedial legislation again became an active part of the NAB program.

At the Annual NAB Convention held in Cincinnati September 16-18, 1934, a resolution was adopted petitioning Congress to amend the copyright law by omitting the language which fixes the minimum infringement penalty at \$250 and attorney's fees, leaving the court free, in each instance, to fix such penalty as in its discretion the court shall deem proper.

In January, 1935, a surprise move occurred in the form of an attempt to commit the United States to adherence to the International Copyright Convention. Technically this is not the correct title of the treaty (the Rome Revision of the Berne Berlin Convention for the Protection of Literary and Artistic Property) but it will be used for convenience. A bill to amend the Copyright Act of 1909, designed to lead to such adherence, was introduced with the sponsorship of the Department of State and had been referred, not to the Senate Committee on Patents, but to the Senate Committee on Foreign Relations. Due to vigilance on the part of Managing Director Loucks, a protest was filed in behalf of NAB and, in conjunction with protests filed by other organizations, caused the Senate Committee to refer the bill to the Department of State for the taking of further testimony.

The original bill already contained significant modifications of the existing law, some favorable and some un-

favorable to the broadcasting industry and other groups of users. Conferences were held before an Inter-Departmental Committee, with Mr. Wallace McClure of the Department of State as chairman. By March 28, 1935, the Committee was ready to submit a revised bill in which practically all the broadcasters' objections were met in a satisfactory manner. On April 1, the revised Bill (S. 3047) was introduced by Senator Duffy of Wisconsin and was referred to the Senate Committee on Patents.

Certain of the outstanding changes proposed by the bill were summarized by Managing Director Loucks in his report to the 1935 NAB Convention as follows:

(1) the establishment of "automatic copyright" (i. e. copyright without the necessity for complying with any formalities), but with sharp limitations on the right of recovery of damages for infringement wherever registration and notice of copyright have not been had;

(2) a material enlargement of the "writings" for which copyright may be secured, but no acceptance of the general European theory of "oral" copyright;

(3) a considerable limitation of the right of injunction in cases where infringement of copyright is claimed;

(4) the complete elimination of the fixed minimum statutory damage provision of the existing law, leaving the measure of damages in each case to be determined by the court;

(5) the grouping together of all infringements by any one infringer up to the date of judgment, with the provision that any unauthorized network performance shall be regarded as the act of one infringer;

(6) the reversal of the present law, as established in the Jewell-LaSalle case, by providing that there shall be no liability, civil or criminal, for the reception of any copyrighted work by the use of a radio receiving set, except where special admission fees are charged;

(7) a provision regarding the "author's moral right," based on the very broad provisions of the Rome Convention but so modified as to give users considerable freedom in adapting copyright material for their special requirements.

Protection is given the copyright owner against unauthorized broadcasting of any copyrighted writing (including the reading of prose or poetry). The writings to which copyright protection is extended include

"Works prepared expressly for radio broadcasting, or for recording by means of electrical or mechanical transcription, including programs and continuities in so far as they embody original work of authorship."

The Senate Foreign Relations Committee had already voted to report favorably on the proposed ratification of the International Copyright Convention. On April 19, 1935, the Senate suddenly ratified the treaty. On April 22nd, the action was rescinded and, at the request of Senator Duffy and with unanimous consent, the measure was returned to the executive calendar.

On May 8th the Senate Patents Committee, in executive session, heard eight witnesses (including ASCAP representatives) who opposed certain phases of the Duffy Copyright Bill, as the bill was now called. The witnesses were given opportunity to submit briefs.

On June 17th the Bill (S. 3047) was favorably reported by the Senate Patents Committee. In the report Senator McAdoo, Chairman of the Committee, explained at length the elimination of the \$250 statutory minimum penalty for infringement, saying that the purpose of the amended provision is

"to accord a remedy for infringement, not a weapon under which the owners of copyright may stimulate the sale of their works."

At the NAB Convention held at Colorado Springs, July 8-10, 1935, a resolution was adopted petitioning Congress speedily to enact the Duffy Copyright Bill. On July 26th the Managing Director, jointly with officials of the Motion Picture Theatre Owners of America and the American Hotels Association, issued a statement asking passage of the bill.

On August 7, 1935, the Senate passed the bill. On August 12th it was referred to the House Committee on Patents, but Congress adjourned before any action was taken by the House Committee.

Since the convening of Congress on January 3, 1936, no progress has been made with the bill in the House. No hearings have been held and no date is set for hearings. My best information is that it will be at least several weeks before hearings are held and I believe that there is justification for the conclusion that ASCAP is at least partly responsible for causing this delay. The House Committee has, at present prospects, only one calendar day, early in March, and if hearings have not been held and if the bill is not reported by that date, the chance of its becoming law are very slight.

Another interesting development was the introduction on January 27, 1936, of H. R. 10632, by Mr. Daly of Pennsylvania. It also is a bill to amend the Copyright Act of 1909 and follows very closely the Duffy Copyright Bill. It restores, however, most of the objectionable features of the present law and of the original State Department bill, including the minimum statutory damages of \$250 for each infringement. It gives extensive copyright protection to phonograph records as such. This bill has also been referred to the House Committee on Patents.

VII. CONCLUSIONS

To some extent this heading overlaps the next heading in which I set forth my recommendations, and it will not be necessary to enumerate certain conclusions which are implied in some of these recommendations. There are, however, certain conclusions to which separate attention should be called, even though some repetition is involved.

A. Reason for Failure of ASCAP Negotiations

That the combined efforts of over 300 stations to negotiate an improved contract with ASCAP and to give effect to just principles of compensation endorsed by several successive NAB Conventions met with complete failure must, I think, be attributed to the following causes:

1. *ASCAP's monopolistic power.* Even with the withdrawal of the Warner Brothers group, ASCAP controls 60% to 70% of the music used by a large proportion of broadcasting stations. This music is, at least in the present state of affairs, indispensable to practically all stations, both because it is necessary to meet the needs and desires of the listening public and because it would be virtually impossible for a station to avoid innocent infringements, with their attendant heavy penalties. So long as this power exists, and no element of competition is introduced or enforced among the members of the ASCAP group, the broadcasting industry must expect to be at a heavy disadvantage in negotiating with ASCAP.

The principal weapons open to the broadcasting industry against this power are:

- (a) proceedings under the anti-trust laws, such as the pending Government suit and the pending WIP suit;
- (b) amendment of the copyright law, and
- (c) the marshalling of an independent source of supply of non-ASCAP music, so as to be able to operate broadcasting stations temporarily without ASCAP music and without danger of innocent infringement.

These are referred to again below.

2. *Defects in the copyright law.* While I am treating this as a separate factor, it is closely interwoven with the first factor. The defects in the existing copyright law, which have made it possible for ASCAP to have and to wield arbitrary monopolistic power, are

- (a) The provision imposing minimum statutory damages of \$250 for each infringement, no matter how innocent;
- (b) The interpretation given to the law by the courts that, in the case of a network program, for example, not only the originating station but every affiliate station broadcasting the program and every receiving set in a hotel public room, restaurant, or other public place of a commercial character is infringing; in other words, the failure to recognize the principle of clearing copyright at the source;
- (c) The failure of the law to make provision for obviously innocent and unavoidable infringement, such as a broadcast of a football game during which a college band plays a copyrighted song;
- (d) The failure of the law to impose suitable restrictions on combinations and pools of copyright owners.

3. *The lack of an independent supply of music.* This is sufficiently covered both above and under a later sub-heading.

4. *The discriminatory ASCAP contracts of the networks.* The networks are obviously ASCAP's largest individual customers. In turn, they are very important members of NAB and as such have regularly been represented on NAB's Board of Directors and, until the last few weeks, have played an important role in all NAB copyright activities, including negotiations with ASCAP.

By securing more favorable contracts from ASCAP in 1932 than were given the rest of the industry, they were placed in a position where their interests in copyright have proved to be opposed to the interests of independent

stations from a financial point of view (although not, I believe, from a sound, long-range point of view). They face a substantially increased financial burden for copy-right licenses if any method of compensation, such as a per piece or measured service basis, is adopted, even though the total paid to ASCAP is no larger than before. This accounts, I believe, at least in large measure, for their opposition to the per-piece or measured service plan, for their attitude toward five-year extensions of ASCAP contracts, for their opposition to the Government suit, and perhaps other points in the policies followed by them.

The discriminatory ASCAP contracts are, in my opinion, the fundamental reason for the lack of a united front on copyright in the broadcasting industry today.

5. *The network-affiliate contracts.* The group of stations affiliated with the two national network companies is very large and constitutes a very important group. When they are forced to follow a certain course of action in copyright, it is almost inevitable that the remaining independent stations will be forced to do likewise.

No more effective weapon was placed in the hands of ASCAP than the provisions contained in the network-affiliate contracts requiring the affiliate to have ASCAP and other licenses. These provisions subjected the affiliate stations to the danger of heavy liability not only to ASCAP but also to the networks.

6. *Pressure exercised by the networks.* As I have already stated, a member of the NAB Board has been informed by ASCAP that their telegraphic demand for signed contracts was *at the insistence of both major networks*. Certain other circumstances tend to corroborate this. If this is true, the loss of the last opportunity for negotiations must be ascribed to the networks as well as to ASCAP.

B. Prospect of Success in Future Negotiations with ASCAP

By success in future negotiations with ASCAP, I mean primarily, of course, the establishment of a sound basis for compensation, such as the per-piece or measured service plan, without any substantial increase in the amounts paid to ASCAP. I mean also the achievement of certain related objectives which need not be summarized here.

It is my conclusion that no important objective will be accomplished by more negotiations with ASCAP during the period covered by the five-year renewals. This conclusion is based on the following reasons:

1. The obstacles enumerated under the preceding sub-heading are still present, and unless removed they will continue to be present, and to block any progress by more negotiation.

2. By their conduct after the 1932 contracts had been forced on the broadcasting industry, Mills and other ASCAP representatives made it clear that, in spite of their oft-repeated protestations of willingness to negotiate, they were not willing to revise the contracts in any respect except on the basis of substantially increased compensation, and that their invitations to negotiate were inspired,

at least in part, by a desire to delay steps contemplated by the NAB or for other reasons to gain time. There is no reason to believe that any different tactics will be pursued during the next five years.

3. The only occasions in the past on which ASCAP has seemed really willing to negotiate have been when by reason of developments on other fronts the broadcasting industry seemed on its way toward achieving a measure of progress toward bargaining equality.

A corollary conclusion is that, to have any hope of success, the broadcasting industry must concentrate on removing so far as possible the obstacles which have been enumerated under the previous subheading. Such a program includes litigation, legislation, the establishment of an independent source of music supply, doing away with the discriminatory ASCAP contracts, eliminating the objectionable features from network-affiliate contracts, and any and all steps and proceedings necessary to these ends.

C. The Music Publishers Holding Corporation

No one contemplates with pleasure the prospect of increased cost for music due to (a) ASCAP's refusal to reduce its fees to a degree corresponding to the recent diminution of its repertoire and (b) the necessity of having to deal separately with, and pay license fees to, the Warner Brothers group, represented by Music Publishers Holding Corporation.

On the other hand, for the first time in the history of the broadcasting industry, progress was made toward sound objectives in the negotiation of the revised MPHC contract. The favorable features of this contract have already been summarized. If the broadcasting industry will give its support and cooperation, still further progress has been promised by MPHC and will be achieved with the negotiation of a further contract at the expiration of the current 3-months' period expiring March 31, 1936. If, on the other hand, broadcasters join in any movement to boycott Warner music, or refuse to take MPHC licenses for any reason other than a bona fide lack of need for such licenses, any further progress will be seriously prejudiced.

It is my conclusion that, in the present state of the law and the actual condition of affairs, it is to the advantage of all users of music and of the public that the Warner Brothers group be maintained as a separate licensing organization, for the following reasons:

1. Some possibility of competition is opened up in a field in which ASCAP now enjoys a virtual monopoly.

2. Important progress may be made toward developing a per-piece or measured service plan of compensation, demonstrating its feasibility and advantages and serving as an example to ASCAP and other licensing pools.

3. An ASCAP victory over the Warner group, whereby the latter is forced back into ASCAP, would be disastrous in its effect on music publishers and composers generally and on any tendency or willingness among them to work toward a sound solution of the problem.

Needless to say, my conclusions are *not* reached with a view to assisting the Warner Brothers group as such, but solely and simply because of the reasons above set forth.

D. The Government Suit

As stated in the NAB Bulletin sent out January 13, 1936, the Government suit "is as important now as it has been at any time in the past and its prosecution should be pursued with vigor."

Certain considerations must, however, be frankly faced. Among them are the following:

1. The Government's suit was definitely weakened and prejudiced by the action of the networks and WCAU in obtaining five-year extensions on the eve of trial.

2. The situation presented by the Government's petition has been somewhat altered by the withdrawal of the Warner Brothers group, and the actions of ASCAP and the networks in connection therewith.

3. The discriminatory network contracts (which are not mentioned in the Government's petition) and the objectionable provisions in the network-affiliate contracts have assumed an importance to the issues raised by the suit, not heretofore apparent.

4. The forcing of independent stations to accept five-year extensions with a diminished repertoire, by January 15, 1936, raises issues that may be of importance to the successful prosecution of the suit.

5. The terms of the new contracts between ASCAP and its members are not known and may contain provisions pertinent to the case.

Because of these considerations, it is my conclusion that the Attorney General should be informed of all the developments covered by this report and should be urged to have an intensive study made of the suit in the light of possible new issues and new evidence. It may be that the Government's petition should be amended or that new or supplemental proceedings should be instituted, and it would be unfortunate if the pending suit should result unfavorably for want of the taking of proper steps at this time. This study should be made and concluded at the earliest possible date, after which the suit in its present or in modified form should be prosecuted with all vigor.

E. The Duffy Copyright Bill

It is my conviction that no effort should be spared in attempting to secure enactment of the Duffy Copyright Bill in the form in which it was passed by the Senate in August, 1935. This is not because the bill remedies all the injustices worked by the present law or because it is free from objectionable new features. Neither is true. It *is* because it goes far to remedy one defect in the present law which overshadows all others; it eliminates the minimum statutory damage of \$250 for each infringement, no matter how innocent, without which the arbitrary power of ASCAP to force unacceptable and unjust contracts on the broadcasting industry and on other groups of users of music would be greatly lessened.

Recent developments, however, force me to the conclusion that

(1) without a determined effort on the part of the broadcasters and other groups of users, the Duffy Bill will not be passed by the House this session, or,

(2) even if it reaches the state of being voted on by the House, there is serious danger that the \$250 minimum damage provision will be restored, and that only the utmost vigilance will prevent this.

If the bill is not passed this session, then the whole procedure must be recommenced, since the next session will be that of a new Congress. If this is so, then it is proper to consider whether the broadcasting industry should not then endeavor to secure a remedying of other defects in the present law not cured by the Duffy Bill. What I have in mind is that, after acquainting the Senate and House Patent Committees with the more recent developments and problems, we should ask definitely for provisions that would

(1) render any licensing pool illegal unless it operates on a per-piece or measured service basis, is open on fair and equitable terms to all persons owning or controlling performing rights, and preserves competition between such persons, and

(2) confine infringement suits, in the case of network programs, to the originating station.

F. An Independent Music Supply

It is my conclusion that the failure of the Radio Program Foundation to achieve the results expected of it is *not* due to any want of inherent merit in this part of the NAB program but rather (1) inadequate financing, (2) apathy on the part of the NAB, its directors and members and the networks, and (3) insufficient experienced personnel. There were, of course, minor defects and mistakes which, in my opinion, could all be remedied if another attempt is made.

It is my further conclusion that there is no more important feature of sound copyright program for the NAB than the establishing of an independent source of music supply such as was attempted in the Radio Program Foundation. This is not the place in which to present a detailed proposal; it should be made in a separate report confined to this one subject. Among the objectives to be accomplished by such an institution are the following:

1. The purchase, sales and licensing of performing rights.

2. The compilation and distribution of catalogs.

3. The collecting of information with respect to public domain music and, if necessary, the making of such music available.

4. The compilation and distribution of information regarding music (whether copyrighted, by whom controlled, and whether in the public domain) used in the manufacture of electrical transcriptions and phonograph records.

5. Entering into agreements with foreign copyright owners and licensing pools.

6. If necessary, the publication of music.

Not all these functions need necessarily be lodged in a separate corporation. Some of them (such as the distribution of catalogs) might well be considered to be more properly exercised directly by the NAB, through a copyright bureau.

There are, of course, problems with reference to the form of corporation, financing, the sale of stock, limitations on stock control, the profit or non-profit character of the enterprise, etc., which must be studied and in connection with which legal advice will be necessary. If the corporation is adequately financed and supported, none of those problems offers any serious difficulty.

G. The International Situation

On February 27, 1936, a meeting of the *Union Internationale de Radiodiffusion* (U. I. R.) opens in Paris, and during a week or more one of the principal subjects of debate will be copyright. The U. I. R. is composed of practically all the European broadcasting organizations and of many outside of Europe. In this country, the NAB is a member. The two networks and one independent clear channel station are the only members from the broadcasting industry. The copyright problems revolve mainly on the forthcoming international conference on copyright to take place next September, and have to do with proposals that the manufacturers of electrical transcriptions and phonograph records, as such, be given extensive copyright protection, and likewise that performing artists be given similar protection. These proposals are being vigorously urged and cannot be ignored.

If the United States should ultimately adhere to the Convention, it will be bound to give effect to its provisions in the law of this country. It is my conclusion that within practical limits, the NAB should do everything in its power to support the U. I. R. in the position it is taking in opposition to the proposals. It is also my conclusion that any adherence to the Convention by the United States should be postponed until after it is known what the provisions of the Convention are to be.

VIII. RECOMMENDATIONS

My recommendations must necessarily be somewhat in the alternative, depending on whether and how the Board of Directors chooses between the following courses of action:

1. To determine itself the copyright program for the NAB until the next Annual Convention, including the adoption or rejection of my recommendations hereinafter set forth, or

2. To call a special meeting of the NAB and to refer some or all of my recommendations to the membership for action, or

3. To refer this report with its conclusions and recommendations to the membership of the NAB, and to ask the members to determine whether a special meeting shall be called.

There is evidence of some sentiment in favor of a membership meeting at an early date but, without a poll of the members, I am unable to tell whether the sentiment

is sufficiently widespread to justify the calling of such a meeting, with its attendant expense and inconvenience to the members. Under the By-Laws, a special meeting of the members may be called on 15 days' notice on request of either eight directors or of one-third of the members. The suggestion has been made that the date of the Annual Meeting be advanced to some date in the early future but I am inclined to believe that a special meeting would be preferable. A special meeting could be more easily confined to the pressing problems (principally in copyright), would be free of election turmoils, and would not be so likely to be interrupted by social functions.

I am not making any recommendations, therefore, as to whether a special meeting should or should not be called. Both the advantages and the disadvantages of such a course are more or less obvious and need not be recited. It seems to me that the answer to the question depends largely on whether the Board chooses to act on certain of the recommendations set forth below or to refer them to the members for discussion.

My recommendations are as follows:

Printing of the Report

1. That the Managing Director be authorized to print and distribute this report, together with a statement of the Board's actions thereon, to NAB members and to such other persons as in the judgment of the Managing Director have a legitimate interest therein.

Approval and Ratification of Actions of the Managing Director and the Advisory Committee

2. That the actions of the Managing Director and his Advisory Committee in the field of copyright since the December meeting of the Board of Directors be approved and ratified, both generally and particularly with respect to the following:

- (a) Their attempts to negotiate a better license arrangement with ASCAP and their acceptance in the interim of a temporary arrangement cancellable on two days' notice.

- (b) Their attempts to negotiate a better license agreement with Music Publishers' Holding Corporation and their actions in advising broadcasters of the improved terms of the revised contract and in acting as intermediary for stations desiring to accept said contract.

- (c) Their adoption of the "Tentative Program of Activity in Behalf of the NAB," as contained in the printed NAB bulletin and issued January 13, 1936.

Policies with Respect to Copyright

3. That the resolutions adopted by the NAB at its 1935 and earlier Conventions, declaring in favor of the piece or measured service plan of compensation for performing rights be re-affirmed.

4. That all discriminations in ASCAP license agreements (as well as in the license agreements of any other copyright pool) be declared wrongful and against the best interests of the broadcasting industry and of the

public, including the discriminations involved in the network contracts, the newspaper-owned station contracts and the WCAU contract, and such discrimination should be done away with.

5. That those provisions in network-affiliate contracts requiring affiliate stations to have ASCAP or other licenses be declared to constitute an undue burden on affiliate stations, a serious obstacle to successful negotiations both in behalf of affiliate stations and of all other independent stations, and an unfair weapon in the hands of ASCAP and the networks, and such provisions should be eliminated from said contracts.

6. That, in the case of network programs, the NAB declare itself in favor of clearance of copyright at the source so that only the originating station will be held responsible for infringement and affiliate stations will be under no obligation to secure licenses with respect to such programs or to bear responsibility for any infringements that may occur therein.

7. That, generally, Part A of the above-mentioned "Tentative Program of Activity in Behalf of the NAB" be approved as a correct statement of the policies to be followed in negotiating license arrangements with ASCAP and other licensing pools.

8. That the action of ASCAP in refusing to reduce its fees by an amount corresponding to the diminution of its repertoire consequent on the withdrawal of the Warner Brothers group be declared to be arbitrary and unjust.

9. That the possibility of competition and of a sound basis for compensation offered by the withdrawal of the Warner Brothers group from ASCAP be declared, in the present state of the law and in view of the arbitrary power exercised by ASCAP, to be wholesome and in the interest of the broadcasting industry; that broadcasters be urged to do everything in their power to prevent a forcing of the Warner Brothers group to return to ASCAP, and that any attempt to refuse to deal with the Warner Brothers group for such purpose be condemned.

10. That the Officers and Directors of the NAB be authorized and instructed to take any and all necessary and proper steps to put the foregoing policies into effect.

The Government Suit

11. That the Managing Director be instructed to bring the contents of this report, together with any other facts pertinent thereto, to the attention of the Attorney General; to urge upon the Attorney General the imperative necessity for an immediate study of the Government suit against ASCAP and for a determination whether amendments or new or additional proceedings are necessary or advisable to attain the objectives sought to be accomplished by that suit; and to urge upon the Attorney General the imperative necessity for an early resumption of the prosecution of that suit either in its original or in amended or modified form.

The Duffy Copyright Bill

12. That the Managing Director be instructed to bend every effort to bring about enactment of the Duffy Copy-

right Bill (S. 3047) in the form in which it passed the Senate, and to oppose any attempt to insert or restore minimum statutory damages or penalties for infringement; and, if it should appear that enactment of the Bill in satisfactory form is impossible at this session, the Managing Director is further instructed to consider and to report back to the Board of Directors on the advisability of seeking further amendments to accomplish the following objectives:

(a) To render any licensing pool illegal unless it operates on a per-piece or measured service basis, is open on fair and equitable terms to all persons owning controlling performing rights, and preserves competition between such persons.

(b) To confine infringement suits, in the case of network programs, to the originating station.¹

Radio Program Foundation

13. That the need for the immediate establishment of a corporation having substantially the same purposes and powers as the Radio Program Foundation be recognized, and that the Managing Director be instructed to prepare and submit to the Board at an early date a detailed plan and program for the establishment of such a corporation and its successful operation.

International Copyright Problems

14. That the importance of the copyright questions to be discussed at the U. I. R. Meeting to be held at Paris, beginning February 27, 1936, and to be determined at the Conference to be held at Brussels, beginning September 7, 1936, be recognized and that the Managing Director be instructed to take any steps that may be necessary to protect the interests of American broadcasters in the questions to be discussed and decided.

Assistance to the Managing Director

15. That the Managing Director be authorized to retain legal counsel and such other assistance as may in his judgment be necessary or advisable for the successful accomplishment of the objectives herein decided upon.

* * * *

In pursuing this or any other program it cannot be made too clear that it is in the best interest not only of the broadcasting industry but of the public that every encouragement be given to writers and composers of music, both for the sake of the advancement of their art as such and in order that a constant supply of music of the best quality be made available to listeners. To accomplish this, as I know is realized by the entire industry, no scheme will succeed that attempts to do anything less than compensate them, and compensate them generously, for their work and their talent. It is not that the broadcasting industry desires, or ever has desired, to escape this obligation that it has engaged in its copyright activi-

¹ The Duffy Copyright Bill, in its present form, goes a long way towards, but still falls somewhat short of, accomplishing this objective.

ties but rather that it desires, and justly, that it be required to pay only for what it uses and that the fees paid by it actually reach those to whom they are due.

Respectfully submitted,

JAMES W. BALDWIN,
Managing Director.

RECORD OF BOARD ACTION

In acting on the above recommendations, the Board by majority vote adopted the following:

Printing of the Report

1. That the Managing Director be authorized to print and distribute this report, together with a statement of the Board's actions thereon, to NAB members and to such other persons as in the judgment of the Managing Director have a legitimate interest therein.

Approval and Ratification of Actions of the Managing Director and the Advisory Committee

2. That the actions of the Managing Director and his Advisory Committee in the field of copyright since the December meeting of the Board of Directors be approved and ratified, both generally and particularly with respect to the following:

(a) Their attempts to negotiate a better license arrangement with ASCAP and their acceptance in the interim of a temporary arrangement cancellable on two days' notice.

(b) Their attempts to negotiate a better license agreement with Music Publishers' Holding Corporation and their actions in advising broadcasters of the improved terms of the revised contract and in acting as intermediary for stations desiring to accept said contract.

(c) Their adoption of the "Tentative Program of Activity in Behalf of the NAB," as contained in the printed NAB Bulletin and issued January 13, 1936.

Policies with Respect to Copyright

3. That the resolutions adopted by the NAB at its 1935 and earlier Conventions, declaring in favor of the per-piece or measured service plan of compensation for performing rights be reaffirmed.

4. That all discriminations in license agreements in respect of commercial stations be declared wrongful and against the best interests of the broadcasting industry and of the public, and such discriminations should be done away with. (Note: Specific references to actual existing discriminatory contracts were stricken from the recommendation as originally made.)

6. That, in the case of network programs, the NAB declare itself in favor of clearance of copyright at the source so that only the originating station will be held responsible for infringement and affiliate stations will be under no obligation to secure licenses with respect to such programs or to bear responsibility for any infringements that may occur therein.

8. That the action of ASCAP in refusing to reduce its fees by an amount corresponding to the diminution of its repertoire consequent on the withdrawal of the Warner Brothers group be declared to be arbitrary and unjust.

10. That the Officers and Directors of the NAB be authorized and instructed to take any and all necessary and proper steps to put the foregoing policies into effect.

The Duffy Copyright Bill

12. That the Managing Director be instructed to bend every effort to bring about enactment of the Duffy Copyright Bill (S. 3047) in the form in which it passed the Senate, and to oppose any attempt to insert or restore minimum statutory damages or penalties for infringements; and, if it should appear that enactment of the bill in satisfactory form is impossible at this session, the Managing Director is further instructed to consider and to report back to the Board of Directors on the advisability of seeking further amendments to accomplish the following objectives:

(a) To render any licensing pool illegal unless it operates on a per-piece or measured service basis, is open on fair and equitable terms to all persons owning controlling performing rights, and preserves competition between such persons.

(b) To confine infringement suits, in the case of network programs, to the originating station.

Radio Program Foundation

13. That the need for the immediate establishment of a corporation having substantially the same purposes and powers as the Radio Program Foundation be recognized and that the Managing Director be instructed to prepare and submit to the Board at an early date a detailed plan and program for the establishment of such a corporation and its successful operation.

International Copyright Problems

14. That the importance of the copyright questions to be discussed at the U. I. R. Meeting to be held at Paris, beginning February 27th, 1936, and to be determined at the conference to be held at Brussels, beginning September 7th, 1936, be recognized and that the Managing Director be instructed to take any steps that may be necessary to protect the interests of American broadcasters in the questions to be discussed and decided.

Assistance to the Managing Director

15. That the Managing Director be authorized to retain legal counsel and such other assistance as may in his judgment be necessary or advisable for the successful accomplishment of the objectives herein decided upon.

The Board extended the authority given their Managing Director in December to select as Advisory Committee to confer and advise with him.

Minority Report of Harry C. Butcher

I heard Jim Baldwin read the foregoing report at the Chicago Board meeting.

To attempt to answer or even to clarify a 21,000-word report covering several years of copyright history would require perhaps another 21,000 words. You would "tune-out" long before you got to me.

The apparent purpose of rehashing past history seems to be to make the networks the "goats." I notice particularly that the report disregards what to me is the unquestionable fact that all of the NAB copyright activities to date have resulted in increasing the cost of music to broadcasters generally and engendering bitterness among various groups of broadcasters.

Last summer after two years and a half of negotiation, the broadcasters had no idea on what terms they could renew their ASCAP licenses and they did not know whether they could renew for one year, or five, or ten, on any terms. It is perfectly true that the networks played a leading part in negotiating a new 5-year contract, enabling all broadcasters to go on without paying any more than they had been paying, with the sole exception of the networks themselves, who did consent—in order to get all broadcasters including themselves out of their difficulties—to pay substantially larger sustaining fees for their key stations. It is not the fault of the networks that many broadcasters were induced not to avail themselves of this opportunity.

But words, words and words—talk, talk and talk—are not what broadcasters want and need on copyright. They want action along constructive lines.

So I will content myself with a few observations—and the reiteration of a practical suggestion for constructive united action made at the Chicago meeting.

I have already said that I am not going to attempt to answer Jim Baldwin but I am tempted to hit a few of the high spots. On the authority of some anonymous informant in ASCAP, it is stated that the networks inspired or influenced the sending by ASCAP of the telegram which required all broadcasters to renew their contracts by January 15 of this year. That statement is untrue. Representatives of both networks were called into a meeting of the entire ASCAP Board on January 10 and the telegram was read to them and they were informed that it had already been sent. I have confirmed by numerous witnesses that this was the case and that the networks had no knowledge of the telegram in advance.

Jim Baldwin's report furthermore seems to me to be founded on basic misconceptions, the most important of which is that there is a fixed and definite amount of money to be paid for copyrights and that the question at issue is how much of that fixed amount the independent station should pay and how much the networks should pay. This is not the fact. All the copyright interests are unanimous in seeking larger and larger sums from all broadcasters, whether network or independent stations. Those who subscribe to this misconception have wittingly or unwittingly fallen for some of our opponent's

insidious propaganda which is intended to split the broadcasters and which, unfortunately, is showing rather ghastly success.

It also seems to me that undue stress is put on the fact that our network contracts require affiliated stations to have ASCAP licenses. This clause was put into contracts years ago for the protection of the local stations, ourselves and the clients of both. It is not practical to carry on network broadcasting without an ASCAP license. It is not practical to carry on network broadcasting without transmitters at local stations. But the local stations don't get indignant at us because they have to have transmitters.

Our contracts also recognize that affiliated stations must have licenses from the Federal Communications Commission and our mutual operations are based upon performance thereunder. If we were to remove the ASCAP clause from our contracts, would it lessen the local station's need for an ASCAP license any more than deletion of reference to the Government license in our contracts would lessen the local station's need of that license?

Furthermore, anyone who actually knows the temper and disposition of ASCAP is well aware that it would be utterly impossible to persuade ASCAP to allow local stations to go unlicensed. ASCAP on the contrary was utterly determined that there should be neither network broadcasting nor local broadcasting unless the stations were licensed for both. We don't control ASCAP. (We sometimes wish we did.)

Now, finally, for a constructive note. I find no mention in Mr. Baldwin's report or press release (in which he sums up the batting average of his own recommendations to the Board) of the most promising development at the Chicago meeting. I refer to a general agreement which was reached at the end of that meeting. This agreement was to the effect that the broadcasters, including the controlling and operating heads of the network companies, should sit down and try to put an end to the bickering and the name-calling, and see if together they could work out some constructive actions for and in behalf of all broadcasters. This suggestion, made by Ed Craig of WSM, Nashville, was endorsed by all who attended the Chicago meeting. The heads of my company stand willing to participate whole-heartedly in such a meeting. We are ready to support any fair and constructive measures which such a meeting may evolve. Such a meeting should consider among other things a practical plan for creating, financing and operating a music pool for all broadcasters. I urge that immediate action be taken to convene such a meeting. And until a program looking toward the future has been worked out, I deplore the issuance of statements and reports which serve only to split our own ranks to the advantage of our adversaries, and I suggest that until the results of such a meeting are made known, every broadcaster should preserve an open mind.

Respectfully submitted,

HARRY C. BUTCHER.

FAVORABLE REPORT ORDERED ON WHEELER RADIO BILL

The Senate Committee on Interstate Commerce has ordered a favorable report on the Wheeler radio bill (S. 2243) relating to the allocation of radio facilities. The bill was slightly amended and as it was ordered reported it provides that Section 302 of the Communications Act of 1934 be repealed and that Section 2, subsection (b) of Section 307 of the Act be amended to read as follows:

"(b) In considering applications for licenses, and modifications and renewals thereof, when and in so far as there is demand for the same, the Commission shall make such distribution of licenses, frequencies, hours of operation, and of power among the several States and communities as to provide a fair, efficient and equitable distribution of radio service to each of the same."

COPYRIGHT HEARINGS ANNOUNCED

The House Committee on Patents on Wednesday announced that it will hold hearings on various copyright bills three days a week for four weeks.

The dates announced include February 25, 26 and 27, and March 3, 4, 5, 10, 11, 12, 17, 18 and 19.

The first hearings will be devoted to ASCAP, the next to the Authors League and the American Dramatists and other writing interests, while the third and fourth weeks' hearings will be devoted to radio, hotel and motion picture interests.

FEDERAL RADIO EDUCATION COMMITTEE

Plans and methods of securing greater cooperation between educators and broadcasters for the extension and improvement of the use of radio, were the subjects of a two-day conference on Monday and Tuesday of this week.

United States Commissioner of Education, J. W. Studebaker, presided over the sessions of the Committee, which was named by the Federal Communications Commission.

After considering suggestions for a number of surveys and successful practices in the educational and public service uses of radio, and adequate training of personnel, the Committee voted to set up five sub-committees to report at the next meeting.

Members of the Federal Radio Education Committee attending the meeting were:

Waldo Abbot, University of Michigan; James W. Baldwin, National Association of Broadcasters; Morse A. Cartwright, American Association for Adult Education; W. W. Charters, Ohio State University; H. W. Chase, New York University; A. G. Crane, Uni-

AMERICAN SOCIETY OF RECORDING ARTISTS

The new attempt by the American Society of Recording Artists to license stations apparently grows out of the decision in the so-called "Waring-WDAS" case. The decision rendered in this case by Judge McDevitt of the Court of Common Pleas in Philadelphia does not, in my opinion, justify the interpretation placed upon it by the Society. The opinion of Judge McDevitt, of course, has no effect outside the State of Pennsylvania. Further, through special counsel, the NAB has filed exceptions to Judge McDevitt's decision and these exceptions are scheduled for argument before a three-judge court on February 27. If Judge McDevitt's decision is affirmed we will take an appeal.

The important thing for members to consider is that the issues in this case have not been finally adjudicated. It is my recommendation that members do not recognize the American Society of Recording Artists until their rights have been finally determined.

JAMES W. BALDWIN,
Managing Director.

versity of Wyoming; Walter Damrosch, National Broadcasting Company; M. S. Eisenhower, Department of Agriculture; Willard E. Givens, National Education Association; Tom C. Gooch, Daily Times Herald, Dallas, Texas; Rev. George Johnson, Catholic University of America; Lambdin Kay, Radio Station WSB, Atlanta, Georgia; John F. Killeen, Federal Communications Commission; Cline M. Koon, Office of Education; Mrs. B. F. Langworthy, President, National P. T. A.; Luella S. Laudin, Women's National Radio Committee; L. R. Lohr, National Broadcasting Company; H. B. McCarty, University of Wisconsin; C. S. Marsh, American Council on Education (for Dr. Zook); Allen Miller, University Broadcasting Council; E. R. Murrow, Columbia Broadcasting System; A. D. Ring, Federal Communications Commission; Morse Salisbury, Department of Agriculture; John Shepard, III, Yankee Network; Levering Tyson, National Advisory Council; Judith C. Waller, National Broadcasting Company; Frederick S. Willis, Columbia Broadcasting System; William Dow Boutwell, Office of Education; C. F. Klinefelter, Office of Education; J. W. Studebaker, U. S. Commissioner of Education, Presiding.

Other members of the Committee are: Edgar Bill, Radio Station WMBD; Dr. S. Parkes Cadman, Federal Council of Churches of Christ in America; Gardner Cowles, Jr., Des Moines Register; Lester E. Cox, Radio Station KWTO; Edwin Craig, Radio Station WSM; John Elmer, Radio Station WCBM; O. D. Fisher, Radio Station KOMO; Leo J. Fitzpatrick, president, National Association of Broadcasters; William Green, American Federation of Labor; Mrs. Rose Jacobs, Hadassah Women's Zionist Organization; Dr. C. B. Jolliffe, Radio Corporation of America; A. J. McCosker, Bamberger Broadcasting Service; Mrs. Harold B. Milligan, Women's National Radio Committee; Dr. Robert A. Millikan, California Institute of Technology; and Dr. William S. Paley, Columbia Broadcasting System.

GEORGIA STATION MOVE RECOMMENDED

The Liberty Broadcasting Company (WTFI) applied to the Federal Communications Commission to move the station from Athens to Atlanta, Ga. The station operates on 1450 kilocycles, 500 watts power, and unlimited time.

Examiner Ralph L. Walker, in Report No. I-195, recommends that the change be granted on condition that the antenna to be installed shall comply with the provisions of the Commission's rules and regulations and upon the further condition that the exact station location to be hereafter selected shall be subject to the approval of the Commission. The Examiner said also that "it appears from the record that there is a need in the Atlanta area for the additional service which the applicant proposes to render, and that the operation of WTFI as contemplated will not result in any material increase in objectionable interference to existing stations."

C. C. I. R. MEETING

In preparation for the participation of the United States in the Bucharest 1937 Conference of the International Consulting Committee on Radio, the Federal Communications Commission held a meeting on Friday, February 14, of the various governmental and private interests involved. T. A. M. Craven, chief engineer of the Commission, presided and was made chairman of the general committee. Four subcommittees were appointed. The names of the respective chairmen and vice chairmen and the questions to be handled by each of the subcommittees follow:

ORGANIZATION AND TECHNICAL COMMITTEE—Chairman, Dr. J. H. Dellinger; Vice Chairman, Major J. H. Gardner, Jr. Questions: Selectivity curves; wave propagation curves; revision and renumbering of opinions; radio symbols and terminology; methods of measuring field intensity and noise.

FREQUENCY ALLOCATION AND RELATED PROBLEMS—Chairman, E. K. Jett; Vice Chairman, Gerald C. Gross. Questions: Harmonics; shared bands; anti-fading antennas.

OPERATIONS—Chairman, Capt. S. C. Hooper; Vice Chairman, E. M. Webster. Questions: Wave characteristics in respect to direction finding; field intensities necessary for reception; high-frequency mobile calling.

BROADCASTING QUESTIONS—Chairman, A. D. Ring; Vice Chairman, Raymond Asserson. Questions: Synchronization of broadcast stations; broadcast frequency separation; reduction of electrical interference; single sideband in broadcasting; measurements and tolerances, electrical interference to broadcasting; mitigation of electrical interference in receiving equipment; measurement and tolerances, background noise.

These subcommittees will meet again March 3 and 4, and the full committee will meet March 26.

Attendance at the meeting was as follows:

Lieut. W. B. Ammon, Navy Department; R. D. Armiger, Shortwave Institute of America; Raymond Asserson, Federal Communications Commission; E. K. Cohan, Columbia Broadcasting System; H. L. Cornell, American Steamship Owners Association; A. J. Costigan, Radio Corporation of America; T. A. M. Craven, Federal Communications Commission; Roland C. Davies, Editor, Telecommunication Reports; Dr. J. H. Dellinger, Bureau of Standards; Francis C. de Wolf, Department of State; Lloyd Espenschied, Bell Telephone Laboratories; Maj. J. H. Gardner, Jr., War Department; E. J. Girard, Mackey Radio and Telegraph Company; Gerald C. Gross, Federal Communications Commission; Capt. S. C. Hooper, Navy Department; C. W. Horn, National Broadcasting Company; E. K. Jett, Federal Communications Commission; Dr. C. B. Jolliffe, Radio Corporation of America; William N. Krebs, Federal Communications Commission; J. J. Lamb, American Radio Relay League; W. B. Lodge, Columbia Broadcasting System; J. C. McNary, National Press Building; Paul D. Miles, Mackay Radio and Telegraph Company; C. E. Pfautz, Radio Corporation of America; A. D. Ring, Federal Communications Commission; Oswald F. Schuette, Shortwave Institute of America; B. J. Shimeall, Federal Communications Commission; Judge Eugene O. Sykes, Federal Communications Commission; K. B. Warner, American Radio Relay League; E. M. Webster, Federal Communications Commission; L. E. Whittemore, American Telephone and Telegraph Company; W. V. Whittington, Federal Communications Commission.

DENIAL RECOMMENDED FOR GEORGIA STATION

The L & S Broadcasting Company filed an application with the Federal Communications Commission for the erection of a new station at Atlanta, Ga., to use 1210 kilocycles, 100 watts power and daytime hours of operation.

Examiner R. H. Hyde in Report No. I-196 recommended that the application be denied. He states that the evidence presented in support of the application does not show that there is a public need for the construction and operation of the proposed

new station. He says also that "there is no convincing proof that the interests of listeners, the requirements of religious, educational, civic, and charitable organizations or the demands of local talent, desiring means for expression, justify the construction of another station."

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

Sunstrand Machine Tool Company, Rockford, Ill. (2-1899, Form A-2).

Iniskin Drilling Company, Los Angeles, Cal. (2-1900, Form A-1). American Electric Securities Corporation, New York City (2-1902, Form A-2).

Administered Fund Second, Inc., Jersey City, N. J. (2-1903, Form A-1).

Varnishes & Paints, Inc., Hamtrack, Mich. (2-1904, Form A-1). Northern Oklahoma Gas Company, Ponca City, Okla. (2-1905, Form A-1).

Iron Foreman Mfg. Company, Portland, Ore. (2-1907, Form A-2).

T. H. Banfield et al., Portland, Ore. (2-1908, Form F-1).

Independence Fund of North America, Inc., New York City (2-1909, Form C-1).

RENEWAL OF WRBL RECOMMENDED

The facilities of Station WRBL, Columbus, Ga., were requested of the Federal Communications Commission and at the same time the station asked for license renewal.

Examiner George H. Hill in Report No. I-197 recommended that the license renewal be granted. The Examiner found that some of the programs of the station were objectionable but the applicant station "has assured the Commission that programs involving lottery or gift enterprise will not in the future be broadcast over the station and that the station will in all respects be operated in accordance with the rules and regulations of the Commission." The entire record considered, says the Examiner, it is his "opinion that the granting of the application of WRBL for renewal of license would serve the public interest."

KABC LABOR CASE

The National Labor Relations Board has announced that a complaint has been filed against Broadcasting Station KABC, San Antonio, Texas, by the Radio Division of Local No. 60, International Brotherhood of Electrical Workers et al.

The complaint alleges that the company discriminatorily discharged five employees, and has at all times refused to bargain collectively with the union. Hearing will be held at San Antonio on March 3.

RECOMMENDS DISMISSAL WITH PREJUDICE

Broadcasting Station WCMI, Ashland, Ky., applied to the Federal Communications Commission to change its frequency from 1310 to 1350 kilocycles, its power from 100 to 1,000 watts and to operate unlimited time as at present.

Examiner P. W. Seward in Report No. I-198 "recommends that the motion offered by the applicant for continuance of this case be denied" and "that the motion offered by respondents to dismiss with prejudice be granted and this case is dismissed with prejudice." Counsel for the applicant at the hearing stated that an amendment to the original application had been filed the day before the hearing with the Commission and that therefore the case was removed from the hearing docket.

RECOMMENDS OHIO STATION DENIAL

Carter & Wolfe applied to the Federal Communications Commission for a construction permit for the erection of a new broadcasting station at Mansfield, Ohio, to use 1370 kilocycles, 100 watts LS and 50 watts night unlimited time operation.

Examiner Ralph L. Walker in Report No. I-194 recommended that the application be denied. The Examiner found that operation as proposed would "probably result in some slight curtailment of the already limited satisfactory service area of two existing stations. At the same time the proposed station, by reason of low power and interference from existing stations, would serve only a very limited area—considerably less than that expected from a local assignment."

FCC REPORT ON ALLEGED BRIBERY CHARGES

On February 14 the Federal Communications Commission made public the following report:

REPORT OF THE COMMITTEE APPOINTED BY THE COMMISSION JANUARY 9, 1936, TO INVESTIGATE THE FACTS AS TO THE CONVERSATION ALLEGED TO HAVE TAKEN PLACE IN THE WILLARD HOTEL ON SEPTEMBER 5, 1935.

On January 9, 1936, the Commission appointed the undersigned as a committee to investigate what was known as the Willard Hotel incident. The committee immediately began its work, and on January 10, 1936, it requested the Department of Justice to make a full and complete investigation of the matter. Pursuant to that request, a report was submitted to the committee on January 25, 1936. The committee then requested the Department of Justice to procure certain additional information, pursuant to which request a supplementary report was made by the Department on February 1, 1936. With this report the Department of Justice informed the committee that "this closes the investigation". The committee itself examined, among others, all persons now on the Commission's staff who participated in the hearings on the applications of the Howitt-Wood Radio Company, Inc., owners of Station WNEB, Binghamton, N. Y., and the Knox Broadcasting Company, Schenectady, N. Y., for facilities on 1240 kc.

The committee has obtained sworn statements from all persons interrogated either by the Department of Justice or by it. Upon the basis of those statements and of other information obtained by it, the committee submits the following report:

On September 5, 1935, after the recess of the afternoon session of the hearing on the application of the Knox Broadcasting Company, Mr. Cecil D. Mastin, of Binghamton, N. Y., Mr. Harold E. Smith, of Albany, N. Y., Mr. C. M. Jansky, Jr., and Mr. Alfons B. Landa, of Washington, and Mr. Maurice Jansky, of Madison, Wisconsin, met in Mr. Mastin's room (803) at the Willard Hotel. There they discussed and criticized the hearing which they had just left. Highballs were served, but some of those present state that they did not participate.

Mr. A. Mortimer Prall was registered in Room 804, which adjoined Mr. Mastin's room. With him that afternoon was Major Malcolm M. Kilduff.

Mr. Prall and Major Kilduff joined Mr. Anning S. Prall, Chairman of the Federal Communications Commission, and Mr. Herbert L. Pettey, Secretary of the Commission, at Chairman Prall's apartment for dinner that evening. There they told the substance of a conversation which they said they had overheard late that afternoon in Room 803. The essential feature of the overheard conversation, as Mr. Mortimer Prall and Major Kilduff state it was told to Chairman Prall and Mr. Pettey, was that Mr. Harry Butcher could straighten out Station WNEB's difficulties with the Commission for \$25,000, and that one of the speakers was prepared to pay \$25,000 or \$50,000. This story was told to an agent of the Department of Justice who came to the apartment that evening to begin an investigation in response to a request from Chairman Prall.

Mr. Pettey has informed the committee that the alleged conversation as it was reported to Chairman Prall and himself that evening also included (1) a description of a person connected with the Commission who could be "gotten to", which description was discussed by those present, although the person was not identified; and (2) an intimation that the described person had been in the pay of some company for a number of years. Mr. Pettey's recollection was that the description was given to the agent of the Department of Justice; this does not accord with the agent's report. The intimation that the described person had been in the pay of some company was not passed on to the agent.

Mr. Mortimer Prall states that on September 6 he told Chairman Prall and Mr. Pettey that upon his return to his room about 12:40 a.m. he had heard one man in Room 803 tell another that a described, but not named, Commissioner had instructed the examiner what to recommend. That same day Mr. Mortimer Prall told the Department of Justice agent that he had given the agent all the information in his possession, but he did not mention the description or the purported instructions to the examiner. A short time thereafter Chairman Prall and Mr. Pettey informed the agent that they had no information in addition to that which had already been furnished to him.

The investigation by the Department of Justice was suspended

early in September, after Chairman Prall had told the agent that the psychological moment for pursuing it had passed and that the investigation could be more advantageously pursued later.

Upon receiving a report on the matter from Chairman Prall on December 18, 1935, the Commission directed the Chairman to request the Department of Justice to continue the investigation. Except for a letter of December 30, 1935, reciting developments as they stood early in September, the committee has seen no report from the Department of Justice prior to that of January 25, 1936.

Each of the occupants of Room 803 has sworn that he made no such statements as those reported by Mr. Mortimer Prall and Major Kilduff; likewise each has reported that he did not hear any such statements made by anyone in the room. Mr. Butcher has sworn that never upon any occasion did he make any statement that anyone on the Commission "could be bought or controlled". All of the persons involved have declared that they have never made any statements reflecting upon the character and integrity of any member of the Commission.

The examiner who heard the Knox Broadcasting Company application has testified that no member of the Commission, or any other person, spoke to him about his recommendation or about any phase of the hearing. The committee's investigation within the Commission reveals no irregularities in the handling of either the Binghamton or the Schenectady application.

The committee is unable to state whether the alleged conversation ever took place. If the purported statements were made, they have been completely repudiated. Grave responsibility for unsupported statements attacking the integrity of a Government official lies at the door of some person involved in this matter. If the individuals responsible could be identified, they should be prosecuted as relentlessly as the maligned person should have been had the charges been substantiated. While we conclude that there is no basis for the charges made, we keenly regret that we can not fix the responsibility for them.

Respectfully submitted, Irvin Stewart, Chairman. Thad H. Brown. Paul A. Walker. Norman S. Case. George Henry Payne.

List of documentary evidence considered by the committee:

- (1) Letter of December 19, 1935 to the Federal Bureau of Investigation;
- (2) Letter of December 30, 1935 from Federal Bureau of Investigation;

STATIONS USING WARNER BROS. MUSIC

In response to many inquiries there is furnished below a list of stations that have signed the Warner Brothers contract as of February 4, 1936:

KALE—Portland, Oregon; KAST—Astoria, Oregon; KBTM—Jonesboro, Arkansas; KDLR—Devils Lake, North Dakota; KDON—Del Monte, California; KDYL—Salt Lake City, Utah; KFAC—Los Angeles, California; KFBB—Great Falls, Montana; KFEL, KVOB—Denver, Colorado; KFH—Wichita, Kansas; KFIZ—Fond du Lac, Wisconsin; KFJB—Marshalltown, Iowa; KFJJ—Klamath Falls, Oregon; KFJR—Portland, Oregon; KFJZ—Fort Worth, Texas; KFNF—Shenandoah, Iowa; KFOR—Lincoln, Nebraska; KFOX—Long Beach, California; KFPL—Dublin, Texas; KFPW—Fort Smith, Arkansas; KFRO—Longview, Texas; KFSD—San Diego, California; KFVD—Los Angeles, California; KFVS—Cape Girardeau, Missouri; KFWB—Hollywood, California; KFXD—Nampa, Idaho; KFXM—San Bernardino, California; KFXX—Oklahoma City, Oklahoma; KGBX—Springfield, Missouri; KGC—Mandan, North Dakota; KGD—Stockton, California; KGEK—Sterling, Colorado; KGFI—Corpus Christi, Texas; KGFJ—Los Angeles, California; KGFK—Moorhead, Minnesota; KGFW—Kearney, Nebraska; KGGC—San Francisco, California; KGGM—Albuquerque, New Mexico; KGHL—Billings, Montana; KGNC—Amarillo, Texas; KGVO—Missoula, Montana; KHSL—Chico, California; KIDO—Boise, Idaho; KIEM—Eureka, California; KIEV—Glendale, California; KIUI—Santa Fe, New Mexico; KIUL—Garden City, Kansas; KJBS—San Francisco, California; KLPM—Minot, North Dakota; KLS—Oakland, California; KLZ—Denver, Colorado; KMAC—San Antonio, Texas; KMBC—Kansas City, Missouri; KMLB—Monroe, Louisiana; KMPC—Beverly Hills, California; KNOW—Austin, Texas; KNX—Los Angeles, California; KOIL—Council Bluffs, Iowa; KONO—San Antonio, Texas; KORE—Eugene, Oregon; KOY—Phoenix, Arizona; KPAC—Port Arthur, Texas; KPCL—Lake Charles, Louisiana; KQW—San Jose, California; KRE—Berkeley, California; KRGV—Weslaco, Texas; KRLC—Lewiston, Idaho; KRLD—Dallas, Texas; KRLH—Midland, Texas; KRMD—Shreveport, Louisiana; KRNR—Roseburg, Oregon; KSL—Salt Lake City, Utah; KSUN—Lowell, Arizona; KUMA—Yuma, Arizona; KVOA—Tucson, Arizona; KVOB—Denver, Colorado; KVOE—Santa Ana, California; KVOO—Tulsa, Oklahoma; KWBG—Hutchinson, Kansas; KWJJ—Portland, Oregon; KWTO—Springfield, Missouri; KWYO—Sheridan, Wyoming; KXL—Portland, Oregon; KXO—El Centro, California.

WAAB—Boston, Massachusetts; WAAF—Chicago, Illinois; WAAT—Jersey City, New Jersey; WAAW—Omaha, Nebraska; WAGF—Dothan, Alabama; WAIM—Anderson, South Carolina; WAIU—Columbus, Ohio; WALR—Zanesville, Ohio; WATR—Waterbury, Connecticut; WBNX—New York, N. Y.; WBOW—Terre Haute, Indiana; WCAX—Burlington, Vermont; WCAX—Carthage, Illinois; WCB—Waukegan, Illinois; WCB—Springfield, Illinois; WCLO—Janesville, Wisconsin; WCLS—Joliet, Illinois; WCM—Ashland, Kentucky; WCOC—Meridian, Mississippi; WCOP—Boston, Massachusetts; WCPO—Cincinnati, Ohio; WDAF—Kansas City, Missouri; WDAS—Philadelphia, Pennsylvania; WDBJ—Roanoke, Virginia; WDEV—Waterbury, Vermont; WDZ—Tuscola, Illinois; WEAN—Providence, Rhode Island; WEBC—Superior, Wisconsin; WEBQ—Harrisburg, Illinois; WEED—Rocky Mount, North Carolina; WEEI—Boston, Massachusetts; WELI—New Haven, Connecticut; WELL—Battle Creek,

Michigan; WEMP—Milwaukee, Wisconsin; WEXL—Royal Oak, Michigan; WFAA—Dallas, Texas; WFAS—White Plains, New York; WFBM—Indianapolis, Indiana; WFDF—Flint, Michigan; WGBF—Evansville, Indiana; WGBI—Scranton, Pennsylvania; WGES—Chicago, Illinois; WGH—Newport News, Virginia; WGN—Chicago, Illinois; WHAT—Philadelphia, Pennsylvania; WHAZ—Troy, New York; WHB—Kansas City, Missouri; WHBC—Canton, Ohio; WHBL—Sheboygan, Wisconsin; WHBQ—Memphis, Tennessee; WHBU—Anderson, Indiana; WHDF—Calumet, Michigan; WHDH—Boston, Massachusetts; WHDL—Olean, New York; WHK—Cleveland, Ohio; WHO—Des Moines, Iowa; WIBG—Glenside, Pennsylvania; WIBM—Jackson, Michigan; WIBU—Poynette, Wisconsin; WIBW—Topeka, Kansas; WIBX—Utica, New York; WICC—Bridgeport, Connecticut; WIL—St. Louis, Missouri; WIND—Gary, Indiana; WJAC—Johnstown, Pennsylvania; WJAG—Norfolk, Nebraska; WJAY—Cleveland, Ohio; WJBC—Bloomington, Illinois; WJBK—Detroit, Michigan; WJIM—Lansing, Michigan; WJJD—Chicago, Illinois; WKBB—East Dubuque, Illinois; WKBH—La Crosse, Wisconsin; WKBZ—Muskegon, Michigan; WKEU—Griffin, Georgia; WKOK—Sunbury, Pennsylvania; WKZO—Kalamazoo, Michigan; WKY—Oklahoma City, Oklahoma; WLBC—Muncie, Indiana; WLBF—Kansas City, Kansas; WLLH—Lowell, Massachusetts; WLS—Chicago, Illinois; WLVA—Lynchburg, Virginia; WLW—Cincinnati, Ohio; WMAS—Springfield, Massachusetts; WMAZ—Macon, Georgia; WMBC—Detroit, Michigan; WMBD—Peoria, Illinois; WMBH—Joplin, Missouri; WMC—Memphis, Tennessee; WMFG—Hibbing, Minnesota; WMFR—High Point, North Carolina; WNAC—Boston, Massachusetts; WNBC—New Britain, Connecticut; WNB—Binghamton, New York; WNBH—New Bedford, Massachusetts; WNB—Memphis, Tennessee; WNOX—Knoxville, Tennessee; WOAI—San Antonio, Texas; WOC—Davenport, Iowa; WOOD, WASH—Grand Rapids, Michigan; WOPI—Bristol, Tennessee; WORL—Needham, Massachusetts; WORC—Worcester, Massachusetts; WOW—Omaha, Nebraska; WPAD—Paducah, Kentucky; WPAY—Portsmouth, Ohio; WQBC—Vicksburg, Mississippi; WRGA—Rome, Georgia; WRJN—Racine, Wisconsin; WROK—Rockford, Illinois; WRR—Dallas, Texas; WSAI—Cincinnati, Ohio; WSBC—Chicago, Illinois; WSFA—Montgomery, Alabama; WSM—Nashville, Tennessee; WSVA—Harrisonburg, Virginia; WSYB—Rutland, Vermont; WTAG—Worcester, Massachusetts; WTBO—Cumberland, Maryland; WTEL—Philadelphia, Pennsylvania; WTIC—Hartford, Connecticut; WTMJ—Milwaukee, Wisconsin; WTMV—East St. Louis, Illinois; WTRC—Elkhart, Indiana; WWJ—Detroit, Michigan; WWRL—Woodside, New York; WXYZ—Detroit, Michigan; W6XAI—Bakersfield, California.

DEEN TALKS ON COPYRIGHT BILL

Representative Braswell Deen of Georgia on Wednesday night talked over the red network of NBC in favor of the Duffey copyright bill as follows:

There is pending before the United States Senate for consent to ratification the International Copyright Convention, to which Convention approximately forty of the leading countries of the world are parties, including all of the English-speaking nations. The essential purpose of the Convention is to furnish protection to authors, composers and producers of literary, musical and artistic productions from infringement.

In 1931 the Convention was before the Senate for consideration. Hearings were held on the entire copyright situation by the Senate Committee on Patents in 1931 and by the Committee on Patents of the House of Representatives in 1931 and 1932.

In 1934 a sub-committee of the Senate Committee on Foreign Relations conducted hearings. At the request of the Senate Committee on Foreign Relations, the Inter-departmental Committee on Copyright, named by the Departments of State and Commerce and the Copyright Office in the Library of Congress, undertook the work of assisting and cooperating with members of Congress in the preparation of appropriate copyright legislation which was deemed necessary and essential, prior to further consideration of the International Copyright Convention by the Senate.

The Copyright Convention in revised form was again transmitted to the Senate on February 19, 1934, with the request from the President of the United States that the advice and consent of the Senate to adherence thereto on behalf of the United States should be accorded. After consideration by the Foreign Relations Committee of the Senate, the Committee reported to the Senate the Copyright Convention Treaty on April 18, 1935, and it was approved by the Senate on April 19, 1935, without

a dissenting vote, but a few days later it was placed back on the Senate Calendar to await legislation from the Senate Committee on Patents. After hearings which gave all persons who had any objections to the Bill as introduced an opportunity to be heard, and after careful consideration by the Committee, the Duffy Bill, S. 3047, was reported to the Senate by the Committee on Patents and the Bill was passed by the Senate without a roll call vote on August 7, 1935. The Senate now proposes to approve the Copyright Convention as soon as appropriate action is taken by the House of Representatives.

As a member of the Committee on Patents of the House of Representatives to which the Duffy Bill has been referred, I am advocating prompt and favorable consideration of this legislation. Doubtless the House of Representatives will wish to make a few amendments designed to improve the Bill, but in its essential features the Bill seems to fulfill the outstanding needs of copyright legislation.

Under the provisions of our existing Copyright Laws there is a minimum statutory penalty of \$250.00 for infringement, with a maximum penalty of \$5,000.00. I contend that the owner of the copyright should be justly compensated in case of infringement. This is a property right guaranteed under the Constitution, however, there is no more justification for minimum damages of \$250.00, irrespective of the loss or damage done, than there is for a minimum penalty of \$250.00 in case of a collision between two automobiles.

Because of the unfairness of this provision of existing law public sentiment has not been in sympathy with its enforcement. Federal Courts have therefore found it exceedingly difficult to enforce the provision of minimum damages. The Duffy Bill eliminates this provision and leaves it discretionary with the courts to determine the minimum amount of damage or liability in case of infringement.

The Bill provides that the Federal Courts shall award sufficient statutory damages to prevent infringement and such as may be just, proper and adequate, in view of the circumstances of the particular case.

The maximum penalty is changed from \$5,000.00 to \$20,000.00. This is deemed appropriate in view of the increased value of copyrighted works. It should be emphasized that under these provisions of the Duffy Bill larger benefits will accrue to producers, composers and authors.

One of the outstanding features of the Bill consists in what is generally referred to as the "Right of Divisibility"—that is, the copyright may be divided so that the sale of the right for one purpose does not include the right for any other purpose. Although it is possible under existing law to secure the right of divisibility by private contract, such procedure, as is required under existing law, is unsatisfactory. The proposed law specifically recognizes that an author can sell book rights to a publisher; serial rights to a magazine publisher; motion picture rights to a producer of motion pictures, dramatic rights to a dramatist, etc. This will result in larger remuneration to authors, producers and composers.

Sub-section (d) of section 1 of the Act of 1909 is amended by adding, "That the right to produce a motion picture shall include the right to exhibit it. This provision is added to prevent an author who has sold motion picture producing rights from contending that he is entitled to prevent the picture from being exhibited.

Under existing law the right of registration of unpublished manuscripts is permitted only in a very limited number of cases, for a period of 28 years, renewable for a like period of time. The Duffy Bill provides for a single term of 56 years and permits the registration of manuscripts of all kinds.

Under the present Copyright Law, a photographer may copyright a photograph which he has made of a person and the person cannot publish or permit his friends to publish his own photograph. The Duffy Bill corrects this ridiculous situation by inserting in sub-section (c) of section 62 of the Act, as amended by section 28 of the Bill, as follows: "Copyright in the photograph of a single individual shall not be had except with the written consent of the person photographed."

In order to protect their interests many producers of literary and artistic works years ago formed an organization which is appropriate and indispensable—just as are organizations among those who labor and among farmers. A large percentage of the song writers and composers of this country maintain an organization known as The American Society of Composers, Authors and Publishers to which have been confided the performing rights of their music. This organization has grown strong and powerful in its operation. The presence in the law of the inflexible pro-

vision requiring the courts to award not less than \$250.00 for each infringement, regardless of the damage done or loss sustained, is a sort of legalized subsidy to this organization in the form of a super-charge or extraordinary bargaining power, frequently resulting in high license fees and often in double license fees to those who desire, as consumers, to use copyrighted works.

Whenever a work in which it holds performing rights is broadcast, the broadcaster remunerates the copyright owners, usually by a fixed percentage of the advertising returns of the broadcast. After a broadcasting company has paid the organization for the right to broadcast copyrighted music, there should be no further charges, either to the affiliated radio stations or to the consuming public who have radios or receiving sets; however, under the provisions of our present Copyright Laws as enacted in 1909 and now stand on the statute books, every owner of a radio in the United States which is used for the least possible commercial purpose is liable for the minimum damages of \$250.00.

In other words, every drug store, dry goods store, furniture store, hardware store, grocery store, barber shop, bootblack stand, cafe, restaurant, hotel, boarding house, beer parlor, amusement and dance halls, newsstands, and any and all other commercial places of business where radios and receiving sets are maintained and through which copyrighted music is received are subject to damages of not less than \$250.00 for each infringement on a copyrighted piece of music, unless they have obtained a license from the copyright holder. The minimum penalty or damage of \$250.00 furnishes copyright owners a basis for bargaining with consumers, with the result that the charge to the consuming public is almost prohibitive.

Proprietors or managers of these places of commercial business have no way of knowing whether or not music is copyrighted. Under the provisions of existing law if they receive copyrighted music over their radios in their places of business they can be sued in the Federal Courts, and the judges of which have, under the law, no discretion in respect to the minimum damages which are fixed at \$250.00 for each infringement. If a radio in a drug store, or any other place of business, by way of illustration, receives 25 pieces of copyrighted music in one day then the minimum amount of damage would be \$6,250.00. This would be rather expensive music for one store in one day.

How can a proprietor or manager know when to cut off his radio in order not to infringe on a piece of copyrighted music? He has no way of knowing. The broadcasting companies cannot be blamed because they have already paid the copyright holder for the right to broadcast the music.

A recent and concrete illustration of what occurred in New York City on February 3rd will serve to show the seriousness of the present situation. Damages in the amount of \$670,000.00 were asked by the Remick Music Corporation in a suit filed in United States District Court against the Columbia Broadcasting Company. The Remick Music Corporation contends that the song "That Old Fashioned Mother of Mine" was broadcast over a network of 66 stations, and the song entitled "Some Sunny Day" was broadcast over a network of 68 stations. The Music Corporation is asking the maximum penalty of \$5,000 each for the 134 stations, or a total of \$670,000 for the two songs. Of course, the Remick Music Corporation has no definite way of knowing or proving what commercial places of business had their radios tuned in to receive these songs. It is therefore difficult and practically impossible for the company to single out and name individual places of commercial business and undertake to collect damages, hence the suit is filed against the Columbia Broadcasting Company, even though the broadcaster had paid or will pay for the right to broadcast the two songs.

Granting that there was infringement, the amount of damages asked for is absurd, but it impressively illustrates the essential and absolute importance of needed revision and amendment of our existing Copyright Laws. Since the broadcaster pays for the right to broadcast copyrighted music it is nothing less than pyramiding of fees to require affiliated stations and consumers by means of receiving sets in their places of business to pay for it again. This is wrong. It would be equally wrong for a manufacturer or owner of a patent on a manikin or model of the human body to undertake to collect additional fees or charges on his product from proprietors of dry goods stores, after these places of business had purchased the manikins or models on which to display their merchandise. This supercharge in the form of a license or penalty of \$250.00 will, if continued, destroy the source of consumption of musical and dramatic works.

Because of this condition, it seems clearly evident to me that the time has come when Congress should speedily and quickly enact legislation to correct this situation. I have read and studied

carefully Senate Report No. 896 from the Committee on Patents, also Senate Executive Report No. 4 from the Committee on Foreign Relations; also the Duffy Bill, Senate 3047, and after due consideration I am convinced that the Duffy Bill should be promptly and forthwith enacted into law. There is every reason why the International Copyright Convention, if agreed to by the Senate and made effective by participation on the part of the United States, will do justice to authors, composers and producers. Likewise provisions of the Duffy Copyright Bill, when enacted into law will be fair to authors, composers and producers and at the same time will be most beneficial to the consuming public.

Article 1, section 8 of the Constitution empowers Congress "To promote the progress of science and useful arts, by securing for limited times to authors and inventors and exclusive right to their respective writings and discoveries."

The Convention for the protection of industrial property comprising patents and trademarks was established and signed originally at Paris on March 20, 1883. The United States has been a party to this Convention for the protection of industrial property rights since 1887. The Convention, of course, has been revised from time to time and our patent laws have also been revised and amended accordingly. This protection provided for on behalf of the United States for the owners of patents and trademarks is highly essential and important. It is as equally important that the same protection be given producers in the literary and artistic fields.

The United States has become a great exporter of books, magazines, musical and artistic productions, and the rights of American authors, producers and composers should be safe-guarded by the Federal Government against infringement in foreign countries.

Two months of the present session of Congress will soon have passed and no action on the part of the Committee on Patents of the House of Representatives has been taken on the Duffy Copyright Bill or on any other copyright legislation. No hearings have been held by the Committee on Patents of the House of Representatives, either at this session or during the session of 1935. In my humble judgment and opinion prompt and immediate consideration should be given this matter by the committee. Meritorious legislation should never be pigeon-holed, but should be considered and enacted or defeated on its merit or lack of merit. I sincerely believe you will join me in the hope that the Duffy Bill should forthwith and promptly be considered and enacted into law. Thank you.

CONNERY TALKS ON FCC

Representative Connery of Massachusetts made another speech in the House on Monday of this week asking the Rules Committee of the House to report out his resolution providing for a thorough investigation of "radio broadcasting from top to bottom."

Mr. Connery addressed the House in connection with the report of the Federal Communications Commission committee regarding certain alleged facts which were investigated. The Commission's report will be found in another part of this issue.

Mr. Connery said in part: "Last Friday the people of the United States celebrated Valentine's Day. The Federal Communications Commission took advantage of the day to present to the American people a valentine, the like of which I hesitate to believe has ever been presented by a governmental agency to the Congress or to the American people.

"With a Commission of five of the seven members having sat for the past 6 weeks investigating alleged corruption or misconduct on the part of some of those officially connected with this governmental agency, this body, with the signatures of five of the seven members attached to the report, state that the Chairman and the secretary of the Commission were told by the son of the Chairman and an associate, one Major Kilduff, that they had overheard a conversation wherein the vice president of one of the national broadcasting companies was alleged to be able, on payment of \$25,000, to straighten out the difficulties of an applicant for favor at the hands of the Commission. Further, that the applicant was prepared to pay \$25,000 or \$50,000.

"The report further states that the secretary of the Federal Communications Commission told the committee of five of the seven members of the Federal Communications Commission that the alleged conversation which was heard, or supposed to have been heard by the son of the Chairman of the Commission and Major Kilduff, included a description of a person connected with the Commission who could be "gotten to", which description was discussed by those present, although the person was not identified, and, further, an intimation that the described person had been in the pay of some company for a number of years.

"The committee in its findings states:

The committee is unable to state whether the alleged conversation ever took place. If the purported statements were made, they have been completely repudiated. Grave responsibility for unsupported statements attacking the integrity of a Government official lies at the door of some person involved in this matter.

"Is it the belief of any Member of this House that those who made such statements or who were alleged to have discussed the possibility of bribing a public official are going to admit willingly that they entered into such a conspiracy?"

"In conclusion, many Members of the House feel that this investigation of radio is a very important matter and should be acted upon by this House. I have had letters from all over the United States protesting about conditions on the radio and conditions in the Federal Communications Commission. Many Members of this House are anxious to have these conditions cleaned up and believe that the Rules Committee ought to report to this House a resolution for a thorough investigation of radio broadcasting from top to bottom."

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2712. The **Marion Vault Manufacturing Co.**, 274 North Main St., **Marion, Ohio**, is named respondent in a complaint alleging unfair methods of competition in the sale of two types of metal burial vaults, one designated "The New Imperial Burial Vault," and the other, "Gold Seal Burial Vault."

In circulars distributed to undertakers, funeral directors and morticians for their use in selling the vaults, the respondent is alleged to have made representations to the effect that the New Imperial Burial Vault "will protect through the years" and is "inherently qualified to provide enduring protection," and that the Gold Seal Burial Vault is equipped with a patented double seal, represented to be "permanently secure" and "improving as time goes on."

No. 2714. Alleging unfair competition in the use of the word "distilling," a complaint has been issued against **Keystone Distilling Co.**, 1824 North Fourth St., **Harrisburg, Pa.**

The respondent sells in interstate commerce whiskies, gins, and other spirituous beverages which it purchases, rectifies, blends and bottles, according to the complaint.

By use of the word "distilling" in its corporate name and on its labels and stationery, the respondent, the complaint charges, represents to its customers and furnishes them with the means of representing to their vendees, both retailers and ultimate consumers, that it is a distiller and manufactures its products by the process of distillation, when in fact it is not a distiller, and does not own a plant where the products it sells are distilled.

No. 2715. Unfair competition in the sale of powdered and liquid ink is charged in a complaint against **Milton Tock**, trading as **Universal Ink Co.**, 1847 68th St., **Brooklyn, N. Y.**

It is alleged that the respondent, through letters, labels and circulars, represents he has been established in business since 1895, that he manufactures writing inks of the highest quality, and that his powdered ink is manufactured and distributed by Universal Ink Co., when in fact, according to the complaint, his business was established in 1934, he does not manufacture powdered ink products, and does not own or operate a factory in which powdered ink is made.

No. 2716. False and exaggerated representations in connection with the sale of "Neet," a depilatory, are alleged in a complaint issued against **Neet, Inc.**, 4316 North Kilpatrick Ave., **Chicago.**

In its advertising, the respondent is alleged to have represented that "Neet" permanently eradicates hair, discourages its growth and delays its reappearance for a substantial length of time, when, according to the complaint, these claims are untrue. The respondent also advertises that "Neet" is not caustic, and gives results unlike other methods of hair removal, whereas, the complaint charges, the product is caustic, particularly when introduced into the eye, and the results it produces are similar to those of other depilatories, and it is an ordinary hair remover.

No. 2717. Charging violation of Section 3 of the Clayton Act, a complaint has been issued against **Soft-Lite Lens Co., Inc.**, 119 West 57th St., **New York City**, engaged in the sale of a line of optical lenses distributed under the general trade name "Soft-Lite."

It is alleged that the respondent, in marketing its products, uses a sales service plan and enters into agreements, contracts and understandings with wholesalers, retailers and dealers, the effect of which practices may be to substantially lessen competition and tend to create a monopoly in favor of the respondent in the optical lens business in the United States.

According to the complaint, the respondent corporation is selling and making contracts for the sale of its products upon condition and with the agreement and understanding that the purchasers who are wholesalers, retailers and dealers shall not sell or deal in any lenses or goods of any competitor similar in tint, color, shade or type to "Soft-Lite" lenses.

No. 2718. In a complaint issued against **Economy Rubber Products Co.**, 600 Burkhardt Ave., **Dayton, Ohio**, the company is charged with making false representations in the sale and distribution of "Tiger-Grip Tire Patches."

The respondent is said to have represented in advertising matter and in radio broadcasts that, among other things, its product is "guaranteed 10,000 miles" and "saves motorists 50 per cent"; that it "insures permanent tire repairs" and "tire mileage," and that it "permanently repairs blow-outs, rim cuts, etc., by self-vulcanizing," when, according to the complaint, such assertions are untrue.

No. 2719. **Michael Whitehouse**, 800 Washington Boulevard, **Detroit**, trading as **International Tableware Co.**, and engaged in the sale of tableware and dishes, is named respondent in a complaint alleging false representations in the use of a sales promotion plan to advertise his products and increase his volume of business.

The complaint alleges that the respondent, through personal solicitation by his agents, sells to retail dealers for \$4.50 a thousand trade cards to be distributed to retailers' customers, which cards the respondent represents will be redeemed by him in tableware or dishes when returned to him by the customers. He also represents, according to the complaint, that he will refund to the retailers \$4.50 for each thousand cards returned.

Under this sales promotion plan, it is said, retailers contract to buy from the respondent, for 20 cents each, gift boxes to be distributed to their customers and purportedly containing four pieces of tableware, and a certificate entitling the customer to match the four pieces by making additional purchases of tableware from the respondent at specified special prices.

No. 2720. A complaint has been issued against **Granada Vineyards, Inc.**, 95 Harvey St., **Cambridge, Mass.**, alleging unfair competition in the sale of wines in interstate commerce.

The respondent has a plant at Cambridge where it bottles wines purchased in California, but, according to the complaint, by use of the word "Vineyards" in its corporate name, on stationery and on labels attached to bottles, it represents to customers and furnishes them with the means of representing to retailers and consumers that it owns vineyards and manufactures wine without intervention of a middleman's profit, when such are not the facts.

Stipulations

The Commission has issued the following cease and desist orders:

No. 1600. **Diamond Silver Co.**, **Lambertville, N. J.**, engaged in manufacturing and selling flatware and hollow ware for table use, agrees to desist from use in printed matter of the coined words "Diamondgold" and "Goldcraft" as descriptive of products not composed of gold, in whole or in part. The respondent also agrees to discontinue use of the word "Gold," either alone or in connection with the prefix "Diamond," or with the suffix "craft," or with any words which tend to mislead purchasers into the belief that its products are composed partly or wholly of gold, when such is not the fact.

No. 1601. **John C. Koch**, trading as **St. Louis Wilbert Vault Co.**, 3239 Alfred St., **St. Louis**, manufacturing and selling the "Wilbert Asphalt Burial Vault," agrees to discontinue use in advertising matter of the word "eternal," alone or in connection with other words tending to mislead purchasers into the belief that these products are of infinite duration, or will give permanent protection to the bodies encased therein, when such are not the facts. Under the stipulation, the respondent will cease advertising his product as "The only dual vault in the world."

No. 1602. **London House, Ltd.**, 411 Fifth Ave., **New York City**, is engaged in the sale of a soap and brush kit designated "Devon Milk Pre-Facial," by **Kent of London**." The respondent agrees to discontinue use of the words "By Kent of London," either independently or in connection with the words "Devon Milk Pre-Facial" or with its trade name "London House, Ltd.," so as to imply or have a tendency to mislead purchasers into the belief that this product is of English origin and imported into the United States

when, according to the stipulation, the package is composed of parts which, with but one exception, are manufactured in the United States and not by **Kent of London**.

No. 1603. **Samuel Hansen and Thomas Kjorsvik**, 746 South **Figueroa St.**, **Los Angeles**, trading under the firm name "**Nu-Jo-Wa Institute**," agree to discontinue false and misleading advertising in the sale of a mineral water. According to the stipulation, the product is made from city tap water, and subjected to an alleged oxidation and aging process. The respondents will discontinue representing that this product provides a satisfactory relief from conditions such as hyperacidity, indigestion, and heartburn, that it is a positive neutralizer of stomach acids, that it tends to produce sleep, that it will relieve a rundown, nervous condition, or that it has practical value in the treatment of cuts, abrasions, or skin diseases, when such assertions are untrue. The respondents also stipulate that they will cease and desist from making any representations which may have a tendency to mislead purchasers into the belief that their product has a therapeutic value or properties in excess of those which it actually possesses.

No. 1604. **Anna E. McGrew**, 1837 W. Gage Ave., **Los Angeles**, trading as **Nu-Jo-Wa Process Water Co.**, manufactures the mineral water sold by **Samuel Hansen and Thomas Kjorsvik** (Stipulation No. 1603). She entered into a stipulation, the terms of which are the same as those in the agreement signed by **Hansen and Kjorsvik**.

No. 1605. **Goldley Bros., Inc.**, trading as **Goldley Bros. Co.**, 652 Main St., **Cincinnati**, engaged in the sale of barber and beauty shop supplies, has entered into a stipulation to cease and desist from use of the words "Hair Color Restorer" as a part of a trade name for its products which do not have the property of restoring gray hair to its natural color. The respondent will also cease representing that its "Goldley Lox Hair Color Restorer" is a food or tonic to the hair, or that the product is other than a dye or stain.

No. 1606. **Table Tennis Corporation of America**, 311 Mountain Road, **Union City, N. J.**, engaged in manufacturing and selling nets and other equipment used in the game of ping pong or table tennis, agrees to cease and desist from labeling or otherwise branding its nets with the word "Patented," when in fact it has not obtained a patent. The respondent company also is to discontinue use of any other word of equivalent meaning tending to mislead purchasers into the belief that it has a patent on its products, when such as not the fact.

No. 1607. **Pearson Co., Inc.**, 128 North Pennsylvania St., **Indianapolis**, engaged in the sale of pianos, radios and other merchandise, has agreed to discontinue representing in its advertising matter or otherwise, that it has a piano or pianos of a given type, make or description in any designated community, when in fact it has no such pianos in such communities. The respondent is said to have advertised in certain newspapers that "We have in this community a small grand piano with bench being returned to us," and that the respondent would "transfer this account to responsible party, allowing all that has been paid," at a certain price.

No. 1608. **Newell Massey**, trading as **Reliable Monument Co.** and as **Burton Gray Co.**, with office and sales room at 1618 Madison Ave., **Covington, Ky.**, and a plant at 530 Hodge St., **Newport, Ky.**, is engaged in the sale and distribution of granite and marble monuments. He agrees to discontinue use of the words "Highest Quality Gray Granite" and "Highest Quality," as descriptive of his granite, when such representations are untrue. Under the agreement, he will also desist from using in advertising matter the phrase "Special for 30 Days Only," and "This Marker only \$27.50," implying that the price of \$27.50 is a special price for a 30-day period, when this is not true.

No. 1609. **A. Cohen & Sons Corporation**, 584 Broadway, **New York City**, wholesale dealer in watches, agrees to discontinue selling watches to which are affixed tags bearing what purport to be retail selling prices, but which prices are exaggerated, fictitious, and much in excess of the prices at which the watches are sold in the ordinary course of trade.

No. 2164. **Home Drug Co.**, 18 North Fourth St., **Minneapolis, Minn.**, has been ordered to cease representing that its "Prescription No. 69," or any of its proprietary articles of substantially the same composition, is an effective remedy for gall stones or for diseases caused by the presence of gall stones.

Under the order, the respondent is directed to cease representing that "Prescription No. 69" will cause gall stones to be dissolved or evacuated from the body, or will relieve or cure diseases of the gall bladder or connected ducts.

No. 2437. **Vernon and Raymond G. Seitz**, trading as **Winona Monument Co.**, 172 West 3rd St., **Winona, Minn.**, have been

ordered to cease and desist from representing that the monuments and memorials they manufacture and sell are made of "Barre" granite, until and unless these products are made of granite quarried in the Barre district of Vermont. The respondents are directed to discontinue substituting any other type of granite where Barre granite is specified in an order or contract.

No. 2504. An order to discontinue false and misleading representations in the sale of flashlight and dry cell batteries has been issued against **United States Electric Manufacturing Corporation**, 222 West 14th St., New York City.

Under the order, the respondent is directed to cease and desist from representing in circulars, on labels, in catalogues, or in other advertising literature, that its flashlight and dry cell batteries have a "Special Patented Lok-Top," or are "Patented." Also, the respondent is prohibited from using other words of similar tenor to describe these products as being "patented" or as having a "Special Patented Lok-Top."

FTC CASE CLOSED

No. 2290. The Federal Trade Commission has issued an order closing its case against **Stefano Crisafulli**, trading as **Lucca Olive Oil Co.**, 20 Leonard St., New York City, who was charged with unfair competition in the sale of olive oil and blended vegetable and salad oils.

The Commission closed the case without prejudice to its right to reopen it at any time for further investigation and action. Closing of the case was ordered because the record failed to disclose interstate sales of the respondent's products alleged to be falsely labeled, advertised, or misbranded.

FEDERAL COMMUNICATIONS COMMISSION ACTION

The regular weekly meeting of the broadcast division of the Commission was not held early this week. It will be held later in the week.

HEARING CALENDAR

Thursday, February 27

ORAL ARGUMENT BEFORE THE BROADCAST DIVISION

Examiner's Report No. I-127:

NEW—Bellingham Publishing Co., Bellingham, Wash.—C. P., 1420 kc., 100 watts, unlimited time.

Examiner's Report No. I-139:

KDFN—Donald Lewis Hathaway, Casper, Wyo.—Modification of license, 789 kc., 500 watts, unlimited time. Present assignment: 1440 kc., 500 watts, unlimited time.

KGHL—Northwestern Auto Supply Co., Inc., Billings, Mont.—Modification of license, 780 kc., 1 KW, 2½ KW LS, unlimited time. Present assignment: 950 kc., 1 KW, 2½ KW LS, unlimited time.

KSOO—Sioux Falls Broadcast Assn., Inc., Sioux Falls, S. Dak.—Modification of license, 780 kc., 1 KW, 2½ KW LS, specified hours except used by KFDY. Present assignment: 1110 kc., 2½ KW, limited time.

KXL—KXL Broadcasters, Portland, Ore.—Modification of license, 780 kc., 250 watts, specified hours. Present assignment: 1420 kc., 100 watts, 250 watts LS, shares with KBPS.

KXL—KXL Broadcasters, Portland, Ore.—Modification of license, 780 kc., 250 watts, specified hours. Present assignment: 1420 kc., 100 watts, 250 watts LS, shares with KBPS.

KEHE—Evening Herald Publishing Co., Los Angeles, Calif.—C. P., 780 kc., 1 KW, 5 KW LS, unlimited time. Present assignment: 780 kc., 500 watts, 1 KW LS, shares with KELW.

APPLICATIONS RECEIVED

First Zone

NEW—North Jersey Broadcasting Co., Inc., Paterson, N. J.—620 Construction permit for a new station to be operated on 620 kc., 250 watts, daytime. Amended to make changes in equipment.

WHDI—Olean Broadcasting Co., Inc., Olean, N. Y.—Construction 1400 permit to install new equipment, change frequency from 1260 kc. to 1400 kc., move transmitter from Exchange

National Bank Bldg., corner Union and Laurens Sts., Olean, N. Y., to town of Allegany, N. Y. Amended to make changes in equipment and increase power from 250 watts to 500 watts.

W1XER—Shepard Broadcasting Service, Inc., Quincy, Mass.—License to cover construction permit for a new general experimental station.

W1XEH—The Travelers Broadcasting Service Corp., Avon, Conn.—Modification of construction permit for 63500 kc. to replace 63000 kc.

W2XIS—Standard Cahill Co., Inc., Bronx, N. Y.—Modification of construction permit to delete frequencies 1614, 2398, 3492.5, 4797.5, 6425, 12862.5 kc., and increase power to 100 watts and make changes in equipment.

Second Zone

NEW—WBNS, Inc., Portable.—Construction permit for a new broadcast pickup station to be operated on 1646, 2090, 2190, 2830 kc., 3 watts.

NEW—WBNS, Inc., Portable.—Construction permit for a new broadcast pickup station to be operated on 1646, 2190, 2090, 2830 kc., 20 watts.

Third Zone

WQAM—Miami Broadcasting Co., Miami, Fla.—Construction per-560 mit to install new equipment.

KWKH—International Broadcasting Corp., Shreveport, La.—Au-850 thority to install automatic frequency control.

WIOD-WMBF—Isle of Dreams Broadcasting Corp., Miami, Fla.—970 Construction permit to change frequency from 1300 kc. to 970 kc., install new equipment. Amended to change power from 1 KW, 5 KW day, to 5 KW, and transmitter site from 600 Biscayne Blvd., Miami, Fla., to site to be determined, Miami, Fla.

NEW—Voice of Corsicana, Corsicana, Tex.—Construction permit 1200 for a new station to be operated on 1200 kc., 100 watts, unlimited time. Amended to change hours of operation from unlimited to daytime.

NEW—Charles T. Copeland, Jr., and W. H. May, Troy, Ala.—1210 Construction permit for a new station to be operated on 1210 kc., 100 watts, daytime.

WFBC—Greenville News-Piedmont Co., Greenville, S. C.—Modifi-1300 cation of construction permit (B3-P-220) to install new equipment, move transmitter, and increase power, requesting changes in equipment.

NEW—Jack E. Brantley, Savannah, Ga.—Construction permit for 1310 a new station to be operated on 1310 kc., 100 watts, unlimited time.

NEW—Isadore Goldwasser, Tuscaloosa, Ala.—Construction permit 1370 for a new station to be operated on 1370 kc., 100 watts, unlimited time. Amended to make antenna changes and to give transmitter site as First National Bank Bldg., 5th St. and 24th Ave., Tuscaloosa, Ala.

KBIX—Oklahoma Press Publishing Co., Muskogee, Okla.—Modifi-1500 cation of construction permit (B3-P-353) for approval of transmitter and studio sites at Barnes Bldg., corner Third and Wall Sts., Muskogee, Okla., and make changes in antenna.

NEW—J. E. Churchwell, G. O. Russell, H. O. Freeman, Jr., d/b as 1500 Panama City Broadcasting Co., Panama City, Fla.—Construction permit for a new station to be operated on 1500 kc., 100 watts, daytime.

W3XEN—Havens & Martin, Inc., Portable-Mobile.—Modification of construction permit to increase power and change equipment, power increased to 40 watts.

W5XAQ—East Texas Broadcasting Co., Portable-Mobile.—License to cover construction permit for a new general experimental station.

WIEF—Miami Broadcasting Co., Portable, Miami, Fla.—License to cover construction permit to make changes in equipment and increase power.

NEW—Pape Broadcasting Corp., Portable-Mobile.—Construction permit for a new broadcast pickup station to be operated on 2830 kc., 20 watts. Amended to include frequencies 1646, 2090 and 2190 kc.

Fourth Zone

KSD—The Pulitzer Publishing Co., St. Louis, Mo.—Authority to 550 determine operating power by direct measurement of antenna.

WEW—The St. Louis University, St. Louis, Mo.—Construction 760 permit to make changes in equipment.

WCFL—Chicago Federation of Labor, Chicago, Ill.—License to 970 cover construction permit (B4-P-701) for auxiliary transmitter.

NEW—Winona Radio Service, a partnership, Harry Dahl, Otto M. 1200 Schlabac, Maxwell H. White, Herman R. Wiecking, Winona, Minn.—Construction permit for a new station to be operated on 1200 kc., 100 watts, unlimited time.

WHBL—Press Publishing Co., Sheboygan, Wis.—Construction permit to install a new transmitter, erect a new vertical antenna, and move transmitter from 636 Center Avenue, Sheboygan, Wis., to site to be determined, near Sheboygan, Wis. Amended to make changes in antenna and give exact transmitter site as near Sheboygan, Wis.

NEW—Midway Broadcast Co., by Emmons L. Abeles, Secy., Eau 1300 Claire, Wis.—Construction permit for a new station to be operated on 1310 kc., 100 watts, unlimited time. Amended to change frequency from 1310 kc. to 1210 kc. and hours of operation from unlimited time to daytime on 100 watts.

NEW—Saint Cloud Broadcasting Co., by Emmons L. Abeles, Secy., 1310 Saint Cloud, Minn.—Construction permit for a new station to be operated on 1200 kc., 100 watts, unlimited time. Amended to change frequency from 1200 kc. to 1310 kc., power from 100 watts to 50 watts night, 100 watts day.

WTRC—The Truth Publishing Co., Inc., Elkhart, Ind.—Modification of construction permit (B4-P-412) authorizing changes in equipment and increase in power, requesting further changes in equipment, move of transmitter from Elkhart Hotel, Main and East Marion Sts., Elkhart, Ind., to at junction of State Highway 19 and Mishawaka Road, Elkhart, Ind., and for approval of antenna.

NEW—Evans Broadcasting Co., Kansas City, Mo.—Construction 1370 permit for a new station to be operated on 1370 kc., 100 watts, unlimited time. Requests facilities of KWKC.

KABE—National Battery Broadcast Co., Portable-Mobile.—License to cover construction permit for a new broadcast pickup station.

W9XAA—Chicago Federation of Labor, Chicago, Ill.—License to cover construction permit to change location of station.

NEW—Mississippi Valley Broadcasting Co., Portable-Mobile.—Construction permit for a new general experimental station to be operated on 31100, 34600, 37600, 40600 kc., 5 watts.

Fifth Zone

KMJ—James McClatchy Co., Fresno, Calif.—Authority to determine operating power by direct measurement of antenna.

KGHL—Northwestern Auto Supply Co., Inc., Billings, Mont.—780 Construction permit to install new equipment, change frequency from 950 kc. to 780 kc., power from 1 KW, 2½ KW day, to 1 KW, 5 KW day, and move transmitter 70 feet from present site at same address.

NEW—Smith, Keller & Cole, a partnership composed of Ralph E. 1200 Smith, A. H. Keller and H. Wadsworth Cole, San Diego, Calif.—Construction permit for a new station to be operated on 1200 kc., 100 watts, daytime.

NEW—Wm. B. Smullin, Sacramento, Calif.—Construction permit 1310 for a new station to be operated on 1310 kc., 100 watts, 250 watts day, unlimited time. Amended to make changes in equipment.

NEW—George Harm, Fresno, Calif.—Construction permit for a 1310 new station to be operated on 1310 kc., 100 watts, unlimited time. Amended to change transmitter site from McKinley and First Sts., Fresno, Calif., to southwest corner Clinton and N. First St., Fresno, Calif.

KRKO—KRKO, Inc., Everett, Wash.—Construction permit to install new equipment, increase power from 50 watts to 100 1370 watts, 250 watts day; change time from share-KVL to unlimited time; move transmitter from 2814 Rucker Avenue, Everett, Wash., to site to be determined, Everett, Wash. Requests time used by KVL, contingent upon KVL being granted permission to change frequency. (Filed under new name.)

KRKO—Lee E. Mudgett, Everett, Wash.—Voluntary assignment 1370 of license from Lee E. Mudgett to KRKO, Inc.

NEW—Harold H. Hanseth, Fresno, Calif.—Construction permit 1410 for a new station to be operated on 1410 kc., 1 KW, unlimited time. Amended to make changes in equipment.

NEW—The News Press Publishing Co., Santa Barbara, Calif.—1450 Construction permit for a new station to be operated on 1450 kc., 500 watts, unlimited time.

NEW—Nichols & Warinner, Inc., Portable-Mobile.—Construction permit for a new general experimental station to be operated on 31100, 34600, 37600, 40600 kc., 2 watts.

NEW—Don Lee Broadcasting System, Portable, San Francisco, Calif.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000 kc., 100 watts.

COPYRIGHT HEARINGS BEGUN

Copyright hearings were begun this week before the House Committee On Patents with Gene Buck, president of ASCAP as the first witness. The hearings were held on Tuesday and Wednesday and were scheduled to continue through Thursday.

Further hearings will be held on the same subject before the committee on March 3, 4, 5, 10, 11, 12, 17, 18 and 19. According to the present program broadcasters will present their testimony during the last few days of the hearings.

GOVERNMENT RADIO STATION RUMORED

There was talk in Washington on Wednesday in connection with the Pan American conference which President Roosevelt is considering calling, that the government will use a short wave station of its own.

While no official confirmation could be obtained of this rumor the story was to the effect that a short wave station would be erected with WPA funds and that the President would allocate some short wave frequency, under executive order, which he is empowered to do under the Federal Communications Act.

No one at the Communications Commission apparently knows anything of the proposed station, but it was pointed out in well informed circles that, if the plan is worked out along the lines discussed, the Commission would have nothing to do with such a project, it all being done under executive order.

COAXIAL CABLE DECISION

The Federal Communications Commission on Wednesday reached its second division in connection with the application of the American Telephone & Telegraph Company for authorization to construct a coaxial cable between New York and Philadelphia. The Commission in its decision granted the company permission to construct this cable for experimental purposes only and provided that before it could be used commercially the company would have to obtain further permission from the Commission. The telephone company had already told the Commission that it would allow other television experimenters to use the new cable and the Commission provides in this connection that there shall be no discrimination.

ADDITIONAL STATIONS SIGN FOR WARNER BROS. MUSIC

The following stations have signed the Warner Brothers contract since February 4, 1936. (See NAB Reports—p. 1214):

KFAB—Lincoln, Nebraska; KG CX—Wolf Point, Montana; KGER—Long Beach, California; KMED—Medford, Oregon; KMMJ—Clay Center, Nebraska; KOB—Albuquerque, New Mexico; KOIN—Portland, Oregon; KRKD—Los Angeles, California; KSLM—Salem, Oregon; KVS O—Ardmore, Oklahoma; WAML—

Laurel, Mississippi; WBCM—Bay City, Michigan; WCHV—Charlottesville, Virginia; WGCM—Mississippi City, Mississippi; WHIS—Bluefield, West Virginia; WJAR—Providence, Rhode Island; WJEJ—Hagerstown, Maryland; WMBO—Auburn, New York; WPAX—Thomasville, Georgia; WTAX—Springfield, Illinois.

NEW CALIFORNIA STATION RECOMMENDED

The Merced Star Publishing Company applied to the Federal Communications Commission for a construction permit for a new broadcasting station to be erected at Merced, Cal., to use 1040 kilocycles, 250 watts power and daytime operation.

Examiner John P. Bramhall in Report No. I-200 recommends that the application be granted "on condition that applicant install a suitable antenna and on a site which complies with the engineering standards of the Commission." The Examiner found that there is need for additional service in the area proposed to be served, and no interference would be caused by the erection of such a station.

ASKS RESTRAINING ORDER AGAINST FCC

The Monocacy Broadcasting Company, Rockville, Md., has asked the Supreme Court of the District of Columbia to restrain the Federal Communications Commission from holding a hearing in its case and from extending the time for its construction permit.

The record shows that this company was granted a construction permit for a new station at Rockville, Md., without a hearing. It later developed that Station WCAU, Philadelphia, filed a protest against the grant on the ground of interference. WCAU later rescinded its protest but the Commission set the case down for hearing anyhow. The Commission will file a motion to dismiss the appeal in the Court.

RECOMMENDS DENYING CHANGES FOR KFJM

Broadcasting station KFJM, Grand Forks, N. D., using 1370 kilocycles with 100 watts power unlimited time and special authorization to use 250 watts power until local sunset applied to the Federal Communications Commission to use 1410 kilocycles, with 1,000 watts power unlimited time.

Examiner Ralph L. Walker in Report No. I-199 recommends that the application be denied. He found that the use of 1,000 watts at night by the station would result in objectionable interference to Station KGNC, reducing the present service area of that station. It would also increase the overquota status of North Dakota and also of the zone.

RECOMMENDS POWER INCREASE FOR WDAE

Broadcasting station WDAE, Tampa, Florida, applied to the Federal Communications Commission to increase its power from 1,000 watts, with special authorization for 2,500 watts LS to 5,000 watts LS. The station operates on 1220 kilocycles with unlimited time.

Examiner R. H. Hyde in Report No. I-201 recommends that the application be granted. He found that the service would be improved "and made more efficient by the use of the increased power." The Examiner found also that "no interference with other stations would result from the use of such increased power; the improvement that would be effected in the applicant's service would not result in any detriment to the interests of the public in the reception of any other station or stations."

COMMITTEE REPORT ON RADIO AMENDMENT

Senator Wheeler, chairman of the Committee on Interstate Commerce has made a report on his own bill (S. 2243) providing

amendments to the radio act. The bill as reported was published in last week's Bulletin and the report in full is as follows:

The Committee on Interstate Commerce, to whom was referred the bill (S. 2243), to amend the Communications Act of 1934, relating to the allocation of radio facilities, having considered the same, report the bill back favorably to the Senate with the recommendation that it be passed as amended.

This bill seeks to restore to the Communications Act of 1934 similar language to that contained in the second paragraph of section 9 of the Radio Act of 1927. The language of the later act reads:

In considering applications for licenses and renewals of licenses, when and insofar as there is a demand for the same, the licensing authority shall make such a distribution of licenses, bands of frequency of wave lengths, periods of time for operation, and of power among the different States and communities as to give fair, efficient, and equitable radio service to each of the same.

Under the act of March 28, 1928, the above paragraph of section 9 of the Radio Act of 1927 was amended to read as follows:

It is hereby declared that the people of all the zones established by section 2 of this Act are entitled to equality of radio broadcasting service, both of transmission and of reception, and in order to provide said equality the licensing authority shall, as nearly as possible, make and maintain an equal allocation of broadcasting licenses, of bands of frequency or wave lengths, of periods of time for operation, and of station power, to each of said zones when and insofar as there are applications therefor; and shall make a fair and equitable allocation of licenses, wave lengths, time for operation, and station power to each of the States, the District of Columbia, the Territories and possessions of the United States within each zone, according to population. The licensing authority shall carry into effect the equality of broadcasting service hereinbefore directed, whenever necessary or proper, by granting or refusing licenses or renewals of licenses, by changing periods of time for operation, and by increasing or decreasing station power, when applications are made for licenses or renewals of licenses: *Provided*, That if and when there is a lack of applications from any zone for the proportionate share of licenses, wave lengths, time of operation, or station power to which such zone is entitled, the licensing authority may issue licenses for the balance of the proportion not applied for from any zone, to applicants from other zones for a temporary period of ninety days each, and shall specifically designate that said apportionment is only for said temporary period. Allocations shall be charged to the State, District, Territory, or possession wherein the studio of the station is located and not where the transmitter is located.

The above language, known as the "Davis amendment," was substantially carried over into the Communications Act of 1934. The bill repeals section 302 of the Communications Act, which reads as follows:

Sec. 302. (a) For the purposes of this title the United States is divided into five zones, as follows: The first zone shall embrace the States of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Delaware, Maryland, and the District of Columbia; the second zone shall embrace the States of Pennsylvania, Virginia, West Virginia, Ohio, Michigan, and Kentucky; the third zone shall embrace the States of North Carolina, South Carolina, Georgia, Florida, Alabama, Tennessee, Mississippi, Arkansas, Louisiana, Texas, and Oklahoma; the fourth zone shall embrace the States of Indiana, Illinois, Wisconsin, Minnesota, North Dakota, South Dakota, Iowa, Nebraska, Kansas, and Missouri; and the fifth zone shall embrace the States of Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California.

(b) The Virgin Islands, Puerto Rico, Alaska, Guam, American Samoa, and the Territory of Hawaii are expressly excluded from the zones herein established.

Subsection (6) of section 307 of the Communications Act, which would be replaced by the language of this bill, reads as follows:

(b) It is hereby declared that the people of all the zones established by this title are entitled to equality of radio broadcasting service, both of transmission and of reception, and in order to provide said equality the Commission shall as nearly as possible make and maintain an equal allocation of broadcasting licenses, of bands of frequency, of periods of time for operation, and of station power to each of said zones when and insofar as there are applications therefor; and shall make a fair and equitable allocation of licenses, frequencies, time for operation, and station

power to each of the States and the District of Columbia, within each zone, according to population. The Commission shall carry into effect the equality of broadcasting service hereinbefore directed, whenever necessary or proper, by granting or refusing licenses or renewals of licenses, by changing periods of time for operation, and by increasing or decreasing station power, when applications are made for licenses or renewals of licenses: *Provided*, That if and when there is a lack of applications from any zone for the proportionate share of licenses, frequencies, time of operation, or station power to which such zone is entitled, the Commission may issue licenses for the balance of the proportion not applied for from any zone, to applicants from other zones for a temporary period of ninety days each, and shall specifically designate that said apportionment is only for said temporary period. Allocations shall be charged to the State or District wherein the studio of the station is located and not where the transmitter is located: *Provided further*, That the Commission may also grant applications for additional licenses for stations not exceeding one hundred watts of power if the Commission finds that such stations will serve the public convenience, interest, or necessity, and that their operation will not interfere with the fair and efficient radio service of stations licensed under the provisions of this section.

The legislation is recommended for practical reasons of administration by the Communications Commission, which has found that the drawing of artificial zone lines for guides in allocating radio facilities cannot satisfactorily be applied because of the physical laws governing radio transmission. As a consequence, the policy of Congress, to so distribute radio facilities that every section of the country will be adequately supplied, has been very difficult of effectuating.

On May 23, 1935, the Chairman of the Communications Commission wrote the chairman of your committee as follows:

With further reference to S. 2243, which was introduced by you March 13, 1935, I beg to advise that this Commission favors its adoption for the following reasons:

The existing law, which S. 2243 seeks to repeal, is contrary to natural laws and has resulted in the concentration of the use of frequencies in centers of population, and the restriction of facilities in sparsely populated States, even though interference consideration would permit the operation of one or more additional stations. Because of the size of the zones provided for by existing law, the distribution required by the Davis Amendment has resulted in providing ample broadcast service in small zones and lack of service in large zones. The experience of the Federal Radio Commission and this Commission has proved that the Davis Amendment is very difficult of administration and cannot result in an equality of radio broadcasting service.

This Commission is, therefore, in hearty accord with and favors the passage of S. 2243.

One amendment, the insertion of the words "a fair, efficient and" immediately before the word "equitable" in line 12 and the deletion of the word "an" in the same line, is recommended to make the language more nearly conform with the original wording in the Radio Act of 1927.

FCC RULES AMENDED

The Federal Communications Commission has announced the following amendments of its rules:

Rule 100.6 was amended to read as follows:

"100.6. Subject to the provisions of Sections 4(j), 412 and 606 of the Act, the files of the Commission shall be open to inspection as follows:

(a) Tariff schedules required to be filed under Section 203 of the Act, and annual and monthly reports required to be filed under Section 219 of the Act.

(b) All applications and amendments thereto filed under Title II or Title III of the Act; all documents filed with applications made when specific mention is made in the application referring to such document; authorizations issued upon such applications; all pleadings, depositions, transcripts of testimony, exhibits, examiners' reports, exceptions, and orders of the Commission.

(c) Other files in the discretion of the Commission upon written request describing in detail the documents to be inspected and the reasons therefor."

* * * * *

The Commission amended Rule 105.34 to read as follows:

"105.34 A. Each application or amendment thereto shall be personally subscribed and verified: (1) by the party filing said

application or amendment, or by one of the parties, if there be more than one; (2) by an officer of the party filing the application or amendment if the party be a corporation; *Provided, however,* That subscription and verification may be made by the attorney for the party (1) in case of physical disability of the party, or (2) his absence from the continental United States.

B. Each pleading initiating or supplementing a proceeding before the Commission shall be subscribed by the party or his attorney; *Provided, however,* That each pleading of fact verified by the affidavit of the attorney shall be made only when the facts are within the personal knowledge of the attorney, which said affidavit shall include a statement by affiant that said facts are within his personal knowledge."

The Commission directed that the following be substituted for the last paragraph of the present Rule 105.35:

"105.35. * * *

All pleadings or documents (other than applications under Title II, formal complaints, supplemental complaints, cross complaints and amended complaints) filed in any proceeding shall be served by the party filing the same, proof of which service shall be by signature of the party served or by affidavit showing service by registered mail (postage prepaid) of a true copy thereof, to the last known address of said party, and such proof shall be submitted to the Commission, together with the original and 8 copies of such pleading or document."

* * * * *

The Commission directed that the provision in Rule 105.36 calling for papers filed with the Commission to be 8 1-2 inches by 12 inches, be corrected to read "8 1-2 inches by 13 inches."

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2721. A complaint has been issued against **R. M. Barnett**, trading as **Home and School Education Society**, 1621 Real Estate Trust Building, **Philadelphia**, alleging unfair competition in the sale of a set of books designated "Source Book," together with a "Perpetual Pictured Semi-Annual Loose Leaf Extension Service," and memberships in a "Perpetual Bureau of Research."

Through verbal assertions made by his agents, and by means of advertising literature and prospecti he furnishes them, the respondent is alleged to represent and to encourage his salesmen to represent to the purchasing public that, as a special introductory offer, a limited number of persons in each place visited by the salesmen will be given a set of the "Source Book" free if they subscribe for the semi-annual extension service for 10 years, at a price varying from \$49.50 to \$79.50; that the stated price is the total cost of the extension service to the purchaser, and that the regular price of the Source Book with the extension service would be twice the price quoted to the prospective purchaser, or some other sum in excess of the quoted price.

No. 2722. A complaint has been issued against **Samuel Goldberg**, trading as **U. S. Specialty & Mfg. Co.**, 10222 Superior Avenue, **Cleveland**, with unfair competition in the sale of candy.

The respondent, selling and distributing candy to wholesale dealers, jobbers, retailers and schools, is alleged to have represented to the effect that he controls and operates factories and is the manufacturer of the candy he sells, when, according to the complaint, this is not true.

No. 2723. Unfair competition through misbranding of wine is alleged in a complaint issued against **Shewan-Jones, Inc.**, engaged in the manufacture and sale of wine to wholesalers and retailers, and having offices at 85 Second St., **San Francisco**, and a plant at **Lodi, San Joaquin County, Calif.**

The respondent corporation is charged with misuse of the name "Chateau Yquem" on labels of bottles, on invoices and in advertising matter, to designate one of the brands of wines it sells, and by such practices, according to the complaint, represents to customers and furnishes them with the means of representing to vendees, including ultimate consumers, that the wine so sold is the specific wine designated "Chateau Yquem" produced in France, when in fact it is made at the respondent's plant at Lodi from domestic grapes.

No. 2724. In a complaint issued against **Gustave Goldstein**, trading as **Humania Hair & Specialty Mfg. Co.**, 10-12 East 23rd St., **New York City**, he is charged with unfair methods of com-

petition in the sale and distribution of an extensive line of hair goods, cosmetics and toilet preparations.

In his advertising matter, the respondent is alleged to have represented that 17 or 18 different preparations he sells in interstate commerce are effective treatments for either the hair, the scalp, various skin diseases, or deafness, whereas, according to the complaint, use of the respondent's preparations does not produce the beneficial effects claimed for them.

No. 2725. Charging unfair representations of medicine in advertising and on the radio, a complaint has been issued against **John J. McCloskey**, 727 West Wisconsin Ave., **Milwaukee**, trading as **H. B. Kimball Co.**, **H. B. Kimball**, and **Kimball Laboratories**.

Selling a stomach remedy called "Kimball Tablets," the respondent is alleged to have advertised that more than 100,000 chronic cases have been successfully treated, and that regardless of how long a person has suffered, "we positively guarantee results, or the treatment costs you nothing." The complaint alleges that these assertions are untrue.

No. 2726. Charging unfair competition in the sale of potato chip machines, a complaint has been issued against **Food Display Machine Corp.**, 500 North Dearborn St., **Chicago**.

In its advertising matter, the respondent is said to have represented to prospective purchasers that they can make from \$23.50 a day to \$300 a week selling potato chips made by the respondent's machine; that "There is no way to tell whether you'll make \$5,000 or \$15,000 the first year," and that "It is possible for a live wire to make a net profit of \$1,000 to \$1,500 a month," when, the complaint alleges, the actual earnings or profits are, on the average, much less than the amounts set forth in the respondent's advertisements.

No. 2727. **Nuway Printing Co.**, 12 South Clinton St., **Chicago**, also trading as **Professional Record Card Co.**, is named respondent in a complaint alleging unfair competition in the sale of dental record cards which it prints.

Among the companies in competition with the respondent are the **Kohlhaas Co.**, **Chicago**, and the **McCasky Register Co.**, **Alliance, O.**, both engaged in the printing and sale of record forms for the use of dentists, the complaint sets forth, and who in the course of their business have built up and now enjoy valuable good will.

The respondent, the complaint charges, in selling its products advertises by means of circulars in which, it is alleged, these statements appear: **Kohlhaas Type Dental Record Cards**, "McCasky Type Dental Cards," and "A Limited Supply of McCasky Type Record Cards."

No. 2728. **American Character Doll Co., Inc.**, 200 Fifth Ave., **New York City**, is charged with unfair competition in the sale of "Sally Jane" dolls, in a complaint.

In the sale of its product, also described as "Paratex" dolls, the respondent is said to distribute among the retail doll trade circulars bearing pictures of two dolls, each immersed in a jar of water, one doll appearing to show no ill effects from such immersion and the other appearing to be in a state of disintegration.

Stipulations

The Commission has issued the following cease and desist orders:

No. 01102. **C-T-C Corporation, successor to Haley M-O Co.** 15 Exchange Place, **Jersey City, N. J.**, agrees, in the sale of "Haley's C-T-C" effervescent tablets offered as a treatment for colds and other ailments, not to represent that the product will keep the system alkaline and free from acidity, that it is a competent and complete remedy for colds, that it will prevent or correct certain ailments caused by excessive acid in the blood or by any condition other than gastric hyperacidity, or that reducing diets cause acidity and that C-T-C tablets will counteract such acid conditions.

According to the stipulation, the respondent asserts it has discontinued advertising and selling "Haley's M-O," and that the rights, title and interest in that product have been sold to the **Charles H. Phillips Chemical Co.**

No. 01103. **E. W. Craghill and W. E. Brunson**, trading as **the Zulvar Co.**, 6513 Hollywood Boulevard, **Hollywood, Calif.**, agree to cease advertising that "Zulvar," offered as a remedy for rheumatism, is, when used either externally or internally, a competent treatment for skin diseases, colds, and other ailments. Other assertions to be discontinued are that the product contains no drugs, is recommended by many physicians, and that the trial offer of "Zulvar" is accepted at no risk to the purchaser, unless, in returning the product, the purchaser receives from the re-

spondents the total amount expended for the product, plus cost of packing and postage.

No. 01104. Percalx, Inc., Burley, Idaho, selling "Percalx," recommended for treatment of hay fever, asthma, chronic colds, and sinus infections, stipulates that it will refrain from making assertions that persons deficient in calcium usually suffer from the ailments enumerated, and that use of "Percalx" makes it possible to multiply by four times the daily intake of calcium. Other representations to be discontinued are that "Percalx" has relieved thousands of sufferers from asthma, sinus infections, chronic colds and hay fever, or affords relief to nine out of ten who suffer from these ailments, and that it will bring relief in cases where other remedies have failed or where treatments by physicians have been unsuccessful.

No. 01105. J. George and Walter U. Hauser and James J. Poole, doing business as Hauser Laboratory, 2924 Girard Ave., Minneapolis, Minn., have entered into a stipulation to desist from certain representations in the sale of "Liquid O2X," a remedy for athlete's foot, ringworm, eczema and other skin disorders. They agree to cease advertising that the product is a competent remedy for all forms of fungus skin disorders, that it clears up most skin diseases in a week, or that government reports show a rapid spread of skin infections caused by an almost invisible vegetable parasite. The respondents also stipulate that they will discontinue use of the word "Laboratory" in their firm name until they own and operate a laboratory.

No. 01106. Nelson E. Woolman and Lyle G. Jackson, trading as Power Seal Co., 1601 South Broadway, Los Angeles, and selling a cylinder and valve compound designated "Power Seal," stipulate that they will cease and desist from advertising that use of their product in engines will restore power and efficiency, seal up leaky rings and valves, fill up valve pits, or save oil and gas. Under the agreement, the respondents will refrain from representing they operate a laboratory, until such is a fact.

No. 01107. James Brown, Marshall, Mich., in business under the trade name "Prostaid-National," selling "Prostaid," offered as a treatment for prostate gland ailments, agrees to discontinue representations that the product is a 100 per cent effective, efficient and harmless treatment in cases of weakened, inflamed, or enlarged prostate gland.

No. 01122. Mark Laboratories, Inc., Homewood Station, Pittsburgh, Pa., selling "Mark-4" as a remedy for athlete's foot, has signed a stipulation to cease and desist from representing that its product is an effective remedy for athlete's foot, ringworm, poison ivy or other skin diseases, or that it will refresh tired, aching feet immediately, irrespective of the cause of the condition.

No. 1610. Brown Shoe Co., 16th St. and Washington Ave., St. Louis, agrees in its stipulation to cease using the word "Doctor" or abbreviation "Dr." as part of a trade name for shoes not made in accordance with the design of a doctor, and not containing special orthopedic features resulting from medical advice and services.

No. 1611. Mrs. Evelyn Beveridge, 6724 Hollywood Boulevard, Hollywood, Calif., trading as La Belle Laboratories in the manufacture of a depilatory, agrees to discontinue advertisements to the effect that use of her product will destroy the hair root so as to prevent regrowth of hair, or that it will permanently remove hair, or will never irritate or inflame the most delicate skin, when these are not the facts. The respondent also stipulates that she will cease advertising a "Special Offer; Send \$1.00 for \$1.50 Size," implying that the regular price of the article is \$1.50 and that the offer of sale for \$1.00 is a "Special" offer, when this is not true.

No. 1612. Royal Distilling Co., 2801 Blake St., Denver, will cease using as a part of its corporate name the word "Distilling" or derivatives thereof or other words of a similar meaning on labels or in advertising, or in any manner tending to deceive buyers into believing that the company is a distiller or actually owns and operates a distillery, when this is not true.

No. 1613. Peter P. Stone, trading as Merit Manufacturing Co., 2800 Newton Ave., Indianapolis, selling and distributing automobile stop-light and tail-light lenses, agrees to discontinue use in advertising of illustrations which do not accurately portray the lenses, and of illustrations which may have a tendency to deceive purchasers into believing that the lenses sold by the respondent are of the same design and reflecting properties as those illustrated in the advertisements, when this is not true.

Stone also agrees to stop employing the word "Manufacturers" as part of his trade name or in any way which may imply that he manufactures the products he sells, or operates a factory in which they are made.

No. 1615. Virginia Sheridan, Inc., 6500 South Oak Park

Ave., Chicago, manufacturer of cosmetics, including a preparation designed for concealing birth-marks or skin blemishes, agrees to stop using and assuming financial or other liability for certain advertising copy used by stores purchasing its products, such advertising matter containing allegations to the effect and implying that application of the respondent's product will remove skin blemishes or cause birth-marks, blemishes and scars to disappear, when this is not true. Provision is made, however, that when such assertions are used to describe the capability of the preparation to conceal disfigurements, these assertions shall be immediately accompanied by other statements indicating clearly that the effect of the application of the product is merely to conceal disfigurements and not to cause their removal.

Virginia Sheridan, Inc., also agrees to cease using or assuming liability for advertising matter employed by stores purchasing its product and containing representations to the effect that it is the only article on the market for concealing skin disfigurements.

No. 1616. Frank Gue, trading as Star Seed Co., Crawford, Nebr., agrees, in soliciting the purchase of and in purchasing cream or dairy products in interstate commerce, to cease the use in connection with advertisements of the phrase "Cream Producers' Own Organization," or any words of equivalent meaning, alone or in connection with the name "Star Seed Cream Club," in a manner implying or tending to deceive patrons having cream or other dairy products for sale into the belief that Frank Gue is conducting a cooperative creamery or organization, when this is not true. The stipulation shows that Gue sent patrons a small "membership card," on which it was stated that the patron receiving such card has been made a member of the "Star Seed Cream Club" and would be entitled to all benefits of the club.

No. 1617. Russell L. Post and Herman Ricker, of 134 South Market St., Galion, Ohio, trading as National Mailing Service, and as Reliable Products Co., selling advertising specialties, including blankets, by mail order, agree to stop using the words "Indian" or "Wyandotte 6" either independently or in connection with the use of Indian heads and Indian patterns in the weaving of blankets, and in advertising matter unless, in the latter case, such words are accompanied by appropriate phrases clearly indicating that the blankets are not made by American Indians. The respondents also agree to stop advertising "You pay no profit to the jobber and traveling salesman," implying that they are manufacturers.

No. 1618. Harry Cohen, of Des Moines, Iowa, trading as British Woolen Mills, agrees to stop using the word "British" as part of his trade name or in any other way having a tendency to deceive buyers into the belief that his products, men's suits and overcoats, are of British or English origin and imported into the United States, when this is not true, and from the use of the word "Mills," independently or in connection with the word "British," implying that he manufactures his products or owns and operates a mill in Great Britain or elsewhere, when this is not true.

No. 1619. Isadore N. Levy, Eva Levy and Louis Davidson, of Philadelphia, trading as Perfection Products, agree to desist from use in advertising or on labels of representations to the effect that their product "Vigair," will restore the original or natural color and vitality of youth to the hair, or effectively rid the scalp of dandruff and other similar troubles.

No. 2353. An order has been issued directing **Best & Co., Fifth Ave. at 35th St., New York City,** to discontinue unfair methods of competition in the sale of "Toyo" hats made from rice paper.

Respondent is ordered to cease representing in any manner that its "Toyo" hats are "Panama" hats, and to desist from using the word "Panama," alone or in connection with other words, so as to imply that such "Toyo" hats are Panamas.

No. 2414. O. F. Schoeck, doing business as the O. F. Schoeck School, 1903 Park Ave., Alton, Ill., has been ordered to cease and desist from the use of false and misleading advertising in connection with the sale and distribution of correspondence courses of study and instruction.

The respondent is ordered to discontinue representing through advertisements in the classified advertising pages of newspapers and magazines, or in any other manner, under such headings as "Help Wanted," "Men Wanted," "Wanted—Male Help," and "Employment," that he has positions or jobs at his disposal or that employment is offered to persons answering the advertisements.

No. 2635. Max Kipperman and Samuel Orenstein, 36 West 32nd St., New York City, trading as Samac Knitting Mills, have been ordered to cease and desist from unfair representations of their business.

The respondents are directed to stop representing, through their trade name and printed matter, by use of words such as "Mills," "Knitting," or "Manufacturers," that they own or control mills in

which their products are knitted or manufactured. They are also directed to stop asserting, by use of the term "100 Per Cent Pure Spun," or phrases of similar import, that the product which such phrase is used to describe, is made of 100 per cent pure spun wool, unless and until the articles so labeled are composed entirely of wool.

No. 2664. **McCambridge & McCambridge Co., Inc.**, of 12 L Street, S. E., **Washington, D. C.**, trading as Everfresh Products Co., has been ordered to stop misrepresentations in the sale of its "Everfresh Aspirin."

Advertisements by the respondent company in newspapers, sales circulars and by radio that its aspirin gives better or quicker relief than other forms of aspirin, are prohibited in the Commission's order to cease and desist.

FEDERAL COMMUNICATIONS COMMISSION ACTION HEARING CALENDAR

Monday, March 2

FURTHER HEARING BEFORE AN EXAMINER (Broadcast)

NEW—Champaign News-Gazette, Inc., Champaign, Ill.—C. P., 1370 kc., 100 watts, unlimited time.

Thursday, March 5

ORAL ARGUMENT BEFORE THE BROADCAST DIVISION

Examiner's Report No. I-141:

NEW—Joplin Broadcasting Co., Pittsburg, Kans.—C. P., 1200 kc., 100 watts, daytime.

NEW—Pittsburg Publishing Co., Pittsburg, Kans.—C. P., 1500 kc., 100 watts, unlimited time.

Examiner's Report No. I-147:

NEW—Arthur Westlund and Jules Cohn, Santa Rosa, Calif.—C. P., 1310 kc., 100 watts, unlimited time.

Examiner's Report No. I-96:

NEW—Charles C. Theis, Wichita, Kans.—C. P., 1210 kc., 100 watts, unlimited time.

Friday, March 6

HEARING BEFORE AN EXAMINER (Broadcast)

NEW—C. G. Hill, Geo. D. Walker, Susan H. Walker, Winston-Salem, N. C.—C. P., 1250 kc., 250 watts, daytime.

APPLICATIONS GRANTED

WFBR—The Baltimore Radio Show, Inc., Baltimore, Md.—Granted license to cover C. P. (auxiliary transmitter) for auxiliary purposes only; 1270 kc., 500 watts. Also granted modification of license to use present licensed transmitter as an auxiliary and auxiliary transmitter as a main transmitter.

NEW—Dorrence D. Roderick, El Paso, Tex.—Granted C. P. for new station, 1500 kc., 100 watts, unlimited time.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Granted C. P. to make changes in equipment, on temporary basis only, because of pending application requesting facilities of this station.

WKRC—WKRC, Inc., Cincinnati, Ohio.—Granted extension of special experimental authority to operate with 1 KW day and night for period ending September 1, 1936.

WREC—WREC, Inc., Memphis, Tenn.—Granted extension of

special experimental authority to operate with 1 KW night, 2½ KW day, from March 1 to September 1, 1936.

KMBC—Midland Broadcasting Co., Kansas City, Mo.—Granted license for auxiliary transmitter to use old 2½-KW transmitter for emergency purposes only, to operate with 1 KW night, 2½ KW day.

WMT—Iowa Broadcasting Co., Cedar Rapids, Iowa.—Granted license to cover special authority to operate permanently with 1 KW night, 2½ KW day, using directional antenna at night, unlimited time, and approving transmitting equipment.

KGVO—Mosby's, Inc., Missoula, Mont.—Granted license to cover C. P. authorizing installation of new equipment, change in frequency to 1260 kc., increase in power to 1 KW, and change in transmitter site.

WDBO—Orlando Broadcasting Co., Inc., Orlando, Fla.—Granted extension of special experimental authority to operate with 1 KW daytime.

KFBK—James McClatchy Co., Sacramento, Calif.—Granted license to cover C. P., 1490 kc., 5 KW, unlimited time; also authority to determine operating power by direct measurement of antenna input in compliance with Rule 137.

WOKO—WOKO, Inc., Albany, N. Y.—Granted license to cover C. P., 1430 kc., 500 watts night, 1 KW day, unlimited time. Also granted authority to determine operating power by direct measurement of antenna input in compliance with Rule 137.

KHBC—Honolulu Broadcasting Co., Ltd., Hilo, Hawaii.—Granted modification of C. P. to install new equipment and antenna; change frequency from 1420 kc. to 1400 kc.; increase power from 100 watts to 250 watts; and extend commencement date to 60 days after grant and completion date to 6 months thereafter.

WINS—Hearst Radio, Inc., New York City.—Granted renewal of license, 1180 kc., 1 KW, limited time.

WIBM—WIBM, Inc., Jackson, Mich.—Granted C. P. to make changes in transmitting equipment and install vertical antenna.

WCAO—Monumental Radio Co., Baltimore, Md.—Granted modification of C. P. to move transmitter 60 feet from present site, and make changes in present antenna.

WREC—WREC, Inc., Memphis, Tenn.—Granted modification of C. P. to extend completion date to April 29, 1936.

WGBI—Scranton Broadcasters, Inc., Scranton, Pa.—Granted extension of special experimental authority to operate with power of 500 watts from March 1 to September 1, 1936.

WIP—Pennsylvania Broadcasting Co., Philadelphia, Pa.—Granted extension of special experimental authority to operate with power of 1 KW for period 3-1-36 to 9-1-36.

NEW—Pape Broadcasting Corp., Portable-Mobile (Mobile, Ala.).—Granted C. P. (temporary broadcasting pickup) service, 1646, 2090, 2190, 2830 kc., 20 watts.

WIEK—Atlantic Broadcasting Corp., Portable-Mobile (New York City).—Granted C. P. (temporary broadcast pickup) for replacement transmitter and increase in power from 50 to 100 watts.

W8XWJ—The Evening News Assn., Detroit, Mich. (Portable-Mobile).—Granted license to cover C. P. for new general experimental broadcast station, frequencies 31600, 35600, 38600 and 41000 kc., 100 watts.

W1XAV—Shepard Broadcasting Service, Inc., Quincy, Mass.—Granted license (exp. spec. exp.), frequencies 61500 kc., 100 watts.

W1XER—Shepard Broadcasting Service, Inc., Quincy, Mass.—Granted license to cover C. P. (exp. gen. exp.) for new fixed general experimental broadcast station, frequencies 13600, 35600, 38600, 41000 kc., 500 watts.

KABE—National Battery Broadcast Co., Portable-Mobile (St. Paul).—Granted license to cover C. P. (temporary broadcast pickup), frequencies 1622, 2060, 2150, 2790 kc., 25 watts.

NEW—Radio Air Service Corp., Portable-Mobile (Cleveland, Ohio).—Granted C. P., frequencies 31100, 34600, 37600, 40600 kc., 10 watts, to communicate as a broadcast pickup station only in the temporary service on an experimental basis.

KILU—Arkansas Radio & Equipment Co., Portable (Little Rock, Ark.).—Granted modification of license to add frequencies 2060, 2790 kc. Also granted renewal of license in accordance with modification.

NEW—Racine Broadcasting Corp., Portable-Mobile.—Granted C. P. for broadcast pickup station, frequencies 3100, 34600, 37600 and 40600 kc., 10 watts. Also granted license covering same.

NEW—National Broadcasting Co., Inc., New York City.—Granted C. P. for special experimental station for relay visual broadcasting service, frequency 177000 kc., 15 watts.

W2XF—National Broadcasting Co., Inc., New York City.—Granted C. P. covering change in transmitting equipment and increase in power from 5 to 12 KW.

W2XK—National Broadcasting Co., Inc., New York City.—Granted C. P. for increase in power from 2½ KW to 15 KW.

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Rule 137.

WSYR—WSYU—Central New York Broadcasting Corp., Syracuse, N. Y.—Granted extension of present license for period of one month.

KFDM—Sabine Broadcasting Co., Inc., Beaumont, Tex.—Granted renewal of license; 560 kc., 500 watts, with additional 500 watts day. 7.7 amperes for 1 KW, antenna resistance 17 Ohms. Unlimited.

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Granted renewal of license; 770 kc., 10 KW. Simultaneous daytime operation with station WBBM from 6 a. m. to 6:45 p. m.; Sept., Oct., 5:45 p. m.; Nov. 5:15 p. m.; Dec., 5:00 p. m.; Jan., 5:30 p. m.; CST. Shares time at night with Station WBBM as follows: WBBM 4-7 and KFAB 3-7 time.

WTAG—Worcester Telegraph Publishing Co., Inc., Worcester, Mass.—Granted renewal of license; 580 kc., 500 watts, unlimited time. Also granted renewal for auxiliary transmitter.

KGMB—Honolulu Broadcasting Co., Ltd., Honolulu, Hawaii.—Granted renewal of license, 1320 kc., 250 watts, unlimited time.

KARK—Arkansas Radio & Equipment Co., Little Rock, Ark.—Granted renewal of license; 890 kc., 250 watts, with additional 250 watts from local sunrise to local sunset only, unlimited time.

WIBW—Topeka Broadcasting Association, Inc., Topeka, Kans.—Granted renewal of license; 580 kc., 1 KW, with an additional 4 KW from local sunrise to local sunset only. Shares time with KSAC.

WJAR—The Outlet Co., Providence, R. I.—Granted extension of special experimental authority to operate with a power of 500 watts nighttime to Sept. 1, 1936.

W2XIS—Standard Cahill Co., Inc., New York City.—Granted modification of C. P. so as to delete the 10 general experimental frequencies leaving 4 allocated to miscellaneous experimental service: 31600, 35600, 38600 and 41000 kc., change equipment, increase power to 100 watts, and operate station in broadcast service experimentally under special authority contained in Rule 320.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KEHE, Los Angeles; KFNF, Shenandoah, Ia.; KGBU, Ketchikan, Alaska; KHQ, Spokane, Wash.; KSFO, San Francisco; KTSJ, San Antonio, Tex.; WFLA-WSUN, Clearwater, Fla.; WJAY, Cleveland, Ohio; WMCA and auxiliary, New York City; WMT, Cedar Rapids, Ia.; WOW, Omaha, Neb.; KFQD, Anchorage, Alaska; KLX, Oakland, Cal.; WDEV, Waterbury, Vt.; WELI, New Haven, Conn.; WIND, Gary, Ind.; WJAX, Jacksonville, Fla.; WQAN, Scranton, Pa.; WWJ, Detroit, Mich.

WJR—WJR, The Goodwill Station, Detroit, Mich.—Granted renewal of license for the period ending Aug. 1, 1936, for auxiliary transmitter.

WIBG—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Granted renewal of license for the period ending Aug. 1, 1936, for auxiliary transmitter.

W6XO—The Crosley Radio Corp., Mason, Ohio.—Granted renewal of special experimental station license for experimental service, effective Feb. 21, to expire May 21, 1936, in exact conformity with existing license.

The following stations were granted renewal of licenses on a temporary basis only subject to whatever action may be taken by the Commission upon the pending applications for renewal of licenses which were designated for hearing:

KELW, Burbank, Cal.; KFRC, San Francisco, Cal.; KFUO, Clayton, Mo.; KMTR, Los Angeles; KSEI, Pocatello, Idaho; KUSD, Vermillion, S. Dak.; WMMN, Fairmont, W. Va.; WOS, Jefferson City, Mo.; WPHR, Petersburg, Va.; WTMJ, Milwaukee, Wis.

KFYR—Meyer Broadcasting Co., Bismarck, N. Dak.—Granted renewal of license on a temporary basis only to conform to Commission's action of February 8th, with reference to this station's application for renewal of license.

KFKA—The Mid-Western Radio Corp., Greeley, Colo.—Granted renewal of broadcast station license for the regular period.

KHJ—Don Lee Broadcasting System, Los Angeles, Cal.—Granted renewal of broadcast station license for auxiliary transmitter for the regular period.

The following stations were granted renewal of licenses on a temporary basis only, from March 1 to April 1, 1936, pending receipt and/or action on applications for renewal:

KFPY, Spokane, Wash.; WFIL and auxiliary, Philadelphia, Pa.; WLBI, Stevens Point, Wis.

WSAJ—Grove City College, Grove City, Pa.—Granted renewal of license for the period ending June 1, 1936.

WWL—Loyola University, New Orleans, La.—Extended special temporary experimental authorization heretofore issued WWL, for the period March 1 to April 1, 1936, subject to the same conditions as contained in existing authority, pending consideration of pending petition of WLWL and petitions in opposition thereto.

WJBW—Chas. O. Carlson, New Orleans, La.—Extended present license on a temporary basis only, from March 1 to April 1, 1936, subject to whatever action may be taken on application for renewal of license pending before the Commission.

W8XAR—Westinghouse E and M Co., Saxonburg, Pa.—Granted renewal of special experimental license for the period March 23 to June 23, 1936, in exact conformity with existing license.

WLEZ—The Norfolk Daily News, Portable—Granted renewal of broadcast pickup station license for temporary service for period ending Nov. 1, 1936.

KWKH—International Broadcasting Corp., Sbreveport, La.—Extended special temporary experimental authorization heretofore issued KWKH, for the period March 1 to April 1, 1936, subject to same conditions as in existing authority, pending consideration of pending petition of WLWL and petitions in opposition thereto.

SET FOR HEARING

NEW—Ben S. McGlashan, San Diego, Cal.—Application for C. P., 1210 kc., 100 watts, daytime. Site to be determined.

NEW—The Tribune, Great Falls, Mont.—Application for C. P. for new station; 550 kc., 1 KW night, 5 KW day, unlimited time. Site to be determined.

NEW—Lookout Broadcasting Corp., Chattanooga, Tenn.—Application for C. P. for new station; 1420 kc., 100 watts. Daytime only. Site to be determined.

NEW—E. Anthony & Sons, Inc., Pawtucket, R. I.—Application for C. P. for new station; 1200 kc., 100 watts night, 250 watts day. Unlimited time. Facilities WNRI. Site to be determined.

NEW—Albert Lea Broadcasting Corp., Albert Lea, Minn.—Application for C. P. for new station; 1200 kc., 100 watts, unlimited time. Site to be determined.

NEW—R. C. Goshorn & Lester E. Cox, d/b as Capitol Broadcasting Co., Jefferson City, Mo.—Application for C. P. for new station; 920 kc., 500 watts daytime. Site to be determined.

NEW—Power City Broadcasting Corp., Niagara Falls, N. Y.—Application for C. P. for new station; 630 kc., 250 watts daytime. Site to be determined.

NEW—The Steffen Ice & Ice Cream Co., Wichita, Kans.—Application for C. P. for new station; 1210 kc., 100 watts, unlimited time.

NEW—J. T. Bilben & N. G. Barnard Walker, Minn.—Application for C. P. for new station; 1310 kc., 100 watts, unlimited.

NEW—Peninsula Newspapers, Inc., Palo Alto, Cal.—Application for C. P. for new station; 1160 kc., 250 watts, daytime.

WCB D—WCB D, Inc., Chicago, Ill.—Modification of license to change location of studio from Karcher Hotel, Waukegan, to 128 North Pulaski Road, Chicago.

NEW—W. E. Day, Creston, Ia.—Application for C. P. for new station; 1500 kc., 100 watts, unlimited time. Site to be determined.

NEW—Harold Johnson & Leland M. Perry, d/b as Johnson & Perry, Cedar City, Utah—Application for C. P. for new station; 1310 kc., 100 watts, unlimited time. Site to be determined.

NEW—State Capitol Broadcasting Assn. (R. B. Anderson, Pres.), Austin, Tex.—Application for C. P. for new station; 1120 kc., 500 watts night, 1 KW day, S. H. (all hours not used by WTAW) using directional antenna.

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio—Transfer of control of the WGAR Broadcasting Co. (license of WGAR), from the present four stockholders to WJR, the Goodwill Station, a Michigan Corporation (1450 kc., 500 watts night, 1 KW day, unlimited).

WHIO—Miami Valley Broadcasting Corp., Dayton, Ohio—Application for C. P. to make changes in equipment and increase day power to 5 KW, using conventional non-directional antenna for day operation.

MISCELLANEOUS

KFPM—Dave Ablowich, t/r as The New Furniture Co., Greenville, Tex.—Denied petition asking Commission to reconsider action in designating for hearing applications for renewal of license and assignment of license.

KFOX—Nichols & Warinner, Inc., Long Beach, Cal.—Denied petition asking Commission to reconsider and grant application to assign license to Hal Nichols, Inc. Designated for hearing on Jan. 10, 1936.

KFRU—KFRU, Inc., Columbia, Mo.—Granted permission to use nighttime hours when relinquished by WOS, which has been granted C. P. for a police frequency, subject to Rule 131.

W. T. Knight, Jr., Savannah, Ga.—Denied petition asking Commission to reconsider action in designating for hearing application for new station to operate on 1310 kc., 100 watts, full time, and to grant same.

WWJ—The Evening News Assn., Inc., Detroit, Mich.—Retired to closed files C. P. and modification of C. P., heretofore granted for authority to move transmitter, for want of prosecution.

WGBF—Evansville On the Air, Inc., Evansville, Ind.—Denied special temporary authorization to operate simultaneously with KFRU, and with reduced power of 250 watts, from 7 to 8 p. m. March 5; from 7 to 8:30 p. m. March 6; and from 7 to 10 p. m. (CST) March 7, 14, 21 and 28, 1936, in order to broadcast special programs.

WJEJ—Hagerstown Broadcasting Co., Hagerstown, Md.—License further extended on a temporary basis to April 1, 1936.

NEW—ABC Broadcasting Co., Big Spring, Tex.—Dismissed with prejudice application for C. P. for new radio station to operate on 1500 kc., 100 watts, daytime.

APPLICATIONS DISMISSED

The following applications, heretofore set for hearing, were dismissed at request of applicants:

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—Modification of license; 890 kc., 500 watts, 1 KW LS, unlimited time.

WCOL—WCOL, Inc., Columbus, Ohio—C. P., 1210 kc., 100 watts, 250 watts, LS, unlimited time.

NEW—M. M. Oppegard, Grand Forks, N. Dak.—C. P., 1310 kc., 100 watts, 250 watts, LS, unlimited time.

NEW—Bismarck Tribune Co., Bismarck, N. Dak.—C. P., 500 kc., 1 KW, 5 KW, LS. Unlimited time.

KGFG—Oklahoma Broadcasting Co., Inc., Oklahoma City, Okla.—C. P., 1370 kc., 100 watts, 250 watts, LS, shares with KCRC.

NEW—American Broadcasting Corp. of Ohio, Cleveland, Ohio—C. P., 880 kc., 1 KW, unlimited time.

The following application, heretofore set for hearing, was dismissed for failure of applicant to answer form letter, adopted by Broadcast Division requiring applicants to signify their desire to be heard within 10 days after receipt of said form letter:

NEW—A. E. Hughes, d/b as Valdosta Broadcasting Co., Valdosta, Ga.—C. P., 1500 kc., 100 watts, unlimited.

The following application heretofore set for hearing, was dismissed inasmuch as it has been superseded by an application under the name of Smith, Keller & Cole:

NEW—Ralph E. Smith, San Diego, Cal.—C. P., 1200 kc., 100 watts, daytime.

APPLICATIONS DENIED

NEW—Eugene DeBogory, tr/as Dallas Radio Research Engrs., Dallas, Tex.—Application for C. P., 1570 kc., 1 KW, unlimited (exp. broadcast), heretofore set for hearing, was denied as in cases of default for failure to file an appearance.

ORAL ARGUMENTS

NEW—Ex. Rept. 1-163: Paul R. Heitmeyer, Salt Lake City, Utah.—Oral argument granted for April 23, 1936.

NEW—Ex. Rept. 1-173: Paul R. Heitmeyer, Cheyenne, Wyo.—Oral argument granted for April 23, 1936.

NEW—Wyoming Radio Educational Assn., Cheyenne, Wyo.—Oral argument granted for April 23, 1936.

WFEA—Ex. Rept. 1-180: New Hampshire Broadcasting Co., Manchester, N. H.—Oral argument granted for April 23, 1936.

NEW—Ex. Rept. 1-184: W. H. Kindig, Hollywood, Calif.—Oral argument granted for April 23, 1936.

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—Oral argument granted for April 23, 1936.

WCAO—Ex. Rept. 1-187: The Monumental Radio Co., Baltimore, Md.—Oral argument granted for April 30, 1936.

WICC—Ex. Rept. 1-187: Southern Connecticut Broadcasting Corp., Bridgeport, Conn.—Oral argument granted for April 30, 1936.

WIP—Pennsylvania Broadcasting Co., Philadelphia, Pa.—Oral argument granted for April 30, 1936.

APPLICATIONS RECEIVED

First Zone

WTAG—Worcester Telegram Publishing Co., Inc., Worcester. 580 Mass.—Construction permit to make changes in equipment.

WMAL—National Broadcasting Co., Inc., Washington, D. C.—630 Modification of license to increase power from 250 watts, 500 watts day, to 500 watts day and night.

NEW—Elmira-Star-Gazette, Inc., Elmira, N. Y.—Construction permit for a new station to be operated on 1200 kc., 250 watts, daytime.

NEW—The Ogdensburg Advance Co., Watertown, N. Y.—Construction permit for a new station to be operated on 1270 kc., 250 watts, unlimited time. Amended to make antenna changes, give studio site as Public Square, Watertown, N. Y., and transmitter site to be determined, Watertown, N. Y.

WEVD—Debs Memorial Radio Fund, Inc., New York, N. Y.—1400 Modification of license to change hours of operation from share-WBBR, WFAB and WHAZ to unlimited time. Requests facilities of WBBC, WLTH, WARD and WVFW. Amended to change frequency from 1300 kc. to 1400 kc.

Second Zone

WDBJ—Times-World Corp., Roanoke, Va.—Construction permit 930 to install new equipment; increase power from 1 KW to 1 KW night, 5 KW day; move transmitter from First and Kirk Ave., S. W., Roanoke, Va. to Colonial Ave., Colonial Heights, Roanoke, Va., and studio from American Theater Bldg. (corner Kirk Ave. and Jefferson St.), Roanoke, Va., to corner 2nd and Campbell Ave., S. W., Roanoke, Va.

NEW—Nolan S. Walker, Canton, Ohio.—Construction permit for 1200 a new station to be operated on 1200 kc., 100 watts, 250 watts day, unlimited time. Requests facilities of WHBC.

NEW—Radio Air Service Corp., Cleveland, Ohio.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000 kc., 50 watts.

NEW—Pittsburgh Radio Supply House, Portable-Mobile.—Construction permit for a new general experimental station to be operated on 31100, 34600, 37600, 40600 kc., 5 watts.

Third Zone

NEW—The Birmingham News Co., Birmingham, Ala.—Construction permit for a new station to be operated on 590 kc., 500 watts, 1 KW, unlimited time.

NEW—Grover C. Maxwell, George A. Sancken and Herbert C. 610 Lorick, Augusta, Ga.—Construction permit for a new station to be operated on 610 kc., 250 watts, 500 watts day, unlimited time.

NEW—Ben L. Taylor, Phil B. Whitaker and Mrs. Phil B. Whitaker, 1200 Chattanooga, Tenn.—Construction permit for a new station to be operated on 1200 kc., 100 watts, daytime.

WDAE—Tampa Times Co., Tampa, Fla.—Extension of special experimental authorization to operate with power of 2½ KW day, with equipment changes, from 4-1-36 to 10-1-36.

WIOD-WMBF—Isle of Dreams Broadcasting Corp., Miami, Fla.—1300 Construction permit to make changes in equipment.

NEW—Red River Valley Broadcasting Corp., Sherman, Tex.—

1310 Construction permit for a new station to be operated on **1310 kc.**, 100 watts, daytime. Consideration under Sec. 307 (b).

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Construction permit to make changes in equipment.

Fourth Zone

WWAE—Hammond-Calumet Broadcasting Corp., Hammond, Ind.
1200 —Modification of license to change hours of operation from S-WFAM to unlimited day to local sunset, share-WFAM night.

NEW—Pemberton Gordon, d/b as Mid-Missouri Broadcasting Service, Jefferson City, Mo.—Construction permit for a new station to be operated on **1310 kc.**, 100 watts, daytime.

KSO—Iowa Broadcasting Co., Des Moines, Iowa.—Construction permit to make changes in equipment and increase power from 500 watts, 1 KW day, to 500 watts, 2½ KW day.

NEW—R. J. Laubengayer, Salina, Kans.—Construction permit for a new station to be operated on **1500 kc.**, 100 watts, unlimited time.

Fifth Zone

KDON—Richard Field Lewis, Del Monte, Calif.—Voluntary assignment of license from Richard Field Lewis to Monterey Peninsula Broadcasting Co.

KICA—The Southwest Broadcasting Co., Clovis, N. Mex.—Voluntary assignment of license from The Southwest Broadcasting Co. to Western Broadcasters, Inc.

KLO—Interstate Broadcasting Corp., Ogden, Utah.—Construction permit to make changes in equipment; increase power from 500 watts to 1 KW, 5 KW day; install directional antenna; move transmitter from R. 4, Riverdale Rd., approximately 4 miles southwest of Ogden, Utah., to site to be determined. Amended giving exact transmitter site as 3 miles southwest of center of Kaysville, on Lake Shore, near Kaysville, Utah, and make changes in antenna.

KECA—Earle C. Anthony, Inc., Los Angeles, Calif.—Modification of construction permit (5-P-B-2837) as modified to move transmitter locally; increase power; install new equipment; move transmitter from 1000 S. Hope St. to 3100 S. Cloverdale Ave., Los Angeles, Calif.; and extend commencement and completion dates. Amended to change transmitter site from 3100 S. Cloverdale Ave. to 82nd St. and Compton Ave., Los Angeles County, California.

NEW—Western Broadcast Co., Los Angeles, Calif.—Construction permit for a new general experimental station to be operated on **31600, 35600, 38600, 41000 kc.**, 100 watts.

Alaska

NEW—Edwin A. Kraft, Petersburg, Alaska.—Construction permit for a new station to be operated on **1420 kc.**, 100 watts, unlimited time.

DUFFY BILL HEARINGS COMMENCE

Broadcasters were characterized as "termites," "racketeers" and "pirates" by spokesmen for the American Society of Composers, Authors and Publishers during hearings on the Duffy copyright bill which commenced before the House Committee on Patents on Tuesday, February 25.

Appearing for the Society, Gene Buck, president, stated that his organization was opposed to removal of the \$250.00 minimum damages provision from the law and charged that the "power trust" was behind the provisions of the Duffy bill under which the two-cent royalty on phonograph records would be retained.

Mr. Buck, Nathan Burkan, attorney for the Society, and E. C. Mills, general manager, testified for the Society. Mr. Buck introduced to the committee during the hearings Charles Wakefield Cadman, Irving Berlin, George Gershwin, Mrs. Nevin, widow of the composer, Ethelbert Nevin, Billy Hill, and Rudy Vallee. Vallee was the only one of this group to testify.

Early in his testimony, Buck admitted that "copyright is a mystic maze" and argued that the composers of the nation were not receiving adequate revenue from the use of their works by broadcasters, hotels, taverns, motion picture exhibitors and other public places where music is used.

"There is not a composer or author in these United States getting 50 per cent of the income that he got before this tremendous mechanical invasion came upon us, Buck said.

Removal of the \$250.00 damages clause from the law would "legalize piracy."

"Congressmen have frequently said to me, 'If I buy that sheet of music, why can't I play it, why can't I do anything I want with it?'" said Buck. "It just so happens that that sheet of music is bought by you for private use, like a phonograph record; but the minute you take that piece of music, if there is an admission charged at the door for commercial purposes, or if you are going to sell that piece of music over again, either on a broadcasting station or in a theater or in a hotel, that is the so-called public performing right that is involved here, which these termites would like to eliminate."

Buck stated that "never in the history of the Society has a bootblack stand, a bot-dog stand, or a barber shop been approached."

In 22 years only \$8,800 was collected by the Society in court proceedings for infringement, Buck said.

During the time Buck was on the stand he gave some statistical information about the Society's licensing activities. He said his salary was \$35,000 a year. Broadcasters in 1935 paid more than \$2,500,000 to the Society; the hotels \$190,000 and the movie theaters nearly \$860,000. The total collections last year were about \$4,000,000.

He said he favored the Sirovich bill as against the Duffy bill and that the American Federation of Labor "stands with this Society because they are in the same boat."

NOTES TO SALES STAFF

The continued gain of radio advertising presages increased time sales during the spring months, especially in the regional network and national non-network fields. (See Total Broadcast Advertising, page 1234).

The marked rise during the month in national transcription volume also should be of interest, as should be the continued strong showing of both national and local live talent volume. (See Non-network Advertising by Type of Rendition, page 1235).

The downward trend in announcement volume, combined with the marked upswing in both talent and transcriptions, shows what can be done in the way of selling full radio broadcast advertising facilities (See same, page 1235).

ADVERTISING UNDER ATTACK

The American system of broadcasting came under attack while Buck was on the stand. He said that American authors and composers receive less money than they receive in England or any country in Europe where the nations do not permit advertising.

Discussing wired radio, which he said was controlled by the "power trust" and had a hand in writing the Duffy bill, Buck said:

"It is intensively interesting. It eliminates all static. It is clear reception. There is no advertising; you do not have to listen to some of this 'blah' to get some of the fine stuff that we get on the air.

"Do you believe that the members of your organization would be better off financially if the Government were to take over the broadcasting stations?" asked Congressman Dunn of Pennsylvania.

"That is a very difficult question for me to answer, Mr. Dunn," said Buck. "I do not know enough about government ownership. I could not answer that question. It takes an exhaustive study of its effects."

"I am going to persist and continue, provided that you people do not believe it is a detriment, to advocate that the Government take over broadcasting," Dunn said.

BROADCASTERS ARE BLAMED

The broadcasters were held responsible for the "false propaganda" in Congress and were said to have advocated the institution of the suit against the Society by the Department of Justice, according to Society witnesses. The broadcasters, too, were blamed for the difficulties which are troubling the Society in the State of Washington.

Broadcasters likewise were blamed for the trouble the Society has found in Wisconsin. At one time during the questioning of Burkan by Congressman O'Malley of Wisconsin, Burkan said:

"We have been having a lot of trouble in your state."

"I know, and you are going to have some more," O'Malley retorted.

WHY THE GOVERNMENT CASE SAGGED

The Government suit against the Society came in for discussion during the hearings.

"This is the reason that the Government's case sagged and broke down, because the Government discovered that instead of us being the 'racketeers' the 'racketeers' were the broadcasters," Burkan said.

Burkan then proceeded to tell of his cross-examination of Government witnesses at the adjourned trial and accused the National Broadcasting Company of "pirating" songs of non-members of the Society.

"You do not say that the Department of Justice is guilty of improper motives in bringing the suits?" O'Malley asked.

"I do not say that, but they (the broadcasters) stuck a gun up against our bellies and said, 'If you do not give us a renewal of the contract for five years, we are going to retain Newton D. Baker and Mr. Newton D. Baker is going to file a case with the Department of Justice.'"

"Is the Government to be called in for the purpose of seeing to it that we give them a better contract or a worse contract?" Burkan asked.

DEEMS TAYLOR TESTIFIES

Deems Taylor, nationally known composer, testified on behalf of the Society. He opposed the compulsory license provisions in the bill and objected to the elimination of the \$250.00 statutory damages.

"That is the rock upon which ASCAP rests," he said.

Congressman O'Malley questioned Mr. Taylor, as he had previously questioned both Buck and Burkan, about the qualifications for membership in the Society. It was brought out that usually a composer must have five songs published to be eligible for membership; that the publisher must be a "recognized" publisher; and that "recognition" means, almost in every case, that the publisher be a member of ASCAP.

DIFFERENCES IN COMMITTEE

During the tense days of the hearings, members of the House Patents Committee differed upon questions of procedure. Congressman Church of Illinois objected to the procedure under which opponents of the bill were heard first and frequently there were requests for rulings from the chair on the admissibility of documentary evidence. In each instance, however, documentary evidence offered was admitted.

SIGMUND ROMBERG TAKES STAND

Sigmund Romberg, composer, member of ASCAP Board, and president of the Songwriters Protective Association, also testified against the Duffy bill. He spoke briefly, pointing out the possible dangers to entering the International Convention at this time when works of American authors were not receiving proper protection in European countries. Mr. Romberg said his works had been excluded from Germany.

WARNER BROTHERS DISCUSSED

The split between the Society and Warner Brothers was injected into the hearings by Congressman Deen while questioning Buck.

Buck said that it was the contention of the Society that they had the right to license the works of their composer members and that they would defend NBC and CBS in the suits filed by Warner Brothers against the network companies.

"Why did Warner Brothers break away from the Society," Deen asked.

"Because they wanted more money; human greed. Yes, plain greed, g-r-e-e-d," Buck explained.

LICENSING PRACTICES SCRUTINIZED

Congressman O'Malley of Wisconsin, and Congressman Deen of Georgia, took a leading part in interrogating representatives of the Society on its methods of fixing fees.

Buck explained the factors considered by the Society in fixing license fees in the following language:

"The custom that we have in the society is to set what we call a sustaining fee, which is based on first the hours granted to them by the Government on their wave lengths. Some great stations can operate twenty-four hours a day. Some stations will have only six hours a day, and some four hours. There is a limited number of wave lengths. So when we set a fee to give this man accessibility to all our works, we take into consideration first the number of hours he has allocated to him by the United States Government; second, the location of their broadcasting station—and I will show you how important that is.

"You can have a broadcasting station of 50,000 watts broadcast in New York City tonight and you will hit twenty-two million listeners because it is a densely populated section of country.

"On the other hand, let us take Mr. Lanham's country down in Texas, the same operation, 50,000 watts, can not hit that radius of listeners. They also possibly might have to have a lot of power in that station to overcome a static condition that they may have all the year around. So we take that into consideration.

"We take in the first place that the Government has given them a free wave length or a limited wave length, and next the location of the station, and then the very important thing, the power of the station. Those are the three factors."

UNWILLING TO LET COURTS DECIDE

Spokesmen for the Society said that they needed the \$250.00 provision in the law for the purpose of protecting the composers against piracy of their works. Throughout the hearing, these spokesmen were careful to confine their remarks to the composer and only incidentally did reference to publisher members creep into their testimony.

Some members of the Committee were of the opinion that the rights of composers would be adequately protected by permitting courts to fix damages and believed courts would be fair about it. Witnesses for the Society dodged each question on this issue.

The question of using the \$250.00 damages as a bargaining basis for rights came up time and again.

"Now will you tell me what restrictions there are under the present law that would in any way curb this amount that you set as the license value? Assuming, for the sake of argument, that you were greedy, could you set any arbitrary figure without any control whatever?" asked Congressman Barry.

"If I understand your question, sir—that they must take what price we set?" said Buck.

"That is right," explained Barry, "Must they take what price you set?"

"True, true, true," replied Buck.

RUDY VALLEE SERVES WARNING

Rudy Vallee had his day on the stand on March 3. He said he opposed the Duffy bill and favored the Sirovich bill although he admitted he had read neither but depended upon a memorandum prepared by Burkan.

"I ask for the privilege of warning, more or less, the organizations that are attacking this Society, among whom are many of my friends in the radio, night club and hotel field, that are attacking the American Society, the creators of music, so vital to their welfare and organizations, that it might be called digging their own graves, throwing a boomerang that will react to our own detriment and doing themselves irreparable damage," Vallee predicted.

"I feel especially that radio, more even than the motion picture or the hotel, is going to kill the goose that lays the golden eggs, if they persist in their refusal to pay the society the money that the Society feels is due to the creators of music which furnish such a tremendous part of each radio program," he went on.

According to Vallee, composers write primarily for money.

"I do not think any man can be a bricklayer during the day and come home and write great songs at night," he opined.

"I do not see how anyone would want to write for the glory of it," he said.

Vallee said the present rates paid to ASCAP are a "joke."

"I am putting myself in jeopardy with interests that I today serve and will probably serve in the future," said the bandsman. "As most of you know, I am engaged in radio work today; in fact, it is the greater part of my work. I hope some day to be an executive in radio," he said.

Vallee said he had written about 20 songs and was one of the lowest paid members of the Society. He said he was appearing for the "little fellow."

HEARINGS ECHO IN HOUSE

On Wednesday, March 3, Chairman Sirovich addressed the House on the pending Duffy copyright bill.

He said he opposed entering the International Union because of restrictions imposed against American authors and motion picture producers by European countries.

He vigorously defended the American Society, urged defeat of the Duffy bill, and pleaded for retention of the \$250.00 minimum damage clause.

He was followed by Congressman Zioncheck of Washington, who spoke briefly in support of the Duffy bill and characterized the copyright hearings as "somewhat in the nature of a circus."

PRALL REAPPOINTED CHAIRMAN

President Roosevelt has reappointed Commissioner Anning S. Prall chairman of the Federal Communications Commission until March 11, 1937. The Communications Act provides that the chairman of the Commission shall be appointed by the President.

COUZENS ASKS REPORTS

Senator Couzens of Michigan introduced a resolution (S. Res. 240) this week calling upon the Federal Communications Commission to send full reports on its recent investigation to the Senate. The resolution which is awaiting action and was not sent to any committee is as follows:

"Whereas the Federal Communications Commission, on January 9, 1936, appointed a subcommittee from its membership to investigate what was known and described by the Commission as 'The Willard Hotel Incident'; and

"Whereas on February 14, 1936, the Commission issued a report of its findings on that investigation; and

"Whereas it would be helpful to the Committee on Interstate Commerce of the United States Senate to have all memoranda, statements, testimony, and reports made to or obtained by the Commission and by the Department of Justice for the Commission during the investigation herein referred to: Therefore be it

"Resolved, That the Federal Communications Commission shall forward to the United States Senate all of the memoranda, documents, statements, testimony, reports made to or obtained by the Commission and by the Department of Justice for the Commission in relation to and as part of that investigation."

NEW CONNECTICUT STATION RECOMMENDED

The Thames Broadcasting Corporation filed an application with the Federal Communications Commission asking for a construction permit for the erection of a new broadcasting station at New London, Conn., to use 1500 kilocycles, 100 watts power, and daytime operation.

Examiner Ralph L. Walker, in Report No. I-202, recommends that the application be granted. He found that the applicant is in all ways qualified to construct and operate the proposed station, that there is need for daytime broadcast service in the area to be served, and that the operation of the proposed station will not adversely affect the interests of any existing station by reason of interference.

TEL. & TEL. ACCEPTS DECISION

The American Telephone & Telegraph Company has notified the Federal Communications Commission that it has accepted its decision of February 26 in connection with the proposed construction of the coaxial cable between New York and Philadelphia for experimental television work.

In its decision the Commission found that it had jurisdiction over the construction of the cable and that it is in the public interest that it be constructed. A number of restrictions were put on its construction, including a clause that there shall be no discrimination between television experimenters who wish to make use of the cable as agreed to by the telephone company.

NEWSPAPER STATISTICS AVAILABLE

Copies of Section D, Volume IV, of "Market and Newspaper Statistics," and of "Totals of Cities," are available at \$2.00 each for the former and \$1.00 each for the latter by the American Association of Advertising Agencies.

Cities included in Section D are:

Freeport-Lynbrook (New York)	New Orleans
Gary	Staten Island (New York)
Hartford	Paterson
Long Beach	Salt Lake City
Lowell	San Antonio
Lynn	Scranton
New Haven	Utica

NEW FLORIDA STATION RECOMMENDED

The Fountain of Youth Properties, Inc., has filed an application with the Federal Communications Commission asking for a construction permit for the erection of a new broadcasting station at St. Augustine, Florida, to use 1210 kilocycles, 100 watts power, and unlimited time on the air.

Examiner R. H. Hyde, in Report No. I-203, has recommended that the application be granted. "It is concluded from the evidence," says the Examiner, "showing a lack of broadcast facilities in the applicant's area, either of transmission or dependable reception, and the showing of interest on the part of the public, that there is a need for the station the applicant proposes to construct."

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

Campbell Transportation Company, Pittsburgh, Pa. (2-1910, Form A-2)
Stuart Court Property Corp., New York City. (2-1911, Form E-1)
Voting Trust for same, New York City. (2-1912, Form F-1)
Citizens Independent Telephone Co., Terre Haute, Ind. (2-1913, Form A-2)
Indiana Associated Telephone Corp., Lafayette, Ind. (2-1914, Form A-2)
Properties & Construction Co., New York City. (2-1915, Form A-1)
Silvercote Products, Inc., Chicago, Ill. (2-1917, Form A-1)
Hepburn & McTavish, Inc., Los Angeles, Calif. (2-1918, Form A-1)
H. R. Holtzman Corp., Detroit, Mich. (2-1919, Form A-1)
Lincoln Service Corp., Washington, D. C. (2-1920, Form A-2)
Bondholders Committee for Madison Ave. Offices, Inc., New York City. (2-1922, Form D-1)
Arthur Fels Bond & Mortgage Co., Kansas City, Mo. (2-1923, Form D-1)
I. F. Steinmeyer, St. Louis, Mo. (2-1924, Form E-1)
National Fund, Inc., Jersey City, N. J. (2-1926, Form C-1)
Comstock Cedar Hill Gold Mines, Inc., Reno, Nev. (2-1927, Form A-1)
Bondholders Committee for First Baptist Church, New Orleans, La. (2-1928, Form D-1)
Coastland Oil Corporation, Houston, Tex. (2-1931, Form A-1)
Parker-Wolverine Company, Detroit, Mich. (2-1933, Form A-1)
Prudential Investing Corporation, Detroit, Mich. (2-1934, Form A-1)
General Houses, Inc., Chicago, Ill. (2-1935, Form A-1)
Time Controlled Indicators, Inc., Wilmington, Del. (2-1936, Form A-1)
Rochester Distilling Company, Inc., Rochester, N. Y. (2-1940, Form A-1)

LOTTERIES DISCUSSED IN EXAMINER'S REPORT

Of considerable significance is the Report of FCC Examiner George H. Hill (Examiner's Report I-197) relating to the application for renewal of license of Station WRBL, Columbus, Georgia.

This report contains a discussion of lotteries and gift enterprises, and in it the Examiner reaches the conclusion that certain programs broadcast constitute violations of Section 316 of the Communications Act of 1934. While the report is not final and although the Examiner's findings are subject to review by the Commission, it is nevertheless significant of a trend in the regulation programs which no broadcaster can afford to overlook.

The report is printed here in full:

The application of WRBL Radio Station, Inc., for renewal of license was designated for hearing because of the filing of an application by David Parmer for a construction permit requesting the facilities of Station WRBL. These applications were heard before an Examiner on June 28, 1935.

During the hearing the applicant, David Parmer, entered a motion to withdraw his application for a construction permit and the Examiner, on August 24, 1935, made his report (No. I-95) recommending that the motion for withdrawal of the application for a construction permit be granted, and that the application of WRBL Radio Station, Inc., for renewal of license also be granted.

Thereafter complaints were filed with the Commission concerning certain programs broadcast over Station WRBL by Muscogee Chevrolet Company, Burrus Motor Company, Better Housing Exposition, Police Benefit Wrestling Matches, and Woodcrest Hardware Company. The Commission reopened the case and directed that a hearing be held at Columbus, Georgia, to determine the following issues:

- (1) To determine the nature and character of the program service rendered by Station WRBL;
- (2) To determine whether or not Station WRBL has operated in violation of Section 316 of the Communications Act of 1934;
- (3) To determine whether the granting of this application would serve the public interest, convenience and necessity.

The Facts

Station WRBL is licensed to operate at Columbus, Georgia, on the 1200 kilocycle frequency with power of 100 watts, unlimited time. The station is owned and operated by WRBL Radio Station, Inc., and prior to July 7, 1935, the stock of the licensee corporation was owned by J. W. Woodruff, Sr., and David Parmer, each owning fifty per cent of the stock. Mr. Woodruff was President and Mr. Parmer Vice-President of the corporation. Mr. Parmer was also Director and Program Manager of the station.

It was shown that serious dissension arose between Mr. Woodruff and Mr. Parmer prior to July 7, 1935, with the result that proper supervision of the programs broadcast over Station WRBL was not exercised. Mr. Roy Luttrell now owns the stock formerly owned by Mr. Parmer. Mr. Parmer has not been connected with the station in any capacity since July 7, 1935. WRBL is the only radio broadcast station located at Columbus, Georgia, and is the only station rendering consistent service of a local nature to the Columbus area.

A number of officials of local governmental, civic, religious, cultural and labor organizations testified that the station is rendering a meritorious service and filling a real need in the community. An improvement in the programs broadcast over Station WRBL has been noted since the first hearing. More live talent has been employed than formerly, more time is devoted to religious, educational and civic programs, and recordings have been curtailed. The facilities of the station are made available to all worth-while civic and patriotic activities without cost.

A considerable portion of the evidence relates to broadcasts made over Station WRBL by the Muscogee Chevrolet Company, Burrus Motor Company, Better Housing Exposition and Police Benefit Wrestling Matches. The following are excerpts from these broadcasts:

MUSCOGEE CHEVROLET COMPANY

May 16, 1935.

"Would you like to win an automobile free without having to buy anything or be obligated in any way?"

"The Muscogee Chevrolet Company, 1501 First Avenue will give away free one nice 1929 automobile to the one guessing the nearest correct speedometer reading on this car that is on display in their used car lot adjoining the Chevrolet Building.

"This car will be given to the lucky person Saturday noon, June 8, 1935. Go down and join this guessing contest.

"Guessing will stop Friday, 6 p. m., June 7, 1935."

BURRUS MOTOR COMPANY

May, 1935.

"A used car absolutely free! That is exactly right! On the first day of June, 1935, at exactly 3:30 p. m., the Burrus Motor Company, 1238 First Avenue, is going to give away a splendid used car absolutely free. It may be a \$200 used car or truck or it may be a \$500 used car or truck, it all depends on how lucky you are.

"Now here's the proposition, every purchaser of a used car from Burrus during the month of May will be given a chance to draw this used car. If you are the lucky one, you will win the used car you have bought from the Burrus Motor Company.

"Say for instance, you have bought a \$400 or \$500 used car from Burrus, or whatever price you have bought, and the number of your ticket is drawn, you will be refunded every penny you have paid for the car you purchased. If you have paid cash for the car, you will be refunded the cash, or if you have traded in a used car as down payment, and made notes for the difference, you will be given cash for the amount your used car was traded in for, and your notes given back to you. In short, you will keep the car you purchased and will be returned everything you have paid for it.

"This is the most gigantic offer ever made on the part of the Burrus Motor Company. You will have a chance out of about 75 or 100 to win your car free, or one chance out of the number of used cars sold by Burrus during the month of May, as there will be only one chance given to each purchaser of a used car during this month.

"The radio special under the canopy at the Burrus used car department for today is ——. Take a look at the stock of used cars at Burrus—1238 First Avenue. Reconditioned and guaranteed!"

THE CHANCELLOR COMPANY

June 16, 1935.

"The Chancellor Company offers a sensational gift absolutely free! Here is your big opportunity to win a \$225 miniature racing car. Contest starts tomorrow, June 17, 1935, and ends Saturday night, August 31, 1935. This contest is open to boys and girls in Columbus, Fort Benning and nearby towns, between the ages of nine and ninety-nine.

"Contest starts tomorrow, June 17th, and ends Saturday night, August 31st.

"Everyone entering has an equal chance. Here's how it works.

"For every dollar spent for cash or every dollar paid on account during the months of June, July and August you will be given a free ticket which will entitle you to the drawing Saturday night, August 31st, 7:30 p. m.

"One ticket will win the car, but the more tickets you have the better opportunity you have to win the car.

"Save every ticket on all cash purchases made or any money paid on accounts between now and August 31st, and ride in a fine Automobile FREE.

"Be sure and call by and see this wonderful racing car on display in front of Chancellor Company. It has a real motor; is air cooled; gives sixty miles per gallon; has air balloon tires; and runs eighteen miles per hour.

"Try your luck and win a very valuable prize or gift."

BETTER HOUSING EXPOSITION

March 25, 1935.

"Ladies and Gentlemen—We now offer one of the most sensational, interesting and important features to be broadcast from the Federal Better Housing Exposition. We are going to interrupt the musical program for a few minutes in order to present several gifts of baskets of groceries. These baskets are furnished by King Grocery Company, with twelve stores in Columbus, together with the cooperation of many firms whose products are in the baskets.

"King Grocery Company is a consistent user of WRBL Radio service and has a most attractive and informative booth here at the Exposition, which is well worth your seeing.

"Before shaking the box and drawing the first lucky number, let me explain how you win these baskets of groceries: Every one holding a paid admission ticket is entitled to one free number after entering the building. You drop the stub bearing a duplicate number in the box and hold the duplicate until the numbers are drawn. There will be many baskets given each night and several numbers will be drawn and baskets given during this broadcast period each night.

"I now have the big thrill! LISTEN! We shake the box and draw the number, yes, sir and yes, maam! It is the lucky number ——. Will the winner please step forward and receive his gift of a large basket of groceries."

POLICE BENEFIT WRESTLING MATCHES

August 23, 1935.

(By Ralph Rogers): "And here is the drawing for the sixty hucks, and here is Jess, and he will tell you about it."

(By Jess Swicegood): "Here is the drawing, ladies and gentlemen. They are bringing the bread box up in the ring with Jimmy Calloway and the second gentleman, I don't know who he is. This gentleman is Mr. Glenn of the Nehi Bottling Plant. Mr. Glenn has one of the books, and his colleague has the other. You know each number carries a name in the books. They are drawing out a number now. I registered myself tonight. My number is 78. I believe Ralph's is 127. And they have drawn a number. What is that name? C. B. Bray, 833 First Avenue. He has got something to bray about all right. I could bray if I was him. And he isn't here. He doesn't answer and he doesn't win. Be sure to be down here Tuesday night. There will be seventy dollars in the jackpot. You don't have to buy a ticket in order to register and get your name in the pot. You can register around town any place almost. All that is necessary for you to do is to have your name in the hook and be in hearing distance. You don't have to be a paid admission in order to win, but if

you are on the outside of the gate and hear your name called you can come in and take the money away. And here is the announcement concerning the opponents for the next match."

WOODCREST HARDWARE COMPANY

June 20 and 22, 1935.

"Woodcrest is on the air . . . As the music begins we hear Ted Weems and his music in the recording —. How good a guesser are you? If you want to try your luck at guessing and also have a chance at winning a real prize that would cost you thirty-five dollars if you tried to buy it, listen for the big announcement at the end of this program.

"But now let's listen to the recording by Ted Weems and his orchestra as they play —.

"How is that lawn or garden of yours coming along? Are you giving it the care you should? Are the weeds or grass growing as well as the flowers, or is the garden clean and fresh? Couldn't you do a much better job if you had all the necessary tools? Well at the prices these tools and garden equipment is being sold at Woodcrest Hardware there is no reason why you shouldn't have everything that is necessary for the perfect garden. You owe it to yourself to go by Woodcrest Hardware at 1242 Broadway and see all these garden supplies and get their prices. Now for Ted Weems and his orchestra in the recording —.

"As the program of Woodcrest Hardware continues we want to remind you that regardless of your hardware needs they can be filled at Woodcrest Hardware at 1242 Broadway and you will be surprised at the very low prices on all their merchandise. Every article is of the highest grade and is made by the leading manufacturers.

"And now as we listen to Ted Weems in the recording — get ready for the big news which we will give you immediately after this number.

"And now for that announcement you have been waiting for—Woodcrest Hardware has just started the biggest guessing game in the history of Columbus—and here are the details: Go by Woodcrest Hardware at 1242 Broadway and look at the pile of pocket knives in the show window. Then go just inside the door and on a table you will see a box and guessing blanks. All you have to do is put your name and address on the card along with your guess as to how many knives are in the window and drop the card in the box. Isn't it simple? No obligation whatsoever! In the event your guess is the nearest to the correct number you will be given your choice as to the prize. You may have your choice of a seventeen-jewel Elgin, thirty-five dollar men's pocket watch or a twenty-six piece set of silverware with a value of thirty-five dollars. How is that for real prizes? Listen again! A thirty-five dollar Elgin pocket watch or a thirty-five dollar set of silverware! And remember there is no obligation whatsoever on your part. All you have to do is go by the Woodcrest Hardware at 1242 Broadway and guess the nearest number to the correct number of pocket knives in their window.

"The contest will close Saturday, July 20th, at 5 o'clock and the prizes will be awarded to the lucky person at 6 o'clock.

"Be sure and listen again Saturday evening at this same time for more news about the big guessing game. Until then Woodcrest Hardware leaves you with this thought—Make your hardware troubles Woodcrest problems."

June 22, 1935.

"Woodcrest is on the air. Ted Weems and his orchestra open the program with the recording —.

"Did you hear the sensational announcement made on this program last Thursday evening concerning the big guessing contest now being conducted by Woodcrest Hardware at 1242 Broadway? If you did, you want to be sure and go by and make your guess. If you did not hear the announcement, be sure and listen for it at the end of this program.

"We continue the musical part of the program now as Ted Weems and his orchestra are heard in the recording —.

"Are you in need of tools, hardware, jewelry or cooking utensils? If you are, there is no need for you to do without them any longer as you can get all these things at a very low cost at the Woodcrest Hardware at prices that are unbelievably low, and it is all the best merchandise that money can buy. Why not go by and see for yourself?

"Now the recording by Ted Weems' orchestra titled —.

"And now for the big announcement about the guessing game! Here are the details." (This was followed by same announcement used on June 20, 1935.)

All of the foregoing programs were broadcast while the former

management was in control of the station, with the exception of the Police Benefit Wrestling Matches and this program was accepted on the assurance of the Columbus Police authorities that the plan was legal and also on the opinion and with the approval of counsel. However, these broadcasts were promptly discontinued as soon as they were challenged and no program containing a suggestion of the award of prizes has since been accepted by the station. It is the policy of the present management to refuse to broadcast any programs of a doubtful nature. It is conceded by the applicant that the programs broadcast by the Burrus Motor Company, the Chancellor Company and the Better Housing Exposition involve a violation of the lottery laws, but it is contended that the programs of the Muscogee Chevrolet Company and the Police Benefit Wrestling Matches were legal.

By the weight of the authority of Federal and State Courts of last resort and text writers, three elements must be present to constitute a lottery, to wit, consideration, chance, and prize. From a careful consideration of the continuity of the Muscogee Chevrolet Company and the Police Benefit Wrestling Matches, it is doubtful whether such programs involved a violation of Section 316 of the Communications Act of 1934. Lotteries and gift enterprises are defined in the following citations which appear to be supported by the weight of authority:

"The three essential elements of a lottery are: First consideration; second, prize; and third, chance. To make a lottery, these three elements or ingredients must be present; chance alone will not do so, nor will chance even when coupled with consideration alone." 17 R. C. L. p. 1222.

"In conformity with the definitions already stated, it is obvious, as has been repeatedly stated, that the three necessary elements of a lottery are the offering of a prize, the awarding of the prize by chance, and the giving of a consideration for an opportunity to win a prize." 38 C. J. p. 289.

"A lottery is any scheme for the disposal or distribution of property by chance among persons who have paid, or promised or agreed to pay, any valuable consideration for the chance of obtaining such property, or a portion of it, or for any share of or interest in such property, upon any agreement, understanding, or expectation that it is to be distributed or disposed of by lot or chance, whether called a 'lottery,' a 'raffle,' or a 'gift enterprise,' or by whatever name the same may be known." Black's Law Dictionary, 3rd Ed., p. 1134.

"A lottery is a scheme by which, on one's paying money or some other thing of value, he obtains the contingent right to have something of greater value, if an appeal to chance, by lot or otherwise under the direction of the manager of the scheme, should decide in his favor." Bouvier's Law Dictionary, Vol. 2, p. 281.

"In order to constitute a lottery, there must be a consideration, chance and prize. That is to say, a person must pay something for the opportunity to try for a prize by chance or lottery." U. S. v. Purvis, 195 Fed. 618.

"To be like a lottery there must be something staked, a larger possible winning, and the winning or losing must depend on lot or chance and not on skill or judgment." Boasberg v. U. S., 60 Fed. (2d) 185.

"A 'gift enterprise,' in a broad sense, may be defined as a scheme under which presents are given to purchasers of goods as an inducement to buy, although in the sense in which the term is commonly applied it is a scheme under which goods are sold for their market value but by way of inducement each purchaser is given a chance to win a present or prize." 38 C. J. 296.

"A gift enterprise, moreover, has been defined as 'a scheme for the division or distribution of certain articles of property, to be determined by chance, among those who have taken share in the scheme; and as a sporting artifice by which, for example, a merchant or tradesman sells his wares for their market value, but by way of inducement gives to each purchaser a ticket which entitles him to a chance to win certain prizes, to be determined after the manner of a lottery.'" 17 R. C. L. 1211; citing Matter of Gregory, 219 U. S. 210 and Russell v. Equitable Loan, etc., 129 Ga. 154.

"A gift enterprise is usually considered in the books as a species of lottery, and a lottery, according to a recognized authority, has these three essential elements: consideration, prize, and chance." Corporate Organization & Audit Co. v. Hodges, 47 A. pp. D. C. 460; L. R. A. 1918 E, 491.

"Scheme by the Chamber of Commerce and certain merchants, whereby merchants purchased tickets from the Chamber of Commerce, which they gave to their customers entitling them to a chance or prize offered by the Chamber of Commerce, held not to constitute a lottery or gambling device * * * in that it lacked one essential element, in that customers paid nothing for

tickets and stood no chance to lose, since, in order to constitute gambling, winner must either pay consideration for a chance to win, or without paying anything in advance, stand chance to lose or win." *R. J. Williams Furniture Company v. McComb Chamber of Commerce*, 147 Miss. 649; 57 A. L. R. 421.

Conclusions

1. The programs broadcast over Station WRBL by Burrus Motor Company, the Chancellor Company and other programs of a like nature did not serve public interest, convenience or necessity and involved a violation of Section 316 of the Communications Act of 1934. However, other programs broadcast over the station were generally meritorious and served public interest, convenience and necessity.

2. The applicant has assured the Commission that programs involving lottery or gift enterprises will not in the future be broadcast over the station and that the station will in all respects be operated in accordance with the Rules and Regulations of the Commission.

3. The entire record considered, the Examiner is of the opinion that the granting of the application of WRBL Radio Station, Inc., for renewal of license would serve public interest, convenience and necessity.

Recommendations

It is accordingly recommended that the application of WRBL Radio Station, Inc., for renewal of license be granted.

George H. Hill,
Examiner.

BROADCAST ADVERTISING IN JANUARY

Developments of the Month

Total broadcast advertising volume in January amounted to \$8,035,160. The usual seasonal declines occurred during the month, gross time sales decreasing 7.5% as compared to December. National network volume declined slightly more than the usual seasonal amount as did local broadcast advertising. National non-network business, on the other hand, showed less than seasonal declines.

Broadcast advertising volume during the month exceeded that of January 1935 by 8.7%. The heaviest increases continued to be in the regional network and national non-network fields. National network volume was approximately the same as during the corresponding month of last year.

Local station advertising continued its growth of recent months. Volume over local stations was the only portion of the non-network field to increase as compared to December. January local station advertising was 23.1% greater than during the corresponding month of 1935. Declines in non-network advertising were general throughout all portions of the country. Non-network volume in the South and the North Central States experienced the greatest gain as against last year.

National non-network transcription volume was the only portion of the rendition field to gain as compared to December, and also showed the greatest increase over last January. Compared to January of the previous year, announcement volume was down in both the national non-network and local fields.

In the national network field, gasoline and accessory, beverage and miscellaneous advertising showed the greatest gains as compared to the corresponding month of 1935. Trends as a whole were spotty. Increases were prevalent throughout most of the regional network field, with drug, cosmetic, and confectionery advertising taking the lead. Gains also were general in national non-network advertising, the most important increases taking place in beverage, confectionery, soap and kitchen supply and tobacco advertising. The only declines of importance were with regard to gasoline and accessories, and financial sponsorship.

Gains were well distributed throughout the local broadcast advertising field, though most of them were minor ones. Automotive, gasoline and accessories, clothing and household equipment advertising showed the greatest increases as compared to January 1935. Retail broadcast advertising declined 29.4% as compared to December and showed a gain of 5.1% as against January of the preceding year.

Total Broadcast Advertising

Total broadcast advertising over stations and networks during the month under review is set forth in Table I.

TABLE I
TOTAL BROADCAST ADVERTISING

Class of Business	Gross Time Sales	
	Dec., 1935	Jan., 1936
National networks	\$4,944,445	\$4,740,560
Regional networks	127,174	95,340
National non-network	1,707,140	1,626,500
Local	1,907,600	1,572,760
Total	\$8,686,359	\$8,035,160

Gross time sales of the medium declined 7.5% as compared to December. National network volume decreased 4.1%; national non-network advertising dropped 4.7% and regional network volume decreased 25.1%. Local broadcast advertising declined 21.3% as compared to the December level.

National network volume and local broadcast advertising declined slightly more than the usual seasonal amount, while the drop in the national non-network field was slightly less than normal for January.

Compared to January of the preceding year, total broadcast advertising volume rose 8.7%. Gains throughout the medium were as follows: National networks, 0.6%; regional networks, 64.5%; national non-network advertising, 32.3%; local broadcast advertising, 13.1%. The gains in the regional network and national non-network fields were continuations of the trends which have been noticeable for the past year.

Comparison with Other Media

Advertising volume placed in major media during January is found in Table II.

TABLE II
ADVERTISING BY MAJOR MEDIA

Advertising Medium	Gross Time and Space Sales	
	Dec., 1935	Jan., 1936
Radio broadcasting	\$8,686,359	\$8,035,160
National magazines ¹	9,681,025	8,256,125
National farm papers	452,976	421,999
Newspapers ²	49,170,000	39,280,000
Total	\$67,990,360	\$55,993,284

¹ Publishers' Information Bureau.

² Estimated.

National magazine volume declined 17.1% as compared to December and was 9.3% below the January 1935 level. National magazines have been making a comparatively poor showing as against preceding periods for some time.

National farm paper advertising decreased 7.3% as compared to the previous month but exceeded the January 1935 level by 37.4%. This was the greatest gain experienced by any medium during the month under review.

Newspaper advertising decreased 20.2% as against December but remained 7.6% above last January. Automotive advertising was 39.5% below January 1935. Total display advertising, on the other hand, gained 5.6%, while department store volume rose 5.1%. Newspaper retail advertising rose 6.9%, while general advertising increased 18.0%.

Non-network Advertising

General non-network advertising declined 11.4% as compared to December and showed a gain of 22.2% as against the corresponding month of last year. Local stations continued to show the most pronounced relative growth of non-network volume. Local station volume in January alone exceeded that of the preceding month, rising 0.9% as against December. Volume for this class of transmitter was 39.1% greater than during the preceding January.

Clear channel and high-powered regional station volume declined 11.5% during the month, while regional station advertising dropped 15.5%. Clear channel and regional non-network business during January exceeded that of the corresponding month of the previous year by 23.8%, while regional station non-network volume rose 18.4%.

Greatest advertising by power of station is found in Table III.

TABLE III
NON-NETWORK ADVERTISING BY POWER OF STATION

<i>Power of Station</i>	<i>Gross Time Sales</i>	
	<i>Dec., 1935</i>	<i>Jan., 1936</i>
Over 1,000 watts	\$1,683,850	\$1,489,900
250-1,000 watts	1,446,490	1,221,120
100 watts	484,400	488,240
Total	\$3,614,740	\$3,199,260

Declines in non-network volume as compared to December were general throughout the country with the exception of the Mountain and Pacific Coast region, where non-network advertising dropped 16.5%. The average decrease was approximately 10%.

Compared to the preceding January, non-network advertising experienced its principal gains in the North Central and in the South Atlantic-South Central States. Non-network volume rose 57.5% in the former area and 36.8% in the latter. There was a decline of 1.0% in the New England-Middle Atlantic area and an increase of 1.6% in the Pacific and Mountain States. Non-network advertising by geographical areas is set forth in Table IV.

TABLE IV
NON-NETWORK BROADCAST ADVERTISING BY GEOGRAPHICAL DISTRICTS

<i>Geographical District</i>	<i>Gross Time Sales</i>	
	<i>Dec., 1935</i>	<i>Jan., 1936</i>
New England-Middle Atlantic Area..	\$765,000	\$686,350
South Atlantic-South Central Area...	715,530	631,410
North Central Area.....	1,420,650	1,286,400
Pacific and Mountain Area.....	713,560	595,100
Total	\$3,614,740	\$3,199,260

Non-network Volume by Type of Rendition

Electrical transcription volume was the only portion of the national non-network field to experience an increase as compared to the preceding month. National transcription volume rose 13.0%. National live talent business declined 17.4% as compared to December, while announcement volume decreased 2.2%.

National transcription advertising showed the greatest gains as against the previous January, rising 71.8%. National live talent volume increased 22.5% as against the corresponding month of last year, while announcement volume declined 4.8%. Trends in national non-network rendition continued to be the same as in recent months with the exception of the pronounced rise in electrical transcription volume, which is comparatively new.

Declines as compared to December were general in the local broadcast advertising field and were as follows: Electrical transcriptions, 31.3%; live talent, 10.1%; records, 17.2%; announcements, 22.3%. The marked decline in local transcription sponsorship seems to indicate that it has been the middle-sized retail establishment which for the most part has sponsored transcription library programs during recent months; since it is this type of retail organization which makes the most pronounced curtailment in its advertising following the Christmas period.

Local transcription and live talent advertising showed approximately the same increase over January of last year, the former rising 22.8% and the latter 23.4%. Record sponsorship increased 20.1%, while announcement volume declined 5.5%.

Transcription volume in the non-network field as a whole, national and local combined, rose 1.1% as against the preceding month and 61.0% as against the previous January. Live talent volume declined 13.1% during the month and gained 22.3% as compared to the corresponding period of 1935. Announcement volume decreased 20.5% as against December and was 4.4% below January of last year.

National non-network and local broadcast advertising volume by type of rendition employed is found in Table V.

TABLE V
NON-NETWORK BROADCAST ADVERTISING BY TYPE OF RENDITION

<i>Type of Rendition</i>	<i>National Non-network</i>		<i>Gross Time Sales</i>		<i>Local</i>		<i>Total</i>	
	<i>Dec., 1935</i>	<i>Jan., 1936</i>	<i>Dec., 1935</i>	<i>Jan., 1936</i>	<i>Dec., 1935</i>	<i>Jan., 1936</i>	<i>Dec., 1935</i>	<i>Jan., 1936</i>
Electrical transcriptions	\$574,550	\$649,280	\$206,080	\$140,180	\$780,630	\$789,460

Records	10,130	4,720	75,640	52,470	85,770	57,190		
Announcements	244,940	239,530	630,500	486,110	875,440	725,640		
Total	\$1,707,140	\$1,626,500	\$1,907,600	\$1,572,760	\$3,614,740	\$3,199,260		

Sponsor Trends in January

Declines were general throughout the national network field as compared to the preceding month. The heaviest declines occurred in clothing, which dropped 24.9%; financial advertising which decreased 23.0%; and radio set advertising which dropped 16.8%. Two gains were listed, confectionery advertising, which rose 3.6% and household equipment volume which increased 12.0%.

Declines were fairly general throughout the entire regional network field. Two gains of importance are to be noted, the first of these was a four-fold increase in drug and pharmaceutical advertising and a 28.8% rise in household equipment volume.

The principal gain of importance during the month in the national non-network field was a 38.4% increase in automotive volume. Household equipment advertising rose 15.0%, while minor increases occurred in the financial and kitchen supply fields. The heaviest decreases of the month occurred in the radio set, tobacco and beverage fields.

Declines were also general in local broadcast advertising, the most important ones occurring in the clothing, cosmetic, household equipment and miscellaneous fields. Marked gains occurred in local drug and pharmaceutical advertising and in confectionery volume.

Comparison with January 1935

Compared to January of the preceding year, national network

advertising exhibited conflicting trends. Principal gains were as follows: Gasoline and accessories, 44.6%; beverages, 19.7%; household equipment, 148.7%; and miscellaneous, 107.0%. Drug advertising continued its decline of recent months and was 18.2% below the level of last January.

Principal gains in the regional network field were as follows: Drugs and pharmaceuticals, 120.6%; cosmetics, 300%; household equipment, 46.8%. Confectionery advertising over regional networks rose from \$250 in January 1935 to \$6,778 during the corresponding month of the current year.

The principal gain in the national non-network field was a 200.0% rise in automotive advertising. A similar gain was recorded in the radio set field. Other important gains in national non-network volume were as follows: Drugs and pharmaceuticals, 29.0%; food stuffs, 59.2%; beverages, 28.1%; confectionery, 33.5%; soaps and kitchen supplies, 39.6% and tobacco, 44.9%. The principal decline of importance was a 16.6% drop in gasoline and accessories volume.

Principal increases in the local broadcast advertising field were as follows: Clothing, 28.0%; food stuffs, 22.2%; beverages, 42.0%; confectionery, 158.2%. There were no declines of major importance.

Broadcast advertising during January by major product and service groups is found in Table VI.

Total	\$4,740,560	\$95,340	\$1,626,500	\$1,572,760	\$8,035,160

Details as to Sponsor Trends

Details as to trends in broadcast advertising volume in various sponsoring groups are as follows:

1a. **Amusements.** National non-network volume up 289.9% compared to December. Local up 4.8%. Total rise 25.2%. National non-network down 11.7% as against same month of preceding year. Local down 24.2%. Total down 23.8%.

1. **Automotive.** Compared to December, national network volume down 11.0% and local 2.8%. National non-network volume up 38.4%. National non-network up 200.0% compared to January 1935, and local up 1.4%. National network down 8.9%.

2. **Accessories and gasoline.** Declines during month as follows: National networks 1.4%, regional networks 9.3%, national non-network 17.2%, and local 3.9%. Compared to January of previous year, gains as follows: National networks 44.6%, regional networks 26.6%, local 2.9%. National non-network down 16.6%.

3. **Clothing.** Declines compared to December as follows: National networks 24.9%, regional networks 59.3%, national non-network 19.3%, and local 31.0%. National network volume unchanged from last January. Regional network business down 74.6%. National non-network advertising up 39.0% and local up 28.0%.

4. **Drugs and pharmaceuticals.** National networks down 4.0% and national non-network 1.6% as compared to December. Regional networks up 432.0% and local 62.8%. Compared to corresponding month of 1935, national networks down 18.2% and local unchanged. Regional networks up 120.6% and national non-network 29.0%.

5. **Toilet goods.** Declines from preceding month as follows: National networks 3.4%, regional networks 63.4%, national non-network 18.5%, and local 33.8%. National network volume 2.8% above last January and regional network triple that month's level. National non-network down 11.8% and local up 16.8%.

6. **Foodstuffs.** National network volume 10.5% below last January. Regional network business up 24.1%, national non-network 59.2%, and local 20.2%. Compared to preceding month, declines as follows: National networks 5.2%, regional networks 14.9%, national non-network 9.5%, and local 2.2%.

7. **Beverages.** Declines as compared to December as follows: National networks 11.2%, regional networks 18.5%, national non-network 23.8%, and local 15.4%. Gains compared to January 1935 as follows: National networks 19.7%, national non-network 28.1%, and local 42.0%.

8. **Confectionery.** National network volume 3.6% above December and local advertising up 19.6%. Regional network volume down 68.4% and national non-network 17.5%. Regional network volume up materially as against last January. National non-network up 33.5% and local 158.2%. National network down 35.3%.

9. **Household equipment.** National network volume 12.0%

ahead of December. Regional networks up 28.8% and national non-network up 15.0%. Local down 29.3%. Compared to corresponding month of 1935 gains were as follows: National networks 148.7%, regional networks 46.8%, national non-network 6.8%, and local 10.0%.

10. **Soaps and kitchen supplies.** National network volume 1.3% below previous month. Regional networks down 80.3% and local down 38.6%. National non-network up 8.7%. National non-network up 39.6% as against previous January and local up 173.0%. National network down 4.5%.

11. **Financial and insurance.** National network volume down 23.0% as against preceding month and local 8.0%. National non-network up 3.9%. National network business 17.2% under January 1935 level. National non-network down 53.7% and local up 24.7%.

12. **Radios.** Declines from previous month as follows: National networks 16.8%, national non-network 45.0%, and local 60.4%. National non-network volume double that of January of preceding year. National network volume down 4.0% and local 32.8%.

13. **Department and general stores.** National non-network volume declined 38.8% as against December, and local 20.2%. National non-network business 50.5% above corresponding month of preceding year. Local business down 12.7%.

14. **Tobacco products.** Declines as compared to preceding month as follows: National networks 4.8%, regional networks 38.0%, national non-network 41.7%, and local 45.7%. Gains as against January 1935 as follows: National networks 9.8%, national non-network 44.9%, and local 236.9%.

15. **Miscellaneous.** Declines from December as follows: National networks 5.2%, regional networks 42.0%, national non-network 7.9%, and local 23.3%. Gains as compared to the corresponding month of last year as follows: National networks 107.0%, regional networks 64.1%, national non-network 32.1%, and local 13.1%.

Retail Broadcast Advertising

Broadcast advertising sponsored by retail establishments of various kinds decreased 29.4% as compared to the preceding month. This seems to be more than the usual seasonal downward swing. Retail broadcast advertising, however, showed a gain of 5.1% as compared to January of last year. This is the smallest gain to have been recorded in recent months. Declines were fairly general as compared to December throughout the various retail groups. Principal gains as against January 1935 were as follows: gasoline and accessories, 53.5%; clothing, 33.0%; groceries and delicatessens, 82.0%; beverage retailers, 27.8%, and hardware stores, 45.8%. There were no declines of major importance with the exception of a 9.6% decrease in department store volume.

Retail broadcast advertising during the month is found in Table VII.

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2729. A complaint has been issued against **E. F. Agee, Hillcrest Building, Omaha, Nebr.**, alleging unfair methods of competition in selling correspondence school courses in secretarial work and business administration.

Operating as "Commercial Extension University," "Commercial Extension of Omaha," and "Commercial Extension College," the respondent, through sales agents designated as "registrars," is alleged to inform prospective students that they have been specially selected for an offer of enrollment in his courses because of their high scholastic standing; that his "registrars" are empowered to offer an exceptionally low price, which represents the cost of materials only, that tuition is given free to those who become students; and that the regular price for the identical courses offered is much higher than the alleged exceptional price.

The complaint charges that students are not selected on the basis of scholastic ability; that the purported exceptional price is the only price quoted any prospect, and is, in fact, the regular price, and that the representation that any regular price is much higher than the quoted price is untrue.

No. 2730. Trading as **Marajah & Co.** and as **Kala Products Co., W. H. Charleston, 5930 South Parkway, Chicago**, engaged in the sale of cosmetics and medicinal preparations, is named respondent in a complaint alleging unfair methods of competition.

In newspapers, magazines and advertising literature, the respondent represents, the complaint alleges, that "Five Finger Grass" is a rare herb possessing magical qualities; that "Kala's Specific Hair Grower" is an absolute remedy for falling hair, itching scalp and dandruff, and that it promotes a fabulous growth of hair; that "Kala's Specific Bleaching Creme and Skin Whitener" bleaches and whitens the skin and relieves sunburn and skin eruptions, and that "Kala's Facial Creme" penetrates and is absorbed by the skin.

No. 2731. In a complaint issued against **T. G. Cooke, 1920 Sunnyside Ave., Chicago**, trading as **Institute of Applied Science**, he is charged with unfair competition in the sale of a correspondence school course in finger printing, which is represented as including instruction in the science of ballistics.

In the conduct of his business the respondent is alleged to have advertised the use of a textbook entitled "Forensic Ballistics, The Science of Examining Guns and Ammunition in Crimes," and, in connection with the sale of this course, represented and advertised that "Low Tuition Rates Still in Effect, Include Secret Service, Bertillon, Photography and Ballistics Courses."

No. 2732. **Garten Table Pad Co., Inc., 131 Market St., Phila-**

delphia, is charged in a complaint with unfair competition through misrepresenting the nature of the materials in certain table pads it manufactures and sells in interstate commerce.

By means of circulars distributed among the retail trade, the respondent represents, according to the complaint, that the table pads it offers for sale and sells have "a soft back covering that will not harm the polished surface of a table," and that they "can be had in a felted or genuine felt back, depending on the quality of the pad."

Stipulations

The Commission has issued the following cease and desist orders:

No. 1620. **F. H. Lawson Co., Evans and Whateley Sts., Cincinnati**, is engaged in selling bathroom and medicine cabinets equipped with mirrors manufactured and sold to it by the **Mid-West Glass Co., 2235 Buck Street, Cincinnati**. The Lawson company agrees to discontinue use in advertising matter of the words "copper-backed," or words of similar meaning, to describe the mirrors attached to its cabinets, so as to imply that such mirrors are made by electrolytically applying a protective coating or a continuous layer of solid copper to the silver nitrate reflecting surfaces of the mirrors, when such is not the fact.

No. 1621. **Mid-West Glass Co.**, referred to in the stipulation signed by **F. H. Lawson Co. (1620)**, entered into a similar stipulation, agreeing not to use the words "copper-back," or similar words, in branding or labeling its mirrors, so as to imply that the mirrors are made by an electrolytic coating process. According to the stipulation, the respondent manufactures its mirrors under license of and by a process developed by **Peacock Laboratories, Inc., Philadelphia**.

No. 1622. **Hayes Reding, 2 N. W. 9th St., Oklahoma City, Okla.**, doing business as **Hayes Candy Manufacturer**, formerly known as **H. & H. Candy Co.**, agrees to discontinue, in selling or promoting the sale of his candy products, use of any method of sale involving a lottery or scheme of chance, whereby an article is given as a prize in consideration of the purchase of any other article.

No. 1623. **Newbarre Granite Co., Inc., South Ryegate, Vt.**, stipulates it will desist from use of the word "Newbarre" as part of its corporate name in selling the granite it quarries, and also agrees to discontinue use of the word "Barre" in connection with the prefix "New," or in any way which may tend to mislead purchasers into the belief that the respondent's product is produced from a quarry in the Barre district of Vermont, when such is not the fact.

No. 1624. **Rhode Island Textile Co., 211 Prairie Ave., Pawtucket, R. I.**, is engaged in manufacturing and selling narrow fabrics, including corset laces. It agrees to discontinue use of the words "silk finish" or "silk" on labels affixed to its products, so as to imply or tend to lead purchasers into the belief that its products are silk-finished or are composed of or contain silk, when such representation is untrue; unless, when the words "silk finish" are used merely to describe the sheen of the product, such words shall be accompanied by other words printed in equally conspicuous type, to indicate clearly that the laces are not composed of and do not contain silk, but are made of some other product.

No. 1625. **Better Hearing, Inc., 1 West 34th St., New York City**, dealer in hearing aid devices called "Aurophone" and in accessories. Agrees to stop using in its circulars in connection with its corporate name, the phrase "America's Oldest Organization Specializing Exclusively in Scientific Hearing Aids," or similar assertions which may have a tendency to mislead buyers into believing that **Better Hearing, Inc.**, has been in existence longer than any of its competitors or is the oldest organization of its particular kind, when this is not true. The respondent also agrees to stop using in its circulars in this connection the representation "Founded in 1904."

No. 1626. **Burton Bros. Co., Inc., 7 South 15th St., Richmond, Va.**, deals in flavoring extracts, hair dressing, pharmaceuticals, aspirin and other products, some of which, according to the stipulation, it makes or compounds, and others, including aspirin, it purchases in bulk from manufacturers. The respondent agrees to cease using the word "Manufacturing," either alone or in connection with "Chemists," or with other words affixed to its aspirin products, implying that the company manufactures such aspirin or tending to deceive buyers into believing that it owns and operates the plant or factory in which this aspirin is made.

No. 1627. **Gibbs & Co., 21 South Wabash Ave., Chicago**, manufacturer of barber shop and beauty parlor supplies, is said to have advertised in its "Hand Book of Beauty Shop Equipment

and Supplies, No. 35," the "Gibbs Chrome Checker Back Booth Mirror," described as a plate mirror 8 inches in diameter, when in fact, according to the stipulation, this article was not made of plate glass, but of a glass inferior thereto. The respondent, in its stipulation, agrees to stop using the word "plate" when describing for sale products not made from plate glass.

No. 1628. Benrose Silk Manufacturing Corporation, 1450 Broadway, New York City, converter of silk and rayon goods, will cease use of the word "manufacturing" in connection with its corporate name, and the word "mills" on letterheads or in advertising matter, or in connection with the city names "Allentown, Pa.," or "Easton, Pa.," or in any way which may tend to deceive buyers into believing that the company manufactures its products and operates mills in the cities indicated, when this is not true.

No. 1629. Kelement, Inc., 11 West 42nd St., New York City, selling dehydrated kelp in tablet form for medicinal use under the name "Kelement," agrees to stop advertising that "Kelement" will keep the human body well, or supply it with an adequate mineral reserve, or that kelp products are naturally rich in calcium, phosphorus, copper and iron, or otherwise exaggerating the mineral content of kelp. The respondent also agrees to cease representing that "Kelement" is not a drug; that it contains an adequate supply of food-iodine and all the organic mineral elements necessary to keep the body healthy and free from disease, or that the product is a complete substitute for other medicinal preparations.

FEDERAL COMMUNICATIONS COMMISSION ACTION

HEARING CALENDAR

Monday, March 9

HEARING BEFORE AN EXAMINER (Broadcast)

NEW—A. Staneart Graham, K. V. Baxter, Norman Baxter, d/b as Pittsburg Broadcasting Co., Pittsburg, Kans.—C. P., 790 kc., 1 KW daytime.

Wednesday, March 11

HEARING BEFORE AN EXAMINER (Broadcast)

KLO—Interstate Broadcasting Corp., Ogden, Utah.—C. P., 1400 kc., 1 KW, 5 KW LS, unlimited time. Present assignment: 1400 kc., 500 watts, unlimited time.

Thursday, March 12

ORAL ARGUMENT BEFORE THE BROADCAST DIVISION

Examiner's Report No. I-149:

NEW—Reporter Broadcasting Co., Abilene, Tex.—C. P., 1420 kc., 100 watts, 100 watts LS, unlimited time.

NEW—Wm. O. Ansley, Jr., d/b as Guilford Broadcasting Co., Abilene, Tex.—C. P., 1420 kc., 100 watts, 100 watts LS, unlimited time.

Examiner's Report No. I-153:

NEW—Roberts MacNab Co., Arthur L. Roberts, R. B. MacNab, A. J. Breitbach, Gen. Mgr., Jamestown, N. Dak.—C. P., 1310 kc., 100 watts, 100 watts LS, unlimited time.

Examiner's Report No. I-138:

NEW—Chicago Broadcasting Association, Limited Partnership, Kleofas Jurgelonis, general partner; Jos. F. Budrik, Laurent V. Radkins and Vlasdas G. Jurgelonis, limited partners, Chicago, Ill.—C. P., 1300 kc., 100 watts, 100 watts LS, unlimited time.

NEW—Big Spring Herald, Inc., Big Spring, Tex.—C. P., 1500 kc., 100 watts, unlimited time.

NEW—Plainview Broadcasting Co., Plainview, Tex.—C. P., 1500 kc., 100 watts, daytime.

NEW—The North Texas Broadcasting Co., Paris, Tex.—C. P., 1500 kc., 100 watts, daytime.

HEARING BEFORE AN EXAMINER (Broadcast)

WIRE—Indianapolis Broadcasting, Inc., Indianapolis, Ind.—C. P., 1400 kc., 1 KW, 5 KW LS, unlimited time. Present assignment: 1400 kc., 500 watts, 1 KW LS, unlimited time.

WGBF—Evansville on the Air, Inc., Evansville, Ind.—C. P., 630 kc., 500 watts, 1 KW LS, simultaneous day, sharing night with WOS and KFRU. Present assignment: 630 kc., 500 watts, simultaneous day, sharing night with WOS and KFRU.

APPLICATIONS GRANTED

WMFJ—W. Wright Esch, Daytona Beach, Fla.—Granted C. P. to install new transmitter and vertical radiator at present location.

KPDN—Pampa Daily News, Inc., Pampa, Tex.—Granted modification of C. P. approving transmitter site east of city limits of Pampa (studio at 212 N. Ballard St., Pampa), and approving equipment.

KFSG—Echo Park Evangelistic Assn., Los Angeles, Calif.—Granted modification of license to increase day power from 1 KW to 2½ KW and use transmitter of station KRKD.

KSD—The Pulitzer Publishing Co., St. Louis, Mo.—Granted authority to determine operating power by direct measurement of antenna input in compliance with terms of Rule 137.

KMJ—James McClatchy Co., Fresno, Calif.—Granted authority to determine operating power by direct measurement of antenna input in compliance with terms of Rule 137.

KGBX—KGBX, Inc., Springfield, Mo.—Granted consent to voluntary assignment of license to Springfield Broadcasting Company.

KOOS—H. H. Hanseth, Inc., Marshfield, Ore.—Granted modification of license to change name from H. H. Hanseth, Inc., to Pacific Radio Corporation (1200 kc., 250 watts, daytime only).

WQAM—Miami Broadcasting Co., Miami, Fla.—Granted C. P. to install new equipment.

KWKH—International Broadcasting Corp., Shreveport, La.—Granted authority to install new automatic frequency control equipment.

KSCJ—Perkins Bros. Co. (The Sioux City Journal), Sioux City, Iowa.—Granted amended C. P. as follows: Move transmitter site, make changes in antenna and radiating system, and increase hours of operation from simultaneous day WTAQ, S.H.-night, to unlimited time. Application for special temporary authority to cover this grant was retired to the files.

WSVA—Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—Granted special temporary authority to operate with power of 250 watts from 8 p. m. to 9:30 p. m., EST, March 5, 1936, in order to broadcast the 15th anniversary banquet of Rion-Bowman Post No. 632, Veterans of Foreign Wars.

W3XEN—Havens & Martin, Inc., Portable-Mobile.—Granted modification of C. P. (temporary broadcast pickup) to make changes in equipment and increase power from 20 to 40 watts.

WIEF—Miami Broadcasting Co., Portable-Mobile.—Granted license to cover C. P. (temporary broadcast pickup), 1646, 2090, 2190, 2830 kc., 50 watts.

W9XAA—Chicago Federation of Labor, York Township, Ill.—Granted license to cover C. P. (experimental relay broadcasting) authorizing moving of transmitter to present site of broadcast station WCFL.

W5XAQ—East Texas Broadcasting Co., Portable-Mobile.—Granted license to cover C. P. (general experimental), frequencies 31100, 34600, 37600, 40600 kc., 30 watts.

NEW—WBNS, Inc., Portable (Columbus, Ohio).—Granted C. P. (temporary broadcast pickup), frequencies 1646, 2090, 2190, 2830 kc., 3 watts.

NEW—Onondaga Radio Broadcasting Corp., Portable-Mobile (Syracuse, N. Y.).—Granted C. P. (temporary broadcast pickup), frequencies 1646, 2090, 2190, 2830 kc., 45 watts.

SET FOR HEARING

KRNT—Iowa Broadcasting Co., Des Moines, Iowa.—Application for C. P. to install new equipment, increase power from 500 watts night, 1 KW day, to 1 KW night, 5 KW day, and install directional antenna.

WAWZ—Pillar of Fire, Zarephath, N. J.—Application for modification of license to increase power from 500 watts night, 1 KW day, to 1 KW day and night.

WOL—American Broadcasting Co., Washington, D. C.—Application for C. P. to make changes in equipment; move transmitter from 1111 H St., N. W., to about ½ mile east Riggs and Iager Roads, Md., and studio site to be determined in Washington, D. C.; change frequency from 1310 kc. to 1230 kc. and power from 100 watts to 1 KW.

NEW—Auburn Publishing Co., Auburn, N. Y.—Application for

- C. P. for new station, 1420 kc., 100 watts, unlimited time, site to be determined.
- NEW—Jefferson Broadcasting Co., Ormond O. Black, Pres., Birmingham, Ala.—Application for C. P. for new station, 1200 kc., 100 watts night, 250 watts day, unlimited time.
- NEW—Amended to read: W. I. S. E. Broadcasting Co., St. Paul, Minn.—Application for C. P. for new station, 630 kc., 250 watts, unlimited time, facilities of KGDE; site to be determined.
- NEW—Saginaw Broadcasting Co., Saginaw, Mich.—C. P., already in hearing docket, amended to read: 1200 kc., 100 watts night, 250 watts day, specified hours; site to be determined.
- KUJ—KUJ, Inc., Walla Walla, Wash.—C. P., already in hearing docket, amended to read: Move station locally to site to be determined; install new equipment; change frequency from 1370 kc. to 1250 kc.; increase power from 100 watts to 250 watts.
- NEW—C. W. Snider, Wichita Falls, Tex.—C. P., already in hearing docket, amended to read: 1500 kc., 100 watts, unlimited time; site to be determined.

MISCELLANEOUS

- KSL—Radio Service Corp., Salt Lake City, Utah.—Granted petition to intervene in re application of KLO for C. P. to operate on 1400 kc., 1 KW day, 5 KW night, at Ogden, Utah.
- KGU—Advertiser Pub. Co., Ltd., Honolulu, T. H.—Denied petition asking Commission to reconsider action of February 11, 1936, in granting application of KGMB for license to cover C. P.
- Chas. C. Theis, Wichita, Kans.—Oral argument set for March 5, 1936, on Examiner's Report No. 1-96, recommending grant of application for new station to operate on 1210 kc., 100 watts, unlimited time, continued until March 19, 1936.
- Springfield Newspapers, Inc., Springfield, Mo.—Permitted to file answer as respondent in re the application of A. Stancart Graham, d/b as Pittsburg Broadcasting Co., for new station at Pittsburg, Kans.
- Kidd Brothers, Taft, Calif.—Appearance and statement of facts accepted in re application for new radio broadcasting station.
- WEEL—Edison Electric Illuminating Co. (Respondent), Boston, Mass.—Denied motion to strike the notice of desire to be heard and statement of facts to be proved at hearing on March 17, 1936, filed by J. R. Maddox and Dr. W. B. Hair, d/b as Chattanooga Broadcasting Co., for a new station at Chattanooga. Respondent permitted to file answer any time prior to March 5, 1936.
- Tulare—Kings Counties Radio Associates, Visalia, Calif.—Denied request that Commission schedule its application for new station for hearing this week. Application is for 1190 kc., 250 watts, daytime.
- KGFG—Oklahoma Broadcasting Co., Inc., Oklahoma City, Okla.—Denied petition that Commission reconsider and grant application to modify license so as to change hours of operation from sharing with KCRC to full time. Designated for hearing January 30, 1936.
- WAAW—Omaha Grain Exchange, Omaha, Nebr.—Granted regular renewal of license.
- Charleston Broadcasting Corp., Charleston, W. Va.—Answer to appearance of WDBO accepted.
- KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Denied petition asking Commission to reconsider and grant application for modification of license to change frequency from 950 kc. to 630 kc., and increase hours of operation from daytime only with 250 watts to unlimited with 250 watts.
- E. Anthony & Sons, Inc., Pawtucket, R. I.—Granted protest requesting Commission reconsider action of January 21, 1936, in granting extension of the completion date of station WNRI to June 4, 1936, and directed that the application be designated for hearing, upon the protest of E. Anthony & Sons, Inc., against such grant and that said authorization be suspended and heard upon the issues contained in said protest.

REMANDED TO DOCKET

- Valley Broadcasting Co., Pomona, Calif.—Remanded to docket application for C. P. to erect new station at Pomona to operate on 1160 kc., 250 watts, LS.

APPLICATIONS DISMISSED

The following applications, heretofore designated for hearing, were dismissed at request of applicants:

- WTMV—Miss. Valley Broadcasting Co., Inc., E. St. Louis, Ill.—Applied for C. P., 1500 kc., 100 watts, 250 watts LS, unlimited time.
- NEW—Alex F. Suss, Maryville, Calif.—Applied for C. P., 1210 kc., 100 watts, unlimited time.
- NEW—Alex F. Suss, Sacramento, Calif.—Applied for C. P., 1310 kc., 100 watts, unlimited time.

ACTION ON EXAMINERS' REPORTS

- WILL—Ex. Rep. No. 1-111: University of Ill., Urbana, Ill.—granted modification of license to change frequency from 890 kc. to 580 kc.; change hours of operation from sharing with KUSD and KFNF to daytime, 1 KW. Examiner P. W. Seward sustained. Other effective May 5, 1936.
- NEW—Ex. Rep. No. 1-123: Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Denied C. P. for new station to operate on 1480 kc., 5 KW, daytime. Examiner R. L. Walker sustained. Order effective May 12, 1936.
- KADA—Ex. Rep. No. 1-182: C. C. Morris, Ada, Okla.—Denied special experimental authorization to operate unlimited time; 1200 kc., 100 watts. Examiner P. W. Seward reversed. Order effective May 5, 1936.
- KG CX—Ex. Rep. No. 1-164: E. E. Krebsbach, Wolf Point, Mont.—Denied C. P. to move transmitter; make changes in equipment; change frequency from 1310 kc. to 1450 kc.; increase power from 100 watts night, 250 watts day, to 1 KW; change hours of operation from specified hours to unlimited time. Examiner J. P. Bramhall reversed. Order effective April 7, 1936.
- WEDC—Ex. Rep. No. 1-169: Emil Denmark, Inc., Chicago, Ill.—Granted renewal of license, 1210 kc., 100 watts, specified hours. Examiner R. H. Hyde sustained. Order effective April 14, 1936.
- NEW—Ex. Rep. No. 1-175: Golden Empire Broadcasting Co., Redding, Calif.—Granted C. P. for new broadcast station to operate on 1200 kc., 100 watts, unlimited time. Examiner M. H. Dalberg sustained. Order effective April 21, 1936.
- KFPY—Ex. Rep. No. 1-176: Symons Broadcasting Co., Spokane, Wash.—Granted C. P. to install new equipment; change transmitter site; increase power from 1 KW to 1 KW night, 5 KW day, 890 kc., unlimited time. Examiner Geo. H. Hill sustained. Order effective April 28, 1936.
- WSPD—Ex. Rep. No. 1-179: Toledo Broadcasting Co., Toledo, Ohio.—Granted C. P. to make changes in equipment and increase power from 1 KW, 2½ KW LS, to 1 KW, 5 KW LS; 1340 kc., unlimited time. Examiner P. W. Seward sustained. Order effective April 28, 1936.
- WJBC—Ex. Rep. No. 1-181: Wayne Hummer and Harry Dee, d/b as Kaskaskia Broadcasting Co., Bloomington, Ill.—Granted C. P. to make changes in equipment and increase power from 100 watts to 100 watts night, 250 watts day; 1200 kc., share time with WJBL. Examiner John P. Bramhall sustained. Order effective April 28, 1936.
- WHBU—Ex. Rep. No. 1-183: Anderson Broadcasting Corp., Anderson, Ind.—Granted C. P. to make changes in equipment and increase power from 100 watts to 100 watts night, 250 watts day; 1210 kc., unlimited time. Order effective May 5, 1936.
- WFBM—Indianapolis Power & Light Co., Indianapolis, Ind.—Granted C. P. to install new equipment; move transmitter and studio; increase power from 1 KW to 1 KW night, 5 KW day; 1250 kc., unlimited time. Examiner R. L. Walker sustained.

APPLICATIONS RECEIVED

First Zone

- WORL—Broadcasting Service Organization, Inc., Needham, Mass. 920 —Modification of license to increase power from 500 watts to 1 KW.
- NEW—Rensselaer Polytechnic Institute, Troy, N. Y.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000 kc., no power specified. Amended giving power as 1 KW.
- NEW—Onondaga Radio Broadcasting Corp., Portable-Mobile.—Construction permit for a new broadcast pickup station to be operated on 2090, 2790, 2830 and 2760 kc., 45 watts. Amended to change frequencies to 1646, 2090, 2190 and 2830 kc.

Second Zone

- NEW—Harold F. Gross and Edmund C. Shields, Saginaw, Mich.—
950 Construction permit for a new station to be operated on 1210 kc., 100 watts, 250 watts day, unlimited time. Requests facilities of WJIM if WJIM's application for 1010 kc. is granted. Amended to make changes in equipment, change frequency from 1210 kc. to 950 kc., power from 100 watts, 250 watts day, to 500 watts, hours of operation from unlimited to daytime. Omit request for WJIM's facilities.
- WJBK—James F. Hopkins, Inc., Detroit, Mich.—Modification of
1500 construction permit to make changes in equipment; move transmitter from 12897 Woodward Avenue, Highland Park, Mich., to site to be determined, Detroit, Mich.; install vertical antenna; extend commencement date from 9-30-35 to date of grant and completion date from 3-30-36 for six months.

Third Zone

- NEW—Jonas Weiland, Kinston, N. C.—Construction permit for a
1200 new station to be operated on 1210 kc., 100 watts, 250 watts day, unlimited time. Amended to change frequency from 1210 kc. to 1200 kc.
- WJNO—Hazlewood, Inc., West Palm Beach, Fla.—Modification of
1200 construction permit (B3-P-159) for equipment changes (antenna) and change transmitter site from El Varano Hotel, West Palm Beach, Fla., to near West Palm Beach, Fla.
- KFPM—Voice of Greenville, Greenville, Tex.—Construction permit
1310 to make changes in equipment; increase power from 15 watts to 100 watts; change hours of operation from specified hours to daytime. Amended to change transmitter site from 2109 Park Street (rear) to site to be determined, Greenville, Tex.
- WNBR—Memphis Broadcasting Co., Memphis, Tenn.—Consent to
1430 transfer control of corporation from Francis S. Chamberlin, Mallory Chamberlin, Charles W. Brunner and Ceylon B. Frazer to Memphis Commercial Appeal, Inc., 224 shares of stock.

Fourth Zone

- NEW—I. T. U. Radio Station, Inc., Indianapolis, Ind.—Construction permit for a new station to be operated on 560 kc., 1

KW, 5 KW day, unlimited time, facilities of WIND, Gary, Ind. Amended to change name from International Typographical Union of N. A. to I. T. U. Radio Station, Inc.; change studio site from 28th and Meridian Sts. to 2820 N. Meridian St., Indianapolis, Ind.; and make changes in antenna.

- NEW—Glenn Van Auker, Indianapolis, Ind.—Construction permit
600 for a new station to be operated on 600 kc., 1 KW, daytime.
- WEMP—Milwaukee Broadcasting Co., Milwaukee, Wis.—Construction permit to install new equipment; change frequency
1010 from 1310 kc. to 1010 kc., 100 watts to 250 watts, 500 watts day, hours of operation from daytime to unlimited.
- NEW—The Courier-Post Publishing Co., Hannibal, Mo.—Construction permit for a new station to be operated on 1310 kc.,
1310 100 watts, unlimited time.
- KFJM—University of North Dakota, Grand Forks, N. Dak.—
1370 Special experimental authorization to operate on 250 watts day for period ending 1-1-36. Amended to change ending date to 7-1-36.

Fifth Zone

- KVL—KVL, Inc., Seattle, Wash.—Construction permit to make
1070 changes in equipment; change frequency from 1370 kc. to 1070 kc., power from 100 watts to 250 watts, and hours of operation from share-KRKO to daytime only. Amended to make changes in antenna system.
- KFJI—KFJI Broadcasters, Inc., Klamath Falls, Ore.—Construction permit to make changes in equipment.
1210
- NEW—Luther E. Gibson, d/b as Times-Herald Publishing Co.,
1320 Vallejo, Calif.—Construction permit for a new station to be operated on 1320 kc., 250 watts, daytime. Amended giving exact transmitter site as in the vicinity of Mare Island Navy Yard, between Vallejo and South Vallejo, Calif.
- NEW—The News Press Publishing Co., Santa Barbara, Calif.—
1410 Construction permit for a new station to be operated on 1450 kc., 500 watts, unlimited time. Amended to change frequency from 1450 kc. to 1410 kc.

DUFFY BILL HEARINGS

Hearings on the Duffy Copyright Bill S. 3047 which were commenced before the House Patents Committee on February 25 are continuing. Witnesses for the ASCAP were heard during the first six days. The hearings are confined to two hours per day and to three days per week. Senator Duffy, author of the Bill, and Dr. McClure of the Department of State who, as chairman of an Inter-Departmental Committee, assisted in drafting the bill were heard Tuesday (10) and Wednesday (11) and are scheduled to appear for further questioning Thursday (12). The NAB expects to appear before the Committee next Tuesday (17).

PIONEER RADIO TAX CASE

Oral argument was held Monday before the United States Supreme Court on the question of the right of a state to levy a privilege tax on radio broadcasting.

This question came up for the first time in the Supreme Court in the case of Fisher's Blend, Inc., vs. The Tax Commission of the State of Washington. The case came direct from the Supreme Court of the State of Washington. Several cases in other states are awaiting a decision in this case.

MORE STATIONS SIGN WITH WARNER BROS.

The following additional stations have signed the Warner Brothers contract: W2XR, New York City; KGEZ, Kalispell, Mont.; KADA, Ada, Okla.; KGW, Portland, Ore.; KEX, Portland, Ore.

WATCH FOR THIS

A NAB member has informed headquarters of an experience he has had with "the man who brings you health through color rays."

According to this information the man, for the purpose of the broadcast program, sits on a 300-pound cake of ice and has ice water dashed over him and then eats ice cream. He protects himself from the effect of this exposure with his color ray.

"In all the talks," states the communication, "prior to the broadcast he swears by everything that is holy that all he is doing is going to make a broadcast and says his machine helps to prevent common colds. After the broadcast folders are mailed to everybody in the phone book." NAB members will want to watch for this.

CBS FILES ANSWER TO MUSIC SUIT

In its answer filed February 28, in the Federal Court in reply to the complaint of Harms, Inc., Columbia Broadcasting System reiterated its claim that Columbia stations are still licensed to broadcast music published by the Warner group. Columbia, however, is continuing its policy of not broadcasting any Warner music.

The suit brought by Harms, Inc., contended that a performance of "I Get a Kick Out of You" shortly after midnight on New Year's Eve over WABC constituted a copyright infringement. Columbia denies that it is guilty of infringement, and sets forth in addition the grounds on which it contends that WABC was entitled to perform the number.

The answer points out that both Harms and Cole Porter, the composer, were members of ASCAP at the time WABC obtained from ASCAP the license which grants performing rights in the Warner Bros. compositions up to 1941. Cole Porter, the answer further asserts, remains a member of ASCAP and has specifically assigned his rights to ASCAP for this period.

Not only does Columbia continue to claim that the performance is licensed, but it also claims that Harms, by reason of its actions and representations, is barred from asserting any infringement claim.

TELEPHONE HEARINGS CALLED

The Federal Communications Commission has announced that the Telephone Division will begin hearings in its telephone investigation on March 17 in this city.

The hearings are in connection with the general telephone investigation called for by Congressional resolution directing a special investigation of all telephone companies engaged directly or indirectly in telephone communications in interstate commerce, and certain other kinds of companies.

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

International Commodities Corporation, New York City (2-1943, Form A-1)
Springfield City Water Co., Springfield, Mo. (2-1944, Form A-2)
Spencer Chain Stores, Inc., Boston, Mass. (2-1945, Form A-2)
The Famise Corp., Philadelphia, Pa. (2-1947, Form A-1)
Southeastern Indiana Corp., Indianapolis, Ind. (2-1948, Form E-1)
American Midland Co., Detroit, Mich. (2-1949, Form A-1)
Barnett Petroleum Co., Houston, Texas (2-1950, Form A-1)
Lednew Corp., Jersey City, N. J. (2-1951, Form A-1)
Kingston Products Corp., Kokomo, Ind. (2-1953, Form A-2)
S. F. Bowser & Co., Fort Wayne, Ind. (2-1954, Form E-1)
Mansul Chemical Co., Jacksonville, Florida (2-1955, Form A-1)
Essex Brewing Co., Haverhill, Mass. (2-1956, Form A-1)
Burry Biscuit Corp., Linden, N. J. (2-1958, Form A-1)

PRALL COMMENTS ON FCC WORK

The Federal Communications Commission on Wednesday made public the following statement in connection with the reappointment of Mr. Prall as chairman of the Commission:

Anning S. Prall of New York today began his second year as Chairman of the Federal Communications Commission. He was reappointed for another year by President Roosevelt in an order to become effective March 11.

Mr. Prall, as Chairman, serves as a member of each of the three divisions of the Commission—Broadcast, Telephone and Telegraph. Last July he was appointed by President Roosevelt for a seven-year term, after having served a six-month tenure under his original appointment. He is a native of Staten Island, New York, and represented that district in Congress for twelve years as a Democratic member prior to joining the Commission.

Upon beginning his second year as Chairman of the Commission, Mr. Prall said today:

"Naturally, I am gratified over my reappointment by President Roosevelt to serve as Chairman of the Commission for an-

other year. It will be my constant effort to justify his trust in me by acquitting my office in the best interests of the people of the United States.

"In appraising the work of the Federal Communications Commission it should be kept in mind that, except for radio, the Commission has undertaken an entirely new work. It is breaking new ground in the regulation of telephones and telegraphs. Of necessity, this work has been slow and arduous. The Commission was desirous of avoiding mistakes that might result from undue haste.

"The Commission has not been infallible. It may have made errors of judgment but, I am confident, if it has made any they are inherent in the functioning of any new organization and it will profit by them in its future work."

SUITS BEGUN BY WARNER BROTHERS

Warner Brothers have announced officially that they have begun the following suits against radio stations and hotels, etc., based on alleged infringement of song copyrights owned by them:

M. Witmark & Sons vs. Associated Broadcasters, Inc., operators of Station WEST, for the alleged infringement of "Sweethearts Forever" on February 27th, 1936. Damages sought: \$250.

Remick Music Corp. vs. Associated Broadcasters, Inc., operators of Station WEST, for the alleged infringement of "Sweet Georgia Brown" on February 26th, 1936. Damages sought: \$250.

Harms, Inc. vs. WGAL, Inc., operators of Station WGAL, for the alleged infringements of "Sleepy Valley" on February 20th and 21st, 1936. Damages sought: \$500.

Harms, Inc. vs. Southern Broadcasting Stations, Inc., operators of Station WGST, for the alleged infringement of "That Old Fashioned Mother of Mine" on January 23rd, 1936. Damages sought: \$5,000.

Harms, Inc. vs. W. D. R. C., Inc., operators of Station WDRC, for the alleged infringement of "That Old Fashioned Mother of Mine" on January 23rd, 1936. Damages sought: \$5,000.

Harms, Inc. vs. Maine Broadcasting Co., operators of Station WLBZ, for the alleged infringement of "That Old Fashioned Mother of Mine" on January 23rd, 1936. Damages sought: \$5,000.

Harms, Inc. vs. Buffalo Broadcasting Corp., operators of Station WKBW, for the alleged infringement of "That Old Fashioned Mother of Mine" on January 23rd, 1936. Damages sought: \$5,000.

Harms, Inc. vs. W. H. E. C., Inc., operators of Station WHEC, for the alleged infringement of "That Old Fashioned Mother of Mine" on January 23rd, 1936. Damages sought: \$5,000.

Harms, Inc. vs. WOKO, Inc., operators of Station WOKO, for the alleged infringement of "That Old Fashioned Mother of Mine" on January 23rd, 1936. Damages sought: \$5,000.

Harms, Inc. vs. Pittsburgh Radio Supply House, Inc., operators of Station WJAS, for the alleged infringement of "That Old Fashioned Mother of Mine" on January 23rd, 1936. Damages sought: \$5,000.

Harms, Inc. vs. Station WESG for the alleged infringement of "That Old Fashioned Mother of Mine" on January 23rd, 1936. Damages sought: \$5,000.

Remick Music Corp. vs. Southern Broadcasting Stations, Inc., operators of Station WGST, for the alleged infringement of "Put On Your Old Grey Bonnet." Damages sought: \$5,000.

Harms, Inc. vs. Southern Broadcasting Stations, Inc., operators of Station WGST, for the alleged infringement of "London On a Rainy Night." Damages sought: \$5,000.

Remick Music Corp. vs. York Broadcasting Co., operators of Station WORK, for the alleged infringement of "Sweet Georgia Brown." Damages sought: \$5,000.

M. Witmark & Sons vs. York Broadcasting Co., operators of Station WORK, for the alleged infringement of "Where the River Shannon Flows." Damages sought: \$5,000.

Harms, Inc. vs. Howell Broadcasting Co., Inc., operators of Station WEBR, for the alleged infringement of "Gringola." Damages sought: \$500.

Harms, Inc. vs. Associated Broadcasters, Inc., operators of Station KSFO, for the alleged infringement of "Continental" and "You Let Me Down." Damages sought: \$600.

Remick Music Corp. vs. WSJS for the alleged infringement of "Sweet Georgia Brown." Damages sought: \$250.

Harms, Inc. vs. Durham Radio Corporation, operators of Station WDNC, for the alleged infringement of "That Old Fashioned Mother of Mine." Damages sought: \$5,000.

Harms, Inc. vs. North Carolina Broadcasting Co., operators of Station WBIG, for the alleged infringement of "That Old Fashioned Mother of Mine." Damages sought: \$5,000.

Harms, Inc. vs. Florida Broadcasting Co., operators of Station WMBR, for the alleged infringement of "That Old Fashioned Mother of Mine." Damages sought: \$5,000.

Harms, Inc. vs. Station WDAE for the alleged infringement of "That Old Fashioned Mother of Mine." Damages sought: \$5,000.

Harms, Inc. vs. Orlando Broadcasting Co., operators of Station WDBO, for the alleged infringement of "That Old Fashioned Mother of Mine." Damages sought: \$5,000.

Harms, Inc. vs. W. L. A. C., Incorporated, operators of Station WLAC, for the alleged infringement of "That Old Fashioned Mother of Mine." Damages sought: \$5,000.

Harms, Inc. vs. Voice of St. Louis, Inc., operators of Station KMOX, for the alleged infringement of "That Old Fashioned Mother of Mine." Damages sought: \$5,000.

T. B. Harms vs. WVO Broadcasting Company (WNEW) for the alleged infringement of the song "Every Now and Then"; and M. Witmark & Sons vs. Marcus Loew Booking Agency (WHN) for the alleged infringement (two times) of the song "Where the River Shannon Flows." In each case \$5,000 damages and an accounting of the profits are sought.

M. Witmark & Sons vs. Don Lee Broadcasting System (KHJ, Los Angeles) for the alleged infringement of the song "Mine Alone," seeking \$5,000 damages and an accounting of the profits.

Remick Music Corp. vs. Don Lee Broadcasting System (KHJ, Los Angeles) for the alleged infringement of the song "Whistle and Blow Your Blues Away," seeking \$5,000 damages and an accounting of the profits.

M. Witmark & Sons vs. Northern Corporation (WMEX, Boston) for the alleged infringement of the song "Gypsy Love Song," seeking \$5,000 damages and an accounting of the profits.

Remick Music Corp. vs. Onondaga Radio Broadcasting Corp. (WFLB, Syracuse) for the infringement of the song "Get Happy," seeking \$5,000 damages and an accounting of the profits.

M. Witmark & Sons vs. Central New York Broadcasting Corporation (WSYR, Syracuse) for the alleged infringement of the song "The Words Are In My Heart," seeking \$5,000 damages and an infringement of the profits.

Remick Music Corp. vs. WCFL Cooperative System, Inc. (WCFL, Chicago) for the alleged infringement of the song "Put On Your Old Grey Bonnet," seeking \$250 damages and an accounting of the profits.

M. Witmark & Sons vs. WWL Development Company, Inc. (WWL, New Orleans) for the alleged infringement of the song "Let's Have Breakfast in Bed," seeking \$5,000 damages and an accounting of the profits.

M. Witmark & Sons vs. WCFL Cooperative System, Inc. (WCFL, Chicago) for the alleged infringement of the songs "That Old Irish Mother of Mine," "Lulu's Back In Town" and "Sunrise and You," seeking \$750 damages and an accounting of the profits.

Remick Music Corp. vs. Associated Broadcasters, Inc. (KSFO, Los Angeles) for the alleged infringement of the song "Sweet Georgia Brown," seeking \$300 damages and an accounting of the profits.

Harms, Inc. vs. 1 Fifth Avenue for the alleged infringement of four numbers, "Dancing in the Dark," "As Time Goes By," "Night and Day" and "April in Paris," for which \$1,000 damages and an accounting of the profits are demanded.

M. Witmark & Sons vs. A. & U. Restaurant, Inc., operators of the Hollywood Restaurant, for the alleged infringement of "Lullaby of Broadway" and "Forty-Second Street," for which \$500 damages and an accounting of the profits are sought.

Harms, Inc. vs. Plaza Operating Co., operators of the Hotel Plaza, for the alleged infringement of "Dancing in the Dark," for which \$250 damages and an accounting of the profits are sought.

Harms, Inc. vs. Waitt Operating Co., operators of the Hotel Weylin, for the alleged infringement of "A Picture of Me Without You," "April in Paris," "Night and Day," "Miss Otis Regrets," and "Why Shouldn't I," for which \$1,250 damages and an accounting of the profits are sought.

Remick Corp. vs. Village Grove Amusement, Ltd., operators of The Nut Club, for the alleged infringement of "Moonlight Bay," "Would You Like To Take A Walk" and "Nagasaki," for which \$1,000 damages and an accounting of the profits are sought.

New World Music Corp. vs. Paradise Catering Corp., operators of the Paradise Restaurant, for the alleged infringement of "I

Got Rhythm," for which \$250 damages and an accounting of the profits are sought.

Harms, Inc. vs. Vincent Astor, operator of the Hotel St. Regis, for the alleged infringement of "I Get A Kick Out of You" and "Why Shouldn't I," for which \$500 damages and an accounting of the profits are sought.

M. Witmark & Sons vs. New Yorker Hotel Corp., operator of the Hotel New Yorker, for the alleged infringement of "Rose In Her Hair" and "Ah, Sweet Mystery of Life," for which \$500 damages and an accounting of the profits are sought.

Remick Music Corp. vs. The Village Farm Barn for the alleged infringement of "Put On Your Old Grey Bonnet," "Memories," "Sweet Georgia Brown" and "Would You Like To Take A Walk," for which \$1,000 damages and an accounting of the profits are sought.

Other new Harms actions against broadcasters include nine for the alleged infringement of "That Old Fashion Mother of Mine" on January 23rd, 1936. Damages of \$5,000 each are sought from radio stations WFEA, WCAU, KOMA, WKRC, WBNS, WSMK, WSPD, WADC and WMBG. The tenth suit is against Station WORK for the alleged infringement of "L'Amour Toujours L'Amour" on February 24th. Damages of \$5,000 are sought from that station also.

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2733. Charging unfair representations in radio programs, newspapers and other printed matter concerning washing machines sold in interstate commerce, a complaint has been issued against **Taylor Washing Machine Co., 2921 West Madison St., Chicago.**

The complaint charges the company, through its sales representatives, with procuring sales contracts by fraud and false pretenses and with false and misleading assertions which "lull the public and prospective purchasers into a false sense of security and trust in dealing with respondent."

The company is charged with a lack of good faith in soliciting customers by advertising a "free home trial" and a "free home demonstration" of its \$49.50 Taylor washing machine. In this connection, it is alleged that the respondent procures signatures to instruments in writing and in blank by falsely representing such paper to be a "receipt," "insurance policy" or evidence of the signer's "willingness to accept a demonstration" covering the washing machine delivered or to be delivered and represented as on trial or demonstration, when in fact, according to the complaint, the respondent's undisclosed intention is to use such instruments as contracts, or to convert them into contracts of sale for merchandise.

Threats of suits and harassment in employment are among the methods assertedly used by the respondent to impose on prospective purchasers the provisions of contracts to which they were not legally bound, and it is charged that the respondent, without authority of State laws, exercised powers of attorney to assign wages and salaries under purchase contracts.

These practices are alleged to constitute unfair methods of competition in violation of the Federal Trade Commission Act.

No. 2734. A complaint has been issued charging **H. E. Martindale, trading as Federal Institute of Meats & Marketing, 805½ Sheridan Road, Menominee, Mich.,** with representations to the effect that his correspondence school business is a branch of or connected with the United States Government.

Martindale, who sells courses in butchery and meat packing, is alleged to have advertised his business as the "Central States Division, Federal Institute-Meats-Marketing, Washington, D. C. H. E. Martindale, Divisional Director. Central States Office, Menominee, Mich."

No. 2735. Unfair methods of competition in connection with the sale of silver-plated ware is alleged in a complaint issued against **International Silver Co.,** having its principal place of business at **Meriden, Conn.,** with sales offices at Chicago, New York, San Francisco, St. Louis and Toronto, and factories at Meriden, Wallingford, Norwich and Waterbury, Conn., and Hamilton and Niagara Falls, Canada.

According to the complaint, the respondent features the word "Rogers" in the trade names of various brands of silver-plated ware it manufactures and sells to customers, including retail department stores and jewelry stores, and further described two of its brands, "Anchor Rogers Anchor" and "Star Rogers & Bros.

A-1," as "Original Rogers Silver-Plate" and "Genuine Rogers Silver-Plate."

These two particular brands were for many years sold to the purchasing public at \$50 for a set of 50 pieces, it is alleged, and to retail dealers at a discount of 50 per cent, but for the last two or three years, the complaint charges, the respondent has allowed retailers an additional trade discount of 40 per cent on the purchase price of the two brands. This 50 plus 40 per cent discount makes the net purchasing price to retailers \$15 a set, the complaint points out, and permits them to make a corresponding reduction in the retail price at which they resell the sets.

In connection with the sale of "Anchor" and "Star" products, International Silver Co., it is charged, furnishes retailers with booklets and price lists which describe its "half-price sales plan" and which booklets contain samples of advertising for the use of retailers in promoting the sales plan, and, according to the complaint, many retailers have made use of the suggested newspaper advertisements, which represent that sales of such sets are "half-price sales," and that the normal value and the usual and customary retail and selling price of each set is \$50, or approximately that sum. In many instances, the complaint sets forth, the respondent pays a portion of the cost of the newspaper advertising.

The complaint alleges, however, that the price the respondent represents as the customary sales price does not reflect the true customary sales price, but is fictitious and exaggerated, and further alleges that the respondent's practice of falsely advertising its products for sale at half of the represented regular retail price tends to deceive purchasers as to the quality, value, grade and price of its silver-plated ware.

Such alleged misrepresentations, it is charged, enable retailers to increase their sales of the respondent's ware, lessen the market for the products of manufacturers who honestly represent the true retail value of their silver-plated ware, and tend to divert trade to the respondent from competitors who truthfully advertise and sell their products at half-price, or who do not misrepresent the actual value of such products.

No. 2736. **Capon Water Co., Capon Springs Mineral Water, Inc., and Louis Austin,** president of and majority stockholder in both companies, located at 1712 Walnut St., **Philadelphia,** are named respondents in a complaint alleging unfair competition in the sale and distribution of a mineral water designated "Capon Springs Water." Austin also operates a branch office at Capon Springs, West Virginia.

The complaint charges that the respondents, in promoting the sale of their product, circulate booklets and leaflets which contain assertions, many made by doctors and laymen, representing that their mineral water will cure or is beneficial in the treatment of a wide variety of afflictions and diseases, including kidney, bladder and liver disorders, rheumatism, acid conditions, diabetes, and high blood pressure, when, in fact, the complaint alleges, use of the water, whether by drinking or by external application, is not a cure or a beneficial treatment for the diseases and afflictions enumerated.

No. 2738. Misbranding of the porcelain ware and china ware it sells in interstate commerce is alleged in a complaint issued against **Atlas China Co., Inc., 710 Wythe Ave., Brooklyn, N. Y.**

The complaint charges that the respondent company purchases supplies of foreign and domestic-made porcelain ware and china-ware, undecorated and known as "blanks," which it causes to be processed, decorated and branded with the words "Limoges," "French Decoration" and "Hand Painted."

Stipulations

The Commission has issued the following cease and desist orders:

No. 1630. **Strem Studios, Inc., 429 Penn Ave., Pittsburgh,** having branches in Boston, Washington, Detroit, Columbus, O., and Richmond, Va., dealer in photographic portraits, agrees to stop advertising that its work is "Photography's Latest Creation," "Distinctive Portraiture," or that its "Gold-O-Graf" photographs are made in natural colors, are oil paintings or made on motion picture film, when, in fact, according to the stipulation, the pictures are produced by application of transparent oil colors and are not oil paintings, and are not made on motion picture film. The respondent also stipulates that it will not misrepresent its prices.

Orders for "Gold-O-Graf" photographs, according to the stipulation, were obtained by salesmen, who gave purchasers coupons entitling them to the portraits at alleged reduced prices. These visits were followed up by cameramen who took the pictures and collected the balances due, forwarding the negatives to the Pittsburgh studio. Proofs were then delivered to the customers

by so-called "proof men" and additional orders solicited. The price of \$1.95 and other prices advertised as special or reduced, were in fact the regular and usual prices, according to the stipulation.

No. 1631. La Mode Garment Co., 711 West Lake St., Chicago, manufacturing women's dresses, underwear, pajamas, and uniforms for waitresses, agrees to stop using the word "Linene," simulating the word linen, implying that certain of its products are made of the fiber of the flax plant, when this is not true.

No. 1632. J. H. Smith Veneers, Inc., 433 East Erie St., Chicago, engaged in importing, processing and veneering of woods, will no longer use phrases such as "African Walnut," or "Oriental Walnut," implying that the products are made of wood derived from trees of the walnut family, when this is not true.

No. 1633. Samuel and Isadore Sobel, trading as Sobel Brothers, 150 Duane St., New York City, wholesalers of shoes, will discontinue employing the word "Doctor" or the abbreviation "Dr.," or any imitation thereof in connection with the trade name or brand for their products, in any way tending to mislead buyers into believing that the shoes are made in accordance with the design or under supervision of a doctor, or contain special orthopedic features resulting from medical advice and services, when this is not true. The stipulation says that recently the respondents caused the designation "Dr." to be changed to "De," so that certain of their trade names read "De Benedict's," "De Cushman's" and "De Bell."

No. 1634. M. Burton Arouson, Harrison & Dearborn Sts., Chicago, trading as M. Burton & Co., jobbers and wholesalers of jewelry, will cease using in printed matter the word "gold," alone or in connection with the word "solid," implying that rings so described are made wholly of gold. The stipulation provides that when initials affixed to such rings are composed in part of gold, the word "gold," if used as descriptive only of the initials, shall be conspicuously accompanied by suitable markings to clearly indicate the actual carat or fineness of the gold used, and to show that only the initials are thus described.

No. 1635. Elliott E. Goldman, 1566 Vyse Ave., Bronx, New York City, trading as The London Pipe Co., selling smoking pipes by mail order, agrees to stop using the phrase "The London Pipe Company" in any manner tending to deceive buyers into believing that the respondent is associated with The London Pipe Co., Ltd., of London, England, established in 1837. The respondent's products are not made or manufactured in London, England, or by The London Pipe Co., Ltd., of that city, according to the stipulation, but are made by a concern in the United States. The respondent also agrees to desist in advertising his products for sale "For a limited time only, \$1.00," when this price is not a special price for a limited time only.

Nos. 1636-1637. Troy Blanket Mills, of Troy, N. H., agrees, in selling its blankets and automobile robes, either directly or through a sales agency, to forego use on labels attached to its goods of the words "All Wool," implying that they are composed wholly of wool, when, according to the stipulation, they are made in part of material other than wool. The respondent sold its products branded "All Wool," through its sales agency, L. C. Chase & Co., Inc., of Sanford, Me., according to the stipulation. L. C. Chase & Co. entered into a similar stipulation with the Commission.

No. 1638. Moses B. Nierenberg, 43 West 33rd St., New York City, trading as Dundee Knitting Co., manufacturing knitted outerwear, consisting of sweater coats, ribbed coats, bathing suits and other articles, will cease using the words "Jersey City, N. J.," and "Newark, N. J.," in connection with the word "Mills," implying that the respondent has a factory in either of these cities, when this is not true. The stipulation points out that the respondent's products are made in Brooklyn.

No. 1639. Trading as The Church Merchant Laboratories, 1619 North Bailey St., Philadelphia, Eddie Adair and Cornelius Henney, co-partners, selling a product called "Lady-Luck," agree to discontinue representing that use of this article will prevent runs, snags and breaks in hosiery, rayons, silk, chiffon and lingerie, or that its use makes the fabrics treated therewith proof against all spot-producing materials or makes the colors fast. The respondents agree to ban use of the word "Laboratories" as part of their trade name, when, in fact, they do not own, control or operate a laboratory.

No. 1640. Dextora Company, 600 North White River Parkway, Indianapolis, manufacturing malt and health food products, agrees not to employ on labels or other advertisements, the words "Malt Syrup," to designate products not made entirely from malted barley. The respondent also will discontinue describing a product not composed wholly of barley malt flavored with

hops, by means of the following assertions: "100% Pure," "Unadulterated," "Made from selected barley malt and choicest Oregon hops," and "Wizard Malt Syrup is a concentrated extract of pure barley malt flavored from the juice of the choicest selected Oregon hops." The expression "Triple Strength" will not be employed in representing malt products not of triple strength.

No. 2116. The Goodyear Tire and Rubber Company, of Akron, Ohio, its subsidiaries and their officers, agents, etc., are directed to cease and desist from discriminating in price between Sears, Roebuck & Co., and the respondent Goodyear's retail dealer customers by selling automobile tires to the said Sears, Roebuck & Co. at net realized prices which are lower than the net realized prices at which the said respondent sells the same sizes of tires of comparable grade and quality to individual tire dealers or other purchasers.

In arriving at the said net realized prices, the order requires the respondent to "take into account and make due allowance, and only due allowance, for differences in the cost of transportation and selling tires to individual tire dealers on the one hand and Sears, Roebuck & Co. on the other." The order concludes by stating that nothing therein "shall restrict the respondent's liberty to remove the discrimination either by increasing its price to Sears, Roebuck & Co., or by lowering its price to its other customers."

No. 2474. United Distilling Co., 216 East Pearl St., Cincinnati, has been ordered to discontinue representing that it is a distiller of the whiskies, gins and other spirituous beverages it sells in interstate commerce.

Under the order, the respondent is directed to cease and desist from representing, through use of its corporate name on stationery, in advertising, on labels of bottles, or in any other way, that its beverages are manufactured through the process of distillation, or that it owns or operates a plant where such beverages are distilled, until it actually does own and operate a plant for such purposes.

No. 2682. Sessions Clock Co., Forestville, Conn., has been ordered to discontinue certain unfair methods of competition in the sale of its products.

The company is directed to stop representing directly or by implication in catalogues, advertising matter, or on labels, that the cases of clocks made and sold by it are mahogany, when not made from wood derived from trees of the mahogany family.

FEDERAL COMMUNICATIONS COMMISSION ACTION

HEARING CALENDAR

Monday, March 16

HEARING BEFORE AN EXAMINER (Broadcast)

WSMB—WSMB, Inc., New Orleans, La.—Renewal of license, 1320 kc., 500 watts, 1 KW LS, unlimited time.

Tuesday, March 17

HEARING BEFORE AN EXAMINER (Broadcast)

WAIM—Wilton H. Hall, Anderson, S. C.—C. P., 590 kc., 250 watts, 1 KW LS, unlimited time. Present assignment: 1200 kc., 100 watts, unlimited time.

WDBO—Orlando Broadcasting Co., Inc., Orlando, Fla.—Modification of license, 580 kc., 1 KW, unlimited time. Present assignment: 580 kc., 250 watts, unlimited time.

Wednesday, March 18

HEARING BEFORE AN EXAMINER (Broadcast)

WHBI—May Radio Broadcast Corp., Newark, N. J.—Modification of license, 1250 kc., 1 KW, 5 KW LS, share with WNEW. Present assignment: 1250 kc., 1 KW, 2½ KW LS, shares with WNEW.

NEW—Carl S. Taylor, Dubois, Pa.—C. P., 780 kc., 250 watts, daytime.

Thursday, March 19

HEARING BEFORE AN EXAMINER (Broadcast)

NEW—Eugene DeBogory, tr/as Dallas Radio Research Engineers, Dallas, Tex.—C. P., 1570 kc., 1 KW, unlimited time.

NEW—Gulf Coast Broadcasting Co., Corpus Christi, Tex.—C. P., 1330 kc., 250 watts, 500 watts LS, unlimited time.

ORAL ARGUMENT BEFORE THE BROADCAST DIVISION

Examiner's Report No. I-159:

NEW—Robert E. Cole, d/b as Washington Broadcasting Co., Washington, Pa.—C. P., 1330 kc., 250 watts LS, daytime (facilities of WNBO).

Examiner's Report No. I-160:

WADC—Allen T. Simmons, Tallmadge, Ohio.—C. P., 1320 kc., 1 KW, 5 KW LS, unlimited time. Present assignment: 1320 kc., 1 KW, 2½ KW LS, unlimited time.

Examiner's Report No. I-150

NEW—Clark Standiford, Visalia, Calif.—C. P., 1310 kc., 100 watts, unlimited time.

Examiner's Report No. I-96:

NEW—Charles C. Theis, Wichita, Kans.—C. P., 1210 kc., 100 watts, unlimited time.

APPLICATIONS GRANTED

WDBJ—Times-World Corp., Roanoke, Va.—Granted C. P. to install new equipment, increase day power from 1 to 5 KW, move transmitter and studio locally in Roanoke.

WIOD-WMBF—Isle of Dreams Broadcasting Corp., Miami, Fla.—Granted C. P. to install new equipment.

WRJN—Racine Broadcasting Corp., Racine, Wis.—Granted modification of C. P. covering changes in equipment, approval of antenna and transmitter site from Racine to Mt. Pleasant, Wis.

KBIX—Oklahoma Press Pub. Co., Muskogee, Okla.—Granted modification of C. P. approving transmitter site and studio in Muskogee, and proposed antenna system.

KWBG—W. B. Greenwald, Hutchinson, Kans.—Granted consent to voluntary assignment of license to The Nation's Center Broadcasting Co., Inc.

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Granted C. P. to make changes in equipment.

WHBL—Press Publishing Co., Sheboygan, Wis.—Granted C. P. to move station locally and make changes in equipment and antenna system.

KYA—Pacific Broadcasting Corp., San Francisco, Calif.—Granted consent to voluntary assignment of license to Hearst Radio, Inc.

NEW—Ben S. McGlashan, Portable-Mobile and aboard Aircraft NC-351Y (Los Angeles).—Granted C. P. for general experimental broadcast pickup service, frequencies 31100, 34600, 37600 and 40600 kc., 10 watts.

NEW—Miss. Valley Broadcasting Co., Inc., Portable-Mobile, East St. Louis, Ill.—Granted C. P. for general experimental broadcast pickup service, frequencies 31100, 34600, 37600 and 40600 kc., 5 watts.

NEW—Atlantic Broadcasting Corp., Portable-Mobile, New York City.—Granted C. P. for general experimental broadcast pickup service, frequencies 31100, 34600, 37600, 40600, 86000-400000, 401000 and above, 50 watts.

NEW—Nichols & Warinner, Inc., Portable-Mobile, Long Beach, Calif.—Granted C. P., general experimental broadcast pickup service, frequencies 3100, 34600, 37600 and 40600 kc., 2 watts.

NEW—WBNS, Inc., Portable, Columbus, Ohio.—Granted C. P. for broadcast pickup station in temporary service, frequencies 1646, 2090, 2190 and 2830 kc., 20 watts.

NEW—Voice of Longview, Texas, Portable-Mobile.—Granted C. P., broadcast pickup, temporary service, frequencies 1622, 2060, 2150 and 2790 kc., 40 watts.

SET FOR HEARING

NEW—Donald A. Wike and H. E. Studebaker, d/b as Wike and Studebaker, Baker, Ore.—Application for C. P. for new station, 1370 kc., 100 watts night, 250 watts day, unlimited time, site to be determined.

KLO—Interstate Broadcasting Corp., Ogden, Utah.—C. P., already in hearing docket, amended to read: Make changes in equipment; move transmitter to 3 miles southwest of center of Kaysville, on Lake Shore near Kaysville, Utah; install directional antenna; increase power from 500 watts night and

day to 1 KW night, 5 KW day; extend commencement date to within 15 days after grant and completion date to within 60 days thereafter.

KWBG—The Nation's Center Broadcasting Co., Inc., Hutchinson, Kans.—Application for C. P. to install new equipment; move transmitter locally, approximately 3 miles; change frequency from 1420 kc. to 1120 kc.; increase power from 100 watts to 1 KW.

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Application for C. P. to make changes in equipment; install approved antenna system; increase night and day power from 100 to 500 watts, hours of operation from unlimited to specified hours, requesting facilities of WGCM.

WJAC—WJAC, Inc., Johnstown, Pa.—Application for C. P. to make changes in equipment; increase day power from 100 watts to 250 watts; move transmitter site locally.

WRDW—Augusta Broadcasting Co., Augusta, Ga.—Application for C. P. to make changes in equipment; move transmitter from Augusta, Ga., to Satcher Estate, on edge of the city, North Augusta, S. C.; increase power from 100 watts night and day to 250 watts night, 500 watts day; change frequency from 1500 kc. to 1240 kc.

NEW—Foreign Lands Corp., Honolulu, T. H.—Application for C. P. for new station, 600 kc., 1 KW, unlimited time, site to be determined.

NEW—The Brockway Co., Watertown, N. Y.—Application for C. P. for new station, 1270 kc., 250 watts, daytime, site to be determined.

NEW—Black Hawk Broadcasting Co., Waterloo, Iowa.—Application for C. P. for new station, 1370 kc., 100 watts, unlimited time, site to be determined.

NEW—WKY Radiophone Co., Oklahoma City, Okla.—Application for C. P. for new experimental relay station, frequencies 6020, 9510, 11810, 15170, 17760, 21480 kc., 5 KW night and day.

NEW—The Farmers & Bankers Life Ins. Co., Wichita, Kans.—Application for C. P. for new station, 1210 kc., 100 watts, unlimited time.

NEW—Frank M. Dunham, Fort Dodge, Iowa.—Application for C. P. for new station, 1210 kc., 100 watts, unlimited.

NEW—Theodore E. Johnson, Houston, Tex.—Application for C. P. for new station, 1210 kc., 100 watts, unlimited.

KGMB—Honolulu Broadcasting Co., Ltd., Honolulu, T. H.—Consent to the transfer of control of the Honolulu Broadcasting Co., Ltd. (a Hawaiian corporation, licensee of station KGMB and permittee station KHBC), to the Pacific Theatres & Supply Co., Ltd. (also a Hawaiian corporation).

NEW—Winona Radio Service, a partnership, Winona, Minn.—Application for C. P. for new station, transmitter and studio site to be determined with Commission's approval; 1200 kc., 100 watts, unlimited.

NEW—Earl Weir, St. Petersburg, Fla.—Application for C. P. for new station, 1370 kc., 100 watts, unlimited.

ORAL ARGUMENTS GRANTED

NEW—Ex. Rep. No. 1-189: Golden Empire Broadcasting Co., Sacramento, Calif.—Oral argument granted to be held April 30, 1936.

NEW—Royal Miller, Sacramento, Calif.—Oral argument granted to be held April 30, 1936.

WTFI—Ex. Rep. No. 1-195: Liberty Broadcasting Co., Athens, Ga.—Oral argument granted to be held April 16, 1936.

NEW—Ex. Rep. No. 1-196: V. H. Lake and H. E. Stanford, L & S Broadcasting Co., Atlanta, Ga.—Oral argument granted to be held April 16, 1936.

ACTION ON EXAMINERS' REPORTS

KID—Ex. Rep. No. 1-143: KID Broadcasting Co., Inc., Idaho Falls, Idaho.—Granted C. P. to move transmitter, and increase power from 250 watts night, 500 watts day, to 500 watts night, 1 KW day; 1320 kc., unlimited time. Examiner R. L. Walker sustained in part. Order effective May 19, 1936.

NEW—Ex. Rep. No. 1-146: William S. Thellman, New Castle, Pa.—Denied C. P. for new station to operate on 1420 kc., 100 watts, daytime. Examiner M. H. Dalberg sustained. Order effective May 26, 1936.

NEW—Ex. Rep. No. 1-178: E. L. Clifford, Pottsville, Pa.—Denied C. P. for new broadcast station to operate on 580 kc., 250 watts, daytime. Examiner M. H. Dalberg sustained. Order effective May 26, 1936.

- WJAS—Ex. Rep. No. 1-190: Pittsburgh Radio Supply House, Pittsburgh, Pa.—Granted modification of C. P. to increase day power from 2½ KW to 5 KW, 1290 kc.; 1 KW night, 5 KW day, unlimited time. Examiner R. L. Walker sustained. Order effective May 19, 1936.
- NEW—Ex. Rep. No. 1-194: Geo. E. Carter, Homer G. Wolfe and Clara I. Knight, d/b as Carter & Wolfe, Mansfield, Ohio.—Denied C. P. for new broadcast station to operate on 1370 kc., 50 watts night, 100 watts day, unlimited time (site to be determined). Examiner R. L. Walker sustained. Order effective May 19, 1936.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KDYL, Salt Lake City; KFBB, Great Falls, Mont.; KFIO, Spokane, Wash.; KFKU, Lawrence, Kans.; KFOX, Long Beach, Calif.; KFSG and auxiliary, Los Angeles; KGCA, Decorah, Iowa; KGGF, Coffeyville, Kans.; KGH, Billings, Mont.; KHSL, Chico, Calif.; KLCN, Blytheville, Ark.; KOIN, Portland, Ore.; KOL, Seattle, Wash.; KPAC, Port Arthur, Tex.; KQW, San Jose, Calif.; KRGV, Weslaco, Tex.; KRKD and auxiliary, Los Angeles; KROW, Oakland, Calif.; KRSC, Seattle, Wash.; KWLC, Decorah, Iowa; WBRC, Birmingham, Ala.; WCAD, Canton, N. Y.; WCAL, Northfield, Minn.; WCSH, Portland, Maine; WDAE, Tampa, Fla.; WDEL, Wilmington, Del.; WDOD, Chattanooga, Tenn.; WDSU, New Orleans, La.; WPBM, Indianapolis, Ind.; WHA, Madison, Wis.; WIS, Columbia, S. C.; WKAQ, San Juan, P. R.; WLB, Minneapolis, Minn.; WMAC, Boston, Mass.; WNBZ, Saranac Lake, N. Y.; WORC, Worcester, Mass.; WREN, Lawrence, Kans.; WRR, Dallas, Tex.; WTAW, College Station, Tex.; WTCN, Minneapolis, Minn.; WXYZ, Detroit, Mich.

MISCELLANEOUS

- KXL—KXL Broadcasters, Portland, Ore.—Granted order to take depositions in re application for renewal of license.
- WBNX—Standard Cahill Co., Inc., New York City.—Granted oral argument on April 16, 1936, on application for C. P. to install new equipment, move transmitter, and increase power from 250 watts to 1 KW.
- NEW—Plain Dealer Pub. Co., and Monroe F. Rubin and Ruth Rubin.—Denied petition requesting Broadcast Division to hear application for transfer of control of WHK and WJAY to the U. B. Company instead of to an examiner.
- WHBI—May Radio Broadcast Corp., Newark, N. J.—Granted continuance of hearing, set for March 18, 1936, on application for increased daytime power from 2½ to 5 KW.
- WAAW—Omaha Grain Exchange, Omaha, Nebr.—Denied motion to reconsider and grant application to assign license to Nebraska Broadcasting Co. Case to proceed to hearing as heretofore ordered.
- L & S Broadcasting Co., Atlanta, Ga.—Granted request that oral argument on its application for a C. P. to erect new radio station at Atlanta be consolidated with oral argument on application of WFTI to move station from Athens to Atlanta.
- KDYL—Intermountain Broadcasting Corp., Salt Lake City.—Suspended grant made February 13 to install new equipment, to make local move, and increase day power to 5 KW, and set application for hearing on protest of KLO, Ogden, Utah.
- Metro Broadcasting Co., Los Angeles, Calif.—Remanded to docket for purpose of receiving certain documentary evidence and for taking further testimony.
- G. D. Goff, Tampa, Fla.—Granted oral argument, before Broadcast Division on March 26, 1936, on application for C. P. to erect new radio station at Tampa to operate on 1500 kc., 100 watts, unlimited.
- Dorrence D. Roderick, El Paso, Tex.—In this case concerning the application for C. P. for new station to operate on 1500 kc., 100 watts, unlimited time, the Broadcast Division, upon its own motion, reconsidered its action of February 21, 1936, in granting the application and designated the same for hearing. (Action taken March 3, 1936.)

APPLICATIONS DISMISSED

The following applications, heretofore set for hearing, were dismissed at request of applicants:

- NEW—Springfield Newspapers, Inc., Springfield, Mo.—Applied for C. P., 790 kc., 1 KW, daytime.
- NEW—Voice of Black Hills, Rapid City, S. Dak.—Applied for C. P. for new station, 1200 kc., 100 watts, specified hours.

- WWRL—Long Island Broadcasting Corp., Woodside, L. I., N. Y.—Applied for modification of license, 1500 kc., 100 watts, 250 watts LS, specified hours (to change specified hours).
- KFOX—Nichols & Warinner, Inc., Long Beach, Calif.—Applied for voluntary assignment of license, 1250 kc., 1 KW, unlimited.
- WEST—Associated Broadcasters, Inc., Easton, Pa.—Applied for modification of C. P., 1200 kc., 100 watts, 250 watts LS, unlimited day, shares WKBO night.
- NEW—R. C. Coshorn and Lester E. Cox, d/b as Capitol Broadcasting Co., Jefferson City, Mo.—Applied for C. P., 920 kc., 500 watts, daytime.

APPLICATION DENIED

The Ohio Broadcasting Co., Canton, Ohio.—Denied special temporary authority to operate station WHBC pending action on application for assignment of license and C. P. from Edward P. Graham to the Ohio Broadcasting Co., but for a period not to exceed 30 days.

APPLICATIONS RECEIVED

First Zone

- WMCA—Knickerbocker Broadcasting Co., Inc., New York, N. Y.—570 Modification of license to increase power from 500 watts to 1 KW day and night.
- WHN—Marcus Loew Booking Agency, New York, N. Y.—License 1010 to cover construction permit (B1-P-336) for changes in equipment and increase in day power.
- WHN—Marcus Loew Booking Agency, New York, N. Y.—License 1010 to use old W.E. 304-A (1-KW) transmitter as an auxiliary transmitter.
- WHN—Marcus Loew Booking Agency, New York, N. Y.—Authority 1010 to determine operating power by direct measurement of antenna.
- WEVD—Debs Memorial Radio Fund, Inc., New York, N. Y.—1300 Modification of license to change frequency from 1300 kc. to 1400 kc. and hours of operation from share-WBBR, WFAB and WHAZ to unlimited time, facilities of WBBC, WLTH, WARD and WVFW. Amended to install directional antenna.
- WBNY—Roy L. Albertson, Buffalo, N. Y.—License to cover construction permit (B1-P-402) as modified for new station to be operated on 1370 kc., 100 watts, 250 watts day, all hours except those assigned to WSVS.
- WILH—Merrimac Broadcasting Co., Inc., Lowell, Mass.—Special 1370 experimental authorization for a "satellite" station to be operated on 1370 kc., 10 to 100 watts day and night, unlimited time, site to be determined, Lawrence, Mass., to be operated in addition to WLLH in Lowell, Mass., and synchronously with WLLH, for period to 7-1-36.
- WBBC—Brooklyn Broadcasting Corp., Brooklyn, N. Y.—Modification 1400 of license to change hours of operation from share-WLTH, WCGU and WFOX to share-WITH. Requests facilities of WARD and WFOX. Amended to change hours of operation from share-WLTH to unlimited time. Requests facilities of WARD, WLTH and WVFW.
- WHEC—WHEC, Inc., Rochester, N. Y.—Modification of construction 1430 permit (B1-P-819) for new equipment and move of transmitter to further request move of transmitter from 183 Main Street, E. Rochester, N. Y., to Mt. Read Blvd., ½ mile north of Lyell Avenue, Rochester, N. Y., and antenna changes. Also extend commencement and completion dates 60 days and 6 months, respectively.
- NEW—The Ogdensburg Publishing Co., Inc., Ogdensburg, N. Y.—1500 Construction permit for a new station to be operated on 1500 kc., 100 watts, unlimited time.

Second Zone

- NEW—W. H. Marolf, Escanaba, Mich.—Construction permit for 1500 a new station to be operated on 1500 kc., 100 watts, unlimited time.

Third Zone

- NEW—J. R. Maddox and Dr. W. B. Hair, d/b as Chattanooga 590 Broadcasting Co., Chattanooga, Tenn.—Construction permit for a new station to be operated on 590 kc., 1 KW, unlimited time. Amended to make changes in directional antenna.
- WKY—WKY Radiophone Co., Oklahoma City, Okla.—Construction 900 permit to install new equipment; increase power from 1 KW to 5 KW; move transmitter from West 39th Street

(highway 8 miles west of), Oklahoma City, Okla., to site to be determined, near Oklahoma City, Okla. Amended to make antenna changes, change power from 1 KW to 1 KW, 5 KW day, and omit request for move of transmitter.

NEW—Bayou Broadcasting Co., Houston, Tex.—Construction permit for a new station to be operated on 1200 kc., 100 watts, unlimited time.

WFBC—Greenville News-Piedmont Co., Greenville, S. C.—License 1300 to cover construction permit (B3-P-220) as modified to install new equipment, increase power, and move transmitter.

W4XH—Virgil V. Evans, d/b as The Voice of South Carolina, Spartanburg, S. C.—Modification of license to include frequencies 31600, 35600, 38600 and 41000 kc., and increase power to 50 watts.

Fourth Zone

NEW—Glenn Van Auken, Indianapolis, Ind.—Construction permit 1050 for a new station to be operated on 600 kc., 1 KW, daytime. Amended to change frequency from 600 kc. to 1050 kc.

NEW—Fred A. Baxter, Superior, Wis.—Construction permit for a new station to be operated on 1370 kc., 100 watts, unlimited time. Amended to change frequency from 1370 kc. to 1200 kc.

WCRW—Clinton R. White, Chicago, Ill.—Modification of license 1210 to change specified hours.

NEW—Tribune Printing Co., Jefferson City, Mo.—Construction 1310 permit for a new station to be operated on 1310 kc., 100 watts, daytime.

KGFV—Central Nebraska Broadcasting Corp., Kearney, Nebr.—1310 Consent to transfer control of corporation from Anna H. McConnell and Hugh R. Brown to Clark Standiford and Kate S. Fisher, 548 shares of common stock.

NEW—Stanley Reid and Charles Withnell Boegel, Jr., d/b as The 1310 Rapids Broadcast Co., Cedar Rapids, Iowa.—Construction permit for a new station to be operated on 1310 kc., 100 watts, unlimited time. Amended to add to name, d/b as The Rapids Broadcast Co.

NEW—Albert Lea Broadcasting Corp., Albert Lea, Minn.—Construction 1370 permit for a new station to be operated on 1370 kc., 100 watts, unlimited time. Amended to change frequency to 1200 kc.

NEW—Albert Lea Broadcasting Corp., Albert Lea, Minn.—Construction 1370 permit for a new station to be operated on 1200 kc., 100 watts, unlimited time. Amended to change frequency from 1200 kc. to 1370 kc.

WIBC—Donald A. Burton, Muncie, Ind.—Modification of construction permit (B4-P-248) for equipment changes and in-

crease in power, to further request changes in transmitting equipment and antenna.

W9XHC—Kansas State College of Agriculture and Applied Science, Portable-Mobile.—License to cover construction permit for a new general experimental station.

Fifth Zone

KFKA—The Mid-Western Radio Corp., Greeley, Colo.—Modification of license to increase power from 500 watts, 1 KW day, to 1 KW night and day.

KFBB—Buttrety Broadcast, Inc., Great Falls, Mont.—Construction 900 permit to make changes in equipment; increase power from 1 KW, 2½ KW day, to 1 KW, 5 KW day; change frequency from 1280 kc. to 900 kc.; and move transmitter from 5 miles south of town on 13th St., Great Falls, Mont., to site to be determined, south of Great Falls, Great Falls, Mont. Requests facilities of KSEI and suggests that KSEI be assigned 1280 kc.

NEW—W. C. Miner, Rock Springs, Wyo.—Construction permit 1310 for a new station to be operated on 950 kc., 500 watts, limited time. Amended to change frequency from 950 kc. to 1310 kc., power from 500 watts to 100 watts, hours of operation from limited to daytime, giving studio site as 600 block Dewar Drive, Rock Springs, Wyo., and transmitter site as South West, below town, Rock Springs, Wyo.

NEW—H. L. Corley, Trinidad, Colo.—Construction permit for a 1370 new station to be operated on 1370 kc., 100 watts, unlimited time.

KVOE—The Voice of The Orange Empire, Inc., Ltd., Santa Ana, 1500 Calif.—Consent to transfer control of corporation from Estate of J. S. Edwards, deceased, to J. S. Edwards, Inc., 300 shares common stock.

NEW—Ellwood W. Lippincott, Pendleton, Ore.—Construction permit 1500 for a new station to be operated on 1500 kc., 100 watts, daytime. Amended to change hours of operation from daytime to unlimited, using 100 watts.

NEW—J. W. Plame, Huntington Park, Calif.—Construction permit 1500 for a new station to be operated on 850 kc., 100 watts, unlimited time. Requests frequency of KIEV. Amended to change frequency from 850 kc. to 1500 kc., omit request for KIEV's frequency and request frequency of KVOE, give studio site as 6221 Pacific Blvd, Huntington Park, Calif.

KABF—James McClatchy Co., Portable.—License to cover construction permit for a new broadcast pickup station.

W6XKF—Ben S. McGlashan, Portable-Mobile.—License to cover construction permit for a new general experimental station.

DUFFY BILL HEARINGS

Hearings on the Duffy Copyright Bill S. 3047 before the House Patents Committee continue. The NAB appeared before the Committee Tuesday (17) and had not completed its testimony when this Report went to press. A report covering testimony offered in support of the Bill will be furnished for the information of members.

WARNER BROTHERS LICENSES

The Managing Director next week will confer with Herman Starr of Warner Brothers with reference to the expiration of the MPHC licenses March 31st.

Delayed by hearings on the Duffy Copyright Bill in personally participating in earlier negotiations Mr. Baldwin requested an Advisory Committee consisting of H. K. Carpenter, Walter Damm, John Gillin, Jr., broadcasters, and Philip G. Loucks, attorney, to confer with Mr. Starr last week. This Committee reported that Warner Brothers have been unable so far, from data submitted to stations, to arrive at any basis upon which to predicate a per-piece plan of licensing stations on and after April 1, 1936. Mr. Starr advised the Committee that the present method (based on the highest quarter hour rate) was not working out satisfactorily, since a number of inequalities had been discovered as a result of the practice of many stations publishing national or general rates much higher than those at which time is generally sold. The basis for future licenses, Mr. Starr said, should be the local or retail quarter-hour rate which might result in a higher multiplier being applied.

Mr. Starr also advised the Committee that pending the receipt of complete local or retail rate information on NAB stations from the Association it would be impossible to commit Warner Brothers to any material change in the present method of figuring station license fees.

Regarding per-piece, Mr. Starr advised the Committee that as long as stations bought a large amount of music on the flat fee system Warner Brothers would never consent to a per-piece plan which did not include a minimum guarantee, or minimum use which would yield a total amount commensurate with their estimate of the value of Warner Brothers catalogues.

In the event he is unable to establish a revised basis for licensing, before April 1, Mr. Starr said he would offer stations an extension of probably one month, on the terms now in force.

In a telephone conversation with Mr. Starr since the Advisory Committee made their report the Managing Director was informed that the Warner Brothers had no intention whatever of returning to the ASCAP.

The Managing Director is endeavoring to furnish complete information to Warner Brothers with respect to local or retail rates

and will pursue the negotiations to determine the best terms available after April 1.

RECOMMENDS NEW ILLINOIS STATION

Champaign News-Gazette, Inc., filed an application with the Federal Communications Commission asking for a construction permit for a new broadcasting station to be located at Champaign, Ill., to use 1370 kilocycles, 100 watts power and unlimited time.

Examiner George H. Hill in Report No. I-207 recommends that the application be granted in part, "authorizing the applicant to operate said station during daytime hours only, and that the request for nighttime hours of operation be denied."

The Examiner states that granting the application for daytime hours would not cause any interference but nighttime hours would cause objectionable interference. "There is a need in the Champaign area for the services of a radio station broadcasting local programs, and there is adequate local talent in the area to supply the needs of such a station."

BROOKLYN CASES AGAIN POSTPONED

The Federal Communications Commission has announced that hearings in the so-called Brooklyn cases has been postponed until May 7. There have been several changes in the program for hearing these cases.

INCREASE POWER RECOMMENDED FOR KVSO

Broadcasting Station KVSO, Ardmore, Okla., has filed an application with the Federal Communications Commission asking that its power be increased from 100 watts to 100 watts and 250 watts L.S. Also that its hours of operation be increased from daytime to unlimited. The station now operates on a frequency of 1210 kilocycles and no change is asked.

Examiner R. H. Hyde, in Report No. I-206, recommends that the power increase be granted but that the increase in hours of operation be denied. The Examiner found that there is need in the Ardmore area for such improvement as would be made by increasing the station's power and this would not increase interference. It was found, however, that operation of the station during the nighttime hours would cause objectionable interference.

SIGN WITH WARNERS

The following broadcasting stations have signed Warner Brothers contracts in addition to those already announced: WAGM, WCBM, WSIX, KROW, KPDN, KMTR, WGPC, WRBL, and WATL.

ADS NOT TAXABLE BY STATES

National advertising is interstate commerce and is not subject to a state sales tax, State District Judge M. A. Otero, Jr., ruled in a decision given at Santa Fe, New Mexico, February 15.

The decision came as the result of a suit filed by Western Live Stock, a monthly live stock magazine published at Albuquerque, against the New Mexico Bureau of Revenue. Attorney General Frank Patton filed notice of appeal to the State Supreme Court.

Although Western Live Stock was the only publication appearing in the suit, several daily and weekly newspapers were supporting the suit financially, and only the day before the decision the New Mexico Press Association had officially endorsed the stand taken by the magazine and had assessed members of the organization for funds with which to carry on the contest.

The tax is generally regarded as a sales tax, although it was enacted as an excise tax for support of the state's schools. Several publications have contended that the state has in effect recognized it as a sales tax by issuing tax tokens, which are given in

exchange by consumers for the amount of tax on purchases. Retail establishments have thus been able to pass the tax on to consumers. Newspapers have collected from local and state advertisers the amount of the tax, but have had to absorb the tax on national advertising. Many of the state's publishers have paid the latter under protest, some contending that it was not only unconstitutional but that it amounted to a tax on gross income.

DENIAL RECOMMENDED FOR POWER INCREASE

Broadcasting Station WEAN, Providence, R. I., applied to the Federal Communications Commission for a power increase from 500 to 100 watts, that it be allowed to move its transmitter, and asked for authority to install new equipment. It operates on a frequency of 780 kilocycles.

Examiner John P. Bramhall in Report No. I-205 has recommended that the application be denied. The Examiner found that the area proposed to be served by the changed location is already receiving ample radio service and some slight interference might be caused.

NEW ALABAMA STATION RECOMMENDED

James R. Doss, Jr., applied to the Federal Communications Commission for a construction permit for a new broadcasting station to be located at Tuscaloosa, Ala., using 1200 kilocycles, 100 watts power and daytime operation only.

Examiner John P. Bramhall in Report No. I-208 recommended that the application be granted. The Examiner states that there is need for additional daytime service in the area proposed to be served and that therefore granting of the application would be in the public interest.

RECOMMENDS NEW CALIFORNIA STATION

The Valley Electric Company filed an application with the Federal Communications Commission asking for a construction permit for a new station to be located at San Luis Obispo, Cal., to use 1200 kilocycles, 250 watts power and daytime operation. Also the E. E. Long Piano Company filed an application with the Commission asking for a construction permit for the same place to use the same frequency with 100 watts power and unlimited time.

Examiner George H. Hill in Report No. I-204 recommended that the application of the Valley Electric Company be granted and that of the E. E. Long Piano Company be denied. He found that there is need for local broadcasting at San Luis Obispo and that granting of the application of the electric company for daytime service would not cause any objectionable interference with any existing or proposed station. On the other hand the Examiner found that granting of the piano company's application would cause nighttime interference to the service area of Station KGFJ, Los Angeles. He therefore recommends that the application of the electric company be granted and the piano company be denied.

MORE WARNER BROTHERS SUITS

Official announcement has been made by Warner Brothers that they have begun additional suits against radio stations, hotels, night clubs and restaurants based on alleged infringement of song copyrights owned by them.

The twenty-one latest suits filed include seventeen against radio stations KSCJ, KTRH, WHAS, KVOR, WBRC, WALA, KLRA, WSBT, WREC, WCAO, WBT, KWKH, WQAM, WFBL, WSJS, WWL and WJR for the alleged infringement on January 23rd of "That Old Fashioned Mother of Mine." The suits are being brought by Harms, Inc., publishers of the song, and damages of \$5,000 are being sought from each of the seventeen stations.

Harms is also seeking \$5,000 damages from Station KWKH for alleged infringement on February 17th of the song entitled "Three Little Words." Remick Music Corp., another Warner music publishing subsidiary, is bringing suit against Station WOCL, Jamestown, N. Y., for the alleged infringement on February 26th of "Whistle and Blow Your Blues Away," demanding \$250 damages therefor. M. Witmark & Sons is also bringing suit against WOCL for the alleged infringement of "The Words Are In My Heart" on February 26th, for which also \$250 damages are sought. Witmarks have also filed an action against WSOC, Charlotte, N. C., for the alleged infringement on February 23rd of Victor Herbert's "Gypsy Love Song." Damages of \$250 are sought from WSOC.

Actions have also been filed in the following cases:

Harms, Inc., vs. 34th St. Hotel Corporation (Hotel McAlpin) on the number "Sleepy Valley."

Harms, Inc. vs. Realty Hotels, Inc. (Hotel Biltmore) on the numbers "April in Paris," "The Continental," "Blow Gabriel Blow," "Why Shouldn't I" and "The Blue Room."

Harms, Inc. vs. 870 Seventh Ave. Corp. (Hotel Park Central) on the numbers "Why Shouldn't I," "Dancing in the Dark" and "I Get A Kick Out of You."

Harms, Inc. vs. Milnag Leasing Corp. (Hotel Edison) on the songs "I Get A Kick Out of You" and "Anything Goes."

Harms, Inc. vs. MacFayne Corp. (Leon & Eddie's) on the song "Where Am I?"

Harms, Inc. vs. The Famous Door on the song "Why Shouldn't I?"

M. Witmark & Sons vs. 151 East 50th Street Restaurant Corp. on the song "When Irish Eyes Are Smiling."

Remick Music Corp. vs. Hotel St. George Corp. on the song "Chinatown My Chinatown."

Remick Music Corp. vs. Connie's Management Corp. (Connie's Inn) on the song "Nagasaki."

Remick Music Corp. vs. Chin Restaurant Corp. (Chin's Chinese Restaurant) on the song "Sweet Georgia Brown."

An injunction and \$250 damages, plus an accounting of profits, are sought on each song.

1. Harms, Inc. vs. 58-59 Realty Corporation (Hotel Essex House) for the use of the song "Suddenly."

2. Harms, Inc. vs. Hotel Astor, Inc. for the use of the song "The Blue Room."

3. Harms, Inc. vs. Roosevelt Hotel, Inc., for the use of the songs "Dancing in the Dark" and "Night and Day."

4. Harms, Inc. vs. Childs Company, Inc., for the use of the song "Where Am I?"

5. Harms, Inc. vs. New York Ambassador, Inc. (Ambassador Hotel) for the use of the songs "The Continental," "Night and Day" and "Begin the Beguine."

In all of the restaurant and hotel actions damages of \$250 for the alleged infringing use of each song and an accounting of the profits are demanded.

In addition to the suits filed against hotels and restaurants, Remick Music Corp., M. Witmark & Sons and Harms, all Warner music subsidiaries, have filed through correspondent attorneys the following suits:

Harms, Inc. vs. Central Texas Broadcasting Co., operating Station WACO; Harms, Inc. vs. Wichita Falls Broadcasting Co., operating Station KGKO; Harms, Inc. vs. WDOB Broadcasting Corp., operating Station WDOB; and Harms, Inc. vs. Savannah Broadcasting Corp., operating Station WTOG, all of whom are alleged to have infringed on the song "That Old Fashioned Mother of Mine" and from each of whom \$5,000 damages are demanded.

Remick Music Corp. vs. May Radio Broadcasting Corp., operating Station WHBI, for the alleged infringement of "Kentucky Days," for which \$250 damages are demanded.

M. Witmark & Sons vs. WWL Development Company, Inc., operating Station WWL, for the alleged infringement of "Let's Have Breakfast in Bed," for which \$5,000 damages are demanded.

Harms, Inc. vs. Charles C. Carlson, operating Station WJBW, demanding \$1,750 damages for the alleged infringement of "Three Little Words," "Let's Put Out The Lights," "I'm One of God's Children," and "Lost My Rhythm, Lost My Music, Lost My Man."

Harms, Inc. vs. WWL Development Company, Inc., operating Station WWL, for the alleged infringement of "Let's Put Out The Lights," for which \$5,000 damages are demanded.

Remick Music Corp. vs. Main Auto Supply Co., operating Station WOWO, for the alleged infringement of "It Had To Be You," "The Japanese Sandman" and "Breezin' Along With The Breeze," for which \$15,000 damages are demanded.

Harms, Inc. vs. W. D. S. U., Inc., operating Station WDSU, for four alleged infringements of "I'm Just An Ordinary Human," for which \$5,000 damages are demanded.

Harms, Inc. vs. Adelphia Hotel Co., Philadelphia, operating Cafe Marguery, for the alleged infringements of "The Girl Friend" and "Night and Day," for each of which \$250 damages are demanded.

NEW QUOTA FACILITIES ASSIGNED

The Federal Communications Commission has announced the following quota facilities due and assigned to broadcast stations as of March 14.

First Zone—Night

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2737. A complaint alleging unfair competition in connection with the sale of paint, varnish, enamel and allied products, has been issued against **Davis Paint Co., Inc.**, 14th and Iron Sts., **Kansas City, Mo.**, and eight of its subsidiaries.

Berry J. Davis, who is also named as a respondent, according to the complaint, is president of the Davis Paint Co., Inc., and is principal stockholder in and directs the policies and operations of this company and of its subsidiaries, namely, Burlington Paint Co., W. H. Beard Paint Co., Farm & Home Paint Co., Manchester Paint Corp., New Method Paint Co., Painter's Paint Co., World Star Paint Co., all of Kansas City, Mo., and Robertson Products Co., Cleveland, Ohio.

The Davis Paint Co., the complaint alleges, manufactures all the products sold by it and its subsidiaries, but conceals the fact that it has the controlling interest in the other respondent corporations, and causes such subsidiaries to be advertised as manufacturers, when such is not the fact, by using labels on containers bearing the corporate name of the particular subsidiary making the sale, in connection with phrases such as "Direct From Factory to You."

No. 2739. **Sutton Laboratories, Inc.**, Chapel Hill, N. C., is charged in a complaint with unfair competition in the sale of "Linoil," offered as a remedy for treating diseases of the feet.

The respondent's representations, allegedly made in radio broadcasts and in advertising matter, to the effect that "Linoil" will cure eczema, that it is effective in the treatment of athlete's foot, ringworm, or other fungus infections of the feet, in all cases, and that it is an adequate and safe treatment for toe itch of all forms, are untrue, according to the complaint.

Use of such representations, the complaint alleges, tends to lead purchasers to believe they can diagnose the foot ailments from which they suffer, and to purchase the respondent's products in such erroneous belief, whereas, the complaint sets forth, only by a diagnosis by a competent physician can the causes of such diseases be ascertained and successfully treated.

In advertising matter, the complaint charges, the respondent represents through use of the word "Laboratories" in its corporate name that it maintains a laboratory at Durham, N. C., where "Linoil" is compounded, when the respondent does not operate a laboratory, but has a post office lock box at Durham and actually prepares its product in its drug store at Chapel Hill.

Use of the term "Linoil," it is alleged, implies that linseed oil is used in the manufacture of the product, when linseed oil is not present in the preparation.

These misrepresentations, says the complaint, tend to deceive the purchasing public and divert trade to the respondent from competitors who truthfully advertise their products.

No. 2740. **W. H. Bonifield, Warren, Ind.**, trading as **Chicopee Medicine Co.**, is named respondent in a complaint alleging unfair competition in connection with the sale of "Chicopee Native Indian Herbs," offered as a medicinal preparation.

On coupons, circulars and cartons, the respondent allegedly represents that his product relieves liver, stomach and kidney disorders, lumbago, rheumatism, and other ailments, when, according to the complaint, the medicine is not a remedy for the ailments enumerated, and its therapeutic value does not warrant assertions that it "is a wonderful remedy of nature"; that it "works surely, safely and quickly"; that it is "the oldest and most reliable medicine known" and "will improve your health 100 per cent in a few weeks' time." The complaint also alleges that the product contains drugs and is not composed of "Native Indian Herbs."

No. 2742. **Louis Fabrikant**, trading as **Louis Fabrikant Co.**, 450 Seventh Ave., **New York City**, is charged in a complaint with unfair methods of competition in the sale of textile fabrics used in the manufacture of dress goods.

Fabrikant is said to have invented and perfected a fabric made of brushed tricot knitted rayon and silk having a velvety appearance, and resembling fabrics made from camel's hair, for which he adopted the trademark "Camel Suede."

Distributing his product to wholesalers and retailers, the respondent is alleged to have assisted them in phrasing advertisements which conspicuously displayed the name "Camel Suede," so as to serve as a representation to the public that the fabric was made from camel wool. In many advertisements appeared

the assertion that "Camel Suede is a very soft wool and rayon mixture with a velvety finish," according to the complaint.

No. 2743. False representations in advertising are alleged in a complaint against **Justin Haynes & Co., Inc.**, 347 Fifth Ave., **New York City**, engaged in the sale of "Aspirub," an ointment said to contain, among other ingredients, one and one-half percent of aspirin.

In newspaper advertisements and on labels on jars and cartons, the respondent allegedly represents that such ointment, due to its aspirin content, has great therapeutic value; that its use will accomplish all the beneficial effects of aspirin, and that its external application is the new way of taking aspirin.

Stipulations

The Commission has issued the following cease and desist orders:

No. 01097. **Trading as Drexel Service Co., Chicago, E. W. Berry and O. G. Kral**, co-partners, selling confections, salted nuts and other counter display products, agree to stop making unmodified representations of earnings in excess of the average earnings of regular salespersons under normal conditions.

No. 01100. An individual described as **Yogi Kahn, with headquarters in Chicago, trading as Yogi Brothers**, engaged in the sale of cosmetics, incense and other items said to be connected with Yogi, Hindu, or Eastern mysticism, agrees to stop representing that any of his products are imported from either India, the Holy Land or anywhere in the Orient, or are genuine Hindu products. The respondent agrees to stop using as part of his name the terms "Hindu," "India," "Yogi," and other words tending to mislead prospective purchasers into believing these commodities are compounded or made by a Yogi, or imported from or composed of ingredients imported from India, the Holy Land, or the Orient, until such time as this shall be true in fact.

No. 01130. **Lewyn Drug, Inc., Hollywood, Calif.**, selling a preparation for the relief of certain women's ailments, agrees to stop representing that it will safely, quickly and dependably end these troubles, and that it complies with the Federal Food and Drug Act. According to medical opinion given the Commission, the preparation will not accomplish the things claimed for it in a majority of cases, and would be dangerous to use.

No. 01174. **Clark-Wright, Inc., Boston**, selling "Thymo Foot Cream," agrees to cease advertising that the preparation will banish or eliminate all foot troubles, and give complete comfort in cases of aching, painful, burning, itching and swelling feet.

No. 01181. **Paul's Inc., Minneapolis**, vendor of "Tarola," offered as a combination shampoo and scalp treatment and dandruff preventative, stipulates that it will discontinue representing the article as a competent treatment or effective remedy for itchy scalp; that its use will prevent hair from falling; that it is a competent treatment for dandruff, and other similar allegations.

No. 01191. **Burrell-Dugger Co., of Indianapolis**, selling "Group-Over," a poultry remedy agrees to cease alleging that this preparation will stop cold epidemics overnight, or end colds in poultry, or stop wheezing, choking, sneezing, or every sign of a cold overnight. The respondent, under the stipulation, will cease representing that it "guarantees" satisfaction.

No. 01101. **The Anacin Co., 8134 McCormick Building, Chicago**, selling "Anacin," agrees to cease advertising that its preparation is a competent treatment for colds, periodic pains or headaches and is considered tremendously effective by doctors and dentists, unless it limits its representations to assertions that "Anacin" relieves symptoms and pains due to such ailments. The respondent stipulates it will discontinue representing that "Anacin" contains four pain-relieving agents and that the formula of the preparation is recognized throughout the world as safe, reliable and prompt in relieving pain."

No. 01109. **L. B. Ford, York, Nebr.**, engaged in the sale of "Van-Nae Herb Tea," offered as a weight reducer, stipulates he will discontinue representing that his product is more than a mere laxative and diuretic; that it acts as a fat reducer without dieting or strenuous exercise; that it corrects any body ailment causing excess fat; that it is non-habit forming, and that the drinking of such tea is a sensible, safe and sane method of reducing fat. The respondent also will desist from using the title "Doctor."

No. 01239. **J. L. Prescott Co., Passaic, N. J.**, agrees to cease representing that "Oxol," a cleaning compound, destroys odors or kills germs, unless it is clearly indicated in connection with such claims that the product does not destroy all odors or all germs. The respondent stipulates it will not represent that the product "cleanses all it touches"; that disease germs cannot live in the presence of "Oxol," unless the specific germs "Oxol" is

known to kill are named, and that the product's bacteria-de-
stroying properties are stronger than carbolic acid, unless such
representation is established by competent evidence.

No. 2218. Under an order issued against **Hubert J., William M., and Mary M. McQuestion**, trading as **Northshore Cement Burial Vault Co.**, 2503 Buchanan Road, **Kenosha, Wis.**, are directed to discontinue false representations in connection with the offering for sale and sale of cement or concrete burial vaults.

The respondents are required to cease representing in purported guarantees in advertising, or in any other manner, that their product is a "Vault Eternal," of enduring strength, hermetically sealed, impervious to moisture, an impregnable barrier to every destructive element of the ground, and that it assures undisturbed, peaceful rest.

No. 2519. Under an order entered against **Miles L. Finch**, trading as **Associate British Manufacturers**, at 200 Fifth Ave., **New York City**, that respondent is directed to cease and desist from certain misrepresentations in the sale of woolen cloth.

It was found that the respondent is engaged in the sale of genuine **Harris Tweed**, a hand-woven product made in the Outer Hebrides, Scotland, and also in the sale of certain power-loomed woolen fabrics made in imitation of the genuine **Harris Tweed**; that in the sale of the imitation product, the respondent so advertised and otherwise represented the imitation woolen goods as to lead the purchasing public to believe that the imitation product it was buying was the genuine **Harris Tweed**.

No. 2715. **Milton Toch**, 1847 68th St., **Brooklyn**, trading as **Universal Ink Co.** and engaged in the sale of liquid and powdered ink, has been ordered to discontinue representing that his business was established prior to 1934, or that he is a manufacturer of powdered ink. The respondent admitted the material allegations of the complaint to be true and did not contest the proceeding.

FEDERAL COMMUNICATIONS COMMISSION ACTION

HEARING CALENDAR

Tuesday, March 24

HEARING BEFORE AN EXAMINER (Broadcast)

NEW—Central Broadcasting Co., Eau Claire, Wis.—C. P., 1050 kc., 250 watts, daytime.

Wednesday, March 25

HEARING BEFORE AN EXAMINER (Broadcast)

KOS—New Mexico College of Agriculture and Mechanic Arts, Albuquerque, N. Mex.—Renewal of license, 1180 kc., 10 KW, simultaneous day, share night with **KEX**.

Thursday, March 26

ORAL ARGUMENT BEFORE THE BROADCAST DIVISION

Examiner's Report No. I-161:

KFRO—Voice of Longview, Longview, Tex.—C. P., 1210 kc., 100 watts, 250 watts LS, unlimited time (facilities of **KWEA**). Present assignment: 1370 kc., 100 watts LS, daytime.

NEW—Oil Capital Broadcasting Assn., James G. Ulmer, Pres., Kilgore, Tex.—C. P., 1210 kc., 100 watts, 100 watts LS, unlimited time (facilities of **KWEA**).

KWEA—International Broadcasting Corp., Shreveport, La.—Renewal of license, 1210 kc., 100 watts, 100 watts LS, unlimited time.

Examiner's Report No. I-165:

NEW—Florida West Coast Broadcasting Co., Inc., Tampa, Fla.—C. P., 1370 kc., 100 watts, 100 watts LS, unlimited time (request facilities of **WPAT**).

Examiner's Report No. I-171:

NEW—Herbert Lee Blye, Lima, Ohio.—C. P., 1210 kc., 100 watts LS, daytime.

Examiner's Report No. I-77:

NEW—G. D. Goff, Tampa, Fla.—C. P., 1500 kc., 100 watts, unlimited time.

APPLICATIONS GRANTED

WTAG—Worcester Telg. Pub. Co., Inc., Worcester, Mass.—Granted C. P. to make changes in equipment.

KFJI—KFJI Broadcasters, Inc., Klamath Falls, Ore.—Granted C. P. to make changes in equipment.

WEW—The St. Louis University, St. Louis, Mo.—Granted C. P. to make changes in equipment.

WDAE—Tampa Times Company, Tampa, Fla.—Granted extension of special experimental authority to operate with 2½ KW day from April 1 to Oct. 1, 1936.

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Granted license to cover C. P. authorizing local move of transmitter, changes in equipment, and increase in day power to 250 watts; 1370 kc., 100 watts night, unlimited time.

WCFL—Chicago Federation of Labor, Chicago, Ill.—Granted license to cover C. P. for auxiliary equipment.

WEST—Associated Broadcasters, Inc., Easton, Pa.—Granted license to cover C. P. approving studio location at 561 Northampton St., Easton, Pa.

KREG—The Voice of the Orange Empire, Inc., Ltd., Santa Ana, Calif.—Granted renewal of license for period January 1 to July 1, 1936.

KABF—James McClatchy Co., Sacramento, Calif. (Portable-Mobile).—Granted license to cover C. P. (temporary broadcast pickup), frequencies 1646, 2090, 2190, 2830 kc., 50 watts.

W6XKF—Ben S. McGlashan, Portable-Mobile (Los Angeles).—Granted license to cover C. P. (general experimental), frequencies 31100, 34600, 37600, 40600 kc., 100 watts.

W4XH—Virgil V. Evans, d/b as The Voice of South Carolina, Portable-Mobile (Spartanburg, S. C.).—Granted modification of license authorizing four general experimental frequencies assigned to miscellaneous services in addition to frequencies already assigned, and increase in power from 15 to 50 watts; 31600, 35600, 38600, 41000 and 86000-400000 kc.

W8XKA—Westinghouse Electric and Manufacturing Co., Portable-Mobile (Chicopee Falls, Mass.).—Granted renewal of special experimental license for period April 30 to July 30, 1936.

W3XEY—The Baltimore Radio Show, Inc., Baltimore, Md.—Granted modification of C. P. approving proposed transmitter site at Belvedere Hotel, southeast corner Chase and Charles Sts., Baltimore, Md.

SET FOR HEARING

WWAE—Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Application for modification of license to change hours of operation from S-WFAM to unlimited day to LS, S-WFAM night.

NEW—The Waterloo Times-Tribune Pub. Co., Waterloo, Iowa.—Application for C. P. for new experimental broadcast station, 1550 kc., 1 KW, unlimited time, using antenna array of special design.

NEW—The Times Publishing Co., St. Cloud, Minn.—Application for C. P. for new station, 1420 kc., 100 watts, unlimited, transmitter and studio site to be determined subject to Commission's approval.

WORL—Broadcasting Service Org., Inc., Needham, Mass.—Application for modification of license to increase day power from 500 watts to 1 KW.

KGEK—Elmer G. Beehler, Sterling, Colo.—Application for modification of license to change specified hours to include an additional 30 minutes on Saturdays.

KSO—Iowa Broadcasting Co., Des Moines, Iowa.—Application for C. P. to make changes in equipment and increase daytime power from 1 KW to 2½ KW.

KWKC—Charlotte Duncan, Admin., Lester E. Cox, Thomas L. Evans, Kansas City, Mo.—Application for C. P. to install new equipment; move station locally from 3912 Main St. to Commerce Bldg., northwest corner 10th and Walnut Sts., Kansas City, Mo.

WJAX—City of Jacksonville, Jacksonville, Fla.—Application for modification of license to increase night power from 1 KW to 5 KW. To be heard before the Broadcast Division, date to be determined.

KFWB—Warner Bros. Broadcasting Corp., Hollywood, Calif.—Application for modification of license to increase power from 1 KW night, 2½ KW day, to 5 KW night and day. To be heard before the Broadcast Division, date to be determined.

WWJ—The Evening News Assn., Inc., Detroit, Mich.—Application for modification of C. P. to increase nighttime power from 1 KW to 5 KW. To be heard before the Broadcast Division, date to be determined.

WDAY—WDAY, Inc., Fargo, N. Dak.—Application for modification of license to increase night power from 1 to 5 KW. To be heard before the Broadcast Division, date to be determined.

WAVE—WAVE, Inc., Louisville, Ky.—Application for C. P. to make changes in equipment, move transmitter locally to site to be determined, and increase power from 1 to 5 KW. To be heard before the Broadcast Division, date to be determined.

KOIN—KOIN, Inc., Portland, Ore.—Application for modification of license to increase night power from 1 to 5 KW.

KHJ—Don Lee Broadcasting System, Los Angeles, Calif.—Application for modification of license to increase power from 1 to 5 KW. To be heard before the Broadcast Division, date to be determined.

WEEI—Edison Electric Illuminating Co. of Boston, Mass.—C. P., already in hearing docket, amended to read: Install new equipment, use directional antenna, increase power from 1 to 5 KW. To be heard before the Broadcast Division, date to be determined.

KECA—Earle C. Anthony, Inc., Los Angeles, Calif.—Modification of C. P., already in hearing docket, amended to read: Install new equipment, increase night power from 1 to 5 KW. To be heard before the Broadcast Division, date to be determined.

WRC—National Broadcasting Co., Inc., Washington, D. C.—C. P., already in hearing docket, amended to read: Install new equipment, increase power from 1 KW day, 500 watts night, to 5 KW day and night, move transmitter locally to site to be determined. To be heard before the Broadcast Division, date to be determined.

WCSH—Congress Square Hotel Co., Portland, Me.—Modification of license, already in hearing docket, amended to read: Increase power from 1 KW night, 2½ KW day, to 5 KW day and night. To be heard before the Broadcast Division, date to be determined.

KHQ—Louis Wasmer, Inc., Spokane, Wash.—C. P., already in hearing docket, amended to read: Make changes in equipment, increase power from 1 KW night, 2 KW day, to 5 KW night and day. To be heard before the Broadcast Division, date to be determined.

WIOD-WMBF—Isle of Dreams Broadcasting Corp., Miami, Fla.—C. P., already in hearing docket, amended to read: Change frequency from 1300 kc. to 970 kc.; increase power from 1 KW to 5 KW, unlimited time; and install new equipment. To be heard before the Broadcast Division, date to be determined.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KLPM, Minot, N. Dak.; KTRH, Houston, Tex.; KUOA, Fayetteville, Ark.; KWSC, Pullman, Wash.; WAVE, Louisville, Ky.; WCAM, Camden, N. J.; WCAP, Asbury Park, N. J.; WCOP, Boston; WDAY, Fargo, N. Dak.; WHN, New York City; WIBA, Madison, Wis.; WJAS, Pittsburgh, Pa.; WJDX, Jackson, Miss.; WNAD, Norman, Okla.; WNBX, Springfield, Vt.; WNEW, Newark, N. J.; WNOX, Knoxville, Tenn.

WFIL—WFIL Broadcasting Co., Philadelphia, Pa.—Granted renewal of license for the period ending September 1, 1936.

WFIL—WFIL Broadcasting Co., Philadelphia, Pa.—Same for auxiliary.

ORAL ARGUMENTS GRANTED

NEW—Ex. Rep. No. 1-170: Ralph Perez Perry, Santurce, P. R.—Oral argument granted to be heard June 4, 1936.

NEW—Ex. Rep. No. 1-191: E. W. Atkinson, Watsonville, Calif.—Oral argument granted to be heard June 4, 1936.

KFJM—Ex. Rep. No. 1-199: University of North Dakota, Grand Forks, N. Dak.—Oral argument granted to be heard June 4, 1936.

APPLICATIONS DENIED

NEW—Harry H. Culver, Beverly Hills, Calif.—Application for C. P., 710 kc., 500 watts, limited time, heretofore set for

hearing, was denied as in cases of default for failure to file an appearance and statement of facts in accordance with Rule 104.6 (e).

KFRO—Voice of Longview, Longview, Tex.—Denied special authority to operate from 6:30 to 10 p. m., CST, March 26, in order to broadcast 10th Anniversary of East Texas Chamber of Commerce.

APPLICATIONS DISMISSED

The following applications, heretofore set for hearing, were dismissed at request of applicants:

NEW—Ruth W. Adcock and S. E. Adcock, d/b as General Broadcasters, Johnson City, Tenn.—Applied for C. P., 880 kc., 250 watts LS, daytime.

NEW—Ruth W. Adcock and S. E. Adcock, d/b as General Broadcasters, Rossville, Ga.—Applied for C. P., 1120 kc., 250 watts LS, daytime.

WROK—Rockford Broadcasters, Inc., Rockford, Ill.—Applied for authority to transfer control of corporation.

NEW—Herbert Hollister, Emporia, Kans.—Applied for C. P., 1500 kc., 100 watts night, 100 watts LS, unlimited time.

NEW—O. K. Broadcasting Co., Cleveland, Ohio.—Applied for C. P., 1500 kc., 100 watts night, 100 watts LS, unlimited time.

NEW—O. K. Broadcasting Co., Louisville, Ky.—Applied for C. P., 1200 kc., 100 watts night, 100 watts LS, unlimited time.

NEW—Herbert Hollister, Waterloo, Iowa.—Applied for C. P., 1420 kc., 100 watts night, 100 watts LS, unlimited time.

MISCELLANEOUS

WLAK—Lake Region Broadcasting Co., Lakeland, Fla.—The Broadcast Division directed that C. P. for new station to operate on 1310 kc., 100 watts, unlimited time, be issued in conformity with its action of November 19, 1935, inasmuch as applicants have now complied with Rule 131.

W9XAL—The First National Television Corp., Kansas City, Mo.—Granted consent to voluntary assignment of license from The First National Television Corp., a Kansas corporation, to the First National Television, Inc., a Missouri corporation.

W1XEH—Travelers Broadcasting Service Corp., Avon, Conn.—Granted modification of C. P. of special experimental station to delete frequency 63000 kc. and substitute in lieu thereof the frequency 63500 kc., and to communicate as a broadcast station in the broadcast service on an experimental basis.

KFUO—Evangelical Synod of Missouri, St. Louis, Mo.—Granted motion for continuance of hearing on application for renewal of license set for April 7, 1936, because KSD has applied for its facilities.

Centennial Broadcasting Corp., Dallas, Tex.—Denied petition asking Commission to reconsider action of January 10, 1936, in denying application for new station to operate on 1200 kc., 100 watts, unlimited, and to grant the same.

Ogdensburg Pub. Co., Inc., Ogdensburg, N. Y.—Granted petition to intervene at hearing of application of Ogdensburg Advance Co., Inc., for authority to maintain a studio in Ogdensburg for the production of programs to be transmitted by land wire to the N. Y. Tel. Co. and of the Bell Tel. Co. of Canada to station CFLC at Preston, Ontario.

Bell Broadcasting Co., Temple, Tex.—Granted petition to intervene at hearing of application of Eugene DeBogory for new station at Temple, Tex., which has been designated for hearing on May 5, 1936.

WJBW—Charles C. Carlson, New Orleans, La.—Granted regular renewal of license.

KTFI—Radio Broadcasting Corp., Twin Falls, Idaho.—Granted continuance of hearing on application for extension of special experimental authorization until decision has been rendered on application to change frequency from 1240 kc. to 630 kc.

WNBX—WNBX Broadcasting Corp., Springfield, Vt.—Granted special temporary authority to operate with 1 KW until sunset at Dayton, Ohio, 500 watts night, pending approval of design and erection of directional antenna.

WREC—WREC, Inc., Memphis, Tenn.—Accepted answer to exceptions of WCAO to Examiner's Report No. 1-187, and granted request for oral argument.

WHIO—Miami Valley Broadcasting Corp., Dayton, Ohio.—Reconsidered and granted application to increase daytime power from 1 to 5 KW.

ACTION ON EXAMINER'S REPORT

NEW—Ex. Rep. No. 1-188: North Side Broadcasting Corp., New Albany, Ind.—Granted C. P. for new broadcast station to operate on 1370 kc., 250 watts, day, subject to Rule 131; site to be determined subject to Commission's approval. Order effective May 12, 1936. Examiner R. H. Hyde sustained. (Action taken March 10, 1936.)

APPLICATIONS RECEIVED

First Zone

WHDH—Matheson Radio Co., Inc., Boston, Mass.—License to 830 cover construction permit (B1-P-933) to make changes in equipment.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Authority to 830 determine operating power by direct measurement of antenna power.

NEW—George F. Bissell, Pittsfield, Mass.—Construction permit 1200 for a new station to be operated on 1200 kc., 100 watts, daytime.

WHBI—May Radio Broadcast Corp., Newark, N. J.—Modification of license to use auxiliary transmitter as a main transmitter. 1250

NEW—WDRC, Inc., Hartford, Conn.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000, 86000-400000, 401000 kc., 50 watts, A1, A2, A3 and special emission.

NEW—Juan Piza, Portable.—Construction permit for a new broadcast pickup station to be operated on 1622, 2060, 2150, 2790 kc., 50 watts, A3 emission.

NEW—WODAAM Corp., Mobile—in airplane.—Construction permit for a new broadcast pickup (T) station to be operated on 1622, 2060, 2150, 2790 kc., A3 and special emission, 7½ watts.

Second Zone

WEST—Associated Broadcasters, Inc., Easton, Pa.—License to 1200 cover construction permit B2-P-472 as modified to move station from Lancaster, Pa., to Easton, Pa., and antenna changes.

WJBK—James F. Hopkins, Inc., Detroit, Mich.—Modification of 1500 construction permit (B2-P-637) for changes in equipment, move of transmitter, and installation of directional antenna, requesting extension of commencement date from 9-30-35 to date of approval and completion date from 3-30-36 to 9-30-36.

NEW—Old Dominion Broadcasting Co., Washington, D. C.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000, 86000-400000, 401000 kc. and above, 100 watts, A3 and special emission.

Third Zone

KTSA—Southwest Broadcasting Co., San Antonio, Tex.—Voluntary assignment of license from Southwest Broadcasting Co. to KTSA Broadcasting Co. 550

WSIX—Jack M. Draughon and Louis R. Draughon, d/b as 638 1219 Tire & Vulcanizing Co., Springfield, Tenn.—Modification of construction permit (B3-P-227) for approval of transmitter site at northeast corner Boscobel and 3rd St., Nashville, and extend commencement date two days after grant and completion date 100 days thereafter, and approval of antenna.

WFBC—Greenville News-Piedmont Co., Greenville, S. C.—Authority to determine operating power by direct measurement of antenna. 1300

NEW—H. A. Hamilton, Asheville, N. C.—Construction permit for 1370 a new station to be operated on 1370 kc., 100 watts, daytime. Amended re antenna.

KFJZ—Fort Worth Broadcasters, Inc., Fort Worth, Tex.—Construction permit to install new equipment and increase power from 100 watts to 100 watts, 250 watts day. 1370

NEW—John S. Braun, Waco, Tex.—Construction permit for a new 1500 station to be operated on 1500 kc., 100 watts, daytime.

KGKB—East Texas Broadcasting Co., Tyler, Tex.—Construction 1500 permit to make changes in equipment and move transmitter from Tyler Commercial College, 115 South College Street, Tyler, Tex., to 1½ miles from Court House on North Dixie Highway, Tyler, Tex.

NEW—Dr. F. P. Cerniglia, Monroe, La.—Construction permit for 1500 a new station to be operated on 1500 kc., 100 watts, unlimited time.

KNOW—KUT Broadcasting Co., Austin, Tex.—Authority to transfer control of corporation from Southwest Broadcasting Co. to Hearst Radio, Inc., 10,000 shares of common stock.

W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—License to cover new general experimental station.

Fourth Zone

WMT—Iowa Broadcasting Co., Des Moines, Iowa.—Construction 600 permit to make equipment changes and increase power from 1 KW night, 2½ KW day, to 1 KW night, 5 KW day (consideration under Rule 6(g)).

WDZ—WDZ Broadcasting Co., Tuscola, Ill.—License to cover 1070 construction permit (B4-P-8) as modified for change in frequency, equipment, and move of transmitter.

WSBC—WSBC, Inc., Chicago, Ill.—Construction permit to make 1210 changes in antenna and move transmitter from Hotel Crillon, 1258 S. Michigan Avenue, Chicago, Ill., to West Town Office Bldg., 2400 Madison Street, Chicago, Ill.

WTAQ—WHBY, Inc., Green Bay, Wis.—License to cover construction permit (B4-P-369) as modified to install new equipment, move transmitter and studio, and change hours of operation. 1330

KWKC—Charlotte Duncan, Administratrix, Lester E. Cox and 1370 Thomas L. Evans, Kansas City, Mo.—Construction permit to install new equipment; move studio from Werby Bldg., 39th and Main St., Kansas City, Mo., to Commerce Bldg., northwest corner 10th and Walnut, Kansas City, Mo.; and transmitter from 3912 Main Street, Kansas City, Mo., to Commerce Bldg., northwest corner 10th and Walnut Streets, Kansas City, Mo.

KWKC—Wilson Duncan, tr. as Wilson Duncan Broadcasting Co., 1370 Kansas City, Mo.—Voluntary assignment of license from Wilson Duncan, tr. as Wilson Duncan Broadcasting Co., to Tom Cleveland. Amended: Assign to Lester E. Cox and Thomas L. Evans instead of Tom Cleveland.

NEW—The Voice of St. Louis, Inc., St. Louis, Mo.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000, 86000-400000, 401000 kc. and above, 100 watts, A3 and special emission.

Fifth Zone

KGO—National Broadcasting Co., Inc., San Francisco, Calif.—790 Construction permit to install new equipment, increase power from 7½ KW to 50 KW, and move transmitter from 5555 East Fourteenth Street, Oakland, Calif., to near Belmont, Calif.

NEW—The Tribune, Great Falls, Mont.—Construction permit to 950 erect a new broadcast station at Great Falls, Mont., to be operated on 550 kc., 1 KW night, 5 KW day, unlimited time (facilities KFVR). Amended to change frequency to 950 kc.

NEW—Golden Empire Broadcasting Co., Marysville, Calif.—Construction permit for a new station to be operated on 1140 kc., 250 watts, daytime. 1140

NEW—James H. Hardy and L. D. Marr, copartners, Pasadena, 1160 Calif.—Construction permit for a new station to be operated on 1160 kc., 250 watts, daytime.

NEW—E. N. and S. W. Warner, d/b as Warner Bros., Oakland, Calif.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000 kc., 200 watts, A3 emission.

WARNER BROS. MUSIC

The managing director this week addressed to those stations licensed to use Warner Brothers music, a memorandum which reads as follows:

"This is in reference to the expiration on March 31st of the Music Publishers Holding Corporation licenses.

"As reported in NAB REPORTS dated March 19th an Advisory Committee selected by me met with Mr. Herman Starr during the week ended March 14th and I was to resume where they left off.

"I visited with Mr. Starr this week. His position concerning per-piece remains unchanged from that expressed to the Advisory Committee namely; that so long as the broadcasters continue to pay for music on the basis of a flat fee such as is done with the ASCAP he cannot find a formula which will insure to him the minimum amount of money which he considers he is entitled to receive for the use of MPHC music. In further explanation of his position he says that the broadcasting industry has not cooperated with him, that generally the industry has endeavored to avoid using his music and that, therefore, he cannot expect any better cooperation should he adopt a per-piece plan.

"A number of other reasons were assigned by Mr. Starr including the claim that when the broadcasters signed new five-year blanket contracts with ASCAP on January 15th the problem of working out a per-piece plan for his music was made extremely difficult.

"He advised me that the best he can do under all existing circumstances is to offer an extension of present licensing agreements with these exceptions:

1. He will use as a base the local or retail rate where such a rate exists.

2. He will require reports covering only Warner Brothers music.

3. He will change the favored nation clause so as to allow the MPHC sufficient latitude to avoid inequalities.

4. He will incorporate in the new agreement a provision which will permit cancellation in the event a per-piece plan can be found which is acceptable to 75 per cent of the copyright agencies and broadcasters.

5. He will offer the agreement for a period of five years.

"It is plain that a situation exists which must be evaluated by each broadcaster in the light of his own requirement."

COPYRIGHT HEARING DATES

Following an executive meeting of the House Committee on Patents on Monday it was announced that copyright bill hearings will be continued until April 15. Hearings are being held this week when the authors and dramatists are being given a chance to present their side of the case. In the future each week, until the hearings are concluded, the committee will sit on Tuesday, Wednesdays, Thursdays and Fridays.

NEW JERSEY STATION DENIAL RECOMMENDED

Alfred C. Matthews, applied to the Federal Communications Commission for a construction permit for the erection of a new broadcasting station at Cape May, N. J., to use 1420 kilocycles, 100 watts power and specified hours of operation.

Examiner John P. Bramhall in Report No. I-211 recommends that the application be denied. The Examiner found that the applicant is not financially qualified to operate the proposed station and that the area proposed to be served is now receiving ample radio service "and in addition to this, it is believed that the revenue of a station in Cape May would be insufficient to adequately sustain a station."

FCC CHANGES PROCEDURE ON VIOLATION NOTICES

The Federal Communications Commission has issued the following statement in which it calls the attention of all licensees to the change of procedure in replying to notices of violation:

Rule 105.23 of the Practice and Procedure of the Federal Communications Commission, which supersedes Rule 24 of the Rules and Regulations of the Federal Radio Commission, requires the licensee of a station to forward within three days after receipt of a notice of violation, a reply to the Commission at Washington, D. C., with a copy to the office originating the complaint when that office is other than the Commission at Washington. This procedure will afford the inspector citing the station for violation an opportunity to review the licensee's reply and present to the Commission for consideration, along with the reply, any facts and observations which are pertinent to the proper handling of the case.

PRINCESS PAT SEEKS FREE TIME

The letter sent out last week (16th) by Princess Pat, Ltd., seeking to hait certain independent stations on a "you-furnish-the-time we furnish the program basis" will meet with the contempt which it justly deserves. With a sticker attached to the letter advertising an NBC program on Monday night at 9:30 P. M., EST, and commenting on this weekly program on the Blue Network, C. J. Klowden says: These dramas have been reproduced electrically and will be available to a limited number of independent stations who are looking for a real human interest program for their local audiences. Members owning and operating independent stations will not overlook this opportunity of inquiring of Mr. Klowden whether the National Broadcasting Company furnishes time in return for the talent on the Princess Pat programs, and informing him that the independent stations also have a valuable listening audience and produce excellent results for advertisers at minimum costs.

POWER INCREASES RECOMMENDED FOR DAYTIME

Broadcasting stations WFBR, Baltimore, Md., WOOD and WASH, Grand Rapids, Mich., all operating on a frequency of 1270 kilocycles and all now assigned 500 watts applied to the Federal Communications Commission to increase their power to 1,000 watts.

Examiner Melvin H. Dalberg in Report No. I-209 recommends that this increase be granted as to daytime operation but that it be denied as to nighttime. The Examiner found that in these cases the extra daytime power would not cause any interference with existing facilities but nighttime power increase would cause interference.

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities and Exchange Commission under the Securities Act:

F. L. Jacobs Company, Detroit, Mich. (2-1959, Form A-2).
Davidson Biscuit Company, Mt. Vernon, Ill. (2-1961, Form A-2).
Canadian Capital Corp., Ltd., Montreal, Canada (2-1962, Form A-1).
Gotham Silk Hosiery Company, New York City (2-1964, Form A-2).
Keystone Custodian Funds, Inc., Philadelphia, Pa. (2-1967, Form C-1).
Administrative Corporation, Jersey City, N. J. (2-1968, Form C-1).
American Business Shares, Inc., Jersey City, N. J. (2-1969, Form A-1).
Zem Zem Corporation, New York City (2-1970, Form A-1).
Peter Fox Brewing Company, Chicago, Ill. (2-1971, Form A-1).
Blue Lake Gold Mines, Inc., Buffalo, N. Y. (2-1972, Form A-1).
R. G. Letourneau, Inc., Stockton, Cal. (2-1973, Form A-2).
Edwin Carewe Productions, Inc., Los Angeles, Cal. (2-1974, Form A-1).
Knudsen Creamery Co. of California, Los Angeles, Cal. (2-1975, Form A-1).
Rogue River Company, Klamath Falls, Ore. (2-1977, Form E-1).
Melville Shoe Corporation, New York City (2-1978, Form A-2).
Frederick Stearns & Co., Detroit, Mich. (2-1979, Form A-2).
Marlowe Products, Inc., Clifton, N. J. (2-1980, Form A-1).
United Telephone Protective Committee, Omaha, Nebr. (2-1981, Form D-1).
S. S. Stafford, Inc., New York City (2-1982, Form E-1).
S. S. Stafford, Inc., New York City (2-1983, Form D-1).
McKale's Inc., Seattle, Wash. (2-1984, Form A-2).
Southwest Investment Co., Inc., Shreveport, La. (2-1985, Form A-1).
Standard Utilities, Inc., Jersey City, N. J. (2-1986, Form A-1).

RECOMMENDS DENIAL FOR INCREASED POWER

Broadcasting Station KVI, Tacoma, Wash., applied to the Federal Communications Commission to increase its daytime power from 1,000 to 5,000 watts. The station operates unlimited time on 570 kilocycles.

Examiner Ralph L. Walker in Report No. I-210 recommends that the application be denied. It is pointed out by the Examiner that "the state of Washington is now assigned approximately 13 per cent more than its equitable share of broadcast facilities for daytime operation. The granting of the present application would result in increasing this over quota condition."

ADDITIONAL WARNERS BROTHER SUITS

Official announcement has been made by Warner Brothers that they have begun additional suits based on alleged infringement of song copyrights owned by them, as follows:

It is alleged that Victor Herbert's "Gypsy Love Song" was infringed by Dempsey's restaurant on March 6th between the hours of 7:30 and 7:40 p. m. Damages of \$250 and an accounting of the profits are demanded for that infringement. M. Whitmark & Sons are the copyright owners.

The Libertino establishment is alleged to have infringed "Mother Machree" on March 6th between 12:45 and 1:30 a. m., and "When Irish Eyes Are Smiling" on March 7th between 12:45 and 1:30 a. m. Both of those songs are also copyrights held by Whitmarks. Five hundred dollars and a profit accounting are demanded.

Harms, Inc., alleges that the Greenwich Village, Inc., night club, infringed on three of its copyrights in the thirty-five minutes between 2:05 and 2:40 a. m. the morning of March 7th. The three tunes were "The Blue Room," "Night and Day" and "Anything Goes." Damages of \$750 and an accounting of the profits are demanded.

Other suits include the following:

Remick Music Corp. vs. Radio Broadcasting Corporation of Idaho, operating station KTFI in Twin Falls, on the song "The Little Old Church in the Valley." \$250.00 damages are demanded.

Harms, Inc. vs. WDSU, Inc., operating station WDSU, New Orleans, on the songs "Where Am I," "Let's Swing It" and "I'm Just an Ordinary Human." \$1500.00 damages are demanded.

T. B. Harms Co. vs. Main Auto Supply Co., operating station WOWO, Fort Wayne, on the song "Two Hearts Carved On A Lonesome Pine." \$5,000.00 damages are demanded.

Remick Music Corp. vs. Savannah Broadcasting Co., Inc., operating station WTOG, Savannah, on the song "Quicker Than You Can Say Jack Robinson." \$500.00 damages are demanded.

M. Whitmark & Sons vs. Savannah Broadcasting Co. on the song "When A Great Love Comes Along." \$500.00 damages are demanded.

T. B. Harms Co. vs. Savannah Broadcasting Co. on "Little Man, You've Had A Busy Day." \$250.00 damages are demanded.

M. Whitmark & Sons vs. Florida Capitol Broadcasters, Inc., operating station WTAL, Tallahassee, on the song "You're the Flower of My Heart, Sweet Adeline." \$250.00 damages are demanded.

Harms, Inc. vs. Toledo Broadcasting Co. operating Station WSPD, Toledo, on the song "Flowers for Madame." \$5,000.00 damages are demanded.

M. Whitmark & Sons vs. Miami Valley Broadcasting Co., operating station WHIO, Dayton, Ohio, on the song "Why Can't This Night Go On Forever." \$5,000.00 damages are demanded.

FEDERAL TRADE COMMISSION ACTION COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2744. Charging unfair competition in the sale of "Nun-Nail," a widely advertised toilet preparation, a complaint has been issued against **Berenice Cohn**, of 270 South Windsor Boulevard, Los Angeles, trading as **Bergo Laboratories**.

The respondent is alleged to have advertised in newspapers, magazines, circulars, counter displays and other media, that "Nun-Nail" is a nail food, effective conditioner and rejuvenator, and that it eliminates brittleness, breaking of the nails, splitting, peeling, and ingrown toe nails. These assertions are untrue, according to the complaint.

No. 2745. Complaint has been issued against **Kalo Inoculant Co.**, of **Quincy, Ill.**, charging unfair competition in the sale of nitrogen-fixing bacteria with a humus base used to extract and transfer nitrogen from the air to leguminous plants.

Purchasing the humus containing the bacteria in bulk from a New Jersey corporation, the respondent, according to the complaint, sells its product in tin cans under the name "Humogerm," to wholesalers, retailers and jobbers of seed.

The unfair competition is alleged to consist of representations in farm magazines and other advertising media to the effect that the containers are packed with a definite, ascertainable, minimum number of nitrogen-fixing bacteria, and that each can of the product contains a specified definite minimum number of living legume bacteria throughout the entire course of the distribution period, when, according to the complaint, these are not the facts, and such data cannot be accurately ascertained.

No. 2746. Unfair competition in connection with the sale of silver-plated hollow ware is alleged in a complaint issued against **Friedman Silver Co. Inc.**, 1226 Flushing Ave., Brooklyn, N. Y.

For many years, according to the complaint, certain letters stamped upon hollow ware products have signified to the purchasing public and to the trade that such products are electroplated nickel silver, and that the embossed decorations thereon consist of white metal.

The complaint charges the respondent company stamps certain of its hollow ware products with the same letters, but that such products do not have the qualities and do not contain the materials which the purchasing public and the trade have come to expect in products so stamped.

No. 2747. **York Caramel Co.**, College Ave. and Oak Lane, York, Pa., engaged in the manufacture and sale of candy, is charged in a complaint with unfair methods of competition in violation of Section 5 of the Federal Trade Commission Act.

The complaint alleges that the respondent packs its candy in assortments so as to involve the use of a lottery scheme, whereby ultimate purchasers of a small piece of such candy may win, without additional cost, a larger piece.

No. 2748. False representations concerning "Ortosan," a facial treatment, are alleged in a complaint against **Arpaul Co. Inc.**, 333 West 52nd St., New York City, charging violation of Section 5 of the Federal Trade Commission Act.

The complaint alleges that the respondent, in connection with the sale of "Ortosan," represents by radio broadcasts and in advertising matter that the preparation is five creams in one, perfected during a period of twenty-five years and endorsed by leading medical authorities and beauty specialists; that it restores

contours of the face, chin and neck, and eliminates sagging lines, wrinkles and skin blemishes; that it combines in one cream everything that is needed to give a woman a beautiful skin, and that it is different from any facial cream on the market.

No. 2749. Complaint has been issued against **Eugene D. Petry**, doing business as **Warner Studios**, 1317 F St., Washington, D. C., alleging unfair methods of competition in offering for sale and in the sale of photographs and portraits. The respondent, who also has studios in other cities, is charged with violation of Section 5 of the Federal Trade Commission Act.

Salesmen employed by Petry, the complaint alleges, contact prospective purchasers, and, to induce them to visit the respondent's studio to have photographs made, offer and sell coupons at purported "special prices" ranging from 50 cents to \$1.50, which coupons are represented as having a "regular value" of from \$3.50 to \$7.50 when used at the respondent's studio.

It is charged the respondent represents that the "regular value" of his photographs is far in excess of the prices at which such photographs ordinarily sell in Washington, when, according to the complaint, such photographs are actually of the same type and quality ordinarily selling for from \$1 to \$2.

No. 2750. The **L. D. Caulk Co.**, Milford, Del., is named respondent in a complaint alleging false representations in connection with the sale of a dental amalgam alloy, used as a dental filling and sold under the trade name "The Twentieth Century Alloy Improved (Caulk)."

The complaint charges that the respondent solicits the business of dentists and dental supply houses by advertising in trade papers and magazines and in circulars that its product has a certain crushing strength average which is higher than that found in dental amalgam alloys sold by competitors; and that its "Twentieth Century Alloy" assures greater durability and has other qualities not found in the products of competitors.

Stipulations

The Commission has issued the following cease and desist orders:

No. 01344. **M. J. Breitenbach Co.**, New York City, distributor of Gude's Pepto-Mangan, agrees to cease representing that this product restores health by enriching the blood, revives weakened blood cells, or creates new energy, and that the product has any healing value beyond that of a simple tonic, in the treatment of anemic, run down, or overworked persons, or of invalids, convalescents and the aged. Other similar representations also will be discontinued.

No. 01192. **Nova Sal Laboratories, Inc.**, Brooklyn, will discontinue representing that its product is a prescription used by thousands of doctors; that it tends to reduce fever, or is less depressant than most other compounds, and other assertions of like import.

No. 01343. **Vita Ray Corporation**, Lowell, Mass., engaged in selling facial creams and lotions, agrees to cease and desist from representing that any of its products correct "goose flesh," make the skin grow young, and "revitalize" withering cells; that Vita-Ray Cream "restores" youth to the complexion, and is the only cream containing vitamin D, and the only cream capable of penetrating the skin.

No. 01173. **Siroil Laboratories, Inc.**, Detroit, agrees to ban the representation that Siroil is a competent treatment or effective remedy for psoriasis or dandruff, that any definite proportion of cases treated with the preparation have been relieved, unless this assertion is supported by reliable medical evidence; that the preparation represents a tremendous advance over any other treatment for psoriasis, and that complete elimination of either psoriasis or dandruff has been effected in hundreds of cases through use of only one bottle of this substance, and other similar representations.

No. 2588. **R. H. Sharot**, trading as **Modex Mills Co.**, 15 Moore St., New York City, a jobber in the export business, has been ordered to stop advertising that he is a manufacturer, mill operator, or owner. Sharot sells hosiery, underwear, raincoats and other articles of apparel.

Findings are that the respondent's representations on letterheads and in advertising matter that he is a manufacturer or mill operator, tend to deceive buyers into believing that they are dealing with a manufacturer of established business standing, and thereby gaining an advantage by saving a middleman's profit, when this is not a fact.

No. 2599. Under an order the **Diamond Match Co.**, 30 Church St., New York City, is directed to discontinue use of the word "Safety" in the brand name of certain matches it manufactures and sells in interstate commerce.

The company is ordered to cease the use of the word "Safety" as part of any brand name it uses in labeling matches which are the type commonly known as "strike-anywhere" matches.

No. 2617. **T. O. Loveland and J. L. Records**, of Iowa City, Iowa, trading as **Commercial Manufacturing Co.** and **Brenard Manufacturing Co.**, have been ordered to discontinue certain unfair trade practices in the sale and distribution of radios.

Use of the word "Manufacturing" as a part of the respondents' trade name, or in advertising literature, as descriptive of their business, is prohibited in the order unless and until the respondents own and control a complete factory in which they manufacture the radios so represented.

The order directs the respondents to cease and desist representing through advertising literature, distributors' agency agreements, or through representations by traveling salesmen, that retail dealers, upon execution of agency agreements to sell the respondents' radios, will obtain certain advantages such as an exclusive franchise for a particular territory, and a guarantee by the respondent of a certain number of sales at a specified profit.

No. 2680. **Consolidated Trading Corporation**, 15 Moore St., New York City, trading as **Modex Mills**, has been ordered to cease and desist from representing through its trade name, or in any other manner, that it is a manufacturer or the owner or operator of a mill at which are manufactured the commodities which it sells.

In the complaint against this respondent, it was set out that the respondent is engaged in selling hosiery, underwear, raincoats, dresses, and general wearing apparel, and cosmetics to purchasers in foreign countries, but that is not a manufacturer or a mill operator.

No. 2700. **Julius Abrahams**, 942 Market St., Philadelphia, trading as **Philadelphia Badge Co.**, has been ordered to cease representing that the stamp photos he manufactures and sells are purchased, used or endorsed by the United States Government or any of its agencies.

The respondent is directed to discontinue making such representation regarding his product through newspaper and magazine advertisements, by radio broadcasting, or in any other manner.

The Commission found that the respondent's assertion that the Government is among the nationally known users of his photo stamps causes the purchasing public to buy such products in the erroneous belief that they are purchased in large quantities by the Government, and, by inference, that they are endorsed by the Government.

No. 2713. **Roma Wine Co., Inc.**, 405 Montgomery St., San Francisco, has been ordered to discontinue representing that any wine it sells is genuine "Chateau Yquem," unless the wine it so designates is produced from grapes grown upon the estate of the Marquis de Lur-Saluze, located in the Province of Bordeaux, France, and manufactured, aged, processed and bottled at the Chateau Yquem situated upon that estate.

Under the order, the respondent is prohibited from using the name "Chateau Yquem" on stationery, labels, invoices, in advertising matter, or in any other manner.

The Commission found that the respondent company sells wine it manufactures from California-grown grapes and, in representing it as "Chateau Yquem," misleads and deceives the purchasing public.

Complaints Dismissed

The Commission has dismissed the following complaints:

No. 2279. A complaint charging **Mead Johnson & Co., Inc.**, of Evansville, Ind., with unfair competition in maintenance of a resale price policy for infant diet and nutrition products, has been dismissed.

Dismissal was ordered on the ground that use of the methods and practices charged in the complaint was employed for only a brief period and to a limited extent and without the knowledge and consent of the responsible officials of the respondent company; that as soon as such officials learned of their use they were discontinued, such discontinuance being prior to complaint, and upon the assurance of the attorney for the respondent in open hearing before the Commission that such methods and practices would not be resumed.

No. 2689. The Commission has also entered an order closing its case against **Jung & Schade Laboratories**, 1418 Somer St., Milwaukee, Wis., because the respondent corporation is no longer in business. The case was closed without prejudice to the right of the Commission to reopen it should the facts warrant such action.

The complaint in this case alleged that the respondent, in advertising matter, made false representations concerning "Vi-Vo," which had been offered for sale as an effective treatment for alcoholic excesses.

FEDERAL COMMUNICATIONS COMMISSION ACTION

The usual Tuesday meeting of the Broadcast Division of the Commission was not held because members of the Division are sitting in on the hearings in connection with the telephone investigation. It is expected that the Broadcast Division will meet later this week.

HEARING CALENDAR

Thursday, April 2

ORAL ARGUMENT BEFORE THE BROADCAST DIVISION

Examiner's Report No. I-167

KMED—Mrs. W. J. Virgin, Medford, Oregon—Modification of license; 1410 kc., 250 watts, specified hours (6 a. m. to 9 p. m.)

Friday, April 3

HEARING BEFORE THE TELEPHONE DIVISION

WCOA—The Pensacola Broadcasting Co., Complainant v. American Telephone and Telegraph Company, Defendant—*Complaint*: with reference to rates over circuits from Mobile via Flomaton to Pensacola.

APPLICATIONS RECEIVED

First Zone

WFAB—Fifth Avenue Broadcasting Corp., New York, N. Y.—1300 Modification of license to change hours of operation from shares: WHAZ, WEVD, WBBR, to shares: WHAZ, WBBR (present hours, plus those now used by WEVD, contingent upon WEVD's change in frequency, 1-ML-B-1304).

NEW—Arthur E. Seagrave, Lewiston, Maine—Construction permit to erect a new broadcast station, to be operated on 1420 kc., 100 watts, 250 watts-day, time not given. Amended: to give time as unlimited.

W9XBS—National Broadcasting Co., Inc., Chicago, Ill.—Modification of license to operate transmitter by remote control from 222 North Bank Drive, Chicago.

Second Zone

WSAI—The Crosley Radio Corp., Cincinnati, Ohio—License to 1330 cover construction permit (B2-P-890) to make equipment changes and move transmitter.

Third Zone

WDBO—Orlando Broadcasting Company, Inc., Orlando, Fla.—580 Construction permit to make changes in antenna, move transmitter from Ft. Gatlin Hotel, 545 N. Orange Ave., Orlando, Fla., to Dubsread Country Club Area near Orlando, Fla., and increase power from 250 watts to 1 KW.

NEW—Charles T. Copeland, Jr., & W. H. May, d/b as Broadcast 1210 Service Co., Troy, Ala.—Construction permit to erect a new broadcast station to be operated on 1210 kc., 100 watts power, daytime operation. Amended: for equipment changes, change name by adding d/b as Broadcast Service Co., and give transmitter site as 1½ miles S. Court Square on Troy-Elba Highway, Troy, Alabama.

NEW—Jack E. Brantley, Mrs.; Jack E. Brantley, & Jack E. 1310 Brantley, Jr., Savannah, Ga.—Construction permit for new broadcast station to be operated on 1310 kc., 100 watts, unlimited time. Amended: by adding names of Mrs. Jack E. Brantley, & Jack E. Brantley, Jr.

NEW—H. Wimpy, Albany, Ga.—Construction permit for a new 1420 broadcast station to be operated on 1420 kc., 100 watts, 250 watts-day, unlimited time. Requests facilities of WGPC.

WHBB—Dr. Wm. J. Reynolds, & Wm. J. Reynolds, Jr., Selma, 1500 Ala., voluntary assignment of license from Dr. Wm. J. Reynolds, & Wm. J. Reynolds, Jr., to W. J. Reynolds, Jr., J. C. Hughes, & J. S. Allen, d/b as Selma Broadcasting Co.

Fourth Zone

KFDM—Sabine Broadcasting Co., Inc., Beaumont, Texas—Con- 580 sent to transfer control of corporation from Mrs. Virginia B. Gilliam to J. M. Gilliam, 32½ shares common stock.

NEW—Harry J. Grant, Milwaukee, Wisc.—Construction permit 1010 for a new station to be operated on 1010 kc., 1 KW, unlimited time. Amended: To change type of equipment, change power from 1 KW to 250 watts, 500 watts-day and change directional antenna to vertical antenna.

NEW—KMJB Broadcasting Co., by Myron J. Bennett, Pres., 1300 Minot, N. D.—Construction permit for a new broadcast station to be operated on 1300 kc., 1 KW power, unlimited time, requesting facilities of KLPB.

WMBH—Joplin Broadcast Co., Joplin, Mo.—Consent to transfer 1420 of control of corporation from W. M. Robertson, and W. H. Spurgeon to Joplin Globe Publishing Co., 90 shares of common stock.

Fifth Zone

NEW—Ben S. McGlashan, San Diego, Calif.—Construction permit 550 for a new station to be operated on 1210 kc., 100 watts, daytime. Amended: To change frequency from 1210 kc. to 550 kc., and power from 100 watts to 250 watts.

KIRO—Queen City Broadcasting Co., Seattle, Wash—Authority 650 to install automatic frequency control.

KGHL—Northwestern Auto Supply Company, Inc., Billings, Mont. 780 —Extension of special experimental authorization to operate on 780 kc., for a period from 4-1-36 to 7-1-36.

NEW—The Tribune, Great Falls, Mont.—Construction permit for 950 a new broadcast station to be operated on 950 kc., 1 KW; 5 KW-day, unlimited time. Amended: To omit request for facilities of KFVR.

NEW—Ed Klies, Helena, Mont.—Construction permit to erect a 1210 new broadcast station to be operated on 1210 kc., 100 watts-250 watts day, unlimited time. Amended: Re; Equipment.

NEW—Albuquerque Publishing Co., Albuquerque, N. M.—Con- 1370 struction permit for a new station to be operated on 1370 kc., 100 watts, unlimited time.

NEW—D. Reginald Tibbetts, Berkeley, Calif.—Construction permit to change frequency from 31100 kc., to 31600, 35600, 38600, 41000 kc., using 200 watts.

Standard Radio Inc., Hollywood, Calif.—Authority to transmit programs (Electrical Transcription) to foreign countries. (CHWC, Regina Sask, Canada, and CFRB, Toronto, Ont., Canada).

PETTEY RESIGNS

Herbert L. Petty, secretary of the Federal Communications Commission since March 31, 1933, when he succeeded James W. Baldwin, has resigned effective May 1. Mr. Petty will become associated with broadcasting station WHN, New York City, as associate manager.

COPYRIGHT HEARINGS CONTINUE

Copyright hearings before the House Committee on Patents continued on Monday, Tuesday and Wednesday of this week and will be continued through Friday. Hearings will be held next week on the same days and will be concluded on April 15 under the present arrangements.

On Wednesday the National Performing Artists Association appeared in support of the Daly bill and opposing the Duffey bill.

RECOMMENDS NEW WATERTOWN STATION

A. W. Hayes filed an application with the Federal Communications Commission asking for a construction permit for a new station to be erected at Erie, Pa., to use 1270 kilocycles, 500 watts and 1,000 watts LS, unlimited time. At the same time the Watertown Broadcasting Corporation filed an application with the Commission asking for a construction permit for a new station at Watertown, N. Y., to use 1270 kilocycles, 250 watts and daytime operation.

Examiner Melvin H. Dalberg in Report No. I-212 recommended that the Watertown application be granted but that the Erie application be denied. The Examiner states that the Pennsylvania area is overquota while the Watertown area is under quota. He found also that interference would be caused by granting the Erie application while the Watertown application if granted would not cause interference. He states also that the Watertown area "has a definite need for additional daytime service."

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

Wyoming Valley Collieries Co., Scranton, Pa. (2-1987, Form A-1)
United States Casualty Co., New York City (2-1988, Form A-2)
Citizens Mortgage & Securities Co., Inc., Springfield, Mo. (2-1990, Form A-2)
The Temblor Oil Co., Boston, Mass. (2-1991, Form A-1)
San-Nap-Pak Manufacturing Co., New York City (2-1992, Form A-2)
United Endowment Foundation, Inc., New York City (2-1993, Form C-1)
Phillips Packing Co., Inc., Cambridge, Md. (2-1994, Form A-2)
Bonded Commodity Corp., Boston, Mass. (2-1996, Form A-1)
William Jacob Hildebrandt, Jacksonville, Florida (2-1997, Form E-1)

NOTES TO SALES STAFF

The marked gain in radio advertising on the part of the automotive industry should be of interest to all portions of the medium. (See Comparison with February 1935, see page 1266.)

The further gains experienced by regional network and national non-network advertising indicate additional sales opportunities in these fields. (See Total Broadcast Advertising, see page 1264.)

The 13.0% gain in general broadcast advertising volume should be encouraging; but the fact that for the first time in months, radio broadcasting should have gained at a rate less than several other media should constitute a challenge to sales staffs. (See Comparison with Other Media, see page 1265.)

International Investors Fund System, Inc., Scranton, Pa. (2-1998, Form C-1)

Wentworth Manufacturing Co., Chicago, Ill. (2-1999, Form A-2)

Morgan Industries, Inc., Philadelphia, Pa. (2-2000, Form A-1)

NEW ALASKAN STATION RECOMMENDED

Edwin A. Kraft applied to the Federal Communications Commission for a construction permit for the erection of a new broadcasting station at Fairbanks, Alaska, to use 950 kilocycles, 250 watts power and unlimited time on the air. Also John A. Stump applied for a construction permit for a station to be erected in the same city using 1210 kilocycles, 100 watts, 250 watts LS and unlimited time on the air.

Examiner George H. Hill, in Report No. I-213, recommended that the Kraft application be denied but that the Stump application be granted. The Examiner found that there is need for additional radio service at Fairbanks and that there is adequate local talent available there. No interference would result from the erection of either of the proposed stations.

Mr. Hill states that Mr. Kraft, while well able to construct and operate such a station as proposed by him, now owns a station at Juneau and is not a resident of Fairbanks. On the other hand Mr. Stump is a resident of Fairbanks and his associates in the corporation proposing to operate the new station are "also residents of Fairbanks." The Examiner states therefore that public interest "would be served by the granting of the application of John A. Stump for a construction permit."

C. C. I. R. COMMITTEE ORGANIZATION

The outline of committee organization for the Cairo radio conference is given by the International Section of the Federal Communications Commission as follows:

I. Committee on Technical Matters

Chairman: Dr. J. H. Dellinger
Vice Chairman: Lt. Col. D. M. Crawford

Articles:

1. Definitions
5. Classification of Emissions
6. Quality of Emissions

Appendix 1. Table of Frequency Tolerances and of Instabilities

Appendix 2. Table of Frequency-Band Widths Occupied by the Emissions

II. Committee on Traffic Matters

Chairman: Captain S. C. Hooper
Vice Chairman: Mr. E. M. Webster

Articles:

16. General Radiotelegraph Procedure in the Mobile Service
17. General Call "to all"
18. Calling
19. Use of Waves in the Mobile Service
22. Distress Traffic and Distress Signals—Alarm, Emergency, and Safety Signals
24. Order of Priority of Communications in the Mobile Service
25. Indication of the Station of Origin of Radiotelegrams
26. Routing of Radiotelegrams
29. Service of Low-power Mobile Radiotelephone Stations
30. Special Services

Appendix 9. List of Abbreviations to be Used in Radio Communication

Appendix 10. Scale Used to Express Strength of Signals

Appendix 12. Procedure in the Service of Low-Power Mobile Radiotelephone Stations

Appendix 13. Procedure to Obtain Radio Direction-Finding Bearings

Articles of Additional Radio Regulations:

3. Order of Priority of Communications in the Mobile Service
4. Time of Filing of Radiotelegrams
5. Address of Radiotelegrams
6. Doubtful Reception—Transmission by "Ampliation"—Long-Distance Radio Communication
7. Retransmission by Stations of the Mobile Service
8. Notice of Nondelivery
9. Period of Retention of Radiotelegrams at Land Stations
10. Radiotelegrams to be Forwarded by Ordinary Mail or by Air Mail.
11. Special Radiotelegrams
12. Radio Communications for Multiple Destinations

III. Committee on Allocation

Chairman: Mr. T. A. M. Craven
Vice Chairman: Mr. E. K. Jett

Articles:

7. Allocation and Use of Frequencies (Wavelengths) and of Types of Emission

IV. Committee on Administration

Chairman: Comdr. F. A. Zeusler
Vice Chairman: Mr. Gerald C. Gross

Articles:

4. Choice of Apparatus
8. Amateur Stations and Private Experimental Stations
9. Conditions to be Observed by Mobile Stations
10. Operators' Certificates
11. Authority of the Master
12. Inspection of Stations
13. Reporting of Violations
14. Call Signals
15. Service Documents
20. Interference
21. Emergency Installations
23. Working Hours of Stations of the Mobile Service
27. Accounting for Radiotelegrams
28. Aeronautical Radio Service of Public Correspondence
31. International Radio Consulting Committee (C.C.I.R.)
32. Expenses of the Bureau of the Union
33. Effective Date of the General Regulations

Appendix 3. Report of a Violation of the Telecommunication Convention or of the Radio Regulations

Appendix 4. Hours of Service for Ship Stations in the Second Category

Appendix 5. Hours of Service for Ship Stations in the Second Category

Appendix 6. Service Documents

Appendix 7. Service Symbols

Appendix 8. Documents with which Mobile Stations Must be Provided

Appendix 11. Statement of Radiotelegrams exchanged with Mobile Stations

Appendix 14. Internal Regulations of the International Radio Consulting Committee (C.C.I.R.)

Articles of Additional Radio Regulations:

1. Application of the Telegraph and Telephone Regulations to Radio Communication
2. Charges

WARNER BROTHERS SUITS

Warner Brothers have made official announcement that they have begun more suits based on the alleged infringement of song copyrights owned by them as follows:

Harms, Inc., vs. Knickerbocker Broadcasting Co., operating station WMCA, for the alleged infringement of "The Continental" and "Deep In the Arms of Love," for which \$10,000 damages are demanded.

M. Witmark & Sons vs. Two East Sixty-First Street Corporation, operating the Hotel Pierre, on the number "A Kiss in the Dark," for which \$250 damages are demanded.

Harms, Inc. vs. Restaurant La Rue Co., Inc., operating the La Rue Restaurant, on the numbers "Where Am I," "Anything Goes" and "Tea For Two," for which \$750 damages are demanded.

New World Music Corp. vs. Roosevelt Hotel on the number "I Got Rhythm" for which \$250 damages are demanded.

New World Music Corp. vs. Famous Door, Inc., on the number "I Got Rhythm," for which \$250 damages are demanded.

Harms, Inc. vs. Anthony Libertino, operating Jimmy Kelly's, on the numbers "Where Am I" and "Let's Swing It," for which \$500 damages are demanded.

M. Witmark & Sons vs. MacFayne Corp., operating Leon and Eddie's, on the numbers "Lulu's Back In Town," for which \$250 damages are demanded.

T. B. Harms, Inc. vs. Roosevelt Hotel on the numbers "Make Believe" and "Who?", for which \$500 damages are demanded.

Harms, Inc. vs. Stork Restaurant, Inc., operating the Stork Club, on the numbers "Let's Swing It" and "Night and Day," for which \$500 damages are demanded.

T. B. Harm Co. vs. 151 East 50th Street Restaurant Corporation, operating the Versailles Restaurant, on the numbers "Who?" and "Why Do I Love You," for which \$500 damages are demanded.

Restaurants, hotels and night clubs out of New York are made the defendants in the following actions:

Remick Music Corp. vs. Kamehameha (Royal Hawaiian Club), San Francisco, on the number "Sweet Georgia Brown," for which \$250 damages are demanded.

Harms, Inc. vs. Kamehameha on the number "Night and Day," for which \$250 damages are demanded.

Remick Music Corp. vs. The Hotels Statler Company, Inc., Detroit, on the number "My Buddy," for which \$250 damages are demanded.

Harms, Inc. vs. The Hotels Statler Company, Inc., Detroit, on the number "You Took Advantage of Me," for which \$250 damages are demanded.

Remick Music Corp. vs. Gardiner Becker Restaurant Co., operating the Oriole Terrace, Detroit, on the number "Don't Give Up the Ship," for which \$250 damages are demanded.

Harms, Inc. vs. Gardiner Becker Restaurant Co., operating the Oriole Terrace, Detroit, on the number "April in Paris," for which \$250 damages are demanded.

M. Witmark & Sons vs. Associated Ballrooms, Inc., operating The Trianon, Cleveland, on the song "My Wild Irish Rose," for which \$250 damages are demanded.

M. Witmark & Sons vs. Philip Gordon, operating the Ambassador Cafe, on the number "My Wild Irish Rose," for which \$250 damages are demanded.

Harms, Inc. vs. The Hotels Statler Company, Inc., operating the Hotel Statler, Cleveland, on the number "Where Am I," for which \$250 damages are demanded.

M. Witmark & Sons vs. The Hotels Statler Company, Inc., operating the Hotel Statler, St. Louis, on the number "My Wild Irish Rose," for which \$250 damages are demanded.

M. Witmark & Sons vs. Bosmor Corp., operating the Morrison Hotel, Chicago, on the number "My Wild Irish Rose," for which \$250 damages are demanded.

Suits filed against radio stations comprise:

Remick Music Corp. vs. Station WOOA, Pensacola, Fla., on the numbers "I'm Looking for a Four Leaf Clover" and "Whistle and

Blow Your Blues Away," for which \$500 damages are demanded. Remick Music Corp. vs. Station WBIG, Greensboro, N. C., on the number "Whistle and Blow Your Blues Away," for which \$250 damages are demanded.

Harms, Inc. vs. Station WGBB, Freeport, N. Y., on the number "I'm Just An Ordinary Human," for which \$250 damages are demanded.

Remick Music Corp. vs. Station WIBA, Madison, Wis., on the number "Put On Your Old Grey Bonnet," for which \$5,000 damages are demanded.

Remick Music Corp. vs. Station KGU, Honolulu, Territory of Hawaii, on the number "Put On Your Old Grey Bonnet," for which \$5,000 damages are demanded.

M. Witmark & Sons vs. Station WIXBS, Waterbury, Conn., on the numbers "That Old Irish Mother Of Mine" and "In a Shanty in Old Shanty Town," for which \$500 damages are demanded.

Remick Music Corp. vs. Station WIXBS, Waterbury, on the number "Avalon," for which \$250 damages are demanded.

M. Witmark & Sons vs. Station WSMB, New Orleans, on the number "Lulu's Back In Town," for which \$5,000 damages are demanded.

Remick Music Corp. vs. Station WGST, Atlanta, Ga., on the number "Whistle and Blow Your Blues Away," for which \$5,000 damages are demanded.

Remick Music Corp. vs. Station WOWO, Fort Wayne, Ind., on the number "My Isle of Golden Dreams," for which \$5,000 damages are demanded.

Harms, Inc. vs. Station KTFI, Twin Falls, Idaho, on the numbers "Toddlin' Along With You," for which \$250 damages are demanded.

Remick Music Corp. vs. Station KPO, San Francisco, Cal., on the number "Put On Your Old Grey Bonnet," for which \$5,000 damages are demanded.

Remick Music Corp. vs. Station KOA, Denver, Colo., on the number "Put On Your Old Grey Bonnet," for which \$5,000 damages are demanded.

Remick Music Corp. vs. Station KTAR, Phoenix, Ariz., on the number "Put On Your Old Grey Bonnet," for which \$5,000 damages are demanded.

Remick Music Corp. vs. Station WDAY, Fargo, N. D., on the number "Put On Your Old Grey Bonnet," for which \$5,000 damages are demanded.

Remick Music Corp. vs. Station KFYZ, Dismarck, N. D., on the number "Put On Your Old Grey Bonnet," for which \$5,000 damages are demanded.

Remick Music Corp. vs. Station KSOO, Sioux Falls, S. D., on the number "When The Pussywillow Whispers To The Catnip," for which \$250 damages are demanded.

Remick Music Corp. vs. Station WCHS, Charleston, W. Va., on the numbers "To Call You My Own," "I Need Lovin'," "I Can't Go On Like This" and "Put On Your Old Grey Bonnet," for which \$1,000 damages are demanded.

STATION WINS RADIO TAX CASE

The United States Supreme Court on Monday handed down a most important radio tax decision in the case of Fisher's Blend Station, Inc., against the Tax Commission of the State of Washington. The station won its case although the Supreme Court of the State of Washington had previously ruled against it. Because of the importance of the case we print the decision in full as follows:

SUPREME COURT OF THE UNITED STATES

No. 628.—October Term, 1935

FISHER'S BLEND STATION, INC., *Appellant*,
vs.

THE TAX COMMISSION OF THE STATE OF WASHINGTON, ET AL.

Appeal from the Supreme Court of the State of
Washington

[March 30, 1936.]

Mr. Justice STONE delivered the opinion of the Court.

This appeal from a judgment of the Supreme Court of the State of Washington, Judicial Code, § 237, presents the question whether a state occupation tax, measured by the gross receipts from radio broadcasting from stations within the state, is an unconstitutional burden on interstate commerce.

Appellant brought suit to enjoin appellees, the State Tax Commission, from collecting the tax, laid by § 2 of Chapter 191 of the Washington Laws of 1933, as an infringement of the commerce clause of the federal Constitution. On demurrer to the bill of complaint, and on stipulation of the parties that the cause might be decided upon the facts there alleged, the state Supreme Court gave final judgment for the appellees. — Wash. —.

Appellant maintains, within the state, two broadcasting stations licensed by the Federal Radio Commission (now the Federal Communications Commission). One is licensed to operate with power and a radio frequency enabling it to broadcast throughout the "fifth zone," which comprises eleven western and northwestern states, including Washington, and the Territories of Alaska and Hawaii. The other is licensed to operate as a "clear channel" station, that is to say, a station to which the Commission has assigned a radio frequency to be used at such times and with such power as will enable it to broadcast throughout the United States without interference by other stations. §§ 2, 4, 5, Federal Radio Act of 1927,¹ 44 Stat. 1162; Regulations, Federal Radio Commission, File No. 5-R-B-63 and Official No. 63; File No. 5-R-B-67 and Official No. 67, Nos. 70-75, No. 111, Nos. 116-124. These stations broadcast over the areas for which they are licensed, and the adjacent high seas and a part of Canada.

Broadcasting, according to the allegations of the complaint, is accomplished by the generation, at the broadcasting station, of electro-magnetic waves, which pass through space to receiving instruments which amplify them and translate them into audible sound waves. The essential elements in the broadcasting operation are a supply of electrical energy, a transmitter, the connecting medium or "ether" between the transmission and receiving instruments, and the receiving mechanism.

Appellant's entire income consists of payments to it by other broadcasting companies or by advertisers for broadcasting, from its Washington stations, advertising programs originating there or transmitted to them from other states by wire. Appellant "sells time" to its customers at stipulated rates, during which it broadcasts from its stations such advertising programs as may be agreed upon. During such time as is not sold, it broadcasts, at its own expense, "sustaining" programs, as required by the regulations of the Federal Radio Commission. The customers desire the broadcasts to reach the listening public in the areas which appellant serves, and a large number of persons, many of them in other states, listen to the broadcasts from appellant's stations.

The state Supreme Court recognized that state taxation of gross income derived from interstate commerce is forbidden by the commerce clause. But it upheld the tax on the ground that the business from which appellant receives its income is not interstate commerce. It conceded, as it had previously held, *Van Dusen v. Department of Labor and Industries*, 158 Wash. 414, that broadcasting is commerce, and that the broadcasting by appellant of its own programs for which it does not receive pay is interstate commerce. But it concluded that appellant's remunerative business is not interstate commerce because it consists of furnishing, within the state, the facilities of its stations to customers who use them for broadcasting their programs, and the business of providing such facilities, like that of providing a bridge for the use of others in crossing state lines, is not commerce. See *Detroit International Bridge Co. v. Corporation Tax Appeal Board*, 294 U. S. 83; *Henderson Bridge v. Kentucky*, 166 U. S. 550.

We may assume, although it is not alleged, that appellant's customers produce the sounds which are broadcasted. But it sufficiently appears, although the complaint does not specifically so state, that appellant, and not the customer, generates the electric current and controls the apparatus (generator, transmitter and their controls) by which the sounds are broadcasted. The complaint states that appellant operates its stations and conducts the business of broadcasting in the manner already described, and that the license to operate them is granted to appellant by the Federal Radio Commission under the Federal Radio Act. These allegations, read in the light of the statute, which forbids any save licensees to operate broadcasting apparatus, § 1, Federal Radio Act of 1927, 44 Stat. 1162, and of the facts of which we have judicial knowledge, see *Buck v. Jewel-LaSalle Realty Co.*, 283 U. S. 191, 200; *DeForest Radio Co. v. General Electric Co.*, 283 U. S. 664, 670, *et seq.*, must be taken to state that the broadcasting of radio emanations, as distinguished from the production of the sounds broadcasted, is affected by appellant and not by its customers.

The sounds broadcasted are not transmitted from the microphone to the ears of listeners in other states. They do not pass

¹ This Act has been superseded by the Act of June 19, 1934, 48 Stat. 1081. 47 U. S. C. § 301ff.

as sound waves to the receiving mechanisms. They serve only to enable the broadcaster, by the use of appropriate apparatus, to modulate the radio emanations which he generates. These emanations as modulated, are projected through space to the receiving sets. There, by a reverse process, they so actuate the receiving mechanisms as to produce a new set of sound waves, of frequencies identical with those produced at the microphone. On the argument it was conceded that, in broadcasting for its customers, appellant, by generating the necessary electric power and controlling the transmitter, produces the radio emanations which actuate the receiving mechanisms located in other states. Upon the facts alleged, we see no more basis for saying that appellant's customers do the broadcasting than for saying that a patron of a railroad or a telephone company alone conducts the commerce involved in his railroad journey or telephone conversation.

Appellant is thus engaged in the business of transmitting advertising programs from its stations in Washington to those persons in other states who "listen in" through the use of receiving sets. In all essentials its procedure does not differ from that employed in sending telegraph or telephone messages across state lines, which is interstate commerce. *Western Union Telegraph Co. v. Speight*, 254 U. S. 17; *New Jersey Bell Tel. Co. v. State Board of Taxes*, 280 U. S. 338; *Cooney v. Mountain States Tel. & Tel. Co.*, 294 U. S. 384; No. 593, *Pacific Tel. & Tel. Co. v. Washington*, decided March 2, 1936. In each, transmission is effected by means of energy manifestations produced at the point of reception in one state which are generated and controlled at the sending point in another. Whether the transmission is effected by the aid of wires, or through a perhaps less well understood medium, "the ether", is immaterial, in the light of those practical considerations which have dictated the conclusion that the transmission of information interstate is a form of "intercourse", which is commerce. See *Gibbons v. Ogden*, 9 Wheat. 1, 189.

Similarly, we perceive no basis for the distinction urged by appellee, that appellant does not own or control the receiving mechanisms. The communications broadcasted are no less complete and effective, nor any the less effected by appellant, because it does not own or command the apparatus by which they are received. The essential purpose and indispensable effect of all broadcasting is the transmission of intelligence from the broadcasting station to distant listeners. It is that for which the customer pays. By its very nature broadcasting transcends state lines and is national in its scope and importance—characteristics which bring it within the purpose and protection, and subject it to the control, of the commerce clause. See *Federal Radio Commission v. Nelson Bond & Mortgage Co.*, 289 U. S. 266, 279.

It is unnecessary to determine whether, as the court below suggested and appellee argues, like considerations would require us to hold that the exposure of a sign board, in one state, to the view of dwellers in another, is likewise interstate commerce. Whether the practical and scientific aspects of such an operation bring it within the range of those factors which we deem controlling here, may well be left for decision when such a case is presented. See *Pantomimic Corporation v. Malone*, 238 Fed. 135.

As appellant's income is derived from interstate commerce, the tax, measured by appellant's gross income, is of a type which has long been held to be an unconstitutional burden on interstate commerce. *Philadelphia & So. Mail S. S. Co. v. Pennsylvania*, 122 U. S. 326; *Leloup v. Port of Mobile*, 127 U. S. 640; *Galveston, H. & S. A. R. Co. v. Texas*, 210 U. S. 217; *Crew-Levick Co. v. Pennsylvania*, 245 U. S. 292. But appellee further contends, as the state court thought, that, even though broadcasting involves interstate commerce, the maintenance and operation of appellant's stations includes intrastate activities which may be subjected to state taxation, as was the generation of electricity, transmitted to points outside the state, in *Utah Light & Power Co. v. Pfost*, 286 U. S. 165. There the tax was measured by the amount of current generated at the taxpayer's hydro-electric plant, from which electric power was supplied to consumers in other states. This Court held that the operation of generating electrical power, although virtually simultaneous with its transmission, is so distinct and separable from the operation of transmission, in interstate commerce, as to be the appropriate subject of a state tax. The argument now made overlooks the fact that the present tax is not levied upon or measured by appellant's generation of electro-magnetic waves, but by its gross receipts for the service it performs, which includes both the generation of the energy and its transmission as a means of communication interstate.

Whether the state could tax the generation of such energy, or other local activity of appellant, as distinguished from the gross income derived from its business, it is unnecessary to decide. See *City of Atlanta v. Oglethorpe University*, 178 Ga. 379. It is enough that the present is not such a tax, but is levied on gross re-

ceipts from appellant's entire operations, which include interstate commerce. As it does not appear that any of the taxed income is allocable to intrastate commerce, the tax as a whole must fail, *Cooney v. Mountain States Tel. & Tel. Co.*, *supra*; cf. *Pacific Tel. & Tel. Co. v. Washington*, *supra*, and the judgment of the state court must be reversed and the case remanded for further proceedings not inconsistent with this opinion.

Reversed.

BROADCAST ADVERTISING IN FEBRUARY

Developments of the Month

Broadcast advertising in February experienced a gain of 1.3% over the preceding month's level and registered an increase of 13.0% as compared to the corresponding month of 1935. Gross time sales of the medium in February amounted to \$4,785,804.

A marked increase occurred in national non-network advertising as compared to the previous month, gross revenues rising 19.7%. The usual seasonal trends were evident in other portions of the medium, declines occurring in the regional network and local fields.

Regional network and national non-network advertising continued to experience the heaviest increases as compared to corresponding periods of the preceding year. The February gains in these fields were respectively 59.3% and 45.6%. Local broadcast advertising dropped below the preceding year's level for the first time in a year and a half.

Non-network advertising gained 2.0% over January and 21.8% over the preceding February. Regional and local stations experienced the greatest increase in non-network volume as compared to the same month of 1935.

The South-South Central area showed the heaviest gain of any geographical district both as against January and as compared to last year.

Transcription volume gained markedly in both the national and local fields. National non-network live talent volume continued to show important increase over the corresponding period of previous seasons.

Trends as to radio sponsorship were spotty during the month. The heaviest gains as compared to the preceding year were in the automotive field where national non-network advertising rose 349.0%, local broadcast advertising 75.5% and national network volume 10.7%.

Retail broadcast advertising experienced the usual seasonal decline from the January level but remained 5.5% above the volume of the corresponding month of 1935.

Total Broadcast Advertising

Total broadcast advertising over stations and networks during the month under review is set forth in Table I.

TABLE I
TOTAL BROADCAST ADVERTISING

1936 Gross Time Sales			
Class of business	January	February	Cumulative Jan.-Feb.
National networks	\$4,740,560	\$4,785,804	\$9,526,364
Regional networks	95,340	92,432	187,772
National non-networks	1,626,500	1,946,650	3,573,150
Local	1,572,760	1,316,950	2,889,710
Total	\$8,035,160	\$8,141,836	\$16,176,996

Total broadcast advertising volume increased 1.3% as compared to January. National non-network volume showed the greatest gain rising 19.7% over the preceding month's level. National network volume remained comparatively unchanged while regional network advertising and local radio advertising declined 3.1% and 16.3% respectively.

Compared to February, 1935, gross time sales of the medium increased 13.0%. The heaviest gains occurred in regional network and national non-network volume, which rose 59.3% and 45.6% respectively.

National network advertising rose 7.0%, while local broadcast advertising volume fell below the level of the corresponding period of the preceding season for the first time in approximately a year and a half. Local broadcast advertising was 1.7% below that of February, 1935.

Comparison with Other Media

For the first time in some months several other media showed greater gains than did radio broadcasting. Compared to the 1.3% increase in radio volume as against January, national magazine advertising rose 36.1% and national farm paper volume increased 35.8%. Newspaper lineage experienced the usual seasonal decline, dropping 7.1%.

National magazine advertising rose 17.1% as compared to the preceding February, while national farm paper volume gained 34.0%. Newspaper lineage rose 3.2% as against the previous year. Advertising volume placed in national media during February is found in Table II.

TABLE II
ADVERTISING BY MAJOR MEDIA

1936 Gross Time and Space Sales

<i>Advertising Medium</i>	<i>January</i>	<i>February</i>	<i>Cumulative Jan.-Feb.</i>
Radio broadcasting	\$8,035,160	\$8,141,836	\$16,176,996
National magazines ¹	8,256,125	11,240,096	19,496,221
National farm papers ¹	421,999	657,717	1,079,716
Newspapers ²	39,280,000	36,511,000	75,791,000
Total	\$55,993,284	\$56,550,649	\$112,543,933

¹ Publishers' Information Bureau.

² Estimated.

Non-Network Advertising

Non-network advertising as a whole gained 2.0% over January and increased 21.8% as compared to February of the preceding year.

Regional station volume alone declined as compared to the previous month, non-network advertising over this class of station dropping 2.9%. Clear channel station non-network advertising rose 6.1% while local station volume increased 2.0%.

Regional and local station volume experienced the greatest gains as compared to the corresponding month of last year. Regional non-network advertising rose 28.8%, while local volume increased 42.9%. Clear channel station advertising gained 12.3%. Broadcast advertising by power of station is found in Table III.

TABLE III
NON-NETWORK ADVERTISING BY POWER OF STATION

1936 Gross Time Sales

<i>Power of Station</i>	<i>January</i>	<i>February</i>	<i>Cumulative Jan.-Feb.</i>
Over 1,000 watts	\$1,489,900	\$1,580,270	\$3,070,170
250-1,000 watts	1,221,120	1,185,180	2,406,300
100 watts	488,240	498,150	986,390
Total	\$3,199,260	\$3,263,600	\$6,462,860

TABLE V
NON-NETWORK BROADCAST ADVERTISING BY TYPE OF RENDITION

<i>Type of Rendition</i>	<i>National Non-network</i>		<i>Local</i>		<i>Total</i>		<i>Cumulative Jan.-Feb.</i>
	<i>January</i>	<i>February</i>	<i>January</i>	<i>February</i>	<i>January</i>	<i>February</i>	
Electrical transcriptions	\$649,280	\$694,775	\$140,180	\$118,995	\$789,460	\$813,770	\$1,603,230
Live talent programs	732,970	994,530	894,000	715,770	1,626,970	1,710,300	3,337,270
Records	4,720	2,670	52,470	53,430	57,190	56,100	113,290
Announcements	239,530	254,675	486,110	428,755	725,640	683,430	1,409,070
Total	\$1,626,500	\$1,946,650	\$1,572,760	\$1,316,950	\$3,199,260	\$3,263,600	\$6,462,860

Sponsor Trends in February

Trends during the month as a whole were spotty with numerous declines offsetting gains except in the national non-network field where only one significant decrease occurred. The decrease in question was a 31.0% drop in national non-network amusement volume. This comprises a comparatively unimportant group in the non-network field.

Principal gains of importance in non-network advertising as compared to January were as follows: gasoline and accessories 52.0%;

The South Atlantic—South Central area experienced the greatest gain in non-network volume as compared either to the preceding month or to the corresponding period of 1935. Non-network advertising in this area rose 7.2% over the January level and 61.5% over that of February of last year. Non-network advertising in the New England—Middle Atlantic area dropped 3.9% as against the previous month and remained unchanged from last February.

North Central non-network advertising rose 2.9% as compared to the preceding month and 26.0% as against last year. Advertising in the Pacific and Mountain area increased 1.4% over January and 10.8% over February, 1935. Non-network advertising by geographical areas as set forth in Table IV.

TABLE IV

NON-NETWORK BROADCAST ADVERTISING BY GEOGRAPHICAL DISTRICTS

1936 Gross Time Sales

<i>Geographical District</i>	<i>January</i>	<i>February</i>	<i>Cumulative Jan.-Feb.</i>
New England—Middle Atlantic Area	\$686,350	\$659,400	\$1,345,750
South Atlantic—South Central Area	631,410	676,600	1,308,010
North Central Area	1,286,400	1,324,000	2,610,400
Pacific and Mountain Area	595,100	603,600	1,198,700

Total

Non-Network Volume by Type of Rendition

The principal development in the rendition field was the marked strength exhibited by transcription business. Transcription volume rose 3.1% as against January and 54.5% as compared to February, 1935. In the national non-network field, transcription volume showed a gain of 7.0% over the preceding month and 65.4% as compared to the previous year. Local transcription advertising declined 15.1% from the January level in keeping with the usual seasonal trend. However, it remained 13.3% above the previous year's level.

In the national non-network field live talent business continued to show considerable strength rising 3.6% above January and showing a gain of 61.0% over last February. Local live talent volume declined 19.9% over the month and remained unchanged from the previous year's level.

Announcements declined in both the national and local fields as compared to February of the preceding year. The national decrease was 13.1%, while the local decline amounted to 5.5%. National announcement volume rose 6.3% as against January while local announcements declined 11.8%.

National non-network and local broadcast advertising by type of rendition is found in Table V.

cosmetics 69.4%; beverage 73.4%; financial 173.9% and tobacco 53.7%.

Important increases in national network advertising during the month were as follows: automotive 9.3%; clothing 18.4%; financial advertising 37.1%, and miscellaneous 9.5%. Confectionery and tobacco advertising declined slightly.

In the regional network field soap and kitchen supply advertising increased markedly with general declines throughout the major portion of the remaining product groups. Local declines also were general with the exception of a 15.7% rise in amusement advertising and one of 17.1% in automotive volume.

Comparison with February, 1935

Trends in the national network field were rather uncertain with both marked increases and decreases. The most important gains as against the corresponding month of last year were a 10.7% rise in automotive volume, an increase of 55.6% in gasoline and accessory advertising, a rise of 43.0% in beverage volume, and a gain of 66.2% on the part of the miscellaneous group. The last-mentioned rise was due largely to the office equipment classification within that group.

National network drug advertising dropped 27.8%, confectionery advertising declined 39.6% and household equipment volume 49.4%.

The principal gain in the regional network field was a 98.7%

rise in food volume. All branches of national non-network advertising showed an increase as compared to February of the preceding year. The principal gains were a rise of 349.0% in automotive volume, an increase of 198.6% in beverage advertising, and an increase of 91.6% in tobacco advertising.

In the local field automotive volume rose 75.7%, while slight increases were experienced in the clothing, food, household equipment and miscellaneous groups. The principal decline of importance occurred in the gasoline and accessory group where a drop of 24.7% was experienced. Broadcast advertising volume during February by national product and service group is found in Table VI.

Details as to Sponsor Trends

Details as to trends in broadcast advertising volume in various sponsoring groups are as follows:

1a. *Amusements.* National non-network 31.0% below January. Local up 15.7%. Compared to February last year national non-network more than tripled and local unchanged. Total up 8.5%.

1. *Automotive.* National network volume 9.3% over January. National non-network up 7.7% and local 17.1%. Compared to last February gains as follows: national network 10.7%; national non-network 349.0%; local 75.5%.

2. *Accessories and gasoline.* National networks 1.0% below January and regional networks down 24.0%. Local down 30.1% and national non-network up 52.0% compared to February, 1935 gains as follows: national networks 55.6%; regional networks 27.0%; and national non-network 38.8%. Local volume down 24.7%.

3. *Clothing.* National network advertising 18.4% above January and national non-network up 18.9%. Regional volume down 30.3% and local 31.6%. Compared to last February national network volume down 13.7% and regional advertising 87.0%. National non-network business up 57.6% and local advertising 4.0%.

4. *Drugs and pharmaceuticals.* Declines from January as follows: national network 1.1%, regional network 2.8% and local 27.6%. National non-network advertising up 2.0%. Regional network volume 80.0% above February of preceding year. National non-network volume up 23.1%, national network advertising down 27.8% and local down 31.0%.

5. *Toilet goods.* National network volume unchanged from January. National non-network advertising up 69.4%. Regional network volume down 17.2% and local 19.2%. Gains compared to corresponding month of previous year as follows: national networks 9.6%; regional networks 295.0%; national non-network 37.8%. Local down 37.7%.

6. *Foodstuffs.* National network volume unchanged from previous month. Regional networks up 3.4% and national non-network 9.6%. Local down 10.4%. National network advertising 7.2% below same month of last year. Other gains as follows: regional networks 98.7%; national non-network 37.5% and local 9.5%.

7. *Beverages.* National network volume 4.4% ahead of previous month. National non-network up 73.4%. Regional networks down 13.9% and local 30.5%. National network advertising 43.0% ahead of corresponding month of 1935. National non-network up 198.6%. Regional networks down 22.2% and local 13.9%.

8. *Confectionery.* Declines from January as follows: national networks 15.5%; regional networks 32.7%; local 75.9%. National non-network up 25.0%. Declines as compared to preceding February as follows: national networks 39.6%; national non-network 22.2% and local 50.0%. Regional network volume up 94.0%.

9. *Household equipment.* Declines from previous month as follows: national networks 4.8%; regional networks 37.2% and local 6.5%. National non-network up 31.5%. National network volume down 49.4% from corresponding month of 1935. Regional volume unchanged. National non-network up 19.0% and local 3.4%.

10. *Soaps and kitchen supplies.* National network volume 9.6% above January. Regional volume up 487.7%. National non-network down 17.8% and local 64.5%. National network advertising 9.1% above previous February and regional volume up materially. Others unchanged.

11. *Financial and insurance.* National networks 37.1% above January and national non-network 173.9%. Regionals down 41.9% and local 13.5%. Compared to February of last year gains as follows: national networks 9.5%; national non-network 8.0% and local 19.8%.

12. *Radios.* National network advertising 4.3% greater than January. National non-network 13.4% above previous month and local down 3.4%. Compared to corresponding month of 1935 national network volume up 6.3%; national non-network volume increased from \$785 to \$16,390; and local increased 26.8%.

13. *Department and general stores.* National non-network advertising 75.7% over preceding month and local down 20.6%. National non-network advertising \$19,115 as against \$2,190 in preceding February. Local down 25.5%.

14. *Tobacco products.* National network volume 5.6% below January and regional network advertising down 6.5%. National non-network up 53.7% and local 29.6%. Compared to previous year gains as follows: national networks 11.6%; regional networks more than fivefold; national non-network 91.6% and local tripled.

15. *Miscellaneous.* National network advertising 9.5% over previous month. Regional network volume up 30.4% and national non-network 37.1%. Local down 10.6%. National network volume 66.2% above previous February. Other gains as follows regional networks 34.2%; national non-network 25.7% and local 7.8%.

Retail Broadcast Advertising

Broadcast advertising by retail establishments experienced the usual seasonal decline during the month. Total volume dropped 10.2% as compared to January but remained 5.5% above the February 1935 level. Declines were general from the previous month's level with the exception of a 33.3% increase in automotive volume, a rise of 26.6% in restaurant advertising and an increase of 3.9% in grocery store volume.

Principal increases of importance as against February of the previous year were as follows: automotive 78.8%; clothing and apparel 3.5%; grocery stores 46.5%; restaurants 52.8%; house furnishings 8.0%. The principal decline of the month was in the department store field where advertising volume dropped 13.3% below the February 1935 level.

Retail broadcast advertising during the month is found in Table VII.

Miscellaneous	75,320	78,920
Total	\$807,060	\$725,075

FEDERAL TRADE COMMISSION ACTION STIPULATIONS

The Commission has issued the following cease and desist orders:

No. 01123. E. A. Rush, 154-156 Edgewood Ave., Atlanta, operating as Beeman's Laboratories, and engaged in the sale of "B. G. O.", agrees to cease representing that his product is a competent remedy for all forms of skin diseases, that it will give instant relief for any form of suffering, and that it is a greaseless ointment.

No. 01141. Gracon Manufacturing Co., 2119-23 Gravois St., St. Louis, signed a stipulation to discontinue assertions that its product, "Co-Lubes", offered as a graphite lubricant for motors, increases speed of automobile 20 per cent and assures 20 per cent to 75 per cent savings in gas and oil mileage; that it will save repair bills and improve motors, and that it will cause motors to have good lubrication after running 4,000 miles without a change of oil.

The respondent will cease representing that agents selling "Co-Lubes" can earn "up to \$40 daily", or other exaggerated amounts.

No. 01342. Misleading advertising practices will be discontinued by A. F. Duverger, operating as National Distributors and Income Audit Service, Washington, D. C., under a stipulation.

Selling an "income audit service" and accounting and income tax service, the respondent is said to have advertised that prospective salesmen could make up to \$150 weekly by getting in on a fast selling service required by law, in which business there would be no competition, and more than ten million prospects.

In his stipulation, the respondent agrees to cease representing that the income audit service is required by law; that sales persons in this business have no competition, or have any specific number of prospects, and that every business or professional man or woman is required by law to keep a book of records.

No. 2413. Use of the word "distilled" by Federal Distilled Products, 425 North Water St., Milwaukee, so as to represent that it is a distiller of alcoholic beverages or owner of a distillery, has been ordered discontinued.

While the Commission, in its findings, expressed the opinion that the words "Distilled Products" alone would not constitute a misrepresentation, inasmuch as the respondent handles distilled products, it found that the respondent, by representing that such products are "prepared by" it and are "Federal Distilled", had made use of such parts of its corporate name in a manner which tended to deceive dealers and the purchasing public into the belief that the respondent was a distiller and that the spirituous liquors which it sold were distilled by it.

No. 2579. Misleading advertising of a cosmetic in newspapers, over the radio, and through other media, by **Lur-Eye Products, Inc.**, 1501 Broadway, New York City, and **W. R. Robinson Co., Kankakee, Ill.**, is prohibited by an order to cease and desist, issued against those respondents.

Producing and distributing "Lur-Eye Lash Developer" to the wholesale and retail trade, the respondents are directed to stop advertising that "Lur-Eye" will grow, promote the growth of, increase the length of, or change the texture of the eyelashes, and that it is a competent treatment for inflamed or bloodshot eyes, or granulated eyelids.

The respondents also are ordered to cease representing that the preparation will penetrate to or reach the follicles or papillae or inner shafts of the eyelashes, will have any beneficial effect upon the sebaceous glands or inner membranes, or will relieve eye strain.

Findings are that the respondents' product does not have medicinal ingredients claimed in such quantities as to produce the results represented.

The respondents admitted the material allegations of the Commission's complaint against them to be true, and consented, without intervening procedure, to issuance by the Commission of an order to cease and desist from the methods of competition alleged in the complaint.

FEDERAL COMMUNICATIONS COMMISSION ACTION

Wednesday, April 8

HEARING BEFORE AN EXAMINER (Broadcast)

NEW—Pacific Acceptance Corp., San Diego, Calif.—C. P., 1200 kc., 100 watts, daytime.
NEW—California Sales Contract Co., San Francisco, Calif.—C. P., 1280 kc., 500 watts, 1 KW LS, unlimited time.
KMTR—KMTR Radio Corporation, Los Angeles, Calif.—Renewal of license, 570 kc., 1 KW, unlimited time.

Thursday, April 9

HEARING BEFORE AN EXAMINER (Broadcast)

WHB—WHB Broadcasting Co., Kansas City, Mo.—C. P., 1120 kc., 500 watts, 1 KW LS, unlimited time. Present assignment: 860 kc., 1 KW, daytime.
WISN—Hearst Radio, Inc., Milwaukee, Wisc.—C. P., 1120 kc., 1 KW, unlimited time. Present assignment: 1120 kc., 250 watts, 1 KW LS, unlimited time.

Friday, April 10

HEARING BEFORE AN EXAMINER (Broadcast)

NEW—Star-Chronicle Publishing Co., St. Louis, Mo.—C. P., 1250 kc., 1 KW, unlimited time.
WIL—Missouri Broadcasting Corp., St. Louis, Mo.—C. P., 1250 kc., 1 KW, unlimited time.

APPLICATIONS GRANTED

WHA—University of Wisconsin, Madison, Wisc.—Granted C. P. to make changes in equipment increase power from 2½ KW daytime to 5 KW daytime.

- WJNO—Hazlewood, Inc., West Palm Beach, Fla.—Granted modification of C. P. to make changes in equipment; move transmitter from El Varano Hotel, W. Palm Beach, to a site 1½ mile from center of business district of W. Palm Beach, and approving studio location at Hotel George Washington.
- KGB—Don Lee Broadcasting System, San Diego, Cal.—Granted modification of C. P. extending commencement date from 5-1-35 to 30 days after grant and completion date to 180 days after grant.
- WLBC—Donald A. Burton, Muncie, Ind.—Granted modification of C. P. to install new equipment.
- WHN—Marcus Loew Booking Agency, New York City—Granted license to cover C. P. authorizing changes in equipment and increase in day power to 5 KW; 1010 kc., 1 KW night, unlimited time. Also granted license to use old 1 KW transmitter as an auxiliary, and granted authority to determine operating power by direct measurement of antenna.
- WDZ—WDZ Broadcasting Co., Tuscola, Ill.—Granted license to cover C. P. authorizing changes in equipment, change in frequency to 1020 kc., and removal of transmitter site locally; increase in day power to 250 watts.
- WFAM—The South Bend Tribune, South Bend, Ind.—Granted modification of license to change hours of operation from sharing with WWAE to unlimited day, and sharing at night with WWAE.
- WWAE—Hammond-Calumet Broadcasting Corp., Hammond, Ind.—The Commission on its own motion, reconsidered its action of March 17, 1936, in designating for hearing application for modification of license to change hours of operation from S-WFAM to unlimited, day to LS, S-WFAM night, and granted same.
- KCMC—North Miss. Broadcasting, Texarkana, Ark.—Granted consent to voluntary assignment of license to KCMC, Inc.
- KTW—First Presbyterian Church, Seattle, Wash.—Granted authority to install automatic frequency control.
- WJBK—James F. Hopkins, Inc., Detroit, Mich.—Granted modification of C. P. to extend commencement date from 9-30-35 to date of approval and completion date from 3-30-36 to 9-30-36.
- WFBC—Greenville News-Piedmont Co., Greenville, S. C.—Granted license to cover C. P. authorizing installation of new equipment and increase in day power from 1 to 5 KW, unlimited time, 1 KW night, 1300 kc.
- WTAQ—WHBY, Inc., Green Bay, Wisc.—Granted license to cover C. P. covering move of transmitter from Eau Claire to De Pere, Wisc., and studio location to Green Bay; install new equipment, change hours of operation from sharing KSCJ night to unlimited, and installation of directional antenna for nighttime operation; 1330 kc., 1 KW night, 1 KW day, unlimited time.
- WFBC—Greenville News-Piedmont Co., Greenville, S. C.—Granted authority to determine operating power by direct measurement of antenna.
- WMMN—A. M. Rowe, Inc., Jefferson, W. Va.—Granted renewal of license; 890 kc., 250 watts night, 500 watts day, unlimited.
- WNBC—William J. Sanders, New Britain, Conn.—Granted special temporary authority to operate unlimited time on night of March 28, 1936, in order to broadcast dinner party sponsored by Democratic State Central Committee of Conn., in honor of Postmaster General James A. Farley.
- WHBB—Dr. Wm. J. Reynolds & Wm. J. Reynolds, Jr., Selma, Ala.—Granted special temporary authority to operate from LS to 11 p. m., CST, on April 4, 1936, in order to broadcast special program sponsored by merchants of the city.
- WELI—Patrick J. Goode, New Haven, Conn.—Granted special temporary authority to operate from 8 p. m. to 12 midnight EST, March 28, 1936, in order to broadcast testimonial dinner given by Democratic State Central Committee of Conn. in honor of Postmaster Gen. James A. Farley, and from 8 p. m. to 12 midnight EST, April 18, in order to broadcast testimonial dinner in honor of Patrick J. Goode upon his appointment to the postmastership of the city of New Haven.
- WEBC—Head of the Lakes Broadcasting Co., Superior, Wisc.—Granted renewal of license; 1290 kc., 1 KW night, 5 KW day, unlimited time to expire Oct. 1, 1936. Also granted renewal for auxiliary transmitter for the same period.
- KGGM—New Mexico Broadcasting Co., Albuquerque, N. Mex.—Granted renewal of license; 1230 kc., 250 watts night, 500 watts day, unlimited time, to expire Oct. 1, 1936.
- WHBI—May Radio Broadcast Corp., Newark, N. J.—Granted renewal of license; 1250 kc., 1 KW night, 2.5 KW day, sharing WNEW, to expire Oct. 1, 1936.
- WHBI—May Radio Broadcast Corp., Newark, N. J.—Granted renewal of license for auxiliary; 1250 kc., 1 KW night, 2.5 KW day for auxiliary purposes only, to expire Oct. 1, 1936.
- WNEL—Juan Piza, San Juan, P. R.—Granted renewal of license; 1290 kc., 500 watts, unlimited time, to expire Oct. 1, 1936.
- WAML—Southland Radio Corp., Laurel, Miss.—Granted renewal of license on a temporary basis for 3 months; 1310 kc., 100 watts, specified hours.
- WTNJ—WOAX, Inc., Trenton, N. J.—Granted renewal of license for period from April 1 to Oct. 1, 1936. 1280 kc., 500 watts, shares with stations WCAM and WCAP.
- KFPY—Symons Broadcasting Co., Spokane, Wash.—Granted renewal of license for period from April 1 to Sept. 1, 1936; 890 kc., 1 KW, unlimited time.
- WTOC—Savannah Broadcasting Co., Inc., Savannah, Ga.—Granted renewal of license for period from April 1 to Oct. 1, 1936; 1260 kc., 1 KW, unlimited time.
- WSYR—WSYU—Central New York Broadcasting Corp., Syracuse, N. Y.—Granted renewal of license for period from March 1 to Sept. 1, 1936; 570 kc., 250 watts, unlimited time.
- W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—Granted license to cover C. P.; 31600, 35600, 38600, 41000 kc., 100 watts, unlimited time.
- KGHL—Northwestern Auto Supply Co., Inc., Billings, Mont.—Granted extension of special experimental authority to operate on 780 kc. for period from April 1 to July 1, 1936.
- KECA—Earle C. Anthony, Inc., Los Angeles, Cal.—Granted modification of C. P. approving new equipment and transmitter site at 82nd St. and Compton Ave., Los Angeles County, and extend commencement date to 3-1-36, and completion date to 90 days thereafter.
- NEW—Woodam Corp., Mobile—in Airplane—Granted C. P. (Temp. broadcast pickup); frequencies 1622, 2060, 2150, 2790 kc., 7½ watts.
- NEW—Ben S. McGlashan, Portable-Mobile (Los Angeles, Calif.)—Granted C. P. (Exp. Gen. Exp.); frequencies 86000-400000 kc., 100 watts.
- NEW—Radio Station WSOC, Inc., Portable (Charlotte, N. C.)—Granted C. P. (Exp. Gen. Exp.); frequencies 31100, 34600, 37600, 40600 kc., 7 watts.
- NEW—Pittsburgh Radio Supply House, Portable-Mobile (Pittsburgh, Pa.)—Granted C. P. (Exp. Gen. Exp.); frequencies 31100, 34600, 37600, 40600 kc., 5 watts.
- W9XHC—Kansas State College of Agr. and Applied Science, Portable-Mobile (Manhattan, Kans.)—Granted license to cover C. P. (Gen. Exp.); frequencies 31100, 34600, 37600, 40600 kc., 4 watts.
- W2XEI—Paul J. Gollhofer, Portable-Mobile (Brooklyn, N. Y.)—Granted consent to voluntary assignment of license from Paul J. Gollhofer to Metropolitan Broadcasting Corp., a New York Corp.
- WDBJ—Times-World Corp., Roanoke, Va.—Granted renewal of license for period from April 1 to Oct. 1, 1936; 930 kc., 1 KW, unlimited time.

SET FOR HEARING

- NEW—Southland Broadcasting Corp., Chattanooga, Tenn.—Application for C. P., 1200 kc., 100 watts, daytime. Site to be determined.
- NEW—Jonas Weiland, Kinston, N. C.—Application for C. P. for new station, 1200 kc., 100 watts night, 250 watts day, unlimited time. Site to be determined.
- NEW—R. J. Laubengayer, Salina, Kans.—Application for C. P. for new station, 1500 kc., 100 watts, unlimited time. Site to be determined.
- NEW—Pemberton Gordon d/ as Mid-Missouri Broadcasting Service, Jefferson City, Mo.—Application for C. P. for new station, 1310 kc., 100 watts daytime.
- NEW—Harold F. Gross & Edmund C. Shields, Saginaw, Mich.—Application for C. P., 950 kc., 500 watts daytime. Site to be determined.
- NEW—Grover C. Maxwell, Geo. A. Sancken & Herbert C. Lorick, Augusta, Ga.—Application for C. P. for new station, 610 kc., 250 watts night, 500 watts day. Site to be determined.
- NEW—The Niagara Falls Gazette Publishing Co., Niagara Falls, N. Y.—Application for C. P., 630 kc., 250 watts daytime. Site to be determined.

NEW—I. L. G. W. Radio Corp., New York City, N. Y.—Application for C. P. for new station, **970 kc.**, 1 KW, unlimited time. Site to be determined.

NEW—Ben L. Taylor, Phil B. Whitaker & Mrs. B. Whitaker, Chattanooga, Tenn.—Application for C. P., **1200 kc.**, 100 watts daytime. Site to be determined.

NEW—Nolan S. Walker, Canton, Ohio.—Application for C. P., **1200 kc.**, 100 watts night, 250 watts day, unlimited time. Site to be determined.

NEW—W. H. Marolf, Escanaba, Mich.—Application for C. P., **1500 kc.**, 100 watts, unlimited time. Site to be determined.

NEW—WRBC, Inc., Cleveland, Ohio.—Application for C. P., **780 kc.**, 1 KW, unlimited time. Site to be determined.

NEW—WRBC, Inc., Youngstown, Ohio.—Application for C. P., **890 kc.**, 1 KW, unlimited time. Site to be determined.

WEMP—Milwaukee Broadcasting Co., Milwaukee, Wisc.—Application for C. P. to install new equipment, change frequency from **1310 kc.** to **1010 kc.**, power from 100 watts to 250 watts night, 500 watts day, and time from daytime to unlimited.

KFKA—The Mid-Western Radio Corp., Greeley, Colo.—Application for modification of license to increase night power from 500 watts to 1 KW, operates on **880 kc.**, 1 KW day; S-KPOF.

KRE—First Congregational Church, Berkeley, Calif.—Application for consent to voluntary assignment of license from First Cong. Church of Berkeley to Central Calif. Broadcasters, Inc., a Calif. corporation.

WCBF—WCBF, Inc., Waukegan, Ill.—Application for consent to transfer of control of WCBF, Inc., an Ill. Corp. from Wilbur Glenn Veliva, E. E. Harwood and M. J. Minturn to L. E. Moulds, W. F. Moss, Gene T. Dyer and E. M. Ringwald.

NEW—Isadore Goldwasser, Tuscaloosa, Ala.—Application for C. P. for new station, **1370 kc.**, 100 watts, unlimited time.

NEW—Saint Cloud Broadcasting Co., by Emmons L. Abeles, Secy., St. Cloud, Minn.—C. P. already in hearing docket, amended to read: **1310 kc.**, 50 watts night, 100 watts day, unlimited time. Site to be determined.

NEW—H. H. Hanseth, Fresno, Calif.—C. P. already in hearing docket, amended to read: **1410 kc.**, 1 KW, unlimited time.

NEW—Midway Broadcast Co., by Emmons L. Abeles, Secy., Eau Claire, Wisc.—C. P. already in hearing docket, amended to read: **1210 kc.**, 100 watts daytime. Site to be determined.

NEW—W. P. Stuart, Prescott, Ariz.—Application for C. P., **1590 kc.**, 100 watts, unlimited time.

KWKC—Wilson Duncan, tr. as Wilson Duncan Broadcasting Co., Kansas City, Mo.—Consent to voluntary assignment of license to Lester E. Cox and Thomas L. Evans, a partnership.

NEW—Evans Broadcasting Co., Kansas City, Mo.—Application for C. P., **1370 kc.**, 100 watts, unlimited time. Site to be determined.

NEW—Fred A. Baxter, Superior, Wisc.—Application for C. P. already in hearing docket, amended to read: **1200 kc.**, 100 watts, unlimited time.

RENEWAL OF LICENSES

The following station were granted renewal of licenses for the regular period:

KFWB, Hollywood, Cal.; KVOA, Tucson, Ariz.; KYA, San Francisco; WAAT, Jersey City, N. J.; WASH, Grand Rapids, Mich.; WFBR and auxiliary, Baltimore, Md.; WOOD, Grand Rapids, Mich.; KTW, Seattle, Wash.; WISN, Milwaukee, Wis., and auxiliary; WRC and auxiliary, Washington, D. C.; KGVO, Missoula, Mont.; KMBC and auxiliary, Kansas City, Mo.; KOIL, Council Bluffs, Ia.; KTAT, Fort Worth, Tex.; KVOR, Colorado Springs, Colo.; WCAE, Pittsburgh, Pa., and auxiliary; WHIO, Dayton, Ohio.

WLBI—State of Wisc. Dept. of Agr. and Markets, Stevens Point, Wis.—Granted renewal of license for the period ending Sept. 1, 1936.

KUJ—KUJ, Inc., Walla Walla, Wash.—Present license extended on a temporary basis from April 1 to May 1, 1936, subject to such action as may be taken upon pending application for renewal.

WATL—J. W. Woodruff and S. A. Cisler, Jr., d/b as Atlanta Broadcasting Co., Atlanta, Ga.—Present license extended on a temporary basis from April 1 to May 1, 1936, subject to such action as may be taken upon pending application for renewal.

WWL—Loyola University, New Orleans, La., and

KWKH—International Broadcasting Corp., Shreveport, La.—Special temporary experimental authority extended from March 1 to April 1, 1936, subject to the same conditions as contained in the existing authority to said stations, pending consideration of pending petition of station WLWL and petitions in opposition thereto.

WJEJ—Hagerstown Broadcasting Co., Hagerstown, Md.—Present license extended on a temporary basis for the period April 1 to May 1, 1936, subject to such action as may be taken on pending application for renewal.

KGCU—Mandan Radio Assn., Mandan, N. Dak.—Granted renewal of license on a temporary basis only subject to whatever action may be taken by the Commission upon pending application for renewal.

KMA—May Seed and Nursery Co., Shenandoah, Ia.—Granted renewal of license on a temporary basis only subject to whatever action may be taken by the Commission upon pending application for renewal.

KTFI—Radio Broadcasting Corp., Twin Falls, Idaho—Granted renewal of license on a temporary basis only subject to whatever action may be taken by the Commission upon pending application for renewal.

KGBZ—KGBZ Broadcasting Co., York, Nebr.—Granted renewal of license upon a temporary basis only and subject to whatever action may be taken by the Commission upon the renewal application now pending before it and upon the application of the May Seed & Nursery Co. (KMA).

KTFI—Radio Broadcasting Corp., Twin Falls, Idaho—Granted extension of special experimental authority on a temporary basis only, subject to a hearing and decision by the Commission. Extension granted for the period from April 1 to Oct. 1, 1936.

MISCELLANEOUS

Paul R. Heitmeyer, Salt Lake City, Utah—Denied motion that action be deferred on applications pending from Utah and that same be considered in connection with his application.

A. Steneart Graham, E. V. Baxter, Norman Baxter, d/b Pittsburg Broadcasting Co., Pittsburg, Kans.—Denied motion to consider its application in conjunction with application of Joplin Broadcasting Co., and Pittsburg Publishing Co.

WISE—WISE Broadcasting Co., Inc., St. Paul, Minn.—Denied motion asking Commission to reconsider action of Feb. 8, 1936, in granting Edward Hoffman a C. P. to erect new broadcasting station at St. Paul to operate on **1370 kc.**, 100 watts, unlimited.

KROW—Educational Broadcasting Corp., Oakland, Cal.—Granted petition to intervene at hearing of application of Jos. G. Morrow, for C. P. for new broadcast station at Oakland, to operate on **1150 kc.**, 250 watts daytime.

WFEA—New Hampshire Broadcasting Co., Manchester, N. H.—Granted renewal of license on condition applicant complete and place in operation the new antenna and ground system now being constructed, and that the signal strength of new radiating system meet the requirements of Commission.

WJJD—WJJD, Inc., Chicago, Ill.—The Broadcast Division directed that C. P. to move transmitter to Des Plaines, Ill., be issued to applicant in conformity with its action of Jan. 10, 1936, inasmuch as applicant has complied with the proviso contained therein.

KFRU—KFRU, Inc., Columbia, Mo.—The Broadcast Division directed that a modification of license to change hours of operation to sharing with radio station WGBF, simultaneous day with WGBF (contingent upon the release of the hours by WOS), be issued to applicant in conformity with its action of Feb. 21, 1936. The Broadcast Division also directed that station WOS, State of Mo., Mo. State Highway Patrol, Jefferson City, be deleted.

NEW—Fresno Broadcasting Co., Fresno, Calif.—Granted request to amend order to take depositions in re application for new broadcasting station at Fresno, Calif.

WSPA—Virgil V. Evans, Spartanburg, S. C.—Denied petition asking special temporary authority to operate with 500 watts from LS to 12 midnight for 30 days.

Times Dispatch Publishing Co., Richmond, Va.—Granted request to take depositions in re application for new station at Richmond, Va.

KMJ—James McClatchy Co., Fresno, Cal.—Granted petition to intervene at hearing of application of Fresno Broadcasting Co., for new station at Fresno.

Evans Broadcasting Co., Kansas City, Mo.—Overruled motion that Commission revoke and rescind special temporary license granted Charlotta Duncan, Adm., to operate KWKC, but granted application to be heard before Commission renews license in question.

George B. Bairey, Valley City, N. Dak.—Denied petition and its supplement, requesting Commission to grant his application for a new station at Valley City to operate on 1500 kc., 100 watts, unlimited time.

WIND—Johnson-Kennedy Radio Corp., Gary, Ind.—Denied special temporary authority to operate with power of 5 KW from 5 to 6 a. m., CST, during the time that Eastern Standard Time is recognized as official time in Gary.

APPLICATION DENIED

NEW—The Herald Publishing Co., Denison, Tex.—Denied as in cases of default, application for C. P., 1200 kc., 100 watts, unlimited time, heretofore set for hearing, for failure to file an appearance and statement of facts in accordance with Rule 104.6(c).

APPLICATIONS DISMISSED

KIUN—Jack W. Hawkins & Barney H. Hubbs, Pecos, Tex.—Modification of license, 1310 kc., 100 watts, unlimited time, heretofore set for hearing, was dismissed for failure to answer form letter, adopted by Broadcast Division requiring applicants to signify their desire to be heard within 10 days after receipt of said form letter.

The following application was dismissed from the hearing docket and retired to the files inasmuch as the time requested for transmittal of programs, specified therein, has expired.

Plain Talk Magazine, Inc., Washington, D. C.—For authority to transmit proceedings of the convention of Jefferson Democrats on Jan. 29, 1936, from Macon, Ga., through facilities of A. T. & T. to station XEAW, Reynosa, Tamps, Mex.

The following applications, heretofore set for hearing, were dismissed at request of applicants:

NEW—Albert E. Davis, Brownwood, Tex.—Applied for C. P., 1420 kc., 100 watts, daytime.

NEW—George H. Adams and Henry D. Bratter, St. Paul, Minn.—Applied for C. P., 1370 kc., 100 watts, unlimited time.

WAWZ—Pillar of Fire, Zaraphath, N. J.—Applied for modification of license, 1350 kc., 1 KW, shares with WBNX.

APPLICATIONS RECEIVED

First Zone

WCAO—Monumental Radio Co., Baltimore, Md.—License to use 600 W. E., 106-B transmitter as an auxiliary transmitter.

WCAO—Monumental Radio Co., Baltimore, Md.—License to cover 600 construction permit (B1-P-824) as modified for equipment changes and move of transmitter.

NEW—Hildreth & Rogers Co., Lawrence, Mass.—Construction 680 permit for a new station to be operated on 680 kc., 1 KW, daytime.

WNYC—City of New York—Department of Plant & Structures, 810 New York, N. Y.—License to cover construction permit (B1-P-798) to use W. E. 106-B transmitter as an auxiliary transmitter and move transmitter.

WJAR—The Outlet Co., Providence, R. I.—Modification of construction permit (B1-P-333) for changes in equipment, increase in power, move of transmitter and directional antenna, requesting further changes in equipment.

WELI—City Broadcasting Corp., New Haven, Conn.—Voluntary 900 assignment of license from Patrick J. Goode, to City Broadcasting Corporation.

WORL—Broadcasting Service Organization, Inc., Needham, Mass. 920 Modification of license to move studio from Great Plain Avenue, Needham, Mass., to 610 Beacon St., Boston, Mass.

NEW—E. Anthony & Sons, Inc., Pawtucket, R. I.—Construction 1200 permit for a new station to be operated on 1200 kc., 100 watts, 250 watts-day, unlimited time. Requests facilities of WNRI. Amended: To make changes in antenna.

NEW—Twin City Broadcasting Co., Inc., Lewiston, Me.—Construction 1210 permit for a new station to be operated on 1210 kc., 100 watts, unlimited time.

NEW—Edward E. Huddleson & Robert A. Howe, d/b as Huddleson & Howe, Honolulu, T. of Hawaii—Construction permit

for a new station to be operated on 1210 kc., 100 watts, 250 watts-day, unlimited time.

WNBC—William J. Sanders, New Britain, Conn.—Construction 1380 permit to make changes in equipment and increase power from 250 watts to 1 KW.

NEW—Auburn Publishing Co., Auburn, N. Y.—Construction permit 1420 for a new station to be operated on 1420 kc., 100 watts, unlimited time. Amended: Giving exact transmitter site as West Lake Road, Fleming, New York.

WMBQ—Metropolitan Broadcasting Corp., Brooklyn, N. Y.—Construction 1500 permit to install new equipment.

NEW—Lillian E. Kiefer, Brooklyn, N. Y.—Construction permit 1500 for a new station to be operated on 1500 kc., 100 watts, specified hours. Requests facilities of WMBQ.

NEW—Central New York Broadcasting Corp., Portable-Mobile—Construction permit for a new general experimental station to be operated on 31100, 34600, 37600, 40600 kc., 1 watt.

NEW—Central New York Broadcasting Corp., Portable-Mobile—License to cover above.

W10XDX—National Broadcasting Company, Inc., Portable-Mobile—Modification of license to utilize a frequency in the band of 200-400 megacycles for broadcast pickup purposes, in addition to present authorization.

Second Zone

WVVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—1160 Construction permit to install a new transmitter, erect a vertical antenna and increase power from 5 KW to 25 KW night, 10 KW day.

WEED—William Avera Wynne, Rocky Mount, N. C.—Construction 1420 permit to make changes in equipment, increase power from 100 watts to 100 watts, 250 watts-day.

NEW—Lynchburg Broadcasting Corp., Portable-Mobile—Construction permit for a new General experimental station for 31100, 34600, 37600, 40600 kc., 40 watts.

NEW—The Evening News Assn., Inc., Mobile—Construction permit for a new general experimental station to be operated on 31100, 34600, 37600, 40600 kc., 5 watts.

Third Zone

NEW—Seaboard Investment Co., Inc., Montgomery, Ala.—Construction 610 permit for a new station to be operated on 610 kc., 500 watts, 1 KW-day, unlimited time.

WAIM—Wilton E. Hall, Anderson, S. C.—Construction permit 630 to change frequency from 1200 kc. to 590 kc., install new equipment, increase power from 100 watts to 250 watts, 1 KW-day and move transmitter from Anderson College, Anderson, South Carolina to site to be determined, Anderson, South Carolina. Amended: To change requested frequency from 590 kc. to 630 kc., requested power from 250 watts, 1 KW-day to 1 KW daytime operation only.

NEW—Voice of Corsicana Assn., Corsicana, Tex.—Construction 1200 permit for a new station to be operated on 1200 kc., 100 watts, daytime. Amended: To change frequency from 1200 kc. to 1310 kc.

WIOD—WMBF—Isle of Dreams Broadcasting Corp., Miami, Fla.—1300 License to cover construction permit (B3-P-1003) for changes in equipment.

KFPM—Voice of Greenville, Greenville, Tex.—Construction permit 1310 to make changes in equipment, increase power from 15 watts to 100 watts, change hours of operation from specified hours to daytime, move transmitter from 2109 Park Street (rear) to site to be determined, Greenville, Texas and change call letters from KFPM to KVOG. (Filed in name of Voice of Greenville). Amended: To change frequency from 1310 kc. to 1420 kc.

KGFI—Eagle Broadcasting Co., Inc., Corpus Christi, Tex.—Construction 1330 permit to install new equipment, increase power from 100 watts, 250 watts-day to 250 watts, 500 watts-day, change frequency from 1500 kc. to 1330 kc., move transmitter from Broadway & Leopard Street, Corpus Christi, Texas to Ocean Drive, Corpus Christi, Texas.

W4XCA—Memphis Commercial Appeal, Inc., Memphis, Tenn.—Modification of construction permit to increase power to 250 watts.

Fourth Zone

KMMJ—The M. M. Johnson Co., Clay Center, Nebr.—Voluntary 740 assignment of license from the M. M. Johnson Co. to KMMJ, Incorporated.

WHO—Central Broadcasting Co., Des Moines, Ia.—Special experimental authorization to install new equipment and increase power from 50 KW to 500 KW for period to 8-1-36.

WJJD—WJJD, Inc., Chicago, Ill.—Modification of license to 1130 change hours of operation from 6 a. m. CST, to local sunset at Salt Lake City, Utah to 6 a. m. EST, to local sunset at Salt Lake City, Utah.

KFJB—Marshall Electric Co., Inc., Marshalltown, Iowa—Construction permit to make changes in equipment.

WCLS—WCLS, Inc., Joliet, Ill.—Modification of license to change 1310 hours of operation from specified hours to unlimited time.

W9XOK—The Star-Chronicle Publishing Co., St. Louis, Mo.—License to cover construction permit for a new general experimental station.

NEW—WBBM Broadcasting Corp., Chicago, Ill.—Construction permit for a new general experimental station for 31600, 35600, 38600, 41000 kc., 50 watts, special emission.

NEW—Central States Broadcasting Co., Omaha, Nebr.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000 kc., 100 watts.

NEW—The University of Minnesota, Minneapolis, Minn.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000, 86000-400000,

401000 kc., and above, 100 watts. Amended: A3 emission specified.

Fifth Zone

KFVD—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—1000 Voluntary assignment of license from Los Angeles Broadcasting Co., Inc., to Standard Broadcasting Co.

KUJ—KUJ, Inc., Walla Walla, Wash.—Consent to transfer control of corporation from Louis Wasmer to H. E. Studebaker. 1370 100 shares common stock.

KIEM—Redwood Broadcasting Co., Inc., Eureka, Calif.—License 1450 to cover construction permit (B5-P-206) for new equipment, change in frequency and power and move transmitter.

NEW—Jay E. Tapp, Long Beach, Calif.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41,000 kc., 100 watts.

Puerto Rican Zone

WKAQ—Radio Corporation of Porto Rico, San Juan, Puerto Rico 1240 —Modification of license to change hours of operation from one-half time to unlimited time.

COPYRIGHT HEARINGS

Unless some change is made in the present program of the House Committee on Patents all hearings will be concluded by April 15. On Monday and Tuesday of next week motion picture exhibitors and producers will be heard. During the present week manufacturers of mechanical devices, representatives of designers appeared both for and against a copyright bill.

DAILY NEWS FILES APPEAL

The Daily News Corporation of St. Paul, Minn., has filed an appeal in the United States Court of Appeals of the District of Columbia against an order of the Federal Communications Commission of March 19 granting a construction permit for the erection of a new station at St. Paul to use 1370 kilocycles, 100 watts power and unlimited time on the air.

The news corporation contends that it had an application pending for the same assignment since August 14, 1935, while it is contended at the Commission that the application was filed after the Hoffman hearing before an Examiner.

The news corporation contends, in its appeal that it was deprived of an opportunity for a hearing on its application for the facilities granted Hoffman.

TELEPHONE HEARING POSTPONED

Further hearings in connection with the telephone investigation of the Federal Communications Commission have been postponed from April 14 to April 20 at the request of the American Telephone & Telegraph Company because of the annual meeting of the corporation to be held next week.

WYLIE OUT FOR HIMSELF

C. Ellsworth (Dick) Wylie, one of the best known executives on the Pacific Coast, general manager and sales manager of the Don Lee Broadcasting Company for several years, has opened his own advertising agency under the firm name of C. Ellsworth Wylie Company with offices in the Beaux Arts Building, Los Angeles. Mr. Wylie resigned from the Don Lee organization on the first of March.

FCC SCHEDULES FAR REACHING INQUIRY INTO ALL TECHNICAL PHASES OF RADIO

The FCC this week announced there would be an informal engineering hearing before the Commission en banc on June 15 to obtain information concerning the problems involved in the allocation of frequencies to the various classes of service.

The general hearing probably will be followed by other hearings concerning specific regulatory problems.

The full text of the FCC release follows:

At a meeting on Friday, April 3, 1936, the Commission approved a recommendation of the Chief Engineer for an informal

engineering hearing before the Commission en banc on June 15th for the general purpose of obtaining information concerning the problems involved in the allocation of frequencies to the various classes of service.

In this memorandum the Engineering Department reported that radio, by reason of recent technical progress, has arrived at a cross-roads in its application to the service of the public and as a result thereof the Federal Communications Commission is confronted with some pressing problems of basic importance, the successful solution of which will constitute another milestone in the history of communications.

The Engineering Department states that in its opinion the foremost important technical radio problems requiring the attention of the Commission are as follows:

"1. Providing new radio frequency channels for public services in classes of communication other than broadcasting, as well as providing for all classes of radio service in the interest of safety of life and property.

"2. Frequency allocation improvements to the existing broadcast structure—550 to 1600 kc.

"3. Visual broadcasting (television and facsimile).

"4. Aural broadcasting on frequencies above 1600 kc.

"Peculiarly, the solution of these four broad problems is so intrinsically interrelated that not one of them should be decided upon without consideration of the other three."

The Chief Engineer stated that of the problems confronting the Commission, visual broadcasting perhaps most complicates the situation by reason of two factors, namely:

"1. The technical requirement for an extremely large portion of the limited ether spectrum, thus restricting the amount which would be available for services other than broadcasting.

"2. The economics of visual broadcasting, including the possible economic effect it may have upon existing aural broadcasting and the existing receiver manufacturing industry, as well as the newspaper and motion picture industries.

"If more data were available with respect to these two factors of visual broadcasting, the Federal Communications Commission might have sufficient detailed information to warrant its proceeding immediately with confidence in the solution of the other three radio problems on a more permanent basis; but visual broadcasting is still deep in the experimental status from both technical and economic standpoints.

"The other three problems are not quite so complex as visual broadcasting, and while there is still insufficient data regarding wave propagation in large portions of the spectrum, there is enough information relative to propagation in certain portions of the spectrum to permit more definite progress along specific lines, and in this connection at present there appears to be a need for opening new portions of the spectrum in the service of the public. Furthermore, the possible intrenchment of various developed services, particularly those of the Government, by vast expenditures of money, is a factor of compelling importance."

The Engineering Department stated that of the various courses of action available to the Commission, it believed that the most sound course for the Commission to pursue in its solution of the pressing radio problems was "to proceed upon the doctrine of 'evolution and experimentation' by encouraging development and use of frequencies along definite lines as may be indicated from time to time from accumulated data, and by holding informal hearings as necessary to facilitate progress in detail."

The more important specific recommendations of the Engineering Department were as follows:

"1. In new allocations or in reallocations of radio frequencies to services or to stations within services, proceed on the basis of 'evolution, experimentation and voluntary action' rather than by radical and enforced costly changes. Modifications which do not

involve large expenditures or are necessary requirements to keep abreast of the technical art should be accomplished.

"2. Encourage communication development along specific lines as may be indicated from time to time from accumulated data and from evidence secured from such informal engineering meetings as may be necessary to facilitate progress in detail.

"3. At a date in 1936, preferably in May or June, to be determined later, hold an informal engineering hearing before the Commission en banc for the purpose of:

"(1) Determining in a preliminary manner the most probable future needs of the various services for frequencies above 30,000 kc.

"(2) Securing for the public and the Commission a keener insight of the conflicting problems which confront the industry and the regulatory body in the application of the new frequencies to the service of the public.

"(3) Guiding experimentation along more definite lines as may be justified from the evidence presented at the hearing.

"(4) Reviewing frequency allocations to services in the radio spectrum below 30,000 kc.

"(5) Assisting the Government in its preparation for the International Telecommunications Conference at Cairo in 1938.

"The Interdepartment Radio Advisory Committee should be invited to attend this hearing.

"4. Delay permanent allocation of frequencies above 30,000 kc to various classes of service until after the hearing mentioned in 3 above, and also until after an executive order on the allocation of these frequencies to Government services has been decided upon.

"5. In the meantime the Engineering and other interested Departments should prepare minor modifications of existing regulations for experimental operation above 30,000 kc, to be effective immediately, and so designed as to encourage progress and at the same time avoid illogical "intrenchment" pending final determination of the allocation of these frequencies to various commercial services.

"6. Encourage standardization of visual broadcast transmission performance by authorizing the Engineering Department to cooperate with the Radio Manufacturers Association and licensees of experimental television stations in forming a committee of the industry to endeavor to arrive at a recommendation with respect to ultimate standardization.

"7. Encourage the development of coaxial cables for the purpose of transmitting visual broadcast programs between television broadcast stations which will be ultimately licensed by the Commission.

"8. Continue the policy of granting visual broadcast station licenses on an experimental basis only and making more stringent requirements as to active work on the part of licensees.

"9. At the proper time in the future, if there is sufficient accumulated data with respect to visual broadcasting, and after it has been decided what the allocation of frequencies above 30,000 kc should be, promulgate visual broadcast transmission performance standards, provided the Radio Manufacturers Association's recommendations are satisfactory. If they are not satisfactory, hold a public hearing to determine what standards should be adopted.

"10. After standards have been adopted, continue the policy of keeping visual broadcasting on an experimental basis until sufficient data has been accumulated with respect to the economic factors of visual broadcasting, as well as the possible economic effect on other broadcast services and upon other industries such as newspaper and motion picture.

"11. Continue to encourage aural broadcasting on an experimental basis on frequencies above 30,000 kc until such time when sufficient data is accumulated with respect to this particular service, as well as television and other services. When data as to the technique of this type of broadcasting is understood, and when the needs of other services, including television and facsimile, are known to a sufficient extent, the Commission should consider the desirability of commercial aural broadcasting on frequencies above 30,000 kc."

The Chief Engineer stated that the general hearing for June 15th was for the purpose of guiding the Commission and the communications industry in the next progressive steps that may be necessary in the development of communications and in order that the Commission and the industry might avoid pitfalls that might be involved in premature intrenchment resulting from large investments, which might serve as a handicap in making an orderly allocation of frequencies to various commercial and government services in the future.

INDICATING INSTRUMENTS

A statement has been sent to all manufacturers of broadcast equipment regarding indicating instruments by the Federal Communications Commission as follows:

It has come to the attention of the Commission that in several cases the instruments supplied with broadcast transmitters for indicating the plate current and plate voltage of the last radio stage and the antenna current, have such scale divisions that where indications fall between divisions, it is impossible to estimate the reading within plus or minus 2%, which is the accuracy required for these instruments.

The scale divisions should be as small as practical and of such value as to permit accurate interpolation at a glance.

Attention is also invited to the requirement that the full scale readings of the direct current instrument shall not exceed five times and the full scale reading of the antenna ammeter shall not exceed three times the minimum normal indications.

The function of each instrument shall be permanently and plainly marked thereon or on the panel immediately adjacent thereto.

All future equipments should be supplied with instruments in accordance with the above. Broadcast stations employing instruments which do not meet these requirements will be cited for violation of Rule 143. In the case of equipment of approved manufacture, the question of the cost of replacement must be settled between the vendor and vendee.

RECOMMENDS DENIAL OF NINE APPLICATIONS

Applications were filed with the Federal Communications Commission for nine stations in Minnesota, Iowa, Nebraska and Wisconsin. The applications were as follows, all of which were taken up at one hearing: Winona Broadcasting Company, new station at Winona, Minn., to use 1500 kilocycles, 100 watts unlimited time; Mankato Broadcasting Company, new station at Mankato, Minn., to use 1210 kilocycles, 100 watts and unlimited time; Fort Dodge Broadcasting Company, new station at Fort Dodge, Iowa, to use 1210 kilocycles, 100 watts power and unlimited time; Clinton Broadcasting Company, to erect new station at Clinton, Iowa, to use 1310 kilocycles, 100 watts and unlimited time; Hastings Broadcasting Company, to erect new station at Hastings, Nebr., to use 1420 kilocycles, 100 watts and unlimited time; Grand Island Broadcasting Company, to erect new station at Grand Island, Nebr., to use 1370 kilocycles, 100 watts and unlimited time; Appleton Broadcasting Company to erect new station at Appleton, Wis., to use 1500 kilocycles, 100 watts power and unlimited time; Wausau Broadcasting Company, new station at Wausau, Wis., to use 1310 kilocycles, 100 watts power and unlimited time, and Northern Broadcasting Company, to erect station at Wausau, Wis., to use 1370 kilocycles, 100 watts power and unlimited time.

Examiner P. W. Seward in Report No. I-214 recommends that all of the applications be denied. In the case of eight of the applications the Examiner states that a certain group of men propose to associate themselves together as a partnership. The Examiner found that no substantial need is shown for additional radio service in the several areas proposed to be served, and granting of the applications would cause objectionable interference.

FIELD INTENSITY MEASUREMENTS

The Federal Communications Commission has issued the following statement in connection with field intensity measurements pursuant to Rule 131:

Rule 131 provides that certain minimum field intensities are acceptable in lieu of the required minimum physical vertical heights of the antennas proper. The following requirements shall govern the taking and submission of data on the field intensity produced:

Beginning as near to the antenna as possible without including the induction field, measurements should be made on eight or more radials, at intervals of one-quarter mile or less up to two miles, at intervals of one-half mile or less from two miles to six miles and a few additional measurements at greater distances from the antenna. Where the antenna is rurally located and unobstructed measurements can be made, there should be as many as eighteen or twenty measurements on each radial. However, where the antenna is located in a city or where unobstructed measurements are difficult to make, measurements should be made on each radial at much closer intervals, particularly within two miles of the antenna.

A curve for each radial is plotted from these data on semi-logarithmic co-ordinate paper with the field intensity times distance as ordinate, and distance as abscissa. From the curve so plotted, the unattenuated field intensity at one mile on each radial is determined.

When all radials have been analyzed in this manner, a curve is plotted on polar co-ordinate paper from the unattenuated values obtained, which gives the unattenuated field pattern at one mile. The radius of a circle, the area of which is equal to the area bounded by this pattern, is the effective unattenuated field intensity at one mile.

While making the field intensity survey, the output power of the station must be maintained at the licensed power as determined by the direct method. To do this it is necessary to determine accurately the total antenna resistance (the resistance variation method or the substitution method is acceptable) and to measure the antenna current by means of an ammeter of acceptable accuracy.

An accurate value of the antenna resistance can be determined only by making a series of measurements, each for a different frequency. From ten to twelve resistance measurements covering a band of 50 to 60 kilocycles wide with the operating frequency near the middle of the band, must be made to give data from which accurate results may be obtained. The values measured should be plotted with frequency as abscissa and resistance in ohms as ordinate and a smooth curve drawn. The point on the ordinate where this curve intersects the operating frequency, gives the value of the antenna resistance.

The following data should be submitted to the Commission in affidavit form:

1. Complete data taken for field intensity measurement, including a map showing each point of measurement numbered to agree with the tabulated data and for the antenna resistance measurement.
2. The graphs drawn for each radial, the unattenuated field pattern and the antenna resistance curve.
3. Description of methods used to take readings for field intensity and antenna resistance measurements.
4. Manufacturer's name of each calibrated instrument used, and manufacturer's rated accuracy.
5. Accuracy, date and by whom each instrument was last calibrated.
6. Name and qualifications of engineer making measurements.

HERBERT L. PETTEY,
Secretary.

RECOMMENDS AGAINST POWER INCREASE

Broadcasting Station WPAR, Parkersburg, W. Va., applied to the Federal Communications Commission to increase its daytime power from 100 to 250 watts. The station operates full time on 1420 kilocycles.

Examiner John P. Bramhall in Report No. I-215 recommended that the application be denied. He found that the station has not established a need for additional daytime service in the area proposed to be served, and that granting of the application would cause interference with Station WBNS, at Columbus, Ohio.

FEDERAL TRADE COMMISSION ACTION COMPLAINTS

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them:

No. 2751. Alleging unfair competition in connection with the sale of Analgesique "Baume Bengue," offered as a treatment for relief of pain, a complaint has been issued against **Thomas Leeming & Co., Inc.**, 101 West 31st St., New York City.

The respondent company, the complaint charges, represents in advertisements, pamphlets, labels and other printed matter, that its product penetrates the skin through muscles and into the joints, and kills the pains of neuralgia, rheumatism, headache, neuritis, lumbago, and sciatica, no matter how deep-seated the pains.

No. 2752. In a complaint, **M. F. Foley Co.**, of Friend and Union Sts., Boston, is charged with unfair representations in the sale of sea foods.

Engaged as a wholesaler of sea foods, the respondent company is alleged to have advertised its products by means of price lists or bulletins, in which certain species of fish were variously designated "Deep Sea Whitefish Fillets," "Fresh Cusk Fillets (Deep

Sea Whitefish)," or "Deep Sea Whitefish Fillets (Cusk)." Invoices are said to have referred to such species as "D. S. Whitefish Fillet," when, in fact, these types of fish were not "whitefish," as known to the trade and consuming public.

No. 2753. Charging unfair representations in aid of the sale of "Sunlife Chlorophyllian Oil," advertised by radio and other media as "captured sunlight" for treatment of certain diseases, a complaint has been issued against **Sunlife Chlorophyllian Laboratories, Ltd.**, 2702 South Hill St., Los Angeles, distributors of the preparation. The complaint also names as respondents the following members of the firm: C. C. Miller, W. B. Mather, W. M. Louisson, D. A. Lester, L. D. Marr and H. M. Young.

Among the ailments for which the respondent company recommended the use of "Sunlife Chlorophyllian Oil" were nervous irritation, muscular rheumatism, lumbago, gouty conditions, simple coughs and colds, and insomnia.

"Every mother will appreciate it for the children, as it relieves the so-called 'growing pains' and many minor injuries, such as sprains, cuts, bruises, and burns," read an advertisement.

However, according to the complaint, chlorophyll, although produced by the aid of sunlight, is not absorbed through the skin and its application has no effect on rheumatic and gouty conditions and other ailments named, nor does it possess the same beneficial ingredients or produce the same beneficial effects as sunlight.

Use of the word "Sunlife" in the respondent's trade name is alleged to be false and misleading.

The respondent's representations are alleged to have been in violation of the Federal Trade Commission Act, tending to deceive the purchasing public and unfairly to divert trade to the respondent company from competitors.

No. 2754. Alleged to have gained control of a competing company by acquiring its total shares of outstanding capital stock, in violation of Section 7 of the Clayton Act, **Laird & Co., Scobeyville, N. J.**, engaged in the manufacture and sale of applejack brandy, is named respondent in a complaint issued.

In February, 1936, the complaint charges, the respondent company acquired the outstanding capital stock of the Hyland Distilling Corporation, Haskell, N. J., also engaged in the manufacture and sale of applejack brandy, with the result that competition between the two companies has been substantially lessened, and the respondent has increased its total volume of sales.

Acquisition of the stock of its competitor, it is alleged, also tends to create a monopoly in favor of the respondent company in the manufacture and sale of its product in interstate commerce.

No. 2755. Eight manufacturers dealing in sportswear, in Boston, Brockton, and Dorchester, Mass., have been named respondents in a complaint alleging an agreement and combination to restrict and eliminate competition in the sale and distribution of flannel skirts.

The respondents are: Boston Sportswear Co., 72 Kneeland St.; Robert Hamilt, 75 Kneeland St., trading as Bobby Sportswear Co.; Gordon Maid Skirt Co., Inc., 75 Kneeland St.; Louis Wadman Co., 75 Kneeland St., trading as Oxford Sportswear Co.; Louis Maltzman, 75 Kneeland St., trading as Simmons Sportswear Co.; Schwartz Sportswear Co., Inc., 75 Kneeland St., all of Boston; Weatherproof Clothing Mfg. Co., 146 Court St., Brockton, Mass.; and David A. Sallop, trading as Peerless Sportswear Co., 1394 Dorchester Ave., Dorchester, Mass.

In October, 1935, according to the complaint, the respondents entered into an agreement, combination or conspiracy among themselves to suppress and eliminate competition in the sale of flannel skirts in interstate commerce, by agreeing to quote and sell them at a uniform price of \$16.50 a dozen. The respondents are alleged to have distributed to their respective customers identical written notice of this uniform price, and pursuant to this, it is alleged, the sales were made at \$16.50 a dozen.

These practices are alleged to have unduly tended to lessen and restrict competition in the sale of flannel skirts throughout the United States, and particularly in New England, where the respondents constitute practically all of the manufacturers of flannel skirts.

No. 2756. Misrepresentation of a general mercantile business as an Army and Navy supply store is alleged as an unfair method of competition, in a complaint issued against **Sternheimer Bros. Inc.**, operating in Richmond, Va., as **Army and Navy Supply Co.**, and in Washington, D. C., as **Army Goods Store**.

The complaint charges that through use of the respondent's trade names containing the words "Army" and "Navy," purchasers are led to believe that the respondent's merchandise was made for or bought from the United States War or Navy Departments.

According to the complaint, virtually none of this material was purchased at Army or Navy surplus or refuse goods sales and the small amount of actual Army or Navy goods carried by the respondent, if any, is bought from jobbers, wholesalers and others who purchase at Army or Navy reject or refuse goods sales.

STIPULATIONS

The Commission has issued the following cease and desist orders:

No. 2514. Johnson Manufacturing Co., 1656 Lee Ave., Birmingham, Ala., and its president, John C. Johnson, have been ordered to cease and desist representing, through use of their corporate or trade name, or in advertising, that the company is a manufacturer of kitchen utensils.

Findings are that the respondent company is not a manufacturer owning a factory or foundry, but rather contracts with factories or foundries to make the products it sells.

No. 2660. Discontinuance of agreements entered into by eleven corporations to fix, maintain and enforce uniform prices, terms and discounts at which zinc and copper plate are to be sold to photo engraving customers, has been ordered.

The order to cease and desist also is directed against the Photo Engravers Copper and Zinc Grinders Association, 101 Fairmount Ave., Jersey City, N. J., of which the respondent corporations are members, and against the association's officers, Oliver L. Edes, Plymouth, Mass., Harold M. Pitman, Cicero, Ill., Walter Pitman, Jersey City, N. J., and J. Peter Lally, Pittsburgh.

The respondent corporations, said to manufacture and sell more than 90 per cent of the total volume of zinc and copper plates used for engraving purposes in the United States, are:

Edes Manufacturing Co., Plymouth, Mass.; American Steel & Copper Plate Co., 101 Fairmount Ave., Jersey City, N. J.; New York Steel & Copper Plate Co., 61 Clymer St., Brooklyn; Rolled Plate Metal Co., 196-210 Van Brunt St., Brooklyn; National Steel & Copper Plate Co., 720 South Dearborn St., Chicago; Harold M. Pitman Co., South 51st St., and 133rd St., Cicero, Ill.; Pacific Steel & Copper Plate Co., 416 Jackson St., San Francisco; American Zinc Products Co., Greencastle, Ind.; American Nickeloid Co., 1501 Second St., Peru, Ill.; C. G. Hussey & Co., 2850 Second Ave., Pittsburgh, and Bridgeport Engravers Supply Co., 774 East Main St., Bridgeport, Conn.

Under the order, the respondent corporations are prohibited from exchanging information, through their trade association, as to the prices, terms and discounts at which they are to sell their products, and the association is required to discontinue cooperating with the corporations and the individual respondents by holding meetings at which they enter into price fixing agreements and at which the trade association acts as a clearing house for exchange of information submitted by the corporations, including reports as to the sales of their products, together with prices, discounts and terms thereof.

FTC CASE CLOSED

No. 2408. The Federal Trade Commission has closed its case against **Merchants Distillers Products**, formerly a wholesaler of liquors at Louisville, Ky., because this respondent company has been adjudged a bankrupt and its entire assets have been sold at auction.

Unfair competition in the misuse of the word "Distillers" in the respondent's corporate name was alleged in the complaint, which was brought under Section 5 of the Federal Trade Commission Act.

Neither glass nor labels bearing the name or license number of the respondent corporation were sold at the auction, and its basic permits have been cancelled by the Federal Alcohol Administration.

FEDERAL COMMUNICATIONS COMMISSION ACTION

Thursday, April 16

HEARING BEFORE AN EXAMINER

(Broadcast)

NEW—Harold H. Hanseth, Fresno, Calif.—C. P., 1410 kc., 1 KW, unlimited time.

NEW—Fresno Broadcasting Co., Fresno, Calif.—C. P., 1410 kc., 500 watts, 1 KW LS, unlimited time.

NEW—Kidd Brothers, Taft, Calif.—C. P., 1420 kc., 100 watts, daytime.

NEW—Tulare-Kings Counties Radio Associates, Visalia, Calif.—C. P., 1190 kc., 250 watts, daytime.

NEW—Ventura County Star, Inc., Ventura, Calif.—C. P., 1170 kc., 250 watts, daytime.

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Modification of license, 630 kc., 250 watts, unlimited time. Present assignment: 950 kc., 250 watts, daytime.

NEW—Wm. B. Smullin, Sacramento, Calif.—C. P., 1310 kc., 100 watts, 250 watts LS, unlimited time.

NEW—Howard N. Mitchell, Sacramento, Calif.—C. P., 1310 kc., 100 watts, unlimited time.

NEW—B. A. Thompson, Santa Cruz, Calif.—C. P., 1310 kc., 100 watts, 250 watts LS, unlimited time.

KGDM—E. F. Pepper, Stockton, Calif.—Modification of license, 1100 kc., 1 KW, limited time.

NEW—Union-Tribune Publishing Co., San Diego, Calif.—C. P., 1420 kc., 100 watts, 250 watts LS, unlimited time.

NEW—Marysville-Yuba City Publishers, Inc., Marysville, Calif.—C. P., 1140 kc., 250 watts, daytime.

KMPC—Beverly Hills Broadcasting Corp., Beverly Hills, Calif.—Renewal of license, 710 kc., 500 watts, limited time.

KFOX—Nichols & Warinner, Inc., Long Beach, Calif.—C. P., 1250 kc., 1 KW, 5 KW LS, unlimited time.

NEW—The Press Democrat Publishing Co., Santa Rosa, Calif.—C. P., 1310 kc., 250 watts, daytime.

KFOX—Nichols & Warinner, Inc., Long Beach, Calif.—Voluntary assignment of license to Han Nichols, Inc., 1250 kc., 1 KW, unlimited time.

ORAL ARGUMENT BEFORE THE BROADCAST DIVISION

Examiner's Report No. I-134

WBNX—Standard Cahill Co., Inc., New York, N. Y.—C. P., 1350 kc., 1 KW, shares with WAWZ. Present assignment: 1350 kc., 250 watts, shares with WAWZ.

Examiner's Report No. I-195

WTFI—Liberty Broadcasting Co., Athens, Ga.—C. P. to move to Atlanta, Ga., 1450 kc., 500 watts, unlimited time.

Examiner's Report No. I-196

NEW—V. H. Lake & H. E. Stanford, doing business as L & S Broadcasting Co., Atlanta, Ga.—C. P., 1210 kc., 100 watts, daytime.

APPLICATIONS GRANTED

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted C. P. to install auxiliary transmitter to operate with 500 watts for auxiliary purposes.

KWSC—State College of Wash., Pullman, Wash.—Granted C. P. to make changes in equipment and increase day power from 2 to 5 KW, subject to Rules 131, 132 and 139.

KFJB—Marshall Electric Co., Inc., Marshalltown, Ia.—Granted C. P. to make changes in equipment.

WCLO—Gazette Printing Co., Janesville, Wisc.—Granted C. P. to make changes in equipment, erect new radiating system, increase day power from 100 watts to 250 watts, and move transmitter to site to be determined in Janesville.

WSBC—WSBC, Inc., Chicago, Ill.—Granted C. P. to move transmitter approximately 3½ miles to West Town Office Bldg., 2400 Madison St., Chicago, and erect vertical radiator.

WJAR—The Outlet Co., Providence, R. I.—Granted modification of C. P. to make changes in equipment.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Granted temporary license to cover C. P. authorizing changes in equipment; also authority to determine operating power by direct measurement of antenna input in accordance with terms of Rule 137.

WSYR-WSYU—Central New York Broadcasting Corp., Syracuse, N. Y.—Granted modification of C. P. to move transmitter from Nedrow, N. Y., to Syracuse, extend commencement date to one month after grant and completion date to six months thereafter.

KIEM—Redwood Broadcasting Co., Inc., Eureka, Cal.—Granted license to cover C. P. authorizing installation of new equipment; change in frequency from local to regional channel and power from 100 to 500 watts, also move of transmitter; 1450 kc., unlimited time.

WIEK—Atlantic Broadcasting Corp., Portable-Mobile (N. Y. City)—Granted license to cover C. P. (temporary broadcast pickup); frequencies 1646, 2090, 2190, 2830 kc., 100 watts.

WSAI—The Crosley Radio Corp., Cincinnati, Ohio—Granted license to cover C. P. authorizing move of transmitter and changes in equipment; 1330 kc., 1 KW night, 2½ KW day, unlimited time.

WCRW—Clinton R. White, Chicago, Ill.—Granted modification of license to change specified hours deleting from 12 midnight to 1 a. m. operating time.

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Granted authority to install automatic frequency control.

KFYO—T. E. Kirksey, tr. as Kirksey Bros., Lubbock, Tex.—Granted consent to voluntary assignment of license to the Plains Radio Broadcasting Co., a Texas Corp.

W9XOK—The Star Chronicle Pub. Co., St. Louis, Mo.—Granted license to cover C. P.; frequencies 31600, 35600, 38600, 41000 kc., 100 watts.

WEED—William Avera Wynne, Rocky Mount, N. C.—Granted C. P. to make changes in equipment and increase day power from 100 to 250 watts.

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Granted modification of special experimental authority to increase power from 500 watts to 1 KW on 710 kc., unlimited time for period ending Aug. 1, 1936.

WORL—Broadcasting Service Organization, Inc., Needham, Mass.—Granted modification of license to move studio from Great Plain Ave., Babson Park, Needham, Mass., to 610 Beacon St., Boston, Mass.

KLZ—The Reynolds Radio Co., Inc., Denver, Colo.—Granted modification of license to change name to KLZ Broadcasting Co.

KICA—The Southwest Broadcasting Co., Clovis, N. Mex.—Granted consent to voluntary assignment of license to the Western Broadcasters, Inc.

KIDW—The Lamar Broadcasting Co., Lamar, Colo.—Granted consent to voluntary assignment of license to The Southwest Broadcasting Co.

KVOE—The Voice of the Orange Empire, Inc., Ltd., Santa Ana, Calif.—Granted C. P. to make changes in antenna system, and approving transmitter and studio sites at 2825 W. 5th St., Santa Ana, Calif.

WPFB—Forrest Broadcasting Co., Inc., Hattiesburg, Miss.—Granted C. P. to install new equipment and move studio locally in Hattiesburg.

KMPC—Beverly Hills Broadcasting Corp., Beverly Hills, Calif.—Granted renewal of license for the period ending August 1, 1936; 710 kc., 500 watts day, limited time.

KFJZ—Fort Worth Broadcasters, Inc., Fort Worth, Tex.—Granted C. P. to install new equipment and increase day power from 100 watts to 250 watts; 1370 kc., unlimited time.

WRAW—Reading Broadcasting Co., Reading, Pa.—Granted license to cover C. P. authorizing installation of new equipment, move transmitter locally in Reading.

NEW—The Evening News Association Inc., Mobile (Detroit, Mich.)—Granted C. P. for experimental broadcast pickup station; frequencies 31100, 34600, 37600, 40600 kc., 5 watts.

W4XCA—Memphis Commercial Appeal, Inc., Memphis, Tenn.—Granted modification of C. P. to increase power from 50 watts to 250 watts.

NEW—Central New York Broadcasting Corp., Portable-Mobile, Syracuse, N. Y.—Granted C. P. for broadcast pickup station; frequencies 31100, 34600, 37600, 40600 kc., 1 watt. Also granted license covering same.

WIBA—Badger Broadcasting Co., Inc., Madison, Wisc.—Granted license to cover C. P. authorizing changes in equipment, installation of new directional antenna radiating system, and increase in day power to 5 KW; 1280 kc., 1 KW night.

WAIM—Wilton E. Hall, Anderson, S. C.—Granted amended C. P. to make changes in equipment, change frequency from 1200 to 630 kc., and power from 100 watts unlimited to 1 KW day only.

SET FOR HEARING

NEW—Maine Broadcasting Co., Inc., Portland, Me.—Application for C. P. for new station; 620 kc., 500 watts night, 1 KW day, unlimited time; site to be determined.

WMT—Iowa Broadcasting Co., Cedar Rapids, Ia.—Application for

C. P. to make changes in equipment, increase day power from 2½ to 5 KW.

WLBZ—Maine Broadcasting Co., Inc., Bangor, Me.—Application for modification of license to change frequency from 620 to 970 kc., and hours of operation from unlimited to day, and until sunset at Chicago.

WEDC—Emil Denmark, Inc., Chicago, Ill.—Application for modification of license to make changes in specified hours of operation requesting additional time from midnight to 6 a. m.

KFBB—Buttery Broadcast, Inc., Great Falls, Mont.—Application for C. P. to make changes in equipment, increase day power from 2½ KW to 5 KW, change frequency from 1280 to 900 kc., and move transmitter locally, exact site to be determined with Commission's approval.

NEW—H. L. Corley, Trinidad, Colo.—Application for C. P. for new station; 1370 kc., 100 watts, unlimited time.

NEW—Stanley Reid & Charles Withnell Boegel, Jr., d/b as The Rapids Broadcasting Co., Cedar Rapids, Ia.—Application for C. P. for new station; 1310 kc., 100 watts, unlimited time. Site to be determined.

NEW—Jack E. Brantley, Mrs. Jack E. Brantley and Jack E. Brantley, Jr., Savannah, Ga.—Application for C. P. for new station; 1310 kc., 100 watts, unlimited. Site to be determined.

NEW—J. R. Maddox & Dr. W. B. Hair, d/b as Chattanooga Broadcasting Co., Chattanooga, Tenn.—C. P. amended to read: erect a new station; 590 kc., 1 KW, unlimited time, employing directional antenna system.

NEW—A. Earl Cullum, Jr., Dallas, Tex.—Application for C. P. for new station; 1500 kc., 100 watts, daytime only. Site to be determined with Commission's approval.

WNBC—William J. Sanders, New Britain, Conn.—Application for C. P. to make changes in equipment, increase day power from 250 watts to 1 KW.

KGFG—Oklahoma Broadcasting Co., Inc., Oklahoma City, Okla.—Application for consent to the transfer of control of the Okla. Broadcasting Co., Inc. (KGFG), from Hale V. Davis to Harold V. Hough.

WHDL—Olean Broadcasting Co., Inc., Olean, N. Y.—Application for C. P. to install new equipment, change frequency from 1420 to 1400 kc., increase power to 500 watts and move transmitter locally 2.3 miles west of present location of town of Allegany.

NEW—The Tribune, Great Falls, Mont.—Application for C. P., 950 kc., 1 KW night, 5 KW day, unlimited time; exact transmitter site and type of antenna to be determined with Commission's approval.

ACTION ON EXAMINERS' REPORTS

NEW—Ex. Rep., No. 1-137: Eastern States Broadcasting Corp., Bridgeton, N. J.—Remanded to dockets for further hearing.

NEW—Ex. Rep., No. 1-156: KWIL Broadcasting Co. (D. A. Gibbs, Jr., and E. H. Shemerry), Williston, N. Dak.—Denied C. P. for new broadcast station to operate on 1500 kc., 100 watts, specified hours. Examiner M. H. Dalberg reversed. Order effective July 7, 1936.

NEW—Ex. Rep., No. 1-185: Mid-Central Broadcasting Co. (J. E. Davidson, Jr., M. M. Smith & J. M. Davidson), Kansas City, Mo.—Denied C. P. for new station to operate on 1370 kc., 100 watts, unlimited time. Examiner R. H. Hyde sustained. Order effective April 17, 1936.

KWKC—Wilson Duncan, tr. as Wilson Duncan Broadcasting Co., Kansas City, Mo.—Application for renewal of license set for further hearing.

KRSC—Ex. Rep., No. 1-192: Radio Sales Corp., Seattle, Wash.—Denied C. P. to move transmitter; change equipment; increase power from 100 watts to 250 watts; change hours of operation from daytime to unlimited; 1120 kc. Examiner P. W. Seward reversed. Order effective July 7, 1936.

NEW—Ex. Rep., No. 1-193: E. F. & S. F. Sapp, tr. as Waycross Broadcasting Co., Waycross, Ga.—Granted C. P. for new station to operate on 1200 kc., 100 watts, unlimited time (site to be determined); Examiner R. H. Hyde sustained. Order effective July 7, 1936.

WRBL—Ex. Rep., 1-197: WRBL Radio Station, Inc., Columbus, Ga.—Granted renewal of license, 1200 kc., 100 watts, unlimited time. Examiner G. H. Hill sustained. Order effective July 14, 1936.

NEW—Ex. Rep., No. 1-96: Charles C. Theis, Wichita, Kans.—Granted C. P. for new broadcast station to operate on 1210 kc., 100 watts, unlimited time. Examiner P. W. Seward sustained. Order effective July 21, 1936.

KMA—Ex. Rep., No. 1-136: May Seed & Nursery Co., Shenandoah, Ia.—Granted modification of license to change hours of operation from sharing with KGBZ to unlimited (facilities of KGBZ), 930 kc., 1 KW, 2½ KW LS, and granted renewal of license, 930 kc., 1 KW, 2½ KW LS. Examiner G. H. Hill sustained. Order effective May 8, 1936.

KGBZ—KGBZ Broadcasting Co., York, Neb.—Denied renewal of license to operate on 930 kc., 1 KW, 2½ KW LS, share with KMA; also denied modification of license requesting facilities of KMA. Examiner Hill sustained.

NEW—Ex. Rep., No. 1-138: Big Spring Broadcasting Co., Big Spring, Tex.—Granted C. P. for new station to operate on 1500 kc., 100 watts, unlimited time.

NEW—The North Texas Broadcasting Co., Paris, Tex.—Granted C. P. for new station to operate on 1500 kc., 100 watts, daytime.

NEW—Plainview Broadcasting Co., S. T. Cooper & Mrs. Cumi Cooper, Plainview, Tex.—Denied C. P. for new station to operate on 1500 kc., 100 watts, daytime. Examiner J. P. Bramhall sustained. Order in above cases effective July 28, 1936.

KGHL—Ex. Rep., No. 1-139—Northwestern Auto Supply Co., Inc., Billings, Mont.—Granted modification of license to change frequency from 950 kc. to 780 kc., 1 KW, 2½ KW LS, unlimited time. Examiner P. W. Seward sustained.

KSOO—Sioux Falls Broadcast Association, Inc., Sioux Falls, S. Dak.—Denied modification of license to change frequency from 1110 kc. to 780 kc.; change power from 2½ KW night, 2½ KW day to 1 KW night, 2½ KW day; change hours of operation from limited to specified hours; unlimited, except hours now being used by KFDY, i.e., 12:30 p. m. to 2 p. m. daily except Sunday. Examiner Seward sustained.

KXL—KXL Broadcasters, Portland, Ore.—Denied modification of license to change frequency from 1420 kc. to 780 kc.; increase night power from 100 watts to 250 watts; 250 watts day; change hours of operation from sharing with KBPS to specified hours, 8 a. m. to LS; 7:30 to 10:30 p. m. Examiner Seward sustained.

KDFN—Donald Lewis Hathaway, Casper, Wyo.—Denied modification of license to change frequency from 1440 to 780 kc.; 500 watts; unlimited time. Examiner Seward sustained.

KEHE—Evening Herald Pub. Co., Los Angeles, Calif.—Granted C. P. to change transmitter and studio location (to be determined); make changes in equipment; increase power from 500 watts, 1 KW LS to 1 KW, 5 KW LS; change hours of operation from sharing with KELW to unlimited. Examiner Seward reversed. Order in above cases effective July 28, 1936.

NEW—Ex. Rep., No. 1-159: Robert E. Cole, d/b as Washington Broadcasting Co., Washington, Pa.—Denied C. P. for new broadcast station to operate on 1350 kc., 250 watts, daytime. Examiner M. H. Dalberg sustained. Order effective August 11, 1936.

WADC—Ex. Rep., No. 1-160: Allen T. Simmons, Tallmadge, Ohio—Granted C. P. to make changes in equipment and increase day power from 2½ to 5 KW; 1320 kc., 1 KW night, 5 KW day. Unlimited time. Examiner M. H. Dalberg sustained. Order effective July 28, 1936.

WCMI—Ex. Rep., 1-198: Ashland Broadcasting Co., Ashland, Ky.—Dismissed with prejudice application for C. P. to install new equipment, change frequency from 1310 kc. to 1350 kc.; increase power from 100 watts to 1 KW; unlimited time. Examiner P. W. Seward sustained.

WDAE—Ex. Rep., 1-201: Tampa Times Company, Tampa, Fla.—Granted C. P. to make changes in equipment and increase power from 1 KW to 1 KW night, 5 KW day; 1220 kc., unlimited time. Examiner R. H. Hyde sustained. Order effective July 14, 1936.

NEW—Ex. Rep., No. 1-202: Thames Broadcasting Corp., New London, Conn.—Granted C. P. for new station to operate on 1500 kc., 100 watts, daytime. Examiner Walker sustained. Order effective July 21, 1936.

NEW—Ex. Rep., 1-203: Fountain of Youth Properties, Inc., St. Augustine, Fla.—Granted C. P. for new broadcast station to operate on 1210 kc., 100 watts, unlimited time. Examiner R. H. Hyde sustained. Order effective July 14, 1936.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KALE, Portland, Ore.; KCRC, Enid, Okla.; KDFN, Casper, Wyo.; KECA, Los Angeles, Cal.; KFH, Wichita, Kans.; KFJR, Portland, Ore.; KGA, Spokane, Wash.; KGB, San Diego, Cal.; KGER, Long Beach, Cal.; KGHF, Pueblo, Colo.; KGIR, Butte, Mont.; KGMB, Honolulu, T. H.; KGNC, Amarillo, Tex.; KGNF, North Platte, Neb.; KGNO, Dodge City, Kans.; KID, Idaho Falls, Idaho; KLO, Ogden, Utah; KLR, Little Rock, Ark.; KLS, Oakland, Cal.; KQV, Pittsburgh, Pa.; KSCJ, Sioux City, Ia.; KSTP, St. Paul, Minn.; KTUL, Tulsa, Okla.; KWK, St. Louis, Mo.; WAAB, Boston, Mass.; WADC, Village of Tallmadge, Ohio; WALA, Mobile, Ala.; WAWZ, Zarephath, N. J.; WBIG, Greensboro, N. C.; WBNS, Columbus, Ohio; WBNX, New York City; WCBA, Allentown, Pa., and auxiliary; WCKY, Covington, Ky.; WCSC, Charleston, S. C.; WDRC, Hartford, Conn.; WEVD, New York City; WFBL, Syracuse, N. Y.; WGAR, Cleveland, Ohio; WGES, Chicago, Ill.; WHLB, Sheboygan, Wis.; WHEC, Rochester, N. Y.; WHK, Cleveland, Ohio; WHOM, Jersey City, N. J.; WIRE, Indianapolis, Ind.; WJSV, Alexandria, Va.; WKBW, Buffalo, N. Y.; WLAC, Nashville, Tenn.; WMBD, Peoria, Ill.; WNBC, New Britain Conn.; WOKO, Albany, N. Y.; WORK, York, Pa.; WSAR, Fall River, Mass.; WSBT, South Bend, Ind.; WSFA, Montgomery, Ala.; WSPD, Toledo, Ohio; KOMA, Oklahoma City, Okla.

The following stations were granted renewal of Relay Broadcasting Licenses for Experimental Service, effective May 1, 1936, to expire May 1, 1937, in exact conformity with existing license:

W2XE, Atlantic Broadcasting Corp.; W9XAA, Chicago Fed. of Labor; W8XAL, The Crosley Radio Corp.; W2XAD, General Electric Co.; W2XAF, General Electric Co.; W4XB, Isle of Dreams Brdcastg. Corp.; W3XAL, National Broadcasting Co.; W9XF, National Broadcasting Co.; W3XAU, WCAU Broadcasting Co.; W1XK, Westinghouse E and M Co.; W8XK, Westinghouse E and M Co.

The following stations were granted renewal of Experimental Visual Broadcasting station licenses in the Experimental Service, for the period May 1, 1936 to May 1, 1937, in exact conformity with existing license:

W2XAB and W2XAK, Atlantic Broadcasting Corp.; W1XG, General Television Corp.; W2XBS, W2XBT, National Broadcasting Co. Inc.; W2XF, W3XAK, W9XAP, National Broadcasting Co. Inc.; W9XG, Purdue University; W2XDR, Radio Pictures, Inc.; W3XAD and W5XEP, RCA Mfg. Co. Inc.; W10XX, RCA Mfg. Co.; W9XK, Univ. of Iowa.

W1XKB—Westinghouse E and M Co., Portable—Granted renewal of Spec. Exp. station license for Exp. service, for period April 21 to July 21, 1936, in exact conformity with existing license.

W9XAF—The Journal Co., (The Milwaukee Journal), Milwaukee, Wis.—Granted renewal of Spec. Exp. station license for Exp. service, for period May 1 to August 1, 1936, in exact conformity with existing license.

W2XBH—Radio Pictures, Inc., Long Island City, N. Y.—Granted renewal of Spec. Exp. station license for Exp. service, for period May 1 to August 1, 1936, in exact conformity with existing license.

W2XBR—Radio Pictures, Inc., Long Island City, N. Y.—Granted renewal of special experimental station license for experimental service for period May 1, 1936 to May 1, 1937, in exact conformity with existing license.

W3XAI—RCA Manufacturing Co. Inc., Portable—Granted renewal of special experimental station license for experimental service for period May 1, 1936 to May 1, 1937, in exact conformity with existing license.

W1XKA-W3XKA-W8XKA—Westinghouse E and M Co., Portable-Mobile—Granted renewal of special experimental station license for experimental service for period April 30 to July 30, 1936, in exact conformity with existing license.

W2XK—National Brdcastg. Co. Inc., New York City—Granted renewal of special experimental station license for experimental service for period May 1, 1936 to May 1, 1937, in exact conformity with existing license.

MISCELLANEOUS

WPHR—WLBG, Inc., Petersburg, Va., and—
 WMBG—Havens & Martin, Richmond, Va.—Denied request to postpone taking depositions under order issued to Times Dispatch Publishing Co. Inc. Depositions to be taken April 9, 1936, as originally ordered.

WPRO—Cherry & Webb Brdctg. Co., Providence, R. I.—Denied petition for reconsideration and grant of application. Case redesignated for hearing because of an amendment providing for use of directional antenna system daytime as well as nighttime.

St. Petersburg Chamber of Commerce, St. Petersburg, Fla.—Denied petition for rehearing of application for new broadcasting station in that city, including proposal to apply for new frequency, wattage and operating hours.

WDSU—WDSU, Inc., New Orleans, La.—Granted petition to file its answer to notice of appearance and desire to be heard of the Star-Chronicle Publishing Co., Docket No. 3765.

W9XBY—First National Television Inc., Kansas City, Mo.—Granted authority to intervene and be made a party respondent in opposition to application of WHB Broadcasting Co. in Docket No. 3808.

KTFI—Radio Broadcasting Corp., Twin Falls, Idaho—Overruled motion to strike from bill of particulars relative to the reopened case for Mod. of Lic. the issue "to determine whether continued operation of this station would serve public interest, convenience and necessity."

WJBO—Baton Rouge Brdctg. Co. Inc., Baton Rouge, La.—Granted authority to intervene at hearing of application of Hearst Radio Inc. (WISN) for authority to increase night power to 1 KW. Application scheduled for hearing April 9, 1936.

WFEA—New Hampshire Brdctg. Co., Manchester, N. H.—Action taken March 27, recorded in Report 81 should have read: Granted special authority to erect new antenna and ground system. The signal strength of new radiating system must meet the requirements of Commission. The application for renewal of license still pending.

NEW—Continental Radio Co., Toledo, Ohio—C. P. already in hearing docket amended to read: use 1200 kc., 100 watts daytime only, site and antenna to be approved.

William A. Schall, Omaha, Nebr.—Denied petition asking Commission to reconsider action of January 10, 1936, in rejecting application for new station at Omaha to operate on 1500 kc., 100 watts, and the alternate that application be referred back to examiner for additional testimony.

KG CX—E. E. Krehsbach, Wolf Point, Mont.—Petition for reconsideration of decision of March 3, 1936, denying application for authority to change frequency from 1310 kc. to 1450 kc., and increase power from 100 watts night, 250 watts day, to 1 KW unlimited, set down for oral argument. Effective date of decision of March 3, 1936, extended pending decision on petition.

WLBI—State of Wisc. Dept. of Agr. and Markets, Stevens Point, Wisc.—Reinstated application for C. P. to increase power from 2½ KW daytime to 5 KW daytime.

KFH—Radio Station KFHI, Wichita, Kans.—Granted motion to have KFBI application defaulted and denied or cancelled. The application was for authority to move KFBI from Abilene to Wichita, Kans.

KFBI—Farmers & Bankers Life Ins. Co., Wichita, Kans.—Granted authority to take depositions in re application for authority to erect new broadcasting station at Wichita, Kans., to operate on 1210 kc., 100 watts, unlimited.

Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Denied petition asking Commission to reconsider and grant application for new station to operate on 1480 kc., 5 KW, daytime. Application denied by Commission, order effective May 12, 1936.

Continental Radio Company, Toledo, Ohio—Overruled demurrer filed to pleadings of Community Broadcasting Co., which seeks authority to erect station at Toledo to operate on 1200 kc., 100 watts daytime, scheduled for hearing, April 27, 1936.

WJAC—WJAC, Inc., Johnstown, Pa.—Denied petition asking Commission to reconsider and grant application for approval of transmitter site, changes in equipment and increase in day power, which was designated for hearing on March 10, 1936.

Steffens Ice and Ice Cream Co., Wichita, Kans.—Overruled petition to intervene at hearing of application of Chas. C.

Theis, who seeks authority to establish new broadcasting station at Wichita, Kans.

APPLICATIONS DISMISSED

The following applications, heretofore set for hearing, were dismissed at request of applicants:

WRAX—WRAX Broadcasting Co., Philadelphia, Pa.—Applied for modification of license; 920 kc., 1 KW; shares with WPEN, using directional antenna night.

WPEN—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Applied for modification of license; 920 kc., 1 KW; shares with WRAX, using directional antenna night.

KHQ—Louis Wasmer, Inc., Spokane, Wash.—Application for C. P., heretofore set for hearing, requesting 590 kc., 5 KW unlimited time, was dismissed at request of applicant.

KFDY—So. Dak. State College, Brookings, S. Dak.—Application for modification of license, 780 kc., 1 KW, specified hours, heretofore set for hearing, was dismissed for failure of applicant to answer form letter, adopted by Broadcast Division, requiring applicants to signify their desire to be heard within 10 days after receipt of said letter.

The following applications, heretofore set for hearing, were dismissed at the requests of the applicants:

WARD—United States Broadcasting Corp., Brooklyn, N. Y.—Applied for modification of license, 1400 kc., 500 watts, unlimited time.

WARD—United States Broadcasting Corp., Brooklyn, N. Y.—Applied for voluntary assignment of license, 1400 kc., 500 watts, shares with WVFW, WLTH and WBBC.

WLTH—Voice of Brooklyn, Inc., Brooklyn, N. Y.—Applied for voluntary assignment of license, 1400 kc., 500 watts, shares with WARD, WVFW and WBBC.

APPLICATIONS DENIED

The following applications, heretofore set for hearing, were denied as in cases of default for failure to file an appearance and statement of facts to be proved in accordance with Rule 104.6 (c):

NEW—Arde Bulova and Norman K. Winson, Brooklyn, N. Y.—Applied for C. P., 1400 kc., 500 watts, unlimited time.

WVFW—Paramount Broadcasting Corp., Brooklyn, N. Y.—Applied for voluntary assignment of license, 1400 kc., 500 watts, shares with WARD, WLTH and WBBC.

KSCJ—Perkins Brothers Co. (The Sioux City Journal), Sioux City, Ia.—Denied special temporary authority to operate unlimited time pending completion of CP authorizing local move of transmitter, installing new antenna and increasing hours of operation to unlimited.

KMBC—Midland Broadcasting Co., Kansas City, Mo.—Denied special authority to operate with a power of 5 KW nighttime in order to overcome interference caused by Station XEAW.

ORAL ARGUMENTS GRANTED

(Action taken April 3)

NEW—Ex. Rep., 1-200: Merced Star Puh. Co., Merced Cal.—Oral argument granted to be held June 11, 1936.

NEW—Ex. Rep., 1-204: Christina M. Jacobson, d/h as The Valley Electric Co., San Luis Obispo, Cal.—Oral argument granted to be held June 11, 1936.

NEW—E. E. Long Piano Co., San Luis Obispo, Cal.—Oral argument granted to be held June 11, 1936.

APPLICATIONS RECEIVED

First Zone

WBEN—WBEN, Incorporated, Buffalo, N. Y.—Modification of 900 Construction permit (B1-P-567) to make changes in equipment, increase day power from 1 KW to 5 KW, move transmitter to site to be approved by Commission, further requesting approval of transmitter site at R. F. D. No. 2, near Shawnee Road, Martinsville, New York. Amended: Re Antenna.

WOV—International Broadcasting Corp., New York, N. Y.—Authority to install automatic frequency control.

WARD—United States Broadcasting Corp., Brooklyn, N. Y.—1400 Voluntary assignment of license from United States Broadcasting Corp. to Kings Broadcasting Corp.

WLTH—Voice of Brooklyn, Inc., Brooklyn, N. Y.—Voluntary 1400 assignment of license from Voice of Brooklyn, Inc., to Kings Broadcasting Corp.

W10XGJ—Atlantic Broadcasting Corp., Portable-Mobile—License to cover construction permit for a general experimental station.

W2XR—John V. L. Hogan, Long Island City, New York—Voluntary assignment of license from John V. L. Hogan to Interstate Broadcasting Co., Inc.

W1XEH—The Travelers Broadcasting Service Corp., Avon Mt., Avon, Conn.—License to cover construction permit as modified, for a special experimental station to be operated on 63500 kc., 150 watts.

WGBE—Onondaga Radio Broadcasting Corp., Portable-Mobile—License to cover construction permit for a broadcast pickup station to be operated on 1646, 2090, 2190 & 2830 kc., 45 watts.

W8XAZ—Buffalo Broadcasting Corp., Buffalo, New York—Construction permit to increase power to 25 watts and change transmitter—general experimental station.

W8XAZ—Buffalo Broadcasting Corp., Buffalo, New York—License to cover above.

WABA—Wodaam Corporation, Mobile-in airplane—License to cover construction permit for a new broadcast pickup station to be operated on 1622, 2060, 2150, 2790 kc., 7½ watts.

Second Zone

WTAR—WTAR Radio Corporation, Norfolk, Va.—Construction 780 permit to increase power from 500 watts, 1 KW day to 1 KW day and night, install directional antenna for night use and move transmitter from Virginia Beach Blvd., 1.7 miles from Norfolk, Virginia, to On Glen Rock, Elizabeth Park Road, 1.6 miles E. of Norfolk, Va.

WTAR—WTAR Radio Corporation, Norfolk, Va.—Construction 780 permit to make changes in auxiliary equipment.

WHBC—Edward P. Graham, Canton, Ohio—Modification of construction permit (B2-P-241) to install new equipment and increase power, requesting extension of completion date from 4-27-36 to 7-27-36.

NEW—Continental Radio Co., Toledo, Ohio—Construction permit for a new station to be operated on 1210 kc., 100 watts, 250 watts day, unlimited time. Amended: To change frequency from 1210 kc. to 1200 kc., power from 100 watts, 250 watts day to 100 watts, and hours of operation from unlimited time to daytime.

WHAT—Independence Broadcasting Co., Inc., Philadelphia, Pa.—1220 Construction permit to make changes in equipment, increase power from 100 watts to 1 KW, frequency from 1310 kc. to 1220 kc., hours of operation from share WTEL to unlimited and move transmitter from Hotel Pennsylvania, 3900 Chestnut Street, Philadelphia, Pa., to site to be determined, Pennsylvania. Amended: Giving transmitter site as Lower Merion Twp. Glen Rd., lot of W. Laurel Cemetery, approx. 1200' N. W. City Line Ave. & 1000' S. W. Center Line Schuylkill River, Pa., and install directional antenna.

WRAW—Reading Broadcasting Co., Reading, Pa.—License to cover 1310 construction permit (B2-P-799) for new equipment and move of transmitter.

NEW—John E. Fetzner, Benton Harbor, Mich.—Construction permit for a new station to be operated on 1500 kc., 100 watts, 250 watts day, unlimited time. Amended: To change power from 100 watts, 250 watts day to 250 watts and hours of operation from unlimited time to daytime.

NEW—The Evening News Association, Portable-Mobile—Construction permit for a new general experimental station to be operated on 31100, 34600, 37600, 40600 kc., 3 watts.

NEW—The Evening News Association, Portable-Mobile—Construction permit for a new general experimental station to be operated on 86000-400000 kc., 1 watt.

Third Zone

WWL—Loyola University, New Orleans, La.—Construction permit 850 to install new equipment, increase power from 10 KW to 50 KW and change hours of operation from specified hours to unlimited. Amended: Re antenna.

WTJS—The Sun Publishing Co., Inc., Jackson, Tenn.—Construction permit to install new equipment, increase power from

100 watts, 250 watts day to 250 watts, 500 watts day and change frequency from 1310 kc. to 920 kc. Also move transmitter from Hall St., Jackson, Tenn., to 350' E. of Hollywood Cemetery N. W., City limits, exact site to be determined, Tenn., using directional antenna. Amended: To omit request for move of transmitter.

NEW—Neil O. Davis & F. M. Gleason, d/b as North Georgia 1200. Broadcasting Co., Rossville, Ga.—Construction permit for a new station to be operated on 1200 kc., 100 watts, unlimited time.

NEW—Sweetwater Broadcasting Co., Sweetwater, Tex.—Construction permit for a new station to be operated on 1260 kc., 100 watts, unlimited time. Amended: To change frequency from 1260 kc. to 1310 kc., hours of operation from unlimited to daytime.

NEW—Brownwood Broadcasting Co., Brownwood, Tex.—Construction permit for a new station to be operated on 1210 kc., 100 watts, unlimited time. Amended: To change frequency from 1210 kc. to 1370 kc., and hours of operation from unlimited time to daytime only.

WPFB—Forrest Broadcasting Co., Inc., Hattiesburg, Miss.—Construction permit to install new equipment and move studio from Saphie Bldg., 512 Main St., Hattiesburg, Miss. to W. 7th St. & 25th Ave., Hattiesburg, Miss.

KALB—Alexandria Broadcasting Co., Inc., Alexandria, La.—1420 Authority to transfer control of corporation from Isaac Wahlder, F. S. Hemenway, Jr., J. P. Rush, Jr. & S. B. Pearce to W. H. Allen, 27 shares common stock.

Fourth Zone

WIBA—Badger Broadcasting Co., Inc., Madison, Wisc.—License 1280 to cover construction permit (B4-P-716) for changes in equipment, new antenna and increase in power.

Fifth Zone

NEW—Ben S. McGlashan, San Diego, Calif.—Construction permit 550 for a new station to be operated on 550 kc., 250 watts, daytime. Amended: To make changes in equipment.

KHQ—Louis Wasmer, Inc., Spokane, Wash.—Modification of construction permit (B5-P-925) for changes in equipment, requesting further changes in equipment and antenna, increase in power from 1 KW, 2 KW day to 1 KW, 5 KW day, move transmitter from Sprague Ave. & Post St., to site to be determined, Spokane, Washington, and extend commencement and completion dates.

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—License to 920 cover construction permit (B5-P-536) as modified for new equipment, increase in power and move of transmitter.

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Authority to 920 determine operating power by direct measurement of antenna.

NEW—KLA, Incorporated, La Grande, Ore.—Construction permit 1100 for a new station to be operated on 1100 kc., 250 watts, daytime.

NEW—Democrat News Co., Inc., Lewistown, Mont.—Construction permit for a new station to be operated on 1200 kc., 100 watts, 250 watts day, unlimited time. Amended: To make changes in equipment, change power from 100 watts, 250 watts day to 100 watts, transmitter site to be determined, Lewistown, Montana, and studio site given as 513 W. Main Street, Lewistown, Montana.

KIUJ—W. C. Irvin, Santa Fe, New Mex.—Voluntary assignment 1310 of license from W. C. Irvin to J. Laurence Martin.

NEW—Albuquerque Publishing Co., Albuquerque, New Mex.—1370 Construction permit for a new station to be operated on 1370 kc., 100 watts, unlimited time. Amended: To make changes in antenna and change transmitter site from 422-424 W. Gold Ave., to site to be determined, Albuquerque, New Mexico.

KOOS—Pacific Radio Corporation, Marshfield, Ore.—Construction 1390 permit to make changes in equipment, move transmitter from Hall Bldg., Marshfield, Oregon, to ¼ mi. from North city limits of Marshfield, Oregon.

KNEC—Puget Sound Broadcasting Co., Inc., Portable-Mobile—License to cover construction permit for a broadcast pickup station, to be operated on 1646, 2090, 2190, 2830 kc., 40 watts.

NAB CONVENTION JULY 5, 6, 7, 8

The fourteenth annual convention of the National Association of Broadcasters will be held in Chicago, Ill., July 5, 6, 7 and 8. The hotel will be announced later.

DIRECTORS MEETING APRIL 27

The Board of Directors of the National Association of Broadcasters will meet in Chicago, Illinois, April 27. The meeting was called by the Managing Director (a) to receive and give consideration to a plan of action in the field of copyright; (b) to give consideration to questions of policy with respect to NAB participation in the general hearing called by the FCC for June 15 (see NAB REPORTS dated April 9, 1936, page 1273), and (c) to dispose of any routine matters.

INDEX OF ACTIVE MUSICAL SELECTIONS

E. C. Mills, General Manager of the ASCAP, has extended to the NAB, under authority given him by the ASCAP Board of Directors, an invitation to copy ASCAP indexes of and to all musical compositions. Conferences have been held, and correspondence has been exchanged concerning minimum data which would meet the requirements of broadcasters and the working out of a plan to compile complete information with respect to the musical selections used one or more times on the network key stations during the years 1934 and 1935. This will make available to broadcasters an index of 25,000 active musical selections, more or less, and furnish absolutely essential groundwork if a per-piece system is adopted.

Plans now under discussion include a continuing service which will maintain the indexes up to date and provide for a gradual enlargement of them. The ASCAP invitation imposes two conditions: (1) the NAB will be required to make copies of such index available to any broadcaster whether or not he is a member; and, (2) it is to be definitely understood that under no circumstances does the ASCAP warrant or guarantee to others that the information contained in the index is correct.

As soon as it is determined what minimum data are required to be shown on the cards, estimates of the cost for a single index will be obtained and furnished to all broadcasters in order that we may secure reliable information in respect to the demand for such a record. The need for such a record was never greater than it is today and every possible effort will be made to expedite the compilation of a master index from which copies can be made and supplied to all broadcasters.

HEARINGS ON DUFFY BILL ENDED

On April 15 the hearings on the Duffy Bill (S. 3047), and other copyright legislation, which began February 25, came to a close, although all persons who had appeared before the Committee were given until Saturday, April 18, to file briefs or further statements. These hearings have easily been the most extensive ever held before a committee of Congress on copyright legislation, and the printed transcript will reach enormous proportions.

At the end of the closing session, a controversy developed between members of the Committee with respect to the date on

which the Committee would take up consideration of the Bill and its report thereon. Congressman Church of Illinois, seconded by Congressman O'Malley of Wisconsin, moved that the Committee meet in executive session on the following day, April 16, or, in any event, not later than April 17. Congressman Kramer of California, seconded by Congressman Daly of Pennsylvania, made a substitute motion that the clerk call a meeting for Monday, April 20. The substitute motion prevailed. A circumstance that may result in a delay in reporting out a bill is the fact that probably (although not necessarily) a sub-committee will be appointed to study the legislation and draw up the Committee's report. Since the appointment of such a sub-committee would be by the chairman, Dr. Sirovich (whose hostility to the Duffy Bill has been continuously manifested since the outset), there is reason to fear that a majority of the sub-committee will oppose early action.

Some confusion has been created in the minds both of members of the Committee and to some extent among other members of the House by the so-called Vandenberg amendment having to do with design copyright. This amendment was added to the bill on the floor of the Senate and has to do with matters which are of no interest whatsoever to the broadcasting industry or to other users of music. Whatever be the merits of the amendment, there is a great deal to be said for the contention that it should be the subject of a separate bill. In any event, nothing will be lost if the amendment is stricken from the Duffy Bill.

The last day of the hearings was devoted to testimony by Dr. Wallace McClure of the Department of State, representatives of the Copyright Office, Nathan Burkan, ASCAP's general counsel, and two or three witnesses on minor matters. Burkan made a very lengthy statement with respect both to the provisions of the Duffy Bill and the proposed entry of the United States into the International Copyright Union. In the course of his testimony, he repeatedly made unfounded insinuations and charges against practically everyone who has supported the Duffy Bill. At the conclusion of his testimony, Dr. McClure was re-called to the stand and, under questioning by Congressman Church, reiterated his conviction that the \$250 minimum penalty should be eliminated from the law and his belief that the United States should adhere to the International Convention.

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act: General Time Instruments Corp., New York City (2-2019, Form A-2). Dairyland, Inc., San Antonio, Texas (2-2022, Form A-1). St. Joseph Water Company, St. Joseph, Mo. (2-2023, Form A-2). Tacony-Palmyra Bridge Co., Camden, N. J. (2-2024, Form A-2). FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2757. Retail Furniture Dealers' Association of St. Louis, its officers and 42 merchant members, have been named respondents in a complaint alleging violation of the Federal Trade Commission Act through combination and conspiracy to monopolize the sale and distribution of furniture and allied products in the St. Louis, Mo., and East St. Louis, Ill., trade area.

The respondents also are charged with combining to unreasonably suppress competition and deprive the public of advantages in price and service which it would otherwise receive.

Among practices alleged in the complaint are the fixing of prices at which furniture, electric refrigerators and radios are to be retailed in the St. Louis area; discrimination against small business enterprises; "freezing" competing companies out of business, and injuring the public, manufacturers, producers, dealers, distributors, and others who do not conform or do not desire to conform to the respondents' program, but are compelled to do so by the respondents' concerted action.

The respondents are alleged to have enforced two policies affecting (1) retail furniture dealers in the St. Louis area, and (2) manufacturers, distributors, jobbers and the public in that area.

No. 2758. False representations in advertising two brands of bread it manufactures and sells in interstate commerce, is charged in a complaint against **William Frehofer Baking Co.**, 20th Street and Indiana Avenue, **Philadelphia.** The respondents' methods of competition are alleged to be in violation of Section 5 of the Federal Trade Commission Act.

In advertisements, the respondent company allegedly represented that "Frehofer's Perfect Loaf" contains "100 per cent more butter," and made various other representations of similar import, which, according to the complaint, were misleading and deceptive, and implied to purchasers that this particular brand of bread contained an unusually high butter content.

No. 2759. Alleging unfair competition through false and misleading advertising of cosmetics, a complaint has been issued against **Hollywood Mask, Inc.**, 105 West Monroe St., **Chicago.**

Selling "Hollywood Vitamin Hand and Skin Lotion" and "Hollywood Mask Turtle Oil," the respondent is alleged to have advertised its products as possessing ingredients capable of erasing lines or wrinkles of the skin, or of nourishing the skin, muscles or tissues.

No. 2760. **Reta Terrell Sloan**, trading as **Reta Terrell**, with her principal office at 513 Oakdale Ave., **Chicago**, and a branch at 50 East 10th St., **New York City**, is charged with unfair methods of competition in the sale of cosmetics in interstate commerce.

In advertising matter, the respondent allegedly represents that her cosmetic preparations possess ingredients of such character and in such quantity as to serve as a food for the skin, muscles or tissues; that her preparations have a beneficial effect in filling out and tightening the lines of broken tissues; that they eliminate dryness from the skin and remove wrinkles, and that use of the preparations has a beneficial effect in the treatment of various conditions of the skin. Such representations, according to the complaint, are untrue, and the cosmetics do not produce the results claimed for them.

No. 2761. Deceptive representations in the sale of a two-volume set of books called "Health Knowledge," is alleged in a complaint issued against **Medical Book Distributors, Inc.**, publisher and distributor of the volumes, and **American Health Society, Inc.**, which purchases the books from Medical Book Distributors and sells them in interstate commerce. Both organizations have headquarters at 1476 Broadway, **New York City.**

Sales managers and salesmen employed by the Health Society are alleged to have interviewed prospective purchasers, usually women, announcing that they were authorized to call and give "health talks."

Although the books were allegedly represented as a "New Revised Edition, 1934," the set was not an up-to-date medical work, but treated of old methods abandoned by the medical profession, according to the complaint. A list of purported "eminent medical authors," said to have contributed to the work, is alleged to be false and misleading, as these persons, it is charged, did not submit their work for inclusion in the volumes.

No. 2762. Use of a lottery scheme to promote the sale of candy is alleged in a complaint issued against **Mack R. Keshan** and **Oswald Freund**, 114 East 13th St., **New York City**, and the **American Mint Corporation.** The complaint charges the respondents with unfair competition in violation of Section 5 of the Federal Trade Commission Act.

The respondents sell assortments of candy to brokers, wholesalers and retail chain stores, and, according to the complaint, furnish them with display cards describing the lottery scheme as one by which the ultimate purchaser of a small piece of candy may win a piece containing a sum of money, such sum of money being procured as a prize wholly by chance.

Stipulations

The Commission has issued the following cease and desist orders:

No. 2363. An order has been entered against **Edwin Cigar Co., Inc.**, and **James B. Hall, Jr., Inc.**, 100 East 16th St., **New York City**, both engaged in the manufacture and sale of cigars, directing them to discontinue certain unfair methods of competition in violation of Section 5 of the Federal Trade Commission Act.

The Commission found that **Edwin Cigar Co., Inc.**, operates a mail order business, selling direct to the consumer, that **James B.**

Hall, Jr., Inc., sells to jobbers and retailers exclusively, and that Max Rosenbloom is president of both respondent corporations and directs their policies as though they were a single enterprise.

Both respondents are ordered to cease representing, by use of the words "Finest Havana Filler," "Havana Filled," or "Havana Filler," that their cigars so designated or the filled portions thereof, are actually made of Cuban or Havana tobacco, unless they are composed of such tobacco and made and filled in conformity with the standards followed in the manufacture of genuine Havana filler cigars.

No. 2586. Radiator Specialty Co., 315 East 5th St., Charlotte, N. C., dealer in a cleaning fluid advertised as "Perfo," has been ordered to cease and desist from misrepresentations in the sale of the preparation.

Advertisements that the cleaning fluid is not harmful or injurious to any fabric, material or color, that it will absorb spots, and does not leave a spot or ring on materials, is prohibited in the order.

Findings are that use of the fluid on fabrics or materials dyed with certain kinds of dyes, such as non-fast dyes, impairs and harms the colors by causing them to bleed or run.

FEDERAL COMMUNICATIONS COMMISSION ACTION

HEARING CALENDAR

Monday, April 20

HEARING BEFORE AN EXAMINER

KTFI—Radio Broadcasting Corp., Twin Falls, Idaho—Renewal of license, 1240 kc., 500 watts, 1 KW LS, unlimited time.

KTFI—Radio Broadcasting Corp., Twin Falls, Idaho—Modification of license, 630 kc., 500 watts, 1 KW, unlimited time. Present assignment: 1240 kc., 500 watts, 1 KW LS, unlimited time.

KSEI—Radio Service Corp., Pocatello, Idaho—Renewal of license, 900 kc., 250 watts, 500 watts LS, unlimited time.

Wednesday, April 22

HEARING BEFORE AN EXAMINER (Broadcast)

KFH—The Radio Station KFH Co., Wichita, Kansas—C. P., 1300 kc., 1 KW, 5 KW LS, unlimited time. Present assignment: 1300 kc., 1 KW, 1 KW LS, unlimited time.

KFBI—The Farmers & Bankers Life Ins. Co., Wichita, Kansas—C. P., 1050 kc., 5 KW, limited time. (Request to move from Abilene to Wichita, Kansas.)

NEW—The Farmers & Bankers Life Ins. Co., Wichita, Kansas—C. P., 1210 kc., 100 watts, unlimited time.

Thursday, April 23

ORAL ARGUMENT BEFORE THE BROADCAST DIVISION

Examiner's Report No. I-163

NEW—Paul R. Heitmeyer, Salt Lake City, Utah—C. P., 1210 kc., 100 watts, unlimited time.

Examiner's Report No. I-173

NEW—Wyoming Radio Educational Assn. (Lester G. Baker, Pres.), Cheyenne, Wyoming—C. P., 630 kc., 500 watts, 1 KW LS, unlimited time.

NEW—Paul R. Heitmeyer, Cheyenne, Wyoming—C. P., 1210 kc., 100 watts, 250 watts LS, unlimited time.

Examiner's Report No. I-180

WFEA—New Hampshire Broadcasting Co., Manchester, N. H.—Renewal of license, 1340 kc., 500 watts, 1 KW LS, unlimited time.

Examiner's Report No. I-184

NEW—W. H. Kindig, Hollywood, Calif.—C. P., 1300 kc., 1 KW, share with KFAC. (Requests facilities of KFAC.)

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—Renewal of license, 1300 kc., 1 KW, unlimited time.

APPLICATIONS GRANTED

WBNY—Roy L. Albertson, Buffalo, N. Y.—Granted license to cover C. P. for new station; 1370 kc., 100 watts night, 250 watts day—all hours except those assigned station WSVS.

KELW—Evening Herald Pub. Co., Burbank, Calif.—Granted renewal of license; 750 kc., 500 watts. S-KEHE.

NEW—The Evening News Assn., Portable-Mobile (Detroit)—Granted C. P., 86000-400000 kc., 1 KW, unlimited time.

W8XAZ—Buffalo Broadcasting Corp., Portable-Mobile (Buffalo, N. Y.)—Granted C. P. to make changes in transmitter and increase power from 1.5 to 25 watts.

W8XAZ—Buffalo Broadcasting Corp., Portable-Mobile (Buffalo, N. Y.)—Granted license to cover C. P.; frequencies 31100, 34600, 37600, 40600 kc., 25 watts.

SET FOR HEARING

NEW—John S. Braun, Waco, Texas—Application for C. P. for new station; 1500 kc., 100 watts daytime. Site to be determined.

NEW—The Tribune Co., Tampa, Fla.—Application for C. P. for new station; 560 kc., 1 KW night, 5 KW day, unlimited time. Site to be determined.

NEW—Bay County Publishers, Inc., Panama City, Fla.—Application for C. P. for new station; 1420 kc., 100 watts, unlimited time.

NEW—I. T. U. Radio Station, Inc., Indianapolis, Ind.—Application for C. P. for new station; 560 kc., 5 KW day, 1 KW night, unlimited. Site to be determined.

NEW—J. W. Plame, Huntington Park, Calif.—Application for C. P., 1500 kc., 100 watts, unlimited time. Facilities used by KVOE.

NEW—George F. Bissell, Pittsfield, Mass.—Application for C. P. for new station; 1200 kc., 100 watts daytime. Site to be determined.

NEW—Golden Empire Broadcasting Co., Marysville, Calif.—Application for C. P. for new station; 1140 kc., 250 watts daytime. Site to be determined.

NEW—New Jersey Broadcasting Co., Inc., Paterson, N. J.—Application for C. P. for new station; 620 kc., 250 watts daytime.

KVOS—KVOS, Inc., Bellingham, Wash.—Consent to the transfer of control of KVOS, Inc., from Wescoast Broadcasting Co. to Rogan Jones. (1200 kc., 100 watts, unlimited time.)

ACTION ON EXAMINERS' REPORTS

NEW—Ex. Rep. No. 1-149: Reporter Broadcasting Co., Abilene, Texas—Granted C. P. for new broadcast station to operate on 1420 kc., 100 watts; unlimited time. Examiner Bramhall sustained. Order effective August 4th.

NEW—Wm. O. Ansley, Jr., d/b as Guilford Broadcasting Co., Abilene, Texas—Denied C. P. for new station to operate on 1420 kc., 100 watts, unlimited time. Examiner Bramhall sustained. Order effective August 4th, 1936.

KMED—Ex. Rep. No. 1-167: Mrs. W. J. Virgin, Medford, Oregon—Granted modification of license to change frequency from 1310 to 1410 kc.; power from 100 watts night, 250 watts day, to 250 watts night and day, and change hours from unlimited to specified. Examiner D. G. Arnold sustained. Order effective August 4th, 1936.

NEW—Ex. Rep. No. 1-208: James R. Ross, Jr., Tuscaloosa, Ala.—Granted C. P. for new broadcast station to operate on 1200 kc., 100 watts, daytime. Examiner Bramhall sustained. Order effective August 11, 1936.

ACTION ON CASES HEARD BY BROADCAST DIVISION

WTMJ—The Journal Company (The Milwaukee Journal), Milwaukee, Wis.—Granted renewal of license; 620 kc., 1 KW night, 5 KW day, unlimited time. Order effective August 11, 1936.

KFRC—Don Lee Broadcasting System, San Francisco, Calif.—Granted renewal of license; 610 kc., 1 KW, unlimited time. Order effective August 11, 1936.

ORAL ARGUMENTS GRANTED

NEW—Ex. Rep. No. 1-186: Advertiser Pub. Co., Ltd., Honolulu, T. H.—Oral argument set for June 11, 1936.

WEAN—Ex. Rep. No. 1-205: The Shepard Broadcasting Service, Inc., Providence, R. I.—Oral argument set for June 11, 1936.

KVSO—Ex. Rep. No. 1-206: The Ardmoreite Pub. Co., Inc., Ardmore, Okla.—Oral argument set for June 4, 1936.
 WFBR—Ex. Rep. No. 1-209: The Baltimore Radio Show, Inc., Baltimore, Md.—Oral argument set for June 4, 1936.
 WOOD—Kunsky-Trendle Broadcasting Corp., Grand Rapids, Mich.—Oral argument set for June 4, 1936.
 WASH—Kunsky-Trendle Broadcasting Corp., Grand Rapids, Mich.—Oral argument set for June 4, 1936.

KFBB—Buttery Broadcast, Inc., Great Falls, Mont.—Denied motion asking Commission to dismiss and return to applicant the application of the Calif. Sales Contract Co., San Francisco, for authority to establish a new broadcasting station to operate on 1280 ke., 500 watts (1 KW LS).
 WAAW—Omaha Grain Exchange, Omaha, Neb.—Dismissed at request of applicant C. P. heretofore set for hearing requesting 660 ke., 5 KW, daytime.
 WORL—Broadcasting Service Organization, Inc., Needham, Mass.—Dismissed at request of applicant, modification of license heretofore set for hearing, for 920 ke., 1 KW, daytime.
 NEW—National Television Corp., New York City—Denied as in cases of default for failure to file an appearance and statement of facts to be proved in accordance with Rule 104.6 (c), application for C. P., 42000-56000 and 60000-85000 ke., 30 watts, unlimited time.

APPLICATIONS RECEIVED

First Zone

WCAO—Monumental Radio Co., Baltimore, Md.—Construction 600 permit to install a new auxiliary transmitter to be located 60 feet from present site at same address (811 West Lanvale Street) to use 250 watts power.
 WHDH—Matheson Radio Co., Inc., Boston, Mass.—License to use 830 old W. E. Type 106-B transmitter as an auxiliary transmitter using 500 watts power.
 WNAC—Shepard Broadcasting Service, Inc., Boston, Mass.—Construction 1230 permit to make changes in equipment and increase power from 1 KW, 2½ KW day, to 1 KW, 5 KW day.
 NEW—William F. Koller, Pittsfield, Mass.—Construction permit 1290 for a new station to be operated on 1290 ke., 250 watts, daytime.
 NEW—Black River Valley Broadcasts, Inc., Watertown, New York 1420 —Construction permit for a new station to be operated on 1420 ke., 100 watts, 250 watts day, unlimited time.
 NEW—World Broadcasting System, Inc., New York, N. Y.—Authority to transmit programs from the World Broadcasting System, Inc., to the Northern Electric Co., Ltd. (Canadian).

Second Zone

WFIL—WFIL Broadcasting Co., Philadelphia, Pa.—Construction 560 permit to install new equipment, erect a vertical antenna, increase power from 500 watts, 1 KW day to 1 KW and move transmitter from 801 Market St., Philadelphia, Pa., to 1300 feet northeast of Monument and City Line Ave., Merion Twp., Pennsylvania.
 NEW—Cadillac Broadcasting Co., a Michigan Corporation, Dearborn, Mich.—Construction permit for a new station to be operated on 1140 ke., 500 watts, daytime.
 WWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—1160 Construction permit to install a new transmitter, erect a vertical antenna and increase power from 5 KW to 25 KW, 10 KW day. Amended: Re-equipment.
 WRAK—WRAK, Incorporated, Williamsport, Pa.—Construction 1370 permit to make changes in equipment (antenna) and move transmitter from 244 West Fourth Street, Williamsport, Pa., to 1631 W. 3rd, Williamsport, Pa.
 WHIS—Daily Telegraph Printing Co., Bluefield, W. Va.—License 1410 to cover construction permit (B2-P-861) for new equipment and move of transmitter.
 WCKY—L. B. Wilson, Inc., Covington, Ky.—Construction permit 1490 to install new equipment and increase power from 5 KW to 50 KW day and night.
 WJBK—James F. Hopkins, Inc., Detroit, Mich.—Modification of 1500 construction permit to make changes in equipment, move transmitter from 12897 Woodward Avenue, Highland Park, Mich., to site to be determined, Detroit, Mich., install vertical antenna and extend commencement and completion dates.

Amended: To give transmitter site as Woodrow Wilson and Pilgrim Streets, Detroit, Mich., and omit request for extension of commencement and completion dates.

NEW—The Escanaba Daily Press Co., Escanaba, Mich.—Construction 1500 permit for a new station to be operated on 1500 ke., 100 watts, daytime.

Third Zone

WQAM—Miami Broadcasting Co., Miami, Fla.—License to cover 560 construction permit (B3-P-987) for new equipment.
 WQAM—Miami Broadcasting Co., Miami, Fla.—License to use old 560 W. E. D-87737 transmitter as an auxiliary transmitter.
 WPTF—WPTF Radio Co., Raleigh, N. C.—License to cover construction 680 permit (B3-P-863) to move auxiliary transmitter.
 WKY—WKY Radiophone Co., Oklahoma City, Okla.—Construction 900 permit to install new equipment, increase power from 1 KW to 5 KW, move transmitter from West 39th Street (highway 8 mi. w. of) Oklahoma City, Okla., to site to be determined, near Oklahoma City, Okla. Amended: Change power from 5 KW to 1 KW, 5 KW day, make changes in antenna and omit request for move to transmitter.
 WTJS—The Sun Publishing Co., Inc., Jackson, Tenn.—Construction 920 permit to install new equipment, increase power from 100 watts, 250 watts day to 250 watts, 500 watts day and change frequency from 1310 ke. to 920 ke. Amended: To move transmitter from Hall Street, Jackson, Tenn., to northwest of Jackson, Tenn.
 WIS—Station WIS, Inc., Columbia, S. C.—Modification of construction 1010 permit (3-P-B-3258) for changes in equipment, increase in power, change of frequency and move of transmitter, requesting extension of completion date from 5-10-36 to 7-10-36.
 WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Special 1180 experimental authorization to change hours of operation from limited to unlimited time and install directional antenna for the period to 8-1-36.
 NEW—Southern Broadcasting Corp., New Orleans, La.—Construction 1200 permit for a new station to be operated on 100 watts, share WJBW. Requests facilities of WBNO. The frequency 1200 ke. requested.
 NEW—Bayou Broadcasting Co., Houston, Texas—Construction 1210 permit for a new station to be operated on 1200 ke., 100 watts, unlimited time. Amended: To change frequency from 1200 ke. to 1210 ke.
 NEW—John S. Allen & G. W. Covington, Jr., Montgomery, Ala.—1210 Construction permit for a new station to be operated on 1210 ke., 100 watts, daytime. Amended: To change transmitter site from 1500 feet off Narrow Lane Road, 4 miles south of Montgomery, Ala., to 1000 feet off Narrow Lane Road, ¾ miles southeast of Montgomery business section.
 KUOA—KUOA, Inc., Fayetteville, Ark.—Construction permit to 1260 make changes in equipment, erect a new antenna, increase power from 1 KW to 2½ KW, move transmitter from Mount Sequoyah, Fayetteville, Ark., to John Brown University, Siloam Springs, Ark., and studio from Washington Hotel, 101 West Mountain Street, Fayetteville, Ark., to John Brown University, Siloam Springs, Ark.
 WAML—New Laurel Radio Station, Inc., Laurel, Miss.—Application 1310 for license filed by New Laurel Radio Station, Inc., for authority to operate Radio Station WAML.
 WMBR—Florida Broadcasting Co., Jacksonville, Fla.—License to 1370 cover construction permit (B3-P-958) to make changes in equipment.
 WACO—Central Texas Broadcasting Co., Inc., Waco, Texas—1420 Voluntary assignment of license from Central Texas Broadcasting Co., Inc., to KTSA Broadcasting Co.
 KOMA—National Radio Manufacturing Co., Oklahoma City, Okla. 1480 —Voluntary assignment of license from the National Radio Manufacturing Co. to Hearst Radio, Inc.

Fourth Zone

KSD—Pulitzer Publishing Co., St. Louis, Mo.—Modification of 550 license to change hours of operation from share KFUD to unlimited time. Amended: To request facilities of KFUD.
 NEW—Thomas L. Evans and J. L. Milligan, Jefferson City, Mo.—920 Construction permit for a new station to be operated on 920 ke., 500 watts, daytime.
 WSBT—The South Bend Tribune, South Bend, Ind.—Construction 1010 permit to make changes in equipment, install directional antenna, change frequency from 1360 ke. to 1010 ke., increase

power from 500 watts to 1 KW, change hours of operation from share WGES to unlimited time and move transmitter from 4½ miles west on U. S. 2, South Bend, Ind., to site to be determined, South Bend, Ind. Amended: For approval of transmitter site at about 4 miles southeast of center of South Bend on south side of Jackson Rd. ¼ mile east of Miami Highway, South Bend, Ind. To use directional antenna at night.

WCLO—Gazette Printing Co., Janesville, Wis.—Construction permit to move transmitter from Milwaukee Road, near Janesville, Wis., to Janesville, Wis. Amended: To give transmitter site as 1436 S. Oakhill Ave., Janesville, Wis., and to request changes in antenna.

KSCJ—Perkins Brothers Co., Sioux City Journal, Sioux City, Iowa
1330 —Modification of construction permit (B4-P-619) to make changes in equipment, change transmitter site from Sioux City, Iowa, to McLaughlin Farm, southeast quarter of northeast quarter-section 1, Sioux City, Iowa, extend commencement date to 15 days after grant and completion date to 90 days thereafter.

WKBI—WKBI, Incorporated, Cicero, Ill.—Modification of license
1420 to change specified hours as specified on license, from Central Standard Time to Eastern Standard Time.

WHFC—WHFC, Inc., Cicero, Ill.—Modification of license to
1420 change specified hours as specified on license, from Central Standard Time to Eastern Standard Time.

WEHS—WEHS, Incorporated, Cicero, Ill.—Modification of license
1420 to change specified hours as specified on license from Central Standard Time to Eastern Standard Time.

NEW—KMJB Broadcasting Co., by Myron J. Bennett, Pres.,
1450 Minot, N. D.—Construction permit for a new station to be operated on 1300 kc., 1 KW, unlimited time. Requests facilities of KLPM. Amended: To change frequency from 1300 kc. to 1450 kc.

Fifth Zone

KFXM—J. C. and E. W. Lee (Lee Bros. Broadcasting Co.), San
1210 Bernardino, Calif.—Authority to install automatic frequency control.

NEW—Ed Klies, Helena, Mont.—Construction permit for a new
1210 station to be operated on 1210 kc., 100 watts, 250 watts day, unlimited time. Amended: To make changes in equipment.

KEUB—Eastern Utah Broadcasting Co. (Sam G. Weiss), Price,
1420 Utah—Authority to install automatic frequency control.

KEUB—Eastern Utah Broadcasting Co. (Sam G. Weiss), Price,
1420 Utah—Modification of construction permit (B5-P-648) for a new station, requesting changes in equipment and approval of transmitter and studio sites as 2.4 miles northwest Price on Highway 50, Price, Utah.

NEW—Harold M. Finlay and Mrs. Eloise Finlay, La Grande,
1500 Oreg.—Construction permit for a new station to be operated on 1500 kc., 100 watts, daytime.

PRALL ADDRESSES WOMEN'S RADIO COMMITTEE

Anning S. Prall, chairman of the Federal Communications Commission, on Wednesday addressed the Women's National Radio Committee at the Astor Hotel, New York City, in connection with the presentation of awards. Mr. Prall said:

"It is a privilege and a pleasure I assure you to compliment the Women's National Radio Committee for its devotion to a cause in which both the listening public and the broadcasting industry are vitally concerned.

"It is quite unnecessary to add that in its determination to improve the standards of radio programs the Women's Committee will always have the unqualified support of the Federal Communications Commission, of which I have the honor of serving as its Chairman.

"I had intended to devote full fifteen minutes this afternoon to the subject of the Freedom of Speech because frankness compels the admission that the political and economic crisis which has become world-wide in its effects has seriously undermined confidence in some of our cherished beliefs. I cannot do so because my time has been cut from fifteen minutes to eight. However, the objective of the Women's Committee and our Commission with respect to clearing the air of undesirable programs is closely related and the question

of free speech is so involved by legal restrictions that the elimination of obnoxious programs may depend entirely on the voluntary cooperation of the broadcasters. The Fourteenth Amendment to the Constitution guarantees the freedom of speech and the provisions of the Communications Act regarding censorship are very clear and definite. What is the justification for the feeling of political insecurity that fills the hearts of men? Who could have predicted that in the decades following a war intended to make the world safe for democracy the specter of dictatorships would become a reality? Who could have foretold that instead of the democratic form of government finding wider acceptance among the peoples of Europe we would see Lenin installed in Moscow, Hitler in Berlin, and Mussolini in Rome? Have the nations for all time rejected the ideal of democracy and with it all, the absolute repudiation of free speech? Apparently the peoples of other lands are willing to sacrifice much for economic and political security. For the moment at least fundamental liberties have been foresworn in an attempt to concentrate power in one or a few rather than in the many in order to insure the equivalent values of what our forefathers called 'life, liberty and the pursuit of happiness.' Freedom of speech, the laissez-faire policy in business and social life, the right of assembly, liberty of the press and radio, have been willingly sacrificed under the present European dictatorships.

"Fortunately, the English-speaking peoples, particularly in England and the United States, despite the perils of war and the economic disaster that followed, have not been willing to sacrifice such fundamental liberties, the attainment of which required centuries of effort and sacrifice.

"The battle for a free press and free speech was not won in a day or even in a century. The Supreme Court of the United States in the decision involving the 'Louisiana Newspaper Tax' case pointed out that it was a 'tax on knowledge' and a substitute for the older forms of direct censorship. It was a device in the form of a tax to limit the circulation of information to which the public is entitled.

"Can the lesser degree of freedom attach to the most recent medium of communication—the radio—an instrumentality as potent, or more so, for good or evil as the printing press itself?

"In the twinkling of an eye, this marvelous invention carries news items as well as recreational features, such as the drama and music, to remote areas of our land not served by the daily press, and its programs are heard by millions who have neither the desire, the time nor the facilities to read the daily paper.

"A message of plans proposed or work done spoken at the fire-side of the White House is heard at millions of hearthstones throughout the land. Issues of all kinds relating to the functions of government, such as the Constitution, finance, tariff, neutrality and various types of relief are presented to our countrymen by speakers of every type of status, race, political and religious belief in messages ranging from passionate praise to withering censure.

"It is inconceivable that, as in the dictator-ridden countries of Europe, or even in England where the radio is under state control, there could be imposed by the Communications Commission regulations that would mean a denial of the same degree of free speech over the radio as is enjoyed by the press of our country.

"But while that liberty should be granted and maintained, a degree of reasonable restriction should be preserved, namely, the protection of the government and its processes, including judicial action from violent disruption, and unlawfully created disrespect; the protection of individuals in good name and business reputation; and the protection of the morals of the public and of its right not to be defrauded or deceived.

"One might discuss at some length certain questions of discretion and propriety over and beyond the legal ones already implied. When this marvelous mechanism is used in violation of good taste as involved in either what is broadcast or the method employed, the problem becomes not one of further legal restriction but the de-

velopment of intelligence and taste both in the sponsors of a given program and the listening audience to which the appeal is made. It is a truism that you can legislate neither morals nor esthetic appreciation.

"In the conduct of the press and the radio our fundamental obligation is to respect freedom of speech. The search for truth shall keep us free.

"The freedom of the press within the legal limitations to which I have referred, which conditions bespeak the wisdom of experience, is a precious inheritance. That freedom must be extended to the radio. To the defense of that freedom of the press and the radio, we pledge as did our forefathers, our lives and our sacred honor."

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2763. Kroekel-Oetinger, Inc., Philadelphia candy manufacturer, has been charged with unfair competition in selling to the trade candy so packed and assembled as to involve lottery when distributed to the consumer.

A candy assortment sold by this manufacturer to wholesalers, jobbers and retailers is said to have been made up of candies of uniform size together with certain larger pieces to be given as prizes to certain purchasers of the uniform sizes.

The complaint alleges that sale of candy to the purchasing public in this manner is a practice deemed contrary to public policy by the common law and criminal statutes. Specifically, violation of Section 5 of the Federal Trade Commission Act is charged.

No. 2765. Charging unfair competition and restraint of trade in the jobbing of automobile parts and accessories, a complaint has been issued against the **Motor and Equipment Wholesale Association**, with headquarters in **Chicago**, whose membership is said to represent a substantial volume of this class of jobbing business in the United States, occupying a dominant position in the parts and accessories trade.

Those named as respondents include the association, its officers and directors; the Automotive Trades Association of Greater Kansas City, Mo., a member; Mississippi Valley Automotive Jobbers Association (Iowa); Southwestern Automotive Wholesalers Association, Southwestern Jobbers Association, and 42 member companies in various cities.

The complaint charges the respondents with entering into agreements, combinations and conspiracies among themselves for elimination of price competition among jobbers, preventing the creation of new competition, and controlling parts and accessories prices. This program, according to the complaint, was accomplished through agreement and concerted action in (1) use of uniform and substantially identical resale prices fixed by manufacturers; (2) threats of boycott and actual boycott against manufacturers not complying with the program; (3) monopoly in the distribution of replacement parts, accessories and shop equipment through "legitimate jobbers"; (4) strict enforcement of rules for jobbers recognized as "legitimate"; and (5) establishment of "jobbing points," "ethical merchandising," or "clean merchandising" policies for promotion of the respondents' program, and holding local and regional group meetings at national shows and elsewhere, of which only meager and incomplete records have been kept so as to avoid providing evidence of agreements and to minimize detection.

No. 2766. Allegedly representing himself as a chemist in order to promote the sale of formulas and specifications for the manufacture of a wide variety of products, L. W. Gibson, 4700 North Racine Ave., Chicago, is named respondent in a complaint charging unfair methods of competition.

Gibson sells formulas for cosmetics, tooth paste, hair tonics, polishing compounds, soap, food products, adhesives, rat exterminators and other commodities, and, the complaint alleges, certain assertions he makes in advertisements, catalogues and other printed matter regarding his business are in violation of Section 5 of the Federal Trade Commission Act.

Among the respondent's alleged misrepresentations are assertions that he was educated in the science of chemistry, has had long experience in the commercial application of such science, and has spent large sums of money and devoted years to perfecting prac-

tical working formulas and processes for the manufacture of various products. The complaint also charges the respondent represents that in his establishment are laboratories equipped with modern apparatus, and that associated with him are graduates of leading American colleges whom he employs because of their sound knowledge of chemistry, their experience in the formation of money-making formulas, their success as manufacturers, and their ability to teach other manufacturers every phase of profitable production.

No. 2768. False representations in the sale of men's clothing are alleged in a complaint against **Jonas Schainuek & Son, Inc.**, with headquarters at 757 Broadway, **New York City**, from where it operates a chain of retail stores in **New York**, **Washington, D. C.**, and **Pittston**, **Wilkes-Barre**, **Scranton**, **Allentown**, **Harrisburg**, and **Hazleton**, **Pennsylvania**, and in other cities.

The complaint charges that the respondent company makes assertions in radio broadcasts that its "Factory-to-You Policy Saves You Money," and that labels attached to garments sold by the respondent bear such statements as "Maker to Wearer."

According to the complaint, the respondent company does not own or operate a factory where its products are manufactured, and the representations that it does tend to cause purchasers of such products to believe they obtain closer prices and superior quality in dealing direct with a manufacturer rather than with a retailer or middleman.

In newspapers, over radio and in other ways, the respondent corporation is said to advertise that it sells "Two Garments for One Low Price," when, according to the complaint, it does not sell two suits, two overcoats, or one suit and one overcoat for the price of one garment, nor does the purchaser save the cost of an additional garment through the medium of the respondent's sales plan, but pays the usual and ordinary retail price of two garments, or approximately so.

The respondent's practices, the complaint avers, violate Section 5 of the Federal Trade Commission Act, and not only deceive purchasers but tend to divert trade to the respondent from competitors who do not misrepresent their products.

No. 2769. Combination and conspiracy to suppress competition and create a monopoly in the ladies' garment and dress goods trade in the United States is alleged in a complaint issued against five associations whose membership represents a large portion of the national volume of business in these commodities. The complaint charges violation of the Federal Trade Commission Act.

Principal respondents named are the **Fashion Originators Guild of America, Inc.**, with headquarters at 512 7th Ave., **New York City**; **Michigan Avenue Guild of Chicago**; **Minneapolis Fashion Guild**; **Ladies' Ready-to-Wear Guild of Baltimore**; **National Federation of Textiles, Inc.**, 10 East 40th St., **New York City**; and the respective officers, directors and members of each organization.

Included as respondents are members of the three main divisions of the Fashion Originators Guild of America, Inc., namely the ladies' garment manufacturers, the textile merchants, and the affiliated members, which group consists of certain retail dealers in ladies' garments and accessories in various cities.

Principal charges of the complaint have to do with alleged efforts of the Fashion Originators Guild of America, Inc. (F. O. G. A.), and its associated respondents, to maintain its style protective program. According to the complaint, the Guild was organized ostensibly to establish fair trade practices among its members, and to promote a program to protect originators of fashions and styles against copying and piracy. This program is said to extend to textile merchants, retail dealers and non-member garment manufacturers who cooperate in the style protective program.

No. 2770. Disparagement of competitors' products on the part of the Coolerator Company, Duluth, Minn., is alleged as an unfair method of competition in a complaint issued against that company.

The respondent company, a distributor of non-mechanical refrigerators using natural or artificial ice, is alleged to have made representations having a tendency to deceive buyers into the false belief that electric refrigerators are undesirable, ineffective and harmful.

According to the complaint, the respondent distributed a booklet called "Why Ice Is Best for Refrigeration," in which it was suggested that various gases used in electric refrigerators escape from the coils, permeate the food chamber and have a deleterious effect on foods; that foods kept in electric refrigerators dehydrate to such an extent that the nutritive properties are impaired, and other similar assertions.

Stipulations

The Commission has issued the following cease and desist orders and stipulations:

No. 1642. Barnum Laboratories, Inc., 2616 Independence Ave., Kansas City, Mo., engaged in the compounding and selling of cosmetics and toilet preparations, under the trade name of Barnum's Special Formula Laboratory, Inc., agrees to cease representing in advertising that its products are made by or under the personal supervision of Dr. Barnum, or that he renders any service to customers, when such is not the fact; that its products are a food for and penetrate the skin, possessing properties that will prevent or cure wrinkles and double chins, or that any of such products promote the growth of eyebrows and eyelashes. The respondent company also stipulates it will not use such expressions as "Only U. S. Government Standard Products Used," or any similar expression tending to mislead purchasers into the belief that, because the ingredients of which such products are made may conform to the requirements of the United States Pharmacopœia, these products are made under the supervision of the United States Government or have its endorsement.

No. 1643. Leon Seelig, 3225 Harrison St., Kansas City, Mo., trading as Peck Products, and engaged in the mail order business of selling a certain preparation commonly known as an emmenagogue, agrees to discontinue representing in advertising matter that such product is safe or harmless for self-administration.

No. 1645. James Lees & Sons Co., Bridgeport, Pa., agrees that in the sale of its yarns and threads it will discontinue use of the word "Rayona," or any other similar word, as a trade name for its products, or in any other way which may cause purchasers to believe that the respondent's products are made from that material known to the trade and public as rayon, when such as not the fact.

No. 1647. George A. White, 645 Merion Ave., Penfield, Pa., trading as the Church Mart, will cease representing in advertising matter, or in any other way, that his preparation, "Check-It," will prevent runs, breaks or snags in silk, chiffon or rayon hosiery, dresses and lingerie, or that use of such product makes fabrics treated with it proof against all spot-producing materials, or makes all colors fast.

No. 1651. Walter L. Gerke, 107 Pike St., Seattle, Wash., trading as Gerke Mineral Co., signed a stipulation to cease and desist from circulating, in connection with the sale of his mineral water product, advertisements consisting of alleged letters from users of such product, which letters contain representations that the writers thereof have been healed or cured of any serious or chronic ailment through the use of the respondent's mineral water, and from circulating advertising matter containing representations which claim for the mineral water medicinal properties or therapeutic values greater than those it actually possesses.

No. 1653. Chicago Mail Order Co., 511 South Paulina St., Chicago, dealing in rubber toilet products, will discontinue use of the words "Spiral Spray" in advertising matter to designate syringes of a type other than those commonly understood to be a "spiral spray" syringe, and will cease using such words in any way which may tend to deceive purchasers as to the type of the products so advertised.

No. 2368. Victor Soap Co., Concord and Scoville Avenues, Dayton, Ohio, trading as Royal Soap Co., and as Heick Soap Co., has been ordered to discontinue unfair methods of competition, including the misrepresentation of the incomes salesmen may earn in selling the respondent's products.

Specifically, the respondent is prohibited from representing that it guarantees the financial success of its agents, that Victor agents are "cleaning up" in opening soap shops, or that they are easily earning incomes in excess of the average income made by the average agent employed by the respondent.

No. 2738. Atlas China Co., Inc., 710 Wythe Ave., Brooklyn, N. Y., has been ordered to cease and desist branding chinaware products as "Limoges," or representing as Limoges certain porcelain or chinaware products which have not originated or been made in Limoges, France.

Findings are that for 150 years a vitreous, translucent and glazed ware has been made in Limoges, France, and has acquired a favorable reputation in Europe and America as a porcelain or china of superior quality, utility and beauty. The respondent's representations are held to have a tendency to deceive buyers into believing that its products were made in Limoges.

The order also directs the respondent to stop branding its articles with the words "French Decoration," or in any way representing

them as being decorated with French designs peculiar to France or to French artistry, when this is not the fact.

FEDERAL COMMUNICATIONS COMMISSION ACTION

There was no meeting of the Broadcast Division of the Commission early this week. The meeting was deferred because its members were attending hearings in connection with the Commission's telephone investigation. The meeting will be held later this week.

WKBB—Sanders Brothers Radio Station, East Dubuque, Ill.—Construction permit to install a new transmitter.

NEW—Central States Broadcasting Co., Portable.—Construction permit for a new broadcast pickup station to be operated on 1606, 2020, 2102, 2760 kc., 30 watts.

Fifth Zone

NEW—The Hebrew Evangelization Society, Inc., Los Angeles, Calif.—Construction permit for a new station to be operated on 570 kc., 1 KW, unlimited time.

NEW—Thomas M. Hammond, d/b as Ventura Broadcasting Co., Ventura, Calif.—Construction permit for a new station to be operated on 1210 kc., 100 watts, daytime.

KVOA—Arizona Broadcasting Co., Inc., Tucson, Ariz.—Construction permit to make changes in equipment.

NEW—Mile High Radio Corp., Denver, Colo.—Construction permit for a new station to be operated on 1420 kc., 100 watts, unlimited time.

W6XKG—Ben S. McGlashan, Los Angeles, Calif.—Construction permit for increase in power of general experimental station from 100 watts to 1000 watts.

KABB—Don Lee Broadcasting System, Portable-Mobile, San Francisco, Calif.—License to cover construction permit for a new broadcast pickup station to be operated on 1646, 2090, 2190, 2830 kc., 100 watts.

**KGIR FILES ANSWER IN COPYRIGHT
INFRINGEMENT SUIT**

UNITED STATES DISTRICT COURT

DISTRICT OF MONTANA

REMICK MUSIC CORPORATION, Complainant

—against—

K. G. I. R., Inc., Defendant

The defendant, answering the bill of complaint herein:

(1) Denies each and every allegation contained in Paragraphs I, X, XII, XIII, XIV, XV and XVI.

(2) Denies that it has any knowledge or information sufficient to form a belief as to the truth or falsity of the allegations contained in paragraphs II, IIa, IV, VI, VII, VIII, VIIIa, IX, and XI, and therefore denies the same.

(3) Upon information and belief, defendant admits that Stanley Murphy, also known as S. Murphy, and Percy Wenrich, also known as P. Wenrich, prior to the 5th day of November, 1909, wrote and composed the words and music of a musical composition, entitled, "Put On Your Old Grey Bonnet," but defendant is without knowledge as to any of the other allegations contained in paragraph V.

FURTHER ANSWERING AND AS A FIRST AFFIRMATIVE DEFENSE, DEFENDANT SAYS:

I. Upon information and belief, that on or about the 13th day of February 1914, there was organized under the laws of the State of New York, for the term of ninety-nine years, an unincorporated voluntary association of seven or more persons, composed of composers, authors and publishers of musical works known and designated as the American Society of Composers, Authors and Publishers (hereinafter, for brevity, referred to as "ASCAP"), for the purpose of granting licenses to users of musical works, in public entertainment, to give public performances for profit of the works in the repertory of said "ASCAP" (hereinafter referred to as the small performing rights), and to collect from such users royalties for the right to give such public performances, and to allow and distribute among the members of ASCAP the revenue so collected from such users, and that ASCAP, was, is, and at all times has been, duly empowered by all of its members in its and their behalf to license the small rights of all musical compositions at any time written, composed, published or copyrighted by members of ASCAP.

II. Upon information and belief, that the complainant, or its predecessors in interest, were at all times from on or about the 6th day of March, 1914, to at least the 31st day of December, 1935, duly elected members of said ASCAP, and that the complainant has been such member of ASCAP since the year of 1914, and that the complainant, and its predecessors, agreed duly to perform and abide by the articles of association and all by-laws, rules, regulations and resolutions of ASCAP, and of its Board of Directors, which might be in force at the time of their applications to membership, or might thereafter from time to time be adopted. That Percy Wenrich, also known as P. Wenrich, and Stanley Murphy, also known as S. Murphy, the composers and authors of the music and words of the composition "Put On Your Old Grey Bonnet," and the said Percy Wenrich, also known as P. Wenrich, and Stanley Murphy, also known as S. Murphy, are at the present time, at this date, and were at all times hereinbefore mentioned, duly elected members of ASCAP, and that the estate and heirs of Stanley Murphy, as well as Stanley Murphy in his lifetime, and the said Percy Wenrich, agreed in writing to duly perform and abide by the articles of association and all of the by-laws, rules, regulations and resolutions of ASCAP, and of its Board of Directors, which might be in force at the time of its application to membership, or might thereafter from time to time be adopted.

III. Upon information and belief, that under the articles of association of ASCAP, and by virtue of the aforesaid membership agreements of the complainant and of Percy Wenrich and Stanley Murphy in ASCAP, the exclusive right to grant licenses to others in respect of the small rights of "Put On Your Old Grey Bonnet," together with the entire copyright, were vested in ASCAP, in that the by-laws of said association provided, among other things, that each member, including the complainant herein, should execute to ASCAP documents and agreements constituting exclusive assignments to said ASCAP of all the copyrighted music owned by said members, or that which they should thereafter acquire dur-

ing their membership; that each of the aforesaid parties, complainant, Stanley Murphy and Percy Wenrich, executed certain documents in writing to ASCAP, particularly providing:

- A. An Assignment to the Society of the entire and exclusive right of public performance of all copyrighted compositions owned or controlled by such members.
- B. That each member shall thereafter assign from time to time such entire and exclusive right to all the copyrighted compositions or original compositions which he may in the future compose or the rights to which he may in the future acquire.
- C. That he shall not grant any individual licenses and that he will join with the Society in all suits for infringements of the exclusive right of public performance granted to the Society.
- D. Assigns to the Society the exclusive right to fix or determine the terms or conditions of any license or licenses covering any of the compositions assigned to the Society.

That the aforesaid documents and assignments have never been revoked or reassigned from said ASCAP and the title to said copyrighted musical composition "Put On Your Old Grey Bonnet" is no longer vested in complainant or its assigns, but on the contrary, both grand and small rights are now vested in ASCAP and its assignees and successors, if any, as herein set forth.

IV. Upon information and belief, that ASCAP, since 1914, has licensed users of musical compositions in respect of the small rights of musical works written and composed by its writer and composer members, and published by its publisher members, including since the date of its composition, "Put On Your Old Grey Bonnet," written and composed by the aforementioned Wenrich and Murphy, and published by the Complainant; that for such small rights, ASCAP has collected, under license agreements, from time to time made with users of the aforesaid musical compositions, royalties which it has supposedly divided among its members in the ratio of one-half thereof to the writer and composer members, and one-half thereof to the publisher members; that under such license agreements, the users of musical compositions have been licensed in respect of the small rights of each and every musical composition which has either been written and composed by a writer and composer member of ASCAP, of which has been published by a publisher member of ASCAP, and all such works are referred to hereinafter as being within the repertory of ASCAP, or its successors and assigns.

V. Upon information and belief, that in the year 1921, the conditions then prevailing in said ASCAP were such that it was deemed for the advancement and protection and mutual interest of the members thereof, and to their benefit, that each member should execute an assignment as set forth in paragraph 6 herein, of the rights in his works then existing or which might thereafter be written, composed or acquired by such member, that thereafter, complainant and said Wenrich and Murphy agreed between and with each other and with ASCAP (of which they were members), each in consideration of the agreement made by the other, that the small and entire rights of all the musical works then published by complainant and written or composed by said Wenrich and Murphy, or which thereafter, and for a period of five years, should be written, composed, or acquired by them, or any of them, should be deemed to be and was vested in ASCAP, and that said Wenrich and Murphy and the complainant should be and were thereafter deemed by reason of their membership in ASCAP and the agreements as aforesaid, to be owners in common of the small and entire rights of all musical works theretofore or thereafter composed by said Wenrich and Murphy and published by complainant; that this complainant permitted, approved and ratified the election to membership in ASCAP of the said Wenrich and Murphy and their right to participate to the extent of one-half of the revenue derived from the licensing of the small and entire rights of such musical compositions; and in all manners and respects, the complainant recognized the ownership in common of said Wenrich and Murphy in and to a one-half undivided interest in the small and entire rights of such musical compositions including "Put On Your Old Grey Bonnet."

VI. On information and belief, this complainant permitted ASCAP to represent and hold out that the said Wenrich and Murphy were owners in common with the complainant of the small and entire rights of the musical compositions written and composed by the said composers, including "Put On Your Old Grey Bonnet," and this complainant permitted the said ASCAP, during said period, to represent that it had the right to make licenses for the small and entire rights of such musical compositions, including "Put On Your Old Grey Bonnet," and said

ASCAP, in reliance upon the permission, acquiescence and ratification of this complainant, did enter into various agreements with users of music for the purpose of granting them license for the small rights of the works in the repertory of ASCAP, including the composition, "Put On Your Old Grey Bonnet," and including license agreements for broadcasting over and by means of radio broadcasting station KGIR, as hereinafter set forth.

VII. That ASCAP, under various agreements made and renewed from time to time, and now in force with defendant, and in full force and effect prior to January 11th, 1936, licensed the use of the small rights of and in the works in its repertory by broadcasting from, over and by means of the facilities of radio broadcasting station KGIR, and the National Broadcasting Company, of which defendant is an affiliated station, and that such license included the right to broadcast each such work, in its repertory, including the composition "Put On Your Old Grey Bonnet," for which license substantial royalties have been paid to ASCAP. That there is now outstanding and in force a valid license agreement, under which the small rights of the works in ASCAP's repertory, including the composition "Put On Your Old Grey Bonnet" may be put to commercial use for broadcasting purposes by radio broadcasting station KGIR, and that such license and right existed on the 11th day of January, 1936.

VIII. That the execution of the aforesaid license agreements and the making of the payments required thereunder was all done in good faith and in full reliance upon the representations made by ASCAP and this complainant and in reliance upon the acts and conduct of this complainant in having acquiesced in, ratified and approved of, at all the times hereinabove mentioned, the ownership by ASCAP of such rights derived from the author and composer members of said ASCAP in the manner aforementioned, upon information and belief that at all the times hereinbefore mentioned, and up to the 5th day of December, 1935, this complainant had representation upon the board of directors of said ASCAP, and this complainant was cognizant of the representations made by ASCAP to all users of music, respecting the ownership of the small and entire rights in complainant and the respective authors and composers of the compositions published by the complainant, and this complainant with full knowledge of such representations, and in furtherance of the same, and for the purpose of causing broadcasters to enter into license agreements in reliance upon such representations, aided, assisted and collaborated in the execution of license agreements, from time to time, between the said ASCAP and broadcasters, including the agreements hereinbefore set forth, and ratified the same and accepted benefits thereunder; and by reason of the premises, complainant is now estopped from asserting that any performance by this defendant, publicly, for profit of the composition, "Put On Your Old Grey Bonnet," was without a license from this complainant, and complainant's claim in such respect is made in bad faith and bad conscience and is inequitable.

IX. Upon information and belief, that when said Murphy and Wenrich became members of ASCAP, they were given standing and classification in ASCAP by reason of their creation and composition of a number of musical compositions; that complainant, at said time, had knowledge of the said applications made by the said Murphy and Wenrich and acquiesced therein, and in all manner consented and agreed that ASCAP should then acquire, exclusively, the small and entire rights in and to the said compositions, including "Put On Your Old Grey Bonnet."

X. Upon information and belief, that thereafter, said Wenrich and Murphy executed various agreements with the said ASCAP, under which they assigned and continued to assign to ASCAP, the small and entire rights in the compositions written by them, including the composition "Put On Your Old Grey Bonnet," that the said Wenrich and Murphy executed such contracts with ASCAP in the year of 1931, and re-executed such contracts at the end of the year of 1935, for a term of five years from January 1, 1936; that in and by the aforesaid contracts, the said Murphy and Wenrich vested exclusively and irrevocably in said ASCAP the small and entire rights in all musical works theretofore written and composed by them, including the composition "Put On Your Old Grey Bonnet," and the sole and exclusive rights to license for public performance for profit such compositions, including "Put On Your Old Grey Bonnet," presently vested in, and on and many years prior to the first day of January, 1936, vested in said ASCAP.

XI. Upon information and belief, that for many years, said Murphy and Wenrich have participated in the royalties derived by the said ASCAP from licenses to publicly perform for profit and compositions written and composed by them, including the composi-

tion, "Put On Your Old Grey Bonnet," with the knowledge, consent, approval and ratification of complainant.

XII. Upon information and belief, that in and about the year 1929, Warner Brothers Pictures, Inc., then and still engaged in the business of producing and distributing motion pictures, through the medium of a corporation known as the Music Publishers Holding Corporation, purchased the controlling interest in the issued and outstanding capital stock of the complainant and a number of other music publishers, members of ASCAP; which the complainant, as well as the other music publishers, members of ASCAP, which have been owned and controlled by Warner Brothers Pictures, Inc., and the Music Publishers Holding Corporation, as aforesaid, since the year 1929, have since said time, been represented on the board of directors of ASCAP and have had full knowledge of and acquiesced in and ratified each and every contract made between ASCAP and said complainant, Murphy and Wenrich as referred to in paragraph 6 herein, as well as other contracts made between ASCAP and users of musical works, including all of the contracts licensing the performance of such works, by, over, and by means of the facilities of broadcasting station KGIR; and the license now in force and effect, under which such rights to exercise, use and enjoy the small rights in and to the works in the repertory of ASCAP for broadcasting purpose by KGIR was made with knowledge, acquiescence, and consent, agreement, ratification and approval of this complainant and the other music publishers, members of ASCAP owned and controlled by Warner Brothers Pictures, Inc., and the Music Publishers Holding Corporation.

FURTHER ANSWERING AND AS A SECOND AFFIRMATIVE DEFENSE, DEFENDANT SAYS:

I. That defendant KGIR is affiliated with the National Broadcasting Company as an outlet station, although defendant is independently owned and operated; that the business and practice of radio is such that by reason of defendant's affiliation with a national network, the defendant must receive programs from said networks, and the defendant has no choice in the selection of the musical compositions carried by the said National Broadcasting Company for rendition or performance; that the performance of a musical score by the National Broadcasting Company is the same identical performance as given by defendant; that while a rendition might originate in Chicago in a studio, the performance in Butte, Montana, is the same identical performance as that given in Chicago, with the same performers rendering the same composition; that the performance complained of, if it occurred, originated in Chicago and a single performance was then given in Chicago and carried by wire to Butte, Montana, and rendered simultaneously with that same performance in Chicago; that on information and belief, the National Broadcasting Company was licensed by complainant and its agents for a valuable consideration for a term of five years beginning on June 5th, 1935, and ending during the year 1940, by which license complainant gave the National Broadcasting Company the right to use commercially the works and compositions in its musical repertory, including the musical composition "Put On Your Old Grey Bonnet," that said license is now in effect, is in full force and operation and was subsisting on January 11th, 1936; that it is inequitable and unjust that the complainant be permitted to restrict the use of or to secure a second payment from defendant for the use of said composition "Put On Your Old Grey Bonnet" when the performance complained of originated, if performed at all, in Chicago, Illinois, and the right to use and the right to perform said composition had been paid for by said license agreement existing between the National Broadcasting Company and complainant; that defendant received said performance from the National Broadcasting Company and that such performance was a single performance and the complainant having been paid for the use of said composition in Chicago is estopped from restricting the same "use" of said composition, merely because the same performance was carried over defendant's facilities to a larger audience; that the same performer who rendered the performance in Chicago under a license to use the same from complainant, rendered only one single performance for profit in both Chicago and Butte, Montana; that the use of such music on said performance having been paid for, the complainant and its agents are estopped from restricting, collecting or receiving payment twice for the same use of said composition.

FURTHER ANSWERING, AND AS A THIRD AFFIRMATIVE DEFENSE, DEFENDANT SAYS:

I. That the title to said musical composition "Put On Your Old Grey Bonnet" is no longer in complainant, and the complainant is no longer the owner or proprietor thereof, by reason of exclusive

and irrevocable assignments made by complainant to ASCAP; that the title of the said musical composition "Put On Your Old Grey Bonnet" has been further clouded by the appointment of a receiver for ASCAP in the State of Washington, whose title to said composition relates back to the 24th day of June, 1935, when said complainant was a duly elected and participating member of said ASCAP; that the State of Washington in its sovereign capacity proceeded by injunction proceedings against said ASCAP and all of its members in an action in personam in said state in the Superior Court of the State of Washington for Thurston County, for the purpose of enforcing its criminal laws against price fixing, extortion, conspiracy, and monopoly; that personal service was obtained upon said ASCAP and its members pursuant to the laws of Washington, and that under the Code Civil Procedure No. 1919 of the laws of New York, under which said ASCAP and its members including the complainant were organized, such action brought the entire membership of ASCAP before the Superior Court of the State of Washington for Thurston County, of said state, including this complainant; that the Superior Court, as aforesaid, in construing the contracts and assignments between complainant and ASCAP, and the contracts and assignments between complainant and ASCAP, and the contracts and membership agreements between complainant and ASCAP, and the contracts and membership agreements in said Society entered its written judgment to the effect that each member, including the complainant, the said Percy Wenrich and Stanley Murphy, upon being admitted to membership in said ASCAP, were obliged to and did execute identical contracts to said ASCAP and that these contracts constituted exclusive and irrevocable assignments to said ASCAP of all of the copyrighted music owned by said members, or that which they should thereafter acquire during their membership; that the said judgment in said cause, entitled State of Washington vs. ASCAP, et al., and each and every member thereof, in Cause No. 16114, Superior Court of the State of Washington for Thurston County, recited that under the law and by virtue of these irrevocable assignments to ASCAP the said title to the copyrights of the members of the said ASCAP, including the composition "Put On Your Old Grey Bonnet," was vested in the Society, and that the receiver, Tracy Griffin, who was thereafter appointed by operation of law, came into legal possession and proprietorship of said copyrighted musical compositions, including "Put On Your Old Grey Bonnet"; that this judgment was entered on the 7th day of August, 1935, and a receiver for ASCAP and the joint property of its members including complainant was appointed on the 13th day of August, 1935, that no appeal was ever taken from this judgment of a Court of Competent Jurisdiction, and the receiver, as aforesaid, has assumed legal control and the proprietorship of all the joint property, the copyrights, the performing rights, and the tangible and intangible property of ASCAP and its members, including the title to the musical composition "Put On Your Old Grey Bonnet," that the terms of said judgment vesting the title to the musical composition "Put On Your Old Grey Bonnet," as well as to the other works of complainant and said ASCAP into the receiver, Tracy Griffin, will appear more fully and at large in the copy thereof, which will be produced as may be required; that the title to said copyrighted musical composition "Put On Your Old Grey Bonnet" is manifestly clouded and there is not sufficient title, proprietorship, or ownership in the complainant to justify the intervention of this court, sitting as a court of equity, nor is there sufficient grounds for this court to construe a right which does not arise under the copyright laws of the United States of America or any act of Congress in relation thereto.

FURTHER ANSWERING, AND AS A *FOURTH* AFFIRMATIVE DEFENSE, DEFENDANT SAYS:

I. That the said complainant, being a member of said ASCAP on the 24th day of June, 1935, was convicted in the State of

Washington, in said cause as alleged hereinbefore, of extortion, conspiracy, and price fixing, and said judgment has never been appealed nor rescinded, and the property including this composition is vested in the receiver as aforesaid, and by reason of the matters and things therein set forth, complainant is guilty of breaching the equitable maxim relating to "Unclean Hands," that a copy of said judgment will be made available at the trial hereof, and the decision of the United States District Court for the Western District of Washington, Southern Division, upholding the right of the State of Washington to maintain the action as aforesaid on a removal action is reported in 13 Federal Supplement 141.

FURTHER ANSWERING AND AS A *FIFTH* AFFIRMATIVE DEFENSE, DEFENDANT SAYS:

I. That the matter in controversy herein does not arise under and by virtue of the Copyright law of the United States; that this controversy hinges on contracts, assignments, and license agreements between the various parties as hereinbefore enumerated, and the construction of such agreements does not involve any law of the United States; that the controversy does not involve the validity of said copyrighted composition "Put On Your Old Grey Bonnet," the validity thereof and the fact that it was copyrighted being admitted; that this controversy involves a question of title and rights under contracts, assignments, and subsisting license agreements, between complainant ASCAP, Tracy Griffin as receiver for ASCAP, Stanley Murphy and Percy Wenrich, and the alleged claim for infringement set forth in the bill of complaint herein is merely incidental to such controversy; that this suit for infringement cannot lie in a Federal Court until the matter of complainant's title to "Put On Your Old Grey Bonnet" has been determined in the proper form, or until rescission has been sought in the Superior Court of the State of Washington for Thurston County of that order, proceedings, and judgment entered by said Court of Competent Jurisdiction, whereby title of said composition was vested in Tracy Griffin, as receiver for ASCAP, which judgment remains unappealed from; that the complainant is estopped from asserting its title in and to said composition, as the judgment of said Court filed in the United States Copyright Office, became the law of the case, and the matter of title to this composition is now res adjudicata; that defendant had permission of both said ASCAP and the Receiver, Tracy Griffin, to commercially perform said composition, and subsisting licenses issued by the said complainant and its agents ASCAP, and the Receiver, Tracy Griffin, to defendant and National Broadcasting Company to publicly perform said composition were issued with the knowledge, consent and acquiescence in both law and fact, of said complainant.

II. That by reason of the premises, this Court is without jurisdiction of the subject-matter of this suit and of the parties herein.

WHEREFORE, defendant demands judgment, dismissing the bill of complaint herein, besides the costs and disbursements of this action and reasonable counsel fees and for such other and further relief as to the Court may seem just and equitable.

JOHN CLAXTON,
Butte, Montana
KENNETH C. DAVIS,

STEVENS HOTEL SELECTED FOR NAB CONVENTION

The Board of Directors this week selected the Stevens Hotel as the place for holding the Fourteenth Annual Convention of the NAB on July 5, 6, 7 and 8.

Information concerning rates, etc., will be mailed to all members shortly.

NAB COPYRIGHT BUREAU

The Board of Directors, at a meeting held in Chicago, April 27, authorized the creation of a Bureau of Copyrights in the NAB. The report and plan of action as approved by the Board will be distributed for the information of the members.

BOARD ACTS ON HEARING

The Board of Directors this week authorized and directed the Managing Director to take such steps as are necessary to properly and adequately represent the NAB at the forthcoming general industry hearing called by the FCC for June 15.

FCC WINS MONOCACY CASE

Justice Jennings Bailey in the Supreme Court of the District of Columbia has upheld the Federal Communications Commission in an injunction proceeding filed against the Commission by the Monocacy Broadcasting Company.

The broadcasting company was granted a license by the Commis-

sion to erect a new station at Rockville, Md., but a protest was filed against the grant. The protest was later withdrawn but the Commission set the case for hearing. The Monocacy Company asked the District Supreme Court to enjoin the Commission against holding the hearing and to grant it the license. The Court refused to hold in favor of the broadcasting company.

RADIO COMMITTEE TO MEET

The American Section of the International Committee on Radio will meet at the University Club, this city, on May 5.

Anning S. Prall, chairman of the Federal Communications Commission, will speak and there will be discussion of the forthcoming meeting of the International Communications Conference to be held at Cairo.

WHEELER RADIO BILL PASSES SENATE

The Wheeler bill (S. 2243) relating to the allocation of radio facilities has passed the Senate just as it was favorably reported by the Senate Committee on Interstate Commerce. As it passed the bill is as follows:

That section 302 of the Communications Act of 1934 is hereby repealed.

Sec. 2. Subsection (b) of section 307 of such Act is amended to read as follows:

"(b) In considering applications for licenses, and modifications and renewals thereof, when and insofar as there is demand for the same, the Commission shall make such distribution of licenses, frequencies, hours of operation, and of power among the several States and communities as to provide a fair, efficient, and equitable distribution of radio service to each of the same."

MONAGHAN INTRODUCES RADIO AMENDMENT

Representative Monaghan of Montana has introduced a bill (H. R. 12421) to amend the Communications Act of 1934. The bill has been referred to the House Committee on Interstate and Foreign Commerce. Part of the bill deals with communication companies while another section provides for the striking out of the second sentence of Section 315 of the 1934 Act.

The second sentence which would be eliminated under the bill provides that "No obligation is hereby imposed upon any licensee to allow the use of its station by any such candidate."

The bill is as follows:

That section 207 of the Act of June 19, 1934, entitled the "Communications Act of 1934" is hereby amended by striking out all after the semicolon down to the period.

Sec. 2. Section 315 of such Act is hereby amended by striking out the second sentence.

Make Your Plans Now to Attend the
FOURTEENTH ANNUAL NAB CONVENTION
STEVENS HOTEL **CHICAGO, ILLINOIS**
JULY 5, 6, 7, and 8, 1936

GRANTING OF NEW LICENSE RECOMMENDED

J. Laurance Martin applied to the Federal Communications Commission for a construction permit for the erection of a new broadcasting station at Tucumcari, N. M., to use 1200 kilocycles, 100 watts and unlimited time on the air.

Examiner P. W. Seward in Report No. I-219 recommends that the application be granted. He found that the applicant is qualified to erect and operate the proposed station; that the construction will conform to the regulations of the Commission; that its erection will not adversely affect the service of station WOAI and that it will serve the public interest.

AGENDA FOR JUNE 15 HEARING

The Federal Communications Commission has issued the following formal notice of the informal engineering hearing to be held before it on June 15.

Notice is hereby given of an informal engineering hearing before the Commission en banc to be held in the offices of the Commission at Washington, D. C., beginning at 10 A. M., June 15, 1936, for the purposes of:

- (1) Determining the present and future needs of the various classes of services for frequencies above 30,000 kc., with the view of ultimately allocating such frequencies to services;
- (2) Securing for the public and the Commission a keener insight into the conflicting problems which confront the industry and the regulatory body in the application of the new frequencies to the service of the public;
- (3) Guiding experimentation along more definite lines as may be justified from the evidence presented at the hearing;
- (4) Reviewing present frequency allocations to services in the radio spectrum below 30,000 kc., and
- (5) Assisting the Government in its preparation for the International Telecommunications Conference at Cairo in 1938.

At this hearing neither individual applications nor individual assignments within service bands will be considered. However, in determining the width of the frequency band to be assigned to a service in any particular portion of the spectrum, it may be necessary to justify, from an engineering standpoint, the width of the band requested.

Persons appearing before the Commission at this hearing in behalf of a particular service such as maritime, police, aviation, aural broadcasting or television, should be prepared to furnish information as follows:

Evaluation of Services from the Standpoint of Public Need and Benefit

- (a) The dependence of the service on radio rather than wire lines.
- (b) The probable number of people who will receive benefits from the service.
- (c) The relative social and economic importance of the service, including safety of life and protection of property factors.
- (d) The probability of practical establishment of the service and the degree of public support which it is likely to receive.
- (e) The degree to which the service should be made available to the public, that is, whether on a limited scale or on an extended competitive scale.
- (f) Areas in which service should be provided and, in general, the points to which communication must be maintained.

Technical

- (a) The frequency bands required for a given service and the exact position thereof in the radio frequency spectrum; also the width of communication bands or channels within each portion required for station frequency assignments.
- (b) Suitability and necessity for particular portions of the spectrum for the service involved. This includes propagation characteristics and reliable range data.
- (c) Field intensity required for reliable service.
- (d) The number of stations required to enable efficient service to be rendered.
- (e) The distance over which communication must be maintained.
- (f) The relative amount of radio and other electrical interference likely to be encountered.
- (g) The relative amount of noise which may be tolerated in the rendering of service.

Apparatus Limitations

- (a) The upper practical limit of the useful radio frequency spectrum and, in general, what higher limit can be expected in the future.
- (b) The operating characteristics of transmitters with respect to external effects and practicability in service for which intended, including frequency tolerances which should be prescribed.
- (c) Types of antennas which are available for service for which intended, and their practical limitations, including the best methods of obtaining the most effective use of frequencies.
- (d) Receivers available and in process of development, including data with respect to selectivity and practical usefulness for the service for which intended.

Persons who intend to testify at the hearing should prepare exhibits which show the requirements for frequency bands and positions in the frequency spectrum for the service in which interested. One copy of each exhibit should be furnished the Commission on or before June 1, 1936.

Cross examination of witnesses will be limited to questions by Commissioners or members of the Commission's technical or legal staffs; however, the Chairman may permit any question of any witness which may be submitted to the Chairman in writing.

Persons or organizations desiring to appear and testify will notify the Commission of such intention on or before June 1, 1936. In such notification the number of witnesses who will appear, the topic each will discuss, and the time expected to be occupied by each should be stated. This information is necessary in order more efficiently to organize the hearing.

NEW STATION RECOMMENDED ON CONDITIONS

The Pittsburgh Broadcasting Company has applied to the Federal Communications Commission for a construction permit for the erection of a new station at Pittsburg, Kans., to use 790 kilocycles, 1,000 watts power and daytime operation.

Examiner George H. Hill in Report No. I-220 recommended that the application be granted "provided other applications now pending before the Commission for 100 watt stations are denied."

The Examiner states that there is a definite need for radio service in the Pittsburg area and "there appears to be local talent to meet the requirements of such a station." He found also that no objectionable interference would be caused any existing service by the operation of the proposed station.

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

- The United States Graphite Co., Saginaw, Mich. (2-2096, Form A-2)
- Scott Paper Company, Chester, Pa. (2-2099, Form A-2)
- Diversified Royalty Co., Kansas City, Mo. (2-2100, Form A-1)
- Youngstown Sheet & Tube Co., Youngstown, Ohio (2-2101, Form A-2)
- Sterling, Inc., New York City. (2-2102, Form A-2)
- Hess Oil Company, Kansas City, Mo. (2-2103, Form A-1)
- Pickford-Laskey Productions, Inc., Hollywood, Cal. (2-2104, Form A-1)
- United Goldfields of Nova Scotia, Inc., Liverpool, Canada. (2-1748, Form A-1)
- Bullion Imports, Inc., Nogales, Ariz. (2-2105, Form A-1)
- Capital City Products Co., Columbus, Ohio (2-2106, Form A-2)
- Mid-West Abrasive Co., Detroit, Mich. (2-2107, Form A-1)
- Walton-Dodge Manufacturing Co., Detroit, Mich. (2-2108, Form A-1)
- Great Dike Gold Mines, Inc., San Francisco, Cal. (2-2109, Form A-1)
- Belmont Brewing Co., Martins Ferry, Ohio. (2-2110, Form A-1)
- Reed Roller Bit Company, Houston, Texas. (2-2111, Form A-2)
- United Gilpin Company, Denver, Colo. (2-2112, Form A-1)
- Perfection Grain Shocker Co., Minneapolis, Minn. (2-2114, Form A-1)
- Institutional Securities, Ltd., Jersey City, N. J. (2-2115, Form A-1)
- California Water & Telephone Co., San Francisco, Cal. (2-2116, Form A-2)
- Schwitzer-Cummins Co., Indianapolis, Ind. (2-2117, Form A-2)

Gold Mountain Mining & Milling Co., Denver, Colo. (2-2118, Form A-1)

Household Finance Corp., Chicago, Ill. (2-2120, Form A-2)

National Petroleum Corp., Dallas, Texas. (2-2121, Form A-1)

Southern States Oil Company, Charleston, S. C. (2-2122, Form A-1)

NEW WISCONSIN STATION RECOMMENDED

The Central Broadcasting Company filed an application with the Federal Communications Commission asking for a construction permit for the erection of a new broadcasting station to be located at Eau Claire, Wis., to use 1050 kilocycles, 250 watts and daytime operation.

Examiner Melvin H. Dalberg in Report No. I-218 recommended that the application be granted. The Examiner states that there is undoubtedly a need for daytime service in the area proposed to be served; that no existing station would be adversely affected by interference from the proposed station, and the granting of the application would serve the public interest.

RECOMMENDS AGAINST NORTH CAROLINA STATION

C. G. Hill, George D. Walker, and Susan H. Walker applied to the Federal Communications Commission for a construction permit for the erection of a new broadcasting station at Winston-Salem, N. C., to use 1250 kilocycles, 250 watts power and daytime operation.

Examiner Ralph L. Walker, in Report No. I-217, recommended that the application be denied. He states that "the service which the applicants propose to render does not appear to differ materially from that which is or can be rendered through existing facilities. No substantial need is shown for additional service, nor does the record indicate that the proposed station could be successfully operated as a commercial project."

RECOMMENDS AGAINST STATION CHANGE

Broadcasting Station KLO, Ogden, Utah, filed an application with the Federal Communications Commission asking that its location be changed and that its power be increased from 500 watts to 1,000 watts and 5,000 watts LS. The station operates on a frequency of 1400 kilocycles with unlimited time operation.

Examiner Ralph L. Walker in Report No. I-221 recommends that the application be denied. He found that operation of the station as proposed would reduce its signal strength in Ogden to or below the minimum strength necessary to afford satisfactory reception in that community. It would also, he states, result in a restriction of the good service area of the station in the retail trade area of Ogden lying north of the city.

NATIONAL CONFERENCE ON EDUCATIONAL BROADCASTING

A group of organizations representing every important phase of American education has arranged the first National Conference on Educational Broadcasting in Washington, D. C., on December 10, 11, and 12. The Conference will be held in cooperation with the United States Office of Education and the Federal Communications Commission. The following organizations have been invited to sponsor the Conference: The American Association for Adult Education, The American Council on Education, The American Farm Bureau Federation, The General Federation of Women's Clubs, The Jewish Welfare Board, The International Council of Religious Education, The Institute for Education by Radio, The Institute of Radio Engineers, The National Advisory Council on Radio in Education, The National Association of Educational Broadcasters, The National Committee on Education by Radio, The National Catholic Educational Association, The National Congress of Parents and Teachers, The National Education Association, The National Grange, The Progressive Education Association, The Women's National Radio Committee, and The Workers Education Bureau.

The purpose of the meeting is to enable the large number of persons who are interested in educational broadcasting to discuss means by which radio may become a more effective instrument for education, both formal and informal; to serve as a clearing house for information on the latest technical and professional developments in educational broadcasting; and to enable persons representing all phases of the subject to become acquainted and to exchange ideas and experience.

In the last ten years complicated questions involving the use of radio in education have been raised in practically every educational conference held in the United States. In some instances individual organizations have met to discuss various phases of radio in education. The National Conference on Educational Broadcasting, however, will be the first meeting at which all interested groups will be represented.

The program will include such topics as schools of the air, radio music, speech, and drama, religious broadcasts, forums on the air, organization of listening groups, radio workshops, writing for radio, broadcasting to schools, use of radio programs by colleges and universities, use of radio by libraries and museums, developing use of electrical transcriptions for education, radio programs for children, problems of research in educational broadcasting, organizing audiences for radio programs, educational broadcasting in other countries, audience attitudes, exchange of programs for educational purposes, organizing the community on behalf of a radio station, and others. In addition to general sessions at which formal addresses will be given, smaller meetings will be held to discuss the more specialized interests of broadcasting.

All organizations interested in radio as a social force, nationally or regionally, are invited to participate. The broadcasting industry will be represented. Government officials and prominent educators from America and foreign countries will take part.

C. S. Marsh of the American Council on Education, 744 Jackson Place, Washington, D. C., is acting as Executive Secretary for the planning committee.

WARNER BROTHERS SUITS

Warner Brothers have made official announcement that they have begun suits based on the alleged infringement of song copyrights owned by them against radio stations, night clubs and restaurants through various music publishing subsidiaries as follows:

Harms, Inc. vs. WADC, Akron, Ohio—"You Took Advantage of Me"—\$5,000.

Remick Music Corp. vs. WHIO, Dayton, Ohio—"Don't Bring Lulu" and "Quicker Than You Can Say Jack Robinson"—\$10,000.

Harms, Inc. vs. WBTM, Danville, Va.—"Take This Ring"—\$250.

Remick Music Corp. vs. WBTM, Danville, Va.—"Sweet Georgia Brown"—\$500. Two infringements alleged.

M. Witmark & Sons vs. WBTM, Danville, Va.—"I Live For Love," "Mine Alone," "Mother Machree," "In a Shanty in Old Shanty Town"—\$1,000.

M. Witmark & Sons vs. WMFJ, Daytona Beach, Fla.—"She's a Latin From Manhattan"—\$250.

Harms, Inc. vs. Royal Palm Club, Miami, Fla.—"Where Am I?"—\$250.

M. Witmark & Sons vs. Gay Paree Cafe, Sacramento, Calif.—"My Wild Irish Rose," "Am I Blue"—\$500.

Remick Music Corp. vs. Prima's Shim Sham Night Club, New Orleans, La.—"Chinatown, My Chinatown"—\$250.

Harms, Inc. vs. Prima's Shim Sham Night Club, New Orleans, La.—"Where Am I?"—\$250.

M. Witmark & Sons vs. Prima's Shim Sham Night Club, New Orleans, La.—"Lulu's Back In Town," "The Rose In Her Hair"—\$500.

Remick Music Corp. vs. Hotel Del Coronado, Coronado, Calif.—"Put On Your Old Grey Bonnet"—\$250.

Harms, Inc. vs. WALA, Mobile, Ala.—"Day Dreams"—\$250.

M. Witmark & Sons vs. WCAM, Camden, N. J.—"In The Vine Covered Church Way Back Home"—\$250.

Remick Music Corp. vs. Lucca Restaurant, Los Angeles, Calif.—"The Lady In Red"—\$250.

Harms, Inc. vs. Cine-Grill of Hotel Roosevelt, Los Angeles, Calif.—"April in Paris"—\$250.

Harms, Inc. vs. WOV, New York City.—"All Through the Night"—\$250.

M. Witmark & Sons vs. WTOG, Savannah, Ga.—"West of the Great Divide," "That Wonderful Mother of Mine," "In a Shanty in Old Shanty Town"—\$1,500.

M. Witmark & Sons vs. WGAR, Cleveland, Ohio—"My Wild Irish Rose"—\$5,000.

Music Publishers Holding Corp. vs. KMOX, St. Louis, Mo.—"Liza Lee"—\$5,000.

M. Witmark & Sons vs. Vanity Club, New Orleans, La.—"Lulu's Back In Town," "The Rose in Her Hair"—\$500.

M. Witmark & Sons vs. Club Plantation, New Orleans, La.—"Lulu's Back in Town" and "The Rose in Her Hair"—\$500.

Harms, Inc. vs. KOMA, Oklahoma City, Okla.—“Where Am I? (Am I In Heaven?)”—\$5,000.

Harms, Inc. vs. New Kenmore Hotel, Albany, N. Y.—“April In Paris” and “I Cover the Waterfront”—\$500.

M. Witmark & Sons vs. WBNO, New Orleans, La.—“You’re An Eye-ful of Heaven”—\$250.

Harms, Inc. vs. WBNO, New Orleans, La.—“You and the Night and the Music”—\$1,750.

T. B. Harms Co. vs. WSMB, New Orleans, La.—“Two Hearts Carved On A Lonesome Pine”—\$5,000.

M. Witmark & Sons vs. WKI, San Francisco, Calif.—“That Old Irish Mother of Mine” and “Where the River Shannon Flows”—\$10,000.

Remick Music Corp. vs. WHIO, Dayton, Ohio.—“Don’t Bring Lulu”—\$5,000.

New World Music Corp. vs. KTAT, Fort Worth, Texas.—“I Got Rhythm”—\$5,000.

M. Witmark & Sons vs. New Kenmore Hotel, Albany, N. Y.—“My Wild Irish Rose”—\$250.

Remick Music Corporation vs. Savarin Restaurant, Buffalo, N. Y.—“Ev’ry Day”—\$250.

M. Witmark & Sons vs. Savarin Restaurant, Buffalo, N. Y.—“The Kiss Waltz” and “When Irish Eyes Are Smiling”—\$500.

Harms, Inc. vs. WGAR, Cleveland, Ohio.—“Where Am I? (Am I In Heaven?)”—\$5,000.

Harms, Inc. vs. The Village Farm Barn, Ltd.—“Anything Goes” and “Brother, Can You Spare a Dime?”—\$500.

M. Witmark & Sons vs. The Village Farm Barn, Ltd.—“California, Here I Come”—\$250.

Remick Music Corp. vs. Restaurant La Rue Co., Inc.—“The Lady In Red”—\$250.

Harms, Inc. vs. WGR, Buffalo, N. Y.—“When Buddha Smiles”—\$5,000.

Harms, Inc. vs. WDOD, Chattanooga, Tenn.—“Let’s Swing It”—\$250.

New World Music Corp., vs. WHFC, Cicero, Ill.—“I Got Rhythm”—\$250.

Harms, Inc. vs. WHFC, Cicero, Ill.—“Dancing in the Dark”—\$250.

Remick Music Corp. vs. WGFC, Cicero, Ill.—“Don’t Give Up the Ship”—\$500.

T. B. Harms Co. vs. WGFC, Cicero, Ill.—“Every Now and Then” and “Madonna Mia”—\$500.

Harms, Inc. vs. WCHS, Charleston, W. Va.—“Let’s Pretend There’s a Moon”—\$250.

M. Witmark & Sons vs. WCSH, Portland, Me.—“When Irish Eyes Are Smiling,” “My Wild Irish Rose” and “That Old Irish Mother of Mine”—\$750.

M. Witmark & Sons vs. WHFC, Cicero, Ill.—“I’m Goin; Shop-pin’ With You,” “The Words Are In My Heart,” “In a Shanty in Old Shanty Town,” “Lulu’s Back in Town”—\$1,000.

New World Music Corp. vs. Royal Palm Club, Miami, Fla.—“I Got Rhythm”—\$250.

Harms, Inc. vs. Roney Plaza Hotel, Miami Beach, Fla.—“Where Am I? (Am I In Heaven?)”—\$250.

Harms, Inc. vs. Palomar Cafe, Los Angeles, Calif.—“Night and Day”—\$250.

Harms, Inc. vs. Vanity Club, New Orleans, La.—“Where Am I? (Am I In Heaven?)”—\$250.

Harms, Inc. vs. New Bismarck Hotel, Chicago, Ill.—“Night and Day”—\$250.

Remick Music Corp. vs. Blackstone Hotel, Chicago, Ill.—“The Lady In Red”—\$250.

Harms, Inc. vs. Terrace Garden, Chicago, Ill.—“Anything Goes”—\$250.

M. Witmark & Sons vs. WNEW, Newark, N. J.—“I Like Mountain Music”—\$5,000.

Remick Music Corp. vs. WMEX, Boston, Mass.—“I Like Mountain Music”—\$5,000.

M. Witmark & Sons vs. WMEX, Boston, Mass.—“Weary”—\$5,000.

Harms, Inc. vs. WJAX, Jacksonville, Fla.—“Blue Moonlight”—\$500.

Harms, Inc. vs. WHBF, Rock Island, Ill.—“Born To Be Kissed”—\$500.

T. B. Harms Co. vs. WHBF, Rock Island, Ill.—“You’re An Angel (Playing Hookey From Heaven)”—\$500.

Harms, Inc. vs. Blackstone Hotel, Chicago, Ill.—“The Continental (You Kiss While You’re Dancing),” “Anything Goes,” “Where Am I? (Am I In Heaven?)” and “I Get a Kick Out of You”—\$1,000.

Remick Music Corp. vs. The Palmer House, Chicago, Ill.—“Moonlight Bay” and “Carolina in the Morning”—\$500.

M. Witmark & Sons vs. La Lune Club, New Orleans, La.—“Lulu’s Back In Town” and “The Rose in Her Hair”—\$500.

M. Witmark & Sons vs. Miami Biltmore Hotel, Coral Gables, Fla.—“Can’t You Hear Me Callin’ Caroline”—\$250.

Remick Music Corporation vs. WTFI, Athens, Ga.—“China-town, My Chinatown”—\$250.

Harms, Inc. vs. WTFI, Athens, Ga.—“Day Dreams”—\$500.

New World Music Corp. vs. St. Moritz-on-the-Park, Inc., N.Y.C.—“I Got Rhythm”—\$250.

New World Music Corp. vs. 870 Seventh Ave. Corp. (Park Central Hotel), New York City.—“I Got Rhythm”—\$250.

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2767. A complaint alleging unfair methods of competition in the sale of tinted or colored enlargements of photographs and of frames therefor has been issued against **International Art Co.** and **American Discount Co.**, both with headquarters at 325 West Huron St., Chicago, and against their president, John C. Kuck. The complaint alleges that American Discount Co. is a “dummy corporation and collection agency” for International Art Co.

Under International Art Co.’s sales plan, its salesmen contact prospects, and, it is charged, offer to make from a family photograph furnished by the prospect, a genuine hand-painted oil portrait or picture with a sales value ranging from \$30 to \$60, when, in fact, according to the complaint, the finished product is merely a cheap photographic enlargement, tinted or colored by the use of crayons or pastels, and in no instance by the use of oil, and is not an original painting. The finished picture is said to cost about \$1.25, the cost of the frame ranges from 75¢ to \$1.75, and picture and frame allegedly are sold by the salesman for as much as they can obtain in any particular locality.

In order to induce prospects to sign orders, the respondent art company’s agents make various false and misleading representations, the complaint charges, including representations that it is appointing a limited number of purchasers as private exhibitors in any particular community where it sells pictures; that it intends to open a branch studio in such community; that it has won prizes in art in public exhibitions, and that it will enter baby pictures in a newspaper prize contest. Respondent’s contract blanks represent that it has branch offices in various cities in South America, Africa and Asia, when, according to the complaint, such is not a fact.

No. 2771. Charging unfair competition in the sale of “Grove’s Laxative Bromo Quinine Tablets,” a complaint has been issued against **The Grove Laboratories, Inc.**, 2630 Pine St., St. Louis.

On signs and counter placards featuring retail druggists in various parts of the country, the respondent company, according to the complaint, advertised its article by the representations “Stop that cold in its tracks,” “kill colds dead,” and “strike at the cold itself—not merely at the symptoms.”

These assertions are alleged to have been exaggerated and misleading, as the respondent company’s product, according to the complaint, neither kills colds dead, stops a cold in its tracks, nor has germicidal effect.

No. 2772. Unfair competition through representations that it is a manufacturer of handkerchiefs, when such is not a fact, is alleged in a complaint issued against **General Handkerchief Mfg. Co., Inc.**, 919 W. Roosevelt Rd., Chicago.

Use by the respondent company of the abbreviation “mfg.” in its trade name and of the words “manufactured” and “manufacturing” in circulars, letter-heads, advertising matter, and otherwise, in connection with the sale of handkerchiefs, constitutes violation of Section 5 of the Federal Trade Commission act, according to the complaint, which also charges that the respondent company caused itself to be listed as “General Handkerchief Manufacturing Co.” in the annual directory of the handkerchief industry.

No. 2773. Misrepresentation of certain building materials, constituting an unfair trade practice, is alleged in a complaint issued against **Standard Wall Covering Co., Inc.**, 1819 North 9th St., Philadelphia, manufacturer of fiber wall coverings.

Competing with companies selling wall coverings, including those made of ceramic or burned clay tile, and marble, the respondent

company is alleged to have advertised in some instances in a manner intended to convey the impression that its fiber products are clay tile and marble.

No. 2774. Charging unfair trade practices, in violation of the Federal Trade Commission Act, a complaint has been issued against **Twentieth Century Business Builders, Inc.**, 917 Furniture Mart Building, Chicago, and its resident manager, Edwin I. Gordon. The respondents are engaged in selling an alleged copyrighted sales promotion plan to retail merchants, and in offering the services of a business consultant. The respondents' practices, it is alleged, have resulted in unfair diversion of trade from competitors.

The sales plan, it is alleged, consists of furnishing to retailers advertising mats to be reproduced in local newspapers for displaying puzzles known as "Count the Dot" and "Count the Block," and of advertising merchandise sold by retailers in connection with the puzzles.

These advertisements are alleged to have represented that on a given day the retailer would give free of charge to the person most closely approximating the number of dots or blocks in the picture, certain described merchandise represented to be of considerable value.

No. 2775. A complaint alleging unfair methods of competition through use of a lottery scheme in connection with the sale of candy has been issued against **Helen Ardelle, Inc.**, 1401 E. 41st Seattle, Wash.

According to the complaint, the respondent corporation sells to wholesale and retail dealers certain assortments of boxes of candy, together with punch boards, each bearing a statement informing the purchasing public as to which numbers will win a box of candy.

The ultimate purchaser pays five cents to punch one of the numbers on a board, the complaint alleges, and if he obtains one of the winning numbers listed he receives a box of candy, while the purchaser obtaining other than a winning number receives nothing for his money.

No. 2776. Sale of candy by means of a lottery scheme is alleged as an unfair method of competition, in violation of Section 5 of the Federal Trade Commission Act, under a complaint issued against **Bonomo Candy and Nut Corporation**, 649 Morgan Ave., Brooklyn, N. Y.

The respondent corporation is said to pack candies in an assortment consisting of a number of pieces of uniform size and shape which retail for one cent. According to the complaint, a purchaser who selects a piece of candy with a center colored differently from the centers of the majority of pieces wins a box of candy as a prize.

Use of such lottery scheme, the complaint alleges, induces purchasers to buy the respondent's product in preference to the candy of competitors who do not resort to the same or equivalent sales method, and trade is thereby diverted to the respondent from such competitors.

No. 2777. **Plantation Chocolate Co., Inc.**, 3150 Janney Street, Philadelphia, is charged with unfair competition in promoting a sales lottery, under a complaint issued alleging violation of Section 5 of the Federal Trade Commission Act.

The lottery method is alleged to involve including in assortments of candy of uniform size and shape, several larger pieces and others having centers of a different color. Purchasers drawing such pieces different from the general run receive larger pieces of candy free, according to the complaint.

This practice is alleged to be of a type deemed contrary to public policy and to have a tendency to divert trade from competitors who do not use similar sales methods.

No. 2778. Use of unfair methods of competition is alleged in a complaint against **Vaughn C. Salter** and **Paul Tesson**, trading as **Falcon Camera Co.**, 8277 De Soto Ave., Detroit, and engaged in selling a sales promotional plan which offers cameras as premiums.

Retailers are persuaded by the respondents and their salesmen, the complaint alleges, to contract for the purchase of trade tickets at \$4.50 a thousand, generally in lots of 5,000, one of which the retailer gives to a customer with each merchandise purchase of a stipulated amount. When a customer has accumulated 25 tickets, he may forward them with 30 cents to the respondents, who, under the terms of a sales plan described in the complaint, ship to the customer a camera they have represented as a certain model Falcon camera, and a trial roll of film.

In sales talks, advertising literature, trade tickets, contracts and exhibits, the respondents are alleged to represent to retailers that they manufacture Falcon cameras and the films therefor; that they have put into operation a plan to increase the number of users of

Falcon cameras in order to increase the sale of films, which are the only ones that can be used in such cameras; that use of the sales plan by a retailer in conjunction with the distribution of cameras will increase his business and build up goodwill, and that the 30 cents remitted by each person who sends in trade tickets for redemption is not intended to apply to the purchase of the camera, but merely to cover the cost of packing and shipping, together with the cost of the trial roll of film.

According to the complaint, the respondents do not manufacture cameras or films; they ship to retailers' customers cameras that do not approximate in appearance or value the Falcon model promised; they are not interested in the sale of films, but principally in the sale of their promotion plan to obtain the profits resulting therefrom, and the 30 cents remittance does not cover solely the cost of packing and shipping, but actually represents the entire cost of the camera and one roll of film.

No. 2780. Charging unfair competition in the use of a lottery sales plan, a complaint has been issued against **Charles R. Luce**, trading as **Luce & Co.**, 350 Mercer St., Jersey City, N. J.

The practice complained of involves the sale of candy in assortments so that purchasers receiving certain pieces of a different color from the general run in the assortment are awarded a prize, consisting of a package of candy, according to the complaint.

This practice is alleged to result in diverting trade from competitors who do not use the same sales method, and to be of a type deemed contrary to public policy. Violation of the Federal Trade Commission Act is charged.

No. 2781. **A. C. Hynd Corporation**, 320 Franklin St., Buffalo, N. Y., is charged in a complaint with unfair competition in misrepresenting the therapeutic value of "Ku-Rill," a germicide manufactured and sold by the respondent corporation.

According to the complaint, "Ku-Rill" is not, as allegedly advertised by the respondent, a competent remedy for athlete's foot, pimples, and other skin diseases, does not kill 27 different kinds of disease germs or destroy the parasite that causes skin ailments, and does not banish every trace of red, cracked skin and make it clear and smooth again. Claims that the product excels other germicides are untrue, the complaint alleges.

No. 2782. A complaint has been issued against **Brown & Haley**, a corporation of 110 East 26th St., Tacoma, Wash., alleging unfair competition, in violation of Section 5 of the Federal Trade Commission Act, in the sale of candy. The respondent is charged with placing in the hands of others the means of conducting a lottery in the sale of its products.

Under the respondent corporation's sales plan, the complaint alleges, assortments of boxes of candy, together with punch boards, are distributed to retailers. Customers pay 5 cents to punch numbers on the board, and those who select certain numbers win a box of candy, while those who punch other numbers receive nothing.

Stipulations

The Commission has issued the following cease and desist orders and stipulations.

No. 01345. **M. C. Bass**, operating as **National Sales Co.**, **Walnut Ridge, Ark.**, agrees to discontinue representing that the "Astrological Life Reading" he sells is prepared especially for the individual purchasing the same or that it will advise one regarding money matters, home affairs, law suits, and other personal matters, and that his combination "Astrological Life Reading," "Fast Luck Powder" and "Good Luck Medallion" will bring one good luck, love, money and success in undertakings. The respondent also will cease selling any powder of the same or similar composition as "Fast Luck Powder" under any trade name, and stipulates that he will not publish any testimonial containing any representation contrary to his agreement with the Commission.

No. 01350. **Eunice Runge**, trading as **Wisconsin Institute of Horology**, 524 E. Mason St., Milwaukee, Wis., and selling a correspondence course in watch making and repairing, has signed a stipulation to cease representations that by such course of instruction a person can learn the trade of watch repairing at home as well as in a shop, and that after completing the course, one can secure a well paying position or start in business. The respondent also will discontinue representing that there is an ever increasing scarcity of competent watch-makers or an equally increasing scale of wages, and that diplomas of the Wisconsin Institute of Horology are recognized officially by German "authorities," or that such diplomas, by inference or otherwise, confer the right to practice the trade of watch-making and repairing.

No. 1641. Trading as **Tourist Luggage Co.**, 136 West 21st St., New York City, **Samuel Intner**, **Louis Aberman** and

Abraham Boretz, manufacturers of leather luggage, agree to cease and desist stamping or branding products made of split leather with the words "Cowhide Warranted," or "Cowhide," unless accompanied by the word "Split" or "Split Leather" stamped in immediate juxtaposition to "Cowhide" or "Cowhide Warranted," and in letters of equal size and conspicuousness. According to the stipulation, the respondent company had caused the word "split" to be placed at a distance from the phrase "Cowhide Warranted," having a tendency to deceive purchasers into the belief that the products were made of the whole cowhide and not of split leather.

No. 1644. M. Hopkins, trading as Silverware Redemption Bureau, 1003 Santa Fe Building, Dallas, Tex., engaged in the sale of coupons and advertising matter for use by retailers in connection with the sale of their goods, agrees to stop certain alleged fictitious price markings and other misrepresentations in the sale and redemption of coupons exchanged for silver-plated ware. Hopkins, under the agreement, will no longer assert that the usual selling price of silverware sets offered as prizes by his retail customers is \$25.75, or any other exaggerated sum, nor that the offer of silverware premiums is a "special advertising offer," obtainable only with his coupons, when this is not true. He agrees to desist from furnishing retail customers with advertising matter in which it is not made known that a cash payment, in addition to the required coupons, is exacted before retailers' customers can obtain the silverware promised them.

No. 1646. Oelerich & Berry Co., Inc., 854 Larrabee St., Chicago, manufacturing food products such as molasses, syrups and jellies, will stop the use in advertising of the word "maple," either alone or in connection with other words, to describe a product not composed wholly of maple syrup, unless the representation is properly qualified. Provision is made that when this preparation is composed substantially of maple syrup, the word "maple," if used to describe it, shall be immediately accompanied by other words in conspicuous type to show clearly that the article is not made wholly of maple syrup.

No. 1648. Oscar E. Minor, trading as "Craft Service," 542 Blossom Rd., Rochester, N. Y., is engaged in the sale of materials, tools and other merchandise to Boy Scouts and others interested in making craft work. He signed a stipulation to discontinue in advertising matter use of the words "Navajo Silver" as descriptive of certain metal products he sells and which are not composed of silver and not made by Navajo Indians. He also will cease using "ite" in connection with the word "silver" to imply that such metal products are composed of silver, and in the sale of leather jackets and other merchandise designated and referred to in advertising as "suede," will refrain from using that word, or any derivative thereof, so as to lead purchasers into the erroneous belief that such products are made from suede or leather, prepared from the skins of certain animals.

No. 1649. Ring-less Cleaning Fluid Co., Inc., 125 West 33rd St., New York City, distributing "Ring-less" and "Neverring" cleaning fluid, will no longer use on labels attached to containers of its product the representation "not injurious to the most delicate of materials," or other assertions implying that the colors of certain fabrics dyed with non-fast or fugitive dyes will not be injured by application of this fluid. The fluid also will not be represented as being capable of removing stains or spots of whatever kind or character from fabrics when this is not true, and the company will cease employing the word "Ring-less" as part of its trade name, or in any manner tending to convey the belief that the fluid will not leave a ring or mark when applied to certain fabrics for removal of spots.

Use of the word "Neverring" as a brand name for the respondent's preparation will be discontinued.

No. 1650. Spiegel, May, Stern Co., 1061 West 35th St., Chicago, dealers in general merchandise, agree to discontinue use in advertising matter of pictorial or other representations implying that the company keeps in stock or is able to obtain for the filling of orders products such as are pictorially or otherwise represented, when this is not a fact. The stipulation says that Spiegel, May, Stern Co. pictured in catalogues certain baseballs and playground balls and their pasteboard containers, and that on balls and containers were plainly visible depictions of the trade-mark, trade name, and numbers used exclusively by a competitor. Such markings identified these articles as products manufactured by the competitor, according to the stipulation, when in fact Spiegel, May, Stern Co., in filling orders, did not furnish the balls pictured in the advertising.

No. 1652. New Jersey Laboratory Supply Co., 235 Plane St., Newark, N. J., entered into a stipulation to discontinue use of the word "Manufacturers" in advertising matter and the words "Manufacturer" or "Manufacturers" in any way which may tend

to lead purchasers to believe that it owns or operates a factory where it makes the scientific glass apparatus and instruments of precision it sells and distributes in interstate commerce, when such is not the fact.

No. 1654. Tomlinson of High Point, Inc., High Point, N. C., furniture manufacturer, stipulates that it will cease using on labels or in advertisements the word "mahogany" to describe furniture, implying that such products are made of wood derived from trees of the mahogany tree family, when this is not true.

No. 1655. Minnie I. Marshall, of Bellows Falls, Vt., trading as Green Mountain Gummed Tape Co., engaged in the sale and distribution of gummed sealing tape, will ban use of the word "Manufacturers" in advertising matter, when in fact she is not the owner or operator of a plant or factory in which the product advertised is made, but has filled orders with a sealing tape made in factories controlled by others. The respondent also agrees to stop employing the word "Manufacturers" in connection with the phrase, "We sell to jobbers only."

No. 2718. Economy Rubber Products Co., 600 Burkhardt Ave., Dayton, Ohio, selling "Tiger-Grip Tire Patches," has been ordered to cease and desist from making exaggerated and misleading representations as to the value and efficiency of its product, and concerning the earnings of its salesmen.

The respondent company is directed to discontinue representing in advertisements or circulars, on labels, or by radio broadcasts, that its tire patches renew old blown out tires instantly or restore such tires to their original quality; that they permanently repair blow-outs and rim cuts, by self-vulcanizing, or that they save motorists 50 per cent either in mileage or in cost in comparison with the mileage obtained from or the price paid for comparable tire patches of competitors.

No. 2719. In an order entered against **Michael Whitehouse, trading as International Tableware Co., 800 Washington Boulevard Bldg., Detroit,** he is directed to cease certain unfair methods of competition in the sale of tableware, dishes, also promotional sales plans.

The Commission found that the respondent sold trade cards to local merchants, at \$4.50 a thousand, for distribution among their customers according to the amount of merchandise sold to such customers, and agreed to redeem the trade cards with tableware or chinaware. This and other representations made by the respondent were not fulfilled, according to the Commission's findings.

Under the order, the respondent will discontinue representing in contracts, circulars or in advertisements that, free of charge, he will redeem with tableware and dishes the trade cards he issues, or that he will refund money paid by merchants for premiums delivered to their customers; that he will furnish sets of tableware, or any other merchandise, free of charge, to merchants for display and advertising purposes, and to become their sole property, and that the "gift boxes" of tableware he sells contain four pieces or any greater number of pieces than they actually do contain.

FTC DISMISSES CASES

The Commission has announced the following dismissals:

No. 2757. The Commission has entered an order of dismissal in its complaint, Docket No. 2757, as to the **Biederman Furniture Co., of 801 Franklin Ave., St. Louis.**

In this complaint, the Retail Furniture Dealers' Association of St. Louis, its officers, and 42 merchant members, were named respondents, charged with violation of the Federal Trade Commission Act through combination and conspiracy to monopolize the sale and distribution of furniture and allied products in the St. Louis, Mo., and East St. Louis, Ill., trade area.

The Commission has ordered its complaint against the Biederman Company dismissed for the reason that evidence was presented to it to show that the Biederman Company resigned from the association some time prior to the issuance of the complaint, had ceased to participate in the activities of the association, and abandoned the practices charged against the association's members. The complaint was dismissed "without prejudice to the right of the Commission to reinstate should conditions warrant."

No. 2381. The Commission has also entered an order dismissing its complaint against **Van Kannel Revolving Door Co., 101 Clark Ave., New York City,** engaged in the manufacture and sale of wood and metal revolving doors.

Under the complaint, the respondent had been charged with violation of Section 7 of the Clayton Act in that it had acquired controlling stock in two competing companies, the Atchison Revolving Door Co., Independence, Kans., and Revolving Doors, Inc., New York City.

**FEDERAL COMMUNICATIONS COMMISSION
ACTION**

HEARING CALENDAR

Monday, May 4

HEARING BEFORE AN EXAMINER

(Broadcast)

NEW—The Times Dispatch Publishing Co., Inc., Richmond, Va.—C. P., 1500 kc., 100 watts, unlimited time.

(Visual Broadcast)

NEW—National Television Corp., New York, N. Y.—C. P., 2000-2100 kc., 500 watts, Emission A3, A4, unlimited time.

Tuesday, May 5

HEARING BEFORE AN EXAMINER

(Broadcast)

WQDM—E. J. Regan and F. Arthur Bostwick, d/b as Regan & Bostwick, St. Albans, Vt.—C. P., 1390 kc., 1 KW, specified hours. Present assignment: 1370 kc., 100 watts, specified hours (request to move transmitter and studio).

NEW—F. N. Pierce, Taylor, Tex.—C. P., 1310 kc., 100 watts, daytime.

NEW—Eugene DeBogory, tr/as Tem-Bel Broadcasting Co., Temple, Tex.—C. P., 1310 kc., 100 watts, daytime.

Wednesday, May 6

HEARING BEFORE AN EXAMINER

(Broadcast)

NEW—Hunt Broadcasting Assn., Greenville, Tex.—C. P., 1290 kc., 100 watts, daytime.

NEW—Voice of Marshall, Marshall, Tex.—C. P., 1500 kc., 100 watts, specified hours.

NEW—Navarre Broadcasting Assn., Corsicana, Tex.—C. P., 1310 kc., 100 watts, daytime.

NEW—Dorrance D. Roderick, El Paso, Tex.—C. P., 1500 kc., 100 watts, unlimited time.

APPLICATIONS GRANTED

WTAR—WTAR Radio Corp., Norfolk, Va.—Granted C. P. to make change in auxiliary equipment.

WLLH—Merrimac Broadcasting Co., Inc., Lowell, Mass.—Granted special experimental authority to install synchronized or booster station at Lawrence, Mass., to operate synchronously with station WLLH, Lowell, Mass., on 1370 kc., with variable power of 10 to 100 watts, for period ending July 1, 1936. Site to be determined.

NEW—Democrat-News Co., Inc., Lewistown, Mont.—Granted C. P. for new station to operate on 1200 kc., 100 watts, unlimited time. Site to be determined.

WSIX—Jack M. Draughon, Louis R. Draughon, d/b as 638 Tire and Vulcanizing Co., Nashville, Tenn.—Granted modification of C. P. approving proposed transmitter site at northeast corner Boscobal and 3rd St., Nashville, extend commencement date to two days after grant and completion date to 100 days thereafter.

WHIS—Daily Teleg. Printing Co., near Bluefield, W. Va.—Granted modification of C. P. to make changes in equipment.

WNAC—Shepard Broadcasting Service, Inc., Boston, Mass.—Granted C. P. to make changes in equipment and increase day power from 2½ to 5 KW.

WCLO—Gazette Printing Co., Janesville, Wis.—Granted C. P. to move transmitter locally from Milwaukee Road near Janesville, to 1436 S. Oakhill Ave., Janesville, and install new vertical radiator.

KOOS—Pacific Radio Corp., Marshfield, Ore.—Granted C. P. approving transmitter site ¼ mile north of city limits of Marshfield at the port of Koos Bay, and install new radiating system to comply with Rule 131.

WTAQ—WHBY, Inc., Green Bay, Wis.—Granted renewal of license for period May 1 to November 1, 1936.

Standard Radio, Inc., Hollywood, Calif.—Granted authority to deliver by express and parcel post, library service of pro-

grams in the form of electrical transcriptions, to station CHWC, Regina, Sask., Canada, and CFRB, Toronto, Ont., Canada.

World Broadcasting System, Inc., New York City.—Granted authority to deliver sustaining programs consisting of electrical transcriptions, to the Northern Electric Company, Ltd., of the Dominion of Canada by express for transmission of Canadian and Newfoundland radio stations.

WCAO—Monumental Radio Co., Baltimore, Md.—Granted license to cover C. P., 600 kc., 500 watts night, 1 KW day, unlimited time.

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Granted license to cover C. P., 920 kc., 1 KW night, 5 KW day, unlimited time.

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Granted authority to determine operating power by direct measurement of antenna input in compliance with terms of Rule 137.

WPTF—WPTF Radio Co., Cary, N. C.—Granted license to cover C. P. authorizing move of auxiliary transmitter from Raleigh, N. C., to Cary, N. C., the same site as regular transmitter.

WIOD-WMBF—Isle of Dreams Broadcasting Corp., Miami, Fla.—Granted license to cover C. P. authorizing installation of new equipment.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Granted license to use old transmitter as an auxiliary, to operate with 500 watts night and day, for emergency purposes only.

WQAM—Miami Broadcasting Co., Miami, Fla.—Granted license to use old transmitter as an auxiliary for emergency purposes only, equipment for 1 KW.

WKAQ—Radio Corp. of Porto Rico, San Juan, P. R.—Granted modification of license to change time of operation from ½ time to unlimited.

KFIZ—Reporter Printing Co., Fond du Lac, Wis.—Granted modification of license to increase time of operation from specified hours to unlimited.

KFXM—J. C. and E. W. Lee (Lee Bros. Broadcasting Co.), San Bernardino, Calif.—Granted authority to install automatic frequency control equipment.

WNBR—Memphis Broadcasting Co., Memphis, Tenn.—Granted renewal of license, 1430 kc., 500 watts, with an additional 500 watts from local sunrise to local sunset only. Antenna current 3.7 amperes for 500 watts, 5.25 amperes for 1 KW. Antenna resistance 36.4 ohms.

KSO—Cedar Rapids Broadcast Co., Des Moines, Iowa.—Granted renewal of license for period May 1 to November 1, 1936; 1430 kc., 500 watts night, 1 KW day, unlimited time.

KGDY—Voice of South Dakota, Huron, S. Dak.—Granted renewal of license for period May 1 to November 1, 1936; 250 watts, 1340 kc., daytime only.

KRNT—Iowa Broadcasting Co., Des Moines, Iowa.—Granted renewal of license for period May 1 to November 1, 1936; 1320 kc., 500 watts night, 1 KW daytime, unlimited.

WKBH—WKBH, Inc., La Crosse, Wis.—Granted renewal of license for period May 1 to November 1, 1936.

KXYZ—Harris County Broadcast Co., Houston, Tex.—Granted renewal of license for period May 1 to November 1, 1936.

KUJ—KUJ, Inc., Walla Walla, Wash.—Granted renewal of license for period May 1 to July 1, 1936.

KPDN—Pampa Daily News, Inc., Pampa, Tex.—Granted license to cover C. P. as modified for new station to operate on 1310 kc., 100 watts, daytime only.

WIS—Station WIS, Inc., Columbia, S. C.—Granted modification of C. P. to extend completion date from 5-10-36 to 7-10-36.

WNBC—William J. Sanders, New Britain, Conn.—Granted special temporary authority to operate unlimited time on the night of May 6, 1936, in order to broadcast a testimonial dinner being given in honor of Postmaster General James A. Farley.

NEW—Lynchburg Broadcasting Corp., Portable-Mobile (Lynchburg, Va.)—Granted C. P. for new broadcast pickup station, frequencies 31100, 34600, 37600 and 40600 kc., 40 watts.

W1XEH—Travelers Broadcasting Service Corp., Avon Mountain, Avon, Conn.—Granted license to cover C. P., frequency 63500 kc., 150 watts, unlimited time, for rebroadcast of WTIC program and radiotelephone transmissions.

W10XGJ—Atlantic Broadcasting Corp., Portable-Mobile (New York, N. Y.)—Granted license to cover C. P., frequencies 31100, 34600, 37600, 40600, 86000-400000, 401000 kc. and above, 50 watts.

KNEC—Puget Sound Broadcasting Co., Inc., Portable-Mobile (Tacoma, Wash.)—Granted license to cover C. P., frequen-

cies 1646, 2090, 2190 and 2830 kc., 40 watts; to be used for temporary broadcast pickup service only.

WGBE—Onondaga Radio Broadcasting Corp., Portable-Mobile (Syracuse, N. Y.).—Granted license to cover C. P. for new broadcast pickup station in temporary service; 1646, 2090, 2190 and 2830 kc., 45 watts.

WABA—Wodaam Corp., Mobile—in plane (Newark, N. J.).—Granted license to cover C. P. for broadcast pickup station in temporary service, frequencies 1622, 2060, 2150 and 2790 kc., 7½ watts.

SET FOR HEARING

NEW—Glenn Van Auken, Indianapolis, Ind.—Application for C. P. for new station, 1050 kc., 1 KW daytime. Site to be determined.

NEW—Seaboard Investment Co., Inc., Montgomery, Ala.—Application for C. P. for new station, 610 kc., 500 watts night, 1 KW day, unlimited time.

NEW—William F. Kolleck, Pittsfield, Mass.—Application for C. P. for new station, 1290 kc., 250 watts, daytime. Site to be determined.

NEW—Smith, Keller & Cole, a partnership composed of Ralph E. Smith, A. H. Keller and H. Wadsworth Cole, San Diego, Calif.—Application for C. P. for new station, 1200 kc., 100 watts, daytime. Site to be determined.

NEW—Hildreth & Rogers Co., Lawrence, Mass.—Application for C. P. for new station, 680 kc., 1 KW daytime. Site to be determined.

NEW—Lillian E. Kiefer, Brooklyn, N. Y.—Application for C. P. for new station, 1500 kc., 100 watts, specified hours. Site to be determined.

NEW—Red River Valley Broadcasting Corp., Sherman, Tex.—Application for C. P. for new station, 1310 kc., 100 watts daytime. Site to be determined.

NEW—Tribune Printing Co., Jefferson City, Mo.—Application for C. P. for new station, 1310 kc., 100 watts, daytime. Site to be determined.

NEW—E. Anthony & Sons, Inc., Pawtucket, R. I.—C. P., already in hearing docket, amended to read: 1200 kc., 100 watts night, 250 watts day, unlimited time. Site to be determined.

KFPM—Voice of Greenville, Greenville, Tex.—C. P., already in hearing docket, amended to read: Install new equipment; change frequency from 1310 kc. to 1420 kc.; increase power from 15 watts, specified hours, to 100 watts, daytime only; and move station locally, site and antenna system to be determined with Commission's approval.

NEW—Ellwood W. Lippincott, Bend, Ore.—C. P., already in hearing docket, amended to read: 1500 kc., 100 watts, unlimited time. Site to be determined.

NEW—Ben S. McGlashan, San Diego, Calif.—C. P., already in hearing docket, amended to read: 550 kc., 250 watts, daytime only. Exact transmitter site and type of antenna to be determined with Commission's approval.

NEW—John E. Fetzer, Benton Harbor, Mich.—C. P., already in hearing docket, amended to read: 1500 kc., 250 watts, daytime only. Exact transmitter site to be determined with Commission's approval.

WTJS—The Sun Publishing Co., Inc., Jackson, Tenn.—C. P., already in hearing docket, amended to read: Install new equipment; move transmitter locally, 1.55 miles northwest of Jackson, Tenn., 920 kc.; install directional antenna; 250 watts night, 500 watts day, unlimited time.

NEW—Dr. F. P. Carniglia, Monroe, La.—Application for C. P. for new station, 1500 kc., 100 watts, unlimited time.

NEW—George Harm, Fresno, Calif.—Application for C. P. for new station, 1310 kc., 100 watts, unlimited time.

NEW—Edwin A. Kraft, Petersburg, Alaska.—Application for C. P. for new station, 1420 kc., 100 watts, unlimited. Exact transmitter site and type of antenna to be determined with Commission's approval.

WHBC—Edward P. Graham, Canton, Ohio.—Application for modification of C. P. requesting extension of completion date from 4-27-36 to 7-27-36 (original C. P. authorized changes in equipment and increase in day power to 250 watts subject to Rule 131).

NEW—Luther E. Gibson, d/b as Times-Herald Publishing Co., Vallejo, Calif.—Application for C. P. for new station in vicinity of Mare Island Navy Yard between Vallejo and South Vallejo, Calif., to operate on 1320 kc., 250 watts, daytime only.

NEW—Arthur E. Seagrave, Lewiston, Maine.—Application for C. P. for new station, 1420 kc., 100 watts night, 250 watts day, unlimited. Site to be determined with Commission's approval.

J. L. Statler, M. D., d/b as Baker Hospital, Muscatine, Iowa.—Authority to furnish programs in the form of electrical transcriptions to stations in Canada and Mexico to be delivered by mail, express or by carrier.

WJBR—J. B. Roberts, Gastonia, N. C.—Consent to voluntary assignment of C. P. from J. B. Roberts to Virgil V. Evans (present assignment, under C. P. only, 1420 kc., 100 watts, unlimited time).

WJBR—Virgil V. Evans, Gastonia, N. C.—Modification of C. P. requesting approval of transmitter and studio sites at 214 So. St. Masonic Temple, Gastonia, and radiating system.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KFBK, Sacramento, Calif.; KIDO, Boise, Idaho; KIEM, Eureka, Calif.; KMO, Tacoma, Wash.; KOH, Reno, Nevada; KOY, Phoenix, Ariz.; KTBS, Shreveport, La.; WBCM, Bay City, Mich.; WCOA, Pensacola, Fla.; WFBC, Greenville, S. C.; WHIS, Bluefield, W. Va.; WHP, Harrisburg, Pa.; WIOD-WMBF, Miami, Fla.; WQBC, Vicksburg, Miss.; WROK, Rockford, Ill.; WSAI, Cincinnati, Ohio; WSAN and auxiliary, Allentown, Pa.; WSMK, Dayton, Ohio; WTFI, Athens, Ga.

WATL—J. W. Woodruff and S. A. Cisler, Jr., d/b as Atlanta Broadcasting Co., Atlanta, Ga.—Present license further extended on a temporary basis only, for the period May 1 to June 1, 1936, subject to such action as may be taken upon application for renewal pending before the Commission.

WJEJ—Hagerstown Broadcasting Co., Hagerstown, Md.—Present license further extended on a temporary basis only, for the period May 1 to June 1, 1936, subject to such action as may be taken upon application for renewal pending before the Commission.

WWL—Loyola University, New Orleans, La.; KWKH—International Broadcasting Corp., Shreveport, La.—Granted extension of present license for the period May 1 to June 1, 1936, subject to same conditions as contained in existing authorities to said stations, pending consideration of pending petition of Station WLWL and petitions in opposition thereto.

The following stations were granted renewal of licenses on a temporary basis only, subject to whatever action may be taken by the Commission upon pending applications for renewal of licenses:

KFAC, Los Angeles; WARD, Brooklyn, N. Y.; WBBC and auxiliary, Brooklyn, N. Y.; WLTH, Brooklyn, N. Y.; WSMB, New Orleans; WVFV, Brooklyn, N. Y.

WFEA—New Hampshire Broadcasting Co., Manchester, N. H.—Granted renewal of license on a temporary basis only subject to whatever action may be taken by the Commission upon the renewal application and upon the petition of Station WSPD in opposition to the granting of renewal of license to this station. Also on condition that WFEA shall not permit nighttime signal intensity without attenuation of station radiated in the direction of station WSPD to be greater than 62.5 millivolts per meter at a distance of 1 mile from transmitter of WFEA.

The following stations were granted renewal of experimental visual broadcasting licenses in the experimental service, for the period May 1, 1936, to expire May 1, 1937, in exact conformity with existing license:

W6XAO, Los Angeles; W9XAL, Kansas City, Mo.; W9XD, Milwaukee, Wis.; W9XAK, Manhattan, Kans.; W3XE, Philadelphia, Pa.; W8XAN, Jackson, Mich.; W9XAT, Minneapolis, Minn.

W1XAL—World Wide Broadcasting Corp., Boston, Mass.—Granted renewal of relay broadcasting license for experimental service, in exact conformity with existing license, for the period May 1, 1936, to May 1, 1937.

W8XAM—The Sparks-Withington Co., Jackson, Mich.—Same, except for special experimental station.

W3XDD—Bell Tel. Labs., Inc., Whippany (Morris Co.), N. J.—Same, except for the period April 29 to July 29, 1936.

W1XAC—Shepard Broadcasting Service, Inc., Quincy, Mass.—Same, except for the period May 21 to August 21, 1936.

APPLICATIONS DISMISSED

The following applications, heretofore set for hearing, were dismissed at request of applicants:

WAAW—Omaha Grain Exchange, Omaha, Nebr.—Applied for voluntary assignment of license, 660 kc., 500 watts, daytime.
WJIM—Harold F. Gross, M. Bliss Keeler and L. A. Veraluis, d/b as Capitol City Broadcasting Co., Lansing, Mich.—Applied for C. P., 1010 kc., 500 watts, 1 KW LS, unlimited time.

The following application, heretofore set for hearing, was dismissed for failure of applicant to answer Commission letters and want of prosecution:

NEW—The Attala Broadcasting Corp., Columbus, Miss.—Applied for C. P., 1200 kc., 100 watts, unlimited time.

MISCELLANEOUS

KFH—Radio Station KFH Co., Wichita, Kans.—Affirmed Commission's action of May 28, 1935, in granting application of KFH for C. P., 1300 kc., 1 KW, 5 KW LS, unlimited time, and dismissed protest of KFBI which had been designated for hearing, upon request of KFBI to withdraw said protest.
WCAC—Connecticut State College, Storrs, Conn.—Present license of this station cancelled, and call letters WCAC deleted, effective April 30, 1936, upon request of the College asking permission to discontinue operation of the station. WCAC was normally licensed for 600 kc., 500 watts power, with specified hours of operation.

KTSM—Tri-State Broadcasting Co., El Paso, Tex.—Granted petition to intervene at hearing of application of Dorrence D. Roderick for C. P. to establish a new station at El Paso to operate on 1500 kc., 100 watts, unlimited time.

KVOS—KVOS, Inc., Bellingham, Wash.—Denied motion to dismiss hearing to consider application for renewal of license scheduled for May 19, 1936, at Washington, D. C., before an examiner.

Winona Radio Service, Winona, Minn.—Granted request to take depositions in re application for new radio station.

KMMJ—M. M. Johnson Co., Clay Center, Nebr.—Granted request for postponement of hearing on application for increase in power until after application for assignment of license is acted upon.

WOWO—Main Auto Supply Co., Fort Wayne, Ind.—Granted petition to postpone application for C. P. for increase in power set for hearing May 18, 1936, until Commission has acted upon application to transfer control of station to the Westinghouse Electric & Mfg. Co.

WELI—Patrick J. Goode, New Haven, Conn.—Granted request to postpone hearing on application for modification of license now fixed for May 13, 1936.

WICC—Southern Connecticut Broadcasting Corp., Bridgeport, Conn.—Granted permission to file answer to the appearance of Patrick J. Goode, who seeks modification of license of WELI at New Haven, Conn.

The Commission advanced the effective date of the following cases:

Ex. Rep. 1-176—Symons Broadcasting Co., Spokane, Wash.—Effective date postponed to May 1, 1936, from April 28, 1936.
Ex. Rep. 1-182—C. C. Morris, Ada, Okla.—Effective date postponed to May 8, 1936, from May 5, 1936.
Ex. Rep. 1-111—University of Illinois, Urbana, Ill.—Effective date postponed to May 8, 1936, from May 5, 1936.

ORAL ARGUMENT GRANTED

NEW—Ex. Rep. 1-212: A. W. Hayes, Erie, Pa.—Oral argument granted to be heard September 10, 1936.

NEW—Watertown Broadcasting Corp., Watertown, N. Y.—Oral argument granted to be heard September 10, 1936.

APPROVED MONITORS

The Commission approved the following monitors for use in broadcast stations in order to comply with Rule 139, and assigned approval numbers as given below:

Manufacturer's Name	Type	Approval No.
General Radio Company	Type 731-A	1551
RCA Manufacturing Company	Type 66-A	1552

APPLICATIONS RECEIVED

First Zone

WTAG—Worcester Telegram Publishing Co., Inc., Worcester, 580 Mass.—License to cover construction permit (B1-P-986) to make changes in equipment.

NEW—Clarence C. Dill, Washington, D. C.—Construction permit 1230 for a new station to be operated on 1310 kc., 100 watts, unlimited time. Requests facilities of WOL if WOL is granted 1230 kc. Consideration under Section 307 (b).

NEW—John C. Looney, d/b as High Fidelity Broadcasting Service, Milton, Mass.—Construction permit for a new experimental broadcast station to be operated on 1570 kc., 1 KW, unlimited and variable time.

W2XJI—Bamberger Broadcasting Service, Inc., New York, N. Y.—Modification of construction permit to establish definite site of transmitter at 1450 Broadway, New York City, to be remotely controlled from 1440 Broadway, New York, N. Y.; change power from 1 KW to 100 watts; make changes in equipment; and extend commencement and completion dates to 4-15-36 and 9-15-36, respectively.

W10XCT—Shepard Broadcasting Service, Inc., Portable-Mobile.—License to cover construction permit for changes in equipment and increase in power of general experimental transmitter.

Second Zone

NEW—Harold F. Gross, Lansing, Mich.—Construction permit for 580 a new station to be operated on 580 kc., 500 watts, 1 KW day, unlimited time, to use directional antenna.

WHIS—Daily Telegraph Printing Co., Bluefield, W. Va.—Modification of construction permit (B2-P-861) for authority to install new equipment and move transmitter, requesting further changes in equipment.

Third Zone

WPTF—WPTF Radio Co., Raleigh, N. C.—Special experimental 680 authorization to use transmitter as requested under license B3-L-301 as an auxiliary from local sunset to 11:00 p. m., EST, for period to 8-1-36.

KTRH—KTRH Broadcasting Co., Houston, Tex.—Modification of 1290 license to change power from 1 KW, 5 KW day, to 5 KW day and night.

NEW—A. H. Belo Corporation, Grapevine, Tex.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 31000, 86000-400000, 401000 kc., and above, 100 watts.

W3XEN—Havens & Martin, Inc., Portable-Mobile.—License to cover construction permit, as modified, for a new general experimental station.

Fourth Zone

WCFL—Chicago Federation of Labor, Chicago, Ill.—Construction 970 permit to install new equipment and increase power from 5 KW to 25 KW.

NEW—Eau Claire Broadcasting Co., Eau Claire, Wis.—Construction permit for a new station to be operated on 1210 kc., 100 watts, unlimited time.

KWKC—Charlotte Duncan, Admin., Lester E. Cox, Thomas L. Evans and C. C. Payne, Kansas City, Mo.—Construction permit to install new equipment; move studio from Werby Bldg., 29th and Main St., Kansas City, Mo., to Commerce Bldg., northwest corner 10th and Walnut, Kansas City, Mo., and transmitter from 3912 Main St., Kansas City, Mo., to Commerce Bldg., northwest corner 10th and Walnut Sts., Kansas City, Mo. Amended to change hours of operation from specified hours to unlimited and include C. C. Payne in partnership and as a party applicant.

KWKC—Wilson Duncan, tr. as Wilson Duncan Broadcasting Co., 1370 Kansas City, Mo.—Voluntary assignment of license from Wilson Duncan, tr. as Wilson Duncan Broadcasting Co. to Lester E. Cox, Thomas L. Evans and C. C. Payne. Amended to add name of C. C. Payne to partnership—assignees.

NEW—WHBY, Inc., Portable-Mobile.—Construction permit for a new general experimental station to be operated on 31100, 34600, 37600, 40600 kc., 10 watts.

NEW—WHBY, Inc., Portable-Mobile.—Construction permit for a new general experimental station to be operated on 31100, 34600, 37600, 40600 kc., 10 watts.

W9XHW—Northwestern Broadcasting, Inc., Minneapolis, Minn.—
License to cover construction permit for a new general experimental station.

Fifth Zone

KMJ—James McClatchy Co., Fresno, Calif.—Voluntary assignment of license from James McClatchy Co. to McClatchy Broadcasting Co.

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—License to 920 use W. E. D-87737 transmitter for auxiliary purposes.

KFEL—Eugene P. O'Fallon, Inc., Denver, Colo.—Construction 920 permit to make changes in equipment.

KFBB—Buttrey Broadcast, Inc., Great Falls, Mont.—Construction 950 permit to make changes in equipment; increase power from 1 KW, 2½ KW day, to 1 KW, 5 KW day; change frequency from 1280 kc. to 900 kc.; and move transmitter from 5 miles south of town on 13th Street, Great Falls, Mont., to site to be determined, south of Great Falls, Mont. Amended to change frequency from 900 kc. to 950 kc. and omit request for facilities of KSEI.

KJR—Fisher's Blend Station, Inc., Seattle, Wash.—Construction 970 permit to install a new transmitter, erect a new antenna and move transmitter from 185th Street and 15th Ave. N. E., Lake Forest Park, near Seattle, Wash., to 2600 26th Ave., Southwest, Seattle, Wash.

KWG—Portable Wireless Telephone Co., Inc., Stockton, Calif.—1200 Voluntary assignment of license from Portable Wireless Telephone Co., Inc., to McClatchy Broadcasting Co.

NEW—Barney Hubbs, A. J. Crawford, Jack Hawkins and Harold 1210 Miller, d/b as Carlsbad Broadcasting Co., Carlsbad, N. Mex.—Construction permit for a new station to be operated on

1210 kc., 100 watts, unlimited time. Amended to change name from Carlsbad Broadcasting Co. to Barney Hubbs, A. J. Crawford, Jack Hawkins and Harold Miller, d/b as Carlsbad Broadcasting Co., and giving exact transmitter site as "La Huerta," approximately 1¼ miles north of Carlsbad, N. Mex.

KYA—Hearst Radio, Inc., San Francisco, Calif.—Construction 1230 permit to install new equipment and increase power from 1 KW to 1 KW, 5 KW day. Amended to make changes in antenna and move transmitter from 1231 Market St., San Francisco, Calif., to Bay View Park, San Francisco, Calif.

KGGM—New Mexico Broadcasting Co., Albuquerque, N. Mex.—1230 Consent to transfer control of corporation from Mrs. A. R. (Goldie) Hebenstreit to A. R. Hebenstreit, 444 shares capital stock.

NEW—The Tribune, Great Falls, Mont.—Construction permit for 1280 a new station to be operated on 950 kc., 1 KW, 5 KW day, unlimited time. Amended to change frequency from 950 kc. to 1280 kc., and request facilities of KFBB.

KERN—The Bee Bakersfield Broadcasting Co., Bakersfield, Calif. 1370 —Voluntary assignment of license from The Bee Bakersfield Broadcasting Co. to McClatchy Broadcasting Co.

KFBK—James McClatchy Co., Sacramento, Calif.—Voluntary assignment of license from James McClatchy Co. to McClatchy Broadcasting Co. 1490

NEW—Louis Wasmer, Inc., Portable-Mobile.—Construction permit for a new general experimental station to be operated on 31100, 34600, 37600, 40600 kc., 2 watts.

NEW—Louis Wasmer, Inc., Portable-Mobile.—Construction permit for a new general experimental station to be operated on 31100, 34600, 37600, 40600 kc., 2 watts.

NAB REPORTS

Copyright, 1936. The National Association of Broadcasters

Special
MAY 5, 1936

REPORT ON COPYRIGHT

There is printed below the full text of the Report and Recommendations of the Managing Director concerning the creation of a Bureau of Copyrights in the NAB as approved by the Board of Directors at a meeting held in Chicago, April 27, 1936.

TO THE MEMBERS OF THE BOARD OF DIRECTORS
OF THE
NATIONAL ASSOCIATION OF BROADCASTERS

By motion passed on February 3, 1936, at your last meeting, you instructed me to prepare and submit to the Board at an early date a detailed plan and program for the establishment and successful operation of a corporation having substantially the same purposes and powers as the Radio Program Foundation. In pursuance of that action I submit the following report. In doing so I want to take formal note of the assistance received from Mr. Walter J. Damm, Milwaukee, Wisconsin, to whom I am indebted for the music classifications contained in the report; also of the advice and counsel received by me from Messrs. Philip G. Loucks and Louis G. Caldwell, Washington, D. C., in formulating the basic principles embodied in the plan.

Part I

Foreword

Broadcasters Have Waged Copyright Fight For Ten Years

For more than ten years the broadcasting industry in the United States has been endeavoring to solve what it calls the copyright problem.

The industry has at different times both supported and opposed copyright legislation in the Congress. It has instituted a lawsuit against the largest group of copyright proprietors in the world and has aided the Government in its suit against this same group. It has waged fierce fights against groups of copyright proprietors over terms and conditions in contracts and over methods of royalty payments. It has attempted on two occasions to establish and operate its own music source. It has expended many thousands of dollars; consumed many hours in discussion; considered many plans and proposals; and adopted many resolutions and reports. But today the problem remains unsolved.

The present copyright laws are antiquated and should be revised. The provision of the present law imposing minimum damages for infringement should be repealed. It is an anomaly in our law. No other nation in the world has a similar provision in its copyright laws. Other changes also are needed. But revision of the law, however favorable to broadcasters, will not in and of itself solve the problem.

A monopoly of music performing rights, if in violation of our laws, should be dissolved by the Government. But dissolution of the monopoly, however sweeping the decree, will not in and of itself solve the problem.

The broadcasting industry has learned one thing from its ten years of fighting. It has learned that it must give more attention to its own business and less to the business of copyright owners. Nobody knows whether the industry is paying too much or too little for its use of copyrighted music. As long as the present situation exists, nobody can find out.

Existing Licensing Agreements Offer No Promise For Solution

Not a single license agreement in existence today holds any promise of a permanent solution of the problem. Not only is this true from the viewpoint of the broadcasters; but it is equally true from the viewpoint of the originator or creator of musical compositions. When broadcasting developed a new market for creative works, it found the author and composer allied with publishers. The publishers are commercial users of musical works in very much the same sense as broadcasters. Unlike conditions of a decade ago, the publisher and broadcaster now compete for the creation of the author and composer. It was simply a fact that the creator had disposed of a part of his valuable performing right to one class of customers before another class had risen to prominence. Broadcasters want, and are willing to pay generously for the works of the creator. Their interest is in the author and composer. They are not concerned with the profits or losses of the publishers or other users.

The problem has been made to appear more difficult than it really is. There are millions of musical compositions now in existence and many more millions will be written. But of the millions of works in existence, less than 800,000 are currently copyrighted in the United States. Of copyrighted and non-copyrighted musical works of all classes, about 35,000 compositions are active, that is, in ordinary day to day use. An average broadcasting station, operating full time, will perform about 75,000 separate selections in a year. If the same composition is performed once a week for fifty-two weeks, a library of 1,500 different compositions would supply the needs of a broadcast station. But

some numbers are performed more frequently and some less frequently, and 1,500 compositions would not be considered by any broadcaster as an adequate repertory. But, contrary to the popular belief, the broadcaster does not need all of the copyrighted music in the world; nor should he be required to pay for such extensive accessibility.

Broadcasting Industry Has Never Measured Actual Musical Needs

The first task of the broadcaster, therefore, is to obtain some estimate of his actual musical needs. Having determined this, he should then set about acquiring on the best terms possible that music which will satisfy his needs. He should not endeavor to influence the price or prices asked by the copyright owner. If the price is disproportionate to the merit or value of a work or works, he has the option to refrain from use. As a member of an industry interested in a never-ending supply of new musical works, the broadcaster is desirous of encouraging the creator. He is interested in encouraging authors and composers to write for radio presentation. He will not forever be interested simply in acquiring performing rights of music written primarily for publication or for the stage, motion picture, dance hall or night club. As an art, broadcasting must develop creations written primarily for radio presentation and adapted to conditions peculiar to broadcasting. Any proper plan devised by broadcasters for the utilization of original creations must inevitably inure to the benefit of authors and composers. The use of such creations should determine the extent of compensation to authors and composers. Merit of such creations should determine the extent of their use.

Music Publishing Industry Custom Has Confused Copyright Ownership

Basic difficulties have faced broadcasters and copyright owners in their attempts to work out a joint solution. Licensing agreements are entirely too vague as to rights conveyed thereunder. Existing agreements say simply to the licensee that in the event you perform a composition, the performing right of which is vested in the licensing group, that no infringement suit will be instituted. These agreements, when carefully analyzed, convey no definite affirmative rights but are more in the nature of forbearance of suits for infringement. This is so because no licensing group of any importance has furnished to its licensees a complete list of the works it owns or controls or has agreed to adequately indemnify the user in all cases where he exercises his best efforts to avoid infringement.

Perhaps one reason for the reluctance or refusal of licensing groups, up to the present time, to make available detailed and complete catalogs and adequately warrant title to all compositions listed therein, is the confusion which has resulted from private contracts between composers or authors and publishers or other users. This confusion is the result of custom in the music publishing industry which obtained before the advent of either broadcasting or sound motion pictures. The publisher may own the performing right or the composer may have reserved that right to himself and parted only with the right of publication. It is not always true, therefore, that a licensee may rely entirely upon the copyright notice imprinted upon the printed copy of a composition.

Until such time as each broadcaster has in his possession a complete catalog of the compositions in day to day use through which he is able to ascertain ownership of the performing rights therein, confusion will continue. Until that time arrives the broadcaster is left with no alternative except to avoid the use of all compositions, the performing right ownership of which is in doubt. With respect to each and every composition performed, the broadcaster must know (a) that he has a right to perform the particular work he is using; (b) that the proper legal or equitable owner has authorized the performance; and (c) that compensation is paid to the legal or equitable owner or his lawfully appointed agent.

Use Should Determine Basis of Compensation To Copyright Owner

Much has been said and written about the so-called "per piece" plan. The plan has been commended as the only sound and scientific method for the licensing of performing rights and, at the same time, it has been condemned as impractical and unworkable. In these discussions mention is seldom made of the fact that so-called "grand rights" are nearly always obtained on a "per piece" or a "per performance" basis. But it is a fact that this method of obtaining "grand rights" has never been extended to the more extensively used "small rights." In existing licensing agreements "grand rights" are specifically withheld and are available in most instances only upon a "per performance" basis.

At the present time broadcasters are at a distinct disadvantage in checking their performances and entering such performances upon their program logs. But if for no other reason than to be in a position to defend against an infringement suit erroneously commenced, the broadcaster must be in a position to make proper entries on his log. This is now virtually impossible and will continue to be impossible until confusion over ownership of performing rights is abated and the stations are in possession of adequate information to check accurately.

It is a condition precedent to the institution of a "per piece," "per performance" or any measured service plan, that each station should have in its possession a complete catalog of the works it is licensed to perform and that accurate entries be kept on program logs at all times. Furthermore, broadcasters have a right to know what they have a right to perform under their licenses. They should not be put to the expensive and almost impossible task of trying to ascertain what they have no right to perform. In no other way can the constant danger of infringement, with its unfairness to both the broadcaster and the copyright owner, be avoided.

Performing Right Responsibility At Program Originating Point

Where a program is originated at a single point for broadcasting over a group of stations, performing rights, with respect to all stations accepting the program, should be cleared at such originating point. This should be so irrespective of whether the originator of the program is a network, transcription or other company.

This should be so because a station broadcasting a network program, for example, does not know, and even by the exercise of the greatest degree of care cannot know, whether the composition next being broadcast is one for which he holds a valid license. Yet if there is included in the program a composition for which the station holds no valid license, the rule seems to be that he is just as liable as the originating station. The liability is the same whether the unlicensed composition occurs in a network or an electrically transcribed program.

Networks and transcription companies exercise the greatest possible care in avoiding the use of compositions for which their affiliated or accepting stations do not hold licenses; but should error occur the station actually broadcasting the number would be liable even though it had no way of knowing in advance that the composition was to be performed or did not know that the particular arrangement or adaptation from which the transcription was made was one for which it had no license.

In the case of network programs you have declared yourselves in favor of clearance of copyright at the source so that only the originating station will be held responsible for infringement and affiliate stations will be under no obligation to secure licenses with respect to such programs or to bear responsibility for any infringements that may occur therein. The same policy should apply with equal force to electrical transcriptions.

Payment of Copyright Royalties Presents Serious Policy Question

The preceding section deals entirely with the matter of responsibility for clearing performing rights. It does not mention by whom payment of the royalties should be made. Custom in the industry is not uniform. Transcription companies, as a general rule, do not clear performing rights. Network companies clear performing rights for affiliates with respect to certain licensing groups but do not do so with respect to the largest and most important group. As a general proposition the station pays the performing right royalties whether the program is supplied by the network or transcription company.

The fee must be paid. Whether the fee should be paid by the network or transcription company for all stations taking a given program; whether it should be paid by the stations individually; or whether it should be divided up among the stations and network or transcription companies, is a serious policy question which is now, and perhaps always must be, a matter of private contract between the stations and originating companies directly concerned.

But this is true. All of the costs which go into program production must be paid by someone. If the originating company is required to add copyright performing fees to its other program production costs then it should have the right to adjust its station agreements to take into consideration this new cost item.

As pointed out before, this is a matter of contract between stations and originating companies. It would seem, however, that no distinction should be made between copyright costs and other items of cost which go into the production of the entire program.

In the final analysis the advertiser pays all of the costs which go into the production and broadcasting of his program; and copyright fees are just as much a part of this program cost as is the cost of talent, telephone lines, recording operations, and other items. In a few instances the copyright fee is passed on to the advertiser as a direct charge but the general practice is otherwise. It may be that the time has arrived when the advertiser should pay for the use made of music in his program as a direct charge and under a system whereby he might have the benefits which will accrue from a market in which copyright owners sell their rights in competition with each other and in which prices are fixed by such competition. This is a question of policy which cannot be answered in this report.

Adequate Financial Support and Competent Personnel Needed

The Board of Directors of the National Association of Broadcasters has authorized the formation of a corporation as the vehicle for perfecting and executing a comprehensive copyright plan designed to effect a solution of the industry's copyright problem. The exact form of the corporation or organization is not discussed in this part of the report. But any corporation or organization created will be confronted with the necessity for raising money and finding competent personnel.

The ultimate object of the plan is to stabilize methods and practices in the performing rights field in so far as those methods and practices affect broadcasting. It seeks to achieve this through the creation of the machinery necessary to make competition among copyright owners effective and at the same time secure to the creators of original works the compensation which their works are able to command in an open and competitive market. It is not proposed that the corporation or organization should enter either the publishing, transcription or licensing businesses unless it becomes necessary to do so in order to achieve its objective. It recognizes that many, if not all, of the proposed functions can be performed by one or more existing agencies and that it would be far more desirable to utilize existing facilities than to duplicate them. At the same time, the plan is complete enough to duplicate any or all of them if that should become necessary.

The plan is divided into three principal parts:

1. Making available to broadcasters a complete and accurate catalog or index of active musical compositions.
2. Creation of a standard library of musical compositions taken, for the most part, from the public domain of music.
3. Establishment of a system for making available to the industry copyrighted musical works on a measured service basis.

Great flexibility should be given to the plan. In its administration it may be found advisable or necessary to eliminate some of the principles; modify others; or develop new ones. Practical considerations should govern each step in its development and wide discretionary powers should be given to its executive officers. Advantage should be taken of every opportunity to utilize existing facilities and the cooperation of copyright owners sought toward this end.

The plan should not be considered as a substitute for pending litigation or legislation except where such litigation or legislation is in direct conflict with the general objectives to be achieved.

Part II

Proposed Plan

1. The organization proposed to be organized under the resolution adopted by the Board of Directors of the National Association of Broadcasters should provide broadcasters with a complete and accurate catalog or index of all active musical compositions based upon minimum library requirements.
2. In the event such catalog or index is found to be unavailable, the organization should undertake a survey of the musical needs of the industry with a view to compiling its own catalog or index based upon minimum library requirements.
3. If it is found necessary to undertake such survey, the study should embrace:
 - A. Analyses of libraries of leading broadcasting companies.
 - B. Analyses of transcription libraries.
 - C. Analyses of the best phonograph collections.
4. From the information obtained from such survey there should be compiled a master index of all active musical compositions.
 - A. Three identical cards should be made for each composition included in the minimum library.
 - B. Each card should list
 - (a) Title of the composition
 - (b) Name of composer or composers
 - (c) Name of author or authors
 - (d) Publisher or copyright owner
 - (e) Date of copyright
 - (f) Name of arranger
 - (g) Licensing group controlling performing right
 - (h) Character of composition
 - (i) Type of composition
 - C. If the composition has been electrically transcribed, the card should also note
 - (a) Name of transcription company
 - (b) Library reference
 - (c) Name or names of performing artists
 - (d) Serial number or other identification
 - D. If the number has been phonographically recorded, the card should note
 - (a) Name of recording company or companies
 - (b) Name or names of performing artists
 - (c) Serial number or numbers
 - (d) Arrangement used, etc.
5. One set of cards in the master index should be filed alphabetically by title of composition.
6. A second set of cards in the master index should be filed by classes or types of composition. The following classifications are suggested:
 - A. Classical orchestrations
 - B. Classical song orchestrations

- C. Popular old dance orchestrations
 - D. Popular new dance orchestrations
 - E. Popular song orchestrations
 - F. Popular song copies
 - G. Classical song copies
 - H. Hillbilly orchestrations
 - I. Special arrangements for particular groups
 - J. Modern impressions
 - K. Brass band
 - a. Concert
 - b. Marches, etc.
 - L. Vocal scores
 - M. Hillbilly song copies
 - N. String ensembles
 - O. Foreign language song copies
7. A third set of cards should be arranged in detailed classifications as an aid to program directors in building programs. An example of this type of classification follows:
- A. Accordion solos and duets
 - African (Indian)
 - Agitatos
 - Air
 - American music
 - Arabian music
 - Argentine
 - Aviation
 - B. Ballets
 - Baritone solos with orch. accomp.
 - Birds (butterfly)
 - Bohemian music
 - Bolero
 - Brass band
 - 1. American marches
 - 2. American patriotic
 - 3. Baritone solos
 - 4. Bass solos
 - 5. Chime solos and Vibra-Harp solos
 - 6. Christmas
 - 7. Clarinet solos, duets, etc.
 - 8. College music
 - 9. Comedy songs
 - 10. Concert
 - 11. Fan Fares
 - 12. Flute solos. Piccolo duets, etc.
 - 13. Fox-trots—popular music
 - 14. Funeral march
 - 15. Galops—one-steps

16. German fox-trots & waltzes
 17. German marches & Polonaise
 18. German songs—vocal
 19. Guitar solos
 20. Horn solos
 21. Laendlers
 22. Lancers, Quadrilles, reels & hornpipes
 23. Mazurkas, Mazurs, Kujawiaki, Oberok & Menuetts
 24. Other foreign marches
 25. Overtures
 26. Polkas, Krakowiaks & Cakewalks
 27. Brass quartets
 28. Religious or Sacred
 29. Schottisches & Barn dances
 30. Tenor solos
 31. Trombone solos
 32. Trios
 33. Trumpet solos, trios & duets
 34. Waltzes—concert-dances
 35. Waltzes—popular-dances
- B. Brigadiers
- C. Canadian music
- Cello solos
- Cello (duets, quartets, trios, etc.)
- Characteristic dances
- Children
- Chinese
- Christmas
- Clarinet solos with orch. accomp.
- College music
- Light concert
- Heavy concert
- Cuban music
- D. Dance (Special rhythmic)
- Dance orchestrations
1. Bird
 2. Children
 3. Comedy
 4. Day
 5. Dream
 6. Eyes
 7. Fall
 8. Flowers
 9. Home
 10. Kiss
 11. Luck
 12. Moon

- 13. Mother
- 14. Name
- 15. Night
- 16. Rain
- 17. Smile
- 18. Spring
- 19. Star
- 20. Summer
- 21. Sun
- 22. Water
- 23. Wedding
- 24. Winter
- Danish music
- Day and night
- Dramatic music
- Dutch
- E. Earth
- Easter
- Egyptian
- English
- F. Fan fares
- Fashions
- Flowers
- Flute solos with orch. accomp.
- Flute and Clarinet duets with orch. accomp.
- Folk songs (American)
- Forest (Woods-trees)
- Fraternal music
- French
- Funeral marches
- G. Galop
- Gavottes
- German
- Grecian music
- H. Hawaiian
- Hill Billy
- Hungarian (Gypsy)
- I. India
- Indian music
- Intermezzo (Humoresque & Caprices)
- Irish
- Italian
- J. Japanese
- Jewish
- K.
- L. Lullaby's
- M. Mazurkas

- Minuettes
- Modern Impressions
- Mother and Father
- Mountains (Hills, Cliffs)
- Musical comedy (Operettas & Comic Opera)
- M. Mysteriosos
- N. New Year
- Nocturne
- Northern music
- Norwegian music
- Novelty
- O. One steps
- Operatic music
- Opera selections
- Oriental music
- Overtures
- Medley overtures
- P. Persian music
- Piano solos
- Piano solos with orch. accomp.
- Piano duets
- Piano duets with orch. accomp.
- Picture tunes
- Polish
- Polkas
- Processional marches
- Q.
- R. Religious
- Reveries (Meditations, Barcolles & Romance)
- Rhapsodies (Fantasias, Paraphrases)
- Rube (Reels, Jigs, Hornpipes, Quadrilles & Lancers)
- Rumbas
- Russian music
- S. Saxophone solos with orch. accomp.
- Schottisches
- Scotch music

8. Information contained in the master index should be made available to all broadcasters.
 - A. The exact form in which the information should be made available should be decided after the master index is completed. It may be advisable to duplicate the three sets of cards or only one set. It may be found advisable to publish the breakdown described in Paragraph 7 in loose-leaf catalog form. Practical considerations of administration and use should govern decision in this step.
9. The master index should be constantly supplemented by cataloging:
 - A. Additional compositions not included in the minimum library.
 - B. Currently published compositions.
10. All or a part of this additional information should be supplied to broadcasters.

11. The organization should equip itself with adequate facilities to supply a copyright checking service to members.
 - A. Obviously, it would be impractical to include in broadcasters' indices the hundreds of thousands of cards listing compositions only occasionally used; but the organization should, as rapidly as possible, build up complete information on the musical literature of the world in order that its checking service will be both complete and accurate.
12. The organization should compile a standard library of music for broadcast stations.
 - A. Compositions included in the standard library should be available to broadcasters for their unlimited use without the payment of performing fees.
 - (a) Such compositions should be taken from the public domain of music by careful selection.
 - B. Compositions in the standard library should be arranged or otherwise adapted to sound or visual broadcasting presentation.
 - (a) Copies of such arrangements or adaptations should be made available to broadcasters.
 - C. Cards for such compositions should be inserted in the master index and duplicates sent to all broadcasters just as in the case of all other compositions. These compositions, however, should be listed on cards of different color in order that they may be readily distinguished from compositions the performance of which requires payment of fees to an individual or licensing group.
 - D. Compositions in the standard library should be electrically transcribed as rapidly as possible through arrangement between the organization and some transcription firm or firms and pressings of such compositions should be made available to all broadcasters.
13. The rights to perform compositions included in the standard library should be unlimited with respect to all broadcasters.
 - A. Disposition of rights, if any, other than rights necessary and proper to the use and maintenance of the library may be disposed of by private contract but no such contract shall in any manner impair the usefulness of the library.
14. The organization should warrant its rights in all compositions included in the standard library and should defend against all claims for infringement and agree to save broadcasters harmless in the event of recovery of judgment for infringement.
15. In addition to its other services, the organization may act as agent for broadcasters in the negotiations for radio rendition or performance rights of any rhapsody, concerto, symphony, or like work, or any opera, operetta, musical comedy, play or similar production which rendition or performance involves the so-called grand rights. Also it may act as agent for any broadcaster with respect to rentals necessary for such renditions or performances.
16. Under proper rules and regulations, the organization may classify broadcasters in accordance with their relative economic status and may provide classifications of musical works, under which rules and regulations copyright owners may list their compositions and set over against each a price per performance for each class of members.
 - A. With respect to compositions listed on a performance basis the organization shall have the power to collect from the broadcaster and pay over to the copyright owner all moneys due from such broadcaster and due to such copyright owner.

- B. Broadcasters shall send periodic statements of performances to the organization, upon request, certifying that the information contained therein is taken from the official program log. Should dispute arise broadcasters may be required to submit their complete official logs.
 - C. Compositions on a performance basis should be listed along with the cost per performance or other cost factor on cards in the master library and duplicates sent to all broadcasters. It may be found advisable to identify such per performances compositions through the use of cards of a different color.
17. The organization should suggest library methods, agreement forms, studio and remote control practices, and supply other information of a detailed nature which will enable broadcasters to minimize library expenses; facilitate their program operations; and avoid use of unowned or unlicensed copyrighted material.

Part III

Organization

In acting on my Report dated February 3, 1936, you approved the following recommendation:

“13. That the need for the immediate establishment of a corporation having substantially the same purposes and powers as the Radio Program Foundation be recognized and that the Managing Director be instructed to prepare and submit to the Board at an early date a detailed plan and program for the establishment of such a corporation and its successful operation.”

Further study and investigation has convinced me that the primary purposes and objectives outlined in this report can be accomplished successfully by a properly manned “Bureau of Copyrights” in the NAB. If such a Bureau is created no legal formalities will be required. The formation of a new corporation, of course, will require compliance with certain legal formalities. The important factor here is the achievement of results and I am now of the opinion that in the beginning, at least, the NAB, without the aid of a separate corporation, can accomplish much in respect of the three principal parts of the plan, namely:

1. Make available to broadcasters a complete and accurate catalog or index of active musical compositions.
2. Creation of a standard library of musical compositions taken, for the most part, from the public domain of music.
3. Establishment of a system for making available to the industry copyrighted musical works on a measured service basis.

Already substantial progress has been made with respect to (1) above. Mr. E. C. Mills, General Manager of the ASCAP, has extended to the NAB, under authority given him by the ASCAP Board of Directors, an invitation to copy their records concerning musical compositions. This invitation has been accepted. Conferences have been held and correspondence has been exchanged concerning minimum data required and the working out of a plan to compile complete information with respect to the musical selections used one or more times on the Network key stations during the years 1934 and 1935. This will make available to broadcasters an index of approximately 25,000 active musical selections and furnish the most important groundwork for the establishment of a per piece or measured service system. A continuing service will be supplied by the NAB which will keep such records up-to-date and provide for a gradual enlargement of the index. The ASCAP invitation imposes two conditions: (1) The NAB will be required to make copies of such index available to any broadcaster whether or not he is a member, and (2) it is to be definitely understood that under no circumstance does the ASCAP warrant or guarantee to others that the information contained in the index is correct.

Also, investigation and study made since the last Board meeting leads to the conclusion that the NAB can provide a standard library (No. 2, above) of musical compositions taken, for the most part, from the public domain. There is music of excellent quality available. It can be supplied through the medium of electrical transcriptions of high quality and at a cost which any station can afford to pay.

Moreover, should experience resulting from practical operation show the need for a separate corporation, the “Bureau of Copyrights” could be incorporated without impeding further progress.

Part IV

Personnel

Adequate provision should be made for the employment of competent personnel to carry the plan into successful operation.

Obviously there should be employed as Director of the Bureau of Copyrights a man of high academic training in music who has had extensive practical experience in the field of copyrights and their use in building radio programs.

Part V

Finances

It must be recognized at the outset that the plan can succeed only if it is adequately financed.

In the beginning it will be necessary only to provide funds for the employment of a Director of the Bureau of Copyrights and his staff; and necessary office space and equipment. But prosecution of the entire plan will require substantial expenditures and ways and means should be provided so that the NAB's income will be sufficient to meet them. This is a matter that must be passed upon by the membership.

Part VI

Conclusion

The plan herein submitted is far from perfect. Undoubtedly it will necessitate extensive revision and amplification in actual administration; but it is proposed as a framework upon which I believe a constructive solution to the industry's copyright problem can be found. It is my opinion that if adopted it will receive wholehearted cooperation from both member and nonmember stations. I am confident that with adequate financial support the plan will succeed. While progress will be slow, I believe that it will materially improve the quality of radio programs. I believe it will result in a new and more equitable formula for the payment for use of copyrighted music whereby authors and composers may be rewarded generously for their creative ability. And I believe that authors and composers ultimately will be encouraged to write music primarily for radio presentation.

I urge its adoption.

Respectfully submitted,

JAMES W. BALDWIN,
Managing Director.

DR. AIKEN RETAINED BY NAB

James W. Baldwin, Managing Director, has announced the retention of Dr. Charles B. Aiken to represent NAB at the hearings called by the Federal Communications Commission for June 15.

Dr. Aiken was born in New Orleans in 1902. He has a B.S. degree from Tulane University and an M.S., M.A., and Ph.D. from Harvard. During the summers of 1918-1921 he was a radio marine operator and was assistant operator of Station WAAB, Tulane University, 1922-1923.

In 1926-1928 Dr. Aiken was engaged in the development of apparatus for geophysical exploration and in field work with Mason, Slichter and Hay at Madison, Wis. He was a member of the technical staff of the Bell Telephone Laboratories in 1928-1935. From 1930-1935 he was supervisor in charge of broadcast receiver development and was also engaged in work on aircraft communication, field strength measuring, centralized radio systems, and common frequency broadcasting. He is assistant professor of electrical engineering, in charge of communication, at Purdue University this year, and has obtained a leave of absence to accept the NAB assignment.

Dr. Aiken is the author of papers dealing with amplifiers, detectors, frequency measurement, shared channel broadcasting, synchronized broadcasting, band width and receiver noise, and radio compass for aircraft. He is a member of the Institute of Radio Engineers, American Institute of Electrical Engineers, Phi Beta Kappa, and Sigma Xi.

COURT UPHOLDS FCC

Chief Justice Martin of the United States Court of Appeals of the District of Columbia in a decision handed down this week upheld the Federal Communications Commission in the so-called Head of the Lakes Broadcasting Company case.

In January, 1934, Station KGFK, Moorehead, Minn., filed an application with the Commission to move to Duluth, Minn. The station operated on 1500 kilocycles, 100 watts power, and unlimited time. At the same time the City of Moorehead filed a protest with the Commission on the ground that public interest required that the station remain there. Also, Station WEBC, Superior, Wis., filed a protest on the ground that it would be adversely affected by removal of the station. The case was heard before an Examiner who recommended that KGFK be granted permission to move, which was later approved by the Commission. The Court of Appeals, after reviewing the facts, states "that this decision (of the Commission) is sustained by substantial evidence and that it is not arbitrary or capricious and accordingly it is hereby affirmed."

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

American Box Board Company, Grand Rapids, Mich. (2-2123, Form A-2)

NOTES FOR THE SALES STAFF

Broadcast advertising in March increased 12.6% over the level of the corresponding month of 1935. Radio continues to show the most rapid increase of any major medium over the corresponding periods of previous years. (See Comparison with Other Media, page 1308.)

Regional network and national non-network business continue to show the greatest gains in advertising volume. (See Total Broadcast Advertising, page 1308.)

Electrical transcription and live talent business were the only forms of rendition in the national field to gain as compared with last March. Transcriptions alone increased in the local field. (See Non-network Advertising by Type of Rendition, page 1309.)

Automotive and food advertising throughout all portions of the medium, national non-network and regional network drug advertising and local financial advertising were among the fields showing important gains during the month. (See Comparison with 1935, page 1309.)

American Box Board Company, Grand Rapids, Mich. (2-2124, Form A-2)
Truax-Traer Coal Company, Chicago, Ill. (2-2125, Form A-2)
T. O. Heinrich et al., Richmond, Va. (2-2126, Form D-1)
Bayuk Cigars, Inc., Philadelphia, Pa. (2-2127, Form A-2)
Motherlode Development Corporation, Atlanta, Ga. (2-2128, Form A-1)
Lockheed Aircraft Corporation, Burbank, Calif. (2-2129, Form A-1)
Bliss & Laughlin, Inc., Harvey, Ill. (2-2130, Form A-2)
Seminole Provident Trust, Tulsa, Okla. (2-2131, Form A-1)
A-B Stoves, Inc., Battle Creek, Mich. (2-2132, Form A-1)

FCC AMENDS RULE 106.18

The Federal Communications Commission has announced the adoption of the following revision of its Rule 106.18:

Rule 106.18. Subpenas requiring the attendance and testimony of witnesses, and subpoenas requiring the production of any books, papers, schedules of charges, contracts, agreements, and documents relating to any matter under investigation or hearing may be signed and issued as follows:

- (1) Hearings before the Commission en banc:
By any Commissioner.
- (2) Hearings before a Division:
By a member of the Division.
- (3) Hearings before a Director:
(a) By a member of the Division which authorized the hearing.
(b) When a Director of any Division has been designated to hear testimony in any case such Director may sign and issue subpoenas in that case.
- (4) Hearings before an Examiner:
(a) By a member of the Division which authorized the hearing.
(b) When an examiner has been designated to hear a case, he may sign and issue subpoenas in that case.
(c) By the Chief Examiner or the Assistant Chief Examiner.

No subpoena shall be signed or issued in any event without recommendation thereon in advance by the Law Department; Provided, however, that if a hearing is held in the field and no representative of the Law Department is in attendance, examination and recommendation by the Law Department in advance shall not be required.

NEW MEXICAN STATIONS PLANNED

According to the monthly Bulletin of the U. I. R., the construction of the following stations in Mexico is planned for 1936:

		Kilowatts	Kilocycles
Matamorow	XEQ	5	1010
Villa Acuna	XER	150	630
Atzacapotzalco	XEMG	0,007	1060
Ensenda	XEAN	0.2	1000
Tijuana	XEPO	0,25	1060
San Luis Polosi	XEFH	0,25	1250
Mexico	XEBZ	0.1	820
Mexico	XENC	0,05	810

RECOMMENDS DENIAL OF RICHMOND APPLICATIONS

Broadcasting Station WMBG, Richmond, Va., requested authority of the Federal Communications Commission to change its frequency from 1210 to 1350 kilocycles, increase its power from 100 watts night and 250 watts LS, to 500 watts, hours of operation unlimited, and to change its transmitter site.

At the same time the Century Broadcasting Company, Inc., applied to the Commission for authority to establish a new station at Richmond, to use 1470 kilocycles, 100 watts power, and daytime operation only.

Examiner John P. Bramhall, in Report No. I-222, recommended that both of the applications be denied. In connection with the application of WMBG the Examiner found that there are some pending applications which involve the question of interference. Also the state and zone are overquota and that area is already being sufficiently served by radio.

The Examiner found in connection with the Century Company application that the need for additional daytime service was not shown in the area proposed to be served and the granting of the application would not be in the public interest.

BROADCAST ADVERTISING IN MARCH

Developments of the Month

Broadcast advertising in March experienced the usual seasonal up-swing. Gross time sales of the medium totaled \$9,332,368 and were 14.6% above the February level. Radio broadcast advertising continued to show increases over the corresponding month of the preceding year and was 12.6% greater than in March 1935.

Regional network and national non-network advertising continued to show the greatest gains as compared to the preceding year. National network increases continued to taper off gradually, while local broadcast advertising showed confused tendencies. March volume in the latter field declined below the 1935 level.

Other than farm papers, radio broadcast advertising experienced the greatest gains during the month as compared to the corresponding period of the previous year. National farm paper volume increased 39.6% over the March 1935 level.

Increases in non-network revenue were fairly even throughout the entire medium as compared to March of last year. Regional station volume showed the most pronounced increases as compared to the previous month. Non-network advertising in the South and Middle Western States continued to show the greatest gains over the previous year's volume.

While announcement volume showed the greatest increase as compared to February, electrical transcription and live talent business were the only forms of rendition to show gains over March 1935. In the national non-network field, announcement volume experienced the most important increase over the preceding year's level, though it was closely seconded by both transcriptions and live talent programs. Transcription programs were

the only ones to show gains in the local field as compared to March of last year.

The most important gains in the national network field, as compared to March 1935, occurred in the automotive, accessory and cosmetic fields. Drug advertising fell off to a marked degree as did confectionery and household equipment volume.

Gains were fairly general throughout the regional network field, with drug, food, confectionery, household equipment and soap and kitchen supply volume showing the most marked increases.

Automotive, accessory, drug, food, beverage and household equipment advertising experienced the most important increases as compared to March of the previous year in the case of national non-network advertising. Trends were confused in local broadcast advertising. Principal gains included automotive, food and financial advertising. Retail broadcast advertising increased 3.5% over the March 1935 level.

Total Broadcast Advertising

Total broadcast advertising over stations and networks during the month under review is set forth in Table I.

TABLE I

TOTAL BROADCAST ADVERTISING

Class of Business	1936 Gross Time Sales		
	February	March	Cumulative Jan.-Mar.
National networks.....	\$4,785,804	\$5,400,252	\$14,926,616
Regional networks.....	92,432	112,546	300,318
National non-network.....	1,946,650	2,097,400	5,670,550
Local	1,316,950	1,722,170	4,611,880
Total	\$8,141,836	\$9,332,368	\$25,509,364

Total broadcast advertising volume increased 14.6% as compared to the preceding month. National network advertising rose 12.8% and regional network volume 21.8%. National non-network volume gained 7.7% as compared to February and local broadcast advertising rose 30.8%.

Compared to March 1935, radio advertising as a whole gained 12.6%. Principal increases occurred in the regional network and national non-network fields, the respective volume of which rose 45.5% and 42.6%. Local broadcast advertising declined 5.2% as compared to the corresponding month of last year.

Comparison with Other Media

Advertising volume placed in national media during March is found in Table II.

TABLE II

ADVERTISING BY MAJOR MEDIA

Advertising Medium	1936 Gross Time and Space Sales		
	February	March	Cumulative Jan.Mar.
Radio broadcasting.....	\$8,141,836	\$9,332,368	\$25,509,364
National magazines ¹	11,240,096	13,481,404	32,977,625
National farm papers ¹	657,717	746,502	1,826,218
Newspapers ²	36,511,000	48,242,000	124,033,000
Total	\$56,550,649	\$71,802,274	\$184,346,207

¹ Publishers' Information Bureau.

² Estimated.

Newspaper advertising showed the greatest increase in volume of any medium as compared to the preceding month, rising 32.1%. National magazine advertising increased 19.9%, while farm paper volume rose 13.5%.

The greatest increase as compared to March of last year occurred in the national farm paper field. Advertising revenues for this type of medium rose 39.6% as compared to March 1935. National magazine volume gained 9.2% and newspaper volume 5.8%.

Non-network Advertising

Non-network advertising as a whole rose 17.0% as compared to February of the current year and 16.2% over the level of March of the preceding year.

Regional stations experienced the greatest rise in non-network volume as compared to the preceding month. Non-network advertising for this class of transmitter rose 26.3%. Clear channel and high-powered regional station volume increased 13.2% over the preceding month, while local station volume rose 7.3%.

Gains were fairly general as compared to March of the previous year and were as follows: Clear channel and high-powered regional stations 15.9%, regional stations 15.7%, local stations 18.7%.

Broadcast advertising by power of station is found in Table III.

TABLE III

NON-NETWORK ADVERTISING BY POWER OF STATION

Power of Station	1936 Gross Time Sales		
	February	March	Cumulative Jan.-Mar.
Over 1,000 watts	\$1,580,270	\$1,788,350	\$4,858,520
250-1,000 watts	1,185,180	1,496,880	3,903,180
100 watts	498,150	534,340	1,520,730
Total	\$3,263,600	\$3,819,570	\$10,282,430

As compared to the previous month, non-network advertising rose most markedly in the New England-Middle Atlantic Area. Non-network revenues gained 34.9% in this district. Other gains were as follows: South Atlantic-South Central district, 12.0%; North Central States, 11.4%; Mountain and Pacific Area, 15.6%.

Non-network gains continued to be most pronounced in the South and Mid-Western portions of the country as compared to the preceding year. Non-network advertising rose 47.0% above the March 1935 level in the South Atlantic-South Central Area and 21.1% in the North Central Area. Mountain and Pacific State volume rose 5.8%, while New England-Middle Atlantic State non-network business declined 0.5%.

Non-network advertising by geographical areas is set forth in Table IV.

TABLE V

NON-NETWORK BROADCAST ADVERTISING BY TYPE OF RENDITION

Type of Rendition	National Non-network		1936 Gross Time Sales		Local		Total		Cumulative Jan.-Mar.
	February	March	February	March	February	March	February	March	
Electrical transcriptions	\$694,775	\$789,680	\$118,995	\$156,660	\$813,770	\$946,340	\$2,549,570		
Live talent programs	994,530	989,380	715,770	953,490	1,710,300	1,942,870	5,280,140		
Records	2,670	7,980	53,430	62,700	56,100	70,680	183,970		
Announcements	254,675	310,360	428,755	549,320	683,430	859,680	2,268,750		
Total	\$1,946,650	\$2,097,400	\$1,316,950	\$1,722,170	\$3,263,600	\$3,819,570	\$10,282,430		

Sponsor Trends in March

March broadcast advertising experienced the usual seasonal upswing. Principal gains in the national network field included the following: automotive, cosmetics, food and household equipment. The most important decline was one of 11.4% in drug and pharmaceutical volume. Accessory, beverage, soap and kitchen supply and tobacco advertising showed the greatest gains as compared to February in the regional network field. Increases were fairly general with regard to national non-network advertising, with household equipment and soap and kitchen supply volume leading the field. Local automotive, accessory, clothing, beverage and household equipment volume experienced material increases during the month.

Comparison with March 1935

Principal increases in the national network field as compared to the corresponding month of last year were as follows: automotive 34.3%, accessory 32.0%, cosmetics 24.1%, tobacco 18.3%. Drug and pharmaceutical advertising declined 38.9%, due principally to the application of the new network policies regarding this form of

TABLE IV

NON-NETWORK BROADCAST ADVERTISING BY GEOGRAPHICAL DISTRICTS

Geographical District	1936 Gross Time Sales		
	February	March	Cumulative Jan.-Mar.
New England-Middle Atlantic Area	\$659,400	\$889,700	\$2,235,450
South Atlantic-South Central Area	676,600	757,660	2,065,670
North Central Area	1,324,000	1,474,330	4,084,730
Pacific and Mountain Area	603,600	697,880	1,896,580
Total	\$3,263,600	\$3,819,570	\$10,282,430

Non-network Volume by Type of Rendition

Gains were general with regard to all types of rendition as compared to February. Announcement volume rose 25.8%, record 26.0%, live talent business 13.6%, and electrical transcriptions 16.3%.

In the national field, transcription volume rose 13.7% above the February level, while announcements increased 21.9%. Live talent business remained comparatively unchanged, rising 0.5%.

Local transcription volume rose 31.7% above the February level, while live talent business gained 33.2%. Records increased 17.3% and announcements 28.1%.

Transcription and live talent business were the only types of rendition to increase in volume as compared to March 1935. The former rose 50.9% and the latter 19.0%. Record volume declined 6.8% and announcements 9.6%.

In the national field, all forms of rendition rose materially as compared to March of the preceding year. Announcement volume increased 72.3%, transcriptions 56.5%, and live talent programs 47.1%. In the local field, transcription volume alone experienced a gain, rising 28.1%. Announcements declined 17.0% below the March 1935 level, record volume dropped 12.1%, and live talent business 0.8%.

National non-network and local broadcast volume by type of rendition is found in Table V.

radio sponsorship. Other declines of importance were as follows: clothing 43.5%, confectionery 37.5%, and household equipment 55.3%.

Principal gains in the regional network field included an approximate twelve-fold increase in drug and pharmaceutical volume, a rise of 44.2% in food advertising, a marked increase in confectionery, household equipment and soap and kitchen supply business. Several declines of minor importance occurred in the regional field.

Gains were quite general throughout the national non-network field. Principal among them were the following: automotive 101.8%, accessory 72.2%, drug and pharmaceuticals 26.3%, food stuffs 58.5%, beverages 37.6%, household equipment 44.4%, and tobacco 37.9%. The most important decline was one of 23.0% in confectionery volume.

Local broadcast advertising trends were highly confused. The most important gains were one of 56.6% in the automotive field and a rise of 56.7% in food volume. Clothing advertising declined 1.7%, while household equipment volume dropped 5.3%. Department and general store business decreased 11.6% as compared to March of last year. Broadcast advertising volume during March by national and local sponsoring groups is found in Table VI.

TABLE VI
RADIO BROADCAST ADVERTISING BY TYPE OF SPONSORING BUSINESS
(March, 1936)

<i>Type of Sponsoring Business</i>	<i>National Networks</i>	<i>Regional Networks</i>	<i>Gross Time Sales</i>		<i>Total</i>
			<i>National Non-network</i>	<i>Local</i>

Details as to trends in the various fields of sponsorship are as follows:

1a. **Amusements.** National non-network volume 138.6% above February. Local up 38.5%. Compared to March 1935, national non-network up ninefold and local down 30.3%.

1. **Automotive.** Gains compared to February as follows: National network 15.8%, national non-network 0.4%, local 38.5%. Increases as against March 1935 as follows: National network 34.3%, national non-network 101.8%, local 56.6%.

2. **Gasoline and accessories.** Increases over February as follows: National network 8.9%, regional network 31.4%, national non-network 16.2%, local 39.8%. National network 32.0% above the March 1935 level. Regional network volume up 35.0% and national non-network 72.2%. Local down 3.7%.

3. **Clothing.** Compared to February, gains as follows: National network 25.8%, national non-network 10.1%, local 62.0%. Regional network down 43.5%. Declines from March 1935 level as follows: National network 43.5%, regional network 86.1%, and local 1.7%. National non-network up 81.3%.

4. **Drugs and pharmaceuticals.** National network volume 11.4% under February. Other gains as follows: Regional network 5.8%, national non-network 10.5%, local 0.8%. Regional network volume twelve times that of last March and national non-network up 26.3%. National network volume down 38.9% and local 36.5%.

5. **Toilet goods.** National network volume 19.0% ahead of February. Regional network down 32.7%. National non-network up 0.8% and local 17.8%. National network advertising 24.1% above last March and national non-network up 24.5%. Regional network volume down 71.2% and local 81.1%.

6. **Foodstuffs.** Gains over February as follows: National network 24.3%, regional network 3.9%, national non-network 18.7%, local 18.8%. Gains as compared to March of preceding year as follows: National network 6.0%, regional network 44.2%, national non-network 58.5%, local 56.7%.

7. **Beverages.** National network 11.1% below February and national non-network down 40.7%. Regional network up 40.9% and local 32.4%. Gains over March 1935 as follows: National network 16.6%, national non-network 37.6%, local 13.9%.

8. **Confectionery.** National network 13.3% above February. Regional network up 29.2% and national non-network 24.4%. Local down 3.3%. Declines as against March of preceding year as follows: National network 37.5%, national non-network 23.0%, local 60.9%. Regional network up 100.4%.

9. **Household equipment.** Gains over February as follows: National network 41.8%, regional network 11.1%, national non-network 22.7%, local 55.1%. National network 55.3% below pre-

vious March and local down 5.3%. Regional network up 241.8% and national non-network 44.4%.

10. **Soap and kitchen supplies.** Gains over February as follows: National network 19.8%, regional network 89.2%, national non-network 65.8%, local 362.3%. Increases as compared to last March as follows: National network 14.0%, regional network 138.2%, national non-network 29.6%, local 149.6%.

11. **Insurance and financial.** National network 8.9% above February and local up 43.9%. Regional network down 26.8% and national network 30.3%. Increases over preceding March as follows: National network 26.3%, regional network 30.5%, national non-network 102.4%, local 29.5%.

12. **Radio.** National network 25.3% over February and local up 47.6%. National non-network down 31.1%. Increases as compared to corresponding month of previous year as follows: National network 27.7%, national non-network 296.5%, local 18.8%.

13. **Department and general stores.** National non-network volume 31.0% below February. Local up 32.5%. Compared to March 1935, national non-network up 90.2% and local down 11.6%. Total down 6.5%.

14. **Tobacco products.** National network volume 12.3% over February. Regional network up 51.7%, national non-network 23.6%. Local down 27.4%. Gains as against last March as follows: National network 18.3%, regional network 12.5%, national non-network 37.9%. Local down 37.5%.

15. **Miscellaneous.** Gains compared to February as follows: National network 17.2%, regional network 44.5%, local 18.7%. National non-network down 5.4%. National network volume 120.2% ahead of March of last year. National non-network up 23.5%. Regional network down 3.6% and local 17.9%.

Retail Broadcast Advertising

Total retail broadcast advertising increased 34.2% as compared to the preceding month. Principal gains occurred in the automotive, filling station, retail clothing and house furnishing fields.

Radio advertising by retail establishments exceeded the March 1935 level by 3.5%. Gains were as follows: Automotive 70.7%, clothing 6.0%, grocery and delicatessen stores 75.4%, restaurants 25.7%, radio dealers 17.3%. Declines as compared to the preceding March were as follows: Filling stations and accessory stores 39.3%, drug stores 10.7%, beauty parlors 36.1%, beverage retailers 67.4%, confectionery stores 49.2%, household equipment dealers 17.1%, furniture stores 2.9%, hardware retailers 29.7%, department stores 6.5%, and miscellaneous establishments 6.2%. Broadcast advertising by retail establishments will be found in Table VII.

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2779. Charging unfair disparagement of competitors' products in violation of the Federal Trade Commission Act, a complaint has been issued against **Sterling Products Corporation**, 118-120 East 25th St., New York City, trading as **Paul Hartmann Agency**, and engaged in selling surgical instruments and supplies at wholesale and retail.

The respondent company is alleged to have made assertions in catalogues and circulars to the effect that ethyl chloride tubes, ethyl chloride, distilled water and glass ampules sold by competitors were either "German-made" goods or were not "100 per cent American products," and originated, in whole or in part, in Germany. These representations, according to the complaint, were not true, as many of these products offered for sale on the American market were wholly American-made goods.

Nos. 2783-2784. Under complaints issued, the **Smoked Products Co.** and **The Smoked Salt Co., Inc.**, both of Cincinnati, and **Pennsylvania Salt Manufacturing Co.** and **General Laboratories, Inc.**, both of Philadelphia, are charged with unfair competition in the use of the term "smoked salt" in advertising their salt products and in describing the effects of their process.

The different respondents are alleged to have advertised their "Old Hickory Smoked Salt" by phrases such as "Curing with Old Hickory Smoked Salt gives that same delicious flavor which has made Virginia hams famous throughout the world," and "The curing salt that puts actual hickory smoke into your meats." The respondents are said to have advertised that their salt is exposed to smoke "just like meat is exposed to smoke in old-fashioned smoke houses," when, according to the complaint, this is not true.

No. 2785. The **American Lawn Mower Corporation**, trading as **Richmond School Furniture Co.**, 18th St., Muncie, Ind., is named respondent in a complaint alleging unfair methods of competition in the sale of "Litho Plate" blackboards to the toy trade, and to a limited extent to schools.

The company allegedly advertises that its blackboards are unbreakable, are "better than slate," and that their surfaces are "slated" and not painted. The complaint charges that the respondent's blackboards are breakable, are not superior to slate, and the surfaces are painted.

According to the complaint, the writing surface is twenty-seven thousandths of an inch in thickness and contains such a minute quantity of slate flour that use of the term "slated surface" in advertising misleads and deceives purchasers.

No. 2787. Unfair methods of competition in the sale of furs and fur garments are alleged in a complaint issued against **Bernard**

Licht, trading as **Licht's Fur Factory**, 102 West 29th St., New York City.

Licht is alleged to represent in radio broadcasts and advertising matter that he is the owner of a factory and the manufacturer of the fur garments he sells, that he carries in stock thousands of such garments, and that the purchasers of his products avoid the middleman's profit, thereby realizing savings of as much as 50 per cent, when, according to the complaint, such assertions are not true.

As to the respondent's purported representations that he repairs without charge garments bought from him and provides free storage for the same, the complaint alleges that the amount of "free" repairs furnished is very limited, that he charges for materials necessary to make repairs, and that he does not give free storage, but charges customers for insurance against fire, burglary and theft on furs and fur garments stored by such customers.

No. 2788. **Duro-Test Corporation**, 583 Broadway, New York City, is named respondent in a complaint alleging unfair competition in the sale of incandescent lamps.

The respondent corporation, through its canvassers and in advertising matter, allegedly misrepresents that its lamps actually possess the electro-motive power and force indicated by the number of watts and volts marked thereon; that they are guaranteed to have a life performance of 2,000 hours, or to give service for a year, and to test correctly as to rated watts, volts and lumens; and that they produce more luminosity, consume less current, and are more economical than the lamps of competitors.

In connection with such alleged misrepresentations, the canvassers, for purposes of comparison, the complaint charges, demonstrate lamps of the respondent and those of competitors by operating them on a multiple socket, with the result that it is made to appear to purchasers that the respondent's lamps, marked falsely as to the number of watts and volts, use less current and produce the same amount, or more, of light, and at lower cost of operation than the lamps of competitors correctly marked with an equal or greater number of watts and volts.

No. 2789. A complaint has been issued charging **The Leader Novelty Candy Co., Inc.**, 23 Marcy Ave., Brooklyn, with unfair methods of competition.

This respondent company is alleged to have made representations in trade literature to the effect that it controls and operates factories and manufactures the candy it sells, when, according to the complaint, these are not the facts.

These representations, it is alleged, have a tendency to cause customers to believe that the respondent company is a manufacturer and that by dealing with it they eliminate the profits of middlemen and obtain other advantages not available in buying from a selling agency or middleman.

No. 2790. False representations in the sale of specially built shoes designed for ill-formed feet are alleged in a complaint against **Dr. H. B. Norton Shoe Co., Inc.**, trading as **The Foot Health Institute**, 1619 Chestnut St., Philadelphia. The complaint, charging violation of Section 5 of the Federal Trade Commission Act, also names as respondents **Dr. H. B. Norton** and **Benjamin Weinstein**, officers and owners of the controlling stock in the corporation.

The respondents are said to use the radio for the major portion of their advertising, and in broadcasts allegedly represent, among other things, that 90 per cent of all ordinary foot troubles are caused by ill-fitting shoes and can be successfully treated or cured by use of the respondents' shoes; that the respondents' shoes cure or relieve sufferers from arthritis, neuritis, lumbago or rheumatism to such an extent as to enable them to walk in absolute comfort; that 87 different bodily ailments result from feet that are not in good health, and that curvature of the spine and twisted pelvis can be caused by bad feet improperly fitted with shoes. According to the complaint, such assertions are grossly exaggerated and untrue.

No. 2791. Use of false and misleading advertising on the part of **Remsen Corporation**, 70 Pine St., New York City, in the sale of "Aspirin + Plus," is the basis of a complaint charging that corporation with unfair methods of competition in violation of Section 5 of the Federal Trade Commission Act.

The complaint alleges that the respondent corporation, in radio broadcasts and in other ways, represents that its product is a newer form of aspirin; that it combines aspirin with other ingredients which doctors say are necessary for quick, safe action; that it is the exact prescription many leading physicians always give when they prescribe aspirin, and that it is the safest and quickest way to relieve pain, and gives better results and more lasting relief.

No. 2792. Charging unfair competition in the sale of a book entitled "How to be Always Well," used in promoting the sale of health foods made in Canada and sold there and in the United States, a complaint has been issued against **Dr. Robert G. Jackson**,

trading under the name **Jackson Publishing Co.**, with offices in **Buffalo, N. Y.**

In advertisements, the respondent is alleged to have represented that the book offers the key to perfect health, "years in which you can have the energy and vitality of a 30-year-old"; immunity from sickness and disease, even such minor ailments as colds; freedom from "tiredness, edginess and nerves," and a new way to live, a way that will banish sickness and disease and add many active years to life.

These representations are alleged to have no foundation in fact, as, it is charged, there is no known system of diet, exercise or hygiene, or all three combined, which, if used, offers complete immunity from sickness and disease, and which will add 25 or more years to human life.

No. 2793. Premier Peat Moss Corporation, 150 Nassau St., New York City, is named respondent in a complaint charging unfair competition in the sale of imported peat moss. The respondent company is said to be the principal importer and distributor of Swedish peat moss in the United States.

The complaint points out that peat moss consists of vegetable matter partially decomposed in water, and that because of its great water-absorbing and moisture-retaining capacities, it is extensively used as a soil conditioner. A controlling influence in the sale of competing varieties of this product, according to the complaint, is the comparative weight, quality, absorbing capacity, and ash and moisture content.

Representations of the respondent company are alleged to have deceived purchasers into buying Swedish peat moss in preference to German peat moss under the erroneous belief that the United States Department of Agriculture recommends Swedish as preferable to German peat moss; that the New York State Experiment Station, Geneva, N. Y., demonstrated that the Swedish product's absorbing capacity is 25 per cent higher than that of the German; that ash content of Swedish moss is 40 per cent less than that of the German; that State experiment stations in New Haven, Conn., and Amherst, Mass., have made tests showing that Swedish peat moss contains 33 per cent less moisture than the German product, and affords savings in weight. These and other representations of like character, made in disparagement of German peat moss, were not true, according to the complaint.

No. 2794. Charging unfair representations in the sale of hosiery, a complaint has been issued against **Charles W. Cromer**, trading under the name of **Shalwin Hosiery Mills, Hagerstown, Md.**

Hosiery sold by this respondent company is alleged to have been marked in a manner tending to deceive buyers into believing that it was made in large part of silk and was of a quality and price higher than was actually the case.

In one type of men's hosiery, the top, heel, toe and sole were made of cotton and the remaining part of a mixture of rayon and silk, each thread consisting approximately of 60 per cent rayon and 40 per cent silk, according to the complaint. This article was alleged to have been marked as "Rayon-Reinforcing—Two threads pure silk." Among other markings alleged to have been used to designate respondent company's products were: "Pure Thread Silk—Reinforced with fine rayon—made in U. S. A."; "Shalwin—New Style split-foot Silk Hose are made of the finest materials and will give the wearer complete satisfaction," and "Pure thread silk—reinforced with art silk made in U. S. A."

No. 2796. Charging unfair competition in the sale of lumber products, a complaint has been issued against **Lumber Mills Co.**, 11 South LaSalle St., Chicago, alleging misrepresentation of the company's business and products.

Selling and distributing sash, windows, doors, molding, and other wood mill work, the respondent company is charged with using the word "Mills" in its corporate name on letterheads, order blanks, and other business literature when it is not itself a manufacturer, but engages solely in selling and distributing products.

The complaint points out that many wholesale and retail purchasers of wood products prefer to deal directly with a manufacturer because of closer prices, superior quality, and other advantages, and that the respondent's representations of itself as a manufacturer tend to deceive buyers.

Stipulations

The Commission has issued the following cease and desist orders and stipulations.

No. 2158. W. A. Sheaffer Pen Co., of Fort Madison, Iowa, under an order to cease and desist, is directed to discontinue a resale price maintenance policy in violation of the Federal Trade Commission Act.

In the sale of fountain pens, automatic pencils, ink, desk sets and kindred articles, the respondent company is ordered to stop entering into contracts, agreements or understandings with its dealer purchasers to the effect that Sheaffer products are not to be advertised or sold at retail at prices less than those specified or fixed by the respondent company.

Under the order, the respondent company's resale price policy is not to be effected by promises or assurances on the part of purchasers to the respondent company or by cooperative methods between the respondent company and its dealers.

No. 2551. Under an order entered, the **Chicago Silk Co.**, 421 South Wells St., Chicago, has been directed to cease and desist from selling or disposing of hosiery or lingerie, free of charge, or at varying prices, by lot or chance.

The order requires the respondent company to discontinue selling its products by the use of push or punch cards. It also prohibits the company from supplying, mailing, or shipping to members of the public push or punch cards so prepared or printed as to enable such persons, by the use thereof, to sell hosiery or lingerie.

No. 2572. Under an order to cease and desist issued against **Samuel Horowitz**, trading as **Commercial Silk Co.**, New York City, he is directed to discontinue representing, by use of his trade name or through advertising literature, that he is a manufacturer, mill operator, or mill owner.

Engaged in the sale and distribution of silk greige goods and finished silk, the respondent is alleged to have advertised his business as that of a manufacturer.

FTC DISMISSES CASE

No. 2343. The Federal Trade Commission announces it had vacated and set aside an order to cease and desist, issued January 30, 1936, against **Rossett Manufacturing Corporation**, 8 Astor Place, New York City, engaged in the sale of hats and caps. The order had directed cessation of the representation that the respondent company was a manufacturer.

FEDERAL COMMUNICATIONS COMMISSION ACTION

HEARING CALENDAR

Tuesday, May 12

HEARING BEFORE AN EXAMINER

(Broadcast)

NEW—Continental Radio Co., Toledo, Ohio.—C. P., 1200 kc., 100 watts, daytime.

WALR—WALR Broadcasting Corp., Zanesville, Ohio.—C. P. to move to Toledo, Ohio; 1210 kc., 100 watts, unlimited time.

NEW—Community Broadcasting Co., Toledo, Ohio.—C. P., 1200 kc., 100 watts, daytime.

Wednesday, May 13

WTJS—The Sun Publishing Co., Inc., Jackson, Tenn.—C. P., 920 kc., 250 watts, 500 watts LS, unlimited time. Present assignment: 1310 kc., 100 watts, 250 watts LS, unlimited time.

Thursday, May 14

KGDE—Charles L. Jaren, Fergus Falls, Minn.—Renewal of license, 1200 kc., 100 watts, 250 watts LS, unlimited time.

KRNT—Iowa Broadcasting Co., Des Moines, Iowa.—C. P., 1320 kc., 1 KW, 5 KW LS, unlimited time. Present assignment: 1320 kc., 500 watts, 1 KW LS, unlimited time.

Friday, May 15

NEW—Albert Lea Broadcasting Corp., Albert Lea, Minn.—C. P., 1200 kc., 100 watts, unlimited time.

NEW—Winona Radio Service, Winona, Minn.—C. P., 1200 kc., 100 watts, unlimited time.

NEW—Daily News Corporation, St. Paul, Minn.—C. P., 1370 kc., 100 watts, unlimited time.

NEW—Fred A. Baxter, Superior, Wis.—C. P., 1200 kc., 100 watts, unlimited time.

NEW—Sioux Falls Broadcast Assn., Inc., Sioux Falls, S. Dak.—C. P., 1200 kc., 100 watts, unlimited time.

APPLICATIONS GRANTED

WKBB—Sanders Bros. Radio Station, East Dubuque, Ill.—Granted C. P. to install new equipment.

KGHL—Northwestern Auto Supply Co., Inc., Billings, Mont.—Granted C. P. to move transmitter approximately 70 feet, install new equipment, and increase day power from 2½ KW to 5 KW.

WCAO—Monumental Radio Co., Baltimore, Md.—Granted C. P. to rebuild entirely auxiliary equipment to comply with Rule 132 and move same 60 feet from present site to site of main transmitter, using 250 watts for auxiliary purposes only.

KFPY—Symons Broadcasting Co., Spokane, Wash.—Granted C. P. to move transmitter and approve vertical radiator and transmitter site.

KVOA—Arizona Broadcasting Co., Inc., Tucson, Ariz.—Granted C. P. to make changes in equipment.

WREC—WREC, Inc., Rochester, N. Y.—Granted modification of C. P. approving antenna and transmitter site at Mt. Read Blvd., ½ mile north of Lyell Ave., Rochester; extend commencement date to 60 days after grant and completion date to 6 months thereafter.

WTRC—The Truth Publishing Co., Inc., Elkhart, Ind.—Granted modification of C. P. approving antenna system and transmitting equipment and move of transmitter to junction of State Highway 19 and Mishawaka Road, Elkhart.

WRJN—Racine Broadcasting Corp., Racine, Wis.—Granted modification of C. P. to install new equipment and extend commencement date to 30 days after grant, and completion date to 180 days thereafter.

WBEN—WBEN, Inc., Buffalo, N. Y.—Granted modification of C. P. approving antenna and transmitter site at R. F. D. No. 2, near Martinsville, N. Y.

WOC—Tri-City Broadcasting Co., Davenport, Iowa.—Granted authority to make changes in automatic frequency control equipment.

WWJ—Evening News Assn., Inc., Detroit, Mich.—Granted license to cover C. P. authorizing local move of transmitter, installing new equipment, and increasing day power to 5 KW; 920 kc., 1 KW night, unlimited time. Also granted authority to determine operating power by direct measurement of antenna input in compliance with terms of Rule 137.

WTAG—Worcester Telegram Pub. Co., Inc., Worcester, Mass.—Granted license to cover C. P. authorizing installation of new equipment; 580 kc., 500 watts, unlimited time.

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Granted license to use old W.E. transmitter for auxiliary purposes only.

WQAM—Miami Broadcasting Co., Miami, Fla.—Granted license to cover C. P. authorizing installation of new equipment.

WQAN—E. J. Lynett (Prop., The Scranton Times), Scranton, Pa.—Granted consent to voluntary assignment of license to the Scranton Times (copartnership), E. J. Lynett, Wm. R. Lynett, Elizabeth R. Lynett, Edw. J. Lynett, Jr.

KNOW—KUT Broadcasting Co., Austin, Tex.—Granted authority to transfer control of corporation from Southwest Broadcasting Co. to Hearst Radio, Inc. (present assignment: 1500 kc., 100 watts, unlimited time).

KTSA—Southwest Broadcasting Co., San Antonio, Tex.—Granted consent to voluntary assignment of license to KTSA Broadcasting Company.

WOV—International Broadcasting Corp., New York, N. Y.—Granted authority to install new automatic frequency control equipment.

W6XKG—Ben S. McGlashan, Los Angeles, Calif.—Granted C. P. to make changes in equipment and increase power from 100 watts to 1 KW.

W4XBZ—Radio Station WSOC, Inc., Portable-Mobile (Charlotte, N. C.)—Granted license to cover C. P. (broadcast pickup station), frequencies 31100, 34600, 37600 and 40600 kc., 7 watts.

KNED—Carter Publications, Inc., Portable-Mobile (Fort Worth, Tex.)—Granted license to cover C. P. (temporary broadcast pickup), frequencies 1606, 2020, 2102 and 2760 kc., 50 watts.

KABB—Don Lee Broadcasting System, Portable-Mobile (San Francisco)—Granted license to cover C. P. for new broadcast pickup station, frequencies 1646, 2090, 2190 and 2830 kc., 100 watts.

W10XCT—Shepard Broadcasting Service, Inc., Portable-Mobile (Boston, Mass.)—Granted license to cover C. P. authorizing changes in equipment and increase power from 2 watts to 100 watts.

W8XEO—Harold F. Gross, M. Bliss Keeler, L. A. Versluis, d/b as Capital City Broadcasting Co., Portable-Mobile (Lansing,

Mich.)—Granted license to cover C. P. for broadcast pickup station, frequencies 31100, 34600, 37600 and 40600 kc., 15 watts.

W3XER—Philco Radio & Television Corp., Philadelphia, Pa.—Granted license to cover C. P. for new special experimental station to be used for experimental transmission of the associated synchronized sound of visual broadcast station, frequencies 42000-56000 kc. and 60000-86000 kc., 250 watts.

SET FOR HEARING

NEW—Telegraph Herald, Dubuque, Iowa.—Application for C. P. for new station, 1340 kc., 500 watts, daytime. Site to be determined.

NEW—Advertiser Pub. Co., Ltd., Honolulu, T. H.—Application for C. P. for new station, 1370 kc., 100 watts, unlimited time.

NEW—Harry J. Grant, Milwaukee, Wis.—Application for C. P. for new station, 1010 kc., 250 watts night, 500 watts day, unlimited time. Site to be determined.

WCKY—L. B. Wilson, Inc., Covington, Ky.—Application for C. P. to install new equipment and increase power from 5 KW to 50 KW.

WHO—Central Broadcasting Co., Des Moines, Iowa.—Special experimental authorization to install new equipment, increase power from 50 KW to 500 KW for period ending August 1, 1936. (To be heard by Broadcast Division.)

WGL—F. C. Zeig (Allen-Wayne Co.), Fort Wayne, Ind.—Application for voluntary assignment of license of station WGL from Fred C. Zeig to Westinghouse Electric & Mfg. Co.

WJZ—National Broadcasting Co., Inc., New York City.—Application for C. P. to install new equipment, move transmitter to site to be determined, install new radiator, and increase power from 50 KW to 500 KW. To be heard by Broadcast Division.

KOMA—National Radio Mfg. Co., Oklahoma City, Okla.—Application for consent to voluntary assignment of license to Hearst Radio, Inc.

WACO—Central Texas Broadcasting Co., Inc., Waco, Tex.—Application for consent to voluntary assignment of license to KTSA Broadcasting Co.

KTAT—KTAT Broadcast Co., Inc., Fort Worth, Tex.—Application for consent to voluntary assignment of license from KTAT Broadcast Co., Inc., to Raymond E. Buck.

ORAL ARGUMENTS GRANTED

NEW—Ex. Rep. 1-214: Winona Broadcasting Co., Emmons L. Abeles, Secy., Winona, Minn.—Oral argument to be held September 10, 1936, involving applications for stations at Mankato, Ft. Dodge, Iowa; Clinton, Iowa; Hastings, Nebr.; Grand Island, Nebr.; Appleton, Wis.; and Wausau, Wis.

WPAR—Ex. Rep. 1-215: Ohio Valley Broadcasting Corp., Parkersburg, W. Va.—Oral argument to be held September 10, 1936.

NEW—Ex. Rep. 1-216: Mason City Broadcast Co., Mason City, Iowa.—Oral argument to be held June 11, 1936, involving applications of Northern Iowa Broadcasting Co., Mason City Globe-Gazette Co. and Mason City Broadcast Co.

ACTION ON EXAMINERS' REPORTS

WNEW—Ex. Rep. 1-79: Wodaam Corp., Newark, N. J.—Denied modification of license to increase daytime power from 2½ KW to 5 KW; 1250 kc., 1 KW night. Share with WNBI. Examiner R. L. Walker reversed. Order effective August 25, 1936.

WNBF—Ex. Rep. 1-88: Howitt-Wood Radio Co., Inc., Binghamton, N. Y.—Denied special experimental authority to operate on 1240 kc.; 500 watts, 1 KW-LS, unlimited time, make changes in equipment and move transmitter. Examiner Bramhall sustained. Order effective Sept. 1, 1936.

NEW—Ex. Rep. 1-116: Knox Broadcasting Co., Inc., Schenectady, N. Y.—Denied (Commissioner Prall dissenting) C. P. for new station to operate on 1240 kc., 1 KW; unlimited time. Examiner P. W. Seward reversed. Order effective Sept. 1, 1936.

NEW—Ex. Rep. 1-117: Wayne Broadcasting Co., Hamtramck, Mich.—Denied (Commissioner Prall dissenting), C. P. for new broadcast station to operate on 1370 kc., 100 watts; daytime. Examiner P. W. Seward reversed. Order effective Sept. 1, 1936.

NEW—Ex. Rep. 1-126: Utah Radio Educational Society, Walter P. Monson, Jr., Pres., Salt Lake City, Utah—Denied C. P.

for new station to operate on 1450 kc., 1 KW, unlimited time. Examiner Geo. H. Hill sustained.

NEW—Louis H. Callister, Provo, Utah—Dismissed with prejudice, application for C. P. for new station to operate on 1200 kc., 100 watts; unlimited time. Examiner sustained.

NEW—Paul Q. Callister, Salt Lake City, Utah—Denied C. P. for new station to operate on 1370 kc., 100 watts, unlimited time. Examiner sustained.

NEW—Great Western Broadcasting Assn., Inc., Logan, Utah—Denied C. P. for new station to operate on 1500 kc., 100 watts, unlimited time. Examiner sustained.

NEW—Great Western Broadcasting Assn., Inc., Provo, Utah—Denied C. P. for new station to operate on 1210 kc., 100 watts, unlimited time. Examiner reversed.

NEW—Munn Q. Cannon, Logan, Utah—Dismissed with prejudice C. P. for new station to operate on 1210 kc., 100 watts, unlimited time. Examiner sustained.

NEW—Ex. Rep. 1-126: Jack Powers, Frank C. Carman, David G. Smith & Grant Wrathall, d/b as Utah Broadcasting Co., Salt Lake City, Utah—Granted C. P. for new station to operate on 1500 kc., 100 watts, unlimited time. Examiner sustained.

NEW—Cache Valley Broadcasting Service Co., J. A. & J. M. Reeder & L. R. Jensen, Logan, Utah—Denied C. P. for new station to operate on 1370 kc., 100 watts, unlimited time. Examiner sustained. Order in above cases effective Sept. 8, 1936.

NEW—Ex. Rep. 1-130—Dudley J. Connolly, Elliot Knight, Roy W. Knight & Fred Sullivan, d/b as Dudley J. Connolly & Co., Chattanooga, Tenn.—Denied C. P. for new station to operate on 1200 kc., 100 watts, daytime. Examiner P. W. Seward reversed. Order effective Sept. 8, 1936.

NEW—Ex. Rep. 1-163: Paul R. Heitmeyer, Salt Lake City, Utah—Denied C. P. for new broadcast station to operate on 1210 kc., 100 watts, unlimited time. Examiner Seward reversed. Order effective Sept. 15, 1936.

NEW—Ex. Rep. 1-165: Fla. West Coast Broadcasting Co., Inc., Tampa, Fla.—Denied C. P. for new broadcast station to operate on 1370 kc., 100 watts, unlimited time. Examiner Bramhall sustained. Order effective Sept. 22, 1936.

NEW—Ex. Rep. 1-168: W. A. Patterson, Chattanooga, Tenn.—Granted C. P. for new station to operate on 1420 kc., 100 watts, daytime. Examiner Geo. H. Hill sustained. Order effective Sept. 8, 1936.

NEW—Ex. Rep. 1-171: Herbert Lee Blye, Lima, Ohio—Granted C. P. for new broadcast station to operate on 1210 kc., 100 watts, daytime. (Transmitter site to be determined). Examiner Dalberg sustained. Order effective Sept. 29, 1936.

NEW—Ex. Rep. 1-173: Wyo. Radio Educational Assn. (Lester G. Baker, Pres.) Cheyenne, Wyo.—Denied C. P. for new station to operate on 630 kc., 500 watts night, 1 KW day, unlimited time. Examiner Seward sustained.

NEW—Paul R. Heitmeyer, Cheyenne, Wyo.—Denied C. P. for new station to operate on 1210 kc., 100 watts night, 250 watts day; unlimited time. Examiner Seward reversed. Order effective Sept. 29, 1936.

NEW—Ex. Rep. 1-207: Champaign News-Gazette, Inc., Champaign, Ill.—Granted C. P. for new station to operate on 1370 kc., 100 watts, daytime. Examiner Geo. H. Hill sustained. Order effective August 18, 1936.

NEW—Ex. Rep. 1-211: Alfred C. Matthews, Cape May, N. J.—Denied C. P. for new broadcast station to operate on 1420 kc., 100 watts, specified hours. Examiner Bramhall sustained. Order effective August 25, 1936.

ACTION ON APPLICATIONS HEARD BY BROADCAST DIVISION

NEW—Portland Broadcasting System, Inc., Portland, Maine—Granted C. P. for new station to operate on 640 kc., 500 watts, limited time, using directional antenna. Order effective June 16, 1936.

WOI—Iowa State College of Agriculture & Mechanic Arts College Campus, Iowa—Granted renewal of license; 640 kc., 5 KW; daytime hours.

NEW—Kunsky-Trendle Broadcasting Corp., Detroit, Mich.—Denied C. P. for new station to operate on 640 kc., 10 KW, unlimited time. Directional antenna after sunset at Los Angeles, non-directional antenna during daytime.

NEW—Irving D. Sisson, Pittsfield, Mass.—Denied C. P. for new station to operate on 640 kc., 1 KW. Daytime hours.

NEW—Eastland Company, Portland, Me.—Denied C. P. for new station to operate on 640 kc., 100 watts; daytime to sunset at Cleveland, but if application of WJAY for 640 kc. denied, daytime to sunset at Los Angeles (Fac. WRDO).

WAIU—Associated Radiocasting Corp., Columbus, Ohio—Denied modification of license to change frequency from 640 to 570 kc.; change power from 500 watts to 750 watts night, 1 KW day; change time from Ltd. to specified hours now assigned to WKBN.

KFUO—Evangelical Lutheran Synod, etc., Clayton, Mo.—Denied modification of license to change frequency from 550 to 640 kc.; increase power from 500 watts night, 1 KW day, to 1 KW; change hours of operation from sharing with KSD to specified. (Hours not used by WOI during daytime, and to operate from LS to sunset at Los Angeles; part facilities of WOI.)

WORC—Alfred Frank Kleindienst, Worcester, Mass.—Denied modification of license to change frequency from 1200 kc. to 640 kc.; increase power from 100 watts to 500 watts. Unlimited time.

WAAB—Bay State Broadcasting Corp., Boston, Mass.—Denied C. P. to move transmitter; increase power from 500 watts to 5 KW; change frequency from 1410 to 640 kc.; install new equipment; unlimited time. Directional antenna.

WFLA-WSUN—Clearwater Chamber of Commerce, St. Petersburg Chamber of Commerce, Clearwater, Fla.—Denied special experimental authority to install new equipment; change frequency from 620 to 640 kc.; increase power from 250 watts night, 500 watts day, to 5 KW; unlimited time. Directional antenna.

WJAY—Cleveland Radio Broadcasting Corp., Cleveland, Ohio—Denied modification of license to change frequency from 610 to 640 kc.; change power from 500 watts day to 500 watts; change time of operation from daytime to limited.

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio—Denied C. P. to move transmitter locally; change frequency from 570 to 610 kc.; change equipment and power from 500 watts to 500 watts night, 1 KW day; change time from specified hours to unlimited. Directional antenna after sunset Youngstown.

WRDO—WRDO, Inc., Augusta, Maine—Granted renewal of license; 1370 kc., 100 watts; unlimited time. Order in all above cases effective June 16, 1936.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Granted renewal of license; 830 kc., 1 KW daytime. Dismissed application for modification of license to operate with power of 1 KW until sunset at Denver, and 500 watts thereafter, unlimited time. Order effective Oct. 6, 1936.

WNAC—Shepard Broadcasting Service, Inc., Boston, Mass.—Denied C. P. to make changes in equipment; change location of transmitter; change frequency from 1230 to 830 kc., increase power from 1 KW night, 2½ KW day, to 5 KW unlimited time. (Facilities of WHDH.)

WEEU—Berks Broadcasting Co., Reading, Pa.—Denied modification of license to change power from 1 KW day to 500 watts night, 1 KW day, and change hours of operation from daytime to unlimited, 830 kc. Order effective Oct. 6, 1936.

WINS—American Radio News Corp., New York City, N. Y.—Denied special experimental authority to use power of 5 KW instead of 500 watts; unlimited time instead of limited; install new equipment. Order effective Oct. 13, 1936.

WDGY—Dr. Geo. W. Young, Minneapolis, Minn.—Denied C. P. to make changes in equipment, move transmitter, install directional antenna, and change hours of operation from limited to unlimited; 1180 kc., 1 KW night, 5 KW-LS. Order effective Oct. 13, 1936.

MISCELLANEOUS

WBAA—Purdue University, W. Lafayette, Ind.—Reconsidered and granted application for modification of license authorizing specified hours of operation on its present frequency of 890 kc., given some additional daytime heretofore used by WILL which has been authorized by the Commission to move from 890 to 580 kc., effective May 5, 1936.

WOW—Woodmen of the World Life Ins. Co., Omaha, Nebr.—Granted motion to reconsider and reopen application of WKZO, Inc., to move station locally, change power from 1 KW day, to 250 watts night, 1 KW day, and from daytime to unlimited operation. Grant made on Feb. 8, 1936.

but effective date was heretofore postponed until May 29, 1936.

KWKC—Charlotte Duncan, Kansas City, Mo.—Granted motion asking that Charlotte Duncan be substituted as party applicant in application of Wilson Duncan, d/b as Wilson Duncan Broadcasting Co., for renewal of license of KWKC.

Kunsky Trendle Broadcasting Corp., Detroit, Mich.—Denied special petition asking Commission to have application considered for use of frequency of 990 kc., in lieu of 640 kc., and for authority to use a 3 unit directional antenna.

Continental Radio Co., Toledo, Ohio—Denied motion for enlargement of issues on hearing and for reconsideration in part, concerning application of WALR to move from Zanesville to Toledo, Ohio, WALR application to proceed to hearing as at present scheduled upon protest of WJIM.

Jesse H. Jay, Miami Beach, Fla.—Denied petition for reconsideration and grant of application for C. P. for new station to operate on 1500 kc., 100 watts, unlimited.

Edward Hoffman, St. Paul, Minn.—Granted petition to intervene and be made a party to proceedings on application of WISE Broadcasting Co., an application for new broadcast station at St. Paul, Minn., to operate on 630 kc., 250 watts, unlimited time.

Virgil V. Evans, Spartanburg, S. C.—Accepted answer of this respondent to appearance and statement of facts of Sun Publishing Co., Inc. (WTJS).

Fred A. Baxter, Superior, Wisc.—Granted order to take depositions in support of application for new station at Superior, Wisc.

Memphis Commercial Appeal, Inc., Memphis, Tenn.—Granted motion for postponement of hearing on application for C. P. now scheduled for May 30, 1936, for new station at Mobile, Ala.

KGBZ—KGBZ Broadcasting Co., York, Nebr.—Granted motion asking Commission to postpone effective date of its order denying KGBZ renewal of license; effective date changed from May 8 to May 22, 1936.

KWKC (Now KCMO)—Charlotte Duncan, Administratrix, Kansas City, Mo.—Redesignated for hearing application for consent to assign license from Wilson Duncan, deceased, to Lester E. Cox and Thos. L. Evans, since application was amended recently to add a new partner. Also redesignated for hearing application of Charlotte Duncan, administratrix, Lester E. Cox and Thos. L. Evans for authority to install new equipment, move transmitter and studio and change hours of operation to unlimited.

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Granted petition asking leave to amend its application so as to ask for new frequency originally asked for 630 kc., amended to 1260 kc.

Thomas L. Evans & J. L. Milligan, Jackson, Tenn.—Granted petition to intervene as respondents in re application of WTJS, Sun Publishing Co., Inc., for increase of power from 100 watts to 250 watts night, and from 250 watts day to 500 watts day.

Southwest Broadcasting Co., Prescott, Ariz.—Granted order to take depositions in support of application for C. P. for establishment of a broadcast station at Prescott, to operate on 1500 kc., 100 watts night, 250 watts LS, unlimited time.

Nathan N. Bauer, Miami, Fla.—Granted order to take depositions in support of his application for C. P. for new station to operate on 1420 kc., 100 watts, unlimited.

Earl Weir, St. Petersburg, Fla.—Granted order to take depositions in support of application for C. P. for new station at St. Petersburg, Fla., to operate on 1370 kc., 100 watts, unlimited time.

Herbert Lee Blye, Lima, Ohio—Granted amended position to intervene in proceedings of application of WALR to move from Zanesville to Toledo, Ohio.

Mason City Globe Gazette Co., Mason City, Iowa—Questions raised by motion as to the sufficiency of exceptions to Examiner's Report 1-216, to be considered in connection with other questions involved in the oral argument fixed for June 11, after which all the matters will be disposed of together.

APPLICATION DENIED

Uvalde Chamber of Commerce, Uvalde, Tex.—Denied authority to transmit special Uvalde programs by remote control over station XEPN, Piedras Negras, Mexico, from 12:15 to 12:45 p. m. and from 8:45 to 9 p. m., CST, May 7 and 8, 1936.

APPLICATIONS DISMISSED

The following application, heretofore set for hearing, was dismissed for failure of applicant to answer form letter adopted by Broadcast Division requiring applicants to signify their desire to be heard within 10 days after receipt of said form letter:

KFKA—Mid-Western Radio Corp.—Applied for modification of license, 880 kc., 1 KW, shares time with KPOF.

The following applications, heretofore set for hearing, were dismissed at request of applicants:

KJR—Fisher's Blend Station, Inc. (Lessee), Seattle, Wash.—Applied for C. P., 970 kc., 10 KW, unlimited time.

NEW—Foreign Lands Corp., Honolulu, T. H.—Applied for C. P., 600 kc., 1 KW, unlimited time.

NEW—Isadore Goldwasser, Tuscaloosa, Ala.—Applied for C. P., 1370 kc., 100 watts, unlimited time.

NEW—Ellwood W. Lippincott, Bend, Ore.—Applied for C. P., 1500 kc., 100 watts, unlimited time.

NEW—H. L. Corley, Trinidad, Colo.—Applied for C. P., 1370 kc., 100 watts, unlimited time.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KADA, Ada, Okla.; **KASA**, Elk City, Okla.; **KCRJ**, Jerome, Ariz.; **KDLR**, Devils Lake, N. Dak.; **KFJI**, Klamath Falls, Ore.; **KFOR**, Lincoln, Nebr.; **KFPW**, Fort Smith, Ark.; **KFVS**, Cape Girardeau, Mo.; **KFXJ**, Grand Junction, Colo.; **KFXM**, San Bernardino, Calif.; **KFXX**, Oklahoma City, Okla.; **KGBX**, Springfield, Mo.; **KGCX**, Wolf Point, Mont.; **KGEK**, Sterling, Colo.; **KGEZ**, Kalispell, Mont.; **KGFJ**, Los Angeles, Calif.; **KGFW**, Kearney, Nebr.; **KGHI**, Little Rock, Ark.; **KINY**, Juneau, Alaska; **KIT**, Yakima, Wash.; **KIUL**, Garden City, Kans.; **KMED**, Medford, Ore.; **KPPC**, Pasadena, Calif.; **KRMD**, Shreveport, La.; **KSUN**, Lowell, Ariz.; **KTSH**, El Paso, Tex.; **KVOL**, Lafayette, La.; **KVOS**, Ardmore, Okla.; **KWG**, Stockton, Calif.; **KXRO**, Aberdeen, Wash.; **WABI**, Bangor, Maine; **WALR**, Zanesville, Ohio; **WBAX**, Wilkes-Barre, Pa.; **WBBL**, Richmond, Va.; **WBOW**, Terre Haute, Ind.; **WBRB**, Red Bank, N. J.; **WBRE**, Wilkes-Barre, Pa.; **WCAT**, Rapid City, S. Dak.; **WCLO**, Janesville, Wis.; **WCLS**, Joliet, Ill.; **WCPO**, Cincinnati, Ohio; **WEBQ**, Harrisburg, Ill.; **WEMP**, Milwaukee, Wis.; **WEST**, Easton, Pa.; **WEXL**, Royal Oak, Mich.; **WFAS**, White Plains, N. Y.; **WFDF**, Flint, Mich.; **WGBB**, Freeport, N. Y.; **WGH**, Newport News, Va.; **WGNV**, Chester Township, N. Y.; **WHAT**, Philadelphia; **WHBU**, Anderson, Ind.; **WJAC**, Johnstown, Pa.; **WJBY**, Gadsden, Ala.; **WJIM**, Lansing, Mich.; **WJW**, Akron, Ohio; **WKBO**, Harrisburg, Pa.; **WLBC**, Muncie, Ind.; **WLNH**, Laconia, N. H.; **WLVA**, Lynchburg, Va.; **WMFR**, High Point, N. C.; **WMPC**, Lapeer, Mich.; **WOL**, Washington, D. C.; **WOMT**, Manitowoc, Wis.; **WPAX**, Thomasville, Ga.; **WSBC**, Chicago; **WSIX**, Springfield, Tenn.; **WSOC**, Charlotte, N. C.; **WTJS**, Jackson, Tenn.; **WTAX**, Springfield, Ill.; **WBEO**, Marquette, Mich.

APPLICATIONS RECEIVED

First Zone

NEW—Fred J. Hart, Honolulu, T. H.—Construction permit for a 600 new station to be operated on 600 kc., 250 watts, unlimited time.

WREC—WREC, Inc., Memphis, Tenn.—License to cover construction permit (B1-P-161) as modified for new equipment, move of transmitter, increase in power, and to use directional antenna night.

WREC—WREC, Inc., Memphis, Tenn.—Authority to determine 600 operating power by direct measurement of antenna.

WICC—The Southern Connecticut Broadcasting Corp., Bridgeport, 600 Conn.—Modification of license to change hours of operation from specified hours to unlimited time. Requests facilities of WCAC.

WTHT—The Hartford Times, Inc., Hartford, Conn.—Modification 1200 of construction permit (B1-P-360) for a new station, requesting change of hours of operation from daytime to unlimited, using 100 watts power. Requests facilities of WNRI.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—1280 Construction permit to make changes in equipment (antenna).

Second Zone

NEW—Voice of Detroit, Inc., Detroit, Mich.—Construction permit for a new station to be operated on 1140 kc., 500 watts,

1 KW day, unlimited time. Amended to change frequency from 1140 kc. to 1120 kc. and transmitter and studio sites from Detroit, Mich., to site to be determined, Detroit, Mich.

WHIO—Miami Valley Broadcasting Corp., Dayton, Ohio.—Modification of construction permit (B2-P-838) for changes in equipment and increase in power, requesting further changes in equipment and extend commencement date from 5-17-36 to 2 months after grant and completion date to 6 months thereafter.

WGH—Hampton Roads Broadcasting Corp., Newport News, Va.—Construction permit to install a vertical antenna and move transmitter from 4th Floor, Warwick Hotel, 2400 West Avenue (Waterfront), Newport News, Va., to Jefferson Avenue, end, Newport News, Va.

NEW—The Exponent Co., Clarksburg, W. Va.—Construction permit for a new station to be operated on 1370 kc., 100 watts, daytime.

WHK—Radio Air Service Corp., Cleveland, Ohio.—License to use 1390 old W.E. D-87737 as an auxiliary transmitter.

Third Zone

WPTF—WPTF Radio Co., Raleigh, N. C.—Authority to determine operating power by direct measurement of antenna (1-KW auxiliary equipment).

WSPA—Virgil V. Evans, d/b as The Voice of South Carolina, Spartanburg, S. C.—Construction permit to install a new transmitter, erect a vertical antenna and increase power from 1 KW to 5 KW.

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—License to cover construction permit (B3-P-872) for move of transmitter and install new antenna.

WRR—City of Dallas Texas, Dallas, Tex.—License to cover construction permit (B3-P-889) as modified for new equipment and move of transmitter.

NEW—The Sherman Broadcasting Assn. (J. B. Knight, Pres.), Sherman, Tex.—Construction permit for a new station to be operated on 1310 kc., 100 watts, daytime (request of attorney).

NEW—Asheville Daily News (Harold H. Thoms, owner), Asheville, N. C.—Construction permit for a new station to be operated on 1400 kc., 100 watts, unlimited time. Amended to change frequency from 1400 kc. to 1370 kc.

Fourth Zone

WGN—WGN, Inc., Chicago, Ill.—Construction permit to install new equipment; increase power from 50 KW to 500 KW; move transmitter from Villa Road, about 4 miles east of Elgin, Ill., to site to be determined; equipment also to be determined.

WCLO—Gazette Printing Co., Janesville, Wis.—Modification of construction permit (B4-P-1038) for changes in equipment and increase in power, requesting approval of antenna and exact transmitter site at 1436 S. Oakhill Avenue, Janesville, Wis.

WHBU—Anderson Broadcasting Corp., Anderson, Ind.—Modification of construction permit (B4-P-438) for changes in equipment and increase of power, requesting further changes in equipment.

NEW—Hannibal Broadcasting Co., Hannibal, Mo.—Construction permit for a new station to be operated on 1310 kc., 100 watts, unlimited time. Amended giving exact transmitter site as 120 E. Broadway, Hannibal, Mo.

WMBH—Joplin Broadcasting Co., Joplin, Mo.—Construction permit to make changes in equipment; install directional antenna for night use; change frequency from 1420 kc. to 1380 kc.; increase power from 100 watts, 250 watts day, to 500 watts; move transmitter from 1334 Roosevelt Ave., Joplin, Mo., to 1 mile east of city limits of Joplin, Mo., and studio from 1334 Roosevelt Ave., Joplin, Mo., to 401 Main Street, Keystone Hotel, Joplin, Mo.

KGNF—Great Plains Broadcasting Co. (a corporation), North Platte, Nebr.—Construction permit to make changes in equipment.

Fifth Zone

KLZ—KLZ Broadcasting Co., Denver, Colo.—Modification of construction permit (5-P-B-3274) for new equipment, increase in power, and move of transmitter, requesting changes in equipment and extension of commencement and completion dates. (Application resubmitted in new name.)

KFPY—Symons Broadcasting Co., Spokane, Wash.—Authority to transfer control of corporation from Symons Investment Co. to T. W. Symons, Jr., 164-2/3 shares common stock.

KIT—Carl E. Haymond, Yakima, Wash.—Construction permit to install a new transmitter; erect a vertical antenna; change frequency from 1310 kc. to 1250 kc.; increase power from 100 watts, 250 watts day, to 250 watts, 500 watts day; and move transmitter from 109½ East Yakima Ave., Yakima, Wash., to site to be determined, Yakima, Wash.

KERN—The Bee Bakersfield Broadcasting Co., Bakersfield, Calif.—Construction permit to install a new transmitter and erect a new antenna.

NEW—The Southwest Broadcasting Co., La Junta, Colo.—Construction permit for a new station to be operated on 1370 kc., 100 watts, unlimited time.

KICA—Western Broadcasters, Inc., Clovis, N. Mex.—Modification of license to change hours of operation from specified hours to unlimited time.

KWYO—Big Horn Broadcasting Co., Inc., Sheridan, Wyo.—Construction permit to make changes in equipment; erect a vertical antenna; increase power from 100 watts, 250 watts day; and move transmitter from corner Adair and West Fourth Streets, Sheridan, Wyo., to 1.2 miles north of Sheridan, Wyo.

NEW—Geo. P. Allison and Thos. R. Waters, Jr., d/b as Skagit Broadcasting Assn., Whitney, Wash.—Construction permit for a new station on 1420 kc., 100 watts, unlimited time.

NAB REPORTS

Copyright, 1936. The National Association of Broadcasters

Vol. 4 - No. 22
MAY 11, 1936

BROADCAST ADVERTISING: FIRST QUARTER 1936

Developments of the Month

Broadcast advertising during the first quarter of the current year totaled \$25,509,364, a gain of 11.4% over the corresponding period of 1935. Indications point to the beginning of the stabilization of radio advertising at a post-depression level, in that the aforementioned growth in volume is comparable to one of 19.6% for the first quarter of the preceding year as against the corresponding three months of 1934.

Principal gains during the period under consideration occurred in the regional network and national non-network fields, in keeping with the trends in evidence during the major portion of the past year. National network and local broadcast advertising gained but slightly over the corresponding months of 1935.

Radio continued to show the greatest rate of increase among major media, though it was surpassed with national farm papers, whose volume rose 37.0% as compared to the corresponding period of 1935.

Regional stations showed the greatest gains in non-network volume, reflecting the rise in national non-network business. The South and Middle West continued to experience the most pronounced rise in non-network advertising.

Electrical transcriptions led the field as far as type of rendition was concerned. This was true in both national non-network and local broadcast advertising. Live talent volume gained, while record and announcement business declined as compared to the corresponding quarter of the previous year.

Accessory and gasoline, beverage and tobacco advertising experienced important increases in the national network field. A rise of 117.9% in the miscellaneous classification indicated a continued trend toward more diversified use of network advertising. Drug advertising declined 31.7% as a result of network policies in this field, while confectionery and household equipment advertising also declined materially.

Gains were general in the regional network field, with drug, food, beverage, tobacco and soap and kitchen supply advertising showing the most important increases. Gains likewise were general in the national non-network field, with automotive, food, beverage and tobacco volume experiencing the most significant rise. Local broadcast advertising showed confused tendencies, with automotive volume leading the increases and drug advertising showing the most important decline.

Total Broadcast Advertising

Total broadcast advertising during the first quarter of the current year is set forth in Table I.

TABLE I

TOTAL BROADCAST ADVERTISING VOLUME

Class of Business	Gross Time Sales First Quarter	
	1935	1936
National networks	\$14,107,206	\$14,926,616
Regional networks	193,299	300,318
National non-network	4,035,182	5,670,550
Local	4,545,023	4,611,880
Total	\$22,880,710	\$25,509,364

Compared to a gain of 11.4% on the part of the medium as a whole, national network advertising increased 5.8% as compared to the corresponding three months of the preceding year. National network volume seems particularly to be approaching a point of stabilization, since this gain is comparable to a rise of 23.9% during the first three months of last year as against the same period of 1934.

National non-network volume rose 40.5% as against the same quarter of 1935, while regional network advertising increased 55.9%. Gains in 1935 over the corresponding period of the preceding year averaged in the neighborhood of 10.0%. Local broadcast advertising rose but 1.5% as compared to a 1935 increase of 13.3%.

Composition of Broadcast Advertising

The marked rise of regional network and national non-network advertising has changed the composition of the medium's business to an interesting degree. Whereas national network volume during the first quarter of 1935 comprised 61.3% of the gross billings of the medium, it comprised but 58.5% during the corresponding months of the current year. Regional network volume increased from 0.8% of the medium's total, while national non-network advertising rose from 17.3% to 22.2%. Local broadcast advertising, on the other hand, declined in importance from 20.6% to 18.1%. This constituted a further decline in relative importance from 22.0% during the first quarter of 1934.

Comparison with Other Media

Advertising volume in major media during the period under consideration is found in Table II.

TABLE II

ADVERTISING VOLUME BY MAJOR MEDIA

Advertising Medium	Gross Time and Space Sales First Quarter	
	1935	1936
Radio broadcasting	\$22,880,710	\$25,509,364
National magazines ¹	30,968,794	32,977,625
National farm papers ¹	1,333,264	1,826,218
Newspapers ²	117,474,000	124,033,000
Total	\$172,656,768	\$184,346,207

¹ Publishers' Information Bureau.

² Estimated.

Compared to a rise of 11.4% in broadcast advertising during the period under consideration, national magazine volume increased 6.5%, while newspaper lineage rose 5.6%. National farm paper volume showed the greatest relative increase, rising 37.0% above the level of the first quarter of 1935.

Non-network Advertising

General non-network advertising rose 19.7% during the period under consideration. As noted previously, national non-network advertising was responsible for practically all of this gain. Regional stations experienced the most marked increase in non-network advertising, and in doing so reflected the rising national non-network volume. Non-network revenues for this class of transmitter rose 20.2% as compared to the corresponding period

ESTABLISHMENTS (QUARTERLY)
January, 1935, to April, 1936

of last year. Clear channel and high-powered regional station non-network business increased 16.0%, while local station volume gained 2.4%. The relatively slight gain with regard to the last-mentioned class of transmitter was due to the confused tendencies in the local broadcast advertising field. Broadcast advertising by power of transmitter is found in Table III.

TABLE III
NON-NETWORK BROADCAST ADVERTISING BY
POWER OF STATION

<i>Power of Station</i>	<i>Gross Time Sales</i> <i>First Quarter</i>	
	1935	1936
Over 1,000 watts	\$4,186,955	\$4,858,520
250-1,000 watts	3,244,755	3,903,180
100 watts	1,148,495	1,520,730
Total	\$8,580,205	\$10,282,430

The most pronounced gains in non-network advertising continued to occur in the South and the Middle West. Non-network advertising in the South Atlantic-South Central States rose 54.5% as compared to the first quarter of 1935, while revenues in the North Central States increased 27.2%. Mountain and Pacific State non-network volume gained 5.9%, while non-network advertising in the New England-Middle Atlantic States dropped 0.4%. Broadcast advertising, other than network, for major geographical districts is presented in Table IV.

TABLE IV
NON-NETWORK BROADCAST ADVERTISING BY
GEOGRAPHICAL DISTRICTS

<i>Geographical District</i>	<i>Gross Time Sales</i> <i>First Quarter</i>	
	1935	1936
New England-Middle Atlantic Area....	\$2,245,050	\$2,235,450
South Atlantic-South Central Area....	1,335,080	2,065,670
North Central Area.....	3,209,960	4,084,730
Pacific and Mountain Area.....	1,790,115	1,896,580
Total	\$8,580,205	\$10,282,430

Advertising by Type of Rendition

Electrical transcriptions and live talent programs were the only forms of rendition to gain as compared to the first quarter of the preceding year. Of the two, transcriptions showed the greater gain, increasing 55.3% in volume. Increases occurred in both the national and local fields, rising 64.0% in the former and 21.8% in the latter. National live talent volume continued its marked rise of more than a year's duration, increasing 44.5% as against the corresponding three months of 1935. Local live talent volume rose 6.7%. Total live talent business increased 23.1% during the period under consideration.

Records declined 6.2%, while announcements dropped 7.5%. National announcement business decreased 3.1%, while local volume dropped 9.8%.

Broadcast advertising volume by type of rendition is set forth in Table V.

TABLE V
NON-NETWORK BROADCAST ADVERTISING BY TYPE OF RENDITION
(First Quarter)

<i>Type of Rendition</i>	<i>National Non-network</i>		<i>Gross Time Sales</i> <i>Local</i>		<i>Total</i>	
	1935	1936	1935	1936	1935	1936
Electrical transcriptions	\$1,300,745	\$2,133,735	\$341,391	\$415,835	\$1,642,136	\$2,549,570
Live talent programs.....	1,886,008	2,716,880	2,402,467	2,563,260	4,288,475	5,280,140
Records	17,666	15,370	178,477	168,600	196,143	183,970
Announcements	830,763	804,565	1,622,688	1,464,185	2,453,451	2,268,750
Total	\$4,035,282	\$5,670,550	\$4,545,023	\$4,611,880	\$8,580,205	\$10,282,430

The continued rise of electrical transcription and live talent volume and the decline, especially in the announcement field, have resulted in marked changes in the composition of non-network advertising with regard to type of rendition. These changes are presented in Table VI. The rise in local transcription business is the direct result of the development of transcription libraries, so prominent during the fall and winter of the current season.

Total	100.0%	100.0%	100.0%	100.0%		

Broadcast Advertising Sponsorship

Trends in broadcast advertising sponsorship during the period under consideration were largely the continuation of tendencies previously noted in the current season. Automotive advertising continued to experience marked gains, especially in the national non-network and local fields. Food advertising rose materially, as did beverage volume. Drug and pharmaceutical advertising declined in the national network and local fields, though rising materially with regard to regional networks and national non-network volume. Tobacco advertising increased generally.

Principal gains in the national network field, as compared to the first quarter of last year, were as follows: automotive, 12.1%; accessories and gasoline, 43.4%; beverages, 27.2%; tobacco 14.8% and miscellaneous, 117.9%. The latter is a significant indication of a widening variety of sponsorship of national network advertising. Drug and pharmaceutical volume declined 31.7%, while confectionery advertising dropped 37.4%.

Regional network volume rose quite generally, principal increases being the following: drugs and pharmaceuticals, 179.5%; foodstuffs, 50.3%; beverages, 178.4%; soaps and kitchen supplies, 229.8%; tobacco, 132.1%. Gains likewise were general in the national non-network field. Automotive advertising rose 185.6%, while other increases were as follows: foodstuffs, 51.3%; beverages, 77.8%; and tobacco, 67.9%.

Local broadcast advertising registered considerably smaller gains. Automotive advertising rose 41.3%, food volume 11.5% and clothing business 6.6%. Drug volume decreased 23.2%, and gasoline and accessory advertising 8.4%.

Broadcast advertising by various sponsoring product and service groups is found in Table VII.

TABLE VII
RADIO BROADCAST ADVERTISING BY TYPE OF SPONSORING BUSINESS
(First Quarter)
1936

Type of Sponsoring Business	National Networks	Regional Networks	Gross Time Sales		Total

15. Miscellaneous	1,177,149	34,504	738,880	1,162,680	3,113,213
Total	\$14,926,616	\$300,318	\$5,670,550	\$4,611,880	\$25,519,364

Details as to trends in the various sponsoring product and service groups are as follows:

1a. **Amusements.** National non-network business increased 105.1% as compared to the first quarter of last year. Local volume decreased 19.9%.

1. **Automotive.** National network advertising rose 12.0%. National non-network advertising increased 185.6%, while local volume gained 41.3%.

2. **Accessories and gasoline.** National network volume rose 43.1% over the level of the first quarter of the preceding year. Regional network advertising increased 29.6%, national non-network business 29.1%, while local advertising decreased 8.4%.

3. **Clothing.** National network advertising dropped off 26.6% from the level of the first three months of 1935, while regional network advertising decreased 80.8%. National non-network business rose 59.4% and local advertising 6.6%.

4. **Drugs and pharmaceuticals.** National network volume decreased 31.7% and local volume 23.2%. Regional network advertising increased 179.5%, while national non-network volume rose 24.3%.

5. **Toilet goods.** National network advertising rose 12.3% and national non-network business 18.8%. Regional network volume decreased 3.9% and local volume 13.6%.

6. **Foodstuffs.** Increases were as follows: Regional networks 50.3%, national non-network 51.3%, and local 11.5%. National network volume decreased 3.9%.

7. **Beverages.** General increases occurred in the field and were as follows: National networks 27.2%, regional networks 178.4%, national non-network 77.8%, local 12.9%.

8. **Confectionery.** Regional network advertising increased 211.0% as against the corresponding period of last year. Other portions of the medium decreased as follows: National networks 37.4%, national non-network 13.0%, and local 3.6%.

9. **Household equipment.** National network advertising decreased 35.9%. Regional network volume rose 53.2%, while national non-network business gained 24.4%. Local advertising increased 1.3%.

10. **Soaps and kitchen supplies.** Increases were as follows: National networks 6.7%, regional networks 229.8%, national non-network 22.6%, local 120.0%.

11. **Insurance and financial.** National network advertising increased 1.5% and regional network volume rose more than fivefold. National non-network advertising gained 21.2% and local advertising 25.0%.

12. **Radios.** National network advertising gained 9.9%. National non-network volume increased practically tenfold. Local advertising declined 1.6%.

13. **Department and general stores.** National non-network advertising rose 162.1%, while local volume declined 16.5%. Total department store advertising decreased 9.6%.

14. **Tobacco products.** General increases occurred in this field

and were as follows: National networks 14.8%, regional networks 132.1%, national non-network 67.9%, local 46.2%.

15. **Miscellaneous.** National network advertising rose 117.9% and regional network volume 12.2%. National non-network advertising gained 19.2%, while local volume dropped 1.8%.

Retail Broadcast Advertising

Broadcast advertising by retail establishments during the first quarter of the current year is presented in Table VIII.

TABLE VIII
RETAIL RADIO ADVERTISING OVER
INDIVIDUAL STATIONS
(First Quarter)

Type of Sponsoring Business	Gross Time Sales	
	1935	1936
Automobiles and accessories:		
Automobile agencies and used car dealers	\$215,620	\$304,210
Gasoline stations, garages, etc.	184,285	95,880
Clothing and apparel shops	589,320	668,450
Drugs and toilet goods:		
Drug stores	50,430	56,415
Beauty parlors	29,983	21,370
Food products:		
Grocery stores, meat markets, etc.	128,011	204,880
Restaurants and eating places	47,630	62,040
Beverage retailers	17,129	19,220
Confectionery stores, etc.	6,465	11,950
Household goods:		
Household equipment retailers	112,977	108,670
Furniture stores	254,954	250,950
Hardware stores	36,618	26,940
Radio retailers	38,506	34,860
Department and general stores	437,202	395,143
Tobacco shops	4,814	3,090
Miscellaneous	239,145	241,110
Total	\$2,393,089	\$2,505,178

General retail broadcast advertising rose 4.7% as compared to the corresponding quarter of the preceding year. Gains were as follows: automotive, 41.1%; clothing, 13.4%; drugs and pharmaceuticals, 11.9%; grocery and delicatessen stores, 60.0%; restaurants, 30.3%; beverage retailers, 12.2%; confectionery stores, 84.8%; and miscellaneous retailers, 0.8%.

Decreases in the retail field were as follows: filling stations and accessory stores, 48.0%; beauty parlors, 28.7%; household equipment dealers, 3.8%; furniture stores, 1.6%; hardware dealers, 26.4%; radio retailers, 9.5%; department and general stores, 9.6%.

HOUSE COMMITTEE REPORTS RADIO BILL

The House Committee on Interstate and Foreign Commerce has made a favorable report on S. 2243, which has already passed the Senate, relating to the allocation of radio facilities. This bill was introduced in the Upper House by Senator Wheeler. The House Committee reported the bill without any changes as follows:

"That section 302 of the Communications Act of 1934 is hereby repealed.

"SEC. 2. Subsection (b) of section 307 of such Act is amended to read as follows:

"(b) In considering applications for licenses, and modifications and renewals thereof, when and insofar as there is demand for the same, the Commission shall make such distribution of licenses, frequencies, hours of operation, and of power among the several States and communities as to provide a fair, efficient, and equitable distribution of radio service to each of the same."

DAILY NEWS WITHDRAWS APPEAL

The Daily News Corporation, of St. Paul, Minn., has withdrawn its appeal in the United States District Court for the District of Columbia in connection with a decision of the Federal Communications Commission.

The Commission granted a construction permit to Edward Hoffman for the erection of a new broadcast station at St. Paul, Minn., to use 1370 kilocycles. The Daily News appealed to the court on the ground that they also had an application for the same frequency. They have now withdrawn their appeal.

RAYBURN RADIO AMENDMENT

Representative Rayburn of Texas has introduced a bill (H. R. 12646) in the House to amend section 318 of the Communications Act of 1934. The bill, which has been referred to the House Committee on Interstate and Foreign Commerce, is as follows:

"That section 318 of the Communications Act of 1934 is hereby amended to read as follows:

"SEC. 318. The actual operation of all transmitting apparatus in any radio station for which a station license is required by this

PLEASE RETURN CARDS

Members are requested to expedite the return of cards mailed them on which provision is made for naming delegates and alternates to the NAB Convention at Chicago, Illinois, July 5-8, 1936.

Act shall be carried on only by a person holding an operator's license issued hereunder, and no person shall operate any such apparatus in such station except under and in accordance with an operator's license issued to him by the Commission: *Provided, however*, That the Commission may waive or modify the foregoing provisions of this section for the operation of any station except (1) stations for which licensed operators are required by international agreement, (2) stations for which licensed operators are required for safety purposes, (3) stations engaged in broadcasting, and (4) stations operated as common carriers on frequencies below thirty thousand kilocycles."

FCC MODIFIES RULE 229

Assigns Additional Frequencies to Broadcasting

The Federal Communications Commission on May 13 adopted the recommendation of its Engineering Department to modify its existing Rule 229, in which is assigned frequencies to various classes of stations and services.

The band 1500 to 1600 kc. was assigned to broadcasting. This does not mean, however, that there will be any immediate change in the existing policy of maintaining stations on the 1530, 1550 and 1570 kc. frequencies in the experimental status, nor is it contemplated that other frequencies will be assigned to stations at this time.

Another change was the elimination of experimental visual broadcasting in the 2000 to 3000 kc. band, on the basis that the consensus of engineering opinion and the inspection of reports submitted by visual broadcast stations reveal that these frequencies are not particularly suited for television and that at present there is no indication that these frequencies will ever be adequate for the transmission of visual broadcast programs which will be of sufficient quality to command public interest.

The frequencies thus released were made available to government departments, intercity police communication services and to point-to-point telegraph stations in the fixed public service.

25600 to 26600 kc. was assigned to broadcasting in accordance with the provisions of Article 7 of the International Regulations to which the United States is a party. No specific change in existing policy is involved in this assignment.

Four frequencies in the band 40000 to 42000 kc. were assigned to experimental broadcasting, for the special purpose of ascertaining

facts with respect to frequency modulation, a hitherto unused system of modulation as applied to broadcasting.

The text of the Orders follows:

FEDERAL COMMUNICATIONS COMMISSION

WASHINGTON, D. C.

Commission Order No. 14

At a general session of the Federal Communications Commission held at its offices in Washington, D. C., on the 13th day of May, 1936:

The Commission, having under consideration Rule 229 of its Rules and Regulations, has determined that in order to prevent interference between stations and to carry out the provisions of the Communications Act, the public convenience, interest and necessity requires that said Rule 229 be revised in part for the following reasons:

1. There is a need for the allocation of additional frequencies for police, broadcast and fixed services.
2. The frequency bands, 2000 to 2100 kilocycles and 2750 to 2850 kilocycles, are no longer suitable for visual broadcasting because a satisfactory picture or image in keeping with the present state of the art cannot be transmitted on frequencies within said bands.
3. There is a need for a greater frequency separation from other services in the operation of relay broadcast (formerly broadcast pickup) stations.

IT IS ORDERED That, Rule 229 be, and it is hereby, amended by striking out so much of said Rule as relates to the frequencies listed below and substituting in lieu thereof the following:

"Frequencies (kc.)		Allocation
1510		Broadcast
1520		"

"Hereafter in Rule 229 whenever the words 'relay broadcast' appear, there will be substituted the words 'international broadcast.' Whenever the words 'broadcast pickup' appear, there will be substituted the words 'relay broadcast.'"

IT IS FURTHER ORDERED That said amendment to Rule 229 shall be effective at 3:00 A. M., E.S.T., July 1, 1936.

By the Commission,
JOHN B. REYNOLDS,
Acting Secretary.

FEDERAL COMMUNICATIONS COMMISSION

WASHINGTON, D. C.

Commission Order No. 15

At a general session of the Federal Communications Commission held at its office in Washington, D. C., on the 13th day of May, 1936:

The Commission, having under consideration the requirements of Section 303(f) of the Communications Act of 1934 and having adopted by its Order No. 14 an amendment to its Rule 229 which contemplates a change in the frequency of certain existing stations:

IT IS ORDERED That, public notice of said order is hereby given to all existing licensees, or pending applicants for instruments of authorization, whose frequency or frequencies heretofore assigned or applied for may be changed by the provisions of said Order, and that opportunity is afforded, prior to July 1, 1936, to indicate in writing to the Commission whether or not such change is consented to by such licensee.

IT IS FURTHER ORDERED That any licensee or pending applicant not consenting to said change in frequency assignment shall upon application by it be accorded a public hearing to determine whether such change will promote public convenience and interest or will serve public necessity or whether the provisions of the Communications Act of 1934 will be more fully complied with by such changes.

IT IS FURTHER ORDERED That as to any non-consenting licensee or pending applicant, the effective date of said Order No. 14 shall be postponed until after a determination upon such public hearing.

IT IS FURTHER ORDERED That as to all licensees or pending applicants who consent prior to July 1, 1936, to the change in frequency resulting from the reallocation made by said Order No. 14, all outstanding licenses or applications for instruments of authorization be and the same are hereby modified in accordance with said allocation effective at 3:00 A. M., E.S.T., July 1, 1936.

By the Commission,
JOHN B. REYNOLDS,
Acting Secretary.

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

International Television Radio Corp., Jersey City, N. J. (2-2133, Form A-1)

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2795. A complaint has been issued against **Federal Civil Service Training Bureau**, 508 South Dearborn St., Chicago, alleging unfair methods of competition in the sale of correspondence courses of instruction designed to prepare students for examinations for various Federal Civil Service positions. John Hartford, owner of the correspondence school, and Harvey E. Wagley, a creditor in active charge of the business, also are named as respondents in the complaint, which charges violation of Section 5 of the Federal Trade Commission Act.

Use of the name "Federal Civil Service Training Bureau" is alleged to imply that such bureau is connected with or is an agency of the United States Government or of the Civil Service Commission, when, according to the complaint, neither the respondents nor their school has any such connection.

No. 2797. **Anthony J. Hildreth** and **Joseph Fischler**, trading as **Sanitas Fundoshi Co.**, 7508 Linwood Ave., Cleveland, are named respondents in a complaint alleging unfair competition in the sale of a suspensory which they manufacture from cloth imported from Japan.

The complaint charges the respondents advertise in magazines and folders that their product restores health, is scientifically designed to preserve strength, and has certain other properties not found in similar articles made of cloth.

No. 2798. Imitation of the product of a competitor in violation of the Federal Trade Commission Act is alleged in a complaint issued against **John H. Meyer**, trading as **Med-Dental Systems Co.**, 1015 Schmidt Building, Cincinnati, and engaged in the sale of accounting systems designed for doctors and dentists. The respondent's practices are said to constitute unfair competition.

The complaint charges that the respondent's accounting systems are exact copies of the well-known "McCaskey System" of accounting sold by the McCaskey Register Company, Alliance, O., which has been in business since 1909.

In 1934, the Med-Dental Systems Co. was organized as a copartnership by the respondent Meyer and Victor T. Griswold, the latter previously having been in the employ of the McCaskey Company, according to the complaint, and in the course of such employment is said to have become familiar with the details of the "McCaskey System."

The copartnership was dissolved in 1935, Meyer remaining in charge of Med-Dental Systems Co., which, the complaint alleges, continued to sell accounting systems patterned from samples and forms Griswold obtained from the McCaskey Company. The respondent also is alleged to have copied the McCaskey Company's sales promotional literature, as well as the size, shape and general appearance of that company's cabinets and desks which house the accounting systems.

No. 299. **The Rieser Co., Inc.**, 119 West 40th St., New York City, manufacturer of tissues, has been charged with unfair competition in violation of the Federal Trade Commission Act, in a complaint. The company maintains a factory at Shamokin, Pa.

Tissue products sold by this respondent company, according to the complaint, were labeled "Mentho-Kerchief, the Mentholated Tissue Hankerchief." These articles were also alleged to have been described on the label as being capable of relieving head colds, sinus and hay fever, and of clearing the nasal passages. The respondent is also charged with representing that doctors recommend Mentho-Kerchief.

These representations are alleged to have had a tendency to deceive buyers into believing that the respondent's product has been recommended by doctors as a cure, remedy or relief for sinus trouble, hay fever and head colds, when, according to the complaint, these are not the facts, and such relief obtained by sufferers from head colds, if any, would be limited to a possible momentary clearing of the nasal passages, causing a relief so slight and temporary as to be negligible.

The complaint points out that the tissue products of the respondent are not handkerchiefs as the term is understood.

Stipulations

The Commission has issued the following cease and desist orders and stipulations:

No. 1664. **Harry Gritz**, 1335 Seventh St., N. W., Washington, D. C., trading as "Army & Navy Store," agrees to stop ad-

vertising his business by use of the words "Army & Navy," in violation of the Federal Trade Commission Act prohibiting unfair methods of competition.

Gritz' merchandise is described in the stipulation of facts as consisting only to a limited extent of goods formerly owned by the Army and Navy, but mainly of articles purchased through regular commercial channels and not made for or formerly owned by the Federal Government. Gritz is said to deal mostly in workmen's clothing and camping outfits and supplies.

The stipulation points out that Army and Navy surplus stocks have for some time been practically exhausted, and the only classes of such goods now procurable by dealers are articles which have become obsolete, worn out, or damaged in storage, and a few salvaged surplus items such as canteens, mess kits, pup tents, and the like.

According to the stipulation, Gritz displayed the caption "Army & Navy Store" on a sign in front of his store, and advertised through use of the phrase "Army & Navy." He agrees to stop advertising in any way which would deceive buyers into believing that the merchandise he sells consists of Army and Navy surplus products, when such is not the fact.

No. 1665. **William P. Jacobs**, trading as **Easpirin Co.**, Clinton, S. C., and selling "Easpirin," the principal active element of which is said to be aspirin, agrees to cease advertising, without proper qualification, to the effect that there is not the slightest risk of weakening the heart or causing depression of the heart by use of his product. The stipulation provides that nothing therein shall be construed as preventing the respondent from making proper therapeutic claims and recommendations for his article, which are based on reputable medical opinion or recognized medical or pharmaceutical literature.

No. 1666. **Keep Klean Cover Co., Inc.**, 2828 Pine St., St. Louis, manufactures automobile accessories, including a reflector type advertising device for automobile tire covers. The respondent company agrees to cease branding its product with "Pat. No. 1,947,549" or with other words and figures which may tend to deceive buyers into believing that the corporation is owner of or controls a subsisting patent on its article, when this is not true.

FEDERAL COMMUNICATIONS COMMISSION ACTION

There was no meeting of the Broadcast Division of the Commission on the usual meeting day, Tuesday. A meeting will be held later this week.

HEARING CALENDAR

Monday, May 18

HEARING BEFORE THE COMMISSION EN BANC

WARD—United States Broadcasting Corp., Brooklyn, N. Y.—C. P. to move transmitter; 1400 kc., 500 watts, share WVFW, WLTH & WBBC.

WARD—United States Broadcasting Corp., Brooklyn, N. Y.—Renewal of license; 1400 kc., 500 watts, share WVFW, WLTH & WBBC.

WARD—United States Broadcasting Corp., Brooklyn, N. Y.—Voluntary assignment of license to Kings Broadcasting Corp.; 1400 kc., 500 watts, share WVFW, WLTH & WBBC.

WBBC—Brooklyn Broadcasting Corp., Brooklyn, N. Y.—Modification of license; 1400 kc., 500 watts, unlimited time (requests facilities of WARD, WVFW & WLTH). Present assignment: 1400 kc., 500 watts, share WLTH, WARD & WVFW.

WBBC—Brooklyn Broadcasting Corp., Brooklyn, N. Y.—Renewal of license; 1400 kc., 500 watts, share WARD, WLTH & WVFW.

WBBC—Brooklyn Broadcasting Corp., Brooklyn, N. Y.—Renewal of license (aux. transm.); 1400 kc., 500 watts, share WARD, WLTH & WVFW.

WVFW—Paramount Broadcasting Corp., Brooklyn, N. Y.—Modification of license; 1400 kc., 500 watts, unlimited time (requests facilities of WARD, WLTH & WBBC). Present assignment: 1400 kc., 500 watts, share WARD, WLTH & WBBC.

WVFW—Paramount Broadcasting Corp., Brooklyn, N. Y.—Renewal of license; 1400 kc., 500 watts, share WARD, WLTH & WBBC.

WVFW—Paramount Broadcasting Corp., Brooklyn, N. Y.—C. P. to make changes in equipment; 1400 kc., 500 watts, share WARD, WLTH & WBBC.

WVFW—Paramount Broadcasting Corp., Brooklyn, N. Y.—Transfer of control of Corp.; 1400 kc., 500 watts, share WARD, WLTH & WBBC.

WLTH—Voice of Brooklyn, Inc., Brooklyn, N. Y.—Renewal of license; 1400 kc., 500 watts, share WARD, WVFW & WBBC.

WLTH—Voice of Brooklyn, Inc., Brooklyn, N. Y.—Voluntary assignment of license to Kings Broadcasting Corp.; 1400 kc., 500 watts, share WARD, WVFW & WBBC.

NEW—Brooklyn Daily Eagle Broadcasting Co., Inc., Brooklyn, N. Y.—C. P.; 1400 kc., 500 watts, unlimited time (requests facilities for WBBC, WLTH, WARD & WVFW).

WEVD—Debs Memorial Radio Fund, Inc., New York, N. Y.—Modification of license; 1400 kc., 1 KW, unlimited time (requests facilities for WBBC, WLTH, WARD & WVFW). Present assignment: 1300 kc., 1 KW, share WBBH, WFAB & WHAZ.

Tuesday, May 19

HEARING BEFORE AN EXAMINER

(Broadcast)

KVOS—KVOS, Incorporated, Bellingham, Wash.—Renewal of license; 1200 kc., 100 watts, unlimited time.

KVOS—KVOS, Incorporated, Bellingham, Wash.—Transfer of control of corporation; 1200 kc., 100 watts, unlimited time.

Wednesday, May 20

HEARING BEFORE AN EXAMINER

(Broadcast)

WOL—American Broadcasting Co., Washington, D. C.—C. P.; 1230 kc., 1 KW, unlimited time. Present assignment: 1310 kc., 100 watts, unlimited time.

Thursday, May 21

HEARING BEFORE AN EXAMINER

(Broadcast)

KXL—KXL Broadcasters, Portland, Ore.—Renewal of license; 1420 kc., 100 watts, 280 watts, LS, shares with KBPS.

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah—C. P.; 1290 kc., 1 KW, 5 KW-LS, unlimited time. Present assignment: 1290 kc., 1 KW, 1 KW-LS, unlimited time.

Friday, May 22

HEARING BEFORE AN EXAMINER

(Broadcast)

KUMA—Albert H. Schermann, Yuma, Ariz.—Renewal of license; 1420 kc., 100 watts, specified hours.

APPLICATIONS RECEIVED

First Zone

WB2A—Westinghouse Electric & Mfg. Co., Springfield, Mass.—550 Construction permit to install a new transmitter and directional antenna, change frequency from 990 to 550 kc., move transmitter from 625 Page Blvd., East Springfield, Mass. to Agawam, Mass., and studio from Hotel Bradford, 275 Tremont St., Boston, Mass., to 140 Chestnut St., Springfield, Mass. Also change hours of operation from unlimited when synchronized with WBZ to unlimited time.

WNYC—City of New York, Dept. of Plant and Structures, New York, N. Y.—Modification of construction permit (B1-P-678) for new equipment and move of transmitter, requesting to make changes in directional antenna. Amended: To request extension of completion date from 6-1-36 for 180 days.

WABI—Community Broadcasting Service, Bangor, Me.—Construction permit to install a new transmitter, erect a vertical antenna, increase power from 100 watts to 100 watts night, 250 watts day, change hours of operation from specified

hours to unlimited time and move transmitter from Park Street, Bangor, Maine, to Brewer, Maine.

WOL—American Broadcasting Company, Washington, D. C.—1310 Construction permit to erect a vertical antenna and move transmitter and studio from 1111 H St., N. W., Washington, D. C., to 1627 K St., N. W., Washington, D. C.

NEW—Edwin H. Armstrong, New York City—Construction permit for a general experimental station on 41600, 86500, 111000 kc., 40 KW.

W2XE—Atlantic Broadcasting Corp., Wayne, N. J.—Construction permit to increase power to 10 KW and replace transmitter.

Second Zone

WKBN—WKBN Broadcasting Corp., Youngstown, O.—Authority 570 to install automatic frequency control.

NEW—Lincoln Memorial University, Middlesboro, Ky.—Construction permit to erect a new broadcast station to be operated on 1210 kc., 100 watts power, unlimited time.

WTEL—Foulkrod Radio Engineering Co., Philadelphia, Pa.—1230 Construction permit to install new equipment, directional antenna, change frequency from 1310 kc. to 1230 kc., increase power from 100 watts to 250 watts, 500 watts day, hours of operation from share WHAT to unlimited time and move transmitter. Amended: To omit request for move of transmitter.

WSPD—The Toledo Broadcasting Co., Toledo, O.—License to 1340 cover construction permit (B2-P-715) for equipment changes, and increase in power from 1 KW night, 2½ KW day to 1 KW night, 5 KW day.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—1370 License to cover construction permit (B2-P-934) to install auxiliary transmitter.

WHIS—Daily Telegraph Printing Co., Bluefield, W. Va.—License 1410 to cover construction permit (B2-P-861) for new equipment and move of transmitter.

NEW—National Broadcasting Co., Inc., Cleveland, O.—Construction permit for general experimental station for 25700, 26000, 27100, 31100, 31600, 34600, 35600, 37600, 38600, 40600, 41000, 86000-400000, 401000 kc., and above 25 watts.

NEW—National Broadcasting Co., Inc., Cleveland, O.—License to cover 31100, 34600, 37600, 40600 kc., 25 watts.

NEW—National Broadcasting Co., Inc., Cleveland, O.—License to cover 25700, 26000, 27100, 31600, 35600, 38600, 41000, 86000-400000, 401000 kc., 25 watts.

W10XGA—Miami Valley Broadcasting Corp., Portable-Mobile—License to cover construction permit for 31100, 34600, 37600, 40600 kc., 2.5 watts.

Third Zone

WGCM—WGCM, Incorporated, Mississippi City, Miss.—Modification of construction permit (B3-P-421) to change frequency, power, equipment and time, requesting extension of commencement and completion dates from 1-28-36 and 7-28-36 respectively to 30 days after grant and 180 days thereafter.

WAYX—E. F. Sapp & S. F. Sapp, d/b as Waycross Broadcasting Co., Waycross, Ga.—Modification of construction permit (B3-P-574) to make changes in equipment and for approval of antenna, studio and transmitter site at 620 Plant Ave., Waycross, Georgia.

NEW—H. A. Hamilton, Ashville, N. C.—Construction permit for 1200 a new station to be operated on 1370 kc., 100 watts, daytime. Amended: To change frequency from 1370 to 1200 kc., and change time from daytime to unlimited time, using 100 watts power.

NEW—Associated Arkansas Newspapers, Inc., Hot Springs, Ark.—1310 Construction permit for a new station to be operated on 1310 kc., 100 watts power, unlimited time.

KGFI—Eagle Broadcasting Co., Inc., Corpus Christi, Texas—1500 Authority to install automatic frequency control.

Fourth Zone

KMA—May Seed & Nursery Co., Shenandoah, Iowa—Construction permit to move transmitter from Elm & Lowell Sts., Shenandoah, Iowa, to 1¼ mile from Shenandoah, Iowa, and make changes in equipment (antenna). Amended: To change time from shares with KGBZ to unlimited time.

WJJD—WJJD, Incorporated, Chicago, Ill.—Modification of license
1130 to change hours of operation from 6 a. m. CST, to local sunset at Salt Lake City, Utah, to 6 a. m. EST, to local sunset at Salt Lake City, Utah.

WJBC—Wayne Hummer & H. J. Dee, d/b as Kaskaskia Broadcasting Co., Bloomington, Ill.—Voluntary assignment of construction permit (B4-P-571) from Wayne Hummer & H. J. Dee, d/b as Kaskaskia Broadcasting Co. to Arthur Malcolm McGregor & Dorothy Charlotte McGregor.

WFBM—Indianapolis Power & Light Co., Indianapolis, Ind.—
1230 License to cover construction permit (B4-P-144) for equipment changes and increase in power from 1 KW to 1 KW night, and 5 KW day.

WFBM—Indianapolis Power & Light Co., Indianapolis, Ind.—
1230 Authority to determine operating power by direct measurement of antenna power.

KGBX—Springfield Broadcasting Co., Springfield, Mo.—Extension of special authorization to operate on **1230 ke.**, 500 watts power, unlimited time, using directional antenna at night, for period from 6-1-36 to 12-1-36.

WMBD—Peoria Broadcasting Co., Peoria, Ill.—Modification of construction permit (B4-P-590) as modified for equipment changes, and move of transmitter, to further request change in equipment, and to extend commencement and completion dates from 2-8-36 and 8-6-36 to immediately and 3 months after grant, respectively.

Fifth Zone

KGW—Oregonian Publishing Co., Portland, Ore.—Modification of
620 license to change power from 1 KW, 5 KW day to 5 KW day and night.

KFPY—Symons Broadcasting Co., Spokane, Wash.—Modification
890 of construction permit (B5-P-332) for approval of antenna and transmitter site at E½ of E½ of N½ of Lot 10, Section 4, Township 24 N. Range 43 E. W. M. Spokane, Wash.

KOMO—Fisher's Blend Station, Incorporated, Seattle, Wash.—
920 Modification of license to change power from 1 KW night; 5 KW day to 5 KW day and night.

KWYO—Big Horn Broadcasting Co., Inc., Sheridan, Wyo.—Construction permit to make changes in equipment, erect a vertical antenna, increase power from 100 watts to 100 watts, 250 watts day and move transmitter from corner Adair and West Fourth Streets, Sheridan, Wyoming, to 1.2 miles N. of Sheridan, Wyoming. Amended: To change type of equipment from composite to Doolittle and Falknor.

Puerto Rican Zone

WPRP—Julio M. Conesa, Ponce, P. R.—License to cover construction permit (1-P-B-2940) as modified for a new station on **1420 ke.**, 100 watts night; 250 watts day power, specified hours.

FOOD BILL ORDERED REPORTED

The House Committee on Interstate and Foreign Commerce on Wednesday ordered that a favorable report be made on the Pure Food and Drug Bill. This bill passed the Senate during the last session of Congress and has been pending in the House committee for a long time. As the bill was ordered reported it places advertising under the Federal Trade Commission instead of the Department of Agriculture.

CAUTION—ALDRICH BLAKE ENJOINED

On Tuesday, May 19, 1936, Justice Bailey of the Supreme Court of the District of Columbia permanently enjoined Aldrich Blake and Aldrich Blake, Inc., from violating the Securities Act of 1933 in the sale of agreements entitling the purchaser to oil on a when, as and if produced basis. Justice Bailey held that such agreements, although purporting to pay for oil at the rate of one cent a barrel, were in fact investment contracts or certificates of interest in a profit-sharing agreement and therefore a security within the meaning of said Act.

Aldrich Blake had failed to file five copies of his continuity with the Securities and Exchange Commission five days before broadcasting same over a radio station, as required by Rule 800(d) of the General Rules and Regulations of the Securities and Exchange Commission under the Securities Act of 1933, which rules are authorized under the provisions of Section 10(d) of said Act. This Act defines a prospectus to mean, among other things, any communication by radio which offers any security for sale, with certain exceptions such as the existence of a written prospectus which was sent to prospective purchasers and complies with the provisions of Section 10 of said Act.

It is our understanding that Aldrich Blake has been using other radio stations and that he will endeavor to do so in the future. While there are certain exemptions with reference to registration statements and prospectuses, the only safe thing to do is to contact the Securities and Exchange Commission prior to authorizing any broadcast involving the sale of the security. The section of said Act relating to fraudulent interstate transactions contains no exemptions and includes not only fraudulent transactions but also those in which there may be an omission to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading. The primary responsibility for filing the prospectus with this Commission is upon the user of such prospectus but broadcasting stations should not fail to take reasonable precautions to see that the Securities Act of 1933, as amended, has been complied with.

LICENSE RENEWAL RECOMMENDED

Broadcasting Station WSMB, New Orleans, La., applied to the Federal Communications Commission for a renewal of its license. The station operates on 1320 kilocycles, 1,000 watts power and unlimited time.

Examiner George H. Hill, in Report No. I-223, recommended that the application for renewal be granted "without restriction of radiation toward Des Moines, Ia."

The Examiner found that the station is rendering a meritorious service. He states that "Station KRNT is already limited by the operation of Station WADC to an extent which renders it unnecessary for WSMB to restrict its radiation in the direction of KRNT. The operation of WADC limits KRNT to its 4 millivolt per meter contour, whereas Station WSMB, operating with 1,000 watts power without restricting radiation toward KRNT, would limit KRNT only to its 2.3 millivolt per meter contour."

ASCAP AIDS DEFENSE OF WARNER SUITS

Approximately one hundred thirty-five complaints in actions commenced by the Warner Brothers' publishing interests have been referred by broadcasters to the American Society of Composers, Authors and Publishers for defense. Broadcasters have followed this course in reliance upon the provision of the contract between ASCAP and broadcasters, which provides that ASCAP agrees to indemnify, save and hold harmless and defend the broadcasting station from and against suits brought against the broadcaster with respect to renditions of compositions contained in ASCAP's repertory, and in accordance with the further provision of the contract which requires the broadcaster to deliver to ASCAP any process or pleading served upon it, so that ASCAP can assume charge of the defense of the action.

ASCAP has, in every case in which a complaint has been referred to it, caused its general counsel, Nathan Burkan, Esq., to prepare an appropriate answer, and has forwarded such answer to the broadcaster, with the request that it be filed by the broadcasting station's local counsel. In requesting local counsel so to act in filing the answer, ASCAP has assured broadcasting stations, in writing, that the appearance of such counsel in the suit would not prejudice the station's claim for defense by and indemnity from ASCAP.

The NAB is informed that ASCAP intends to furnish the services of its general counsel, and to make available the necessary information and evidence, without charge to any broadcaster who avails himself of such services. ASCAP takes the position that the basic questions involved in the Warner Brothers litigation will be disposed of in a few test cases, and it is expected that ASCAP will assume charge of the trial and of the prosecution of appeals in such test litigation. If ASCAP is correct, it is clear that a considerable number of cases now pending will never come to trial, since the issues involved therein will be disposed of by the precedents set in these test cases.

ASCAP takes the position, however, that it is definitely relieved of any obligation to defend or indemnify the station in those cases in which the broadcaster fails to comply with the provisions of the contract requiring the broadcaster to deliver pleadings to ASCAP, and permitting ASCAP to assume charge of the defense in co-operation with counsel for the broadcasting station.

FOURTEENTH ANNUAL NAB CONVENTION

STEVENS HOTEL, CHICAGO, ILLINOIS

JULY 5, 6, 7, 8, 1936

RECOMMENDS POWER INCREASE ON CONDITION

Broadcasting Station WDBO, Orlando, Fla., operating on a frequency of 580 kilocycles, with unlimited time using 250 watts with 1,000 watts experimentally, applied to the Federal Communications Commission to use 1,000 watts regularly.

Examiner Ralph L. Walker, in Report No. I-224, has recommended that the application be granted "(1) if the application of WCHS for 1,000 watts night power is granted and (2) if the pending application of WDBO for authority to move the station is granted; otherwise that the application be denied."

The Examiner states that the reception of programs of WDBO is unsatisfactory in a large portion of the area which would normally be considered as within its primary service radius because of interference from a station outside the United States operating on a frequency of five kilocycles removed from it.

DECISION IN ASCAP CASES

Judge Frederick H. Bryant, in the United States District Court for the northern district of New York, has handed down a decision in two ASCAP cases against Elm Lodge, Inc., in which he criticises the practice of attorneys for the Society frequenting night clubs to gain evidence on which to base a case. The decisions are as follows:

UNITED STATES DISTRICT COURT NORTHERN DISTRICT OF NEW YORK

In Equity No. 2870

GENE BUCK, as President of the American Society of Composers, Authors and Publishers, and FAMOUS MUSIC CORPORATION, Plaintiff,

against

ELM LODGE, INC., Defendant.

and

In Equity No. 2872

GENE BUCK, as President of the American Society of Composers, Authors and Publishers, and HARMS, INC., Plaintiffs,

against

ELM LODGE, INC., Defendant.

Appearances:

Earl I. Freshman, Esq., Attorney, Syracuse, New York, Solicitor for the plaintiffs; and Louis D. Frohlich, Esq., Attorney, 1450 Broadway, New York City, N. Y., of Counsel for the plaintiffs.

Albert Averbach, Esq., Attorney, Syracuse, N. Y., Solicitor for the defendant.

BRYANT, D. J.

The defendant, at times mentioned in the complaint, operated a restaurant, or night club, near Syracuse, New York, with a table seating capacity of about 200. Each evening, for entertainment, there was a floor show and an orchestra.

It is the contention of the plaintiffs, in each case, that the defendant, without having obtained a license, allowed its orchestra to play copyright pieces.

Plaintiffs, in each action, ask that defendant be enjoined and restrained from publicly performing the compositions named, and seek judgment for \$250.00 with costs. Defendant, by answer in each case, denies the playing of the pieces and alleges invalidity of copyrights because of lack of originality. It also, by counterclaim, asks damages alleged to have been sustained through plaintiffs' publicizing the bringing of the actions, etc.

Plaintiffs in the first entitled action base their alleged cause of action upon an alleged rendition of a composition entitled "Champagne Waltz." The second entitled action is based upon an alleged rendition of the compositions entitled "Continental," "Then I'll Be Tired Of You," and "Night And Day." The two actions were tried together without a jury.

In the first entitled action, defendant is entitled to a judgment of dismissal of the complaint with costs. He is not entitled to recover upon his alleged counterclaim. Findings may be presented upon notice.

In the second entitled action the plaintiffs are entitled to judgment with costs. Findings may be presented on notice.

Plaintiffs, in each case, are entitled to copyright protection of the compositions named. The present suits are for penalties rather

than for actual damages. Before a penalty is decreed, the evidence should clearly show unlicensed rendition.

In the first entitled action the alleged violation rests upon the testimony of one witness. I do not consider the testimony of this witness reliable enough to support a verdict.

In the second case, a witness, the one referred to above, testified that the three compositions, last above named, were played by an orchestra in defendant's place on December 5th, 1934. From the evidence, I doubt if he was there on that particular night. However, there is not any question but that he was at defendant's Night Club some evening about that time. On his evidence, uncorroborated, I would not predicate a violation. In this case he is supported by an orchestra leader and a piano player.

The leader of the orchestra, which played at defendant's place from the latter part of November until about December 5th, positively stated that, during that period, his orchestra played "Continental" every night and "Night And Day" part of the time. A piano player, who played with the orchestra one night, testified that the orchestra played "Night And Day." He gave his reasons for remembering that particular selection. This testimony is undisputed except that both witnesses testified they played the night of December 5th, while defendant's evidence tended to show the orchestra, in which they played, closed its engagement on the night of the fourth. Regardless of this dispute, the evidence is of sufficient weight to sustain plaintiffs' allegations.

Cases of this kind have received considerable adverse criticism. The methods used by plaintiff, American Society of Composers, Authors and Publishers, in the present cases, will not tend to allay the criticisms.

An official of the Society testified that it is not the policy of the Society to make inducements to orchestra leaders and players to advise when they have played copyright pieces in unlicensed places. Manifestly, the Society has no scruples against depending upon orchestra leaders and players to prove its cases. It has done so in the present instance. Inasmuch as orchestra leaders have the choice of selections, a proprietor of an unlicensed place, however innocent, may be placed in the toils of the Society through a bribable leader and an unscrupulous investigator.

I am not in accord with the practice of attorneys, who are directly or indirectly retained by the Society, frequenting Night Clubs with the hopes that they may hear a composition played upon which they can base a case and obtain a fee, and then take the witness stand to prove the alleged violation. Such conduct cannot have the sanction of this Court.

Dated May 7th, 1936.

FREDERICK H. BRYANT,
United States District Judge.

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them:

No. 2800. A complaint has been issued against **Canterbury Candy Makers, Inc.**, 93 Marion St., Seattle, Wash., charging unfair methods of competition through sale to wholesalers and retailers of assortments of candy so packed as to involve the use of a lottery scheme when distributed to consumers. One such assortment was sold together with a punchboard, according to the complaint. These methods of competition are alleged to have caused diversion of trade to the respondent company from competitors.

No. 2801. Alleging unfair competition in the sale of encyclopedias, a complaint has been issued against the **Times Sales Co., Inc.**, **The Times Sales Co.**, **William and George G. Heim**, and **Edward B. Seegar**, all having their place of business at 1524 Chestnut St., Philadelphia. The respondents Heim are officers in both firms and are copartners of Seegar in the Times Sales Co., according to the complaint.

The respondents are said to offer for sale sets of "The Times Encyclopedia," sometimes known as "The Times Encyclopedia and Gazetteer," together with a 10-year loose-leaf extension service, a membership in a bureau of research, and subscriptions to certain magazines.

Purchasers of this so-called "combination sale" sign a contract which, according to the complaint, describes the terms and time of payments and sets forth that the signer does not have an understanding of any kind with the respondents' salesmen other than the terms printed in the contract, and that the contract is not subject to change or cancellation.

However, the complaint charges, the respondents' salesmen represent to prospects that the contract is open to change, and, by writing on the face thereof, alter the terms or time of payments and substitute subscriptions to magazines other than those named in the contract, but which are preferred by purchasers.

No. 2803. Improper labeling of whiskey is alleged in a complaint issued against **C. O. Taylor Distributing Co.**, 444 West Grand Ave., Chicago, a wholesale distributor of alcoholic liquors. The respondent's practices are said to constitute unfair competition and to be in violation of Section 5 of the Federal Trade Commission Act.

By abbreviating the word "Distributing" to "DIST." in its corporate name, and by use of such abbreviation on stationery, labels, and in advertising matter, the respondent company, it is charged, implies that it is a distilling company and manufactures its products by the process of distillation, when, according to the complaint, it does not own or operate a plant where such products are distilled.

No. 2804. Charged with unfair methods of competition in the sale of a purported mineral water, **Richard R. Soheranes**, trading as **Tarzana Mineral Water Co.**, 1485 North Vine St., Hollywood, Calif., is named respondent in a complaint. Soheranes also has a branch office and place of business at **Tarzana, Calif.**

In radio broadcasts and in various kinds of advertising matter, the respondent allegedly represents that his product will prevent and cure, or is beneficial in the treatment of many diseases and afflictions, including rheumatism, liver ailments, stomach troubles, high blood pressure, diabetes and acidosis. The complaint charges these representations are not true, and that the respondent's water does not possess the curative and beneficial qualities claimed for it.

The respondent also is said to advertise that the diet of the average citizen is "sadly" deficient in sodium, calcium and magnesium, and that such deficiency can be supplied by drinking this mineral water. According to the complaint, the average diet is not lacking in the important mineral elements named, and the respondent's product does not act on the human body in any manner different from any pure, potable water, and does not contain any elements or medicinal properties in sufficient quantities to render it of greater benefit than any pure drinking water.

Stipulations

The Commission has issued the following cease and desist orders and stipulations:

No. 1656. **Landshaft & Bonning, Inc.**, 424 Main St., Buffalo, N. Y., an advertising agency, agrees to discontinue false and misleading advertising in connection with the sale of a book, "How to be Always Well," which recommends a system of diet devised by and cereal products distributed by Dr. Robert G. Jackson, Toronto, Canada. According to the stipulation, Dr. Jackson is a client of the agency, which places his advertisements in various periodicals and also superintends the sale of his health book. The agency agrees, among other things, to cease representing, either in advertisements or in the book itself, that use of the diet, exercise, or hygiene advocated by Dr. Jackson gives immunity from sickness and disease, or from such minor ailments as colds, or prolongs life from 25 to 50 years.

No. 1657. **Mirrolike Manufacturing Co.**, 35 Queens Boulevard, Long Island City, N. Y., engaged in the sale of "Mirrolike White Shellac," signed a stipulation to discontinue use on labels of the word "shellac" alone or in conjunction with the word "white" so as to imply that the product is composed of shellac gum, cut or dissolved in alcohol. The stipulation provides that if shellac gum is the principal ingredient in the respondent's product, the word "shellac" shall be accompanied by the word "compound," and if shellac gum is not the predominant element, the word "substitute" shall be used in connection with the word "shellac," and in each case the words "compound" and "substitute" shall be in type equally as conspicuous as that in which the word "shellac" is printed. The respondent corporation also will desist from using on its labels the words "Guaranteed 5½ lbs. cut" to designate a product which does not actually contain the indicated amount of gum to each gallon of liquid used therewith.

No. 1658. **Ossola Bros., Inc.**, 1800 Penn Ave., Pittsburgh, stipulates it will cease and desist from use of the words "Imported from Italy," either in English or Italian, as a brand for its olive oil products; or if such product is composed in substantial part of oil produced in and imported from Italy, and the words "Imported from Italy" are used to describe the same, such words shall be accompanied by others to indicate the product is not composed wholly of oil produced in and imported from Italy. According to the stipulation, the respondent corporation caused advertisements

of its product to be broadcast in the Italian language from a Pittsburgh radio station.

No. 1659. **Lederle Laboratories, Inc.**, 30 Rockefeller Plaza, New York City, engaged in the sale of "Poultry Worm Tablets Lederle," agrees to discontinue advertising to the effect that its products "have an insoluble coating" or are "enteric coated," so as to imply that the tablets or the coating thereon remains insoluble until they reach the intestines, then are dissolved at the point of infection.

No. 1660. **McCormick & Co.**, 400 Light St., Baltimore, entered into a stipulation that, in the sale of pepper, it will cease using in advertisements the statement, "Don't pay for dust, dirt, stems and stones that are ground up in cheap pepper," so as to imply that the price asked for pepper indicates the amount of foreign substance therein. The respondent also agrees to discontinue making any representations tending to disparage brands of pepper sold by competitors.

No. 1661. **Toolinda Mahler, trading as D. J. Mahler Co.**, 3124 Pawtucket Ave., East Providence, R. I., manufacturing toilet requisites and an electrical apparatus, agrees to stop representing that the use of the apparatus is the only method of permanently destroying superfluous hair or preventing its regrowth. The respondent agrees also to stop advertising that use of the device by self-application is safe, easy, painless, permanent or harmless, without at the same time qualifying the allegations by the condition that proper care and skill are required in its application.

The respondent company agrees not to represent that use of the apparatus for removal of warts, moles, birthmarks, red veins, freckles and other similar facial blemishes by self-application is safe, unless it is explained that this could be done with safety only by a skilled dermatologist.

The respondent agrees to stop representing that any person named Daniel J. or D. J. Mahler now owns the company, and to cease publishing purported literature or letters in his name, either with or without his portrait, tending to confuse customers into believing that D. J. Mahler, founder of the company, is still living and offering them his services.

No. 1662. **Montgomery, Ward & Co.**, in the sale of a facial cream, designated it "Footlight Turtle Oil Cream," when, according to the stipulation, the oil content of this product did not consist entirely of turtle oil and did not possess the properties and values advertised.

The respondent company agrees to stop using the words "turtle oil," independently or in conjunction with other words, as a trade name for its facial cream product, implying that the oil content of the preparation is composed wholly of turtle oil; unless, when such oil content is substantially turtle oil, the words "turtle oil," if used to describe it, shall be immediately accompanied by other words clearly indicating the actual oil content.

The respondent company also agrees to cease making other representations implying or tending to deceive buyers into believing that its facial cream, when applied externally, will nourish the skin, act as a corrective for wrinkles, or aid the skin of all users to retain a youthful complexion, when these are not the facts.

No. 1663. Trading as "**Marcelle Laboratories**" and "**Footlight Products Co.**," **C. W. Beggs & Sons, Inc.**, 1741 North Western Ave., Chicago, manufacturer of "Footlight Turtle Oil Cream," entered into a stipulation of facts similar to that in the Montgomery Ward case, and agreed to discontinue the same representations regarding its product.

No. 2651. An order has been issued requiring **Newark Felt Novelty Co., Inc.**, 416 Morris Ave., Newark, N. J., to cease and desist from selling certain articles made of second-hand material unless they are clearly marked so that purchasers will not mistake them as being made of new material.

Specifically, the order directs the respondent company to cease selling baseball caps manufactured from felts obtained from second-hand, old, used and discarded men's and women's felt hats, unless and until there is stamped upon or attached to such caps in a conspicuous place, words clearly indicating that they are not made from new and unused felts, but manufactured from felts obtained from second-hand and discarded felt hats.

No. 2724. Under an order, **Gustave Goldstein**, trading as **Humania Hair & Specialty Manufacturing Co.**, 10-12 East 23rd St., New York City, is directed to cease and desist using false advertising in the sale of hair goods, cosmetics, or toilet preparations.

The respondent will cease representing that he is a manufacturer of hair and specialty goods, an importer of hair goods, or that some of the wigs he sells are imported French wigs made of the finest quality soft French hair.

Among other representations to be discontinued by the respondent are that his "Magic Shaving Powder" does not affect the growth of hair or injure the skin, that "Ro-Zol Face Bleach" is an effective remedy for skin diseases, and that some of his ointments and creams, sold under various trade names, rid the skin of blemishes and pimples, while others lighten dark skin "almost over night" and permit the desired shade to be retained, without injurious effects.

FTC DISMISSES CASES

The Federal Trade Commission has announced that it has dismissed and set aside the following cases:

No. 2450. The Commission has issued an order closing its case against **Distillers Importing Corporation**, 485 Madison Ave., New York City, charged in a Commission complaint with unfair competition through use of the word "Distillers" in its corporate name when the company was not engaged in distilling liquor but was an importer and wholesaler.

The Commission based its closing order on the fact that the respondent company has surrendered its permits, is undergoing dissolution, has not further engaged in interstate commerce in the importation or sale of alcoholic beverages, and on the fact that it appears unlikely the respondent will resume such importation or sale.

The case was closed without prejudice to the Commission's right to reopen it and resume prosecution of the complaint under its regular procedure, should the facts warrant such action.

Nos. 1773-2071. The Commission has vacated and set aside orders to cease and desist issued in April, 1934, against two Philadelphia candy companies, **Quaker City Chocolate & Confectionery Co.**, 2134 Germantown Ave., and **Sol Block and Sidney Blumenthal**, trading as **Rittenhouse Candy Co.**, Worth and Herbert Sts.

The Commission has issued against these respondents amended and supplemental complaints alleging practices similar to those alleged in the original complaints, involving the use of an alleged lottery scheme in the sale of package candies, and has ordered the cases reopened for taking of further testimony.

FEDERAL COMMUNICATIONS COMMISSION ACTION

HEARING CALENDAR

Monday, May 25

HEARING BEFORE AN EXAMINER

(Broadcast)

NEW—Dorrance D. Roderick, El Paso, Tex.—C. P., 1500 kc., 100 watts, unlimited time.

Tuesday, May 26

HEARING BEFORE AN EXAMINER

(Broadcast)

NEW—The Brockway Co., Watertown, N. Y.—C. P., 1270 kc., 250 watts, daytime.

Wednesday, May 27

HEARING BEFORE AN EXAMINER

NEW—Metro Broadcasting Co., Los Angeles, Calif.—C. P., 820 kc., 250 watts, limited with WHAS.

NEW—Leon S. Packard, Lewis H. Stebbins, Alden C. Packard, d/b as Valley Broadcasting Co., Pomona, Calif.—C. P., 1160 kc., 250 watts, daytime.

KYA—Hearst Radio, Inc., San Francisco, Calif.—C. P., 1230 kc., 1 KW, 5 KW LS, unlimited time. Present assignment: 1230 kc., 1 KW, unlimited time.

Thursday, May 28

HEARING BEFORE AN EXAMINER

(Broadcast)

NEW—Jefferson Broadcasting Co., Ormond O. Black, Pres., Birmingham, Ala.—C. P., 1200 kc., 100 watts, 250 watts LS, unlimited time.

NEW—J. R. Maddox and Dr. W. B. Bair, d/b as Chattanooga Broadcasting Co., Chattanooga, Tenn.—C. P., 590 kc., 1 KW, unlimited time.

NEW—Lookout Broadcasting Corp., Chattanooga, Tenn.—C. P., 1420 kc., 100 watts, daytime.

NEW—Wilton Harvey Pollard, Huntsville, Ala.—C. P., 1200 kc., 100 watts, unlimited time.

Friday, May 29

HEARING BEFORE AN EXAMINER

(Broadcast)

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—Authority to transfer control of corporation to WJR, The Goodwill Station; 1450 kc., 500 watts, 1 KW LS, unlimited time.

WJAY—The Cleveland Radio Broadcasting Corp., Cleveland, Ohio.—Authority to transfer control of corporation to U. B. Company; 610 kc., 500 watts, daytime.

WHK—Radio Air Service Corp., Cleveland, Ohio.—Authority to transfer control of corporation to U. B. Company; 1390 kc., 1 KW, 2½ KW LS, unlimited time.

APPLICATIONS GRANTED

KGNF—Great Plains Broadcasting Co. (a corporation), North Platte, Nebr.—Granted C. P. to make changes in equipment.

KFPW—Southwestern Hotel Co., Fort Smith, Ark.—Granted C. P. to make changes in equipment, using approved type of "A" cut crystal and oscillator circuit.

WTAR—WTAR Radio Corp., Norfolk, Va.—Granted C. P. to install directional antenna; move transmitter to — on Glen Rock — Elizabeth Pk. Rd., 1.6 miles east of Norfolk, Va.; increase night power from 500 watts to 1 KW, with directional antenna subject to approval; 780 kc., 1 KW day, unlimited time.

KVOE—The Voice of the Orange Empire, Inc., Ltd., Santa Ana, Calif.—Granted transfer of control of The Voice of the Orange Empire, Inc., Ltd., from the estate of J. S. Edwards, deceased, to J. S. Edwards, Inc.

WREC—WREC, Inc., Memphis, Tenn.—Granted license to cover C. P., 600 kc., 1 KW directional antenna night, 2½ KW LS, unlimited. Also granted authority to determine operating power by direct measurement.

WSGN—R. B. Broyles, tr/as R. B. Broyles Furniture Co., Birmingham, Ala.—Granted consent to voluntary assignment of license from R. B. Broyles, tr/as R. B. Broyles Furniture Co., to The Birmingham News Co.

NEW—Louis Wasmer, Inc., Portable-Mobile, Spokane, Wash. (2 apps.).—Granted C. P. for broadcast pickup station in the experimental service; frequencies 31100, 34600, 37600 and 40600 kc., 2 watts.

NEW—The Evening News Assn., Portable-Mobile (Detroit, Mich.).—Granted C. P. (exp. gen. exp.), frequencies 31100, 34600, 37600, 40600 kc., 3 watts.

W8XO—The Crosley Radio Corp., Mason, Ohio.—Granted renewal of special experimental station license, in exact conformity with existing license, for the period May 21 to August 21, 1936.

SET FOR HEARING

NEW—The Birmingham News Co., Birmingham, Ala.—Application for C. P. for new station, frequency 590 kc., 500 watts night, 1 KW day, unlimited time; site to be determined.

KIT—Carl E. Haymond, Yakima, Wash.—Application for C. P. to install new equipment, change frequency from 1310 kc. to 1250 kc., erect a vertical radiator at site to be determined with Commission's approval, and increase night power from 100 watts to 250 watts, day power from 250 watts to 500 watts.

NEW—Mile High Radio Corp., Denver, Colo.—Application for C. P. for new station, 1420 kc., 100 watts, unlimited time; site to be determined.

NEW—The News Press Publishing Co., Santa Barbara, Calif.—Application for C. P. for new station, 1410 kc., 500 watts, unlimited time; site to be determined.

NEW—The Metropolis Co., Jacksonville, Fla.—Application for C. P. for new station, 1310 kc., 100 watts, unlimited time; site to be determined.

NEW—Neil O. Davis and F. M. Gleason, d/b as North Georgia

Broadcasting Co., Rossville, Ga.—Application for C. P. for new station, 1200 kc., 100 watts, unlimited time; site to be determined.

NEW—Owensboro Broadcasting Co., Owensboro, Ky.—Application for C. P. for new station, 1500 kc., 100 watts, unlimited time; site to be determined.

KNX—Western Broadcast Co., Los Angeles, Calif.—Application for consent to transfer control of Western Broadcast Co. (licensee of KNX) from Guy C. Earl, Jr., and five other parties, to the Columbia Broadcasting System. To be heard June 29 before the Broadcast Division. Also remanded application for renewal of license to docket for further hearing on June 29, 1936.

MISCELLANEOUS

KCMO—Charlotte Duncan, Administratrix, Lester E. Cox, and Thos. L. Evans, Kansas City, Mo.—Reconsidered and granted application for renewal of license and for assignment of license to Lester E. Cox, Thos. L. Evans, and C. C. Payne.

NEW—Memphis Commercial Appeal, Inc., Memphis, Tenn.—Granted permission to file its appearance and statement of facts to be proved in re application for new broadcast station to operate on 630 kc., 1 KW, unlimited time, to be located at Mobile, Ala.

WMT—Iowa Broadcasting Co., Cedar Rapids, Iowa.—Denied petition asking Commission to reconsider and grant without hearing application for C. P. to make changes in equipment and to increase daytime power from 2½ KW to 5 KW.

WCBF—WCBF, Inc., Zion City, Ill.—Denied petition asking Commission to reconsider and grant without hearing application for modification of license for authority to move its studio to Chicago.

KOB—New Mexico College of Agriculture & Mechanic Arts, Albuquerque, N. Mex.—Granted petition requesting postponement of hearing on renewal of license, now scheduled for May 25, 1936, pending formal application now being prepared for the assignment of the station license.

NEW—Struble, Strong, Fagan, Dalles, Ore.—Granted request for an order to take depositions in support of application for a new broadcast station at Dalles, Ore.

WWAE—Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Suspended grant made March 27, 1936, and designated for hearing application to operate unlimited daytime and share with WFAM (South Bend, Ind.) at night, because of the protests of WSBC, WEDC, and WCRW, all of Chicago.

NEW—R. J. Laubengayer, Salina, Kans.—Denied petition asking Commission to reconsider and grant without hearing application for permit to erect and operate new broadcast station at Salina, using 100 watts on 1500 kc., full time.

WALA—Pape Broadcasting Corp., Inc., Mobile, Ala.—Granted request for order to take depositions as intervener for use at hearing in opposition to application of Memphis Commercial Appeal, Inc., for new station at Mobile, Ala.

ACTION ON EXAMINERS' REPORTS

NEW—Ex. Rep. No. 1-77 (in part): G. D. Goff, Tampa, Fla.—Denied C. P. for new station to operate on 1500 kc., 100 watts, unlimited time (site to be determined subject to Commission's approval), reversing Examiner Geo. H. Hill. Order effective August 25, 1936. (Action taken May 1, 1936.)

WBNX—Ex. Rep. No. 1-134 (in part): Standard Cahill Co., Inc., New York City.—Granted C. P. to make changes in equipment, move transmitter, and increase power from 250 watts to 1 KW, 1350 kc., share time with WAWZ, sustaining Examiner John P. Bramhall. Order effective September 15, 1936. (Action taken May 1, 1936.)

APPLICATIONS RECEIVED

First Zone

NEW—Old Colony Broadcasting Corp., Brockton, Mass.—Construction permit for a new station to be operated on 680 kc., 250 watts, daytime.

WELI—Patrick J. Goode, New Haven, Conn.—Modification of 930 license to change hours of operation from daytime to unlimited time, requesting 250 watts night, 500 watts day power and change frequency from 900 kc. to 930 kc. Amended to install directional antenna.

NEW—Harriett M. Alleman and Helen W. McLellan, d/b as Cape 1210 Cod Broadcasting Co., Barnstable Township, Mass.—Construction permit for a new station to be operated on 1210 kc., 100 watts, 250 watts day, unlimited time.

Second Zone

NEW—Valley Broadcasting Co., Cleveland, Ohio.—Construction 890 permit for a new station to be operated on 890 kc., 1 KW, unlimited time.

NEW—WRBC, Inc., Cleveland, Ohio.—Construction permit for a 950 new station to be operated on 780 kc., 1 KW, unlimited time. Amended to change frequency from 780 kc. to 950 kc.

WSAI—The Crosley Radio Corp., Cincinnati, Ohio.—Authority 1330 to determine operating power by direct measurement of antenna.

WJBK—James F. Hopkins, Inc., Detroit, Mich.—Modification of 1500 construction permit (B2-P-637) for changes in equipment, requesting to install new equipment, make changes in antenna, and extend commencement and completion dates.

NEW—Farnsworth Television, Inc., of Pennsylvania, Springfield, Pa.—Construction permit for an experimental visual broadcasting station and synchronized sound track for 60000-86000 kc. band on specific frequencies of 62750 kc. for visual broadcasting and 66000 kc. for synchronized sound track. Visual power 4 KW, sound track power 1 KW.

W8XAL—Crosley Radio Corp., Mason, Ohio.—Modification of license to add frequency 9590 kc.

Third Zone

WMC—Memphis Commercial Appeal, Inc., Memphis, Tenn.—780 Modification of construction permit (B3-P-621) for changes in equipment and increase in power, requesting to install a new directional antenna, change transmitter site from intersection U. S. Highways 64 and 70, Memphis, Tenn., to ¾ mile northwest of 5 Points—intersection U. S. Highway No. 70 and Macon Road, near Memphis, Tenn., and extend commencement and completion dates.

NEW—Radio Enterprises, Inc., Hot Springs, Ark.—Construction 1310 permit for a new station to be operated on 1310 kc., 100 watts, daytime.

WLAK—Lake Region Broadcasting Co., Lakeland, Fla.—License 1310 to cover construction permit (B3-P-42) for a new station.

W4XC—Wade Dellinger, Portable.—Modification of license to change from telegraph service to broadcast. Licensed for 31600, 35600, 38600, 41000, 86000-100000 kc., 15 watts.

Fourth Zone

NEW—Daily News Corp., St. Paul, Minn.—Construction permit 630 for a new station to be operated on 1370 kc., 100 watts, unlimited time. Amended to change frequency from 1370 kc. to 630 kc., and power from 100 watts to 250 watts.

WJJD—WJJD, Inc., Chicago, Ill.—License to cover construction 1130 permit (B4-P-362) for move of transmitter.

WEOA—Evansville on the Air, Inc., Evansville, Ind.—License to 1370 cover construction permit (B4-P-384) for a new station.

NEW—KMJB Broadcasting Co., by Myron J. Bennett, Pres., 1450 Minot, N. Dak.—Construction permit for a new station to be operated on 1450 kc., 1 KW, unlimited time, facilities of KLPM. Amended to change equipment and give transmitter site as site to be determined, Ward County, North Dakota.

Fifth Zone

KGW—Oregonian Publishing Co., Portland, Ore.—Construction 620 permit to make changes in equipment.

NEW—The Tribune, Great Falls, Mont.—Construction permit for
950 a new station to be operated on 1280 kc., 1 KW, 5 KW
day, unlimited time. Amended: Change frequency back to
950 kc. from 1280 kc. and omit request for KFBB's facilities.

KGY—KGY, Inc., Olympia, Wash.—Authority to install auto-
1210 matic frequency control.

KGY—KGY, Inc., Olympia, Wash.—Construction permit to in-
1210 stall a new transmitter.

NEW—Ed Klies, Helena, Mont.—Construction permit for a new
1280 station to be operated on 1210 kc., 100 watts, 250 watts
day, unlimited time. Amended to change equipment, change
frequency from 1210 kc. to 1280 kc., and power from 100

watts, 250 watts day, to 1 KW, 5 KW day, facilities of
KFBB.

KSLM—Oregon Radio, Inc., Salem, Ore.—Authority to make
1370 changes in automatic frequency control.

WDNC—Durham Radio Corp., Durham, N. C.—Authority to
1500 transfer control of corporation from George Watts Hill,
Herbert Bleuthenthal, Harris Newman and John Sprunt Hill
to The Durham Herald Company, 684 shares common stock.

Puerto Rican Zone

WKAQ—Radio Corporation of Porto Rico, San Juan, Puerto Rico.

1240 License to cover construction permit (B4-P-743) for changes
in equipment and move of transmitter.

REPORTS ON BROADCAST STATION REVENUE

Total receipts of the 77 broadcast stations in the Pacific Coast states from the sale of radio time during 1935 amounted to \$6,441,623, according to announcement of the Bureau of the Census, Department of Commerce. These figures were obtained in the new census of business series on the broadcasting business.

In the same series the Bureau announced that total receipts from the sale of time by the 30 broadcast stations in Texas in 1935 amounted to \$2,220,821.

HOUSE RADIO BILL REPORTED

The House Committee on Interstate & Foreign Commerce has made a favorable report on H. R. 12646 which provides for the amendment of Section 318 of the Communications Act of 1934. As reported the bill is as follows:

That section 318 of the Communications Act of 1934 is hereby amended to read as follows:

"SEC. 318. The actual operation of all transmitting apparatus in any radio station for which a station license is required by this Act shall be carried on only by a person holding an operator's license issued hereunder, and no person shall operate any such apparatus in such station except under and in accordance with an operator's license issued to him by the Commission: *Provided, however,* That the Commission may waive or modify the foregoing provisions of this section for the operation of any station except (1) stations for which licensed operators are required by international agreement, (2) stations for which licensed operators are required for safety purposes, (3) stations engaged in broadcasting, and (4) stations operated as common carriers on frequencies below thirty thousand kilocycles."

RECOMMENDS LICENSE RENEWAL FOR WLBG

Three applications have been filed with the Federal Communications Commission all dealing with 880 kilocycles, 500 watts power and daytime operation. Station WPHR, Petersburg, Va., operating on this frequency asks for license renewal; the Petersburg Broadcasting Company asks for the facilities of WPHR to erect a new station at Petersburg, Va., and WLBG, at Petersburg, Va., asks to move its transmitter from Petersburg to Richmond, Va.

Examiner John P. Bramhall, in Report No. 1-225, recommends that the application of the Petersburg Broadcasting Company and of WLBG be denied and that the application of WLBG for license renewal be granted.

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

- Owings Mills Distillery, Inc., Owings Mills, Md. (2-2153, Form A-1)
- John Irving Shoe Corp., Boston, Mass. (2-2154, Form A-2)
- Bridgeport Brass Co., Bridgeport, Conn. (2-2155, Form A-2)
- Kendall Refining Co., Bradford, Pa. (2-2156, Form A-2)
- Black & Decker Mfg. Co., Towson, Md. (2-2157, Form A-2)
- Silver Strike Mining Co., Murray, Ida. (2-2158, Form A-1)
- Harden Chemical Corp., Cincinnati, Ohio (2-2159, Form A-1)
- Lawrence Warehouse Co., San Francisco, Cal. (2-2160, Form A-2)
- Owens-Illinois Glass Co., Toledo, Ohio. (2-2161, Form A-2)
- Soulshy-Belle Mining Co., Kansas City, Mo. (2-2164, Form A-1)
- Bolivian Bondholders Protective Committee, New York City. (2-2165, Form D-1)

NEW REBROADCAST RULE

The Federal Communications Commission has issued a new rule, No. 177, effective July 1, dealing with rebroadcasting. It is as follows:

177. (a) The licensee of a regular broadcast station may, without authority of the Commission, rebroadcast a program of another United States regular broadcast station upon notice to the Commission and upon the express authority of the licensee of the station originating the program.

(h) No licensee of any other class of broadcast station (international, visual, high frequency, experimental or special) shall rebroadcast the program of any United States radio station without written authority first having been obtained from the Commission.

(c) No licensee of a regular broadcast station shall rebroadcast the program of any other class of United States radio station without written authority having first been obtained from the Commission.

(d) No licensee of any class of broadcast station shall rebroadcast the program of any foreign radio station without written authority having first been obtained from the Commission. In case a program is transmitted entirely by telephone facilities in which a section of such transmission is by radio, the broadcast of this program is not considered a rebroadcast.

(e) An application for authority to rebroadcast the program of any radio station shall be accompanied by the written consent of the station originating the program.

(f) In case of a rebroadcast where the program is transmitted by several broadcast stations, such as a chain program, the person legally responsible for distributing the program or the chain facility may obtain the authorization for the entire rebroadcast.

(g) Authority will not be granted to rebroadcast in the United States the programs of an international broadcast station located within the limits of the North American Continent, except upon a satisfactory showing that no wire or other facilities exist for transmitting the program to the area served by the station proposing the rebroadcast.

(h) A licensee of an international broadcast station may authorize the rebroadcast of its program by any station outside the limits of the North American Continent without permission from the Commission, provided, however, that the station rebroadcasting the programs cannot be received consistently in the United States.

FOURTEENTH ANNUAL NAB CONVENTION

STEVENS HOTEL, CHICAGO, ILLINOIS

JULY 5, 6, 7, 8, 1936

177.1 No person shall be permitted to locate, use or maintain a radio broadcast studio or other place or apparatus from which or whereby sound waves are converted into electrical energy, or mechanical or physical reproduction of sound waves produced, and caused to be transmitted or delivered to a radio station in a foreign country for the purpose of being broadcast from any radio station there having a power output of sufficient intensity and/or being so located geographically that its emissions may be received consistently in the United States, without first obtaining a permit from the Commission upon proper application therefor.

NEW RULES PROMULGATED BY FCC

The Federal Communications Commission, through its Broadcast Division has promulgated new rules concerning all broadcast stations except regular broadcast stations in the band 550 to 1500 kilocycles. The Commission has made the following official statement in this connection:

The Broadcast Division on May 21, promulgated new rules and regulations concerning all broadcast stations except regular broadcast stations in the band 550 to 1500 kilocycles. These broadcast stations are as follows:

Relay broadcast stations (formerly broadcast pickup stations).
International broadcast stations (formerly experimental relay stations).

Visual broadcast stations, including television and facsimile.

High-frequency broadcast stations (formerly general experimental stations authorized to operate as broadcast stations).

Experimental broadcast stations.

Special broadcast stations (formerly experimental broadcast stations on the frequencies of 1530, 1550 and 1570 kilocycles).

These new rules provide certain new restrictions and principles of operation that are fully set out in the attached copy of the new rules. All outstanding rules concerning these stations which are in conflict with the new rules are automatically cancelled.

The name "relay" broadcast station now applies to stations which were formerly called broadcast pickup stations. The new name "relay" is considered more in keeping with the actual service rendered by these stations. In the future these stations will be licensed only to the holders of regular broadcast station licenses. Two groups of frequencies are provided, one in the medium frequency band and the other in the very high frequency band. In both groups the licensees are required to notify the Commission two days before each operation for the purpose of relaying programs to be broadcast. Certain of the frequencies in the medium frequency band have been changed by two kilocycles to provide better frequency separation from other services. All licensees of these stations should read the new rules governing these stations carefully as certain other changes have been made.

The name "international" broadcast station now applies to those stations which were formerly called experimental relay stations. These stations are licensed for international service. There are certain new principles set out in the new rules that the licensees of these stations should study carefully.

The frequency bands 2000 to 2100 kilocycles and 2750 to 2850 kilocycles have been dropped for the television service. Experience to date has shown that a satisfactory picture in keeping with the development of the art cannot be transmitted successfully in these narrow bands. The stations now assigned these frequencies which are carrying on active programs of research and experimentation will be assigned specific frequencies in the bands 42,000 to 56,000 kilocycles and 60,000 to 86,000 kilocycles. One license will authorize both the visual and aural broadcast. There are certain other principles of operation involved in the new rules which the licensees of these stations should study carefully.

High-frequency broadcast stations are required to carry on active programs of research to hold a license. Licensees not carrying on this active program cannot be considered as making proper usage of the assignment and full consideration will be given at the time of the renewal of license.

Experimental broadcast stations are provided for specific experimentation along lines other than those prescribed by other broadcast rules. Certain frequencies throughout the entire useful radio spectrum are made available for this purpose by Rule 229 as modified.

The name "special broadcast station" applies to stations formerly named "experimental" stations licensed to operate on the frequencies of 1530, 1550, and 1570 kilocycles. The new rules provide that all rules that apply to regular broadcast stations (Rules 69 to 181, inclusive) shall apply to special broadcast stations. This means

that these stations must have frequency monitors, modulation monitors, protected equipment, etc.

It will be necessary to modify several of the outstanding licenses to comply with the new frequency allocation as provided in Rule 229 as modified by the Commission on May 13, 1936. The Broadcast Division's new rules as discussed above provide an allocation in compliance with the frequencies made available by the action of the Commission. A careful comparison should be made between your existing licenses with respect to the frequencies and class of broadcast service and that provided in the new rules and regulations. It may be necessary to change either or both.

So that these requirements may be discussed thoroughly and understood, an informal engineering conference is scheduled for June 8, 1936, at which all licensees affected should be represented, or should supply information to the Broadcast Division of the Commission as to the new frequencies that they desire in keeping with the new rules. All licensees of television broadcast stations should especially be present so that a definite assignment of a visual and aural frequency can be made in either the 42,000-56,000 kilocycle band or the 60,000-86,000 kilocycle band. If the licensees are not present so that an agreeable change of frequency can be effected, the Commission will, on July 1, 1936, issue a modified license specifying the frequency that it deems best in keeping with public interest, convenience and necessity, as provided in Rule 229 as modified.

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2802. Charging a conspiracy resulting in restraint of trade in the interstate sale of rubber heels and soles, a complaint has been issued against **The I. T. S. Co., 135 Maple St., Elyria, O., The National Federation of Master Shoe Rebuilders, 1124 Chester Ave., Cleveland, and George Benson, C. C. Zeigler, Walter L. Green, and S. L. Orenstein, individually and as officers of the association, representing all members.**

The I. T. S. Co., wholesale dealer in rubber heels and soles, the shoe rebuilders' association, and its officers acting individually, are alleged to have entered into an agreement and conspiracy to close the natural channels of distribution to wholesalers and manufacturers who sell their products to the 5-and-10¢ stores, and to cause shoe manufacturers, shoe findings jobbers, repairers and hardware stores to boycott and refuse to deal with manufacturers and wholesalers who sell their goods to such stores.

In pamphlets, trade literature and advertisements, The I. T. S. Co. is alleged to have represented to shoemakers, jobbers and shoe repairers that they should not buy rubber heels or soles made by manufacturers selling heels or stick-on soles to the 5-and-10¢ stores, and that every such article these manufacturers and wholesalers sell to such stores means that the shoe repairer is "cheated out of a heel or tap job." The I. T. S. Co. is alleged to have represented that it "has always been on the side of the shoemaker and jobber" and has "never sold to the 5-and-10¢ stores, any chain store, or shoe manufacturer."

Advising shoemakers and jobbers that it would like to give them information as to what concerns are selling to 5-and-10¢ stores, The I. T. S. Co. is alleged to have explained that it would be unethical for it to do so, but that such information would be furnished by S. L. Orenstein, executive secretary of the National Federation of Master Shoe Rebuilders.

The association is said to have responded to requests for information by forwarding a list of manufacturers and wholesale rubber heel and sole dealers who did not sell their products to 5-and-10¢ stores.

No. 2805. Charging unfair competition in the sale of interlinings used in the manufacture of garments, a complaint has been issued against **Charles A. Saretsky, 246 West 38th Street, New York City, jobber and converter of interlinings.**

The respondent is alleged to have labeled or permitted purchasers to attach a tag furnished by the respondent to each garment manufactured in part from the respondent's interlining, such tag or label allegedly containing lettering such as the following: "This garment is interlined with lamb's wool filling" or "This garment is interlined with 100 per cent wool filling."

The respondent's product is not "lamb's wool filling" nor "100 per cent wool filling," according to the complaint, but is an inferior product made in part of wool or reworked wool or shoddy, adulterated with cotton, and the cloth to which such filling is attached,

and which forms a part of the completed interlining, is alleged to be composed entirely of cotton.

No. 2806. Unfair competition in the sale of candy is alleged in a complaint issued against **March of Time Candies, Inc.**, 446 North Hermitage Ave., **Chicago**.

The complaint alleges that the respondent corporation packs candy in assortments so as to involve a lottery scheme whereby the ultimate purchaser of a piece of candy may win, without additional cost, a package or a bar of candy.

Such a sales method, the complaint charges, tends to divert trade to the respondent from competitors who do not use the same or a similar scheme in the sale of their products.

No. 2807. Under a complaint issued, **United Distillers (of America), Ltd.**, 33 North La Salle St., **Chicago**, is charged with unfair competition in the wholesaling of alcoholic beverages. The respondent corporation, which also has a place of business in Baltimore, is a subsidiary of United Distillers of Canada (Ltd.) and the exclusive agent in the United States for the products of its parent company.

By use of the word "Distillers" in its corporate name in advertising and on stationery and labels on bottles, United Distillers (of America) Ltd., is said to represent that it is a distiller and manufactures its products through the process of distillation, when, the complaint alleges, it is not a distiller and does not own or operate a plant where the beverages it sells are distilled.

No. 2808. Use of lottery in the sale of candy to the consumer is alleged as an unfair method of competition in a complaint issued against **D. Goldenberg, Inc.**, and **Frank Rabinowitz**, trading as **Novelty Sweets Co.**, 2019 East Arizona St., **Philadelphia**.

Assortments of candy of uniform size and shape sold by the respondents were arranged so that some purchasers drew prizes consisting of larger pieces of candy, according to the complaint.

Such practice is against public policy and tends to divert trade from competitors who do not use such a plan in the sale of their products, it is charged in the complaint.

No. 2809. False and misleading representations in advertising an electric comb designed for use in treating the hair and scalp are alleged in a complaint issued against **G. Lindholm Co., Inc.**, 316 Flatbush Ave., **Brooklyn, N. Y.**

The respondent company, in radio broadcasts, newspapers and other advertising matter, is said to represent that use of its product, known as "Evans Dermectro Electric Comb," checks dandruff and falling hair in a few days, imparts new life to dry, dull hair, and causes it to become lustrous, thick and wavy, arrests baldness, and restores gray hair to its original color. The complaint charges that such assertions are untrue, and that the electric comb so advertised does not perform any function other than that which may be accomplished by an ordinary comb.

According to the complaint the respondent company advertises that "A thousand-dollar guarantee goes with every comb," and represents that the purchase price will be refunded if purchasers are not satisfied with the comb after a 7-day trial. The complaint describes this purported guarantee as vague and misleading, and alleges that it does not go with every comb, and that the \$1,000 has not been posted so as to be available to a purchaser in event the guarantee is broken.

No. 2810. Fraudulent representations in the sale of receptacles for storing clothing is alleged as an unfair method of competition in violation of the Federal Trade Commission Act in a complaint issued against **Mortimer Alfred Gersten** and **Lee Gersten**, trading as **Gersten Brothers**, 516 West 34th St., **New York City**.

Manufacturing corrugated fibre storage receptacles, chests and closets, the respondents are alleged to have been in unfair competition with other dealers in storage receptacles by use of misleading assertions concerning the protection from moths afforded by their own fibre products.

The respondents are alleged to have branded their receptacles as "Cedarol Closets" and "Cedarol Chests," falsely representing them to the trade as being effective against the ravages of moths, because of the presence of cedar oil in their construction.

No. 2811. A complaint alleging unfair competition in the sale of a medicinal preparation and treatment for eczema has been issued against **Dr. J. E. Cannaday**, 316 South Ohio Ave., **Sedalia, Mo.**

Among the representations allegedly made by Dr. Cannaday in various advertising media, and which the complaint charges are false and exaggerated, are that use of his preparation and treatment effects a cure and brings permanent relief in all cases of eczema.

Dr. Cannaday is said to have circulated testimonials in which various persons made statements to the effect that they had suffered from eczema and had been relieved or cured by the use of his product, when, the complaint charges, many had not been cured

or completely restored to health. He also is alleged to have made claims that he cured numerous persons, but, according to the complaint, was without personal knowledge as to the ailment from which such persons were suffering and as to the extent to which they benefited by use of his product.

No. 2812. **Millinery Quality Guild, Inc.**, and **Uptown Creators' Guild**, both of **New York City**, and their 27 members who design, manufacture and sell ladies' hats of fine grade are alleged, in a complaint, to be engaged in unfair practices in restraint of trade, which are injurious to manufacturers and retailers of stylish millinery, as well as to the purchasing public.

All members of the guilds are located in New York City, except one in San Francisco, and are recognized leaders in the field of ladies' hats so far as style and design are concerned. They are said to manufacture hats wholesaling at not less than \$8 each, and to have approximately 1600 retail dealers throughout the country buying their products under a so-called "Declaration of Cooperation" entered into with the respondent Millinery Quality Guild, Inc.

Under this "Declaration of Cooperation", the complaint alleges, retailers are coerced and compelled to recognize the property rights in styles created by guild members; to refrain from purchasing copies of styles pirated from guild members, and, in placing an order for millinery, to stamp on such order notice to the seller to the effect that the order is placed only with the manufacturer's warranty that the hats so ordered are not copies of styles originated by the members of either guild.

No. 2813. Named respondent in a complaint, **Dermolav Laboratories, Inc.**, 1700 Broadway, **New York City**, engaged in the manufacture and sale of preparations for use on the scalp, is charged with unfair methods of competition in violation of Section 5 of the Federal Trade Commission Act.

Advertising in tabloid newspapers, in magazines, and in other ways, the respondent corporation represents, the complaint charges, that its "Dermolav Liquid Scalp Peel" and "Dermolav Scalp Compound" grow hair and cure a disease causing baldness, and that treatment with these Dermolav preparations has certain other beneficial effects on the hair and scalp.

These representations are alleged to be untrue, as is the assertion that "Dermolav Liquid Scalp Peel" is a harmless liquid for removing congested skin from the scalp, when, according to the complaint, its use may result in serious injury.

Nos. 2814-2815-2816. Three companies selling tableware labeled "Dirigold" are named as respondents in complaints charging unfair competition in violation of the Federal Trade Commission Act. The respondent companies are **American Dirigold Corporation, Kokomo, Ind.**; **Dirigold Metals Corporation, Barrington, Ill.**; and **Dirigold Distributors, Inc., Chicago**.

The respondents are charged with making representations indicating that their tableware articles contain gold, when, according to the complaints, this is not a fact. The Kokomo and Barrington companies manufacture alloy and tableware made therefrom, while the Chicago concern sells tableware.

Among advertising descriptions used by the three respondents were, according to the complaint, the following: "No home need be denied the rare luxury and beauty of gold on the table and in the home"; "Dirigold is truly—the ultimate gift of a Golden Age"; and "Dirigold—the fashionable and exquisite ware that possesses the color and lustrous beauty of gold!"

The name "Dirigold" is said to be stamped on each article sold by the respondents, and to occupy the most prominent part of their trade-marks, used in advertising literature and other printed matter. The word "Dirigold" also appears in their corporate names. The complaints charge that use of this name applied to articles containing no gold is misleading in that it implies and serves as a representation that such products contain at least some gold. In fact, according to the complaints, the alloy and the products made therefrom, as sold by the respondents, consist chiefly of aluminum and copper, and the articles are highly polished and so finished that they are of the color, lustre and appearance of 14-carat gold.

No. 2817. Misrepresentation of the nature and effect of "St. Joseph Aspirin" is alleged in a complaint issued against **Plough, Inc., Memphis, Tenn.**, which sells that product in interstate commerce. Violation of Section 5 of the Federal Trade Commission Act is charged.

The respondent corporation, in newspaper and magazine advertisements, is said to represent that "St. Joseph Aspirin" gives quicker relief than and is superior to other aspirin, and is fully effective for pains and colds; that it exceeds in purity and accuracy of ingredients rigid standards set by the United States Government; that cellophane wrappings protect its purity and benefit it materially; that aspirin requires cellophane wrappings, under usual and normal conditions of sale, to protect it from deterioration caused

by moisture, and that failure to so wrap it decreases its value or potency.

Stipulations

The Commission has issued the following cease and desist orders and stipulations:

No. 01350. Harriett Hubbard Ayer, a corporation, 323 East 34th St., New York City, selling an "eyelash and eyebrow grower", agrees to stop advertising that the product will increase the length of eyelashes and eyebrows and promote their growth. The respondent admits in its stipulation that, according to scientific authority, no product capable of increasing the growth of hair on any part of the body has at the present time been discovered.

No. 01353. Lucky Tiger Manufacturing Co., 6th and Delaware Sts., Kansas City, Mo., will cease advertising that its "Lucky Tiger Ointment" is a competent treatment for many skin and scalp ailments, unless the representations are limited to assertions that the ointment is only a palliative for relief of superficial conditions; that it is an effective remedy for athlete's foot, or is useful for anything more than relief from itching, burning and surface irritations; or that it will prevent infection, unless representations to this effect are qualified by statements that the ointment may be of value because of its antiseptic or germicidal qualities, but only when in proper contact with the germ. The respondent company further agrees not to publish any testimonial containing any representation contrary to the stipulation.

No. 01354. C. H. Sisson, trading as Sisson Drug Co., Columbus, O., selling Sisson's Formula Tablets Nos. 1, 2 and 3, stipulates he will discontinue representing that the preparations, alone or in combination, are a competent treatment for rheumatism, unless he qualifies such representations by limiting the claims for the preparations' therapeutic value to rheumatism caused by uric acid. The respondent also agrees to stop representing that his products are an effective treatment for sciatica, neuritis or lumbago, and that other preparations, not based upon the theory that rheumatism and kindred ailments are caused by the formation of uric acid crystals, are ineffective for the treatment of such ailments. The respondent's claim that he employed a German chemist to develop the formula for his No. 1 tablet will be discontinued.

No. 01355. Servex Laboratories, Ltd., 6405 Selma Ave., Hollywood, Calif., engaged in selling hygiene products for women, agrees to cease representing that its "Servex Jelly" is an antiseptic or possesses definite bactericidal action, unless the formula is so modified that the preparation will meet competent tests for antiseptic and germicidal properties under the conditions prescribed for its use. The respondent will discontinue representing that "Servex Jelly" and "Servex Powder" are endorsed or prescribed by physicians as safe antiseptics for use in treating certain infections, and will desist from using in its corporate name the word "Laboratories" until it actually maintains a place where scientific investigations are conducted.

No. 01356. H. J. Laird and G. J. Warren, trading as Paraguayan Mate Co., 749 Washington St., New York City, selling a beverage commonly known as Yerba Mate and designated "Viril-A-Tea", agree to cease representing, among other things, that Yerba Mate is a new discovery, a general tonic, or is more than a temporary stimulant; that it restores vitality, is almost a "cure-all" for a wide variety of ailments, fortifies the body against infection, and is a substitute for alcohol and essential in the diet. The respondents admit Yerba Mate has been used as a beverage for many years, particularly in South America. They agree that the name "Viril-A-Tea", will be discontinued, and that the name substituted therefor will not imply that Yerba Mate will produce any effect contrary to the terms of the stipulation.

No. 01357. Charles Allen, operating as Allen Medicine Co., 323 North Grand Ave., St. Louis, engaged in the sale of Allen's Gas Tablets, will discontinue representations that these tablets produce any beneficial effect other than that resulting from use of a laxative, that they are an effective remedy for gas or stomach disorders, and that they are a tonic and do not contain anything harmful to the human system.

No. 01359. General Insulating & Manufacturing Co., 705 Olive St., St. Louis, selling "Gimco Rock Wool," an insulating material, agrees to stop asserting that its article will withstand a constant flame of 1350 degrees without effect on the material; that a thin layer of dust over a surface of reflective insulations will reduce their insulating value to practically nothing; that "Gimco Rock Wool" will stop heat loss or will give a building "a positive barrier" against the rays of the sun, and that all drafts can be eliminated by use of this insulating material.

No. 01360. C. L. Smith and E. J. Dwyer, trading as C. L. O. Smith Co., 820 North Michigan Ave., Chicago, agree to

cease advertising that their cod liver oil product, called "Kiel-Oil", when fed to poultry, will increase egg production, prevent rickets, lessen mortality, provide greater resistance to disease, and other representations. The respondents also agree to stop advertising that "Kiel-Oil" contains Vitamin E, that it is a pure cod liver oil, and conforms to requirements of the United States Pharmacopoeia. In their stipulation the respondents admit that vitamin deficiencies in poultry may be due to confinement, lack of sufficient sunshine, or other causes, and that feeding poultry the respondents' product will not result in improvement of the poultry or eggs, unless the poultry is deficient in nutritional elements contained in the product.

No. 01361. Gordon Bannerman, trading as Antiseptic Eye Remedy Co., 11422 Lorain Ave., Cleveland, stipulates that he will discontinue advertising that his preparation, designated "Eye-Res" is a competent remedy in the treatment of tired, strained, congested or aching eyes, that it is antiseptic and will guard against infection, or that it is of any special merit therapeutically.

No. 01362. International Correspondence Schools, Scranton, Pa., in its stipulation admits that the I. C. S. phonographic system of instruction in languages was used to a limited extent, at one time, by the Government in its naval and military academies for aiding students whose work was not up to standard, but that it is not now so used.

No. 01363. M. L. Clein & Co., Atlanta, will cease representations that its "Mentho-Mulsion" is a competent treatment for coughs, except for coughs due to colds; that it is safe, and that it is an effective remedy for "smoker's cough."

No. 01364. Arthur Sachs, trading as Eugenia Sachs Laboratories, 309 Fifth Ave., New York City, agrees to stop representing that any of the respondent's cosmetics will grow eyelashes or increase or promote the growth or length of eyelashes. Among products sold by the respondent are "Saxalur Eyelash Grower," "Allura Eyelash Grower" and "Allura Creme Mascara."

No. 01365. O. H. D., Inc., 3 East Front St., Wilmington, Del., entered into an agreement to cease representations that "Oxy Indian Cough Syrup" will relieve colds and coughs, unless the representations are limited to claims that the product brings relief only for coughs and colds of a mild nature, and to those types of such ailments definitely known to be within the therapeutic limits of the preparation; that it relieves colds or coughs instantly or with the first dose, and that it contains no opiates or habit-forming drugs. The respondent company will stop designating its preparation as "Indian" unless labels and advertising matter clearly state that the preparation is not of Indian origin.

No. 01370. Venus Health Corporation, 815 South Hill St., Los Angeles, engaged in the sale of "V-76 Tablets" and "Venus Fat Reducing Tablets", agrees to stop representing that "V-76 Tablets" are competent in the treatment of gastritis, stomach distress, indigestion, and other ailments; that they are effective in restoring normal bowel activity, and are safe or harmless. As to Venus Tablets, the respondent company agrees to cease representing that any reduction in weight experienced by any person is due entirely to the use of these tablets; that the Venus method is either a drugless or a safe or sane way to start reducing, or that any person who is overweight may reduce to normal by the Venus method.

No. 01371. Stephen V. and Anthony V. Gimino, trading as Elite Publishing Co., 214 Grand Street, New York City, in the sale of a booklet, "Collection of Successful Business Plans", agree to stop alleging that the chance for success in an independent business is greater than that in a salaried position, unless this assertion is substantiated by authentic data; that their plans have been "approved"; that they do not involve any risk or require investment, and that the booklet is free of charge, unless in fact it is sent without payment of money by the recipient or the rendering of service. In their stipulation, the respondents admit that they have no evidence to substantiate the assertion that the chance for success in an independent business is sixteen times greater than that of a salaried position, as was advertised.

No. 01372. Mrs. Dean Ladd Kidder, widow and executrix of the will of the late William V. Kidder, trading as Pyroil Co., 559 LaFollette Ave., LaCrosse, Wis., in the sale of a graphited lubricant, agrees to ban the representation that this lubricant, called "Pyroil", contains a special solvent to remove carbon; will produce a perfectly smooth surface where deep scoring has occurred; will more than double the life of an automobile or increase its usefulness 50 to 150 per cent, and other representations.

No. 01373. George H. Sanders, Walter C. Schad, and Art Ede, operating as Aura Laboratories, 1587 Broadway, New York City, are dealers in a device recommended for correcting protruding ears, known as "Aura Primset". The respondents aver in their stipulation that the device consists of adhesive tabs and glue, and that while it may cause temporary correction, permanent

relief cannot be had in all cases by use of the device. The respondents agree to stop advertising that "Aura Primset" is endorsed by physicians as the best method for correcting misshapen or protruding ears; that the device will give permanent relief; that normal setting of protruding ears is brought about immediately through use of this device and without resort to surgery; that the apparatus trains the muscles of the ear to stay back normally, thus effecting a permanent relief from deformity in the oldest cases, and other representations.

No. 2526. Mid West Mills, Inc., 1726-28 Arcade Place, Chicago, jobber of upholstering fabrics and other furniture material, has been ordered to cease and desist representing by use of its corporate name, in advertising literature or in any other manner, that it is a manufacturer, mill operator, or mill owner.

Findings are that the respondent used the phrase "Jobbers and Converters" along with its corporate name, and the word "Mills" in its corporate name. The company, according to the findings, is not a manufacturer of the merchandise in which it deals.

No. 2772. General Handkerchief Mfg. Co., Inc., 919 W. Roosevelt Rd., Chicago, has been ordered to discontinue representing through its corporate name, letterheads, circulars, advertising literature, or in any other manner, that it manufactures the handkerchiefs it sells in interstate commerce.

The Commission found that the respondent company used the letters "Mfg." and the words "manufacturers," "manufactured" and "factory" in such manner as to cause customers or prospective customers to believe it owned or operated a factory, when such was not the case.

FTC ORDERS VACATED

No. 1790. An order entered in April, 1934, against Pasquale Margarella, 477 Broome St., New York City, directing him to cease and desist from unfair competition in the sale of candy, has been vacated and set aside by the Federal Trade Commission.

At the same time, the Commission issued an amended and supplemental complaint against Margarella, alleging that he sells to wholesalers and jobbers assortments of candy so packed as to involve the use of a lottery scheme when sold to consumers. The unfair practices charged in the amended and supplemental complaint are similar to those involved in the original complaint.

No. 2784. The Commission has also dismissed charges of unfair competition in the sale of salt products made in a complaint issued April 24, 1936, against General Laboratories, Inc., of Philadelphia.

Dismissal was ordered because of dissolution of the company.

The complaint charged the Pennsylvania Salt Manufacturing Company and its subsidiary, General Laboratories, Inc., with unfair competition in the use of the term "smoked salt" in advertising their products and process.

The dismissal order applies only to General Laboratories, Inc.

FEDERAL COMMUNICATIONS COMMISSION ACTION

HEARING CALENDAR

Monday, June 1

HEARING BEFORE AN EXAMINER

(Broadcast)

NEW—Nathan N. Bauer, Miami, Fla.—C. P., 1420 kc., 100 watts, unlimited time.

APPLICATIONS GRANTED

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—Granted license covering C. P. authorizing changes in equipment.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—Granted license to cover C. P. authorizing installation of auxiliary transmitter; 1370 kc., 100 watts night, 250 watts day.

KFRC—Don Lee Broadcasting System, San Francisco, Calif.—Granted license to cover C. P. authorizing changes in equipment and increase in day power to 5 KW; 610 kc., 1 KW night.

KBIX—Oklahoma Press Publishing Co., Muskogee, Okla.—Granted license to cover C. P. authorizing erection of new station to operate on 1500 kc., 100 watts, unlimited time.

WHOM—New Jersey Broadcasting Corp., Jersey City, N. J.—Granted consent to transfer control of New Jersey Broadcasting Corp. (licensee of Station WHOM), from Harry F. O'Mealia and the O'Mealia Outdoor Advertising Co., to Paul F. Harron and Joseph Lang; 1450 kc., 250 watts, unlimited time.

KFWB—Warner Bros. Broadcasting Corp., Hollywood, Calif.—Granted modification of C. P. extending commencement date to 6-1-36 and completion date to 11-30-36.

KLZ—KLZ Broadcasting Co., Inc., Denver, Colo.—Granted modification of C. P. to install new equipment, extend commencement date to 60 days after grant and completion date to 6 months thereafter.

WHIO—Miami Valley Broadcasting Corp., Dayton, Ohio.—Granted modification of C. P. to install new equipment, extend commencement date to 2 months after grant and completion date to 6 months thereafter.

WCLO—Gazette Printing Co., Janesville, Wis.—Granted modification of C. P. approving antenna and transmitter site.

WHK—Radio Air Service Corp., Cleveland, Ohio.—Granted license to use old transmitter as auxiliary transmitter; 1390 kc., 1 KW night, 2½ KW day, unlimited time; 1 KW for emergency purposes only.

KFRC—Don Lee Broadcasting System, San Francisco, Calif.—Granted license to use old transmitter for auxiliary purposes only; 610 kc., 1 KW night, 5 KW day, unlimited time; 1 KW for auxiliary purposes.

WCAO—Monumental Radio Co., Baltimore, Md.—Granted license to use old W. E. transmitter for auxiliary purposes only; 600 kc., 500 watts night, 1 KW day, auxiliary purposes (present assignment, 600 kc., 500 watts night, 1 KW day, unlimited).

KEUB—Eastern Utah Broadcasting Co., Price, Utah.—Granted modification of C. P. to make changes in equipment and approve transmitter and studio sites.

WHIS—Daily Teleg. Printing Co., Bluefield, W. Va.—Granted license to cover C. P. authorizing installation of new equipment and move of transmitter; 1410 kc., 250 watts night, 500 watts day, unlimited time.

WPRP—Julio M. Conesa, Ponce, P. R.—Granted license to cover C. P. authorizing erection of new station to operate on 1420 kc., 100 watts night, 250 watts day, specified hours.

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Granted license to cover C. P. authorizing installation of new equipment; 1370 kc., 100 watts night, 250 watts day.

WICC—The Southern Conn. Broadcasting Corp., Bridgeport, Conn.—Granted modification of license to change hours of operation from specified to unlimited and facilities of WCAC; 600 kc., 500 watts night, 1 KW day, specified hours (all hours not used by WCAC).

WHBU—Anderson Broadcasting Corp., Anderson, Ind.—Granted C. P. to make changes in equipment.

KFEL—Eugene P. O'Fallon, Inc., Denver, Colo.—Granted C. P. to make changes in equipment and install 2,600-ft. concentric transmission line.

KECA—Earle C. Anthony, Inc., Los Angeles, Calif.—Granted modification of C. P. to extend completion date from 5-30-36 to 11-30-36.

WFBM—Indianapolis Power & Light Co., Indianapolis, Ind.—Granted license to cover C. P. authorizing move of transmitter locally; installing new antenna and equipment; increase day power from 1 to 5 KW; also granted authority to determine operating power by direct measurement of antenna input.

KTAT—KTAT Broadcast Co., Inc., Fort Worth, Tex.—Granted authority to determine operating power by direct measurement of antenna input.

WPTF—WPTF Radio Company, Raleigh, N. C.—Same as above (for auxiliary equipment, 1 KW).

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Granted authority to install automatic frequency control equipment.

WNBH—E. Anthony & Sons, Inc., New Bedford, Mass.—Granted authority to install automatic frequency control.

KGFI—Eagle Broadcasting Co., Inc., Corpus Christi, Tex.—Granted authority to install automatic frequency control.

WTAG—Worcester Telegram Pub. Co., Inc., Worcester, Mass.—Granted license for auxiliary transmitter; 580 kc., 500 watts, emergency purposes only.

KVOL—George H. Thomas, Robert M. Dean, Louis M. Sepaugh, T. B. Lanford, a partnership, d/b as Evangeline Broadcasting Co., Lafayette, La.—Granted voluntary assignment of license of station KVOL from George H. Thomas, Robert M. Dean, Louis M. Sepaugh, T. B. Lanford, a partnership trading as Evangeline Broadcasting Co., licensee, to Evangeline Broadcasting Co., Inc.

NEW—WGCM, Inc., Portable-Mobile (temp. b/c pickup).—Granted C. P. for new broadcast pickup station in the temporary emergency service; frequencies 1646, 2090, 2190 and 2830 kc., 50 watts.

NEW—Memphis Commercial Appeal, Inc., Portable-Mobile (temp. b/c pickup).—Granted C. P. for new broadcast pickup station in the temporary service; frequencies 1606, 2020, 2102 and 2760 kc., 35 watts.

NEW—Central States Broadcasting Co., Portable (temp. b/c pickup).—Granted C. P. for new broadcast pickup station in the temporary service; frequencies 1606, 2020, 2102 and 2760 kc., 30 watts.

NEW—WHBY, Inc., Portable-Mobile (exp. gen. exp.), 2 applications.—Granted C. P. for new general experimental station to be used as broadcast pickup station; frequencies 31100, 34600, 37600 and 40600 kc., 10 watts.

NEW—WJR, The Goodwill Station, Portable-Mobile.—Granted C. P. for new general experimental broadcast pickup station; frequencies 31100, 34600, 37600 and 40600 kc., 40 watts.

W9XHW—Northwestern Broadcasting, Inc., Minneapolis, Minn.—Granted license to cover C. P. for general experimental broadcast station; frequencies 31600, 35600, 38600, 41000, 86000-400000, 401000 kc. and above, 50 watts.

W10XGA—Miami Valley Broadcasting Corp., Portable-Mobile.—Granted license to cover C. P. for general experimental broadcast pickup station; frequencies 31100, 34600, 37600 and 40600 kc., 2.5 watts.

W3XEN—Havens & Martin, Inc., Portable-Mobile.—Granted license to cover C. P. for general experimental broadcast pickup station; frequencies 31100, 34600, 37600 and 40600 kc., 40 watts.

W2XR—John V. L. Hogan, d/b as The Scientific Broadcasting Service, Long Island City, N. Y.—Granted consent to voluntary assignment of license to Interstate Broadcasting Co., Inc.

SET FOR HEARING

NEW—KLA, Inc., La Grande, Ore.—Application for C. P. for new station; 1100 kc., 250 watts, daytime.

NEW—John S. Allen and G. W. Covington, Jr., Exchange Hotel Bldg., Montgomery, Ala.—Application for C. P. for new station; 1210 kc., 100 watts, daytime.

NEW—Fred J. Hart, Honolulu, T. H.—Application for C. P. for new station; 600 kc., 250 watts, unlimited time, site to be determined.

NEW—Bayou Broadcasting Co., Houston, Tex.—Application for C. P. for new station; 1210 kc., 100 watts, unlimited time.

NEW—Twin City Broadcasting Co., Inc., Lewiston, Maine.—Application for C. P. for new station; 1210 kc., 100 watts, unlimited time, site to be determined.

NEW—Thomas L. Evans and J. L. Milligan, Jefferson City, Mo.—Application for C. P. for new station; 920 kc., 500 watts, daytime, site to be determined.

NEW—Harold M. Finlay and Mrs. Eloise Finlay, La Grande, Ore.—Application for C. P. for new station; 1500 kc., 100 watts, daytime, site to be determined.

NEW—H. Wimpy, Albany, Ga.—Application for C. P. for new station; 1420 kc., 100 watts night, 250 watts day, unlimited time, site to be determined.

NEW—Eau Claire Broadcasting Co., Eau Claire, Wis.—Application for C. P. for new station; 1210 kc., 100 watts, unlimited time, site to be determined.

KFBB—Buttery Broadcast, Inc., Great Falls, Mont.—C. P., already in hearing docket, amended to read: Make changes in equipment, move transmitter to site to be determined, change frequency from 1280 kc. to 950 kc., increase day power from 2½ KW to 5 KW.

KSD—The Pulitzer Publishing Co., St. Louis, Mo.—Modification of license application, already in hearing docket, amended to read: Change operating time from sharing with KFuo to unlimited time. Requests facilities of KFuo.

NEW—Ed Klies, Helena, Mont.—C. P. (amended), 1280 kc., 1 KW night, 5 KW day, unlimited, site to be determined.

WHBC—Edward P. Graham, Canton, Ohio.—Consent to voluntary assignment of license and C. P. to Ohio Broadcasting Co.

WOWO—The Main Auto Supply Co., Fort Wayne, Ind.—Consent to transfer of control of corporation from Fred C. Zieg, C. R. Durbin and J. A. Beckers to Westinghouse Electric & Mfg. Co.

NEW—Cacha Valley Broadcasting Co., Logan, Utah.—C. P. amended to read: 1200 kc., 100 watts, unlimited time.

WGN—WGN, Inc., Chicago, Ill.—C. P. to install new equipment and antenna, increase power from 50 KW to 500 KW; site

to be determined. To be heard before the Broadcast Division.

KTRH—KTRH Broadcasting Co., Houston, Tex.—Application for modification of license to increase night power from 1 to 5 KW. (Present assignment, 1290 kc., 1 KW night, 5 KW day, unlimited time.) To be heard before the Broadcast Division.

WDOD—WDOD Broadcasting Corp., Chattanooga, Tenn.—Application for modification of license to increase night power from 1 to 5 KW. (Present assignment, 1280 kc., 1 KW night, 5 KW day, unlimited time.) To be heard before the Broadcast Division.

WCRW—Clinton R. White, Chicago, Ill.—Renewal of license, 1210 kc., 100 watts, specified hours. Temporary license granted subject to whatever action may be taken on renewal application.

KICA—Western Broadcasters, Inc., Clovis, N. Mex.—Application for modification of license to change hours of operation from specified hours to unlimited time.

KVOE—The Voice of the Orange Empire, Inc., Ltd., Santa Ana, Calif.—Application for renewal of license; 1500 kc., 100 watts, unlimited time.

NEW—The Tribune, Great Falls, Mont.—C. P., already in hearing docket, amended to read: 950 kc., 1 KW night, 5 KW day, unlimited, site to be determined.

NEW—C. E. Wilkinson Broadcasting Co., Inc., Mason City, Iowa.—C. P., already in hearing docket, amended to read: 1210 kc., 100 watts, unlimited time, site to be determined.

WSBT—The South Bend Tribune, South Bend, Ind.—C. P., already in hearing docket, amended to read: Make changes in equipment; install directional antenna for nighttime operation; change frequency from 1360 kc. to 1010 kc.; increase power from 500 watts, sharing with WGES to 1 KW, unlimited time; move transmitter and approval of proposed transmitter site at 4 miles southeast of center of South Bend on So. Jackson Rd., ¼ mile east of Miami Highway.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KFJB, Marshalltown, Iowa; KFXD, Nampa, Idaho; KIUJ, Santa Fe, N. Mex.; KMLB, Monroe, La.; KWTN, Watertown, S. Dak.; WAIM, Anderson, S. C.; WCMI, Ashland, Ky.; WCOL, Columbus, Ohio; WDAH, El Paso, Tex.; WEBR and auxiliary, Buffalo, N. Y.; WEDC, Chicago; WFBG, Altoona, Pa.; WGCM, Mississippi City, Miss.; WHBF, Rock Island, Ill.; WIBX, Utica, N. Y.; WIL, St. Louis, Mo.; WJBC, Bloomington, Ill.; WJBL, Decatur, Ill.; WJBW, New Orleans; WKOK, Sunbury, Pa.; WMBG, Richmond, Va., and auxiliary; WMFF, Plattsburg, N. Y.; WNBH, New Bedford, Mass.; WRAW, Reading, Pa.; WROL, Knoxville, Tenn.; WSJS, Winston-Salem, N. C.; WTEL, Philadelphia, Pa.; WTRC, Elkhart, Ind.

W1XBS—American-Republican, Inc., Prospect Township, Conn.—Granted renewal of experimental broadcast station license for the period June 1, 1936, to December 1, 1936, in exact conformity with existing license.

W2XR—John V. L. Hogan, d/b as the Scientific Broadcasting Service, Long Island City, N. Y.—Granted renewal of experimental broadcast station license for the period June 1, 1936, to December 1, 1936, in exact conformity with existing license.

W9XBY—First National Television, Inc., Kansas City, Mo.—Granted renewal of experimental broadcast station license for the period June 1, 1936, to December 1, 1936, in exact conformity with existing license.

W6XAI—Pioneer Mercantile Co., Bakersfield, Calif.—Granted renewal of experimental broadcast station license for the period June 1 to December 1, 1936, in exact conformity with existing license.

MISCELLANEOUS

NEW—Lookout Broadcasting Corp., Chattanooga, Tenn.—Granted postponement of hearing scheduled for May 20, 1936, to consider application for C. P. for new station to operate on 1420 kc., with 100 watts daytime.

WCAE—Pittsburgh Publishing Co., Pittsburgh, Pa.—Reconsidered renewal of license effective April 1, 1936, authorizing operation on 1220 kc., 1 KW night, 5 KW day, full time, with the use of the transmitter and antenna system described in license, because of protest of WREN, Tonganoxie, Kans. Authorized temporary continuance of use of facilities pend-

ing hearing and decision on application for regular renewal of license.

WPAX—H. Wimpy, Thomasville, Ga.—Retired to the closed files application for C. P. to make changes in equipment, increase power, and move transmitter, since applicant has failed to comply with requirements of Commission's letters.

APPLICATIONS DISMISSED

The following stations, heretofore set for hearing, were dismissed at request of applicants:

NEW—Northern Broadcasting Corp., Watertown, N. Y.—Applied for C. P., 1270 kc., 250 watts, daytime.

NEW—Ben L. Taylor, Phil B. Whitaker and Mrs. Phil B. Whitaker, Chattanooga, Tenn.—Applied for C. P., 1200 kc., 100 watts, daytime.

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Applied for C. P., 680 kc., 5 KW, daytime.

KOOS—Pacific Radio Corp., Marshfield, Ore.—Applied for modification of license, 1390 kc., 250 watts, unlimited time.

KWBG—The Nation's Center Broadcasting Co., Inc., Hutchinson, Kans.—Applied for C. P., 1120 kc., 1 KW, unlimited.

NEW—Evans Broadcasting Co., Kansas City, Mo.—Applied for C. P., 1370 kc., 100 watts, unlimited time.

NEW—Southland Broadcasting Corp., Chattanooga, Tenn.—Applied for C. P., 1200 kc., 100 watts, daytime.

ORAL ARGUMENTS

NEW—Ex. Rep. 1-217: C. G. Hill, Geo. D. Walker, and Susan H. Walker, Winston-Salem, N. C.—Oral argument to be held September 17, 1936.

NEW—Ex. Rep. 1-218: Central Broadcasting Co., Eau Claire, Wis.—Oral argument to be held September 17, 1936.

NEW—Ex. Rep. 1-220: A Stancart Graham, E. B. Baxter, and Norman Baxter, d/b as Pittsburg Broadcasting Co., Pittsburg, Kans.—Oral argument to be held September 17, 1936.

APPROVED MODULATION MONITOR

The Commission approved the following Modulation Monitor for use in broadcast stations to comply with Rule 139 and assigned approval number as given below:

Manufacturer's Name	Type	Approval No.
RCA Mfg. Company	Type 66-B	1553

APPLICATION DENIED

Evening Herald Pub. Co., Los Angeles, Calif.—Denied special authority to operate unlimited time pending the filing of and action on application for license to cover C. P.

APPLICATIONS RECEIVED

First Zone

WTAG—Worcester Telegram Publishing Co., Worcester, Mass.—580 Construction permit to install directional antenna, move transmitter from 20 Franklin Street, Worcester, Mass., to Shrewsbury St., Holden, Mass., and increase power from 500 watts to 1 KW.

NEW—WJR, The Goodwill Station, Portable-Mobile.—Construction permit for a new general experimental station to be operated on 86000-400000 kc., 40 watts.

NEW—The Courier-Journal Co. and The Louisville Times Co., Louisville, Ky.—Construction permit for a new general experimental station to be operated on 31600 kc., 100 watts. Amended to read: 31600, 35600, 38600, 41000 kc., 100 watts.

Third Zone

WMC—Memphis Commercial Appeal, Inc., Memphis, Tenn.—780 Modification of construction permit (B3-P-621) for changes

in equipment and increase in power, requesting extension of completion date from 7-19-36 to 1-19-37.

KFPL—C. C. Baxter, Dublin, Tex.—Modification of construction 1310 permit (B3-P-345) as modified to extend commencement and completion dates.

W4XBS—Memphis Commercial Appeal, Inc., Portable-Mobile.—License to cover construction permit for a new general experimental station.

W4XCA—Memphis Commercial Appeal, Inc., Memphis, Tenn.—License to cover construction permit for a general experimental station.

Fourth Zone

WHBU—Anderson Broadcasting Corp., Anderson, Ind.—License 1210 to cover construction permit (B4-P-438) for changes in equipment and increase in power.

WKBB—Sanders Brothers Radio Station, Dubuque, Iowa.—Construction permit to install new antenna, move studio from 1500 R. F. D. No. 1, E. Dubuque, Ill., to Hotel Julien, Dubuque, Iowa, and transmitter from same address to site to be determined, Julien Township, Iowa.

NEW—William Six, Portable-Mobile.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000, 86000-400000, 401000 kc. and above, 15 watts.

NEW—Frank O. Knoll and Julian F. McCutchan, St. Cloud, Minn.—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000 kc., 100 watts.

Fifth Zone

KIRO—Queen City Broadcasting Co., Seattle, Wash.—License to 650 cover construction permit (B5-P-766) for changes in equipment and to move transmitter and studio.

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Modification of license to change frequency from 950 kc. to 630 950 kc., power from 250 watts daytime to 250 watts day and night, and hours of operation from daytime to unlimited time. Amended to change requested frequency from 630 kc. to 1260 kc.

KRSC—Radio Sales Corp., Seattle, Wash.—Construction permit 1120 to install new equipment.

KVCV—Golden Empire Broadcasting Co., Redding, Calif.—Modification of construction permit (B5-P-546) to make changes 1260 in equipment, for approval of transmitter and studio sites at 2½ miles south of city (Bonny View Tract), Redding, Calif., and for approval of antenna system.

KGFJ—Ben S. McGlashan, Los Angeles, Calif.—Construction 1200 permit to install new equipment, change frequency from 1200 kc. to 1170 kc., power from 100 watts to 250 watts, 500 watts day.

NEW—Cache Valley Broadcasting Co., Logan, Utah.—Construction 1200 permit for a new station to be operated on 1370 kc., 100 watts, unlimited time. Amended to change frequency from 1370 kc. to 1200 kc.

KFJI—KFJI Broadcasters, Inc., Klamath Falls, Oregon.—License 1210 to cover construction permit (B5-P-1010) to make changes in equipment.

KFBB—Buttrety Broadcast, Inc., Great Falls, Mont.—Construction 1280 permit to install a new transmitter, erect a new antenna, and move transmitter from 5 miles south of town on 13th Street, Great Falls, Mont., to near Great Falls, Mont.

KID—KID Broadcasting Co., Inc., Idaho Falls, Idaho.—Modification of construction permit (B5-P-559) giving exact transmitter site as Yellowstone Highway, near Idaho Falls, 1320 Idaho, and install vertical antenna. Amended to change transmitter site from Yellowstone Highway, near Idaho Falls, Idaho, to near Idaho Falls, Idaho.

NEW—J. D. Keating, Harvey Wells, L. J. Keating, Joe M. 1500 Meyer and L. C. Keating, d/h as Vancouver Broadcasting Co., Vancouver, Wash.—Construction permit for a new station to be operated on 1500 kc., 100 watts, daytime.

NEW—W. P. Stuart, Prescott, Ariz.—Construction permit for a 1500 new station to be operated on 1500 kc., 100 watts, unlimited time, facilities of KPJM. Amended: Transmitter site and antenna to be determined.

NEW—Standard Radio, Inc., Hollywood, Calif.—Authority to transmit electrical transcriptions to foreign countries (CKAC, Montreal, Quebec; CHNS, Halifax, N. S.; CFRN, Edmonton, Alberta, Canada; CKPC, Brantford, Ont., Canada; and other Canadian stations.

Vol. 4 - - No. 26
MAY 29, 1936

FCC PROMULGATES NEW RULES

The Federal Communications Commission has promulgated general rules and regulations applicable to relay broadcast, international broadcast, visual broadcast, high frequency broadcast, and experimental broadcast stations, effective July 1.

In connection with these new regulations the Commission issued the following statement:

The Broadcast Division on May 21, promulgated new rules and regulations concerning all broadcast stations except regular broadcast stations in the band 550 to 1500 kilocycles. These broadcast stations are as follows:

- Relay broadcast stations (formerly broadcast pickup stations).
- International broadcast stations (formerly experimental relay stations).
- Visual broadcast stations, including television and facsimile.
- High-frequency broadcast stations (formerly general experimental stations authorized to operate as broadcast stations).
- Experimental broadcast stations.
- Special broadcast stations (formerly experimental broadcast stations on the frequencies of 1530, 1550 and 1570 kilocycles).

These new rules provide certain new restrictions and principles of operation that are fully set out in the attached copy of the new rules. All outstanding rules concerning these stations which are in conflict with the new rules are automatically cancelled.

The name "relay" broadcast station now applies to stations which were formerly called broadcast pickup stations. The new name "relay" is considered more in keeping with the actual service rendered by these stations. In the future these stations will be licensed only to the holders of regular broadcast station licenses. Two groups of frequencies are provided, one in the medium frequency band and the other in the very high frequency band. In both groups the licensees are required to notify the Commission two days before each operation for the purpose of relaying programs to be broadcast. Certain of the frequencies in the medium frequency band have been changed by two kilocycles to provide better frequency separation from other services. All licensees of these stations should read the new rules governing these stations carefully as certain other changes have been made.

The name "international" broadcast station now applies to those stations which were formerly called experimental relay stations. These stations are licensed for international service. There are certain new principles set out in the new rules that the licensees of these stations should study carefully.

The frequency bands 2000 to 2100 kilocycles and 2750 to 2850 kilocycles have been dropped for the television service. Experience to date has shown that a satisfactory picture in keeping with the development of the art cannot be transmitted successfully in these narrow bands. The stations now assigned these frequencies which are carrying on active programs of research and experimentation will be assigned specific frequencies in the bands 42,000 to 56,000 kilocycles and 60,000 to 86,000 kilocycles. One license will authorize both the visual and aural broadcast. There are certain other principles of operation involved in the new rules which the licensees of these stations should study carefully.

High-frequency broadcast stations are required to carry on active programs of research to hold a license. Licensees not carrying on this active program cannot be considered as making proper usage

of the assignment and full consideration will be given at the time of the renewal of license.

Experimental broadcast stations are provided for specific experimentation along lines other than those prescribed by other broadcast rules. Certain frequencies throughout the entire useful radio spectrum are made available for this purpose by Rule 229 as modified.

The name "special broadcast station" applies to stations formerly named "experimental" stations licensed to operate on the frequencies of 1530, 1550, and 1570 kilocycles. The new rules provide that all rules that apply to regular broadcast stations (Rules 69 to 181, inclusive) shall apply to special broadcast stations. This means that these stations must have frequency monitors, modulation monitors, protected equipment, etc.

It will be necessary to modify several of the outstanding licenses to comply with the new frequency allocation as provided in Rule 229 as modified by the Commission on May 13, 1936. The Broadcast Division's new rules as discussed above provide an allocation in compliance with the frequencies made available by the action of the Commission. A careful comparison should be made between your existing licenses with respect to the frequencies and class of broadcast service and that provided in the new rules and regulations. It may be necessary to change either or both.

So that these requirements may be discussed thoroughly and understood, an informal engineering conference is scheduled for June 8, 1936, at which all licensees affected should be represented, or should supply information to the Broadcast Division of the Commission as to the new frequencies that they desire in keeping with the new rules. All licensees of television broadcast stations should especially be present so that a definite assignment of a visual and aural frequency can be made in either the 42,000-56,000 kilocycle band or the 60,000-86,000 kilocycle band. If the licensees are not present so that an agreeable change of frequency can be effected, the Commission will, on July 1, 1936, issue a modified license specifying the frequency that it deems best in keeping with public interest, convenience and necessity, as provided in Rule 229 as modified.

The rules themselves are as follows:

"These Rules and Regulations are effective July 1, 1936.

General Rules and Regulations Applicable to Relay Broadcast, International Broadcast, Visual Broadcast, High Frequency Broadcast, and Experimental Broadcast Stations.

980. The operating frequency of the broadcast stations as listed in Table I shall be maintained within plus or minus the percentage of the assigned frequency as given in Table I.

Table I

Station	Tolerance
Relay Broadcast	
(a) 1622 to 2830 kc.	0.04%
(b) 31,100 to 40,600	0.05%
International Broadcast	0.01%
Visual Broadcast	
(a) Television	0.05%
(b) Facsimile	0.05% or less as required
High Frequency Broadcast	0.01%
Experimental Broadcast	0.05% or less as required

FOURTEENTH ANNUAL NAB CONVENTION

STEVENS HOTEL, CHICAGO, ILLINOIS

JULY 5, 6, 7, 8, 1936

981. (a) The licensee of each broadcast station listed in Rule 980, except relay broadcast stations, shall operate at the transmitter a frequency monitor independent of the frequency control of the transmitter.

(b) The frequency monitor shall be designed and constructed in accordance with good engineering practice and shall have an accuracy sufficient to determine that the operating frequency is within the allowed tolerance.

(c) The licensee of each relay broadcast station shall provide the necessary means for determining that the frequency of the station is within the allowed tolerance.

(d) The frequency of all stations listed in Rule 980 shall be checked at each time of beginning operation and as often thereafter as necessary to maintain the frequency within the allowed tolerance.

982. (a) Licenses for the following classes of broadcast stations will be normally issued for a period of one year expiring as follows:

<i>Class of Station</i>	<i>Date of Expiration</i>
Relay Broadcast	
(a) 1622 to 2830 kc.	October 1
(b) 31,100 to 40,600 kc.	November 1
International Broadcast	December 1
Visual Broadcast	
(a) Television	February 1
(b) Facsimile	March 1
High Frequency Broadcast	April 1
Experimental Broadcast	May 1

(b) Each licensee shall submit the application for renewal of license at least 60 days prior to the expiration date (Rule 103.15).

(c) A supplemental report shall be submitted with each application for renewal of license of a station operating on frequencies allocated on an experimental basis in accordance with the regulations governing each class of station.

983. (a) No frequency allocated on an experimental basis to broadcast stations listed in Rule 980 will be assigned exclusively to any licensee. In case interference will be caused by simultaneous operation, licensees shall endeavor to arrange satisfactory time division. If such agreement cannot be reached, the Commission will determine and specify the time division.

(b) The Commission may from time to time require the licensee of a station assigned frequencies on an experimental basis to conduct experiments that are deemed desirable and reasonable for the development of the service.

(c) The program of research and experimentation as offered by an applicant in compliance with the requirements for obtaining a license on the experimental frequencies shall be adhered to in the main, unless the licensee is authorized to do otherwise by the Commission.

(d) A licensee of a station assigned a frequency or frequencies on an experimental basis is not required to adhere to a regular schedule of operation but shall actively conduct a program of research and experimentation or transmission of programs, provided, however, licensees of experimental broadcast stations which are licensed to conduct special intermittent experiments, such as to develop and test commercial broadcast equipment, are required to operate only when there is a need therefor.

(e) A supplementary statement shall be filed with and made a part of each application for construction permit for a broadcast station which requests any frequency above 30,000 kilocycles, confirming the applicant's understanding:

1. That all operation upon these frequencies is on an experimental basis.
2. That these frequencies may not be the best suited to the particular service assigned.
3. That they may not be allocated eventually for such service.

984. (a) The licensee of each class of broadcast station listed in Rule 980 shall maintain adequate records of the operation, including:

1. Hours of operation.
2. Program transmitted.
3. Frequency check.
4. Pertinent remarks concerning transmission.
5. Research and experimentation conducted.
6. And any additional information specified in the regulations governing each class of station or for completing the supplemental report as required.

(b) The above information shall be made available upon request by authorized Commission representatives.

985. The licensee of each class of broadcast station listed in Rule 980 may make any changes in the equipment that are deemed desirable or necessary, provided:

1. That the operating frequency is not permitted to deviate more than the allowed tolerance.
2. That the fidelity of transmission is not impaired.
3. And that the power output complies with the regulations governing the same.

986. All classes of broadcast licenses authorize A₃, A₄ and/or special emission. In case A₁, or A₂ emission, or both, is necessary or helpful in carrying on any phases of experimentation, application setting out fully the needs should be made to, and authority therefor received from, the Commission.

987. In case all the general rules and regulations and the specific rules governing each class of broadcast station do not cover all phases of operation or experimentation with respect to external effects, the Commission may make supplemental or additional orders in each case as deemed necessary for operation in the public interest, convenience, and/or necessity.

RELAY BROADCAST STATIONS

1000. The term "relay broadcast station" means a station licensed to transmit over short distances where wire facilities are not available, programs or orders concerning such programs for broadcast by one or more regular broadcast stations in the band 550 to 1600 kilocycles.

1001. (a) A license for a relay broadcast station will be issued only to the licensee of a regular broadcast station; provided, however, in cases where it is impractical, impossible, or prohibited by laws or regulations for the licensee of a regular broadcast station to install, operate or maintain the necessary equipment under its legal control, the Commission may grant special temporary authority for each event to other persons to operate as a relay broadcast station equipment already licensed for another service, or equipment which may be installed under Section 319(b) of the Communications Act of 1934 without a construction permit.

(b) The licensee of a relay broadcast station is authorized to transmit commercial or sustaining programs and orders concerning such programs to its regular broadcast station and other broadcast stations transmitting the same program simultaneously, but is not authorized to transmit programs to be broadcast solely by other regular broadcast stations.

(c) Each application for temporary authority to operate a relay broadcast station from a person other than a licensee of a regular broadcast station shall be accompanied by an application for authority to broadcast the program from the licensee of the regular broadcast station proposing the broadcast.

(d) An application for special temporary authority to operate another class of station as a relay broadcast station shall specify a group of frequencies allocated in Rule 1003; provided, however, in case of events of national interest and importance which cannot be transmitted successfully to the nearest available wire facilities on these frequencies, other frequencies under the jurisdiction of the Commission may be requested, if it is shown that the operation thereon will not cause interference to established stations; and, provided further, that in no case will the Commission authorize the use of the international broadcast frequencies for this purpose.

(c) An application for special temporary authority to operate on frequencies not allocated by Rule 1003 or to operate another class of station as a relay broadcast station must be received by the Commission not less than ten days prior to the actual event to be broadcast, and shall contain complete information concerning the frequencies requested, the license of the station to be used, and the information specified in Rule 1002 (b), (1) (2) (3) (4). In case of emergencies, which shall be fully explained in the application, the Commission may waive the ten-day requirement specified herein.

1002. (a) The license of a relay broadcast station does not authorize operation except as provided in subsections (b), (c) and (d) of this Rule.

(b) An application which may be submitted either by letter or telegram, for authority to operate temporarily a relay broadcast station for each event or series of associated events to be broadcast, must be received at least two days before the first proposed operation, and shall include:

1. A statement as to the period of use desired.
2. Identification and succinct description of the event proposed to be broadcast.
3. A statement concerning the availability of wire facilities.
4. Location of the program transmitter and receiver.

(c) Relay broadcast stations licensed on the experimental frequencies allocated in Rule 1003 (c) may be operated at any time for experimental purposes without notice to the Commission if no interference results to established stations and the program transmitted is not rebroadcast.

(d) In case of events occurring about which the licensee had no means of obtaining information two days in advance, such as earthquakes, aeroplane accidents, fires, etc., the application to and authority from the Commission as required in subsection (b) of this rule will be waived, provided the Commission is advised by telegram sent before the broadcast as to the details of the events and the expected duration of the broadcast.

1003. (a) The following groups of frequencies are allocated for assignment to relay broadcast stations:

<i>Group A</i>	<i>Group B</i>	<i>Group C</i>
1622 kc.	1606 kc.	1646 kc.
2058	2022	2090
2150	2102	2190
2790	2758	2830

(b) One group including four frequencies will be assigned each station. The first application from any metropolitan area shall specify group A, the second group B, and the third group C, the fourth group A again, etc. Outstanding assignments not following this order will not be changed unless a need therefor develops. Additional applications shall specify the next unassigned group in sequence or any other group if it appears interference will be avoided thereby.

(c) The following groups of frequencies are allocated for relay broadcast stations on an experimental basis and may be changed without prior notice or hearing (experimental frequencies):

<i>Group D</i>	<i>Group E</i>
31,100 kc.	Any four frequencies above
34,600	86,000 kc. except in band
37,600	400,000 to 401,000 kc.
40,600	

(d) All four frequencies in Group D will be assigned each station. Applicants may request any four specific frequencies under Group E which appear most suitable for the experimental work to be conducted. The licensee of a station on Group D or E shall carry on research and experimentation for the advancement of relay broadcast art and development of these very high frequencies for relay broadcast services.

(e) Applications for authority to construct a station for operation on the experimental frequencies shall include a statement concerning the research and experiments to be conducted. The research and experiments shall indicate reasonable promise of substantial contribution to the development of the program relay services.

(f) A license authorizes operation on only one of the four assigned frequencies at any one time. In case it is desired to transmit programs and spoken orders concerning such programs simultaneously, two licenses are required though each will specify the same group of frequencies.

1004. In case two or more stations are licensed for the same group of frequencies in the same area and have been authorized to operate under Rule 1002 (b), the licensees shall endeavor to select frequencies to avoid interference. If a mutual agreement to this effect cannot be reached, the Commission shall be notified and it will specify the frequencies on which each station is to be operated.

1005. A relay broadcast station shall be operated with a power output not in excess of that necessary to transmit the program and orders satisfactorily to the receivers, and in no event greater than the licensed power.

1006. The licensee of a relay broadcast station assigned the experimental frequencies under Rule 1003 (c) shall submit a supplemental report with and made a part of each application for renewal of license as follows:

1. Number of hours operated for experimental purposes.
2. Developments in the relay broadcast service.
3. Propagation characteristics of the frequencies assigned with regard to relay broadcast service.
4. All developments or major changes in equipment.
5. Any other pertinent developments.

INTERNATIONAL BROADCAST STATIONS

1010. The term "international broadcast station" means a station licensed for the transmission of broadcast programs for international public reception. Frequencies for these stations are allocated from bands assigned (between 6,000 and 26,600 kilocycles

for broadcasting by Article 7, General Radio Regulations, annexed to the International Telecommunication Convention, Madrid, 1932.

1011. A license for an international broadcast station will be issued only after a satisfactory showing has been made in regard to the following, among others:

1. That the applicant has a program of research and experimentation which indicates reasonable promise of substantial contribution to the development of the international broadcast service.
2. That the station will render an international broadcast service.
3. That the program production and experimentation will be conducted by qualified persons.
4. That the applicant is legally and financially qualified and possesses adequate technical facilities to carry forward the program.
5. That the public interest, convenience and necessity will be served through the operation of the proposed station.

1012. (a) Licensees of international broadcast stations shall not broadcast programs for which they receive directly or indirectly any form of compensation but may transmit the programs of regular broadcast stations, including commercial stations, if the call letters when identifying both stations are given on their respective assigned frequencies only and the statement is made over the international broadcast station that the regular program of a broadcast station (identify by call letters) is being broadcast. In case of the rebroadcast of the program of any broadcast station, Rule 177 applies.

(b) No additional charge, direct or indirect, shall be made by the broadcast licensee for simultaneous transmissions by the international broadcast station and commercial accounts shall not be solicited by licensees of broadcast stations or by others upon representation that the program will also be transmitted by the international broadcast station.

(c) Programs of regular broadcast stations shall be transmitted only when they are of special international service or when programs for international service are not available.

(d) Station identification and program announcements shall be made with international significance suited for the foreign nation or nations for which the service is intended or in which the reception is believed to be best on account of the frequency, season and hour of operation.

1013. (a) The following groups of frequencies are allocated for assignment to international broadcast stations on an experimental basis:

<i>Group A</i>	<i>Group B</i>	<i>Group C</i>	<i>Group D</i>
6020 kc.	9510 kc.	11,710 kc.	15,110 kc.
6040	9530	11,750	15,150
6060	9570	11,770	15,170
6080	9590	11,790	15,190
6100		11,810	15,210
6140		11,830	15,230
		11,850	
		11,870	
		11,890	
<i>Group E</i>	<i>Group F</i>	<i>Group G</i>	<i>Group H</i>
15,250 kc.	17,760 kc.	21,460 kc.	25,625 kc.
15,270	17,780	21,480	25,650
15,290	17,800	21,520	25,675
15,310		21,540	25,725
15,330			25,750
			25,800
			25,825
			25,850
			25,875

(b) A separate license and call letters will be issued for each frequency except where frequencies in two or more groups are required to maintain a particular international broadcast service to certain foreign country or countries, one frequency from each of the groups required will be authorized by one license and call letters. In such cases these frequencies shall be used consecutively during a day as required and they shall not be used simultaneously either on the same transmitter or different transmitters.

(c) Not more than one frequency in any such group in subsection (a) of this rule will be assigned to a licensee unless it is satisfactorily shown that different foreign countries will be served by means of directional antennas.

(d) An applicant shall select the frequency which it is believed is best suited to the experiments to be conducted, for reception in

the foreign country for which the service is intended, and for a minimum of interference to other international broadcast stations.

(e) Applicants shall file a separate application for each frequency or frequencies requested in different groups as provided in subsection (b) of this rule.

1014. (a) No international broadcast station will be licensed for a power output rating less than 5 kilowatts.

(b) While conducting apparatus experiments and in case adequate signal is delivered in the foreign country being served, the operating power output may be less than 5 kilowatts.

1015. A supplemental report shall be filed with and made a part of each application for renewal of license and shall include statements of the following:

1. The number of hours operated on each frequency.
2. A list of programs transmitted of special international interest.
3. Outline of reports of reception and interference and conclusions with regard to propagation characteristics of the frequency assigned.
4. Research and experiments being carried on to improve transmission and to develop international broadcast and the frequencies assigned.
5. All developments or major changes in equipment.
6. Any other pertinent developments.

VISUAL BROADCAST STATIONS

Television and Facsimile Broadcast Stations

1030. The term "visual broadcast station" means a station carrying on the broadcasting of images for general public reception. There are two classes of visual broadcast stations, namely: television broadcast stations and facsimile broadcast stations.

1031. The term "television broadcast station" means a station licensed for the transmission of transient visual images of moving or fixed objects for simultaneous reception and reproduction by the general public. The transmission of the synchronized sound (aural broadcast) is considered an essential phase of television broadcasting and one license will be issued for both visual and aural broadcast as hereinafter set out.

1032. The term "facsimile broadcast station" means a station licensed to transmit images of still objects for record reception by the general public.

1033. Licenses for visual broadcast stations will be issued only after a satisfactory showing has been made in regard to the following, among others:

1. That the applicant has a program of research and experimentation which indicates reasonable promise of substantial contribution to the development of the visual broadcast art.
2. That the program of research and experimentation will be conducted by qualified engineers.
3. That the applicant is legally and financially qualified and possesses adequate technical facilities to carry forward the program.
4. That the public interest, convenience and/or necessity will be served through the operation of the proposed station.

1034. (a) Licensees of visual broadcast stations shall not transmit programs either aural, visual or record, for which they receive directly or indirectly, any form of compensation.

(b) In the case of experimental televising of the production of a commercial broadcast program, all commercial announcements not a part of the entertainment continuity shall be eliminated from the television broadcast except the mere statement of the name of the sponsor or product or the televising of the trade mark, symbol, slogan or product of the sponsor; provided, however, when the program transmission is incidental to the experiments being conducted and not featured and subject to interruptions as the experiments may require, the commercial announcements may be broadcast aurally.

(c) No additional charge, direct or indirect, shall be made by the licensee of a regular broadcast station for simultaneous transmission by a television broadcast station and commercial accounts shall not be solicited by licensees of regular broadcast stations or by others upon the representation that the program will also be transmitted by a television broadcast station.

(d) The synchronized sound (aural) program of a television broadcast station may be broadcast by a regular broadcast station provided:

1. That no announcements or references shall be made over the regular broadcast station regarding the operation of the television broadcast station, except the mere statement that the program being transmitted is the synchronized sound program of a television broadcast station (identify by call letters).
2. That the call letters when identifying the television broadcast station and the broadcast station shall be given on their respective assigned frequencies only.

1035. (a) The following groups of frequencies are allocated by bands for television broadcast stations on an experimental basis and may be changed without prior notice or hearing:

Group A	Group B	Group C
42,000 to 56,000 kc.	60,000 to 86,000 kc.	Any two adjacent frequencies above 110,000 kc. except in the band 400,000 to 401,000 kc.

(b) A license for a television broadcast station will authorize the use of two adjacent frequencies in any one group. The lower carrier frequency shall be for visual broadcast and the higher carrier frequency for the aural broadcast.

(c) A licensee will be granted only one station in each frequency group for operation in the same service area.

(d) An application may be made for two adjacent frequencies (one for the visual and the other for the aural carrier) in any frequency group. However, if it is desired to operate in more than one frequency group, it will be necessary to make separate applications, one for each.

(e) Applicants shall specify the band width required for the proposed transmission.

(f) Carrier frequencies shall be so selected that no emission from any cause will result outside the bands specified in subsection (a) of this rule.

(g) An applicant shall select the frequency which is believed suited for the experiments to be conducted and will cause the least or no interference to established stations.

1036. (a) No frequencies are specifically allocated for facsimile broadcast stations but an applicant may request any frequency specified in Rule 1073 which will cause the least or no interference to established stations.

(b) Each application shall specify the frequency or frequencies desired and the maximum modulating frequencies proposed to be employed.

(c) The operating frequency of a facsimile broadcast station shall be maintained in accordance with the frequency assignments as shown by Rule 980 provided, however, where a more strict adherence to the assigned frequency is necessary to prevent interference, the Commission will specify the tolerance.

(d) A facsimile broadcast station authorized to operate on frequencies regularly allocated to other stations or services shall be required to abide by all rules governing the stations regularly operating thereon, which are applicable to facsimile broadcast stations and are not in conflict with Rules 980 to 986, inclusive, and Rules 1030 to 1039, inclusive, excluding Rule 1035.

1037. The power output rating of a visual broadcast station shall not be in excess of that necessary to carry forward the program of research. The operating power may be maintained at the maximum rating or less, as the conditions of operation may require.

1038. A supplemental report shall be filed with and made a part of each application for renewal of license and shall include statements of the following:

1. Number of hours operated for transmission of visual programs.
2. Comprehensive report of research and experimentation conducted.
3. Conclusions and program for further developments of the visual broadcast service.
4. All developments and major changes in equipment.
5. Any other pertinent developments.

HIGH FREQUENCY BROADCAST STATIONS

1050. The term "high frequency broadcast station" means a station licensed on the very high frequencies for transmission of aural programs for general public reception. The frequencies for these stations are above 25,000 kilocycles and are allocated for this service on an experimental basis subject to change without notice or hearing.

1051. A license for a high frequency broadcast station will be issued only after a satisfactory showing has been made in regard to the following among others:

1. That the applicant has a program of research and experimentation which indicates reasonable promise of substantial contribution to the development of very high frequency broadcasting.
2. That data will be taken on the ground wave propagation characteristics of these frequencies; on the shadows cast by buildings, hills, large bridges, etc.; on the noise level in different parts of the city; on the field intensity necessary to render good broadcast service; and on other allied phases of broadcast coverage.
3. That the research and experimentation will be conducted by qualified engineers.
4. That the applicant is legally and financially qualified and possesses adequate technical facilities to carry forward the program.
5. That the public interest, convenience and necessity will be served through the operation of the proposed station.

1052. (a) Licensees of high frequency broadcast stations shall not broadcast programs for which they receive directly or indirectly any form of compensation but may transmit the programs of regular broadcast stations, including commercial programs, if the call letters when identifying the stations are given on their respective assigned frequencies only and the statement is made on the high frequency broadcast station that the program of a regular broadcast station (identify by call letters) is being broadcast. (In case of the rebroadcast of the program of a broadcast station, see Rule 177.)

(b) No additional charge, direct or indirect, shall be made by the broadcast licensee for simultaneous transmissions by the high frequency broadcast station nor shall commercial accounts be solicited by licensees of regular broadcast stations or others upon representation that the program will also be transmitted by a high frequency broadcast station.

1053. (a) The following groups of frequencies are allocated for high frequency broadcast stations on an experimental basis and may be changed without prior notice or hearing:

Group A	Group B	Group C	Group D
25,950 kc.	26,400 kc.	31,600 kc.	40,300 kc.
26,050	26,450	35,600	41,200
26,100	26,500	38,600	41,600
26,150	26,550	41,000	41,800

Group E

Any four frequencies above 86,000 kc., except in the band 400,000 to 401,000 kc.

(b) Frequencies in groups A and B will be assigned exclusively for amplitude modulation with a band width for high fidelity transmission (30 kilocycles maximum). Frequencies in groups C and E will be assigned for either amplitude modulation with the above band width of frequency modulation with a total band width not greater than 200 kilocycles. Frequencies in group D will be assigned exclusively for frequency modulation with a band width of not greater than 200 kilocycles.

(c) In groups A, B and D only one frequency from each group will be assigned a licensee for operation in the same service area. A separate license and call letters will be assigned for each frequency. In group C all four frequencies and in group D any four frequencies will be authorized by each license. A license authorizes operation on only one of the four assigned frequencies at any one time.

(d) An applicant shall file separate application for each frequency requested in groups A, B or D. Each application therefor shall specify all four frequencies in group C and any four frequencies in group E.

(e) An applicant shall select the frequency which it is believed is best suited for the experiments to be conducted and which will cause the least or no interference to established stations.

(f) A licensee operating on a frequency in groups A or B shall request reports concerning any reception outside the North American Continent during operation from 10 a. m. to 2 p. m. local standard time. The request for reports shall be made at the time of station identification and at least every thirty minutes.

1054. (a) No high frequency broadcast station will be licensed for an output power rating greater than 1000 watts unless the

applicant can show that greater power is needed to carry on a special program of research.

(b) While conducting apparatus experiments and in case adequate signal for reliable service can be delivered with less power, the operating output may be reduced accordingly.

1055. Each high frequency broadcast station transmitter shall be equipped with automatic frequency control apparatus so designed and constructed that it is capable of maintaining the operating frequency within plus or minus 0.01 percent of the assigned frequency.

1056. A supplemental report shall be filed with each and made a part of the application for renewal of license and shall include statements of the following, among others:

1. The number of hours operated.
2. Data taken in compliance with Rule 1051 (2).
3. Outline of reports of reception and interference and conclusions with regard to propagation characteristics of the frequency assigned.
4. Research and experiments being carried on to improve transmission and to develop broadcasting on the very high frequencies.
5. All developments or major changes in equipment.
6. Any other pertinent developments.
7. Comprehensive summary of all reports received. See Rule 1053 (f).

EXPERIMENTAL BROADCAST STATIONS

1070. The term "experimental broadcast station" means a station licensed to carry on development and research for the advancement of broadcast services along lines other than those prescribed by other broadcast rules.

1071. (a) Licenses for experimental broadcast stations will be issued only after a satisfactory showing has been made in regard to the following, among others:

1. That the applicant has a program of research and development which cannot be successfully carried on under any of the classes of broadcast stations already allocated.
2. That the program of research has reasonable promise of substantial contribution to the development of broadcasting.
3. That the program of research and experimentation will be conducted by qualified persons.
4. That the applicant is legally and financially qualified and possesses adequate technical facilities to carry forward the program.
5. That the public interest, convenience and necessity will be served through the operation of the proposed station.

(b) A separate experimental broadcast station license will be issued for each development proposed to be carried forward. When it is desired to carry on several independent developments, it will be necessary to make a satisfactory showing and obtain a license for each.

1072. (a) A licensee of experimental broadcast stations shall broadcast programs only when they are necessary to the experiments being conducted. No regular program service shall be broadcast unless specifically authorized by the license.

(b) A licensee of experimental broadcast stations shall not broadcast programs for which it receives, directly or indirectly, any form of compensation but may transmit the programs of regular broadcast stations, including commercial programs, if the call letters when identifying the stations are given on their respective assigned frequencies only and a statement is made on the experimental broadcast station that the program of a regular broadcast station (identify by call letters) is being broadcast in connection with the experimental work. (In case of the rebroadcast of the program of a broadcast station see Rule 177.)

1073. (a) The following frequencies are allocated for assignment to general experimental stations in services other than broadcast and for experimental broadcast stations:

	1,614	23,100
2,396 }		25,700
2,398 }		26,000
2,400 }		27,100
3,490 }		30,100
3,492 }	3,492.5	31,100
3,495 }		31,600

4,795 }		33,100
4,800 }	4,797.5	34,600
		35,600
6,420 }		37,100
6,430 }	6,425	37,600
		38,600
8,650 }		40,100
8,660 }	8,655	40,600
		41,000
12,855 }		86,000 to 400,000
12,870 }	12,862.5	401,000 and above
17,300 }		
17,320 }	17,310	

(b) A license will be issued for more than one of these frequencies upon a satisfactory showing that there is need therefor.

(c) The frequencies suited to the purpose and in which there appears to be the least or no interference to established stations shall be selected.

(d) In cases of important experimentation which cannot be conducted successfully on the frequencies allocated in subsection (a) of this Rule, the Commission may authorize experimental broadcast stations to operate on any frequency allocated for broadcast stations or any frequencies allocated for other services under the jurisdiction of the Commission upon satisfactory showing that such frequencies can be used without causing interference to established services.

1074. (a) The operating frequency of an experimental broadcast station shall be maintained in accordance with the frequency tolerance as shown by Rule 980, provided, however, where a more strict adherence to the assigned frequency is necessary to prevent interference, the Commission will specify the tolerance.

(b) The power output rating of an experimental broadcast station will not be in excess of that necessary to carry on the program of research. The operating power may be maintained at the maximum rating or less, as the conditions of operation may require.

1075. A supplemental report shall be filed with and made a part of each application for renewal of license and shall include statements of the following, among others:

1. The number of hours operated.
2. Comprehensive report on research and experiments conducted.
3. Conclusions and program for further development of the broadcast service.
4. All developments and major changes in equipment.
5. Any other pertinent developments.

1076. An experimental broadcast station authorized to operate on frequencies regularly allocated to other stations or services, shall be required to abide by all rules governing the stations operating regularly thereon which are applicable to experimental broadcast stations and are not in conflict with Rules 980 to 986 inclusive, and Rules 1070 to 1075 inclusive.

SPECIAL BROADCAST STATIONS

970. (a) The following frequencies are allocated for assignment to special broadcast stations on an experimental basis: 1530, 1550 and 1570 kilocycles. Two or more stations may be licensed for simultaneous operation on each frequency.

(b) Licenses for special broadcast stations will be issued only after a satisfactory showing has been made in regard to the following, among others:

1. That the applicant has a program of research and experimentation which indicates reasonable promise of substantial contribution to the development and practical application of high fidelity broadcasting, and will be in addition to and advancement of the work done by regular broadcast stations.
2. That the program of research and experimentation includes a thorough study of advanced antenna design, field intensity surveys and plans for a comprehensive analysis of the response of listeners.
3. That the transmitter and all studios will be equipped so as to be capable of high fidelity transmission.
4. That the operation and experimentation will be under the direct supervision of a qualified engineer with an adequate staff of engineers qualified to carry on the program of research and experimentation.
5. That the programs transmitted, either sponsored or sustaining, will not interfere with the proper prosecution of the program of research and experimentation.
6. That the applicant is legally and financially qualified and possesses adequate technical facilities to carry forward the program of research and experimentation.
7. That the program of research and experimentation will be reasonably independent of the income derived from sponsored programs.
8. That the public interest, convenience and necessity will be served through the operation of the proposed station.

(c) The Commission may require from time to time a licensee of a special broadcast station to conduct experiments that are deemed desirable and reasonable for the development of the service.

(d) The program of research and experimentation as offered in compliance with the requirements of obtaining a license for a special broadcast station, shall be adhered to in the main unless the licensee is authorized to do otherwise by the Commission.

(e) The authorized power of a special broadcast station will not exceed 1 kilowatt. However, the licensee may operate at less than the authorized power where such operation facilitates experimentation.

(f) The licensee of a special broadcast station is not required to adhere to a regular schedule, but shall actively conduct a program of research and experimentation or transmission of programs.

(g) A supplemental report shall be filed with and made a part of each application for a renewal of license of a special broadcast station and shall include statements of the following in the order designated:

1. Comprehensive summary of all research and experimentation conducted.
2. Conclusions and outline of proposed program for further research and development.
3. Number of hours operated, including percentage of sponsored programs.
4. Fidelity characteristics of the equipment, including the transmitter, studio equipment and the telephone lines over which the programs are regularly carried from the studio to the transmitter and the methods used to determine such characteristics.

(h) All rules applying to regular broadcast stations shall apply equally to special broadcast stations, except where in conflict with any term of this rule.

DAVIS AMENDMENT REPEALED

The House of Representatives on Monday repealed the Davis amendment as provided for in S. 2243 introduced by Senator Wheeler. The identical bill passed the Senate a short time ago and the bill now goes to the President for his signature. As the bill passed the House and as it will become law it reads as follows:

"Be it enacted, etc., That section 302 of the Communications Act of 1934 is hereby repealed.

"SEC. 2. Subsection (b) of section 307 of such act is amended to read as follows:

"(b) In considering applications for licenses, and modifications and renewals thereof, when and insofar as there is demand for the same, the Commission shall make such distribution of licenses, frequencies, hours of operation, and of power among the several States and communities as to provide a fair, efficient, and equitable distribution of radio service to each of the same."

TEXAS BROADCASTERS ORGANIZE

At a meeting held in Fort Worth, May 23, the Texas broadcasters formed a permanent organization, selecting T. Frank Smith, KXYZ, Houston, President; Ralph S. Bishop, KFJZ, Fort Worth, Vice President; James R. Curtis, KFRO, Long View, Secretary-Treasurer; and Hugh Half, WOAI, San Antonio; Dick Niles, KRGV, Weslaco; O. L. Taylor, KGNC, Amarillo; and Earl Yates, KGKL, San Angelo, Directors.

Almost every station in the State was represented at the meeting. James W. Baldwin, Managing Director, attended the meeting.

NOTICE OF AMENDMENTS

June 4, 1936.

TO ALL MEMBERS:

In pursuance of the provisions contained in Article IX and By-Law 17 of the Constitution and By-Laws of the National Association of Broadcasters, Inc., notice is hereby given that certain amendments to the Constitution and By-Laws of the National Association of Broadcasters, Inc., as hereinafter described, will be presented for consideration at the annual membership meeting in Chicago, Illinois, July 6-8, 1936.

NOTES FOR THE SALES STAFF

Radio broadcasting still continues to gain as compared to the corresponding periods of last year. (See Total Broadcast Advertising, page 1353.)

The marked growth in the use of electrical transcriptions is particularly to be noted. (See Non-network Volume by Type of Rendition, page 1354.)

Especially to be noted are the types of sponsors which are making the greatest use of transcriptions in the national and local fields. (See Non-network Volume by Type of Rendition, page 1354.)

Lagging local broadcast advertising volume should be a challenge to sales staffs. (See Total Broadcast Advertising, page 1353.)

The Board of Directors, at a formal meeting held on April 27, 1936, by unanimous agreement proposed the following amendment to the By-Laws of the National Association of Broadcasters, Inc.: By-Law No. 1.

Strike out all of the first paragraph and insert the following in lieu:

"Effective September 1, 1936, bi-monthly dues of active members shall be payable January 1, March 1, May 1, July 1, September 1, and November 1, on the following basis:"

E. B. Craney (KGIR, Butte, Montana), has proposed the following amendments to the Constitution of the National Association of Broadcasters, Inc.:

Article V, Section (b)

Strike out the period (.) after the word "years" in line 5 and insert the following:

"provided, that one Director of each class shall be elected by and from the active members of each radio zone (as defined in the Communications Act of 1934), and provided further, that one of the Directors from each such zone shall be a member representing a local station."

Article V, Section (c)

Strike out the words "in addition to" and "such" in line 2.

Strike out all of lines 3 and 4.

Insert after the word "provided" in line 2 the following:

"and the active members of each zone shall elect such additional Directors as may be needed to fill the places of those from their respective zones whose terms expire on the date of such annual meeting."

Article VI

Insert after section (d) a new section as follows:

"(e) To more effectively carry out the objects set forth in this article of this Constitution and in order to more effectively preserve the present system of American broadcasting, it shall be the duty of the Directors of this Association to immediately put into effect and operation, upon such terms and conditions to the membership as may be necessary, a plan designed to make the facilities of all licensed broadcasting

FOURTEENTH ANNUAL NAB CONVENTION

STEVENS HOTEL, CHICAGO, ILLINOIS

JULY 5, 6, 7, 8, 1936

stations in these United States available impartially to all bonafide non-profit organizations, or groups of like character. That such facilities shall be equally available on the stations operated by members of this Association in time units of 5% or such other and increased percentages or allotments of time as the membership may hereafter approve, provided, however, such allotments of time in excess of 5% shall not be used on any one member station until that amount has been used on all member stations. It is the intentment of this amendment that radio time should be thus given to only bona-fide groups or bodies of non-profit organizations or character including religious, fraternal, educational labor organizations, and such other organizations as the Directors shall hereafter define as being non-profit, who will furnish their own programs, defray all costs and expenses therefor, and conduct them under their own supervision and responsibility. It shall be the duty of the Directors of this Association to make such rules, regulations, and provisions as are necessary and proper to carry out the terms of this amendment, and they have power to create a special department of this organization for that purpose. All programs of non-profit organizations carried over national networks shall count as part of the said time and the member affiliated stations agree, by the passage of this amendment, and their membership agreements herein, to allot solely by the provisions of this amendment for the purpose herein."

HALL & McCREARY COMPANY MUSIC

The Hall and McCreary Company of Chicago, Illinois, have addressed to broadcasting stations a form letter with reference to musical selections contained in their catalog and which permits the stations to use such music with the understanding that the station shall purchase a certain amount of their music.

The Managing Director has queried the publishers concerning this proposition and with the view of learning whether the publishers would agree to indemnify the stations against loss or damage sustained by the use of their copyrighted musical selections. In a letter just received by the NAB, the publishers advise that they cannot furnish the guarantee asked for. Member stations are advised against the use of any copyrighted musical selection under terms and conditions which do not adequately provide for indemnity against loss or damage sustained by the performance of such selections.

POWER INCREASE RECOMMENDED FOR WGBF

Broadcasting Station WGBF, Evansville, Ind., applied to the Federal Communications Commission to increase its daytime power from 500 to 1,000 watts. The station operates on 630 kilocycles.

Examiner R. H. Hyde in Report No. I-232 has recommended that the application be granted. He states that the use of increased daytime power by the station would tend to satisfy the need for increased service in the area served. The Examiner found also that no substantial increase in objectionable interference to the reception of other stations may be expected from the proposed change.

RADIO CENSORSHIP CHARGED

Oswald F. Schuette, president of the Short Wave Institute in a letter to the Federal Communications Commission charged it with an attempt to establish a censorship over broadcasting by its Rule 177 (d), effective July 1. He contends that this rule would create a censorship over the rebroadcast of foreign programs in violation of the Communications Act, and would be a step toward the censorship of domestic programs.

CHANGES RECOMMENDED FOR WHB

Broadcasting Station WHB, Kansas City, Mo., applied to the Federal Communications Commission to change its frequency from 850 to 1120 kilocycles, from daytime to full time operation and its power from 1,000 watts to 500 watts at night and 1,000 watts until local sunset.

Examiner Melvin H. Dalberg, in Report No. I-229 recommended that the application be granted. The Examiner found that a regional station, such as suggested by WHB "would be of interest and advantage to the community involved." He says further in connection with this application that "the record in this case clearly shows that the other broadcasting stations now serving Kansas City, which are of the highest excellence in their respective spheres, cannot satisfactorily render a local service at nighttime by reason of their network commitments." There are some chances of inter-

ference, says the Examiner, "but they are slight." He thinks that public interest would be served by granting the application.

RECOMMENDS POWER INCREASE FOR WIRE

Broadcasting Station WIRE, Indianapolis, Ind., operating on a frequency of 1400 kilocycles, unlimited time applied to the Federal Communications Commission to increase its nighttime power from 500 to 1,000 watts and its daytime power from 1,000 to 5,000 watts.

Examiner R. H. Hyde, in Report No. I-226 recommends that the application be granted on certain conditions. He says that "it is recommended that the application of WIRE for a construction permit be granted, subject however to conditions requiring that the antenna system be so constructed as to prevent any increase in the field intensity broadcast nighttime hours in the directions of Brooklyn, and Tulsa, requiring the submission of satisfactory proof of performance in accordance with the foregoing condition, and requiring the painting and illuminating of the antenna towers for protection of air traffic."

CASE DISMISSED WITH PREJUDICE

The Farmers & Bankers Life Insurance Company, applied to the Federal Communications Commission for a construction permit for the erection of a new broadcasting station at Wichita, Kans., to use 1210 kilocycles, 100 watts power and unlimited time on the air.

Examiner R. H. Hyde in Report No. I-228 recommends that the case be dismissed with prejudice. When the case was called for hearing the applicant failed to enter appearance and no evidence was offered in support of the application.

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

G. A. Dye, Tulsa, Okla. (2-2167, Form A-1)
Lava Cap Gold Mining Co., Ansonia, Conn. (2-2169, Form A-1)
Thorrez & Maes Mfg. Co., Jackson, Mich. (2-2170, Form A-1)
Barlow & Seelig Mfg. Co., Ripon, Mich. (2-2171, Form A-1)
Herring-Hall-Marvin Safe Co., Hamilton, Ontario (2-2172, Form A-1)
Unified Debentures Corp., Newark, N. J. (2-2173, Form E-1)
The Paraffine Companies, Inc., San Francisco, Cal. (2-2174, Form A-2)
Pressed Metals of America, Inc., Port Huron, Mich. (2-2175, Form A-2)
F. L. Jacobs Co., Detroit, Mich. (2-2176, Form A-2)
Iniskin Drilling Co., Los Angeles, Cal. (2-1900, Form A-1)

ADDITIONAL TIME FOR KGDM DENIED

Broadcasting Station KGDM, Stockton, Cal., operating on 1100 kilocycles, 1,000 watts power daytime applied to the Federal Communications Commission that it be allowed "to resume operation after the dominant stations in the First Zone suspended operation at night."

Examiner Ralph L. Walker in Report No. I-227 recommends that the application be denied. The Examiner found, among other things, that "the use of 1,000 watts as proposed by the applicant would result in serious interference of an existing Canadian station and a resultant curtailment of the present good service area of that station." He also calls attention to the fact that California and the Fifth Zone are already overquota for nighttime service.

DENY NEW CALIFORNIA STATION RECOMMENDED

The Union-Tribune Publishing Company applied to the Federal Communications Commission for a construction permit for the erection of a new broadcasting station at San Diego, Cal., to use 1420 kilocycles unlimited time, 100 watts and 250 watts LS.

Examiner Ralph L. Walker in Report No. I-231 recommends that the application be denied. In his conclusion the Examiner states that:

"The record fails to disclose in detail the type and character of service which the applicant proposes to render, and does not reveal any substantial need in the San Diego area for additional broadcast service. The proposed station would cause objectionable interference to, and result in the curtailment of the present good service area of an existing station in the State of Arizona. The granting of the present application would further increase the existing over-

quota status of the State of California and the Fifth Zone in violation of the Rules and Regulations of the Commission."

WISN RECOMMENDED FOR POWER INCREASE

Broadcasting Station WISN, Milwaukee, Wis., applied to the Federal Communications Commission to increase its power from 250 watts and 1,000 watts LS to 1,000 watts day and night, and to change the location of its transmitter. The station now operates unlimited time on 1120 kilocycles.

Examiner Melvin H. Dalberg in Report No. 230 recommends that the application be granted. The Examiner found that there is need for improved nighttime service in the area served by the station and he states that granting the application would be in the public interest.

BROADCAST ADVERTISING IN APRIL

Developments of the Month

Broadcast advertising volume in April amounted to \$8,829,488. Gross time sales of the medium experienced the usual seasonal decline, dropping 5.4% from the level of the preceding month. Local broadcast advertising showed the normal counter tendency during the month and rose 12.5% above the March level. The local rise is a reflection of the usual upswing in retail trade at this time of the year. Principal gains in non-network volume as compared with March occurred with regard to regional and local stations, due to the greater importance of local business on these types of transmitters than on clear channel stations.

Radio broadcast advertising continued to gain as compared with the corresponding period of the preceding year. Gross time sales were 9.5% above those of April 1935. Regional network and national non-network volume continued to show the greatest relative gains. Local radio advertising continued to lag behind the general field and was but 0.4% above the previous April. Local stations continued to show the greatest increase in non-network volume.

Electrical transcriptions showed the greatest gain as compared with both March and the corresponding month of last year. This was true with regard to both national and local business. Trends as to the volume of radio advertising sponsored by various product and service groups were fairly confused during the month. Declines were general as compared with March. Principal increases during the month included national non-network and local automotive advertising; regional network, national non-network, and local gasoline and accessory volume; local clothing and department store advertising and national non-network and local household equipment business.

Automotive advertising continued to show the most important gains as compared with the corresponding month of 1935. The marked rise in the miscellaneous group with regard to national network sponsorship indicated a continued trend toward a wider use of that portion of the medium. Regional network and national non-network gasoline and accessory advertising gained materially, while national non-network food volume also rose.

Advertising by retail establishments increased 12.3% above the March level, but remained 0.1% below that of the corresponding month of last year.

Total Broadcast Advertising

Total broadcast advertising over stations and networks during the month under review is set forth in Table I.

TABLE I
TOTAL BROADCAST ADVERTISING

Class of Business	1936 Gross Time Sales		
	March	April	Cumulative Jan.-Apr.
National networks	\$5,400,252	\$4,830,251	\$19,756,867
Regional networks	112,546	113,647	413,965
National non-network	2,097,400	1,937,800	7,608,350
Local	1,722,170	1,947,790	6,559,670
Total	\$9,332,368	\$8,829,488	\$34,338,852

Total broadcast advertising declined 5.4% as compared to the preceding month. National network volume decreased 10.6%, while national non-network business dropped 7.1%. Regional network volume rose 1.0%, contrary to the usual seasonal trend. Local broadcast advertising experienced the normal upswing for April and rose 12.5%.

Broadcast advertising continued to register gains as compared with the corresponding period of the preceding year. Total volume was 9.5% above the April 1935 level. Gains throughout the various portions of the medium were as follows: national networks 9.8%, regional networks 38.5%, national non-network 17.8%, local broadcast advertising 0.4%.

Comparison with Other Media

Advertising volume placed in major media during the month under consideration is found in Table II.

TABLE II
ADVERTISING BY MAJOR MEDIA

Advertising Medium	1936 Gross Time and Space Sales		
	March	April	Cumulative Jan.-Apr.
Radio broadcasting	\$9,332,368	\$8,829,488	\$34,338,852
National magazines	13,481,404	14,527,792	47,505,417
National farm papers.....	746,502	721,304	2,547,522
Newspapers	48,242,000	50,498,000	174,531,000
Total	\$71,802,274	\$74,576,584	\$258,922,791

National magazine volume gained 7.8% as compared with March, while newspaper lineage rose 4.7%. Both increases were in the nature of normal seasonal rises. National farm paper advertising decreased 3.4%.

All media gained as compared with the corresponding period of the preceding year. The greatest increase was experienced by national farm papers, whose volume increased 20.8%. National magazine volume rose 11.0%, while newspaper lineage increased 8.1%.

Non-network Advertising

Non-network advertising as a whole increased 1.7% above the March level, local gains more than offsetting national non-network declines. Clear channel station non-network volume declined 2.4% over the month, while regional and local station advertising increased 5.2% and 5.8%, respectively.

Local station non-network volume continued to show the greatest relative gain as compared with the previous year, exceeding the April 1935 level by 21.6%. Clear channel station non-network advertising increased 4.2% and regional station business 9.0%. Total non-network advertising gained 8.4% as compared with last April.

Broadcast advertising by power of station is found in Table III.

TABLE III
NON-NETWORK ADVERTISING BY POWER OF STATION

Power of Station	1936 Gross Time Sales		
	March	April	Cumulative Jan.-Apr.
Over 1,000 watts	\$1,788,350	\$1,745,470	\$6,603,990
250-1,000 watts	1,496,880	1,574,800	5,477,980
100 watts	534,340	565,320	2,086,050
Total	\$3,819,570	\$3,885,590	\$14,168,020

Non-network advertising in the South and Mid-West increased 5.5% and 4.8%, respectively, as against the preceding month. New England-Middle Atlantic State volume declined 3.1%, while that of the Mountain and Pacific States dropped 2.8%.

Compared with April of the previous year, New England-Middle Atlantic State volume decreased 9.5%, while Pacific and Mountain State business dropped 1.7%. The greatest gain was experienced in the South Atlantic-South Central States where non-network advertising increased 40.1% above that of last April. Non-network volume in the North Central States rose 12.7%.

Non-network advertising by geographical areas is set forth in Table IV.

TABLE IV

NON-NETWORK BROADCAST ADVERTISING BY GEOGRAPHICAL DISTRICTS

Geographical District	1936 Gross Time Sales		
	March	April	Cumulative Jan.-Apr.
New England-Middle Atlantic Area	\$889,700	\$861,840	\$3,097,290
South Atlantic-South Central Area	757,660	799,590	2,865,260
North Central Area	1,474,330	1,545,580	5,630,310
Pacific and Mountain Area ..	697,880	678,580	2,575,160
Total	\$3,819,570	\$3,885,590	\$14,168,020

Non-network Volume by Type of Rendition

Principal development of the month was the rise of electrical transcription volume in both the national and local fields. National transcription business increased 9.5% above the March level. Local volume rose 66.9%. In the national field, live talent sponsored program volume declined 22.4%, while announcements dropped 6.6% below March. Local live talent volume decreased 2.6%. Local record business increased 14.1% and announcements 25.0%.

The marked growth in national and local transcription business also constituted the outstanding development of the month as compared with April of last year. National transcription business increased 50.7% and local volume 61.4%. The rise in transcription volume continues a trend which has been particularly marked since the beginning of the current year.

The use of transcriptions in the national non-network field is comparatively widely scattered. The proportion of total non-network business represented by transcriptions on the part of the principal groups using them is as follows: automotive 86.0%, gasoline and accessories 35.0%, foodstuffs 60.0%, drugs 35.0%, tobacco 50.0%, miscellaneous 50.0%. In the local field, clothing, foodstuffs, and household equipment volume was represented by transcriptions to the extent of approximately 40.0%. In the case of department stores, transcriptions comprised about 45.0% of total volume.

Live talent volume declined 4.1% below the April 1935 level in the local field and rose but 2.2% in the national field. The local decline represents a definite trend which has existed for several months. In the case of national live talent volume, the relatively small increase during April seems to be an indication that the marked rise which has taken place in this field during the past two and one-quarter years is approaching the stabilization point.

Announcements continued to decline, dropping 2.5% in the national field and 6.0% in the local field. Local record advertising decreased 9.5%.

National non-network and local broadcast advertising volume by type of rendition is found in Table V.

TABLE V

NON-NETWORK BROADCAST ADVERTISING BY TYPE OF RENDITION

Type of Rendition	National Non-network		1936 Gross Time Sales Local		Total		Cumulative Jan.-Apr.

Sponsor Trends in April

Declines were general in the national network field as against March. The only increases were the following: beverages 21.9%, confectionery 17.6%, and tobacco 14.6%. Trends were fairly mixed with regard to regional network advertising. The principal increase is a 31.3% gain in gasoline and accessory volume.

Declines were fairly general in the national non-network field, though some increases of importance occurred. These were as follows: automotive 10.6%, gasoline and accessories 13.0%, house-

hold equipment 49.1%, and soap and kitchen supplies 13.5%. Trends were spotty in the local field. Principal increases were with regard to automotive, gasoline, clothing, house furnishings, and department store advertising.

Comparison with April 1935

Trends were rather confused in the national network field as compared with last April. Important gains were as follows: automotive 42.6%, cosmetics 21.4%, beverages 50.0%, and miscel-

Total	\$4,830,251	\$113,647	\$1,937,800	\$1,947,790	\$8,829,488

laneous 76.0%. Important declines included the following: drugs 33.2%, confectionery 22.2%, household equipment 57.7%, and financial advertising 23.0%.

There was a general increase with regard to regional network advertising. Principal gains were as follows: gasoline and accessories 40.3%, beverages 602.7%, confectionery 210.6%, soaps and kitchen supplies 271.7%.

Increases also were fairly general with regard to national non-network volume. The main gains in this field were as follows: automotive 45.2%, gasoline and accessories 54.9%, foodstuffs 34.6%, and radios 253.1%. Important declines included the following: beverages 24.5%, confectionery 58.2%.

The principal gains in the local field were a rise of 25.8% in automotive advertising and an increase of 84.1% in radio set volume. Clothing advertising fell 2.8% below the April 1935 level, while department store advertising decreased 6.0%.

Broadcast advertising volume during April by national and local sponsoring groups is found in Table VI.

Details as to trends in the various fields of sponsorship are as follows:

1a. **Amusements.** National non-network volume 86.2% below March and local 27.6% above. National non-network 70.0% under last April and local down 16.8%.

1. **Automotive.** National network advertising 17.5% below March. National non-network business up 10.6% and local 30.1%. Gains compared with last April as follows: national networks 42.6%, national non-network 45.2%, and local 25.8%.

2. **Gasoline and accessories.** Gains over March as follows: regional networks 31.3%, national non-network 13.0%, and local 21.4%. National network down 13.4%. Increases as compared with April 1935 as follows: national networks 3.1%, regional networks 40.3%, national non-network 54.9%. Local down 4.6%.

3. **Clothing.** National networks 32.4% below March and national non-network down 16.3%. Regional networks up 34.5% and local 10.9%. Declines from last April level as follows: national networks 42.3%, regional networks 92.1%, and local 2.8%. National non-network up 4.7%.

4. **Drugs and pharmaceuticals.** Declines from the preceding month as follows: national networks 17.6%, regional networks 54.5%, national non-network 29.3%, and local 21.6%. Decreases from level of April of previous year as follows: national networks 33.2%, regional networks 3.4%, national non-network advertising 2.3%, and local 62.1%.

5. **Toilet goods.** Regional network volume more than double that of March. Declines in other fields as follows: national networks 7.4%, national non-network 40.2%, and local 0.1%. National network volume 21.4% above last April and local up 2.8%. Regional network business down 1.3% and national non-network 17.3%.

6. **Foodstuffs.** Regional network volume 4.1% above March. Other declines as follows: national network 15.7%, national non-network 9.6%, and local 4.0%. Gains as compared to corresponding month of previous year as follows: national networks 9.9%, regional networks 112.1%, national non-network 34.6%, and local 1.8%.

7. **Beverages.** Increases over preceding month as follows: national networks 21.9%, regional networks 59.3%, and local 5.7%. National non-network down 8.6%. Increases over April 1935 as follows: national networks 50.0%, 602.7% for regional networks, and local 3.8%. National non-network down 24.5%.

8. **Confectionery.** National network volume 17.6% above March and local up 168.9%. Regional network advertising down 63.1% and national non-network 56.2%. Regional network business 210.6% above April 1935. Other portions of the medium down as follows: national networks 22.2%, national non-network 58.2%, local 2.5%.

9. **Household equipment.** National and regional networks down 29.8% and 8.4%, respectively. National non-network and local up 49.1% and 18.4% as compared to March. Declines from April of last year as follows: national networks 57.7%, regional networks 53.3%, and local 1.6%. National non-network business up 25.5%.

10. **Soap and kitchen supplies.** National network volume 0.7% below March and local down 4.2%. Regional network and national non-network business up 13.5% and 13.6%, respectively. Gains over last April as follows: national networks 7.1%, regional networks 271.7%, and local 31.3%. National non-network business down 11.3%.

11. **Insurance and financial.** Declines from March level as follows: national networks 37.6%, regional networks 3.9%, national non-network 5.5%, and local 18.7%. National network volume down 23.2% as compared to April 1935. Regional net-

work volume gained materially. National non-network business rose 64.5% and local 16.3%.

12. **Radios.** National network business 9.8% below March. Regional network volume up materially. National non-network business up 9.4% and local 4.6%. Gains compared to last April as follows: national networks 15.7%, national non-network 253.1%, and local 84.1%.

13. **Department and general stores.** National non-network business down 21.7% as compared to March, and local up 16.2%. Regional network up 25.0%. Compared to April of last year, national non-network down 24.7% and local 6.0%. Regional network business up materially.

14. **Tobacco products.** Gains over preceding month as follows: national networks 4.6%, regional networks 17.9%, national non-network 71.1%, and local 3.6%. Gains over April 1935 as follows: national networks 14.1%, regional networks 10.0%, and national non-network 23.0%. Local down 47.3%.

15. **Miscellaneous.** National networks and regional networks below March by 34.7% and 13.4%, respectively. National non-network and local business up 84.1% and 20.1%, respectively. General gains as against last April as follows: national networks 76.0%, regional networks 5.2%, national non-network 45.1%, and local 13.9%.

Retail Broadcast Advertising

Broadcast advertising by retail establishments increased 12.3% as compared with the preceding month. Gains were fairly general, the principal ones being as follows: automotive 15.5%, clothing 11.2%, drug stores 35.7%, household equipment dealers 65.9%, furniture stores 5.6%, and hardware stores 42.6%. Grocery stores declined 22.7% and gasoline stations and accessory stores 20.4%.

Total broadcast advertising by retail establishments decreased 0.1% as against April of last year. Trends within various groups were spotty. Important gains were as follows: automotive 23.2%, food retailers 9.9%, furniture stores 20.4%, and radio retailers 48.4%. Significant declines were as follows: filling stations and accessory stores 34.8%, restaurants 18.4%, household equipment dealers 4.5%, hardware stores 36.3%, and department stores 7.0%. Broadcast advertising by retail establishments is found in Table VII.

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2818. Alleging unfair competition in the sale of candy, a complaint has been issued against the **Vogan Candy Corporation**, 329 N. E. Eleventh Avenue, **Portland, Oregon**.

The complaint alleges that the respondent corporation packs candy in assortments so as to involve a lottery scheme whereby the ultimate purchaser may win, without additional cost, a package or a bar of candy. The punchboard device is used, according to the complaint.

Use of such a sales method, the complaint charges, tends to divert trade to the respondent from competitors who do not use the same or a similar scheme in the sale of their products.

No. 2819. Disparagement of the product of a competitor is alleged in a complaint issued against **Hoffman Beverage Co.**, 402 Grove St., Newark, N. J.

In soliciting the sale of and selling its product, the respondent corporation is said to have published disparaging representations, among which were assertions that "The vat-fresh taste of Hoffman Bottled Beer is due to the fact that Hoffman Beer is not heat-treated after bottling. * * * You taste the difference at the first sip. The only unpasteurized bottled beer in America."

According to the complaint, labels on bottles containing Hoffman Beer bear the statement that "Because of extraordinary biological control pasteurizing this beer is avoided. Thus its fine vat quality is fully retained."

No. 2820. **Jean Vivadou** and **Henry G. Lubin**, trading as **Jean Vivadou Co.**, 135 W. 20th St., New York City, and engaged in the manufacture and sale of "De Marsay" toilet sundries, are named respondents in a complaint alleging unfair methods of competition in violation of section 5 of the Federal Trade Commission Act.

The respondents allegedly represent in advertising matter and in other ways that one of their products, "Lagoona," is a "wonder" sea sponge spawned in Southern Pacific waters and contains the alchemy of the waters of the Pacific ocean; that it is taken to the laboratories of a nationally known chemist, treated with ultra-violet rays, and becomes "an aid to good health." The complaint charges that all of these representations are untrue, and that "Lagoona," instead of being a sea sponge possessing therapeutic value, is a vegetable known as a loofah, which grows on land and resembles a gourd.

No. 2821. Evasion of State tobacco taxes and use of counterfeit tax stamps to obtain sales advantages over competitors, are alleged in a complaint charging a **West Memphis, Ark.**, tobacco firm with unfair methods of competition in violation of the Federal Trade Commission Act. The respondents named are **Henry Loeb, Jr.**, and **Martha Huffman**, trading as **West Memphis Cigarette Co.**

Although doing business in Memphis, Tenn., where most of their competitors are situated, the respondents are alleged to operate an additional place of business at West Memphis, Ark., across the Mississippi River from Memphis, Tenn., enabling them to assist retail dealers illegally to evade the Tennessee tobacco tax, and to disrupt, injure and destroy the business and goodwill of competitors.

Distributing well known brands of cigars also sold by competitors, the respondents, according to the complaint, approach certain retail customers of competitors having in their possession boxes bearing the brand names of the well known cigars and cancelled Tennessee tobacco tax stamps, and sell to many such retailers boxes of these brands on which no Tennessee tobacco tax has been paid and which do not contain the cancelled tax stamps. This practice is alleged to enable retailers to refill their boxes containing cancelled tax stamps with cigars on which no tax has been paid, in violation of Tennessee laws.

No. 2822. A complaint has been issued against **Martin J. Leyden**, 168½ Thomas St., Seattle, Wash., charging unfair methods of competition in the sale of "Leyden's Hair Tonic."

The complaint alleges as false and exaggerated the respondent's claims, made in newspaper advertisements and in advertising literature, that his product removes dandruff completely, stops hair from falling and starts it to grow, stops itching scalp and restores new life to hair.

No. 2823. Alleging unfair competition in the sale of packaged mineral salts, a complaint has been issued against **Soap Lake Products Corporation**, 2013 Fourth Ave., Seattle, Wash., distributor of "Mother Nature Soap Lake Salts," and other products obtained from Soap Lake, Wash.

In advertising literature and radio broadcasts, the respondent is alleged to have asserted that its mineral products would prevent or cure or would be beneficial in the treatment of rheumatism, neuritis, athlete's foot, poison oak or ivy, hyperacidity, and other ailments. According to the complaint, these representations are exaggerated and misleading, as the beneficial properties, if any, of the respondent's products, are limited to laxative and diuretic action. The complaint alleges that the packaged products have no

therapeutic value for treatment of the diseases and afflictions named.

No. 2824. Unfair competition through use of advertising matter falsely implying Government or State approval of products is alleged in a complaint against **Service Products, Inc.**, 125 Rivington St., New York City, trading as **West Point Laboratories**, and **Sam, Harry and Irving Hagler**, individually and as officers of the respondent company.

Engaged in compounding toilet articles such as hair tonic, bay rum and lotions, which they sell to dealers and the public, the respondents are alleged to have advertised by means of the phrase "West Point—Natural Vegetable Oil—Hair Tonic—West Point Laboratories, N. Y.," together with a picture of a cadet in full military uniform. This advertising was presented in such a way, according to the complaint, that it conveyed the impression that the respondents' products were made according to United States Government specifications or adopted by the War Department for use of the West Point cadets. Such representations were false, deceptive, and misleading, according to the complaint, and in violation of the Federal Trade Commission Act.

No. 2826. **Charles N. Miller Co.**, 16 Medford St., Boston, is charged with unfair competition in the sale of candy, in violation of the Federal Trade Commission Act, under a complaint.

Assortments of candy sold by the respondent firm are so arranged as to involve use of a lottery scheme when sold and distributed to consumers, according to the complaint.

Stipulations

The Commission has issued the following cease and desist orders and stipulations:

No. 01366. **Albert S. Broel**, trading as **American Frog Canning Co.**, 3800 Jefferson Highway, New Orleans, selling canned frog products, live frogs, and a course of instruction in frog culture, agrees to stop advertising that the supply of wild frogs is either exhausted or has been practically exterminated. The respondent is alleged to have advertised that "We use large quantities of frogs every year and this huge demand, together with other markets, has exhausted the wild supply."

Other representations to be discontinued are the assertions: That frog meat has dietary value in treating diabetes or stomach disorder; that the respondent's system of frog culture is recognized as the most successful in the world; that the course of instruction is given free, so long as it is furnished only to purchasers of breeder frogs and its cost is included in the purchase price, and other representations.

No. 01367. **The Piso Co., Warren, Pa.**, agrees to stop asserting that "Piso's for Coughs" is a competent treatment or effective remedy for coughs, unless the allegation is limited to the preparation's value as an expectorant cough mixture, of benefit in coughs due to colds and minor throat irritations.

No. 01368. **Evelyn Corper**, trading as **Keystone Co.**, and **Keystone Service**, Box 4026, Philadelphia, selling imitation diamonds and rings, stipulates that she will cease advertising that any of her products are free, unless in fact they are sent to applicants without requiring payment. The respondent also agrees to stop alleging by pictorial representation or otherwise that a ring is included with imitation diamonds, when the offer applies only to imitation diamonds. Among other representations to be discontinued is one to the effect that any offer made in connection with the sale of the respondent's products is for a limited time, unless it is made clear that a definite time limit is fixed and adhered to by the respondent and orders are refused after expiration of such time.

No. 01369. **D. A. Prosser**, an individual, operating as **Old Dominion Service**, Petersburg, Va., selling a scheme recommended for winning money and bringing luck, called "The Magic Star System," agrees to stop representing that a "universal good luck charm" or coin or token possesses the virtue of making the carrier lucky, or that "The Magic Star System" is scientific and correct in principle, or based on research. The respondent is said to have advertised that "We give you scientific calculations and mathematical formulas so arranged to manipulate and to forecast winning results."

No. 01374. **Leon M. Nelson**, operating as **Nelson Laboratories**, 29 North Garfield Ave., Alhambra, Calif., dealing in "Nelson's Dental Plate Cleaner" and "Nelson's Dental Plate Brush", recommended for cleaning false teeth, agrees to stop alleging that the dental plate cleaner sterilizes false teeth, is a scientifically compounded antiseptic or will not scratch or injure the plate, and that use of the dental plate cleaner results in improved health. The re-

spondent stipulates that in soliciting salespersons or dealers, he will not make unmodified representations of earnings in excess of the average earnings of his active, fulltime salespersons. He agrees also to cease using the word "Laboratories" or "Laboratory" in his trade name or in advertising until such time as he shall actually own, maintain, or operate a laboratory.

No. 01375. Tayton Co., 3629 Main St., Kansas City, Mo., dealer in a food preparation called "Nutri", agrees to quit making the allegation that the preparation is an effective treatment for nervousness, insomnia, worry and other ailments; that the average user of the product will gain weight, and that the preparation contains all vitamins or minerals necessary to build nerves, glands, blood, tissue, body and energy.

No. 1667. Mannington Mills, Inc., Salem, N. J., manufacturing and selling felt base floor coverings, designated and advertised one of its products as "Rubbertext". The corporation agrees to cease using the word "rubber" alone or in conjunction with any other word, syllable or suffix so as to imply that its products are composed of rubber, or in substantial part of rubber, when such is not the fact.

No. 1668. In a stipulation entered into, the **Triad Manufacturing Co., Inc., Pawtucket, R. I.,** has agreed to cease representing in advertising or in printed matter that certain glass radio tubes it manufactures and sells are "metal tubes".

The stipulation of facts points out that glass tubes were in general use by the radio industry until 1935, when the so-called metal tubes became popularized in the trade and by the purchasing public, and also describes glass tubes as having the technical elements sealed in a vacuum in glass, while in the metal types the technical elements are contained in a vacuum in steel.

Specifically, the respondent corporation agrees to discontinue use of the words "metal tubes" as descriptive of its products, so as to imply that such products are those which have become popularly known as metal radio tubes.

The stipulation provides that if the technical elements of the respondent corporation's product are sealed in a vacuum in glass which is placed within a metal shell, and if the words "metal tube" are used to describe the shell, then such words shall be accompanied by other suitable words to indicate clearly that the product is not a tube wherein the technical elements are sealed in a vacuum in steel.

No. 1669. A. J. King and John B. Michael, co-partners, trading as Dr. King's Medical Co., Cincinnati, signed a stipulation to discontinue representations to the effect that "Dr. King's Positive Corn Remover" is a cure for corns or a reliable remedy for all types of corns, bunions, warts and moles, when such is not the fact. The respondents also agree to cease using on their letterheads the words "President" and "Vice-President" with the names, respectively, "A. J. King" and "J. B. Michael", and with their trade name, so as to imply that their business is that of a corporation or voluntary association; to cease use of the abbreviation "Dr." in their trade name and of the words "pharmaceutical" and "chemists" to convey the meaning that there is a physician, pharmacist or chemist associated with their business, and to discontinue use of the word "manufacturing" in a manner implying that they compound their product or own a factory where such product is made, when all such representations are untrue. They also will stop representing that they have offices in Detroit, New York City and Buffalo, when such is not the case.

No. 1670. A. Paladini, Inc., 540 Clay St., San Francisco, engaged in the sale of fish and sea food, entered into an agreement to cease using on invoices or in other printed matter the words "Red Snapper" to designate a species of fish other than that known to the trade and purchasing public as red snapper, and to cease using such words in any manner which may have the tendency to mislead purchasers into the belief that such fish is the species commonly known as red snapper, when such is not the fact.

No. 1671. Cohn-Hall-Marx Co., 1412 Broadway, New York City, selling fabrics to dress manufacturers and retailers of piece goods, stipulates it will stop using the word "Camelspun" or any other derivative or simulation of the word "camel" on labels affixed to its products which are not composed of camel's hair, and will cease using the word "Camelspun" or any simulation of the word "camel" to imply that its products are composed of camel's hair, when such is not the fact.

Nos. 1672-1673. Snell Corporation, Nashville, Tenn., according to the stipulation of facts, blends flour and sells it to Tennessee Mill & Feed Co. in bags which it marks with the words "Packed for Tennessee Mill & Feed Co., Birmingham, Alabama."

In its stipulation, Snell Corporation agrees to cease marking or stamping upon the bags in which its flour is packed and sold any

corporate or trade name containing the word "Mill," or any other word of similar import, to imply that the product is milled by the purchaser, when such is not a fact.

Tennessee Mill & Feed Co., Birmingham, Ala., in purchasing and selling flour, will discontinue use of the word "Mill" in its trade name or in any manner tending to mislead purchasers into the belief that it owns or operates a mill where the product it sells is manufactured.

No. 1674. J. A. Sanborn Co., Inc., 6 Union St., Boston, Mass., agrees to stop using the word "Whitefish" to describe any species other than that properly known as whitefish, and to cease using the same word alone or in connection with the words "Deep Sea", "Fillet", "Cusk", or with any other words which may imply that the product so designated is that species of fish properly known as whitefish, when such is not the fact.

No. 1677. Bolton-Smart Co., Inc., 19 South Market St., Boston, Mass., signed a similar agreement.

The stipulations point out that two species of whitefish are found in the Great Lakes, and another off the Pacific coast, while the cusk, allied to the cod, comes from the waters off the coasts of Northern Europe and America.

No. 2283. F. A. Martocchio Co., trading as Hollywood Candy Co., 1311 Glenwood Ave., Minneapolis, Minn., has been ordered to discontinue selling to wholesale dealers and jobbers candy so packed and assembled that its resale to the general public may be made by means of a lottery, gaming device, or gift enterprise.

Under the order to cease and desist, the respondent corporation is prohibited from supplying wholesalers and jobbers with assortments of candy which may be used, without rearrangement of the contents, to conduct a lottery in the sale of candy to the public, and from supplying them with punch boards or push cards which may be used in selling the candy at retail.

No. 2618. Canton Silk Mills, Inc., 469 7th Ave., New York City, has been ordered to cease and desist representing through use of the words "Mill", "Mills" or "Manufacturers", or other similar words, that it owns, operates or controls mills in which its products are manufactured, dyed, printed or processed.

Findings are that the respondent company, a converter of silk and rayon fabrics, used the trade name "Canton Silk Mills, Inc.", and the language: "Mills: Riverside, R. I.—Phenix, R. I.", in its advertisements. These representations, according to the findings, implied that the respondent operated and controlled mills for making silks or silk goods, when this was not true.

FEDERAL COMMUNICATIONS COMMISSION ACTION

While no announcement has been made and no official action taken to this time there is a general understanding at the Commission that hearings will not be held either by the Commission itself or by its Examiners during the months of July and August. This will allow the Examiners who are far behind in writing their recommendations on cases already heard to catch up with the calendar.

HEARING CALENDAR

Monday, June 8

INFORMAL ENGINEERING CONFERENCE

Subject: New rules concerning all broadcast stations except regular broadcast stations in the band 550 to 1500 kilocycles.

HEARING BEFORE AN EXAMINER

(Broadcast)

NEW—Pacific Acceptance Corp., San Diego, Calif.—C. P., 1200 kc., 100 watts, daytime.

KMTR—KMTR Radio Corp., Los Angeles, Calif.—Renewal of license, 570 kc., 1 KW, unlimited time.

Tuesday, June 9

HEARING BEFORE AN EXAMINER

(Broadcast)

KGFG—Oklahoma Broadcasting Co., Inc., Oklahoma City, Okla.—Modification of license, 1370 kc., 100 watts, unlimited time. Present assignment: 1370 kc., 100 watts, shares with KCRC.

KGFG—Oklahoma Broadcasting Co., Inc., Oklahoma City, Okla.—Authority to transfer control of corporation; **1370 kc.**, 100 watts, shares with KCRC.
 NEW—Fred A. Baxter, Superior, Wis.—C. P., **1200 kc.**, 100 watts, unlimited time.

Wednesday, June 10

HEARING BEFORE AN EXAMINER

(Broadcast)

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—C. P., **1120 kc.**, 500 watts, specified hours (unlimited except from 8 to 9 p. m. Mondays and Fridays).
 NEW—Community Broadcasting Co., Toledo, Ohio.—C. P., **1200 kc.**, 100 watts, daytime.
 WALR—WALR Broadcasting Corp., Zanesville, Ohio.—C. P. to move to Toledo, Ohio; **1210 kc.**, 100 watts, unlimited time.

Thursday, June 11

ORAL ARGUMENT BEFORE THE BROADCAST DIVISION

Examiner's Report No. I-204:

NEW—Christina M. Jacobson, d/b as The Valley Electric Co., San Luis Obispo, Calif.—C. P., **1200 kc.**, 250 watts, daytime.
 NEW—E. E. Long Piano Co., San Luis Obispo, Calif.—C. P., **1200 kc.**, 100 watts, unlimited time.

Examiner's Report No. I-200:

NEW—Merced Star Publishing Co., Merced, Calif.—C. P., **1040 kc.**, 250 watts, daytime.

Examiner's Report No. I-205:

WEAN—The Shepard Broadcasting Service, Inc., Providence, R. I.—C. P., **780 kc.**, 1 KW, unlimited time.

Examiner's Report No. I-186:

NEW—Advertiser Publishing Co., Ltd., Honolulu, T. H.—C. P., **11850 and 15230 kc.**, 2 watts, specified hours.

Examiner's Report No. I-216:

NEW—Mason City Broadcast Co., Emmons L. Abeles, Secy., Mason City, Iowa.—C. P., **1420 kc.**, 100 watts, unlimited time.

NEW—Northern Iowa Broadcasting Co., Inc., Mason City, Iowa.—C. P., **1420 kc.**, 100 watts, unlimited time.

NEW—Mason City Globe Gazette Co., Mason City, Iowa.—C. P., **1210 kc.**, 100 watts, unlimited time.

Friday, June 12

HEARING BEFORE AN EXAMINER

(Broadcast)

WPRO—Cherry and Webb Broadcasting Co., Providence, R. I.—C. P., **630 kc.**, 500 watts, 1 KW LS, unlimited time.

NEW—North Jersey Broadcasting Co., Inc., Paterson, N. J.—C. P., **620 kc.**, 250 watts, daytime.

WKRC—WKRC, Inc., Cincinnati, Ohio.—Modification of C. P. to extend completion date; **530 kc.**, 500 watts, $2\frac{1}{2}$ KW LS (S.A. for 1 KW), unlimited time.

WKRC—WKRC, Inc., Cincinnati, Ohio.—Modification of C. P. to make equipment changes; **530 kc.**, 1 KW, 5 KW LS, unlimited time. Present assignment: **530 kc.**, 500 watts, $2\frac{1}{2}$ KW LS (S.A. for 1 KW), unlimited time.

APPLICATIONS GRANTED

KMA—May Seed and Nursery Co., Shenandoah, Iowa.—Granted C. P. to move transmitter and install new radiator.

WKY—WKY Radiophone Co., Oklahoma City, Okla.—Granted C. P. to make changes in equipment; install vertical radiator, increase power from 1 KW night and day to 1 KW night, 5 KW day; **900 kc.**, unlimited time.

KGW—Oregonian Publishing Co., Portland, Ore.—Granted C. P. to make changes in equipment.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Granted C. P. to make changes in antenna.

KGY—KGy, Inc., Olympia, Wash.—Granted C. P. to install new equipment.

KFPY—Symons Broadcasting Co., Spokane, Wash.—Granted modification of C. P. approving transmitter site and approving antenna for 5 KW day.

KSCJ—Perkins Bros. Co., The Sioux City Journal, Sioux City, Iowa.—Granted modification of C. P. approving transmitter

site northeast of Sioux City; make changes in composite equipment; extend commencement date to 15 days after grant and completion date to 90 days thereafter.

WMBO—Peoria Broadcasting Co., Peoria, Ill.—Granted modification of C. P. to install new equipment; extend commencement date to immediately and completion date to 3 months hereafter.

KGy—KGy, Inc., Olympia, Wash.—Granted authority to make changes in automatic frequency control equipment.

WSAI—The Crosley Radio Corp., Cincinnati, Ohio.—Granted authority to determine operating power by direct measurement of antenna input in compliance with terms of Rule 137.

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Granted license to cover C. P. authorizing changes in equipment and move transmitter and studio locations.

WKAQ—Radio Corp. of Porto Rico, San Juan, P. R.—Granted license to cover C. P. authorizing changes in equipment, move transmitter, install new radiating system, and change hours of operation from one-half to unlimited time; **1240 kc.**, 1 KW.

WJJD—WJJD, Inc., Chicago, Ill.—Granted license to cover C. P. authorizing move of transmitter to Des Plaines, Ill., and erection of vertical radiator.

WEOA—Evansville on the Air, Inc., Evansville, Ind.—Granted license to cover C. P., **1370 kc.**, 100 watts, unlimited time.

WHBC—Edward P. Graham, Canton, Ohio.—Granted renewal of license on a temporary basis and designated renewal application for hearing.

WAML—New Laurel Radio Station, Inc., Laurel, Miss.—Granted license, **1310 kc.**, 100 watts, specified hours.

WCOP—Joseph M. Kirby, Boston, Mass.—Granted consent to voluntary assignment of license to Massachusetts Broadcasting Corp.

NEW—Lincoln Memorial University, Middlesboro, Ky.—Granted C. P. for new broadcast station; **1210 kc.**, 100 watts, unlimited time.

WSPD—Toledo Broadcasting Co., Toledo, Ohio.—Granted license to cover C. P. authorizing changes in equipment, increase in day power from $2\frac{1}{2}$ KW to 5 KW; **1340 kc.**, 1 KW night.

WMFN—Attala Broadcasting Corp., Clarksdale, Miss.—Granted C. P. to move station from Clarksdale, Miss., to Grenada, Miss.

WBBZ—Estate of Chas. Lewis Carrell, Deceased, Howard Johnson, Representative, Ponca City, Okla.—Granted extension of existing license on a temporary basis, **1200 kc.**, 100 watts, unlimited time, pending probate of will of C. L. Carrell.

KROC—Southern Minnesota Broadcasting Co., Rochester, Minn.—Granted renewal of license for the regular period; **1310 kc.**, 100 watts, unlimited time.

WSAJ—Grove City College, Grove City, Pa.—Granted renewal of license for the regular period; **1310 kc.**, 100 watts, specified hours.

WCAX—Burlington Daily News, Inc., Burlington, Vt.—Granted renewal of license for the regular period; **1200 kc.**, 100 watts, specified hours.

KGy—KGy, Inc., Olympia, Wash.—Granted renewal of license for the regular period; **1210 kc.**, 100 watts, unlimited time except when KTW is operating.

WOCL—A. E. Newton, Jamestown, N. Y.—Granted renewal of license on a temporary basis; **1210 kc.**, 50 watts, unlimited time.

KFYO—Plains Radio Broadcasting Co., Lubbock, Tex.—Granted renewal of license for the regular period; **1310 kc.**, 100 watts night, 250 watts day, unlimited time.

WMBO—WMBO, Inc., Auburn, N. Y.—Granted renewal of license for the regular period; **1310 kc.**, 100 watts, unlimited time.

KOOS—Pacific Radio Corp., Marshfield, Ore.—Granted renewal of license for the regular period; **1200 kc.** (modification to **1390 kc.** to be effective upon completion of vertical radiator), 250 watts daytime, from 6 a. m. to LS, PST.

WTHT—The Hartford Times, Inc., Hartford, Conn.—Granted modification of C. P. approving equipment, vertical radiator and transmitter and studio sites.

NEW—Bamberger Broadcasting Service, Inc., Portable-Mobile (Newark, N. J.) (2 applications).—Granted C. P., (exp. gen. exp.), frequencies **31100, 34600, 37600, 40600 kc.**, 2 watts.

NEW—Bamberger Broadcasting Service, Inc., Portable-Mobile (Newark, N. J.) (2 applications).—Granted C. P., (exp. gen. exp.), frequencies **31100, 34600, 37600, 40600 kc.**, 10.5 watts.

NEW—The Crosley Radio Corp., Portable-Mobile, Cincinnati, Ohio (2 applications).—Granted C. P. (exp. gen. exp. service), frequencies 31100, 34600, 37600, 40600 kc., 30 watts, unlimited.

W2XE—Atlantic Broadcasting Corp., near Wayne, N. J.—Granted C. P. (exp. relay b/c) to make changes in equipment, increase power from 5 to 10 KW.

SET FOR HEARING

NEW—Voice of Detroit, Mich., Detroit, Mich.—Application for C. P., 1120 kc., 500 watts night, 1 KW day, unlimited time. Site to be determined.

NEW—Orrin P. Kilhoun, Albany, N. Y.—Application for C. P., 1240 kc., 250 watts, unlimited time. Site to be determined.

NEW—J. E. Churchwell, G. O. Russell, H. O. Freeman, Jr., d/h as Panama City Broadcasting Co., Panama City, Fla.—Application for C. P. for new station, 1500 kc., 100 watts, daytime only.

NEW—Brownwood Broadcasting Co., Brownwood, Tex.—Application for C. P. for new station, 1370 kc., 100 watts, daytime only. Site to be determined.

NEW—Southern Broadcasting Corp., New Orleans, La.—Application for C. P. for new station, 1200 kc., 100 watts, shares-WJBW. Site to be determined. Facilities of WBNO.

NEW—Radio Enterprises, Inc., Hot Springs, Ark.—Application for C. P. for new station, 1310 kc., 100 watts, daytime. Site to be determined.

NEW—Cadillac Broadcasting Co., a Michigan corporation, Dearborn, Mich.—Application for C. P. for new station, 1140 kc., 500 watts, daytime only.

NEW—Asheville Daily News (Harold M. Thomas, Owner), Asheville, N. C.—Application for C. P. for new station, 1370 kc., 100 watts, unlimited time.

WIND—Johnson-Kennedy Radio Corp., Gary, Ind.—Application for renewal of license, 560 kc., 1 KW night, 5 KW day, unlimited time.

WBNO—The Coliseum Place Baptist Church, New Orleans, La.—Application for renewal of license, 1200 kc., 100 watts, shares time with WJBW equally; temporary license granted pending outcome of hearing.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KBTM, Jonesboro, Ark.; KDON, Del Monte, Calif.; WFAM, South Bend, Ind.; WHBY, Green Bay, Wis.; WIBU, Poynette, Wis.; WMFG, Hibbing, Minn.; WTAL, Tallahassee, Fla.

The following stations' licenses were extended on a temporary basis for a period of 1 month, pending receipt and/or action on application for renewal of licenses:

WMFN, Clarksdale, Miss.; WSON, Birmingham, Ala.; and WWAE, Hammond, Ind.

KGDE—Charles L. Jaren, Fergus Falls, Minn.—Granted renewal of license on a temporary basis only subject to whatever action may be taken by the Commission upon pending application for renewal.

KVOS—KVOS, Inc., Bellingham, Wash.—Granted renewal of license on a temporary basis only subject to whatever action may be taken by the Commission upon pending application for renewal.

KWEA—International Broadcasting Corp., Shreveport, La.—Granted renewal of license on a temporary basis only subject to whatever action may be taken by the Commission upon pending application for renewal.

WRBL—WRBL Radio Station, Inc., Columbus, Ga.—Granted renewal of license on a temporary basis only to conform to the Commission's action of April 3, 1936, with reference to this station's application for renewal, for the period ending July 14, 1936.

WATL—J. W. Woodruff and S. A. Cisler, Jr., d/b as Atlanta Broadcasting Co., Atlanta, Ga.—Present license further extended on a temporary basis only for the period June 1 to July 1, 1936, subject to such action as may be taken upon the pending application for renewal.

WJEJ—Hagerstown Broadcasting Co., Hagerstown, Md.—Present license further extended on a temporary basis only for the period June 1 to July 1, 1936, subject to such action as may be taken upon the pending application for renewal.

WWL—Loyola University, New Orleans, La.—Special experimental temporary authority, heretofore issued stations

KWKH and WWL, further extended for the period June 1 to July 1, 1936, subject to the same conditions as contained in the existing authorities to said stations, pending consideration of the pending petition of station WLWL and petitions in opposition thereto.

MISCELLANEOUS

KPPC—Pasadena Presbyterian Church, Pasadena, Calif.—Modification of license to increase power to 100 watts issued to KPPC in conformity with Commission's action of February 8, 1936, inasmuch as applicant has now complied with the proviso contained therein.

NEW—Bell Broadcasting Co., Temple, Tex.—Denied petition asking the Commission to reject the application of Eugene DeBogory (tem-Bel Broadcasting Co.), as in cases of default for a C. P. to operate a new broadcast station at Temple, Tex., on the frequency 1310 kc., 100 watts, daytime only.

NEW—F. N. Pierce, Taylor, Tex.—Denied motion for a continuance of hearing on application for a permit for the establishment of broadcast station at Taylor, Tex., to operate on 1310 kc., 100 watts, daytime only.

WRBC, Inc., Youngstown, Ohio.—Granted request for a continuance of hearing now scheduled for June 2, 1936, on application for permit to erect a new station at Youngstown, Ohio, to operate on 890 kc., 1 KW.

Fresno Broadcasting Co., Fresno, Calif.—Denied petition for order to retake depositions in support of application for a permit to erect new broadcast station at Fresno.

KFPL—C. C. Baxter, Duhlin, Tex.—Granted application for renewal of license, also two applications for modification of C. P. authorizing equipment changes, the removal of the transmitter, and operation with power of 200 watts LS and 100 watts night, approval of the transmitter site, and extension of time within which to complete construction.

KOMA—National Radio Mfg. Co., Oklahoma City, Okla.; KTAT—KTAT Broadcasting Co., Fort Worth, Tex.; WACO—Central Texas Broadcasting Co., Inc., Waco, Tex.—Referred to docket section requests that a date for hearing of applications for authority to voluntarily assign licenses to Hearst Radio, Inc., be fixed for the month of June with instructions to name date as the conditions of the docket will permit.

A. W. Hayes, Erie, Pa.—Denied motion requesting the Commission to advance the date of oral argument from September 10 to June 4, 1936, on application for a permit to erect a station to operate on 1270 kc., 500 watts night, 1 KW LS.

Plain Dealer Pub. Co., Monroe F. Rubin and Ruth Ruhin (through their attorneys), Cleveland, Ohio.—Granted applications for transfer of control of the licenses of stations WHK and WJAY of Cleveland, Ohio, to the U. B. Company, a subsidiary of the Plain Dealer Publishing Co. Reconsidered action of December 10, 1935, when applications were designated for hearing. WHK operates on 1390 kc., 1 KW night, 2½ KW day, unlimited time. WJAY operates on 610 kc., 500 watts, daytime.

Red River Valley Broadcasting Corp. of Sherman, Tex.—Reconsidered action of April 24, 1936, in designating for hearing application to erect new station to operate on 1310 kc., 100 watts daytime only, and granted same without a hearing.

John E. Fetzer, Saginaw, Mich.—Granted petition for withdrawal of application, without prejudice, for permission to establish a broadcast station at Saginaw, Mich.

Central Broadcasting Co., Eau Claire, Wis.—Granted motion to strike exceptions of Midway Broadcasting Co. to Examiner's Report No. 1-218. Order granting the request of Midway Broadcasting Co. for oral argument was cancelled and the application of the Central Broadcasting Co. for a permit to establish a broadcast station at Eau Claire to operate on 1050 kc., 250 watts, daytime, was placed on the calendar for final action by the Broadcast Division.

California Sales Contract Co., San Francisco, Calif.—Granted request to withdraw application for C. P. to operate the station at San Francisco on a frequency of 1280 kc., 500 watts, 1 KW LS, unlimited time. Application dismissed with prejudice.

Steffens Ice & Ice Cream Co., Wichita, Kans.—Denied motion to withdraw application for permit for a new station at Wichita, Kans., and have the same dismissed without prejudice.

APPLICATIONS RECEIVED

First Zone

- WSYR-WSYU—Central New York Broadcasting Corp., Syracuse, 570 N. Y.—License to use old composite transmitter as an auxiliary transmitter (250 watts).
- WJAR—The Outlet Co., Providence, R. I.—License to cover construction permit (B1-P-333) as modified for changes in equipment, move of transmitter, and increase in power; install directional antenna.
- WCAX—Burlington Daily News, Burlington, Vt.—Authority to 1200 transfer control of corporation from Bertha Jackson to Mary Jackson Forbes and from Mary Jackson Forbes to Bertha R. Wells Jackson, 109 shares of common stock. Amended to request the transfer of 109 shares of common stock from Bertha Jackson to Mary Jackson Forbes only.
- NEW—Continental Radio Co., Washington, D. C.—Construction 1230 permit for a new station to be operated on 1230 kc., 1 KW, unlimited time.
- WMFF—Plattsburg Broadcasting Corp., Plattsburg, N. Y.—Modification of license to change hours of operation from daytime to daytime until 7:30 p. m., using 100 watts power at night. Amended to change requested hours of operation from daytime until 7:30 p. m. to unlimited time.
- NEW—Continental Radio Co., Washington, D. C.—Construction 1310 permit for a new station to be operated on 1310 kc., 100 watts, 250 watts day, unlimited time, contingent upon WOL being granted frequency of 1230 kc.
- WNBC—William J. Sanders, New Britain, Conn.—Construction 1380 permit to make changes in equipment and increase power from 250 watts to 1 KW. Amended to install directional antenna for night and day use, change requested power from 1 KW to 250 watts, 1 KW day, and hours of operation from daytime to unlimited time.
- NEW—New England Radio Corp., Bridgeport, Conn.—Construction 1420 permit for a new station to be operated on 1370 kc., 100 watts, daytime. Amended to change frequency from 1370 kc. to 1420 kc.

Second Zone

- NEW—The Pottsville Broadcasting Co., Pottsville, Pa.—Construction 580 permit for a new station to be operated on 580 kc., 250 watts, daytime.
- WCMI—The Ashland Broadcasting Co., Ashland, Ky.—Construction 1310 permit to make changes in equipment and increase power from 100 watts to 100 watts, 250 watts daytime.
- WIBM—WIBM, Inc., Jackson, Mich.—License to cover construction permit (B2-P-976) for changes in equipment.
- WRAK—WRAK, Inc., Williamsport, Pa.—Construction permit to 1370 make changes in equipment (antenna) and move transmitter from 244 West Fourth Street, Williamsport, Pa., to 1631 W. 3rd, Williamsport, Pa. Amended to change proposed transmitter site from 1631 W. 3rd Street to 1561 W. 4th Street, Williamsport, Pa., and install a new transmitter.
- WKBZ—Karl L. Ashbacher, Muskegon, Mich.—Construction permit 1500 to move transmitter from Occidental Hotel, Western Ave. at Third Street, Muskegon, Mich., to Forest Ave. at Creston Street, Muskegon, Mich., and install a vertical antenna.
- NEW—R. Morris Pierce, Portable.—Construction permit for a new general experimental station to be operated on 25700, 27100, 31100, 35600, 37100, 41000, 86000-400000 * kc. and above, 100 watts. Amended to delete 31100 and 37100 kc. and add 31600 and 38600 kc. * Also 401000 kc.

Third Zone

- WDAE—Tampa Times Co., Tampa, Fla.—Modification of license 550 to change frequency from 1220 kc. to 550 kc.
- WREC—WREC, Inc., Memphis, Tenn.—Modification of license to 600 increase power from 1 KW, 2½ KW day, to 1 KW, 5 KW day.
- WPTF—WPTF Radio Co., Raleigh, N. C.—Extension of special 680 experimental authorization to operate from local sunset to 8 p. m., PCT, on 1 KW power for period from 8-1-36 to 2-1-37.
- WPTF—WPTF Radio Co., Raleigh, N. C.—Extension of special 680 experimental authorization to use W. E. 6-B transmitter as

an auxiliary using 1 KW power, during special authorization to operate from local sunset to 8 p. m., PCT, for period 8-1-36 to 2-1-37.

- KRLD—KRLD Radio Corp., Dallas, Tex.—Extension of special 1040 experimental authorization to operate simultaneously with WTIC for period 8-1-36 to 2-1-37.
- KFXR—Exchange Ave. Baptist Church of Oklahoma City, Oklahoma City, Okla.—Construction permit to install new equipment.
- KFJZ—Fort Worth Broadcasters, Inc., Fort Worth, Tex.—License 1370 to cover construction permit (B3-P-1015) for new equipment and increase in power.
- NEW—Dallas Broadcasting Co., Dallas, Tex.—Construction permit 1500 for a new station to be operated on 1500 kc., 100 watts, daytime. Amended to change name from A. Earl Cullum, Jr., to Dallas Broadcasting Co.

Fourth Zone

- KWBG—The Nation's Center Broadcasting Co., Inc., Hutchinson, 550 Kans.—Construction permit to make changes in equipment; increase power from 100 watts to 250 watts; change frequency from 1420 kc. to 550 kc.; move transmitter from 101 E. Avenue "A", Hutchinson, Kans., to Hutchinson, Kans.; and make changes in antenna, using directional antenna at night.
- NEW—Harry G. Kipke, Ann Arbor, Mich.—Construction permit 630 for a new station to be operated on 630 kc., 500 watts, daytime.
- NEW—National Battery Broadcasting Co., St. Paul, Minn.—Construction 920 permit for a new station to be operated on 920 kc., 1 KW, unlimited time. Amended to make changes in equipment.
- KGBZ—KGBZ Broadcasting Co., York, Nebr.—Authority to install 930 automatic frequency control.
- NEW—Walker Jamar, Duluth, Minn.—Construction permit for a 1200 new station to be operated on 1500 kc., 100 watts, unlimited time. Amended to change requested frequency of 1500 kc. to 1200 kc. and omit request for KGFK's facilities.
- WHLB—Head of the Lakes Broadcasting Co., Virginia, Minn.—1370 Modification of construction permit (B4-P-329) for extension of completion date.
- WEHS—WEHS, Inc., Cicero, Ill.—Modification of license to 1420 change specified hours as specified on license from Central Standard Time to Eastern Standard Time. Amended to change specified hours.

Fifth Zone

- KOB—New Mexico College of Agriculture and Mechanic Arts, 1180 Albuquerque, N. Mex.—Voluntary assignment of license from New Mexico College of Agriculture and Mechanic Arts to Albuquerque Broadcasting Co. (no stockholders' liability).
- KSUN—Copper Electric Co., Inc., Lowell, Ariz.—Construction 1200 permit to make changes in equipment, install a vertical antenna, and increase power from 100 watts to 100 watts, 250 watts day.
- NEW—Wyoming Radio Corp., Cheyenne, Wyo.—Construction 1210 permit for a new station to be operated on 1210 kc., 100 watts, unlimited time.
- NEW—The News Press Publishing Co., Santa Barbara, Calif.—1280 Construction permit for a new station to be operated on 1410 kc., 500 watts, unlimited time. Amended to change requested frequency from 1410 kc. to 1280 kc.
- KCRJ—Charles C. Robinson, Jerome, Ariz.—Authority to install 1310 automatic frequency control.
- KBPS—Benson Polytechnic School, Portland, Ore.—Authority to 1420 install automatic frequency control.

Puerto Rican Zone

- NEW—Puerto Rico Advertising Co., Mayaguez, P. R.—Construction 1370 permit for a new station to be operated on 1370 kc., 100 watts, 250 watts day, specified hours. Amended to change name from Emilio Defillo Ramirez to Puerto Rico Advertising Co., make changes in antenna, change specified hours, and transmitter and studio sites from Ensanche Martinez, Mayaguez, P. R., to site to be determined, Mayaguez, Puerto Rico.

New California Station Recommended	1363
Federal Trade Commission Action	1363
Federal Communications Commission Action	1365

PAYNE CONFIRMED

George Henry Payne, of New York, was confirmed on Monday as a member of the Federal Communications Commission for a term of 7 years from July 1. It will be recalled that Mr. Payne has been a member of the Commission since the new body was organized, and the law provides that all terms shall be for a period of 7 years after the first term expires.

RADIO BILL SIGNED

President Roosevelt has signed S. 2243, the bill which repeals the Davis amendment. The bill was originally introduced in the Upper House by Senator Wheeler of Montana. As it became law it reads exactly as quoted in NAB REPORTS dated June 4 (Vol. 4, No. 27).

APPEAL FILED IN MONOCACY CASE

The Monocacy Broadcasting Company has filed an appeal in the United States District Court of Appeals for the District of Columbia, from a decision of the Supreme Court of the District of Columbia in which the latter court upheld a decision of the Federal Communications Commission.

In this case the Communications Commission granted a construction permit to the Monocacy Company for the erection of a new broadcasting station at Rockville, Md., but a protest was filed against the grant. The protest was later withdrawn but the Commission set the case for hearing. The Monocacy Company asked the District Supreme Court to enjoin the Commission against holding the hearing but the Court in a recent decision refused to hold in favor of the broadcasting company. Appeal has now been taken to the higher court but argument will not be held until the autumn.

PLAN FOR JUNE 15 CONFERENCE

The Federal Communications Commission has announced a tentative plan for the June 15 engineering hearing. James W. Baldwin, Managing Director, and Dr. Charles B. Aiken, Special Technical Consultant, will appear on behalf of the NAB. The plan as announced by the FCC follows:

The following general plan for the conduct of the informal engineering hearing beginning June 15, 1936, was approved by the Commission. Since all the notices which are due have not as yet been received by the Commission, the general order of witnesses cannot be given. However, this will be done at as early a date as possible.

The hearing will take place in the government auditorium located at Constitution Avenue between 12th and 13th Streets, between the Department of Labor Building and the Interstate Commerce Commission Building.

Opening statement by Chairman of Federal Communications Commission, outlining scope and procedure of hearing.

Testimony—Chief Engineer of Commission. General review of past developments, present practices and future probabilities.

Testimony—Dr. J. H. Dellinger. Statement of requirements of government departments.

General Testimony Relating to Broad Questions of Public Interest and General Allocation Policies.

- Witnesses in behalf of organizations operating in all phases and services in the industry.
- Witnesses in behalf of organizations operating in more than one phase or service in the industry.
- Witnesses in behalf of organizations operating in only one phase or service in the industry, in following order:
 - Operating associations.
 - Radio manufacturing associations.
 - Other trade associations.
 - Individual services.

Specific Testimony (See Notice of Hearing)

- E. K. Jett—General Status of Radio Spectrum.
- A. D. Ring—Present Status of Apparatus Limitations.
- L. P. Wheeler—General Frequency Propagation Characteristics.
- A. Witnesses in behalf of organizations operating in all phases and services in the industry who may desire to cover all subjects at one time.
- Witnesses in behalf of organizations operating in more than one phase or service in the industry who may desire to cover all subjects at one time.
- Witnesses in behalf of organizations operating in only one phase or service in the industry in the order given in the following paragraphs 5 to 11, inclusive. Within each service outlined in the following paragraphs 5 to 11, inclusive, the order of witnesses will be as follows:
 - Operating associations.
 - Radio manufacturing associations.
 - Other trade associations.
 - Individual services.
- Broadcast Service
 - Broadcast stations (550-1500 kc.).
 - Visual broadcast.
 - Television broadcast.
 - Facsimile broadcast.
 - Special broadcast (1500-1600 kc.).
 - International broadcast.
 - Relay broadcast.
 - High frequency broadcast.
 - Experimental broadcast.

FOURTEENTH ANNUAL NAB CONVENTION

STEVENS HOTEL, CHICAGO, ILLINOIS

JULY 5, 6, 7, 8, 1936

- (h) Other classes not now recognized in the Rules and Regulations.
- 6. *Fixed Services*
 - (a) Point-to-point telegraph stations.
 - (b) Point-to-point telephone stations.
 - (c) General and special experimental stations in the fixed services.
 - (d) Other fixed services not now licensed by the Commission.
- 7. *Coastal, Marine Relay and Ship Services.*
 - (a) Coastal harbor and ship (harbor) stations.
 - (b) Coastal telephone and ship (telephone) stations.
 - (c) Coastal telegraph, marine relay and ship (telegraph) stations.
 - (d) General and special experimental stations operating in the maritime service.
 - (e) Other classes not now licensed by the Commission.
- 8. *Aviation Services*
 - (a) Aircraft stations.
 - (b) Airport stations.
 - (c) Aeronautical stations.
 - (d) Aeronautical point-to-point stations.
 - (e) Airway radio obstruction marker stations.
 - (f) General and special experimental stations in the aviation service.
 - (g) Other classes not now licensed by the Commission.
- 9. *Emergency Services*
 - (a) Municipal police stations.
 - (b) State police stations.
 - (c) Zone and interzone police stations.
 - (d) General and special experimental stations operating as police stations.
 - (e) Marine fire stations.
 - (f) Special emergency stations.
 - (g) Other general and special experimental stations operating in the emergency service.
 - (h) Other emergency services not now licensed by the Commission.
- 10. *Amateur Service*
- 11. *Miscellaneous Services*
 - (a) Geophysical.
 - (b) Motion picture.
 - (c) General and special experimental stations not operating in any of the aforementioned services.
 - (d) Other classes not identified with a particular service now licensed by the Commission.

DENIAL OF NEW STATION RECOMMENDED

Carl S. Taylor has applied to the Federal Communications Commission for a construction permit for the erection of a new broadcasting station at Dubois, Pa., to use 780 kilocycles, 250 watts and daytime operation.

Examiner R. H. Hyde, in Report No. I-235 has recommended that the application be denied. He found that "the evidence relating to the application * * * particularly with reference to the experience and financial qualifications of the applicant and the type of programs to be rendered, does not afford reasonable assurance that the granting of the application would serve public interest, convenience or necessity."

TEXAS BROADCASTERS OPPOSE HIGH POWER

Resolution of Texas Broadcasters Association

WHEREAS, it is the understanding of this organization that certain applications are now pending before the Federal Communications Commission and others are contemplated, wherein licenses or permits are being sought authorizing the establishment of radio broadcasting stations with transmission power of five hundred (500) kilowatts; and

WHEREAS, such stations on account of their excessive power cover the entire United States; and

WHEREAS, on account of the excessive cost to establish such stations they can only be established by large accumulations of capital and in small numbers compared with the present number of stations of lesser power now being successfully operated; and

WHEREAS, such powerful stations tend to monopolize the radio broadcasting industry to the detriment and injury of the approximate six hundred thirty (630) independent broadcasting

stations now established and representing to the owners and operators thereof valuable investments; and

WHEREAS, there is no necessity for stations of such excessive power as the country could be properly and efficiently furnished with broadcasting service without the issuance of any further license for such super-power stations.

THEREFORE, BE IT RESOLVED by the Texas Broadcasters Association, in general meeting assembled at Fort Worth, Texas, that in view of the facts related above and the certainty of the economic injury and ultimate economic destruction of the numerous presently established independent broadcasting stations which will result in the establishment of even a limited number of stations of such tremendous power, that Texas Broadcasters Association earnestly and strenuously objects to and protests the granting by the Federal Communications Commission of any other or further licenses or permits for stations of power in excess of fifty (50) kilowatts; and

BE IT FURTHER RESOLVED that the Secretary of this organization be instructed to furnish a certified copy of this Resolution to each of the members of the Federal Communications Commission with request that they and each of them refuse to grant any other or further such permits or licenses.

T. FRANK SMITH,
Chairman.

ATTEST:

JAMES R. CURTIS,
Secretary.

POWER INCREASE DENIAL RECOMMENDED

Broadcasting station KFOX, Long Beach, Cal., operating on a frequency of 1250 kilocycles, unlimited time, has applied to the Federal Communications Commission to increase its daytime power to 5,000 watts. It now operates with 1,000 watts day and night.

Examiner Ralph L. Walker in Report No. I-233 recommends that the application be denied. The Examiner found that:

"The granting of this application would permit the applicant station to approximately double its present good service area during daytime hours. By far the greater part of the population which would be served is located in the Los Angeles area wherein no need exists for additional program service. No such need is shown for additional program service in the area east and southeast of Long Beach as would warrant increasing the broadcast service now provided in the Los Angeles area."

MOUNTAIN STATES RADIO REVENUE

Total receipts of the 42 broadcast stations in the Mountain states from sales of radio time during 1935 amounted to \$1,760,684 according to a statement of the Bureau of the Census, Department of Commerce, in the fourth report of the new census of business series on the broadcasting business.

TWO NEW STATIONS RECOMMENDED

Four applications have been filed with the Federal Communications Commission for stations to be erected in California, two of which were to be located at Sacramento, one at Santa Rosa and one at Santa Cruz. All applications were for 1310 kilocycles, unlimited time and two at 100 watts, 250 watts LS, one for 100 watts and one for 250 watts.

Examiner Melvin H. Dalberg in Report No. I-234 recommended that the application of William B. Smullin for a station at Sacramento be denied; that the application of the Press Democrat Publishing Company, for a station at Santa Rosa be denied; that the application of B. A. Thompson, for a station at Santa Cruz be granted; and that the application of Howard N. Mitchell, for a station at Sacramento be granted. He found that the operation of the proposed stations would not cause interference with existing facilities.

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities & Exchange Commission under the Securities Act:

Pictorial Paper Package Corp., Aurora, Ill. (2-2181, Form A-2)
Inland Steel Company, Chicago, Ill. (2-2182, Form E-1)
Sunray Oil Corp., New York City. (2-2183, Form A-2)
Tilo Roofing Company, Stratford, Conn. (2-2184, Form A-2)
Consolidated Aircraft Corp., San Diego, Calif. (2-2186, Form A-2)

L. C. Smith & Corona Typewriters, Inc. (2-2190, Form A-2)
 The Gabriel Company, Cleveland, Ohio. (2-2191, Form A-2)
 Illinois Zinc Company, Chicago, Ill. (2-2192, Form A-2)
 Duro-Test Corp., New York City. (2-2195, Form A-1)
 George H. Frederick Distilleries, Inc., Harrison, Ohio. (2-2196, Form A-1)
 Comstock-Dexter Mines, Inc., Prescott, Ariz. (2-2198, Form A-1)
 King-Seeley Corp., Ann Arbor, Mich. (2-2200, Form A-2)
 Temblor Oil Company, Boston, Mass. (2-2191, Form A-1)
 Wieboldt Stores, Inc., Chicago, Ill. (2-2202, Form A-2)
 Oklahoma Natural Gas Company, Tulsa, Okla. (2-2203, Form A-1)
 Oklahoma Natural Gas Company, Tulsa, Okla. (2-2204, Form A-1)
 Securities Acceptance Corp., Omaha, Nebr. (2-2205, Form A-2)
 The Standard Products Company, Cleveland, Ohio. (2-2206, Form A-1)
 Driver-Harris Company, Harrison, N. J. (2-2207, Form D-1A)
 Driver-Harris Company, Harrison, N. J. (2-2208, Form A-2)
 Williams Oil-O-Matic Heating Corp., Bloomington, Ill. (2-2209, Form A-2)
 The Arundel Corporation, Baltimore, Md. (2-2210, Form A-2)
 Hal Price Headley et al., Lexington, Ky. (2-2211, Form F-1)
 San Antonio Milam Building, Inc., San Antonio, Texas. (2-2212, Form E-1)
 Bradshaw Mines, Inc., Prescott, Ariz. (2-2213, Form A-1)
 New Park Mining Company, Salt Lake City, Utah. (2-2215, Form A-1)
 North American Acceptance Corp., Chicago, Ill. (2-2216, Form A-1)
 Snowden Colorado Mines, Inc., Denver, Colo. (2-2217, Form A-1)
 Seasoned Investments, Inc., Philadelphia, Pa. (2-2218, Form A-1)
 Metropolitan Investments, Inc., Philadelphia, Pa. (2-2219, Form A-1)
 Summit Gold Mining Corp., Vancouver, B. C. (2-1576, Form A-1)

CHANGES RECOMMENDED FOR WQDM

Broadcasting Station WQDM, St. Albans, Vt., applied to the Federal Communications Commission to change its frequency from 1370 to 1390 kilocycles, to increase its power from 100 to 1,000 watts, and for certain specified hours of operation.

Examiner Melvin H. Dalberg, in Report No. I-236, has recommended that the application be granted. He found that there exists a need for additional daytime radio service in the area proposed to be served. Also, "it has been demonstrated that there will be a considerable increase in advertising patronage to the applicant station should the present application be granted." The Examiner found also that no interference would result with any other existing station if the application were granted.

NEW CALIFORNIA STATION RECOMMENDED

Miles J. Hansen applied to the Federal Communications Commission for a construction permit for the erection of a new broadcasting station at Fresno, Calif., to use 1420 kilocycles, 100 watts power, and unlimited time on the air. Julius Brunton & Sons Company also applied to the Commission for the erection of a new station at Fresno to use 980 kilocycles, 250 watts and daytime operation.

Chief Examiner Davis G. Arnold, in Report No. I-237, recommends that the application of Miles J. Hansen be dismissed with prejudice on motion of the counsel for the Commission and that the application of Brunton & Sons be granted. Hansen was not ready when his case was called and asked for continuance.

The Examiner states that there is need for additional daytime radio service at Fresno and that the operation of the new proposed station would not cause interference with any existing station.

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2825. Use by **Cushing Refining & Gasoline Co., Cushing, Okla.**, of false and misleading advertising to prejudice the public against "Ethyl" gasoline and to build up a preference for its own competitive product is alleged in a complaint issued against that company. The respondent corporation has branch offices in Minneapolis.

"Ethyl" gasoline, which is produced by adding the chemical known as tetraethyl lead, or "Ethyl," to gasoline made by the distillation or "cracking" processes, has never been manufactured or sold by the respondent corporation, the complaint charges. Tetraethyl is said to be the only chemical used commercially for mixture with gasoline for the purpose of eliminating the "knocking" encountered in high compression motors when fueled with the usual straight run gasoline.

Advertising in newspapers and other publications, and in radio broadcasts, the respondent corporation is alleged to unfairly disparage and to discourage the use of "Ethyl" gasoline by making representations which cause purchasers to believe that gasoline treated with tetraethyl lead is dangerous, poisonous, injurious to the life or health of users, and that the respondent's product is safe and superior to gasoline chemically treated.

The complaint alleges that mixing tetraethyl lead with gasoline produces a high grade anti-knock motor fuel which functions in an exceedingly efficient manner, is entirely safe when used as such, is no more poisonous or dangerous than any other gasoline, and is not narcotic in effect.

Although the respondent corporation allegedly represents that all of its gasoline is made by a new method, the complaint charges that only about one-third of it is produced by the new "cracking" process, the balance being made by straight distillation, one of the oldest methods known in the petroleum refining industry.

Among purchasers of gasoline, the complaint alleges, one of the controlling influences is the popular opinion as to the value, desirability, effectiveness and safety of "Ethyl" as compared with other grades, and the respondent corporation, by its representations, is said to unfairly divert trade to itself and to other sellers of straight or "cracked" gasoline from competitors who sell "Ethyl."

No. 2827. Charging unfair competition in the sale of wood fiber wall and counter coverings made to resemble tile and marble, a complaint has been issued against **Marsh Lumber Co.**, trading as **Marsh Wall Tile Co.**, 535-611 Tuscarawas Ave., **Dover, Ohio**, alleging violation of the Federal Trade Commission Act.

Wall coverings for use in houses or other buildings, and counter coverings for soda fountains and bars, were made by the respondent company by a process of exploding pine wood chips with high pressure steam, treating the resulting mass with oil, welding it together and compressing it into sheets by subjection to high pressure in steam heated hydraulic presses, according to the complaint. This material was glazed with lacquer and processed so as to produce the appearance of tile or marble, respectively, it is alleged.

The complaint charges that purchasers observing the respondent company's installations of wall and counter coverings containing graining and other outward appearances of marble and markings imitating mortar joints in tile construction, were led to believe that such installations were actually tile or marble and not a wood product.

No. 2828. Charging unfair competition in the sale of furs, fur coats and fur trimmed garments, a complaint has been issued against **Mandre, Inc.**, 1400 Broadway, **New York City**, and **Louis C. Rosenblatt, Arthur J. Rosenblatt and H. Edelman**, officers of the corporation. The complaint also names as respondents the same firm and individuals trading as **M. Brooks & Co.**, 1109 G St., N. W., **Washington**. The New York firm is a manufacturer and dealer and the Washington company a dealer.

Mandre, Inc., according to the complaint, shipped to **M. Brooks & Co.**, **Washington**, and to other dealers, furs, coats and pieces marked as "Hudson Seal," "Russian Leopard," "Kidskin," "Mink," and by other similar designations, these words appearing in bold, black letters and followed by small type conveying the words "dyed coney," "dyed muskrat," or "dyed marmot."

The respondents also are alleged to have advertised in magazines, newspapers and folders, printing the advertised name of a garment, such as "Imported French Seal Coats," in large type followed by explanatory words like "dyed coney" in small type and in parentheses. In some instances the advertised name of the fur was not accompanied by qualifying words.

These labels and advertisements are alleged to have been false, deceptive and misleading, as the coats labeled and advertised with names of high priced furs were in fact made from the skins of rabbits, muskrats, groundhogs and other inferior skins cured, treated and dyed to resemble higher quality skins like seals, panthers, leopards and others.

No. 2829. **Harold L. Rothschild**, trading as **Coronado Manufacturing Co.**, 500 Robert St., **St. Paul, Minn.**, has been named respondent in a complaint alleging unfair competition in the sale of a line of cosmetics and toilet preparations under the brand name "Coronet."

In the financial and business opportunity columns of newspapers, the respondent is said to advertise for men with capital to invest to act as his managers or representatives, and to falsely represent in such advertisements the size of his business, the length of time it has been established, and the profit to be derived from money invested in it.

In order to induce applicants who answer these advertisements to enter into an agreement to purchase his "Coronet" merchandise for resale, the respondent, the complaint alleges, makes further representations which tend to mislead such applicants into the belief that there is a substantial demand for "Coronet" products and that they will be given exclusive territories where they will have no competition; that they will be furnished additional supplies of "Coronet" products on a profit-sharing plan if they fulfill the terms of the agreement; that managers and other representatives of the respondent have made substantial profits selling his goods, and that any man, without experience, can do the same, and that money invested will be refunded when unsold merchandise is returned.

No. 2830. A complaint charging unfair competition in violation of section 5 of the Federal Trade Commission Act has been issued against **Udga Incorporated**, Foot-Schulz Building, **St. Paul, Minn.**, and **William and Mary Fraser**, engaged in the sale of "Udga Treatment" tablets, offered as a remedy for various stomach disorders, including those caused by hyperacidity. The Frasers are said to own virtually all of the capital stock of Udga Incorporated.

In newspaper and magazine advertisements and through the use of purported testimonial letters sent to prospective customers, the respondents are alleged to make representations tending to create the belief that "Udga Treatment" has a curative value for all the stomach ailments specified, when, according to the complaint, the product has no therapeutic or curative value and cannot remedy such ailments.

No. 2831. False and exaggerated claims on the part of **Buno Co., Inc.**, 507 Green St., **Philadelphia**, as to the remedial or curative qualities of "Buno", advertised and sold as a competent treatment for skin and scalp ailments, are alleged in a complaint issued against that company.

Advertising over the radio and in newspapers, magazines and circulars, the respondent company is said to represent that its product in all cases keeps the skin clear and healthy, gives instant relief from sunburn and insect bites, and is an effective remedy for dandruff, falling hair, eczema, athlete's foot, psoriasis, and all skin eruptions. The complaint charges that the product will not, in all cases, cure or effectively relieve the skin and scalp diseases named.

By reason of the respondent company's practices, held to constitute unfair competition in violation of Section 5 of the Federal Trade Commission Act, trade is alleged to be unfairly diverted to the respondent from competitors who do not misrepresent their products.

No. 2832. False and misleading representations in the sale of packaged mineral salts and other kindred products, are alleged in complaint charging **Roxie Thorson**, of **Soap Lake, Wash.**, trading as **Thorson's Soap Lake Products Co.**, with unfair methods of competition in violation of the Federal Trade Commission Act.

Selling "Thorson's Soap Lake Salts", "Thorson's Soap Lake Liniment" and other products obtained from the waters of Soap Lake, the respondent is alleged to have advertised that her products will prevent and cure or are beneficial in the treatment of many diseases such as stomach and kidney troubles, rheumatism, skin diseases, pyorrhea, high blood pressure and arthritis.

The complaint charges that the respondent's representations are exaggerated, misleading and untrue, and that in fact the use of these packaged products will not prevent and cure, nor are they beneficial in the treatment of the various diseases mentioned.

No. 2833-2834. Unfair competition through the use of a game of chance to promote the sale of candy is alleged in complaints against two **Seattle, Wash.**, corporations, **Imperial Candy Co.**, 800 Western Ave., and **Rogers Candy Co.**, 4547 University Way.

The complaints charge each company sells to wholesale and retail dealers assortments of candy so packed and assembled as to involve the use of a lottery scheme when the candy is resold to consumers. While the respondent companies' sales plans and as-

sortments of candy vary in certain details, each features a method whereby the purchaser of a chance on a punch board or push card may win as a prize a large piece or box of candy or other article of merchandise, according to the complaints.

Use of the lottery method by the respondent companies is said to constitute a practice contrary to public policy and to cause diversion of trade to the respondents from competitors who do not resort to the same or similar schemes in selling their products.

Stipulations

The Commission has issued the following cease and desist orders and stipulations:

No. 01376. **Charles Endorf**, 404 North Wells St., **Chicago**, trading as **Enco Products**, agrees to stop advertising that "Protecto Remedies" are made in a laboratory under supervision of registered pharmacists or compounded in accordance with the most advanced medical practices; that they are a competent or adequate remedy for relief of pain in certain ailments of women; that they are safe, non-irritating and non-poisonous, and other representations.

No. 01377. **S. Cheifetz** and **M. A. Jacobs**, trading as **Lenox Sales Co.**, 303 Fourth Ave., **New York City**, selling cosmetics and novelties, admit that their commodities are not offered free to persons responding to their advertisements, as was alleged, but are sold to the general public at regular market values or are given in payment for services rendered. The respondents advertised "Free Gifts," and "How to get watches, cameras, cocktail sets, 7-piece bed sets and many other gifts, without any cost to you." They agree to cease advertising that any article or premium is a gift or is free, if the receipt of such article is contingent on the recipient's furnishing money or giving services.

No. 01378. **Wroblewski Laboratories, Ltd.**, 55 Keap St., **Brooklyn**, agrees to discontinue advertising that "Kalwaryjskie Wino Lecznice" is a competent treatment or effective remedy for stomach trouble, headaches, sluggishness, blotchy skin and other ailments; that its use will prevent loss of health and vivacity; that the wine is a remedy for colds, and other representations.

No. 01379. **Madam White Cosmetics, Inc.**, 2526 Nicollet Ave., **Minneapolis**, in the sale of "Madam White Cosmetics," agrees to ban representations that sales agents for these products make in times of depression more money than the average professional person in normal times; that there is in "your community" a large list of permanent customers who will not buy any cosmetics except Madam White's, and that a \$15.95 demonstration set is sent "actually free" to sales persons, when, in fact, a cash deposit is required to obtain it.

No. 01380. **E. Haldeman-Julius**, trading as **Haldeman-Julius Publications**, and **The American Freeman**, **Girard, Kans.**, in selling subscriptions to the *American Freeman* magazine and a booklet entitled "The Rhythm Method of Natural Birth Control," agrees to discontinue advertising that the booklet gives a complete description of the Ogino-Knaus method; that this method has been officially approved by the Catholic Church; that the booklet is not for sale or that it may be procured only through subscription to the *American Freeman* magazine, and other similar representations.

No. 01381. **Marshak Maltmolak Co., Inc.**, 705 Driggs Ave., **Brooklyn**, agrees to cease sponsoring advertisements to the effect that Marshak's Improved Malted Milk will improve the appetite, unless these assertions are expressly limited to cases in which the lack of appetite is due to a Vitamin B deficiency; that this malted milk, because of the iron content, or for any other reason, constitutes a competent treatment or effective remedy for anemia, or will prevent illness of children from developing to any "stage of anemia," unless the allegation is limited to cases of simple nutritional anemia caused by deficiency of iron in the diet. The respondent admitted in its stipulation that most serious cases of anemia arise from conditions other than a deficiency of iron in the daily diet.

No. 01382. **The Wyeth Chemical Co.**, 15 Exchange Place, **Jersey City, N. J.**, selling "Freezone" for the removal of corns, agrees to ban the representation that this product will remove corns immediately, relieve pain of corns instantly, and remove corns without soreness or irritation. In its stipulation, the respondent company admits that removal of corns by any method is not totally devoid of soreness or irritation, and that repeated applications of its preparation and a certain amount of time are necessary to eliminate corns.

No. 01383. **E. L. Knowles, Inc.**, 222 Hancock St., **Springfield, Mass.**, agrees to cease asserting that its product, "Rub-ine," will give quick relief from stubborn aches and pains; has un-

usual penetrating powers, and is an effective agent for the treatment of stiff muscles or muscular lameness, unless this latter assertion is limited to conditions due to exposure or exercise. The respondent will also cease representing that "Ruh-ine" is a competent remedy for aching feet, athlete's foot, mosquito bites, ivy poisoning, and other specified ailments.

No. 01384. The Rite Product Co., 123 South State St., Salt Lake City, Utah, agrees to quit making the representation that its product, "Stop-Rite," will make old automobile brakes new or as good as new; that it is more effective than new brake lining, and will eliminate squeaks, squeals, brake adjustments, and prevent slipping, grabbing and drum scoring. The respondent also agrees to stop alleging that its product will make brakes serviceable for 20,000 miles or any other definite distance in excess of the mileage that has been demonstrated by reliable scientific tests.

Two individuals selling cosmetics and household articles in interstate commerce have entered into stipulations to cease and desist from unfair advertising practices.

No. 1675. Wayne Heckman, trading as Moon Glow Perfume Co., 709 West Wayne St., Maumee, Ohio, agrees to stop use of advertising phrases which imply that a wrist watch will be given as a prize to those who "simply sell 12 bottles of our American Girl Perfume at 25 cents a bottle and remit," when in fact, according to the stipulation, the salesman, to obtain the wrist watch, must make further sales efforts or pay additional money.

Heckman also stipulates that he will not advertise "A free gift for your customers," implying that valuable articles are to be given away, when in fact their cost is included in the price paid by the customer for perfume, and, to make use of an alleged gift, the customer must spend additional money, although this requirement is not disclosed in the advertisement.

No. 1676. Engaged as a wholesaler of household utilities, cosmetics, drugs and similar commodities, Joseph Auster, trading as General Sales & Drug Co., 720 West Madison St., Chicago, agrees to discontinue publishing fictitious, exaggerated representations of selling value in his catalogues and price lists. He will also stop asserting that he manufactures the merchandise he sells, and will discontinue using the word "extracts" in a manner implying that the products referred to are extracts, when this is not true.

No. 1678. Stehli Silks Corporation, 1372 Broadway, New York City, silk manufacturer, has entered into a stipulation to discontinue false and misleading advertising in the sale of its products.

The stipulation sets out that the respondent corporation advertised under its trade name or under the words "Stehli Silks" certain rayon products resembling silk and designated "Laughing Water" and "Sugar and Spice," but that the true character of the materials so designated was not disclosed in such advertisements.

Under the stipulation, the respondent corporation will cease using the word "Silks," independently or as part of its trade name, in advertising matter in which fabrics described and offered for sale are not composed of silk.

No. 1679. N. Wallach & Sons, Inc., 239 Canal St., New York City, agrees to desist from use of the word and figures "585 Fine" in branding dental products not containing 585/1000 of gold content, and from use of the brand "22 Karat" to designate products not made of 22 karat gold. The respondent corporation stipulates it will not use any of the words or figures specified in any manner tending to deceive purchasers as to the quantity or quality of the gold content of its products.

No. 1680. L. D. Bader, trading as L. D. Bader & Son Candy Co., 567 East South St., Akron, Ohio, signed an agreement to discontinue any plan for selling his candy products which involves use of a lottery or scheme of chance, whereby an article is given as a prize in consideration of the purchase of any other article. The respondent also will cease transporting in interstate commerce advertising matter for use of dealers in soliciting the sale of his candy products by means of a lottery method.

No. 2613. The New York State Wholesale Confectionery Associations, Inc., with headquarters in Syracuse, eight local or regional associations, and the **Empire State Candy Club, Inc.,** a candy brokers' and agents' organization with headquarters in Utica, have been served with an order to cease and desist from combination and conspiracy in restraint of trade and certain other practices in the sale of candy in interstate commerce.

The eight local or regional associations, occupying an important position in the national candy trade, particularly in the Eastern States, are: Rochester Area Wholesale Confectioners Association, Rochester, N. Y.; Capital District Wholesale Confectioners Association, Inc., Troy, N. Y.; Mohawk Valley Wholesale Confectioners Association, Utica, N. Y.; Central New York Wholesale Confectionery

Distributors, Inc., Syracuse, N. Y.; Northern New York Wholesale Confectioners Association, Inc., Watertown, N. Y.; Hudson Valley Candy Distributors Association, Newburgh, N. Y.; Southern Tier Candy Distributors Association, Wellsboro, Pa.; and Greater Buffalo Wholesale Confectioners Association, Buffalo, N. Y.

The order directs the State and regional association respondents to cease and desist from combining, conspiring or uniting in a common course of action among themselves or with others, to prevent competing dealers in confectionery, candy or allied products from obtaining such products directly from the manufacturers; from publishing so-called "white lists" containing the names of "recognized" dealers, members, or respondent associations, including only so-called legitimate, regular or "recognized" dealers, brokers, distributors or wholesalers; conspiring or uniting to fix uniform prices at which members of the associations or others should sell, and using any other cooperative or coercive means to suppress competition in price, or in the sale and distribution of their products in New York, Pennsylvania, or any other area.

No. 2730. An order to discontinue false representations in connection with the sale of cosmetic preparations has been entered against Reta Terrell Sloan, trading as Reta Terrell, with her principal place of business at 513 Oakdale Ave., Chicago, and a branch at 50 East 10th St., New York City.

The order directs the respondent to cease advertising in newspapers, magazines, radio broadcasts, or in any other way, that her cosmetic products, among other things, serve as a food for, nourish, or restore elasticity to the skin, muscles, or tissues; eliminate dryness from the skin and remove wrinkles therefrom, and penetrate the skin beyond the epidermis so as to reach the underlying muscles and tissues.

FEDERAL COMMUNICATIONS COMMISSION ACTION

No meeting of the Broadcast Division of the Commission was held on its regular meeting day, Tuesday. It will be held later this week.

HEARING CALENDAR

Monday, June 15

Informal Engineering Conference

Re: the allocation of frequencies above 30,000 kc. and the review of present frequency allocations.

APPLICATIONS RECEIVED

First Zone

WSPR—Quincy A. Brackett, Lewis B. Breed, & Edmund A. La-1140 port, d/h as Connecticut Valley Broadcasting Co., Springfield, Mass.—License to cover construction permit (B1-P-469) for a new station.

WGNY—Peter Goelet, Chester Township, N. Y.—Construction 1210 permit to install new equipment, move transmitter from Robert Goelet Estate, Chester Township, New York, to at or near Newburgh, New York, and move studio to site to be determined, Newburgh, New York.

Quota Facilities As of June 5.....	1371
Federal Trade Commission Action.....	1372
Federal Communications Commission Action.....	1373

EFFECTIVE DATE OF RULES POSTPONED

The Broadcast Division of the Federal Communications Commission has postponed the effective date of Rules 970 to 1075 inclusive. In this connection the Commission has made the following official statement:

It appears that at the informal engineering conference held at the offices of the Commission on June 8, 1936, with reference to rules and regulations pertaining to relay broadcast, international broadcast, visual broadcast, high frequency broadcast, and experimental broadcast stations, a number of interested parties had not received these rules and regulations in sufficient time to enable them to determine whether or not their rights were materially affected.

While the expressions of the various persons represented at the conference were, with one exception, unanimously in favor of the adopted change in Rule 229 concerning the assignment of frequencies to services, the detailed Rules 970 to 1075 inclusive, applying to the aforementioned services, had not been received in sufficient time to warrant definite decision at the conference.

Consequently, the Broadcast Division this date suspended the effective date of Rules 970 to 1075 inclusive, for one month, so that instead of these rules becoming effective July 1, 1936, in accordance with the previous decision of the Division, they will become effective August 1, 1936.

In the meantime, interested parties are invited to submit to the Commission in writing prior to July 20, 1936, any constructive suggestions they may desire to make with respect to the efficacy of the proposed rules and regulations mentioned herein.

SECURITIES ACT REGISTRATIONS

The following companies have filed registration statements with the Securities and Exchange Commission under the Securities Act:

- John Gribbel, et. al., Philadelphia, Pa. (2-2221, Form F-1).
- Associated American Underwriters Corp., Dover, Del. (2-2222, Form A-1).
- North Western Refrigerator Line Co., Chicago, Ill. (2-2224, Form A-2).
- Naph-Sol Refining Co., North Muskegon, Mich. (2-2225, Form A-1).
- Atlantic Realty Company, Atlanta, Ga. (2-2226, Form A-1).

NOTICE

A few of the members have failed to furnish names of Delegate or Alternate for the NAB Convention. Please return cards at once that our records may be complete.

- Phoenix Brass Fittings Co., Irvington, N. J. (2-2227, Form A-2).
- American Power Cycle Corp., Frederick, Md. (2-2228, Form A-1).
- Seaboard Finance Corp., Washington, D. C. (2-2230, Form A-1).
- Industrial Securities Corp., Middletown, Conn. (2-2233, Form A-2).
- Consolidated Biscuit Company, Mt. Vernon, Ill. (2-2234, Form A-2).
- Atlantic Oil Investment Corp., Tulsa, Okla. (2-2235, Form A-1).
- Income Estates of America, Inc., Philadelphia, Pa. (2-2236, Form C-1).
- California Comstock Gold Mines, Ltd., San Bernardino, Cal. (2-2237, Form A-1).
- Otter Tail Power Company, Fergus Falls, Minn. (2-2238, Form A-2).
- Franklin Rayon Corp., Providence, R. I. (2-2239, Form A-2).
- Sunshine Consolidated Inc., Kellogg, Idaho (2-2240, Form A-1).
- Grand National Films, Inc., New York City (2-2241, Form A-1).
- American Cereal Food Corp., Clinton, Mass. (2-2242, Form A-1).
- Quaker State Oil Refining Corp., Oil City, Pa. (2-2244, Form A-2).
- Muskegon Piston Ring Co., Muskegon, Mich. (2-2245, Form A-2).
- Graham-Page Motors Corp., Detroit, Mich. (2-2246, Form A-2).

CAUTION NECESSARY IN PERFORMANCE OF SONG ENTITLED "BLUE EYES"

The following letter received by the Managing Director from E. C. Mills, General Manager of the ASCAP deserves your careful attention:

"In connection with a matter passing over my desk, I just this moment had occasion to give some information on the title 'BLUE EYES.' Thought you just might be interested to see how many different copyrighted compositions there are under this single title, and I, therefore, enclose a list of those of which we have a record.

"Only those checked are presently included in the ASCAP repertoire."

The list follows:

FOURTEENTH ANNUAL NAB CONVENTION

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2835. E. G. and M. W. Zellers, trading as Zellers Laboratories, Orrton Ave. and Noble St., Reading, Pa., are named respondents in a complaint alleging misrepresentations in advertising in connection with the sale of medicines and remedies for diseases in fowls.

The respondents, the complaint charges, make representations in trade magazines, circulars and other advertising matter, to the effect that their "Zellers Kamala Nicotine Tabs" are a powerful and effective agency for ridding fowls of worms, releasing medication at the seat of infection and producing results in less than six hours.

They are also alleged to represent that "Zellers Fowl Tone Formula No. 1" contains the elements essential to the development of future egg layers, is a special tonic for building up disease resistance, and that it and the preparation "Carbo-Zel Tablets" are ideal antiseptics and effective treatments for certain poultry diseases, including intestinal flu, coccidiosis, cholera, and brooder pneumonia; and that "Zellers Fowl Tone Formula No. 2" is scientifically prepared to combat the ravages of small worms and is an excellent tonic.

No. 2836. Charging unfair competition through exaggeration of the earnings of salespersons, a complaint has been issued against **American Products Co.,** manufacturer of food and toilet products and household cleaners, and **Zanol Products Co.,** its selling agent and subsidiary, both of 3265 Colerain Ave., Cincinnati.

Advertising in newspapers and other periodicals and through circular letters, the American Products Co., it is said, has sought to obtain sales representatives for its products. In one advertisement the respondent is alleged to have said that the company "will pay you up to \$42.50 a week," and "will furnish a car to producers." Advertising a profit-sharing plan, the respondent is alleged to have asserted that it had brought money to thousands of men and women.

The complaint alleges that the respondents' representations are false and misleading, and that the so-called representatives, procured in response to advertisements, are in fact retailers, and no car is furnished to them except as a subsequent bonus given when a representative shall have purchased from the respondent at wholesale prices in a period of one year, not less than \$2,500 worth of goods.

The Zanol Products Co. is also charged with making assertions in advertising calculated to represent large earnings to be gained by potential representatives and to induce such persons to sell the respondents' goods. In fact, according to the complaint, the average earnings of such representatives under normal conditions is but a small percentage of the amount advertised, and consistent earnings in the due course of business in the amounts as advertised would be impossible.

No. 2837. Unfair competition through the use of lottery schemes in connection with the sale of candy is alleged in a complaint issued against **Ostler Candy Co.,** 143 South State St., Salt Lake City, Utah.

The complaint charges the respondent company arranges its candy in assortments so as to involve a game of chance when the candy is sold to the ultimate purchaser. Push cards and other schemes in which the element of chance enters are used to attract customers, according to the complaint.

The respondent company's sales plans are said to be contrary to public policy, and to divert trade to the respondent from competitors who do not use similar methods in the sale of candy.

No. 2838. Misleading representations in the sale of cosmetics are alleged in a complaint issued against **Bourjois, Inc.,** and its selling agent and subsidiary, **Barbara Gould Sales Corp.** The **Bourjois Company** operates a factory at Rochester, N. Y., and both corporations have offices at 35 West 34th St., New York City.

Use of the trade name "Barbara Gould Irradiated Skin Food" is alleged to have a tendency to deceive buyers into believing that the respondents' products give nourishment to and act as food for the skin, when in fact, according to the complaint, this preparation does not possess such properties.

Other representations made by the respondents are alleged to have a capacity to deceive buyers into believing that there are glands in the body known as "youth glands" which will be restored and revived by application of the respondents' products.

No. 2839. Imitation of the product of a competitor, in violation of Section 5 of the Federal Trade Commission Act, is alleged in a

complaint issued against **Louis Schear and Jack Schrader, trading as Schear and Schrader, 239 Fourth Ave., New York City,** engaged in wholesaling novelties.

The complaint sets out that S. S. Adams, trading as S. S. Adams Co., also is a dealer in novelties, including a game designated "Hindu Cones," which he designs, manufactures and sells at the wholesale price of \$21 a gross. Soon after Adams introduced "Hindu Cones" on the market, the complaint alleges, the respondents began selling a similar product, the container of which bears the trade name "Hindu Cones" and the same language as that on Adams' package, the principal difference being the color of the containers.

The insert instructing purchasers how to operate the cones in the respondents' container is an exact duplicate of that in Adams' package, according to the complaint, and the name "Adams" appears in the instructions. The wholesale price of the respondents' product is \$15 a gross less than the price at which Adams sells his cones, the complaint charges.

No. 2840. Misrepresentation of the therapeutic value of "NoDoz Awakeners," a pharmaceutical preparation said to be compounded of caffeine citrate and sugar of milk, is charged in a complaint issued against **NoDoz Laboratories, Inc.,** 307 Mitau Building, Sacramento, Calif., manufacturer and seller of this product.

The complaint charges that the respondent corporation's representations in various publications, in other forms of printed matter, and in radio broadcasts, tend to lead purchasers into believing that use of the preparation, among other things, keeps motorists awake and enables them to avoid accidents while driving; that it overcomes alcoholic depression; conquers mental dullness and adds energy to one's capacity for work or pleasure without apparent fatigue, and preserves a clear head under the most difficult circumstances.

These representations, as well as the respondent's alleged claims that "NoDoz Awakeners" are a pure vegetable concentrate and are used by more than one million automobile drivers, are false or exaggerated, the complaint charges.

Stipulations

The Commission has issued the following cease and desist orders and stipulations:

No. 01386. Elizabeth Arden Sales Corporation, Elizabeth Arden, Inc., and Florence N. Lewis, trading as Elizabeth Arden, 681 Fifth Ave., New York City, agree to cease representing that either "Venetian Eyelash Grower" or "Ardena Eyelash Grower" is a stimulant to the eyelashes or encourages the growth of eyelashes or eyebrows. Use of the words "Grower" or "Venetian" as part of the trade names designating the products will be stopped.

No. 01387. Bromo Aspirin Manufacturing Co., Inc., 5111 Chester Ave., Philadelphia, selling "Bromo Aspirin Capsules," will discontinue advertising that this product is a competent remedy for colds, coughs, or grippie; that it will prevent pneumonia, influenza, grippie or complications of colds, and that it reaches the cause of any ailment.

No. 01388. R. E. Paul, trading as Wayne Manufacturing Co., 5249 Western Ave., Detroit, in the sale of his "Wayne Checkwriter," agrees to cease representing that the device, advertised to sell for \$12.50, accomplishes more than machines costing hundreds of dollars, and that he makes to persons answering his advertisements a special offer different from his usual and customary offer.

The respondent will discontinue representing that the maker of a check cannot recover from the bank on which such check is drawn any overpayment made as a result of an alteration of the check.

In advertising for salesmen he agrees not to make unmodified claims of earnings in excess of the average earnings made by his active, full-time salesmen under normal business conditions.

No. 01389. Under a stipulation entered into, the **National Art School, Inc., 3601 Michigan Ave., Chicago,** has agreed to cease false and misleading advertising in the sale of a correspondence course in coloring photographs and miniatures in oil by a process described as the "Koehne Method."

The respondent corporation will cease advertising that a talent for art is not necessary to enable a student to master the course; that completion of the course can be accomplished in 12 weeks, and that it enables one to earn a steady income and to do work that commands the highest prices; and that the "Koehne Method" transforms photographic prints into works of art comparable to originals worth hundreds of dollars.

No. 01390. The Tonsiline Co., Canton, Ohio, entered into an agreement to cease advertising that "Tonsiline" affords quick re-

lief for sore throat, or that it is a competent treatment for that ailment, unless such representations are limited to sore throat due to colds or to the inhalation of dust or fumes. The respondent company will cease representing that the product is the "National Sore Throat Remedy."

No. 01391. Initial It, Inc., 500 North Dearborn St., Chicago, stipulates that in the sale of leather articles such as purses and bill folds it will cease representing that its "Ritzi 2-Way Bag" or any other article offered to salesmen as a sample outfit is "free," if such salesmen are required to make a cash deposit to procure the bag, or required to sell a definite amount of merchandise to have the cash deposit returned. The respondent corporation admits that in advertising matter it exaggerated the prospective sales and earnings of salesmen, and agrees to discontinue such practice.

No. 01392. National Oil Products Co., Harrison, N. J., engaged in the sale of a poultry and animal feed designated "Nopco Double X," will cease and desist from representing, among other things, that the product alone, when added to feed, produces a balanced diet; that it improves any feed having an adequate supply of vitamins A and D; that it eliminates soft shelled eggs or blood spots, regardless of cause; and that it is "guaranteed" for results.

FEDERAL COMMUNICATIONS COMMISSION ACTION

HEARING CALENDAR

Monday, June 22

HEARING BEFORE AN EXAMINER

(Broadcast)

- KRE—First Congregational Church of Berkeley, Berkeley, Calif.—Voluntary assignment of license, 1370 kc., 100 watts, 250 watts LS, unlimited time.
- NEW—Jack E. Brantley, Mrs. Jack E. Brantley, and Jack E. Brantley, Jr., Savannah, Ga.—C. P., 1310 kc., 100 watts, unlimited time.
- NEW—W. T. Knight, Jr., Savannah, Ga.—C. P., 1310 kc., 100 watts, unlimited time.
- NEW—Ted R. Woodard, Kingsport, Tenn.—C. P., 1210 kc., 100 watts, daytime.
- NEW—Jonas Weiland, Kinston, N. C.—C. P., 1200 kc., 100 watts, 250 watts LS, unlimited time.
- NEW—John Perkins Rabb, Lenoir, N. C.—C. P., 1370 kc., 100 watts, daytime.
- WMFF—Plattsburg Broadcasting Corp., Plattsburg, N. Y.—Modification of license, 1310 kc., 100 watts, 250 watts LS, daytime until 7:30 p. m. Present assignment: 1310 kc., 250 watts, daytime.

Tuesday, June 23

HEARING BEFORE AN EXAMINER

(Broadcast)

- KCMO (formerly KWKC)—Charlotte Duncan, Administratrix, Lester E. Cox, Thomas L. Evans, Kansas City, Mo.—C. P., 1370 kc., 100 watts, specified hours.
- NEW—The Tribune Co., Tampa, Fla.—C. P., 550 kc., 1 KW, 5 KW LS, unlimited time.
- NEW—Black River Valley Broadcasts, Inc., Watertown, N. Y.—C. P., 1420 kc., 100 watts, 250 watts LS, unlimited time.
- NEW—Metro Broadcasting Co., Los Angeles, Calif.—C. P., 820 kc., 250 watts, limited with WHAS.

Wednesday, June 24

HEARING BEFORE AN EXAMINER

(Broadcast)

- WHFC—WHFC, Inc., Cicero, Ill.—C. P., 1420 kc., 100 watts, 250 watts LS, specified hours. Present assignment: 1420 kc., 100 watts, specified hours.
- WKBI—WKBI, Inc., Cicero, Ill.—Modification of license, 1420 kc., 100 watts, 250 watts LS, specified hours. Present assignment: 1420 kc., 100 watts, specified hours.
- WEHS—WEHS, Inc., Cicero, Ill.—Modification of license, 1420 kc., 100 watts, 250 watts LS, specified hours. Present assignment: 1420 kc., 100 watts, specified hours.

WJBL—Commodore Broadcasting, Inc., Decatur, Ill.—Modification of license, 1370 kc., 100 watts, unlimited time. Present assignment: 1200 kc., 100 watts, share-WJBC.

NEW—A. W. Mills, Gallup, N. Mex.—C. P., 1310 kc., 100 watts, unlimited time.

Thursday, June 25

HEARING BEFORE AN EXAMINER

(Broadcast)

- NEW—Mrs. C. A. S. Heaton, Las Vegas, Nev.—C. P., 1420 kc., 100 watts, unlimited time.
- NEW—Cache Valley Broadcasting Co., Logan, Utah.—C. P., 1370 kc., 100 watts, unlimited time.
- NEW—Harold Johnson and Leland M. Perry, d/b as Johnson & Perry, Cedar City, Utah.—C. P., 1310 kc., 100 watts, unlimited time.
- NEW—E. Anthony & Sons, Inc., Pawtucket, R. I.—C. P., 1200 kc., 100 watts, 250 watts LS, unlimited time (request facilities of WNRI).
- WNRI—S. George Webb, Newport, R. I.—Modification of C. P., 1200 kc., 100 watts, 250 watts LS, unlimited time.
- WTHT—The Hartford Times, Inc., Hartford, Conn.—Modification of C. P., 1200 kc., 100 watts, unlimited time (request facilities of WNRI).

Friday, June 26

HEARING BEFORE AN EXAMINER

(Broadcast)

- NEW—C. A. Rowley, Ashtabula, Ohio.—C. P., 940 kc., 250 watts, daytime.
- WHAZ—Rensselaer Polytechnic Institute, Troy, N. Y.—Modification of license, 1300 kc., 1 KW, S-WFAB, WEVD, WBBR. Present assignment: 1300 kc., 500 watts, S-WFAB, WEVD, WBBR.

APPLICATIONS GRANTED

- KGKB—East Texas Broadcasting Co., Tyler, Tex.—Granted C. P. to make changes in equipment and move transmitter locally 1½ miles from court house on North Dixie Highway, Tyler, Tex.
- KRSC—Radio Sales Corp., Seattle, Wash.—Granted C. P. to make changes in equipment.
- WMMN—A. M. Rowe, Inc., Fairmont, W. Va.—Granted modification of C. P. to install new equipment and extend commencement date to 2 months after grant and completion date to 6 months thereafter.
- WMC—Memphis Commercial Appeal, Inc., Memphis, Tenn.—Granted modification of C. P. to extend completion date from 7-19-36 to 1-19-37.
- KHQ—Louis Wasmer, Inc., Spokane, Wash.—Granted modification of C. P. to make changes in transmitter (tubes); install vertical radiator to comply with Rule 131, exact transmitter site and height of antenna to be determined; increase day power from 2 KW to 5 KW; extend commencement date to 60 days after grant and completion date to 6 months thereafter.
- WRR—City of Dallas, Texas, Dallas, Tex.—Granted modification of C. P. to install new equipment; also granted license to cover installation of new equipment and vertical radiator, and move transmitter locally; 1280 kc., 500 watts, unlimited time.
- WLAK—Lake Region Broadcasting Co., Lakeland, Fla.—Granted license to cover C. P. authorizing erection of new station; 1310 kc., 100 watts, unlimited.
- WHBU—Anderson Broadcasting Corp., Anderson, Ind.—Granted license to cover C. P. authorizing installation of new equipment and increase in day power to 250 watts; 1210 kc., 100 watts night.
- WCBI—Scranton Broadcasters, Inc., Scranton, Pa.—Granted license to cover C. P. authorizing installation of new equipment and increase in power from 250 watts to 500 watts; 880 kc., S-WQAN.
- KGFW—Central Nebraska Broadcasting Corp., Kearney, Nebr.—Granted consent to the transfer of control of The Central Nebraska Broadcasting Corp. from the present stockholders to Clark Standiford and Kate S. Fisher; 1310 kc., 100 watts, unlimited.

- WHBB—Dr. Wm. J. Reynolds and Wm. J. Reynolds, Jr., Selma, Ala.—Granted consent to voluntary assignment of license to W. J. Reynolds, Jr., J. C. Hughes and J. S. Allen, d/b as Selma Broadcasting Co.
- KELD—T. H. Barton, El Dorado, Ark.—Granted consent to voluntary assignment of license to Radio Enterprises, Inc.
- WNBC—William J. Sanders, New Britain, Conn.—Granted consent to voluntary assignment of license to State Broadcasting Corp.
- KGGM—New Mexico Broadcasting Co., Albuquerque, N. Mex.—Granted consent to the transfer of control of the New Mexico Broadcasting Co., Inc., licensee of KGGM, to Mrs. A. R. (Goldie) Hebenstrait to A. R. Hebenstrait.
- KJR—Fisher's Blend Station, Inc., Seattle, Wash.—Granted C. P. to install new equipment and move transmitter to site of station KOMO.
- WCOL—WCOL, Inc., Columbus, Ohio.—Granted C. P. to make changes in equipment.
- WSYR—WSYU—Central New York Broadcasting Corp., Syracuse, N. Y.—Granted license to use old composite transmitter as an auxiliary transmitter; 570 kc., 250 watts, for emergency purposes only.
- KFJI—KFJI Broadcasters, Inc., Klamath Falls, Ore.—Granted license to cover C. P. authorizing installation of new equipment; 1210 kc., 100 watts, unlimited time.
- WNYC—City of New York, Dept. of Plant and Structures, New York City.—Granted license to cover C. P. (auxiliary) to be used for emergency purposes only, to be used while moving main transmitter; 810 kc., 1 KW.
- KSLM—Oregon Radio, Inc., Salem, Ore.—Granted authority to make changes in automatic frequency control equipment.
- WMC—Memphis Commercial Appeal, Inc., Memphis, Tenn.—Granted modification of C. P. approving new transmitter site $\frac{3}{4}$ mile northwest of 5 Points Intersection U. S. Highway No. 70 and Macon Road, near Memphis; install new directional antenna; extend commencement date to this date and completion date to 1-19-37.
- KUOA—KUOA, Inc., Fayetteville, Ark.—Granted C. P. to move transmitter and studio to John Brown University, Siloam Springs, Ark., a distance of approximately 25 miles; install new equipment and vertical radiator; increase day power from 1 KW to 2½ KW.
- KERN—The Bee Bakersfield Broadcasting Co., Bakersfield, Calif.—Granted C. P. to install new equipment and erect a new vertical radiator.
- KHBC—Honolulu Broadcasting Co., Ltd., Hilo, T. H.—Granted license to cover C. P. authorizing erection of new station to operate on 1400 kc., 250 watts, unlimited time.
- WJBC—Wayne Hummer and H. J. Dee, d/b as Kaskaskia Broadcasting Co., Bloomington, Ill.—Granted voluntary assignment of C. P. from Wayne Hummer and H. J. Dee, d/b as Kaskaskia Broadcasting Co., to Arthur Malcom McGregor and Dorothy Charlotte McGregor. (C. P. authorized changes in equipment and increase in day power from 100 watts to 250 watts; 1200 kc., 100 watts night, S-WJBL.)
- KFVD—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—Granted voluntary assignment of license from Los Angeles Broadcasting Co., Inc., to Standard Broadcasting Co. (1000 kc., 250 watts night, 250 watts day, limited time).
- WRAK—WRAK, Inc., Williamsport, Pa.—Granted C. P. to move transmitter locally, install new equipment and new vertical radiator.
- WBNX—Standard Cahill Co., Inc., New York City.—Granted modification of C. P. approving exact transmitter site and directional antenna system; 1350 kc., 250 watts, S-WAWZ. (Granted C. P. on May 1, effective September 15, to increase power to 1 KW, employing directional antenna both day and night.)
- KDON—Richard Field Lewis, Del Monte, Calif.—Granted consent to voluntary assignment of license to the Monterey Peninsula Broadcasting Co., a California corporation.
- KFXR—Exchange Avenue Baptist Church of Oklahoma City, Okla.—Granted C. P. to make changes in equipment.
- KWYO—Big Horn Broadcasting Co., Inc., Sheridan, Wyo.—Granted C. P. to make changes in equipment, install new vertical radiator, move transmitter locally, and increase day power from 100 to 250 watts.
- WFBM—Indianapolis Power & Light Co., Indianapolis, Ind.—Granted C. P. to make changes in equipment.
- WFIL—WFIL Broadcasting Co., Philadelphia, Pa.—Granted C. P. to install new equipment, move transmitter locally, install new vertical radiator, increase power to 1 KW, unlimited time.
- KGNO—The Dodge City Broadcasting Co., Inc., Dodge City, Kans.—Granted C. P. to install new equipment.
- WHLB—Head of the Lakes Broadcasting Co., Virginia, Minn.—Granted modification of C. P. to extend completion date to 9-26-36.
- WNYC—City of New York, Dept. of Plant and Structures, New York City.—Granted modification of C. P. to extend completion date from 6-1-36 to 180 days thereafter.
- KFPL—C. C. Baxter, Dublin, Tex.—Granted modification of C. P. extending commencement date to 6-16-36 and completion date to 12-16-36.
- KCRJ—Charles C. Robinson, Jerome, Ariz.—Granted authority to install automatic frequency control.
- Standard Radio, Inc., Hollywood, Calif.—Granted authority to transmit electrical transmissions to foreign countries, namely stations CBNS, CKAG, CFRN and CKPC and any other Canadian stations which may desire these programs.
- WELI—Patrick J. Goode, New Haven, Conn.—Granted consent to voluntary assignment of license to City Broadcasting Corp.
- KFJZ—Fort Worth Broadcasters, Inc., Fort Worth, Tex.—Granted license to cover C. P. authorizing installation of new equipment and increase in day power from 100 watts to 250 watts.
- WIBM—WIBM, Inc., Jackson, Mich.—Granted license to cover C. P. which authorizes changes in equipment and installation of new radiating system.
- KFKA—The Mid-Western Radio Corp., Greeley, Colo.—Granted license to cover C. P. authorizing local move of station and installing new antenna system.
- WREC—WREC, Inc., Memphis, Tenn.—Granted modification of license to increase day power from 2½ KW to 5 KW; 600 kc., 1 KW night, unlimited time, using two-unit directional antenna system.
- KBPS—Benson Polytechnic School, Portland, Ore.—Granted authority to install automatic frequency control.
- WOEH (requested)—National Broadcasting Co., Inc., Portable-Mobile (New York City).—Granted C. P. (temporary broadcast pickup), frequencies 1606, 2020, 2102, 2760 kc., 100 watts. Also granted license covering same.
- NEW—Edwin H. Armstrong, New York, N. Y. (site to be determined).—Granted C. P. (exp. gen. exp.), frequencies 86500 and 111000 kc., 40 KW, time of operation variable.
- W8XAR—Westinghouse Electric and Manufacturing Co., near Saxonburg, Pa.—Granted renewal of special experimental station license in exact conformity with existing license, for the period June 23 to September 23, 1936.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the regular period:

KABR, Aberdeen, S. Dak.; KAST, Astoria, Ore.; KBPS, Portland, Ore.; KCMC, Texarkana, Ark.; KERN, Bakersfield, Calif.; KFGQ, Boone, Iowa; KFIZ, Fond du Lac, Wis.; KGFI, Corpus Christi, Tex.; KGIW, Alamosa, Colo.; KFJM, Grand Forks, N. Dak.; KFJZ, Fort Worth, Tex.; KGAR, Tucson, Ariz.; KGFF, Shawnee, Okla.; KGFL, Roswell, N. Mex.; KGGC, San Francisco, Calif.; KICA, Clovis, N. Mex.; KIDW, Lamar, Colo.; KIUN, Pecos, Tex.; KLUF, Galveston, Tex.; KMAC, San Antonio, Tex.; KNEL, Brady, Tex.; KNOW, Austin, Tex.; KONO, San Antonio, Tex.; KORE, Eugene, Ore.; KOTN, Pine Bluff, Ark.; KPLC, Lake Charles, La.; KPQ, Wenatchee, Wash.; KRE, Berkeley, Calif.; KRKO, Everett, Wash.; KRLH, Midland, Tex.; KRNR, Roseburg, Ore.; KWYO, Sheridan, Wyo.; KXO, El Centro, Calif.; WAGF, Dothan, Ala.; WAZL, Hazleton, Pa.; WBTM, Danville, Va.; WCBM, Baltimore, Md.; WCBS, Springfield, Ill.; WCNW, Brooklyn, N. Y.; WDAS, Philadelphia, Pa.; WEED, Rocky Mount, N. C.; WEHS, Cicero, Ill.; WGL, Fort Wayne, Ind.; WHBB, Selma, Ala.; WHBQ, Memphis, Tenn.; WHDL, Olean, N. Y.; WHEF, Koscusko, Miss.; WIBM, Jackson, Mich.; WILM, Wilmington, Del.; WKBB, East Dubuque, Ill.; WKBI, Cicero, Ill.; WKBV, Richmond, Ind.; WKBZ, Muskegon, Mich.; WLAP, Lexington, Ky.; WLBK, Kansas City, Kans.; WLEU, Erie, Pa.; WMAS, Springfield, Mass.; WMBC, Detroit, Mich.; WMBH, Joplin, Mo.; WMFD, Wilmington, N. C.; WMFO, Decatur, Ala.; WNBK, Binghamton, N. Y.; WOC, Davenport, Iowa; WPAR, Parkersburg, W. Va.; WPFB, Hattiesburg, Miss.; WQDM, St. Albans, Vt.; WRAK, Williamsport, Pa.; WRDW, Augusta, Ga.; WRGA, Rome, Ga.; WRJN, Racine, Wis.; WSVS, Buffalo, N. Y.;

WSYB, Rutland, Vt.; WTMV, East St. Louis, Ill.; KFRO, Longview, Tex.; KGKL, San Angelo, Tex.; KWBG, Hutchinson, Kans.; WAGM, Presque Isle, Maine; WDNC, Durham, N. C.; WELL, Battle Creek, Mich.; WMSD, Sheffield, Ala.; WPAD, Paducah, Ky.

SET FOR HEARING

WGCM—WGCM, Inc., Mississippi City, Miss.—Application for modification of C. P. to extend commencement date from 1-28-36 to 30 days after grant and completion date from 7-28-36 to 180 days thereafter.

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Special experimental authorization to install directional antenna, change hours of operation from limited to unlimited time for period ending August 1, 1936. To be heard by the Broadcast Division.

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Application for modification of license to increase night power from 1 to 5 KW. To be heard before the Broadcast Division.

KGW—Oregonian Publishing Co., Portland, Ore.—Application for modification of license to increase night power from 1 to 5 KW. To be heard before the Broadcast Division.

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Application for modification of license, already in hearing docket, amended to read: change frequency from 960 kc. to 1260 kc.; increase time of operation from 250 watts daytime to unlimited time.

NEW—The Constitution Publishing Co., Atlanta, Ga.—Application for C. P. for new station, 590 kc., 1 KW, unlimited time. Site to be determined.

NEW—Harriett N. Alleman and Helen W. MacLellan, d/b as Cape Cod Broadcasting Co., Barnstable Township, Mass.—Application for C. P. for new station, 1210 kc., 100 watts night, 250 watts day, unlimited time. Site to be determined.

NEW—L. Martin Courtney, Toledo, Ohio.—Application for C. P. for new station, 1420 kc., 100 watts, unlimited time. Site to be determined.

NEW—Harry G. Lowe and Clara A. Lowe, DuBoise, Pa.—Application for C. P. for new station, 1210 kc., 100 watts, daytime.

NEW—Sweetwater Broadcasting Co., Sweetwater, Tex.—Application for C. P. for new station, 1310 kc., 100 watts, daytime. Site to be determined.

NEW—The Escanaba Daily Press Co., Escanaba, Mich.—Application for C. P. for new station, 1500 kc., 100 watts, daytime.

NEW—Thomas M. Hammond, d/b as Ventura Broadcasting Co., Ventura, Calif.—Application for C. P. for new station, 1210 kc., 100 watts, daytime.

NEW—John C. Looney, d/b as High Fidelity Broadcasting Service, Milton, Mass.—Application for C. P., exp.-exp. broadcast, 1570 kc., 1 KW, unlimited and variable time.

NEW—Eugene Meyer & Co., d/b as The Washington Post, Washington, D. C.—Application for C. P. for new station, 630 kc., 250 watts night, 500 watts day, unlimited time. Site to be determined. (Requests facilities of WMAL.)

WMBQ—Metropolitan Broadcasting Corp., Brooklyn, N. Y.—Application for C. P. to install new equipment, move transmitter and studio locally, and install new radiating system.

WWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—Application for C. P. to install new transmitter, erect new vertical radiator, increase night power from 5 to 25 KW and day power from 5 to 10 KW.

WHAS—The Courier-Journal Co. and The Louisville Times Co., Louisville, Ky.—Special experimental authority to increase power from 50 KW to 500 KW, exact type of antenna and type of equipment to be determined; transmitter site to be determined in Oldham County, Ky. (Case to be heard before the Broadcast Division September 24, 1936, together with others applying for 500 KW, i.e., KNX, WHO, WJZ, and WGN.)

WMBQ—Metropolitan Broadcasting Corp., Brooklyn, N. Y.—Application for renewal of license for the regular period.

WKBB—Sanders Brothers Radio Station, E. Dubuque, Ill.—Application for C. P. to move transmitter to Julien Township, Iowa, studio to Hotel Julien, Dubuque; install new radiator, exact transmitter site and type of antenna to be determined.

NEW—The News Press Publishing Co., Santa Barbara, Calif.—Application for C. P., already in hearing docket, amended to request: 1280 kc., 500 watts, unlimited time, site and type of antenna to be approved.

WMFF—Plattsburg Broadcasting Corp., Plattsburg, N. Y.—Application for modification of license, already in hearing

docket, amended to read: change hours of operation from 250 watts daytime to 100 watts night, 250 watts day, unlimited time.

NEW—Walker Jamar, Duluth, Minn.—Application for C. P., already in hearing docket, amended to read: operation on 1200 kc., 100 watts, unlimited time, the site to be approved.

APPLICATIONS DENIED

KPRC—Houston Printing Co., Houston, Tex.—Denied special temporary authority to operate with power of 5 KW nighttime for period not to exceed 30 days in order to take measurements and show results obtained by this increased power.

KCMO—Lester E. Cox, Thos. L. Evans and C. C. Payne, Kansas City, Mo.—Denied special temporary authority to operate unlimited time for a period of 30 days.

WELI—Patric J. Goode, New Haven, Conn.—Denied special temporary authority to operate from 7:30 to 11 p. m., EST, June 22, in order to broadcast banquet of the New Haven Advertising Club.

APPLICATIONS DISMISSED

The following applications, heretofore set for hearing, were dismissed at request of applicants:

KPOF—Pillar of Fire (a corporation), Denver, Colo.—Applied for modification of license, 880 kc., 500 watts, 1 KW LS, shares with KFKA.

NEW—Farmers Educational and Cooperative Union of America, North Dakota Division, Bismarck, N. Dak.—Applied for C. P., 550 kc., 1 KW, 5 KW LS, unlimited time.

The following applications, heretofore set for hearing, were dismissed with prejudice, inasmuch as requests of applicants for withdrawal of the applications were received less than 30 days prior to the hearing scheduled thereon:

NEW—Jesse H. Jay, Miami Beach, Fla.—Applied for C. P., 1500 kc., 100 watts, unlimited.

WKBZ—Marl L. Ashbacker, Muskegon, Mich.—Modification of license, 1200 kc., 100 watts, 200 watts LS, unlimited time.

NEW—Wolverine Broadcasting Co., Ann Arbor, Mich.—Applied for C. P., 800 kc., 1 KW, daytime.

NEW—The Steffen Ice and Ice Cream Co., Wichita, Kans.—Applied for C. P., 1210 kc., 100 watts, unlimited.

MISCELLANEOUS

WLLH—Merrimac Broadcasting Co. Inc., Lowell, Mass.—Reconsidered action of April 24, 1936, granting authority to construct a "booster" station at Lawrence, Mass., to operate synchronously with station WLLH at Lowell, Mass., and set the application for a hearing because of a protest by Hildreth & Rogers Co., applicants for a new broadcast station at Lawrence, Mass. Effective date of the Commission's action to which the protest is directed postponed to the date of the Commission's decision after the hearing.

NEW—C. G. Hill, George D. Walker, and Susan H. Walker, Winston-Salem, N. C.—Denied motion asking Commission to advance the date for oral argument on application for a C. P. to erect a broadcast station at Winston-Salem, N. C., now scheduled for September 17, 1936, to an early date in June, 1936, as the June Docket is now congested.

NEW—Mile High Radio Corp., Denver, Colo.—Denied petition asking Commission to reconsider action of May 14, 1936, in designating for hearing the application for C. P. to authorize erection and operation of a new broadcast station at Denver, Colorado. This applicant specifies 1420 kc., 100 watts, unlimited time.

WOWO—Main Auto Supply Company, Ft. Wayne, Ind.—Granted request to postpone hearing on application to increase power from 10 KW to 25 KW now scheduled for June 29, 1936, to a date to be fixed by the Commission. This applicant has also pending before the Commission an application to transfer control of the station to the Westinghouse Electric and Manufacturing Company.

WCRW—Clinton R. White, Chicago, Ill.—Reconsidered action of May 21, 1936, designating application for renewal of license for hearing; removed the application for renewal from the hearing docket and granted a regular renewal of license.

KRE—First Congregational Church, Berkeley, Calif.—Overruled petition asking Commission to reconsider and grant without hearing application for the voluntary assignment of its license to the Central California Broadcasters Inc. Applica-

- tion to proceed to hearing as originally docketed. Station operates on 1370 kc., 100 watts night, 250 watts daytime.
- NEW—Jefferson Broadcasting Co., Birmingham, Ala.—Granted authority to take depositions limited to financial ability in re application for new broadcast station to operate on 1200 kc., 100 watts night, 250 watts daytime, unlimited. Denied petition to amend application and to continue the hearing.
- NEW—Donald A. Wike and H. E. Studebaker, Baker, Oregon—Granted request for order to take depositions in re application for C. P. to establish a new broadcast station at Baker, Oregon, to operate on 1370 kc., 100 watts night, 250 watts daytime, unlimited time.

ORAL ARGUMENTS

The following cases were set for oral argument to be held October 1, 1936:

- NEW—Ex. Rep. No. 1-219: J. Laurance Martin, Tucumcari, N. Mex.
- NEW—Ex. Rep. No. 1-213: Edwin A. Kraft, Fairbanks, Alaska.
- NEW—Ex. Rep. No. 213: John A. Stump, Fairbanks, Alaska.
- KLO—Ex. Rep. No. 1-221: Interstate Broadcasting Corp., Ogden, Utah.

APPLICATIONS RECEIVED

First Zone

- WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn. 1060 —Extension of special experimental authorization to change frequency from 1060 kc. to 1040 kc., hours of operation from share-WBAL to simultaneous KRLD (unlimited), for period from 8-1-36 to 2-1-37.
- WSAY—Brown Radio Service & Laboratory (Gordon P. Brown, 1210 owner), Rochester, N. Y.—Application to reinstate construction permit requesting authority for a new station to be operated on 1210 kc., 100 watts, daytime, which expired 6-1-36.

Second Zone

- WLW—The Crosley Radio Corp., Cincinnati, Ohio.—Extension of 700 special experimental authorization to operate with power of 500 KW day and night, using directional antenna at night, for period from 8-1-36 to 2-1-37.
- WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.— 1370 Construction permit to make changes in equipment, change frequency from 1370 kc. to 1390 kc.; increase power from 100 watts, 250 watts day, to 500 watts, 1 KW day; and install directional antenna. Amended to use directional antenna both day and night.
- NEW—Farnsworth Television, Inc., of Pennsylvania, Springfield, Pa.—Construction permit for a new experimental visual broadcasting and synchronized sound track for 6000-86000 kc. band on specific frequencies of 62750 kc. for visual broadcasting and 66000 kc. for synchronized sound track. Visual power 4 KW, sound track power 1 KW. Amended to delete request for specific frequencies and request bands 42000-56000 and 60000-86000 kc.

Third Zone

- NEW—W. Hanes Lancaster and J. W. Birdwell, d/b as Johnson 1200 City Broadcasting Co., Johnson City, Tenn.—Construction permit for a new station to be operated on 1200 kc., 100 watts, 250 watts day, unlimited time.
- KFXR—Exchange Avenue Baptist Church of Oklahoma City, 1310 Oklahoma City, Okla.—Voluntary assignment of license from Exchange Avenue Baptist Church to Plaza Court Broadcasting Co.

- KPDN—Pampa Daily News, Inc., Pampa, Tex.—Voluntary assign- 1310 ment of license from Pampa Daily News, Inc., to R. C. Hoiles.
- KGFF—KGFF Broadcasting Co., Inc., Shawnee, Okla.—Modifica- 1420 tion of construction permit (B3-P-735) for new equipment, increase in power, and move of transmitter, requesting extension of completion date from 6-29-36 to 8-29-36.
- WRDW—Augusta Broadcasting Co., Augusta, Ga.—Authority to 1500 transfer control of corporation from J. J. Powell, Louise Powell, and A. E. Groom to Arthur Lucas, William K. Jenkins, and Frank J. Miller, 80 shares common stock.

Fourth Zone

- WBBM—WBBM Broadcasting Corp., Chicago, Ill.—Extension of 770 special experimental authorization to operate synchronously with KFAB from local sunset (KFAB local sunset) to midnight, for period from 8-1-36 to 2-1-37.
- WHBU—Anderson Broadcasting Corp., Anderson, Ind.—License 1210 to cover construction permit (B4-MP-297) for new equipment.
- KGBX—Springfield Broadcasting Co., Springfield, Mo.—License to 1230 use 1230 kc., 500 watts, unlimited time. Directional antenna night, as authorized under B4-SA-198, for permanent authority.
- NEW—Falls City Broadcasting Corp., Falls City, Nebr.—Con- 1310 struction permit for a new station to be operated on 1310 kc., 100 watts, unlimited time. Antenna to be determined.
- KWK—Thomas Patrick, Inc., St. Louis, Mo.—Modification of con- 1350 struction permit (B4-P-848) for new equipment and move of transmitter, requesting changes in authorized equipment and extension of commencement and completion dates.
- KSLM—Oregon Radio, Inc., Salem, Ore.—Construction permit to 1370 install a new transmitter.
- KCMO—Lester E. Cox, Thomas L. Evans and C. C. Payne, Kansas 1370 City, Mo.—Modification of license to change hours of operation from specified hours to unlimited time, and change studio site from Werby Bldg., 39th and Main Sts., to Commerce Trust Bldg., 10th and Walnut Sts., Kansas City, Mo.
- NEW—C. F. Gaarenstroom, Fairmont, Minn.—Construction per- 1420 mit for a new station to be operated on 1420 kc., 100 watts, 250 watts day, unlimited time.
- W9XJM—WCBS, Inc., Portable-Mobile.—License to cover con- struction permit for a new general experimental station.
- NEW—Zenith Radio Corporation, Portable-Mobile—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000, 86000-400000, 401000 kc. and above, 100 watts.
- NEW—Zenith Radio Corporation, Portable-Mobile—Construction permit for a new general experimental station to be operated on 31600, 35600, 38600, 41000, 86000-400000, 401000 kc., 100 watts.

Fifth Zone

- NEW—KLZ Broadcasting Co., Denver, Colo.—Construction per- 1210 mit for a new station to be operated on 1210 kc., 100 watts, 250 watts day, unlimited time.
- NEW—W. E. Whitmore, Hobbs, N. M.—Construction permit for 1210 a new station to be operated on 1210 kc., 100 watts, unlimited time.
- NEW—Chauncey W. Hammond, Oakland, Calif.—Construction 1280 permit for a new station to be operated on 1280 kc., 500 watts, 1 KW day, unlimited time.
- KXL—KXL Broadcasters, Portland, Oregon—Consent to transfer 1420 control of corporation from H. B. Read to T. W. Symons, Jr., and E. B. Craney, 222 shares common stock.

Alaskan Zone

- KINY—Edwin A. Kraft, Juneau, Alaska—Construction permit to 1430 install new equipment, new antenna, change frequency from 1310 kc. to 1430 kc. and power from 100 watts to 250 watts.

ENGINEERING CONFERENCE

The informal engineering conference which has been in progress before the full membership of the Federal Communications Commission since June 15 is continuing.

The testimony of James W. Baldwin, Managing Director, and Dr. Charles B. Aiken, technical consultant for the Association in this case, will be printed in a special edition of NAB REPORTS and mailed to the membership this week.

FITZGERALD HEADS COPYRIGHT BUREAU

Edward J. Fitzgerald, of Long Island City, N. Y., and recently connected with broadcasting stations WLW and WSAI, Cincinnati, as General Music Director, has been appointed Director of the new Bureau of Copyrights of the National Association of Broadcasters by James W. Baldwin, Managing Director, effective June 23.

Mr. Fitzgerald will give his immediate attention to (1) the making available to broadcasters of a complete and accurate catalog or index of active musical compositions, and (2) creation of a standard library of musical compositions taken, for the most part, from the public domain of music. Both these projects were contained in the Copyright Plan which has been approved by the Board of Directors.

Mr. Fitzgerald, who is 38 years old, graduated from the Boston Latin School in 1915, following which he had four years' schooling at the New England Conservatory of Music.

From 1922-1929 he was an arranger of music, a writer of special vaudeville material and popular songs for Leo Feist, Inc., Copley Plaza Orchestras, and Jerome Remick & Company.

From 1929-1933 he was president and managing director of Eddie Fitzgerald, Inc., of Boston. The company was engaged in the business of devising, writing, selling and producing advertising style shows, vaudeville units and commercial radio broadcasts, including the Stetson Shoe Company style show, the Kelvinator Choirs, the Jordan Marsh Company broadcasts, the Colt Shoe Company broadcasts and others.

From January 1934 to May of this year Mr. Fitzgerald was associated with stations WLW and WSAI, Cincinnati, as program idea man and arranger of music. Later he became a member of

the Audition Board and the Program Planning Board and in August 1934 he was named General Music Director, in which capacity he supervised the work of some 150 musicians and vocalists.

CONGRESSIONAL RADIO ACTION

The second session of the Seventy-fourth Congress which adjourned on June 20 enacted only two radio bills into law which affect the broadcasting industry. On the other hand, it failed to enact the Duffy copyright bill, which held special interest for broadcasters. The Pure Food and Drug Bill was given a great deal of consideration in the closing hours but failed of enactment.

Of the two radio bills which became law during the second session, one repealed the Davis amendment and the other dealt with engineers, directors of divisions and accountants of the Federal Communications Commission and their salaries.

In connection with the end of this Congress it is to be borne in mind that the slate is now clean and that the session of Congress which convenes on January 5 next will start with no bills before it on any subject.

Following is a list of all of the Senate and House radio bills and resolutions which were left without final action having been taken on them during the two sessions of the Seventy-fourth Congress just adjourned:

Senate

S. 4—Copeland, Vandenberg, Murphy bill "to prevent the promotion of fraud through interstate communication."

S. 5—Copeland pure food and drug bill.

S. 541—Capper bill "to prohibit the transportation in interstate commerce of advertisements of intoxicating liquors."

S. 820—Neely bill "relating to costs in radio proceedings before the Federal Communications Commission."

S. 3047—Copyright bill.

S. 3261—Walsh bill to have foreign government radio programs approved by State Department.

House

H. R. 55—Rudd bill "to amend the Radio Act of 1927" to provide educational, religious and other facilities.

H. R. 197—Buckbee bill "to prohibit untrue, deceptive, or misleading advertising through the use of the mails or in interstate or foreign commerce."

H. R. 3252—Sauthoff bill "to prohibit the use of the mails, certain periodicals, and broadcasting stations, having a range covering more than one State, to the advertising of loans for which interest in excess of 15 per cent per annum is charged."

H. R. 8404—Culkin bill "to prohibit advertising of alcoholic beverages in interstate commerce."

H. R. 8475—Monaghan bill "to amend the Communications Act of 1934 by establishing a Radio Commission."

H. R. 8852—McKeough bill to have foreign radio programs approved by the State Department.

H. R. 9229—Scott bill "to amend section 326 of the Communications Act of 1934," dealing with censorship.

FOURTEENTH ANNUAL NAB CONVENTION

STEVENS HOTEL, CHICAGO, ILLINOIS

JULY 5, 6, 7, 8, 1936

H. R. 9230—Scott bill "to amend section 315 of the Communications Act of 1934" laying aside time for political and other uncensored broadcasts.

H. R. 9231—Scott bill "to add section 315 (a) to the Communications Act of 1934" making it obligatory for stations to keep certain records.

H. R. 12646—Rayburn bill "to amend section 318 of the Communications Act of 1934," making provisions for operators.

H. J. Res. 220—Sirovich resolution "providing for the establishment of an executive department to be known as the 'Department of Science, Art, and Literature.'"

H. Res. 52—Dies censorship bill.

H. Res. 370—Scott resolution providing for the establishment of a "Broadcasting Research Commission."

H. Res. 394—Connery resolution asking for an investigation of the Communications Commission.

BROADCAST REVENUE IN EAST SOUTH CENTRAL STATES

The Bureau of the Census, Department of Commerce, has announced that total receipts of the 34 broadcast stations in the east south central states, including Alabama, Kentucky, Mississippi and Tennessee, from sales of radio time during 1935 amounted to \$2,140,634. These receipts include revenue from 9 stations in Alabama, 6 in Kentucky, 7 in Mississippi, and 12 in Tennessee.

NEW RADIO EMPLOYMENT AGENCY

The Cleveland Vocational Bureau has been established in Cleveland with headquarters in the Schofield Building, whose purpose is to act as a radio employment agency. Stanley Babington, a former Cleveland broadcaster, is in charge.

According to the announcement the new Bureau will act as a clearing house for the registration of artists, announcers, engineers, salesmen and studio personnel of all types. It is stated that only applicants with previous radio experience will be considered.

EFFECTIVE DATE OF RULE 177 POSTPONED

A protest has been received from Oswald Schuette on behalf of the Short Wave Institute of America, Inc., against Rule 177 which deals with the rebroadcasting of programs of broadcast and other stations. The Rule is now effective July 1, 1936. Because of the fact that the effective date of other rules recently adopted to be effective July 1, 1936, has been postponed to August 1, and in order also to allow time for study of the protest, it was decided that the effective date of Rule 177 be also postponed to August 1, 1936.

MIDDLE ATLANTIC BROADCAST REVENUE

Total receipts of 82 broadcast stations in the Middle Atlantic States from sale of radio last year amounted to \$11,422,747, according to the Bureau of the Census, Department of Commerce, in the fifth report on the new census of business series on the broadcasting business.

The report includes all broadcast stations in the three states of New Jersey, New York and Pennsylvania which sold time and were in operation December 31, 1935.

FRANK A. NOBLE

Elmer G. Behler, manager of Radio Station KGEK, Sterling, Colorado, is anxious to locate Frank A. Noble. He is about 45 or 50 years old, with black hair, and 5 feet 7 inches tall. Further information can be obtained from Mr. Behler.

PAT FREDERICKS

W. W. Behrman, Radio Station WBOW, Terre Haute, Indiana, is desirous of learning the whereabouts of one Pat Fredericks. Mr. Behrman requests that members notify him by wire, collect, should they be able to assist him in locating Fredericks.

LEW BYRD

Charles A. Baker, Radio Station KFJR, Portland, Ore., will appreciate information as to the whereabouts of Lew Byrd. Mr. Byrd is about 45 years old. For further information communicate with Mr. Baker.

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2841. George H. Lee Co., 12th and Harney Streets, Omaha, Nebr., distributor of a poultry medicine, is charged with unfair competition in violation of the Federal Trade Commission Act, in a complaint. Medicinal qualities of the respondent company's product were misrepresented, according to the complaint.

No. 2842. Trade representations unfair to competitors are alleged in a complaint issued against **Federal Enameling & Stamping Co.**, of McKees Rocks, Penna., and Pittsburgh, manufacturers of porcelain enamel kitchen utensils sold under the trade name "Federalware."

Advertising in metropolitan newspapers, radio announcements and in other ways, the respondent company is alleged to have represented its products as chip proof, stainless, and as thirty-six times more durable than ordinary enamelware. The articles are said to have been advertised as having covers or lids of chromium, and as being capable of saving their cost to the ultimate purchaser in one year or less through saving of fuel.

These representations were not true, according to the complaint, and had a tendency to deceive the public, as there is a preference for products of this class which do have the qualities advertised.

No. 2843. Alleging unfair methods of competition in the sale of "Italy Brand Table Oil," intended for use in salads, cooking and baking, a complaint has been issued against **Chicago Macaroni Co.**, wholesale grocers, trading as **A. Morici and G. Matalone Co.**, 2148 Canalport Ave., Chicago.

Labels on containers describe the table oil as being composed of "fifteen per cent imported olive oil and eighty-five per cent of other vegetable oils" and bear statements in the Italian language and pictorial representations characteristic of Italy, it is charged.

These representations allegedly tend to cause purchasers to believe that the olive oil ingredient in the respondent corporation's product is produced in or imported from Italy, is packed by A. Morici and G. Matalone Co., and that this company is an Italian concern engaged in importing olive oil from Italy.

No. 2844. A complaint has been issued charging **Basic Foods, Inc.**, and **Curtis Howe Springer**, its president, of **Somerset, Pa.**, with unfair trade representations in the sale of food, herb and drug products known as "Dr. Springer's Antediluvian Tea" and "Dr. Springer's Re-Hib."

The complaint charges the respondent with misleadingly advertising that a majority of people suffer from constipation and over-acidity; that most aches and pains result from congestion of glands and organs, and that "Dr. Springer's Antediluvian Tea" acts beneficially upon the glands and organs of the body and that "Re-Hib" is beneficial in treating all cases of over-acidity, so called "heartburn," and stomach ailments.

According to the complaint, the product "Antediluvian Tea" is primarily a laxative, and does not act beneficially upon the glands and organs; and "Re-Hib" is not beneficial as a corrective for all cases of over-acidity or heartburn and should not be taken except upon a doctor's prescription.

The complaint also charges that although the respondent's advertising indicates that its products are submitted to Federal agencies for approval, there is in fact no such agency with authority to approve or censure in advance of shipment such products or the advertising literature relative thereto.

No. 2846. A complaint has been issued against **Frances Brown**, 4626 Lancaster Ave., Philadelphia, trading as **American Bank Machinery Company**, charging unfair competition in the business of repairing and rebuilding perforating and check endorsing machines, and in selling and supplying new parts.

Practices of the respondent are alleged to deceive owners of perforating and check endorsing machines made by old established concerns, causing such owners to deliver such machines to the respondent for repair and installation of new parts in connection therewith, rather than to the original manufacturer or to others engaged in repair or such installation work. This practice, according to the complaint, results in diversion of trade from competitors to the respondent.

According to the complaint, the respondent, through her salesmen, solicited repairing and rebuilding jobs, asserting that the respondent was representative for the old line companies, American Perforating Company and Cummins Perforator Company, both of Chicago. Other representations made in the course of these sales

efforts were, according to the complaint, that the respondent did all repair work for these two companies; that American Perforator Company and the respondent were one and the same concern; that the American and Cummins companies were out of business, and that the respondent manufactured and repaired machines sold by National Perforator Company, Inc., of Philadelphia.

Stipulations

The Commission has issued the following cease and desist orders and stipulations:

No. 01385. A. C. Carlton, trading as Putinize Laboratories, 369 Pine St., San Francisco, agrees to cease representing that "Putinize," an eye lotion, overcomes or prevents any condition of the eyes, keeps them brilliant and restores their natural luster, that it is preferred by stars of the stage and screen, and that it is a tonic or antiseptic containing no harmful ingredients. The respondent stipulates he will discontinue use of the word "laboratories" in his trade name until he maintains a laboratory where scientific tests are conducted. He admits that repeated application of certain ingredients such as those contained in "Putinize" may cause corneal ulcers.

No. 01393. Pompeian Co., 60 Orange St., Bloomfield, N. J., will discontinue advertising that use of certain Pompeian cosmetic preparations stops dryness of the skin, prevents blotches or scalliness reduces pores, and that any specified ingredients or chemicals not contained in Pompeian beauty products are "damaging." It is admitted by the respondent that reliable or scientific proof has not been established for its claims that skin troubles increase as the use of cosmetics increases.

These assertions will be stopped, as well as the representation that the respondent corporation's chemists have banished every harmful chemical used in cosmetics, and that any offer to purchasers is limited to a stated number unless delivery is refused to all above such number.

No. 01394. Fabrix, Inc., 325 W. Huron St., Chicago, is engaged in the sale of rubber mats and machinery for manufacturing such mats. In its stipulation the corporation admits there is no evidence that the mats manufactured under a license granted by it are in greater demand than other mats, and will discontinue such representation in advertising, as well as claims that the mats surpass United States Government specifications and, inferentially or otherwise, that they have been purchased by the Government. The respondent corporation also will cease making unmodified representations that earnings from the sale of mats produced by its machines are in excess of the average earnings of the respondent's licensees under normal business conditions.

No. 01395. The Reese Chemical Co., Inc., 10617 Frank Ave., Cleveland, stipulates that in the sale of a medicinal preparation designated "Thoxine" it will cease advertising that the product will drive colds or fevers out of the system; that it is an effective remedy for sore throat, unless such representation is clearly limited to sore throat due to colds or the inhalation of dust or fumes, and that it is a competent treatment for coughs unless this claim is confined to coughs resulting from colds or minor throat ailments. The stipulation prohibits the respondent corporation from making assertions that "Thoxine" is a "famous" doctor's prescription, and that it contains no harmful drugs and is "safe," unless such representation makes clear that the product is safe when taken according to directions.

No. 01396. Modern Health Products, Inc., 1428 North Twenty-fourth Street, Milwaukee, selling an herbal preparation, "Swiss Kriss," agrees to stop advertising it as a product that will conquer or eliminate intestinal poisons, unless the assertion is limited to temporary conditions due to inadequate elimination. The respondent stipulates that it will discontinue other similar representations such as that its product is a tonic, is a "modern" laxative or a "secret" of the Swiss people.

No. 01397. Chocolate Products Co., 415 Beethoven Place, Chicago, selling "Stillicious," a chocolate drink, agrees to cease making representations by inference or direct statement to the effect that the daily drinking of a quart of this liquid will promote radiant physical health, magnetism and charm, and that only in "Stillicious" chocolate may one get the yeast Vitamins B and G.

No. 01398. G. Muller, trading as Rowland Weil & Co., 135 Bergen Avenue, Jersey City, N. J., will ban advertisements to the effect that its "Mullax Tablets" are a competent treatment or remedy for constipation, unless this representation is confined to the relief of temporary constipation. Among other assertions to be discontinued in the respondent's advertising are that the preparation is a tonic or vegetable product and that it has any effect on intestinal muscles.

No. 2521. I. Teich and A. Makower, trading as Tee and Emm Knitting Mills, 32 Orchard Street, New York City, have been ordered to discontinue representing that they manufacture the knitted goods they sell in interstate commerce.

Use by the respondents of the words "Knitting Mills," "Mills" or "Manufacturers" in their trade name, on letterheads, labels, invoices, or in any other manner, to represent that they own or operate a factory or mill in which their products are knitted or manufactured, is prohibited under the order to cease and desist.

No. 2684. The K-W Graphite Corporation, of 3246 Holmes St., Kansas City, Mo., has been ordered to cease and desist from misrepresentations in the sale of motor oil.

Among the representations to be discontinued are that "K-W Motor Graphite" increases motor life and efficiency by any specific percentage; that motors in which it is used require less gasoline than those in which it is not used; and that use of this substance reduces friction by any stated percentage.

The respondent company is also ordered to stop alleging that only one oil change in each 3,000 miles or any specified mileage is necessary when K-W Graphite is used, and that its use effects any definite saving on oil bills.

The respondent's product is described as a concentrated solution of oil and graphite, used for addition to fuels and crank-case oils for combustion engines and machinery.

FTC DISMISSES COMPLAINT

No. 2547. The Federal Trade Commission has dismissed a complaint alleging unfair competition on the part of Harold C., Ellen J., and Louis E. Brooks, of Marshall, Mich., trading as Brooks Rupture Appliance Company and Brooks Appliance Company. The complaint had charged the respondents with unfair representations in the sale of an appliance sold for use in treating rupture.

FEDERAL COMMUNICATIONS COMMISSION ACTION

HEARING CALENDAR

Monday, June 29

HEARING BEFORE THE BROADCAST DIVISION

Western Broadcast Company, Los Angeles, Calif.—Authority to transfer control of corporation.; 1050 kc., 50 KW, unlimited time.

Western Broadcast Company, Los Angeles, Calif.—Renewal of license; 1050 kc., 50 KW, unlimited time.

HEARING BEFORE AN EXAMINER (Broadcast)

NEW—Eastern States Broadcasting Corp., Bridgeton, N. J.—C. P., 1210 kc., 100 watts, daytime.

WJAC—WJAC, Inc., Johnstown, Pa.—C. P., 1310 kc., 100 watts, 250 watts LS, share-WFBG. Present assignment: 1310 kc., 100 watts, share-WFBG.

KYA—Hearst Radio, Inc., San Francisco, Calif.—C. P., 1230 kc., 1 KW, 5 KW LS, unlimited time. Present assignment: 1230 kc., 1 KW, unlimited time.

Tuesday, June 30

HEARING BEFORE AN EXAMINER

NEW—Power City Broadcasting Corp., Niagara Falls, N. Y.—C. P., 630 kc., 250 watts, daytime.

NEW—The Niagara Falls Gazette Publishing Co., Niagara Falls, N. Y.—C. P., 630 kc., 250 watts, daytime.

KUJ—KUJ, Inc., Walla Walla, Wash.—C. P., 1250 kc., 250 watts, unlimited time. Present assignment: 1370 kc., 100 watts, unlimited time.

KRLC—H. E. Studebaker, Lewiston, Idaho.—C. P., 1390 kc., 250 watts, unlimited time. Present assignment: 1420 kc., 100 watts, unlimited time.

NEW—Donald A. Wike and H. E. Studebaker, d/b as Wike & Studebaker, Baker, Ore.—C. P., 1370 kc., 100 watts, 250 watts LS, unlimited time.

NEW—Comer Thomas, Bellingham, Wash.—C. P., 1420 kc., 100 watts, unlimited time.

WCBD—WCBD, Inc., Waukegan, Ill.—Authority to transfer control of corporation; 1080 kc., 5 KW, limited time, S-WMBI.

WCBD—WCBD, Inc., Waukegan, Ill.—Modification of license to move studio; 1080 kc., 5 KW, limited time.

Wednesday, July 1

HEARING BEFORE AN EXAMINER (Broadcast)

NEW—The Tribune Co., Tampa, Fla.—C. P., 550 kc., 1 KW, 5 KW LS, unlimited.

APPLICATIONS GRANTED

WMIN—Edward Hoffman, St. Paul, Minn.—Granted modification of C. P. authorizing change in type of equipment to be installed and approval of transmitter location.

WJDX—Lamar Life Ins. Co., Jackson, Miss.—Granted authority to determine operating power by direct measurement of antenna input in compliance with terms of Rule 137.

WSPR—Quincy A. Brackett, Lewis B. Breed and Edmund A. LaPorte, co-partners, d/b as Conn. Valley Broadcasting Co., Springfield, Mass.—Granted license to cover C. P. authorizing erection of new station, 1140 kc., 500 watts, limited time.

WHIS—Daily Telegraph Printing Co., Bluefield, W. Va.—Granted modification of license to increase power from 250 watts night, 500 watts day, to 500 watts night, 1 KW day.

KCMO—Lester E. Cox, Thomas L. Evans and C. C. Payne, Kansas City, Mo.—Granted modification of license to move studio locally, change hours of operation from specified to unlimited.

WDNC—Durham Radio Corp., Durham, N. C.—Granted consent to transfer of control of Durham Radio Corp. from the present stockholders to The Durham Herald Company; 1500 kc., 100 watts, unlimited time.

WDBJ—Times-World Corp., Roanoke, Va.—Granted consent to transfer of control of the Times-World Corp., a newspaper organization and licensee of station WDBJ, from J. B. Fishburn to various members of his family.

WMEX—The Northern Corp., Boston, Mass.—Granted renewal of license for the period ending January 1, 1937; 1500 kc., 100 watts night, 250 watts day, unlimited.

KDB—Santa Barbara Broadcasters, Ltd., Santa Barbara, Calif.—Granted renewal of license for period ending January 1, 1937; 1500 kc., 100 watts, unlimited time.

KSLM—Oregon Radio, Inc., Salem, Ore.—Granted renewal of license, 1370 kc., 100 watts, unlimited time, for period ending January 1, 1937.

WJEJ—Hagerstown Broadcasting Co., Hagerstown, Md.—Granted renewal of license, 1210 kc., 100 watts daytime, for period ending 12-1-36.

KGFF—KGFF Broadcasting Co., Inc., Shawnee, Okla.—Granted modification of C. P. to make changes in equipment and approval of new transmitter site and antenna system. Also to extend completion date from June 29 to August 29, 1936.

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Granted modification of C. P. to install new equipment and extend completion date from August 10, 1936, to 120 days thereafter.

WAYX—E. F. Sapp and S. F. Sapp, d/b as Waycross Broadcasting Co., Waycross, Ga.—Granted modification of C. P. approving radiator transmitter and studio sites and equipment.

WEEI—The Edison Electric Illuminating Co. of Boston, Boston, Mass.—Granted consent to voluntary assignment of license from The Edison Electric Illuminating Co. of Boston to WEEI Broadcasting Corp.

KOB—New Mexico College of Agriculture and Mechanic Arts, Albuquerque, N. Mex.—Granted consent to voluntary assignment of license from New Mexico College of Agriculture and Mechanic Arts to the Albuquerque Broadcasting Co.

KFRU—KFRU, Inc., Columbia, Mo.—Granted consent to the transfer of control of corporation from Luther L. Hill to Star Times Publishing Company.

SET FOR HEARING

WJAS—Pittsburgh Radio Supply House, Pittsburgh, Pa.—Application for modification of license to increase power from 1 KW night, 5 KW day, to 5 KW, unlimited time. (To be heard by Broadcast Division.)

NEW—Old Colony Broadcasting Corp., Brockton, Mass.—Application for C. P. for new station, 680 kc., 250 watts daytime, time to be determined.

NEW—Amended to read: Voice of Corsicana Assn., Corsicana, Tex.—Application for C. P. amended to read: 1310 kc., 100 watts, daytime only.

NEW—Chauncey W. Hammond, Oakland, Calif.—Application for C. P., 1280 kc., 500 watts night, 1 KW day, unlimited time, site to be determined.

NEW—Harry G. Kipke, Ann Arbor, Mich.—Application for C. P. for new station, 630 kc., 500 watts, daytime only, site and type of antenna to be determined.

NEW—R. E. Chinn, Moorhead, Minn.—Application for C. P. for new station, 1500 kc., 100 watts, unlimited time, site to be determined.

NEW—Amended to read: Dallas Broadcasting Co., Dallas, Tex.—Application for C. P., 1500 kc., 100 watts, daytime only, site to be determined.

NEW—New England Radio Corp., Bridgeport, Conn.—Application for C. P. amended to read: 1420 kc., 100 watts, daytime only, site to be determined.

WHAT—Independence Broadcasting Co., Inc., Philadelphia, Pa.—Amended to read: C. P. requesting approval of new transmitter site; make changes in equipment; change frequency from 1310 kc. to 1220 kc.; increase power from 100 watts to 1 KW; and increase operating time from sharing with WTEL to unlimited, using directional antenna system.

APPLICATION DISMISSED

The following application, heretofore set for hearing, was dismissed at request of applicant:

NEW—George F. Bissell, Pittsfield, Mass.—C. P. for new station, 1200 kc., 100 watts, daytime.

APPLICATION DENIED

The following application, heretofore set for hearing, was denied as in cases of default for failure to file an appearance and statement of facts in accordance with Rule 104.6(c):

NEW—John Perkins Rabb, Lenoir, N. C.—C. P. for new station, 1370 kc., 100 watts, daytime.

ACTION ON EXAMINERS' REPORTS

NEW—Ex. Rep. No. 1-68: George B. Bairey, Valley City, N. Dak.—Granted C. P. for new broadcast station to operate on 1500 kc., 100 watts, unlimited time. Examiner M. H. Dalberg sustained. Order effective July 14, 1936.

KVI—Ex. Rep. No. 1-210: Puget Sound Broadcasting Co., Inc., Tacoma, Wash.—Granted C. P. to move transmitter location; install new equipment; and increase power from 1 KW to 1 KW night, 5 KW day; 570 kc., unlimited time. Examiner R. L. Walker reversed. Order effective July 7, 1936.

WSBM—WSBM, Inc., New Orleans, La.—Granted renewal of license, 1320 kc., 500 watts night, 1 KW day, unlimited time. Examiner Geo. H. Hill sustained. Order effective July 7, 1936.

MISCELLANEOUS

WMT—Iowa Broadcasting Co., Cedar Rapids, Iowa.—Reconsidered and granted application for C. P. to make changes in equipment and increase day power from 2½ to 5 KW.

National Television Corp., New York City.—Denied petition asking Commission to grant special temporary use of the frequency band 2000 to 2100 kc. for period ending July 1, 1936, for television demonstration.

KOB—New Mexico College of Agriculture and Mechanic Arts, Albuquerque, N. Mex.—Granted application for renewal of license and for the assignment of the license to Albuquerque Broadcasting Co., of which T. M. Pepperdy holds all the stock.

KOL—Seattle Broadcasting Co., Seattle, Wash.—Reconsidered and granted application for increase of day power to 5 KW.

Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Granted petition for rehearing of application to construct new broadcast station at Hammond, Ind., to operate on 1480 kc., 5 KW daytime. Denied petition to amend the application in respect to the site and antenna system.

KROW—Educational Broadcasting Corp., Oakland, Calif.—Denied petition to intervene at hearing of application of Earl Yates for C. P. for new broadcast station at Las Cruces, N. Mex., to operate on 930 kc., 1 KW LS.

KIT—Carl E. Haymond, Yakima, Wash.—Denied petition for continuance of hearing of application of KUJ, Walla Walla, Wash., for C. P. to operate on frequency 1250 kc., 250 watts, unlimited time.

NEW—Great Western Broadcasting Assn., Inc., Logan, Utah.—Accepted answer to the appearance and statement of facts filed by Cache Valley Broadcasting Co., Logan, Utah., in re application for new station at Logan to operate on 1200 kc., 100 watts, unlimited time.

KRSC—Radio Sales Corp., Seattle, Wash.—Granted application to increase its power from 100 watts to 250 watts and to operate unlimited time. Reconsidered action of April 3, 1936.

WBCM—James E. Davidson, Bay City, Mich.—Granted request to file brief in opposition to applications of the Saginaw Broadcasting Co. for authority to construct new broadcasting stations at Saginaw, one to operate on 950 kc., 500 watts, day only, the other on 1200 kc., 100 watts night, 250 watts day.

WHDL—Olean Broadcasting Co., Olean, N. Y.—Reconsidered and granted without hearing application for the transfer of the control of station WHDL to the Olean Times Herald. This station operates on 1420 kc., 100 watts day.

NEW—Harold Johnson and Leland M. Perry, d/b as Johnson & Perry, Cedar City, Utah.—Denied petition asking application for a permit for new broadcasting station at Cedar City, Utah, be granted without a hearing. Also denied request for a continuance of hearing to July 25 and request to take depositions in re application.

APPLICATIONS RECEIVED

First Zone

WGR—Buffalo Broadcasting Corp., Buffalo, N. Y.—Construction 550 permit to install new transmitter and antenna and increase power from 1 KW to 1 KW night, 5 KW day.

WEEL—The Edison Electric Illuminating Co. of Boston, Boston, 590 Mass.—Construction permit to install a new transmitter and directional antenna for day and night; increase power from 1 KW to 1 KW night, 5 KW day; move transmitter from Bridge St., Weymouth, Mass., to Mystic Valley Parkway, Medford, Mass.

WTBO—Associated Broadcasting Corp., Cumberland, Md.—Modification of license to change hours of operation from day-time until sunset at Dallas, Tex., to unlimited time, using 800 250 watts power.

WJAR—The Outlet Co., Providence, R. I.—License to cover construction permit (B1-P-333) as modified for changes in equipment, move of transmitter, and increase in power, using directional antenna. Amended re equipment. 890

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Extension 1060 of special experimental authorization to change hours of operation from share with WTIC to daily simultaneous operation on 1060 kc. with KTHS, from 6 a. m. to local sunset at Hot Springs, Ark.; from local sunset to 9 p. m., operate unlimited time on 1060 kc.; from 9 p. m. on will synchronize with WJZ on 760 kc., with power of 2½ KW, using directional antenna, until end of license period from 8-1-36 to 2-1-37.

NEW—Albert O. Fenyvessy, Rochester, N. Y.—Construction permit for a new station to be operated on 1210 kc., 100 watts, daytime. Amended re antenna and to request facilities of WSAY. 1210

WCAD—St. Lawrence University, Canton, N. J.—Voluntary assignment of license from St. Lawrence University to The Brockway Co. 1220

NEW—Clarence C. Dill, Washington, D. C.—Construction permit for a new station on 1310 kc., 100 watts, unlimited, facilities WOL if WOL is granted 1230 kc. Amended: Transmitter site to be determined. 1310

WABY—Adirondack Broadcasting Co., Inc., Albany, N. Y.—Construction permit to install a new transmitter; erect a vertical antenna; increase power from 100 watts to 100 watts, 250 watts day; move transmitter from Strand Theatre Bldg., 110 N. Pearl St., Albany, N. Y., to Baintree and Newton Sts., 500 N. of Albany City line, Colonie, N. Y.; and studio from Strand Theatre Bldg., 110 N. Pearl Street, Albany, N. Y., to 87 State Street, Albany, N. Y. 1370

WNLC—Thames Broadcasting Corp., New London, Conn.—Modification of construction permit (B1-P-549) to make changes in authorized equipment and install a vertical antenna. 1500

WMEX—The Northern Corporation, Boston, Mass.—Construction permit to install new equipment; change frequency from 1500 kc. to 1470 kc., power from 100 watts, 250 watts day, to 5 KW day and night; and move transmitter from Powder Horn Hill, 4½ miles from center of Boston, Chelsea, Mass., to Saugus, Mass.; install directional antenna for day and night use. Amended to change requested transmitter site from Saugus, Mass., to Granite Avenue, Milton, Mass.

W2XIN—Standard Cahill Co., Inc., Portable-Mobile.—License to cover construction permit for a new general experimental station.

Second Zone

NEW—WRBC, Inc., Cleveland, Ohio.—Construction permit for 950 a new station to be operated on 950 kc., 1 KW, unlimited time. Amended to install directional antenna for day and night use; also gives transmitter and studio sites as Cleveland, Ohio (no street address).

WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.—License 1500 to cover construction permit (B2-P-922) for changes in equipment and move of transmitter.

W3XEO—WCAU Broadcasting Co., Portable-Mobile.—Construction permit for a new general experimental station to be operated on 31100, 34600, 37600, 40600 kc., 50 watts.

W3XEO—WCAU Broadcasting Co., Portable-Mobile.—License to cover above.

W8XFQ—Scranton Broadcasters, Inc., Portable.—License to cover construction permit for a new general experimental station.

Third Zone

WPTF—WPTF Radio Co., Raleigh, N. C.—Special experimental 680 authorization to operate with 5 KW power from sunset at KPO to 11 p. m., EST, using directional antenna after sunset for period to 8-1-36.

WIS—Station WIS, Inc., Columbia, S. C.—License to cover construction permit (3-P-B-3258) for move of transmitter, change in frequency, increase in power, and changes in equipment. 1010

KRGV—KRGV, Inc., Weslaco, Tex.—Authority to install automatic frequency control. 1260

KRGV—KRGV, Inc., Weslaco, Tex.—Construction permit to make changes in equipment, install new antenna, and increase power from 500 watts to 1 KW.

WDAH—Tri-State Broadcasting Co., Inc., El Paso, Tex.—Construction permit to make changes in equipment, install a vertical antenna, and move transmitter from 200 S. El Paso St., El Paso, Tex., to corner Texas and Stanton Sts., El Paso, Tex. 1310

NEW—Isadore Goldwasser, Anniston, Ala.—Construction permit for a new station to be operated on 1420 kc., 100 watts, unlimited time. Amended to change hours of operation from unlimited to daytime. 1420

KRBC—Reporter Broadcasting Co., Abilene, Tex.—Modification of construction permit (B3-P-439) for a new station, requesting changes in authorized equipment, for approval of antenna, change studio site from 151 Cypress St., Abilene, Tex., to 984 Fourth St., Abilene, Tex., and approval of transmitter site at 341 Ambler St., Abilene, Tex. 1420

NEW—C. W. Snider, Wichita Falls, Tex.—Construction permit for a new station to be operated on 1500 kc., 100 watts, unlimited time. Amended to make changes in authorized equipment and change power from 100 watts to 100 watts, 250 watts day. 1500

NEW—A. Frank Katzentine, Miami Beach, Fla.—Construction permit for a new station on 1500 kc., 100 watts, unlimited time.

W4XBW—WDOD Broadcasting Corp., Chattanooga, Tenn.—License to cover construction permit for a new general experimental station.

Fourth Zone

NEW—National Battery Broadcasting Co., St. Paul, Minn.—Construction permit for a new station to be operated on 580 kc., 1 KW power, unlimited time. 580

KFRU—KFRU, Inc., Columbia, Mo.—Authority to transfer control of corporation from Luther Hill to Star Times Publishing Co., 350 shares common stock. 630

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Extension of 770 special experimental authorization to operate synchronously with WMMB from LS at Lincoln, Nebr., to midnight, CST, from 8-1-36 to 2-1-37.

KFNF—KFNF, Inc., Shenandoah, Iowa.—Authority to determine 890 operating power by direct measurement of antenna.

KGBZ—KGBZ Broadcasting Co., York, Nebr.—Construction permit to make changes in equipment. Amended re equipment.

WCAT—South Dakota State School of Mines. Rapid City, S. Dak. 1200 —Construction permit to install a vertical antenna and move transmitter and studio 600 feet from present site, School Campus. East St. Joe Street, Rapid City, S. Dak.

KANS—Charles C. Theis, Wichita, Kans.—Modification of construction permit (B4-P-500) for a new station, requesting changes in authorized equipment, change studio site from 200 S. Broadway, Allis Hotel, Wichita, Kans., to Lassen Hotel, First and Market St., Wichita, Kans., and for approval of transmitter site at Lassen Hotel, First and Market St., Wichita, Kans.

W9XIW—WCBD, Inc., Portable-Mobile.—License to cover construction permit for a new general experimental station.

Fifth Zone

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Extension 650 of special experimental authorization to operate on 710 kc., 1 KW, unlimited time, for period from 8-1-35 to 2-1-37.

KFEL—Eugene P. O'Fallon, Inc., Denver, Colo.—Modification of 920 construction permit (B5-P-1107) for changes in equipment, requesting move of transmitter from 5730 West Colfax Avenue, Edgewater, Colo., to 1900 Sheridan Blvd., near Denver, Colo.

KFWB—Warner Bros. Broadcasting Corp., Hollywood, Calif.—950 Modification of construction permit (B5-P-202) for new equipment and increase in power, requesting changes in authorized equipment, approval of antenna system, and move of transmitter from 6425 Hollywood Blvd., Hollywood, Calif., to Moynier Lane and Higuera Road, Hollywood, Calif.

NEW—Peninsula Newspapers, Inc., Palo Alto, Calif.—Construction permit for a new station on 1160 kc., 500 watts power, daytime operation. Amended: Change type of equipment.

NEW—Frank F. Airey, Twisp, Wash.—Construction permit for a 1220 new station to be operated on 1220 kc., 250 watts, daytime.

KIDO—Frank L. Hill and C. G. Phillips, d/b as Boise Broadcast 1350 Station, Boise, Idaho.—Construction permit to install a new transmitter, erect a vertical antenna, and move transmitter from 1.9 miles south of Boise, Idaho, to 4½ miles northwest Boise, Idaho.

NEW—Loyal K. King, d/b as Radio & Television Research Co., 1530 Los Angeles, Calif.—Construction permit for a new experimental broadcast station to be operated on 1530 kc., 1 KW, unlimited time.

W6XKL—Nichols & Warinner, Inc., Portable-Mobile.—License to cover construction permit for a new general experimental station.

The National Association of Broadcasters

NATIONAL PRESS BUILDING * * * * * WASHINGTON, D. C.
JAMES W. BALDWIN, Managing Director

NAB REPORTS

Copyright, 1936. The National Association of Broadcasters

Vol. 4 -- No. 31
JUNE 27, 1936

Testimony of James W. Baldwin, Managing Director, and Dr. Charles B. Aiken, Technical Consultant, on Behalf of the National Association of Broadcasters at the Informal Engineering Conference held by the Federal Communications Commission, June, 1936.

STATEMENT OF JAMES W. BALDWIN MANAGING DIRECTOR

Mr. Chairman and Members of the Commission:

My name is James W. Baldwin. I am Managing Director of the National Association of Broadcasters, the only national trade association in the industry. The Association comprises 396 stations of all sizes and located in every section of the country. These constitute 64 per cent of the stations now in operation and account for more than 80 per cent of the volume of business done within the industry.

Certain of our member stations have noted personal appearances and these, of course, will speak for themselves.

The broadcasters appreciate this opportunity to appear at hearings designed to develop long term planning for the most effective utilization of American radio for the social welfare. A long range viewpoint is particularly necessary now because of the impending development of new services such as facsimile and television broadcasting. In addition to their technical implications, the imminence of such services raises important economic and social questions regarding American broadcasting. These are far reaching in scope. They include not only a forward looking evaluation of the general services of broadcasting as a means of mass communication, but in addition, raise highly fundamental considerations such as the safeguarding of the free flow of ideas and information which is the cornerstone of American democracy.

My purpose today is not to consume your time with a full recital of the important social and economic services rendered by American broadcasting. The 34,000 pages of testimony and exhibits presented before this Commission in the hearings which began October 1, 1934, furnish ample data in this respect. Rather, it is my wish to present a concise but comprehensive picture of the social and economic significance of American broadcasting, to indicate the relation of these factors to the problems which the Commission is now considering and to set forth an estimation of the social and economic principles which must underlie any policy of future development; and I shall leave the technical considerations involved to another witness.

The Commission has asked for information as to "the relative social and economic importance" of broadcasting "including safety of life and protection of property factors." The first radio communication concerned itself with safety of life and protection of property at sea. With the development of aviation this was extended to the airways. Following 1920, radio was used to communicate with large masses of people simultaneously. This gave rise to radio as a means of mass communication; and in a short time broadcasting demonstrated itself to be the most important invention in this field since the printing press.

The first and controlling principle of radio regulation must always be the safeguarding of life and property. However, the highly important and, indeed, unique public service of radio broadcasting as a medium of mass communication must also be given the most careful consideration. This is all the more important because, in times of local and national emergency, a broadcasting system such as the American one, renders service in the way of safeguarding life and property which cannot be duplicated by any other means.

The best indication of the relative social and economic importance of any service is the number of people who regularly receive and utilize its benefits. On January 1, 1936, it was estimated that

22,869,000 families in the United States possessed one or more radio sets.¹ This is the most accurate measure possible of the general extent of service rendered, since the purchase of a radio set is *proof positive* of the desire and the ability to listen. There are no other reasons why a set would be purchased.

Research has shown² that there are approximately 3.3 listeners per set. On this basis, the total potential radio audience in the United States is approximately 75,500,000 persons.

Of the above number of radio families, approximately 3,000,000³ have considered the services of radio broadcasting sufficiently important to have two or more sets in their homes while nearly 3,000,000⁴ automobiles are equipped with radio sets. The total money investment represented by all of the aforementioned sets is in excess of one billion dollars.⁵

Radio is sufficiently important to the American family to have the average set utilized more than four hours daily and to cause more than three-quarters of all radio families to turn on their sets each day of the week. It also should be noted that these sets are useful enough to their owners that on the average more than 90 per cent of them are in working order at any one time.⁶

An idea of the extent to which the use of radio receiving sets has permeated American society can be secured from the following figures: number of families having radios, 22,869,000; number of families having passenger automobiles, 17,650,000;⁷ number of residence telephones, 11,000,000;⁸ number of electrically wired homes, 21,030,000.⁹ It is evident, therefore, that the possession of radio receiving sets is more widespread than is that of any other commonly accepted standard of living factor in American life.

Radio broadcasting reaches all sections of the country and serves all income groups and classes. The distribution of radio sets is continually tending to correspond more closely to the distribution of population.¹⁰

¹ Estimate of the Technical Committee appointed by the Joint Committee of the NAB, AAAA and ANA for that purpose. It comprised some of the country's leading research experts.

² The Crosby surveys, the Columbia and NBC studies, Hettinger, University of Pennsylvania.

³ Radio Today, January, 1936, p. 7.

⁴ Radio Today, January, 1936, p. 7.

⁵ Based on Radio Today figures, the average set price in 1935 was \$57. This seems high. Therefore, arbitrarily assuming an average price of \$35 we get an investment on 22,869,000 sets of \$1,010,415,000.

⁶ The Clancy's and Delancy's, CBS, November, 1934, pp. 21-27.

⁷ Total passenger car registrations, according to the National Automobile Chamber of Commerce were 22,450,000 as of January 1, 1936. The estimate of auto families is that of the R. H. Donnelly Company, long recognized as a standard source of information on this subject.

¹⁰ Distribution of Total Population and Radio Families by Geographical Districts.

Geographical District	% Total * Population	% Radio ** Families
New England	6.6%	7.9%
Middle Atlantic States	21.3%	26.6%
East North Central States	21.4%	23.3%
West North Central States	10.8%	10.8%
South Atlantic States	11.7%	8.8% ***
East South Central States	7.5%	4.4% ***
West South Central States	9.7%	6.6% ***
Mountain States	3.0%	2.7%
Pacific States	8.0%	8.9%

* 1930 Census.

** "Lost and Found" CBS (1935) p. 7 as of January 1, 1935.

*** These sections have limited radio ownership due to limited huying power, high proportion of negroes and tenant farmers.

In 1935, 72 per cent of the families with incomes between two and three thousand dollars annually owned radios, while the proportion of radio families rose to 90 per cent in the case of those having incomes of more than \$10,000 per year.¹¹ During the same year 33.9 per cent of all farm families owned radio sets.

These few figures serve to indicate quite clearly the extent to which radio broadcasting intimately affects the lives of every class and segment of the community. This, however, is but the quantitative aspect of radio broadcasting service. The question now is, "What is the nature of the service rendered to these millions of listeners?"

Perhaps the best way to introduce this subject is to quote from the Report of the President's Research Committee on Social Trends.¹² This Committee, composed of the leading students of American social life, described the effect of radio broadcasting upon the community as follows: "certain it is that the radio tends to promote cultural levelling—residents outside of the large cities who never have seen the inside of an opera house can become familiar with the works of the masters; communities where no hall exists large enough for a symphony concert can listen to the largest orchestras of the country; and the fortunes of a negro comedy pair can provide social talk throughout the nation. Isolation of backward regions is lessened by the new agency of communication, and moreover, by short wave transmission, national as well as local isolation is broken, for events in foreign nations are thereby brought to the United States. The radio, like the newspaper, has widened the horizons of the individual, but more vitally, since it makes him an auditory participant in distant events as they transpire and communicates to him some of the emotional values that inhere in them."

The regular day-to-day service of radio broadcasting as a medium of mass communication is three-fold: to entertain, to inform, and to inspire. Broadcasting renders unique services in each of these three fields which cannot be duplicated by any other means.

Broadcasting also fulfills an important economic function. It facilitates the process of distribution through its activities as an advertising medium. Moreover, the service which it renders makes possible the existence of the radio set manufacturing industry and allied fields of business. Again in times of emergency it becomes an irreplaceable medium of immediate communication with large masses of people; as evidenced in the banking crisis of 1933 and in the floods of this past spring.

It may be said that to entertain is a principal function of radio broadcasting. It is a most worthy one. To take people out of themselves, make them forget their troubles and petty annoyances, aid them in relaxing from the strain of modern life—is a social function of first magnitude. For millions of our people radio is the only source of entertainment. Society instinctively recognizes the importance of this function, and it is not without reason that it always has given particular recognition and tribute to those who entertain it.

The information-service of radio broadcasting is highly varied. In the past several years it has become one of the services most appreciated by listeners. Broadcasting furnishes purely vocational information such as market reports. It supplements the formal instruction furnished by our school system. It has become a most important agency for the dissemination of news. It adds materially to the general cultural background of listeners. In the United States, where free competitive broadcasting exists, it has constituted an instrument of civic education unparalleled in the modern world.

Broadcasting has rendered these services to a wide variety of people. It has provided the farmer with a great deal of highly essential business information which would lose much of its value if not disseminated immediately upon receipt. Commodity prices, crop, market, weather, irrigation and similar reports are examples to point. It provides the farmer with educational material regarding new developments in agricultural methods. The appeal which radio possesses in the use of the human voice enables the presentation of this material in a much more per-

suasive and entertaining manner than possible merely in pamphlet form; so that broadcasting serves to heighten the farmer's curiosity in the various developments and to stimulate his interest in securing further information. Broadcasting also has increased the social consciousness of the farmer and has made him more aware of the problems which he faces. In a comparable degree it serves all classes of our people.

In rendering these services broadcasting has exerted an influence entirely out of proportion with the number of sets available in rural areas. This is accomplished by the gathering of groups to listen to broadcasts which are of special interest to them.¹³

Fifty years from now some social historian will probably write a learned treatise on the effect of the development of radio broadcasting upon the civic and political consciousness of the average American citizen. I do not doubt for a moment but that he will state that this constituted the major contribution on the part of radio. Free, competitive broadcasting in the United States has made radio a political forum for both local and national causes and elections. It has made one big town meeting of the American people, and has in a large measure revived that personal interest in civic problems which is so important to the successful functioning of a democracy. The immediacy of contact, dramatic power and personal appeal of radio make both issues and their pleaders live in a way which can be accomplished by no other medium. Dr. Robert M. Millikan, Chairman of the Executive Council of the California Institute of Technology, summarized the situation aptly when speaking before you at the October, 1934 educational hearing when he said, "The radio is obviously one of the great, new, unifying, educative forces which can be and which should be one of the chief factors in insuring the success of ballot governments the world over."

I have said that a function of radio is to inspire. It is necessary only to refer to the many religious broadcasts carried by all stations to indicate the service which radio is rendering in this field. Also I should mention the inspirational value of good music, good drama and high class entertainment.

Now with regard to the economic services of radio broadcasting. President Roosevelt concluded his message to the broadcasting industry at its convention at Cincinnati in 1934 with the following comment: "I am not unmindful of another benefit which radio gives all the people and to all classes of business, that is a stimulation of buying power and its assistance to commerce generally."

Last year advertisers spent approximately \$87,523,000 for broadcasting facilities alone and probably added another \$25,000,000 for talent and program material. The efficacy of radio as an advertising medium can best be judged by the fact that 1935 volume was 53.3 per cent above the estimated 1933 depression low point and that radio advertising has shown a greater relative gain from its depression low point than has any other major medium.

The use of radio as an advertising medium has resulted in several important benefits. In functioning as an advertising medium it has aided in stimulating mass production through the creation of mass demand, and as such, has assisted in maintaining and increasing employment and in facilitating the processes of commerce. Its advertising function in itself has been a constructive one; for advertising assists the public in developing new and better standards of living.

The support of radio broadcasting by advertisers also has made possible the existence of the radio set manufacturing industry. This industry, comprising several hundred manufacturers, approximately 3,500 wholesalers and nearly 30,000 retail outlets of various types,¹⁴ last year did a business estimated at \$298,600,000.¹⁵

It is estimated that the total volume of business given rise to by radio broadcasting during 1935 was \$700,000,000. This included set sales, tube replacements, electric power charges,¹⁶ repairs and service, broadcasting time sold and talent costs.

Moreover, by means of functioning as an advertising medium, broadcasting has achieved a comparatively high degree of editorial freedom; certainly more than exists in other countries of the world. And let me note specifically that freedom of the air is absolutely essential to all freedom of speech; for the freedom of the press would be materially hampered if the immediacy and

¹¹ Ownership of Radio Sets by Income Classes.

Income Class	% Families having radios	% Total Families
Over \$10,000	90%	3.6%
5—10,000	85%	10.6%
3—5,000	79%	16.7%
2—3,000	72%	30.2%
1—2,000	52%	12.1%
Total	69.4%	100.0%

widespread contact of broadcasting could be utilized selfishly by any political, governmental or other concentrated power.

We now come to the services rendered by broadcasting in the protection of life and property in times of emergency. A noted research organization has estimated that during one of the early broadcasts of President Roosevelt following the banking crisis of 1933, nearly 50,000,000 people were listening. During the course of several broadcasts in that troubled period, the national psychology was changed from one of confusion and fear to one of hope and enthusiasm. I frankly believe that without radio this would have been impossible.

I want to refer briefly to the floods of this last spring. The story of broadcasting stations becoming the sole source of contact between civic authorities and the citizens of numerous communities; of their acting as relays of information between families separated by the disaster; of the manner in which radio broadcasting constituted often the only source of contact with the outside world; of the service rendered in obtaining supplies for those in stricken areas; and their usefulness in giving warnings of impending danger, is more thoroughly illustrative of the part which radio can play in a great disaster than anything in the annals of the medium. Along with other radio services such as Marine, Aviation and Amateur broadcasting has earned the right to be considered as a really great means for the protection of life and property.

So much for the services of radio. The question now arises, in the words of the Commission, as to "the dependence of the service on radio rather than wire lines." There are two kinds of wire lines that can technically be used to carry radio service—the telephone lines and the power lines. Both are controlled by powerful monopolies; one of which is the subject of investigation by this Commission. To divert the service of radio broadcasting from the air to wire lines would be to deny radio service to all who are without telephones or electric lights and to subject those who do have telephones or electric lights to costs which would place wired radio service beyond the reach of the great majority. This would amount to a denial of what ought to be considered one of the necessities of life.

It must be remembered that about 75 per cent of our citizens have incomes of less than three thousand dollars per year and that 91.1 per cent have incomes less than five thousand dollars annually.¹⁷ Most people, therefore, have a limited sum of money to spend on recreation and entertainment. It is estimated that the average person having income of between one and two thousand dollars annually has 5.3 per cent of his total income available for expenditure on recreation and all forms of social activity. On a two-thousand-dollar income this would amount to \$106.00 and to \$79.00 on a \$1,500 income. In the case of families with an income of \$3,000, 7.7 per cent is available for recreation and social activity. This would allow a total of \$225 for motion pictures, books, magazines, picnics, vacations, home entertainment, church functions, club memberships, radio set operation and the like.¹⁸

Studies made by the University of California in November, 1931, indicated that for a worker with a family of five making \$1,631 a year, \$6.00 was available annually for the theatre; \$32.50 for motion pictures and other entertainment; \$6.00 for radio upkeep; \$2.00 for books and periodicals and \$9.00 for the daily newspaper; a total of \$55.50. Likewise it was estimated that a clerical worker with a family of five earning an income of \$2,175 annually had but \$76.56 available for the same items; all the rest of his income being taken for necessities of various sorts. In neither case was there any allowance made for the maintenance of an automobile.¹⁹

It is obvious that people in such circumstances can hardly afford to duplicate the varied offerings of the radio by actual attendance of the theatre, concert hall, lecture forum and similar functions or by subscribing to a large number of varied magazines. It is only logical, therefore, that the services of radio broadcasting should be such an important factor in the lives of these people and that it should render a service which for them could not be duplicated in any other way. The cost of operating a radio set is comparatively low. It is estimated that approximately \$253,000,000 was spent last year for the maintenance and operation of the 28,869,000 receiving sets in use in this country. This would average \$8.75 per set per year or two and two-fifths cents

per day.²⁰ Undoubtedly, the operation of many small sets, is considerably less than that amount.

When one considers that the usual monthly telephone service charge is \$2.50 or \$30.00 per year it is easy to see why radio set ownership exceeds residence telephones to such a great degree. It is also easy to see how wired radio cannot be expected to render service at a charge which can be met by the great majority of present-day receiving set owners, even assuming they would be willing to pay it.

Again wire lines are so often interrupted by storms, floods, fires, etc., that radio broadcasting's present value for the protection of life and property would be destroyed. Moreover, the utilization of wire lines for broadcasting into the homes would in all probability result in fewer programs of local color. This would be the natural and logical result of minimizing competition. And it would place in the hands of too few the responsibilities which accompany the rendition of a service of such great social value as that of broadcasting.

This brings us to the problem of providing additional radio broadcasting facilities which I shall divide into three parts—Aural broadcasting; facsimile broadcasting and television broadcasting.

Aural Broadcasting

Aural broadcasting is today restricted to those channels available in the frequency band beginning at 550 kc and ending with 1600 kc. A total of 654 stations (including approximately 30 construction permits) have been provided for in this band. Notwithstanding this number of stations there is a large percentage of the total area of the United States and a smaller percentage of the total population that is without consistent and reliable day and night service. Doubtless improvements can be made in the allocation of frequencies and in the location and construction of stations so as to extend existing service over greater rural areas. But any such enlarged service must be balanced against possible demands by Mexico for the exclusive use of channels now devoted primarily for broadcasting in the United States. The need for additional facilities exists and such needs are certain to grow with an expansion of broadcasting on the North American continent.

In our proposals we have named certain frequencies below 550 kc for broadcasting. Such use is in agreement with the policy of other nations of the world. The propagation characteristics of these long waves are such as would enable broadcasters to greatly improve the service in rural areas. This will be discussed in detail when we present our technical testimony. Also, in our proposals we have endeavored to provide for sound broadcasting on certain of the high frequencies. We need to know more about them before reaching final conclusions on all their characteristics. Based on the information we have, it is believed they may be utilized for local broadcasting. The specific frequencies requested have been named with the view of making maximum use of receiving sets that may be manufactured for high-frequency reception, with a minimum of interference with other services and consistently with your expressed ideas of "experimentation and evolution."

There is one difference between the proposals of the Radio Manufacturers Association and our own in this regard. We proposed that the frequencies in the bands of 36 to 38 mc and 62 to 64 mc be allocated for aural and facsimile broadcasting. Agreeably with the change which has been made in the RMA proposals, as first submitted, we will discuss when we offer our technical testimony, the feasibility of modifying our proposals so as to ask for 40 to 42 mc instead of 36 to 38 mc. The RMA propose that the frequencies 37 to 42 mc be allocated for aural broadcasting and they have objected to our proposal in respect of 62 to 64 mc because it would interrupt a continuous band for television. Our purpose in asking for the two bands are twofold: First, we do not know where long-distance interference ends. We do know, however, that the probability of troublesome long-distance interference, now or in the future, is very much less on 60 mc than on 40 mc. Adequate opportunity should be given to obtain reliable data concerning operation on the various high frequencies. Secondly, we do not consider it should be objectionable to anyone to provide for sound broadcasting in the television band. We know of no reason why the purchaser of a television set should be limited to the sound broadcasting service receivable on the television channels. Moreover, we know from experience

¹⁷ Statistics of Income for 1933, Bureau of Internal Revenue, U. S. Treasury Department, p. 6.

²⁰ The dollar volume is found in Radio Today, January, 1936, having been based on the table appearing on page 5 and the chart on page 11.

that in the manufacture of receiving sets, quality of reception is often sacrificed at either end of the receiver band. It is, therefore, highly desirable that provision be made near the middle of the television band for aural broadcasting.

International Broadcasting

A word about international broadcasting. We have proposed a widening of the international bands with but one view in mind. The existing conditions are chaotic. It would seem that this country either should make provision for an international broadcasting service of the highest quality and free from interference or give it up as a bad job. A sufficient number of frequencies, the maintenance of better standards, and more effective international regulations with regard to hours of operation, we believe, can be employed to improve our commerce with the other nations of the world.

Miscellaneous Services

Our proposals also provide for the allocation of frequencies for aural, facsimile and frequency modulation, auxiliary broadcast service such as point-to-point relay for broadcasting, synchronization, mobile voice and facsimile pickup. These will be discussed in detail by another witness.

Facsimile Broadcasting

Facsimile broadcasting is an impending new service. It is a method of record broadcasting. It is a service that can be supplied through the utilization of existing broadcast frequencies and broadcast transmitters. It is our contention that all frequencies allocated for aural broadcasting should be available for facsimile broadcasting as well. There is every reason to believe that facsimile broadcasting can supplement sound broadcasting. It is an economic waste to deny the broadcasters the opportunity to develop this new service through the use of existing broadcasting facilities. Moreover, the utilization of existing broadcast facilities will permit of the kind of competition that has made American broadcasting the greatest in the world. Prevent the development of facsimile on the frequencies that are used today and tomorrow for sound broadcasting and you may guide this new service into monopolistic hands.

Television

Now as to television. Some day we will have television. I do not know when that day will be. But it will come. When

it arrives it will introduce into the American homes a most powerful instrument for good or evil. It can and probably will project the school blackboard into a majority of the homes. Who will control it? Who can control it? Who does now control it?

I appreciate we are concerned here with the technical problem of finding a place in the radio spectrum for its introduction. And we have endeavored to cooperate with other interested parties to suggest bands of frequencies which might be used for television broadcasting. The requirements for a television channel are very great. As far as we know now one television channel will require a path almost six times as wide as that now devoted to all sound broadcasting in the United States. We have been able to suggest a plan of allocation which would provide eight television channels below 100 mc. This is not enough. A great many technical considerations are involved and a discussion of these will be left to another witness.

There are, however, more than technical considerations involved here. The American Broadcasting System is a competitive system. It is a great system because it has been competitive. Men have been spurred on to present better programs and to render a greater public service. It has meant a freedom of the air unmatched anywhere in the world. And our plea today is that you allow television to develop on the same basis. Better we delay the introduction of television than, in enthusiastic haste, inaugurate it and find that through the control of patents, so powerful an instrument is in the hands of too few people. Indeed this expression is but declaratory of the spirit of the Communications Act.

Again, if television is ready to be inaugurated and if you can allocate sufficient frequencies to permit it to grow on the basis of a national competitive service then it seems to me you have a very great responsibility in determining in advance, whether for all practical purposes, the ownership of basic patents, and agreements, if any, between patentees, will permit competition in the construction of television transmitters and receiving sets. We should also know in advance what relationship, if any, may be established between the sending and receiving apparatus. Will there be freedom in the selection of receiving sets or will the use of terminal facilities be controlled in a manner comparable with the telephone? Surely everyone will agree that those who own television patents are entitled to a rich reward for their creative work, but because of the public service inherent in television, patentees should be denied the right to control its use. Keep it free from the hands of monopoly and allow it to develop only on a national competitive basis.

I thank you, Sirs, for your attention.

STATEMENT OF DR. CHARLES B. AIKEN TECHNICAL CONSULTANT

Dr. Aiken was born in New Orleans in 1902. He has a B. S. degree from Tulane University and an M.S., M.A., and Ph.D. from Harvard. During the summers of 1918-1921 he was a radio marine operator and was assistant operator of Station WAAB, Tulane University, 1922-1923.

In 1926-1928, Dr. Aiken was engaged in the development of apparatus for geophysical exploration and in field work with Mason, Slichter and Hay at Madison, Wisconsin. He was a member of the technical staff of the Bell Telephone Laboratories from 1928 to 1935. From 1930 to 1935 he was supervisor in charge of broadcast receiver development and was also engaged in work on air-craft communication, field strength measurements, centralized radio systems, synchronized and shared channel broadcasting, television receivers, studies of the effect of receiver band width on background noise, volume compression and expansion and various special studies. He was in responsible charge in the design of the Western Electric 10a and 17a radio receivers and of the 1a, 2a and 3a centralized radio systems. He also developed a radio com-

pass for air-craft and a special laboratory model television receiver.

Early in 1934 he became Lecturer in Electrical Engineering at Columbia University. In 1935 he went to Purdue University where he is Associate Professor of electrical engineering in charge of communication and is also technical advisor to the University's broadcast station, WBAA. He obtained temporary leave of absence from the University in order to accept the NAB assignment.

Dr. Aiken is the author of papers dealing with amplifiers, detectors, frequency measurement, shared channel broadcasting, synchronized broadcasting, band width and receiver noise, and radio compass for aircraft. He is a member of the Institute of Radio Engineers, American Institute of Electrical Engineers, Phi Beta Kappa, and Sigma Xi.

SECTION A

General Discussion

It must be admitted that the present American broadcast band is overcrowded, and yet the clamor for new frequency assignments steadily increases. The public has enthusiastically supported the majority of the stations in existence, and would certainly support more. There are many rural parts of the country that need additional service, especially during the day, when signals from a distance cannot be heard. Such regions can be served only by more stations or more power, or both.

Some time ago, the Commission published tables showing the minimum separations that should be allowed between stations of various powers working on the same frequency. One of these applied to night-time operation and the other to day. We have made no exhaustive study of the technical assumptions underlying these tables, and will not, therefore, offer a conjecture as to whether they should be modified to take account of recent developments in receiver design. But it will be of interest to use these tables as an index of overcrowding.

An examination of existing frequency assignments has shown that, of 382 stations not included in the "local" classification, 182 or 47.6% are involved in violations of the minimum distances for night-time operation on the same frequency; while 60 shared channel stations violate the specifications of the day-time table. The night violations involve 38 out of a total of 83 frequencies, while those occurring during the day involve 23 channels. In compiling these figures, no stations operating outside the borders of the United States were considered, nor was the use of directive antennas taken into account. Allowance for the effect of such antennas would modify these figures to only a limited extent.

One of the results of this overcrowding is that the type of interference best described as "flutter" is extremely serious on many channels, particularly at night. In some rural areas reception, which would otherwise be satisfactory, is often entirely ruined by interference of this sort, while in others the quality of service is seriously impaired.

Overcrowding is a serious matter, not only because it tends to stop the growth of a service that has come to be regarded as a public necessity, but also because it means that if a few channels were to be lost to American broadcasting, the effects would be disastrous. That such losses may occur in the next few years seems all too likely. For some time we have been made painfully aware of the fact that certain other North American countries, particularly Mexico, regard their present frequency assignments as hopelessly inadequate and have every intention of insisting upon additional channels. This situation constitutes a very serious threat to the broadcast structure of the United States. If it is not adequately met by an expansion of the broadcast band, it may well result in aggravation of the present difficulties, and in the choking of normal and justified growth.

Another fault to be found with the present system of allocation arises from the fact that broadcasting has been forced to use certain frequencies not well suited to its needs. While aware of the technical shortcomings of these frequencies, the industry has made every effort to utilize them as fully as possible, and, under direction of the Federal Communications Commission, has built up a system unequaled anywhere in the world.

Rural Coverage.—Obviously, rural areas should receive as good service as it is possible to give them. Not only the United States, but Canada and Mexico as well, contain large regions which can best be served by relatively longdistance broadcasting. It would appear therefore, that our needs for longrange transmission are better established than are those of any European nation except Russia. Although faced with the difficult problems raised by the clash of national interests, these nations have succeeded in allocating their broadcast services where they can be most effective, while

the North American nations have completely failed in efforts to secure such allocations.

Expansion of Broadcasting and Development of New Services.—A more satisfactory broadcast structure can be obtained only by the assignment of new groups of frequencies in two widely separated portions of the spectrum. One group below 550 k.c. would do much to improve rural coverage in the United States and Canada, but would be of less use to Mexico because of the relatively high noise levels in low latitudes. Other groups, in the ultra-high frequency range, would do much to improve strictly local services and to relieve serious congestion on shared channels.

Not only should provision be made for the normal growth of aural broadcasting, but it seems likely that facsimile and television must be accommodated before very long. It is at least possible that these newcomers to the broadcast field may prove extremely important, and every opportunity should be provided for experimentation and commercial growth. Should successful services be instituted, they would probably be of tremendous value to the public, and would undoubtedly be stimulants to research and to industrial activity.

General Points of View.—The testimony which is contained in the various sections of this report has been prepared on the basis of several general premises, a mention of which is appropriate at this time.

We believe that all the radio services should now adopt a long-range point of view, and, setting aside considerations of temporary expediency, should try to examine the technical possibilities for future development and growth. Certainly the difficult problems of frequency allocation, and of coordination of the conflicting demands of various services can best be solved by adherence to scientific principles, and by careful evaluation of all of the technical factors involved. Where complete technical data are lacking, as in the case of the ultra-short waves, assignments should be made with the realization that they may have to be changed. Steps should be taken to guard against premature entrenchments that might later be detrimental to the proper balance and high efficiency of all radio communication services. Wherever uncertainties exist a policy of "evolution and experimentation," which has been recommended by the Commission, seems to be the only safe and logical one to follow.

In view of the increasing need for radio channels of different kinds, and the difficulty of coordinating the requirements of the various services, it is contended that all frequency assignments should be used in a highly efficient manner. This means that apparatus capable of furnishing good service, without requiring an unnecessarily wide band, should always be employed. It also means that the minimum power to be allowed a station on a given channel should not be too small, although just what this minimum should be will vary with the frequency and the type of service. In particular, no station of low power should be allowed to occupy a channel which is especially well suited to high-power work, unless that station performs an essential service that cannot be accommodated elsewhere.

Facsimile Broadcasting.—This service requires a frequency channel having a width depending upon the speed of sending. Generally speaking, we may say that a 10 k.c. broadcast channel is entirely adequate for the transmission of facsimile signals.

It is recommended, therefore, that all frequencies which are, or will be, assigned to aural broadcasting be made available for use by facsimile. The use of existing facilities would undoubtedly aid experimentation and the development of a facsimile service for home use.

While midnight to morning would probably be best for experimenting with this new service, it seems likely that there may ultimately be occasion to alternate facsimile and aural broadcasting on some channels, or even to make the former a 24-hour service.

Television.—Should television service be established on a large scale, it would of course be a matter of great interest to the broadcasting industry. It is not within our province to consider all the problems which must be overcome before this can happen, and we shall merely assume that the Commission will try to make provision for visual broadcasting. In keeping with this assumption, we shall recommend certain frequency assignments for television and, in a later section, shall discuss some of the allocation problems which must be dealt with.

International Broadcasting.—Mr. Baldwin has already suggested that it will either be necessary to provide more frequencies for international broadcasting or to admit that the United States cannot compete in this field. The bands at present provided for this service are, as you know, quite narrow. Moreover, because of the peculiar propagation characteristics of short waves, these bands

cannot all be used at the same time with equal success. Consequently, the effective number of channels available is less than the total of assignments in the several bands.

Nor is this all. International broadcasting, by its very nature, is subject to serious long-range interference. The stations of not one, but several, nations must operate simultaneously, and hence the number of the channels available to any one country is necessarily small.

There is now wide distribution of receivers capable of bringing in short wave signals, and popular interest in international broadcasting is increasing. The service rendered to the owners of these sets is frequently spoiled by the congestion in the international bands. So active are the countries of Europe and South America in this type of broadcasting that conditions are tending to become chaotic. In fact, we understand that some South American countries are now building stations without Berne registration and without any regard for international agreements.

It is our feeling that this type of broadcasting should not be abandoned. It is of value in allowing an interchange of interesting programs between the nations of the world and in bringing into American homes reports of important foreign events. Moreover, it furnishes a means of reaching United States citizens living abroad and of giving broadcast service to our territorial possessions. If such services are to continue and are to be allowed a chance for any reasonable growth, there will have to be international agreement for widening of the existing bands. Because of the treaty relations involved, it is entirely beyond our province to suggest specific frequencies for improved allocations, and the recommendations submitted to the Commission on June 1 must be regarded as merely representative of the kind of expansion desired. The recommended bands are still none too liberal in width, and it is possible that the nations of the world may see fit to provide still more frequencies for international service.

Chart of Proposed Allocations.—As a matter of record, our proposals of June 1 are repeated here. It is recommended:

A. That frequency assignments be made as follows:

Frequency	Service
180 to 210 k.c. incl.....	Aural and Facsimile
520 to 1600 k.c. incl.....	Aural and Facsimile
25.6 to 26.6 m.c.....	Aural and Facsimile
36 to 38 m.c.....	Aural and Facsimile
38 to 56 m.c.....	Television
62 to 64 m.c.	Aural and Facsimile
64 to 94 m.c.....	Television
94 to 100 m.c.....	Aural, Facsimile, and frequency modulation
100 to 120 m.c.....	Auxiliary broadcast service such as point-to-point relay for broadcasting, synchronization, mobile voice and facsimile pickup.

B. That a minimum of 25 experimental television channels of 6 m.c. width be set aside in a manner consistent with the needs of other services beginning at about 130 m.c.

C. That the existing international broadcast bands be enlarged as follows:

6 m.c. band to .5 m.c. width
9.5 m.c. band to .3 m.c. width
11.7 m.c. band to .4 m.c. width
15.1 m.c. band to .4 m.c. width
17.75 m.c. band to .3 m.c. width
21.45 m.c. band to .3 m.c. width

As has been said, the proposals for international broadcasting are not meant to be specific, but are merely indicative of the type of allocation desired.

We must also point out that the beginning of the television band at 38 megacycles was suggested merely with the idea of providing as many bands for television as possible. It may be that the lowest channel is not desirable, in which case the aural band from 36 to 38 should be moved up so as to remain adjacent to the television band. This will be discussed in detail later. We believe that assignments above 120 megacycles should be kept flexible as long as possible, and that in providing for other services the probable requirements of television should be kept in mind.

Recommendations for frequencies for auxiliary broadcast services between 100 and 120 m.c. will be discussed in a later section.

The frequencies below 100 m.c. have been shown on the chart of Figure 1. At the lower left is a narrow line representing the proposed broadcast band of from 180 to 210 k.c. Immediately to

the right of this line is a small block extending from 520 to 1600 k.c. This latter, which is only slightly wider than the present broadcast band, shows the very small part of the spectrum below 100 m.c. which is now allocated to broadcasting. Even if the suggested ultra-high frequency bands are assigned to aural broadcasting, this service will still occupy a small percent of the total frequency range.

Our recommendations inevitably conflict with those made by Dr. Dellinger for the Government Services. It is obvious, of course, that if the latter are put into effect, the well founded needs of all the non-Government services will have to be denied to such an extent as to greatly reduce their possibilities of service. This is particularly true in the case of television. If blocks of frequencies are to be cut out of the spectrum at intervals of a few megacycles throughout the range, it will be impossible to provide a visual band wide enough to make television commercially practicable.

Everyone must realize that such mangling of the spectrum would, in a broad sense, profoundly inconvenience the people of the United States. Moreover, it would greatly curtail the research and development which would otherwise be carried on by non-Government units. The apparatus and techniques developed for industrial application are often of great use in the Government services, and if commercial development is curtailed the latter will inevitably suffer.

SECTION B

An Analysis of the Problem of Long-Wave Broadcasting in North America

The suitability of various frequencies for the different classes of radio service has long been a subject of discussion. At first, the propagation characteristics of radio waves were so little known that questions of frequency allocation were solved, in many cases, on the basis of temporary expediency or of limited experience, without reference to fundamental scientific principles.

The present allocation structure contains many weak points, due to this early distribution of frequencies, most of which could be remedied now only by a complete reshuffling of the wavelengths. This would probably be too great an undertaking, but it seems, nevertheless, that the most needed readjustments are entirely possible, and would greatly benefit the communication services of the world.

In discussing even a few of these desirable changes it will be necessary to adopt two premises, the soundness of which is believed to be obvious.

1. Services which cannot be supplied by non-radio means should receive priority of consideration consistent with their legitimate needs and with sound engineering estimates of how those needs may best be met.
2. Radio services having peculiar technical requirements should be assigned frequencies best suited to those requirements, and other services not needing these important frequencies should be allocated elsewhere. Furthermore, when assignments of particular value have been made, they should be used as efficiently as the development of the art will allow.

It is with these two premises in mind that the analysis of the problem of long-wave broadcasting has been made.

Suitability of the Various Frequencies to Broadcast Service.—The various problems of broadcast coverage have received a tremendous amount of attention from engineers and physicists the world over, and as a result a mass of information has been collected concerning the utility of the various wavelengths. The general conclusions are so well known that it seems unnecessary to deal with them in detail and we shall content ourselves with summarizing certain of the high points, and then proceeding to the development of the case for long-wave broadcasting.

The range of clear-channel stations is very long at night, and large numbers of people are able to receive such stations in their secondary coverage areas, which are reached only by sky waves. In daytime sky waves are so much weaker that secondary coverage may be regarded as non-existent. Thus, one of the records published by Norton, Kirby and Lester³⁵ on WLW shows an average daytime field strength near Washington of about 20 microvolts per meter, while at night the signal rises as high as 25 millivolts per meter.

The result of this weakening of the sky wave is that very large rural areas, which depend upon relatively distant stations for evening reception, cannot hear them at all in daylight. In fact, many

regions are without daylight service of any kind. The great use of long-wave broadcasting stations would be to furnish daytime coverage over very extended areas. Furthermore, the night-time primary service area lying within the zone of objectionable fading, is very much larger at low frequencies than it is at high.

It is well known that, for a given radiated power, the radius of ground-wave coverage decreases rapidly as the frequency is increased, and that the zone of serious fading also draws in toward the transmitter. As a convenient summary of the data relating to ground-wave coverage, there have been plotted in Figure 2 the radii of certain field strength contours as a function of frequency, for two different values of the ground conductivity. The data for these curves have been taken from the *Report of the Committee Preparing Material for Question 7 for the Fourth Meeting of the C. C. I. R.* We see that there is a tremendous change in ground-wave coverage with frequency, and it is therefore not surprising that there should be general agreement that the higher frequencies are not well suited to broadcasting, and that high power in the neighborhood of 1500 k.c. is not economically justified. The high frequencies can be used for local coverage only, and the problem of delivering a satisfactory service to large suburban regions and to rural areas can be solved only by the efficient use of longer waves.

The United States, Canada, and Mexico, are large countries having well developed needs for rural coverage. The longest waves are perhaps less interesting to Mexico, because of the high noise levels which commonly exist on the low frequencies in southern latitudes, but Canada and the northern part of the United States present coverage problems which can best be solved by the use of low-frequency broadcasting. The European countries have long recognized the advantages of such services, even though no one nation except Russia has anything like such distances to cover as are regularly met with in North America. In spite of conflicting national interests and in spite of the great value which is accorded to the military services by all European countries, their administrations have realized the tremendous importance of broadcasting and the technical value of long waves for rendering efficient service. As a result, a continent which has less need for it, has evolved a fairly satisfactory structure employing frequencies from 153 to 546 k.c., while the continent which, from the standpoint of national boundaries, geographical distances, and economic capabilities, has the most obvious need for low-frequency broadcasting stations has succeeded in acquiring none below 520 k.c. That this is an unfortunate state of affairs can hardly be denied.

In Table I is given a list of broadcast stations of the world that operate below 550 k.c. This table, which was made up from the Berne List dated March 1936, shows a total of 78 transmitters, of which 36 are in the USSR. Russia, which is also a country of vast distances, seems to have taken full advantage of the long waves for broadcasting. Of the stations listed, three are under construction, one is projected, one is provisional, and one is a Press broadcast station. Two are in Canada on frequencies of 530 and 540 k.c., while the projected unit on 520 k.c. is also to be in Canada. A station on 546.8 k.c. is located in Yucatan. Table I follows:

TABLE I
List of Broadcasting Stations Below 550 K.C.

Frequency in k.c.	Location	Power	Remarks
92.2	Prague, Czechoslovakia	1.5	Press
153	Ankara, Turkey	5	
155	Kaunas, Lithuania	7	Valstybes radiofons
160	Huizen, Holland	5	
160	Radio Romania, Roumania	150	
166	Lahti, Suomi, Finland	220	
172	Moskva Imeni, Kominierina, USSR	500	
174	Radio-Paris, France	75	
183	Reykjavik, Iceland	30.16	
185	Istanbul, Turkey	5	
187.5	Irkoutsk, USSR	20	
191	Zeesen, Germany	60	
200	Bakou, USSR	10	
200	Droitwich, England	150	
207.5	Tour Eiffel, Paris	13	
208	Minsk, USSR	35	
212.5	Warszawa Raszyn, Poland	150	
216	Motala, Sweden	150	
217.5	Novosibirsk, USSR	100	
224	Warszawa Raszyn, Uoland	500	
227	Iakoutsk, USSR	10	
230	Poland (no city specified)	150	
232	Kharkov, USSR	10

546	Budapest, Hungary	120	
546.8	Merida de Yucatan, Mexico	0.105	

The foregoing figures should indicate that we are far behind the European countries in long-range broadcast facilities, and it is only reasonable to feel that the United States should bend every effort toward remedying this situation.

Broadcasting at 200 k.c.—An examination of the Berne List has shown that it should be possible to locate a broadcast band extending on either side of 200 k.c. without much inconvenience to other services. That such a band would have valuable characteristics is well known, and proposals for its use in this country have been made by Wenstrom,²⁰ Gillett and Eager⁴ and others, all of whom have indicated the great possibilities of long-wave coverage. In order to see just what might be done to improve rural service in the United States, let us examine the properties of 200 k.c. waves in some detail.

Ground Wave Range—The ground wave range can be readily estimated by the use of the charts prepared by the *Committee Preparing for the Fourth Meeting of the C. C. I. R.* With the help of these charts Figures 3 and 4 have been drawn, showing the estimated three millivolt (Figure 3) and one millivolt (Figure 4) contours for stations located in various parts of the United States. It is assumed that each station radiates 1,000 k.w. at a

frequency in the vicinity of 200 k.c. The contours for stations 1, 2, and 5 have been corrected for variations in the average conductivity of the soil, while those for stations 3 and 4 are based on an assumed constant conductivity of approximately 6×10^{-14} .

Perhaps station 1 is the most interesting from the standpoint of population coverage. Based on the census of 1930, there are within the 3 mv/m contour approximately 8,000,000 families, or about 25,000,000 people. The area within the 3 millivolt limit includes a great many cities of medium to large size, among them St. Louis, Chicago, Milwaukee, Indianapolis, Detroit, Toledo, Cleveland, Columbus, Cincinnati, Dayton, Youngstown, Louisville, Nashville, Chattanooga, Charlestown, W. Va., Wheeling, Pittsburgh, and Erie, while Buffalo is just outside this contour.

As will be shown later, the three millivolt line probably represents the useful limit of satisfactory coverage in summer, because of the high noise intensities, and should also coincide roughly with the night-time limit set by fading. The field strength within the entire region bounded by this contour is sufficiently great to furnish high-grade service in the residential areas of all cities and towns lying within its borders. The provision of so high a field to override atmospheric noise would also take care of man-made interference in practically all residential zones.

The one millivolt contour includes a considerably larger area, and it cannot be denied that rural and suburban homes lying within this boundary would receive excellent daylight service in winter. In fact, it is probable that many listeners located between 100 and 150 miles beyond the one millivolt line would then find reception very satisfactory.

It is a remarkable fact that this one station could serve listeners in the country near such widely separated cities as Washington, Birmingham, Memphis, Jefferson City, Missouri, La Crosse, Wisconsin, Cheyebogan, Michigan, Oswego, New York, and Reading, Pennsylvania. And yet there is every reason to believe that this would be the case. The charts from which the contours have been computed are based on the most reliable data available and have been checked against actual measured values in many cases. As an example of such a case it may be pointed out that the field strength of WLW, as calculated from these charts, should be about 25 to 30 microvolts per meter in the vicinity of Washington. Measurements reported by Messrs. Norton, Kirby and Lester¹⁵ show a daylight field strength of approximately 20 microvolts for this station.

These same authors state that the daytime field of WLW at Washington does not change appreciably with the season of the year, although marked changes are noted at the upper end of the broadcast band. This fact appears to be due to the relative importance of sky waves at the higher frequencies and their unimportance at lower frequencies, since in the latter case the attenuation of the ground wave is much less pronounced. We may therefore take it as evident that at 200 k.c. the sky wave will be very small during daylight, as compared with the ground wave, up to distances of at least 600 miles, or beyond the range of our one millivolt contour.

Atmospheric Noise on 200 k.c.—The average noise level due to atmospherics increases at the lower frequencies. While there is not as much information available as we could wish, the measurements of Potter^{17, 18} throw a good deal of light on the question. These measurements have been checked in the broadcast band by Byrne,⁴ and through theoretical calculations by Norton. Available data have been studied by the *Committee Preparing Material for Question 9, Proposed for the Fourth Meeting of the C. C. I. R.* The charts of this Committee show that night-time noise is inversely proportional to frequency in the range from 100 to 1000 k.c., while the day-time noise varies somewhat more rapidly than the inverse square of the frequency in the same range. The noise intensity will, of course, change greatly from place to place and from time to time, but these curves may be taken as indicative of the variation with frequency at any given time and place. Curve B of the Committee's report indicates that a day-time field strength at 200 k.c. of approximately 300 μ v/m is necessary, on the average, for barely satisfactory broadcast reception, and hence a field of 3 mv/m should be entirely satisfactory under average conditions. It is for this reason that the three millivolt contour has been taken as the limit of the high-grade service area in summer.

At night, the average noise levels would be considerably higher; in fact, the Committee's curve C indicates that a field of about 6 mv/m should be required for barely satisfactory broadcast reception. However, the plotted points shown on this graph all lie below the curve; in fact, the point for 200 k.c. is at 0.5 mv/m.

Moreover, if we assume that 1 mv/m will furnish reasonably satisfactory night-time service at 600 k.c., it follows from the inverse proportionality of noise level to frequency that 3 millivolts will be satisfactory on 200 k.c. Hence, it may be questioned whether the curve is not somewhat high in this area. It is certain that during the winter 3 mv/m would furnish satisfactory reception most of the time, and that in mid-summer it would often be adequate even at 200 k.c. More extensive data on noise levels are needed.

We may assume, then, that the 3-millivolt contour will furnish satisfactory broadcast reception during most of the daylight hours throughout the year, and that the service rendered at night, while of a lower order of excellence, will nevertheless be of distinct value throughout the winter and during part of the time in summer. These arguments apply primarily to the northern part of the United States and Canada, and with less force to the southern United States.

Radius of the Fading Zone—Here again, there is need for more information, but enough material is available to show that the radius of fading-free service would be large, even at night. Let us first estimate the zone on the assumption that 200 k.c. sky waves behave in the same manner as those in the present broadcast band.

The very extensive studies of Norton, Kirby, and Lester¹⁵ show that, for distances of from about 300 to 600 miles, the maximum night field due to waves reflected from the Heaviside layer is approximately that which might be expected from the inverse distance relation; and that for 1 k.w. of radiated power the maximum night field at a distance of 400 mi. is of the order of 0.5 mv/m. An examination of the ground wave propagation charts previously referred to shows that 1 k.w. of radiated power will produce a ground wave field of only about one-fourth this value at 400 miles, and that the half-millivolt level is reached at about 215 miles. This refers to a ground conductivity of 10^{-13} . If, then, we accept this picture, we must suppose that serious fading would occur at a little over 200 miles from a transmitter located in Ohio, which is much farther than for frequencies above 550 k.c. These latter ordinarily begin to fade at distances from 20 to 100 miles.

It seems very likely that the situation on 200 k.c. is actually much better than is suggested by the above outline, since the sky wave intensity probably falls off rather sharply at frequencies as low as 200 k.c. Thus, Monroe and Green, in their studies of 200 k.c. propagation phenomena in Australia, report a value of 0.1 mv/m for 1 k.w. radiated, and point out that T. L. Eckersley found a value of 0.3 for the higher broadcast frequencies in Europe. Accepting this three-to-one ratio, but assuming the 0.5 mv/m figure as correct for 1,000 k.c. on this continent, we should have a considerable increase in the radius of the fading-free area. Thus in the Middle West, 1 k.w. of radiated power would give a field strength of 1.67 mv/m for both ground and sky waves at about 300 miles, and it is likely that this is more representative of the actual radius of the fading ring than is the 200-mile figure.

Wenstrom estimates the fading radius for "hilly to broken terrain, the general American average," to be about 330 miles. He quotes A. H. Taylor of the Naval Research Laboratory to the effect that night fading will not occur very frequently inside of 500 miles. He also makes the following interesting statement: "From another authoritative source it was learned that actual broadcast transmission on 200 k.c. in the United States has shown no pronounced fading ring within 350 miles, the limit of effective signal strength at the power employed (20 k.w.)."

During the past winter and spring, I have had occasion to make a number of night observations on Air Commerce stations operating between 200 and 300 k.c., at distances up to 250 miles. A receiver without automatic volume control was used, so that fading, had it occurred, would have been readily apparent. While no regular schedule was kept, a good many observations were made, and no case of fading can be recalled.

We must also consider the fact that fading on 200 k.c. will be much slower than at broadcast frequencies. Selective fading is always more serious when the carriers of the interfering waves are of the same magnitude and are at, or near, phase opposition. Since the sidebands may not balance out to the same degree, an effective over-modulation is produced, causing very violent distortion of the received signal. It seems likely that, when the carriers are not near to phase opposition, selective fading will produce little distortion of 200 k.c. signals.

This distortion-producing fading could occur only at those points at which the sky wave amplitude was very nearly equal to that

of the ground wave. If either component were a few d.b. larger than the other, the fading should be substantially distortionless, and could therefore be smoothed out by the use of automatic volume control in the receiver. This fact should considerably reduce the importance of fading effects and should limit the zone of destructive interference to a relatively small percentage of the total service area. Both within, and, in considerable areas, without this zone, it should be possible to get very satisfactory night-time reception.

To sum up: It would appear that the radius of destructive fading for a station located in a reasonably high conductivity area may be expected to be between 250 and 400 miles. The fading should have a long period, and selective fading should occur only in relatively limited regions.

As a result of these considerations, it may be assumed that a 200 k.c. station would serve a very large area at night as well as during the day, although the two areas might not be entirely coincident.

Blanketing Area—The blanketing area of a 1000 k.w. station on 200 k.c. would not necessarily be large insofar as reception of stations above 500 k.c. is concerned. In fact, when obsolete receiving equipment has been discarded, the blanketing area should be rather small. In order to see what may be expected, let us estimate the interfering signal that might be tolerated without resulting in objectionable cross modulation in the first R.F. amplifier of a radio receiver.

The first tube of a well designed receiver should be a variable-mu pentode having an approximately exponential characteristic of plate current versus grid voltage. Calculations of the cross modulation to be expected in an ideal tube of this sort show that an interfering voltage of 1.54 volts could be applied to the grid before the modulation of the desired signal by the interfering program would be as much as 1 percent.

The characteristics of commercial variable-mu tubes are not strictly exponential, however, but depart from this theoretical form in such a way as to increase the cross modulation. In order, therefore, to allow a factor of safety, let us assume that the interfering signal of the first amplifier tube should not be more than half a volt.

Even a badly designed receiver, tuned to a frequency above 500 k.c. should attenuate a 200 k.c. carrier at least 60 d.b., and the majority of receivers should do better than this. By attenuation is meant the ratio of the signal on the grid of the first tube to that induced in the antenna. If we assume an effective antenna height of about 3 meters, then the interfering field strength that could be tolerated would be more than 100 v/m. It is of course possible that, with so high a field, direct pickup in the other parts of the set might cause the introduction of rectified signals into the audio-amplifier, but it is reasonable to suppose that with a properly designed receiver a field of the order of 100 v/m could be tolerated. To be extremely conservative we might take 10 volts per meter as the boundary beyond which cross modulation would be negligible. With a 1000 k.w. radiated this field should occur at about seven-tenths of a mile from the antenna.

At frequencies near that of the transmitter, cross modulation would, of course, be more troublesome, although even here it would not be serious if properly designed equipment were used. It is reasonable to suppose that a listener located not far from the transmitter, and receiving a nearby frequency, would be content to use a narrow passed band with a consequent increase in selectivity.

In addition to difficulties due to cross modulation, trouble may be expected from extra-band radiation by the interfering transmitter falling within the passed band of the receiver. On adjacent channels this latter would undoubtedly be the more serious limitation. It is perhaps idle to speculate as to just what sort of extra-band field a 1000 k.w. transmitter designed for 200 k.c. operation would lay down, but it is possible that the reception of low intensity telephone signals in the next channel might be seriously affected.

In the case of broadcast reception this would not be serious, for a listener located within the 100 mv/m contour, could not reasonably expect service from other low-frequency broadcast stations more than 600 miles away. In the case of telegraph on adjacent frequencies, conditions could be improved by the use of a narrow band in the receiver. In order to eliminate interference with this latter service, it might be necessary to use a high-pass filter, or a band-rejection filter, in the transmission line feeding the antenna of the station on the upper edge of the proposed long-wave broadcast band. The one on the lower edge could, of course, receive similar treatment if required. It should then be possible to free

neighboring frequencies from any appreciable interference. While such filters would be moderately expensive, their use would doubtless be justified, and the difficulty of design might be reduced by permitting a certain amount of attenuation in the sideband adjacent to the filter cut-off frequency without causing objectionable degradation of quality.

There remains the question of interference caused by the spurious responses of superheterodyne receivers. This is hard to estimate since it is dependent upon many different factors. In the case of operation on channels near to that of the interfering station the image-frequency would be too far away to fall within the long-wave broadcast band. Consequently, spurious responses would have to be due to higher order modulation in the converter tube or to other less important factors. In the case of reception in the broadcast band it would also be impossible to get image-frequency interference, since the unwanted signal would have to be above the desired signal in frequency. It is evident then that troubles from spurious superheterodyne responses might be somewhat less pronounced than when the interfering station operates in the regular broadcast channel.

Because of the variability of these spurious responses it is impossible to predict the field strengths that can be tolerated without interference, but it is probably safe to assume that 100 to 200 mv/m would do little harm to well designed receiving equipment. This latter field would occur about 30 miles from the transmitter. Closer in, interference might be experienced when the receiver was tuned to certain frequencies, but would be absent on others. These troubles are not sufficiently serious to constitute any argument against the use of a 1000 k.w. station.

National Coverage.—The five stations indicated in Figure 2 should give satisfactory service to a large part of the United States. New England and the Atlantic seaboard in general would not receive satisfactory service from them, but it is these very regions that are already best provided with broadcast facilities, and so this should not be a serious matter.

While five frequencies would clearly be necessary for proper national coverage, only four are being requested. This is done solely with the intention of cooperating with other radio services and cannot but be regarded as a distinct concession on the part of the Broadcast Industry.

It is supposed that, should long waves be allocated to broadcasting, the first station or stations would be built at or near one of the northern sites indicated in Figure 3, since the relative freedom from atmospheric noise in the upper latitudes would make these locations more valuable. After obtaining a considerable amount of operating experience with these northern stations, it would be possible to locate one in the south to the best advantage. On the other hand, if the international situation required it, the fourth frequency might be assigned to Canada or Mexico, although it would not be well suited to the needs of the latter.

Further Comparisons of 200 k.c. with the Present Broadcast Frequencies.—In order to further emphasize the improvement in coverage that might be obtained by the use of long-wave broadcasting, the one millivolt and three millivolt contours have been drawn around the hypothetical station No. 1 for three different frequencies, a 1000 k.w. radiated power being assumed in each case. These contours are shown in Figure 5. The solid lines represent the three millivolt contours for frequencies of 1000, 600, and 200 k.c., while the dashed lines show the one millivolt contours for the same three frequencies. The region enclosed by the three millivolt line is nearly ten times as large at 200 k.c. as at 1000 k.c. Comparing the area enclosed by the one millivolt line for 1000 k.c. with that enclosed by the three millivolt line for 200 k.c. (which might be a reasonable comparison on many summer days), it is evident that the long waves will still do a better job. Even at 600 k.c. the one millivolt limit lies well within the three millivolt 200 k.c. contour.

Presumably the cost of radiating a given amount of power at 200 k.c. would differ from that at higher frequencies chiefly insofar as it was affected by the cost of the antenna system. In the existing broadcast band considerable success has been had with vertical radiators between five and six-tenths of a wavelength high, but it seems unlikely that such antennas would prove in at 200 k.c. The reduction in sky wave which can be obtained is less marked at three to four hundred miles than it is at fifty to one hundred. This is due to the fact that the difference in the vertical radiation pattern of a half wave and a quarter wave antenna is not pronounced at the rather low angles at which this long distance sky wave leaves the radiator. Consequently, the "anti-fading" characteristics of the high mast would be less marked at long wavelengths, and it is doubtful if the rather small increase that can be obtained in the ground wave could possibly justify the cost of a mast some 2400

feet high. On the other hand, a quarter-wave mast about 1200 feet high is not out of the question, and, with the steadily falling prices of such structures, should not be an undue economic burden. Its effective electrical height could be increased as much as 30 percent by loading with a capacity hat at the top, although this might not be economically justified.

Receiving Equipment.—There are in the possession of the public today a great many receivers equipped with a so-called "X" band, which covers a range of about 160 to 420 k.c. These sets could be used for tuning in long-wave broadcasting stations without any modification whatever.

Because of the high field strengths involved and the long distances to be covered, it would probably be desirable to cut off the audio program fed to the transmitters sharply at 5 k.c., thereby avoiding any sideband overlap. A coupled circuit capable of faithfully receiving an over-all band width of 10 k.c. at a mid-frequency of 200 k.c. can be readily built for use in the receiver. Design data show that a pair of circuits can be adjusted to have a peak 3 d.b. above the center of the band, a response at 5 k.c. equal to that at the center, and a discrimination against 10 k. c. of approximately 14 d.b. Under unfavorable receiving conditions the width of this filter could easily be reduced and with an over-all width of 5 k.c. the discrimination against a frequency 10 k.c. off the center of the band could be increased to about 26 d.b.

It would probably be desirable to use two such coupled circuit filters, one ahead of and one immediately following the R.F. amplifier tube. The second filter would be connected to the grid of the converter tube, and the remaining selectivity would be provided in the I.F. amplifier.

The use of an intermediate frequency of about 460 k.c. would present no serious difficulties, as is evidenced by the performance of the existing "X band" receivers.

SECTION C

The Problem of Fitting a 200 K.C. Broadcast Band Into the Present Allocation Structure

Past suggestions regarding the allocation of certain long waves to broadcasting have not found favor, because of their failure to provide a definite plan for dealing with the services now occupying the needed channels. We have, therefore, studied the present allocations with a view to developing a plan which would cause a minimum of inconvenience to other radio services, and which would not be detrimental to safety of life and property at sea and in the air, or to national defense. We do not contend that the suggestions about to be made are the only ones for which a sound technical case can be built; in fact, four channels are certainly inadequate and are out of keeping with the requirements of extensive rural coverage. The frequencies requested have been reduced to four with full realization that we are thereby permanently penalizing the development of long-wave broadcasting by making it impossible for this country ever to have a long-wave system comparable with that of Europe or sufficient for the well understood needs of rural United States and Canada. Our reasons for this sacrifice are based entirely on a desire to cooperate with the other services which must use the low frequencies, particularly the military branches and the commercial air groups. We have not attempted to pick the exact frequencies which would necessarily give the best balance between coverage and economic considerations, but have chosen a band which can, as we shall attempt to show, be allocated to broadcasting with little inconvenience to existing services and without detriment to their essential character.

Let us contrast this proposal with those which have been made in Europe. An article entitled "Report of the Mixed Judicial and Technical Commission of the International Broadcasting Union," which appeared in the *Journal of Radio Law*, Vol. 1, 1931, pp. 241-263, states in part:

"In evaluating the needs of the different services in regard to wavelengths, the fact must be taken into consideration that in certain circumstances a single transmitter can assure a national service capable of reaching several millions of listeners, if the transmitter has a suitable wavelength at its command. One thus reaches the conclusion that the advantage conferred upon the community by the extension of the potentialities of broadcasting is likely to surpass in weight considerably the sacrifices which might possibly result from a corresponding diminution of the bands left at the disposal of other services."

"... It would therefore seem logical to decide that, in principle, services which can employ no other means of communication should have a priority when radio-electric channels are being allocated.

"It is perfectly evident, for example, that communication with ships at sea and with aeroplanes, and the broadcasting services, should enjoy this priority.

"When two or more different services, of which none can employ any other means of communication, claim channels for radio-electric liaison, that which has the greater importance to society should have priority."

Proceeding upon these assumptions the Commission suggested the following bands of frequencies be assigned to broadcasting:

150-285 k. c.

370-460 k. c.

540-1500 k. c.

3500-4000 k. c.

A band 150 k. c. wide in the neighborhood of 17800 k. c.

Presumably because of the undeveloped state of the short-wave art, no further recommendations for aural high-frequency bands were made.

These proposals show the realization, by informed European authorities, of the needs of broadcasting and of the possibility for satisfying these needs. While the recommendations have not been adopted in toto, examination of Table I will indicate that a great deal has been gained for the broadcasting service.

The Frequency Interval from 175 to 225 k.c.—It is in this range that four broadcast channels could be placed. It is evident that

while there is more than one possible arrangement, a system of four adjacent channels would be preferable to one in which they were interlaced with other services. Therefore, we should have assignments of either 180, 190, 200, and 210 k.c., or of 190, 200, 210, and 220 k.c. Let us discuss the first case.

In studying the existing frequency assignments, use has been made of the Berne Frequency List dated March 1936, as well as of certain other documents that will be mentioned at the proper place. It is realized that some little time must have elapsed since the last registrations shown in this List were made, and that consequently the assignments in use today will differ slightly from those that we shall discuss. However, it is inevitable that such a lag should occur, and any suggestions that would have been satisfactory six to ten months ago, could be brought up to date without great modification. It is suspected that the Berne List does not contain complete data with regard to military and naval stations, but lacking better information we have to develop our suggestions on the basis of this List, and hope that secret assignments are not numerous enough to appreciably affect our analysis.

The frequency 175 k.c. is used by the International Ice Patrol in the North Atlantic, as well as by three Coast Guard stations on the Great Lakes. If a broadcast station operating on 180 k.c. were placed not far from the western edge of the United States, it would be some 3000 miles from the scene of activity of the Ice Patrol. The maximum night-field law developed by Norton, Kirby, and Lester²¹⁵ indicates a quasi-maximum intensity at this distance of about 10 microvolts per meter, for one kilowatt of radiated power. If the station actually radiated 1000 kilowatts, this would result in a field strength of approximately 320 microvolts per meter. Certainly a carrier of this magnitude should in itself cause no interference to services 5 k.c. removed.

That the presence of the side frequencies would cause a negligible amount of trouble may be seen from the following argument: If the station were continuously modulated one hundred percent with a five thousand cycle tone, an interfering field of not more than 160 microvolts per meter, maximum night-time value, would be laid down directly on the Ice Patrol frequency. However, it is well known that when a station modulates one hundred percent on peaks the average is much lower and is, in fact, nearer thirty percent. Moreover, the modulation factor of the higher frequencies is invariably far less than that of the lower. Taking these facts into account it is estimated that the interference would hardly be greater than that caused by a C. W. signal of about 25 microvolts per meter at a frequency near 175 k.c.

The foregoing is based on the assumption that the sky wave at 180 k.c. is as strong as in the existing broadcast band. As has already been pointed out, this is probably not the case, and the interference would therefore be less than that estimated above.

It is evident that effective interfering fields of only a few microvolts per meter, and intermittent in character, could hardly cause any appreciable trouble to ships receiving the Coast Guard broadcast, provided those ships were equipped with receivers having adequate selectivity.

Aside from the theoretical considerations of interference which might be caused by a station situated in the western part of the United States, we have the fact that there is a 75 k.w. broadcast station in Paris on a frequency of 174 k.c., only 1 k.c. removed from that used by the Ice Patrol. As long as this station can be tolerated it is idle to talk of possible interference by an American station on 180 k.c.

In the Executive Order of December 1935, there are listed Coast Guard stations at Wilmette, Illinois, Cleveland, Ohio, and Buffalo, New York, on 175 k.c. These stations, which are not shown on the Berne List, are presumably of low power, since they are intended for operation over the relatively short distances involved in communication on the Great Lakes, and it seems reasonable to suppose that in view of these distances, the shore stations and ships might tolerate a small amount of interference from a distant broadcast station 5 k.c. removed. If this is not so, these stations could certainly be moved to high frequencies. It does not seem that the Great Lakes services, with their limited distances of operation, can possibly have as great a need for the low frequencies as services on the oceans. Therefore, if any serious cooperative effort is made it should be possible to re-allocate certain low-power stations now occupying these channels. This would apply as well to the Great Lakes lighthouse tenders operating on 180 and 190 k.c.

There is a 2 k.w. station in southern Mexico on 176.5 k.c. and a 5 k.w. station on the same frequency in lower California. This latter would probably have to be moved by arbitration with Mexico.

There is a group of six Coastal Telegraph stations on 177 k.c. located at various points on the shores of the Great Lakes and using powers of 1 k.w. or less. Here again it is our feeling that

low-power short-range stations need not occupy valuable low frequencies, but could properly discharge their functions by operation above the broadcast band. This also applies to a 100 watt station on this wavelength located in British Columbia.

178 k.c. is assigned to the Army. This will be discussed in connection with the other Army frequencies that must be dealt with.

On 179 k.c. are two Canadian stations of 1.6 k.w. each, operated by the Department of Marine. Arbitration would be required here, but it is hard to believe that the existence of such stations could block a re-allocation which will be advantageous to Canada as well as to the United States.

There are two Canadian stations of 300 watts each on 182 k.c. operated by the Hydroelectric Power Commission, Ontario. On this same frequency is a 500 watt station in British Columbia operated by the Canadian Fishing Company. The service rendered by these low-power transmitters could certainly be carried out on other wavelengths with, possibly, an increase in power. As has been said before, such low-power operation cannot be considered an efficient use of valuable long-wave assignments. The same applies to the three point-to-point telegraph stations on this frequency located in the United States and to the Canadian station on 183 k.c. at Yakoo Bay, British Columbia.

185 k.c. is listed as a Canadian ship channel. Since it lies directly between two of the proposed broadcast assignments it might continue in partial use, especially on the eastern coast of Canada. There it would be subject to more interference than would the 175 k.c. channel, already discussed, but operation should still be possible.

185 k.c. is assigned by Executive Order to Naval coast and fixed stations. The Berne List shows one kilowatt units at Jupiter and at Key West, Florida, as well as a 200 watt transmitter at Parris Island, So. Carolina, and comments made with respect to the Canadian ship frequency apply equally to these stations. However, if there were some interference, it should be possible to move them to one or more of the following channels now assigned to the Navy: 132, 128, 115, 108, 104, 102. Key West already has an assignment on 113 k.c. and presumably the 185 k.c. channel is unnecessary. 115 k.c. is a naval assignment with no stations in the continental United States shown in the Berne List.

There are sixteen Canadian stations on 187 k.c., mostly of low power, although there is one of 2 and one of 5 kilowatts. The fact that so many of these transmitters are on the same frequency indicates that they do not operate continuously. An examination of the Berne List shows no good reason why they could not be transferred to 145 k.c., which is also a Coastal Telegraph frequency.

There is a 2.5 k.w. station in southern Mexico on 187.5 k.c. Presumably this station would not be seriously affected and would cause negligible interference in the United States.

On 190 k.c. is a fairly large group of low-power stations, none more than 300 watts, all located in Ontario, and all operated by the Hydroelectric Power Commission of Ontario. There can certainly be no justification for filling up this important frequency with a group of small stations which could be operated at almost any part of the frequency spectrum.

190 k.c. is also used by five stations of the Pennsylvania State Police, but, as these have a maximum power of 250 watts and the distances to be covered are presumably limited to those within the borders of the State, it is evident that these stations could be accommodated on the higher frequencies.

On 193 k.c. is a group of Canadian stations operated by the Department of National Defense. These will be discussed later in connection with the United States Army assignments.

The Department of Commerce Frequency List, dated February 28, 1936, and a bulletin entitled "Bureau of Air Commerce Radio Facilities and Broadcast Schedules," corrected to May 7, 1936, show that there are 20 stations engaged in aircraft services on frequencies below 230 k.c. These are listed in Table 2 below. Of these, six are low-power marker beacons of very limited range, and are therefore capable of being accommodated elsewhere without great difficulty.

TABLE II

*Bureau of Air Commerce Radio Facilities and Broadcast Schedules
Below 230 k.c. (as of February 1, 1936)*

Frequency in k.c.	Location	Power	Type
206	Las Vegas, New Mexico	—	MRLW
206	Roanoke, Virginia	.15	MRA
209	McConnellsburgh, Pa.	.15	MRL-DT
209	Saugus, California	.15	MRL-DT
209	St. Louis, Missouri	1.2	B-RLZ-DT
212-320	Adair, Iowa	.005	MT

212	Des Moines, Iowa	2.0	RA-T
212	Mercer, Pennsylvania	.5	ML-DT
212	Montezuma, Iowa	.005	MT
224	Bellefonte, Pennsylvania	1.2	BRA-DT
224	Birmingham, Alabama	1.2	BRAP-D
224-344	Brookville, Pennsylvania	.005	MT
224	Davenport, Iowa	1.2	BRA-DT
224	Livingston, Montana	.15	MRAP
224	Mt. Shasta, California	.8	RA-VT
224-260	Oceanside, California	.005	MT
224	San Diego, California	.75	RL-T
224	Sunbury, Pennsylvania	.005	MT
224	Tacoma, Washington	.15	RL
224	Woodward, Pennsylvania	.005	MT

It is realized that these aircraft stations are part of a very important service to a growing and highly essential industry, and that their contribution to the safety of life and property in the air is a most important one. We would not consider any proposal calling for the restriction of these stations, but merely suggest that a few of them might be transferred, without impairment in operating efficiency, to one or more of the following frequencies: 403, 414, 421, or 432 k.c. In order to show that such transfers would be possible let us examine conditions on these frequencies.

400 k.c. is a ship telegraph channel for ocean service, and is not used on the Great Lakes. Many of the Air Commerce stations have powers ranging from 150 down to 5 watts, and it is contended that such stations operating on 403 k.c. could be located at points not less than 600 miles from the Atlantic and Pacific coasts, without undue interference with any of the marine services. Because of the higher noise levels prevailing in the Gulf, it would seem reasonable to allow low-power stations at distances 400 miles or more from the Gulf Coast. Since 410 k.c. is used for distress and calling on the Great Lakes it might be necessary to keep 403 k.c. beacons 100 miles from their shores. From Figure 6 may be determined the area which would be available for the location of low-power Air Commerce stations under these conditions, and it will be seen to include the states of Wyoming, North Dakota, South Dakota, Nebraska, Kansas, Missouri, nearly all of Colorado, and large portions of Minnesota, Illinois, Oklahoma, Texas, New Mexico and Montana.

Let us determine the field from a 150-watt transmitter to be expected at the coast. Assuming that fifty per cent of the power supplied to the antenna is radiated, which is probably much too high an estimate, the quasi-maximum night field would be about 100 microvolts at 600 miles. Since coastal stations intended for communication with ships can gain nothing by having a high receiving efficiency in the direction of the interior, it seems only reasonable to suggest that they should use a moderate amount of directivity in their receiving antennas, and we might assume a 6 d.b. lower receiving efficiency on the inland side than on the seaward side. This would reduce the quasi-maximum night interference to 50 microvolts per meter. It is believed that such weak interference, three k.c. removed from the assigned channel, would not be objectionable, even without the use of directive antennas at the shore stations.

The antenna used on shipboard would not in general have directive receiving characteristics. However, when the ship is well out to sea, so that the signal from the coast station has fallen to about 100 microvolts, the distance from the ship to the beacon will be very much greater than 600 miles. Consequently the maximum interference to be expected would be very low, probably less than 20 microvolts per meter.

The foregoing refers to a 150-watt station. Many of the marker beacons used by the Bureau of Air Commerce are of considerably lower power and would cause negligible interference at any coastal point.

There are no North American stations in the interval between 410 and 417 k.c. On the latter frequency there are only two, one being at Yarmouth, Nova Scotia, and the other, of 100 watts power, at Cape Lazo on the western coast of Canada. Consequently, it should be possible to locate air beacons on a frequency of 414 k.c., now officially allocated to aircraft, with great advantage to the Air Commerce services, and without disadvantage to other groups.

The Frequency Allocation List shows that 421 k.c., which is suggested for air beacon service, is assigned to coastal telegraph, but actually the Berne List gives very few stations on the North American continent in the interval between 418 and 425 k.c. XAJ at Tampico, Mexico, operates at 419.58 k.c., with a power

of 1.5 k.w. This station is far enough away so that there could be no mutual interference between it and beacons operated on 421.5 k.c., especially if no such beacons were located in southern Texas. There is a 100-watt Canadian Marconi station at Grosse Isle, Quebec, which should neither interfere with beacon services nor be interfered with by air beacon operation.

There are Canadian ship stations on 423 k.c. The same remarks apply here as to the marine stations on 400 k.c.

432 k.c. has been allocated to coastal telegraph, but actually there are no stations in North America in the interval between 428 and 435 k.c., exclusive, and consequently there seems no reason why air beacons might not be advantageously located on 432 k.c. Keeping these stations 600 or more miles from the coast, it should still be possible to utilize 432, or its immediate vicinity, for certain types of coastal telegraph service.

These four frequencies of 403, 414, 421 and 432 k.c. should more than compensate for the loss of assignments below 230 k.c. and should allow room for future expansion.

In connection with the possibility of expansion, it should also be noted that there is still a good deal of room on some of the existing Air Commerce frequencies, although many are already well filled. Specifically, the relatively uncrowded frequencies, as indicated by the Frequency List of February 28, 1936, are as follows:

K.C.	Number of Stations as of February, 1936
284	5
290	4
296	2
302	3
308	5
314	2
326	5
359	4
379	3
385	5

Some of these are limited in their usefulness by being shared with various services on the coast, particularly marine beacons. However, it is obvious that there is room for a great many more low-power stations in the interior of the country.

With regard to interference by marine beacons, it is suggested that the crowding in the general vicinity of 300 k.c. might be materially reduced by moving to high frequencies all low-power marine beacons intended for operation over a range of only 15 or 20 miles. These beacons greatly congest the low frequencies along the coast, and their removal would prove a benefit to the marine services as well as to aeronautics. They might be placed next to some of the high-frequency marine bands, and could be located at, say, 2180 or 2740 k.c. Commercial radio-compasses intended for marine use at low frequencies have already been on the market for some time. At the distances involved no trouble from night error or other undesirable effects is to be anticipated.

In laying plans for possible expansion of the commercial aircraft services, it should be borne in mind that the "homing devices," or visual indicator radio compasses, that have been developed in the past few years, may well become so popular as to render unnecessary a considerable number of the radio range beacons now in existence. These compasses furnish a service which cannot be obtained from the range beacons alone, in that they permit a plane to fly directly toward any radio station, be it beacon, broadcast or otherwise, within the tuning range of the equipment. On the other hand, the range beacons lay down a few definite courses and are of little use in the sectors between them. When we consider the wide distribution and relatively high power of broadcast stations, these advantages of the "homing device" are seen to be of considerable importance. In fact, a radio guidance system for aircraft use might well be developed around the broadcast facilities. Were this done, it would probably be necessary for the stations involved to radiate a tone-modulated carrier, perferably of reduced power, during the hours that were not filled by their regular programs. The objection that broadcast stations are not always located conveniently with respect to nearby landing fields could be met by using low-power marker beacons to guide planes from the broadcast antenna to the field. Because of the extremely small power requirements of such markers, they could be duplicated, on the same frequency, at numerous points in the country. In evaluating the requirements of commercial aviation services, it is urged that these suggestions be given serious consideration.

The Army Assignments—The Army has by far the largest number of assignments in the frequency band being suggested for broadcast use. Before discussing these in detail, it may be well to list all the frequencies that are allocated to the Army by Executive Order of December 19, 1935. They are as follows:

TABLE III

Army Assignments Without Limiting Classification, and Therefore Presumably Exclusive

75, 83, 94, 100, 159, 196, 197, 198-204, 216-222, 343, 396, 428, 444, 446, 470, 480, 2604, 3497.5, 4020, 4025, 4030, 4080, 4085, 4090, 4255, 4300, 4305, 4310, 4365, 4370, 4375, 4380, 4440, 4445, 4565, 5930, 5995, 8040, 8050, 8060, 8160, 8170, 8180, 8510, 8600, 8610, 8620, 8730, 8740, 8750, 8760, 8880, 8890, 12060, 12075, 12090, 12240, 12255, 12765, 12900, 13095, 13110, 13125, 13140, 13290, 13320, 13335, 16080, 16100, 16120, 16320, 16340, 17020, 17460, 17200, 17480, 17500, 17720, 20125, 20150, 20400, 24120, 24150, 24180, 24480, 24510, 24540, 25530, 26190, 26220, 26250, 26280.
Total: 90 frequencies plus 2 low-frequency bands of 6 k.c. each.

TABLE IV

Frequencies Available for Use Provided No Interference Is Caused to Any Other Existing Service

166^f, 178^f, 1652, 1666, 1682, 1712, 2206, 2310, 2624, 2960^c, 2970^c, 2980^c, 3105, 4035, 4215, 4220, 4225, 4590, 4595, 4600, 5920^c, 5940^c, 5960^c, 6210, 6940, 9120.

Total: 26 frequencies.

Superscript c indicates that it may be used by the Army provided no interference is caused with Air Commerce Stations.

Superscript f indicates that the frequency is not to be used in the vicinity of the Great Lakes.

TABLE V

Available for Non-Government Assignments

120, 133, 454, 476, 550-1500, 2628-2632, 2708-2712, 4610, 6250, 8330.

Total: 7 frequencies plus 1 band of 950 k.c. and 2 bands of 4 k.c.

It will be noted that this classification includes almost the entire broadcast band which is open to use by the Army.

TABLE VI

Frequencies Available for Use by Government Stations Provided No Interference Is Caused to Non-Government Operation

2522, 2994, 4130^h, 4360^h, 5835^h, 5875^h.

Total: 6 frequencies.

Superscript h indicates available for use provided no interference is caused to any other existing service.

TABLE VII

Frequencies Available for Non-Government Assignments in Alaska

172, 192, 225, 272.

Total: 4 frequencies.

Evidently the Army is fairly well supplied with assignments, and it is not unreasonable to suppose that some of the stations now operating between 175 and 215 k.c. might be accommodated on other existing Army frequencies. This should be particularly true of at least some of the many 300-watt United States Army stations which appear in the Berne List. Such stations must necessarily have a very limited range and could presumably operate on shorter wavelengths.

We have proposed no broadcast station on 220 k.c., despite the fact that a fifth frequency is obviously needed for national coverage, in order that there may be a clear band available for use by the Army air services. It should be possible to accommodate the air service stations now operating on 192, 200, and 206 k.c. in this range. According to the Berne List, these three frequencies are the only ones extensively used by the Army at present. While there are no doubt many military stations which do not appear in the Berne List, some of these could be accommodated between 215 and 228 k.c., while others might be moved to Army assignments at 172, 159, 120, 94, 83, or 75 k.c.

The use of the various Army frequencies below 225 k.c., as shown by the Berne List, is summarized in the following Table.

TABLE VIII
Army Stations Below 230 K.C.

Frequency in k.c.	Number of Stations	Maximum Power in k.w.	Remarks
225	2	.1	Alaska
222	1	.3	Philippines
221	2	2.0	
220	24	2.0	19 are .3 k.w.
219	11	2.0	8 are .3 k.w.
218	2	.75	Alaska
217	6	.3	
216	3	2.0	
206	11	2.0	Only 4 in continental United States
203	1	.75	Alaska .
202	3	.3	
200	36	2.0	31 are .3 k.w.
197	1	.3	
196	1	.3	
192	20	2.0	17 are .3 k.w.
172	22	2.0	13 are .3 k.w.
159	10	2.0	
133	2	4.0	Alaska
120	1	4.0	Alaska
94	1	.5	Alaska
83	1	10.0	Seattle, Wash.
75	1	10.0	Alaska

The Canadian stations operated by the Department of National Defense on 193, 200, 207, and 214.3 k.c. would presumably have to be moved, in part, to the 215-230 k.c. band, but it is unlikely that they would cause any more interference to the United States Army stations than they do at present. In fact, it might be possible for some of these stations to operate on 175, 185, 205, or 215 k.c. without great trouble, since the distances between the interfering American broadcast stations and certain parts of Canada would be large. Similar allocations, based on wide geographical separation, might also be used by the United States Army.

In view of the foregoing analysis, it is believed that a satisfactory system can be worked out for the military services of the United States and Canada, and for the broadcasters as well, if the problem is attacked in a spirit of reasonable cooperation.

SECTION D

The Frequency Interval Just Below 550 KC
